CHAPTER 1

About This Manual

Welcome

This manual has been designed to guide you through the use of Human Resources Administration, which provides the tools to manage the flow of employees in and out of your organization, maintain employee career development, track employee safety and behavior, and maintain compensation functions..

This manual has been designed as a reference document. It is also used in classroom training. You will find sufficient detail for self-study, before and after classroom training.

Who should use this manual?

This manual is designed to be used by a number of different users. The following users will find it most useful:

- Human Resource Managers
  Human Resource Managers will find it helpful to read through the entire manual, concentrating on Parts 1 and 2. These parts provide a big picture of the system and also cover considerations for implementing it.

- Human Resource personnel
  All Human Resource personnel who will be using Human Resources Administration should read Part 1 to obtain an overview of the system. Additional parts should be read as they apply.

Prerequisite skills

Users of this manual should possess a variety of technical skills, depending on the roles they will play. At a minimum, all users should have:

- Basic understanding of Microsoft Windows
- Completed either the eCyborg: Using the Web Client or Using The Solution Series: Administrative Solutions computer-based training course
- Attended training, or have experience using the system (either the eCyborg: Using the Web Client or Using The Solution Series: Administrative Solutions training class is recommended)

Additional documentation and training courses

The following documentation and training courses are available from Cyborg Systems to help you understand and administer Human Resources Administration.

Documentation

Document	Description
eCyborg: Using the Web Client or Using The Solution Series: Administrative Solutions	This prerequisite course documentation covers the introductory concepts and tasks related to Cyborg's administration solutions. It describes how to navigate through the software and explains important concepts and functionality of the system.

If you do not have a copy of this document, you can obtain one from Customer Support.

Training Courses

Related Course	Description
eCyborg: Using the Web Client or Using The Solution Series: Administrative Solutions	This prerequisite course covers the introductory concepts and tasks related to your specific implementation of Cyborg's administration solutions. It may be completed by attending a class or by completing computer-based training. All implementation team members are required to take the classroom training.

If you wish to attend any of these courses, contact Customer Support or visit our website www.Cyborg.com for details of course dates and availability.

How this manual is organized

This manual has been organized to make it as easy to use as possible. The chapters are grouped accordingly into the following parts:

Part	Chapters	Description
1. Introduction	1–2	These chapters introduce Human Resources Administration by providing an overview of the system and explaining its interaction with other components of the system.
2. Employee Resourcing	3–6	These chapters provide an explanation of the concepts and detailed directions needed to set up Human Resources Administration.

Part	Chapters	Description
3. Employee Development	7–8	These chapters provide a detailed explanation of the procedures for tracking employee development.
4. Employee Relations	9–10	These chapters provide directions for managing well-being and behavior (health and safety, grievances, and so forth).
5. Employee Compensation	11–13	These chapters provide directions for dealing with employee compensation issues.
6: Appendices	A–C	The appendices provide quick references for reports and tables.

Following are descriptions of the chapters within the parts:

Part 1: Introduction

The chapters in Part 1 describe this manual and provide an overview of Human Resources Administration:

Read this chapter		To learn about
1	About This Manual	How the manual is organized, where to find what you are looking for, who should use the manual, and where to get help.
2	Overview of Human Resources Administration	The features included in Human Resources Administration and how this component interfaces with other HR components, Payroll Administration, and Time and Attendance Administration.

Part 2: Employee Resourcing

The chapters in Part 2 explain the concepts and provide detailed directions for setting up essential Human Resources Administration data:

Read this chapter		To learn about
3	Recruiting and Selecting Employees	Using Human Resources Administration for recruitment and selection of employees.
4	Hiring, Rehiring, Reinstating, Recalling, or Transferring an Employee	Using Human Resources Administration for hiring new employees; rehiring, reinstating, or recalling former or inactive employees; and transferring existing employees.
5	Managing Employee Attendance	Methods of tracking employee attendance including recording, reporting, and analyzing all employee absences.
6	Processing Terminations, Leaves and Returns, and Other Major Activities	Using Human Resources Administration to process employee terminations, leaves, returns, and other major activities.

Part 3: Employee Development

The chapters in Part 3 describe how to track employee development and performance:

Read this chapter		To learn about
7	Tracking Employee Skills, Competencies, and Training	Recording and tracking key information about employee abilities, including formal training and education, tuition costs, and certificates, and licenses.
8	Tracking Performance Appraisals	Tracking assessments of employee work-related strengths and weaknesses and the link of performance appraisals to salary considerations, employee development, and advancement.

Part 4: Employee Relations

The chapters in Part 4 provide directions for tracking employee welfare and behavior:

Read this chapter		To learn about
9	Managing Employee Health and Safety	Recording employee health information, including disabilities and restrictions, and the results of physical exams.
10	Tracking Discipline and Grievances	Tracking discipline and grievances, reviewing procedures and legal requirements, investigating cases, conducting meetings or hearings, and recording actions taken.

Part 5: Employee Compensation

The chapters in Part 5 provide directions for managing employee compensation activities:

Read this chapter		To learn about
11	Managing Employee Compensation	Administering employee pay and benefits, formulating compensation policies and procedures, and developing compensation cost containment and management strategies.
12	Tracking Employee Relocation Expenses	Recording and analyzing important aspects of employee relocation such issues as bridge loans, temporary living expenses, moving expenses, and house-hunting expenses.
13	Allocating Property to and Recovering Property from Employees	Establishing accurate and timely employee records used to track the costs and allocation measures associated with non-monetary perquisites, company property, and automobiles.

Part 6: Appendices

The appendices in Part 6 contain quick reference information and practice and review answers:

Use this appendix		To learn about
A	Report Quick Reference	Human Resources Administration reports and their business uses.
B	Form Title/Form ID/Segment Cross-reference	A cross-reference of Human Resources Administration form titles, IDs, and segment codes.
C	Practice and Review Answers	Detailed answers to the practices and reviews at the end of the instructional chapters.

How to use this manual

This manual has been designed as a reference manual as well as a training manual. It has been written to facilitate self-study before and after classroom training.

Table of contents

The manual has been carefully designed for ease of use. All our manuals are written to be task oriented to help you complete your business tasks using our software.

The table of contents lists all the tasks and their respective chapters.

Glossary of Terms

A Glossary of Terms section is provided to explain terms used in the documentation.

Index

An index is provided to help you locate specific information.

This document was designed to reduce your need for an index. You should find the table of contents sufficient.

Introductory chapters

It is important that you read the introductory chapters first. Chapter 1 ensures you get the most out of the information we have provided. Chapter 2 provides a high level overview. Read it to get the big picture before reading the detailed instructional chapters.

Instructional chapters

All chapters, other than the introductory chapters, are instructional chapters. They contain detailed instructions on how to complete the business tasks. Each instructional chapter has the following distinct sections:

Key Concepts

Always read the conceptual information first. This will help you understand why you have to perform certain tasks. It will also help you make decisions about your options and help you understand the importance of performing certain tasks. Exercises to help you apply the concept to a business task are included at the end of most concepts.

Apply the Concept
To be certain that you have understood the key concepts in a chapter, complete the Apply the Concept exercises provided. The answers to these exercises can be found in the appendices.

Detailed Directions
When you are ready to perform a task, review the Detailed Directions, which provide guidance, as well as the specific steps, to complete a task.

Guided Practice
The Guided Practice within the Detailed Directions offers you an opportunity to practice a task with step-by-step instructions. It takes you through the various steps, providing detailed examples so you can gain a comfort level with the task. Guided Practice is easy to locate.

For practice, type 'ABC Solutions'.

Note: *To successfully follow the Guided Practice, you must have completed all the previous Guided Practice exercises in the manual. The Guided Practice uses the test data installed with our software. For the Guided Practice exercises to work, this test data must not have been altered.*

All users who complete the Guided Practice must either have their own copies of the test data or have the test data restored for them.

Extended Practice
To be certain that you have understood the tasks in a chapter, complete the Extended Practice provided. The Extended Practice gives you the opportunity to complete one or more tasks without step-by-step guidance. The answers to these exercises can be found in the appendices.

Note: *To be able to complete the Extended Practice exercises in the manual, you must have completed all the previous exercises. You must also be using the test data delivered with the software. This test data must not have been altered.*

Review of Questions Answered
To be certain that you have understood all of the information in a chapter, complete the review questions provided at the end of a chapter. The answers to these questions can be found in the appendices.

Conventions used in this manual
The underlying page layout and design of this manual are meant to be as intuitive as possible for you. Our intent is to make it easy to navigate through the manual and concentrate on learning and doing.

Cross-references
Wherever appropriate, we provide cross-references to help you find additional information or further discussion of a specific topic.

☞ *Refer to a cross-reference to find more detail or more discussion on a given topic.*

Notes

Whenever there is important information you should be aware of, we provide a note.

Note: *You will find tips or quick techniques covered in notes.*

How to get additional help

If you can not find the answers to your questions in this manual, contact Customer Support, who will be able to answer specific questions and give you general advice on training.

Please visit our web site ***www.Cyborg.com*** (see "Cyborg Home - http://www.Cyborg.com") for the latest schedule of available courses and course descriptions.

Suggestions and feedback

We value your feedback on our performance support materials. Please forward any comments on this manual to Customer Support.

CHAPTER 2

Overview of Human Resources Administration

In This Chapter

Introduction

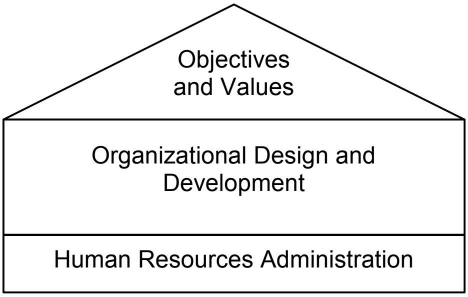
Today's Human Resource departments are being called upon to move beyond their traditional objective—the management of an organization's key asset, its human resources—and to align themselves with organizational business strategies. The HR strategy must support the larger goals of the organization. This section provides an overview of Human Resources Administration and introduces the features that can be used to support a business-led human resource strategy.

HR areas and solutions

In determining their strategies, many organizations follow processes defined by organizational design and development (OD&D). OD&D is generally conducted as a means of:

- Identifying an organization's critical success factors
- Clarifying the organization's desired mission, objectives, or purpose
- Stating the values or principles by which the organization will be governed and by which it hopes to achieve its stated objectives
- Redefining job roles, work methods, policies, procedures, and hierarchical structure to achieve alignment with organizational objectives and values

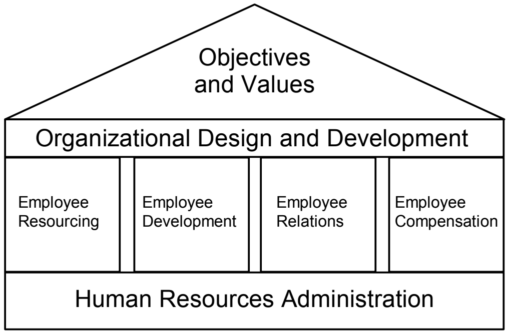
We can view the relationship between HR management (HRM) and OD&D like this. HRM supports OD&D and, in turn, an organization's objectives and values:



Integrated, business-led human resource management can be divided into four functional areas as follows:

- Employee resourcing
- Employee development
- Employee relations
- Employee compensation

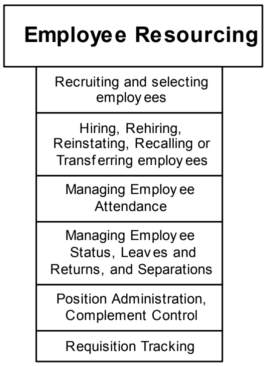
These four areas become the 'pillars' of the integrated HRM solution, as represented here:



Area 1: Employee Resourcing

'Resourcing' involves recruiting, selecting, hiring, utilizing employees with the knowledge, skills and abilities that make them useful to the organization, and eventually retiring or terminating those employees. It ensures that an organization's demand for human assets is supplied at all times by competent workers.

The employee resourcing processes undertaken by most organizations are shown in the employee resourcing pillar:



To support these processes, Human Resources Administration provides the following functionality:

Recruiting and selecting employees

Human Resources Administration provides a variety of facilities to assist you in recruiting and selecting employees.

- Using Applicant Tracking, you can manage the applicant process from the recording of initial applicant information through the interviewing and hiring stages. This component provides facilities to:

- Separate applicant records from employee records.
- Record extensive information on applicants including demographics, job or position applied for, preferred work environment, work history, and contacts/references.
- Record recaps of each interview conducted.

- Hire an applicant and transfer all information to a production company.

- Using Position Administration, you can match the requirements for an open position against those of active applicants.

- Using Requisition Administration, you can track applicants and new hires through the recruitment and selection process. You can ensure that no position is filled without a formal request.

- Using Complement Control, you will automatically be notified of any position vacancies. Complement Control also manages the number of vacancies for which you can recruit.

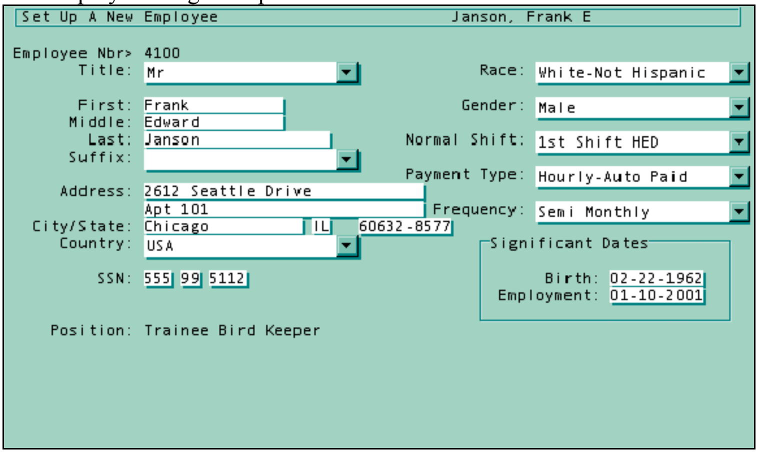
Hiring, rehiring, reinstating, recalling, and transferring employees

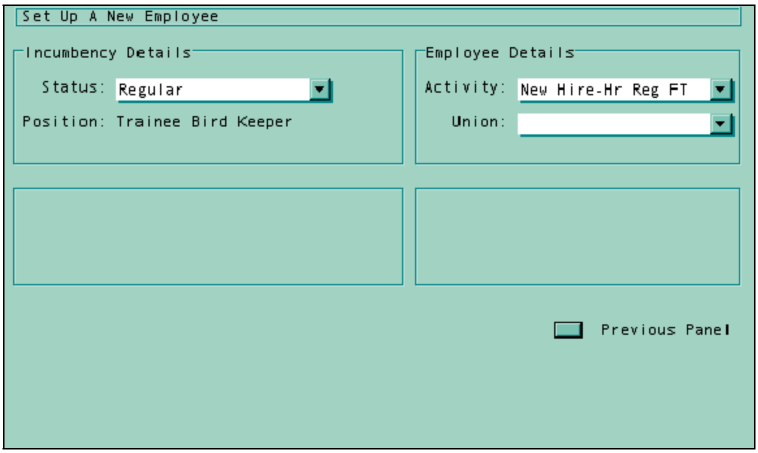
During the hiring process, you assign an Employee Number to an employee and enter demographic and work-related information.

To hire an employee, you will use a pre-defined template. Templates are used to establish common information for a group of employees in one model record. For example, you might create separate templates for hourly, union employees and full-time, salaried employees. When an employee is hired using a template, the template's information is automatically copied to the employee's master record. Because templates populate forms with pre-defined information, they also save data entry time and prevent data entry errors.

Two methods are provided for hiring employees. Using the Employee Information form (EF-SCR) method, you complete detailed information on a series of forms. Using the Quick Hire method, you can hire an employee using a single form (NH-SCR). This method allows you to enter just enough information to get an employee on the payroll. You can add more detailed information about the employee at a later time.

The first and second panels of the following form show the result of using Quick Hire for a new employee using a template:





Optional information you can add about employees includes the following:

- Personal and identification information, including marital and citizenship status, visa information, and security clearance.
- Contact information, including the employee's e-mail address, fax number, cellular, car, and pager numbers.
- Telephone and employment information, including work and home telephone numbers, original applicant number, and employment agency used for hiring, if applicable. If you use applicant tracking, this information is automatically populated.

- Spouse and dependent information, which is helpful for tracking benefit entitlements. Data that can be recorded includes names, ages, and birth dates.

Which procedure you will follow to enter an employee's initial salary depends on whether or not you are using Position Administration.

Rehiring, reinstating, and recalling former employees is simply a matter of updating an employee's master record with current information. The parity requalification date calculated by the system, along with your company policies for leaves of absence, can be used to modify the employee's adjusted seniority date.

Transferring employees is accomplished on a single form (ET-SCR). During the transfer process, you indicate whether payroll, basic human resource, and benefits data should reside in both the old and the new organization, just the old organization, or just the new organization.

☞ *Refer to* **Hiring, Rehiring, Reinstating, Recalling, or Transferring an Employee** *(on page 83) for more information.*

Managing employee attendance

Absence Management provides a foundation for employee scheduling and tracking employee absences by providing running balances for different types of absences, for example, jury duty, sick day, funeral, and various medical leaves.

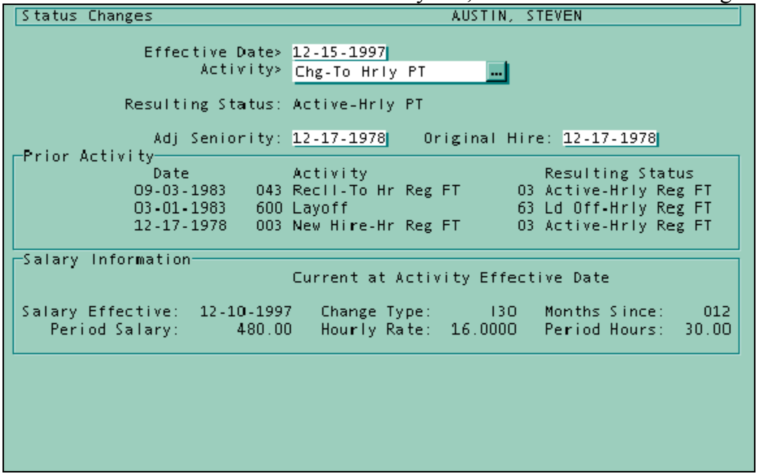
Tracking both excused and unexcused absences provides a clear understanding of why and how previous absences have occurred, and how much time remains for the balance of the year. This information can be used to spot trends in employee absenteeism.

In addition, you can establish weighted absence rating schemes based on individual company policies.

☞ *Refer to* **Managing Employee Attendance** *(on page 165) for more information.*

Managing employee status changes, leaves and returns, and separations

During the implementation of the Human Resources Administration, you will establish a table of valid activities and their resulting employment statuses. When processing employee status changes, leaves and returns, and separations, these rules will be automatically invoked to determine resulting employee statuses. For example, the following form shows that employee Steven Austin is being changed from an hourly full-time employee to an hourly part-time employee. Because the activity of 'Chg-To Hrly PT' is used, the system determines his new status to be 'Active-Hrly PT', as shown on the following form:



Status Changes AUSTIN, STEVEN

Effective Date> 12-15-1997
Activity> Chg-To Hrly PT

Resulting Status: Active-Hrly PT

Adj Seniority: 12-17-1978 Original Hire: 12-17-1978

Prior Activity

Date	Activity	Resulting Status
09-03-1983	043 Recll-To Hr Reg FT	03 Active-Hrly Reg FT
03-01-1983	600 Layoff	63 Ld Off-Hrly Reg FT
12-17-1978	003 New Hire-Hr Reg FT	03 Active-Hrly Reg FT

Salary Information

Current at Activity Effective Date

Salary Effective:	12-10-1997	Change Type:	130	Months Since:	012
Period Salary:	480.00	Hourly Rate:	16.0000	Period Hours:	30.00

☞ *Refer to* **Processing Terminations, Leaves and Returns, and Other Major Activities** *(on page 205) for more information.*

Position Administration

Position Administration facilitates an integration of organizational vision and HRM.

An organization's mission can be defined as 'what the organization is in business to do'. An organization's vision can be defined as 'what the organization will look like when it does this right'. A key component of achieving an organizational vision is implementing an organizational structure. Using Position Administration, you can define the structure of your organization, in terms of units and roles (positions). Position Administration makes possible the strategic alignment of HRM and an organization's goals.

Position Administration provides you with the ability to:

1. Identify gaps in your organization for the following critical activities:

   - Recruitment—Find 'best fit' applicants by defining requirements for positions, and then match those to the external or internal applicant's data.

   - Succession planning—Define requirements for key positions, and then match against information on the Employee Database.

   - Employee development/career planning—Identify what skills/education is required for a position and then determine if an employee has the skills/education. The identified gap becomes the training plan for the employee.

   - Project staffing—Build an organization unit for a project, define positions for each project role, and then search the Employee Database for 'best fit' candidates.

2. View your organization's resource strengths and weaknesses:

- Determine where your organization has a concentration of skills.
- Determine where your organization has vacancies.

3. Restructure your organization.

You can easily reorganize the structure of an organization, or experiment with different scenarios and evaluate their impact, simply by using the dynamic reorganization facilities.

Refer to the Using Position Administration documentation for more information.

Complement Control

Complement Control can be used with Position Administration to limit hires and transfers based on headcounts, Full Time Equivalents (FTEs), or hours budgeted for positions. The values at the organization unit level can be used for complement control purposes, or separate complement values can be set up on a position-by-position basis. This facility prevents the complement from being exceeded when new hires or internal transfers take place.

Refer to the Using Position Administration documentation for more information.

Requisition Administration

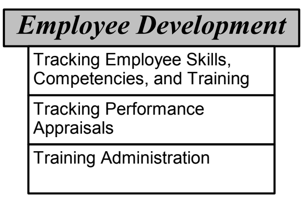
The Requisition Administration component provides the means for controlling the recruitment process through the use of authorized requisitions. Requisition Administration is fully integrated with Position Administration. It can also be used in conjunction with Applicant Tracking.

Refer to the Using Requisition Administration documentation for more information.

Area 2: Employee Development

This function is sometimes narrowly referred to as 'training' or 'training and development.' The employee development function focuses on the abilities of your organization's employees to successfully complete the work they are assigned. It involves much more than simply providing training materials or courses to employees. It includes a wide range of such activities as identifying needed skills through competency gap analysis, providing development opportunities, tracking employee competencies, and tracking and analyzing performance appraisal results. These activities can be undertaken on both an organizational level and an individual employee level.

The processes that will help you manage employee development effectively are shown in the employee development pillar:



Tracking employee skills, competencies, and training

Succession planning, career planning, and workforce planning are three areas of employee development that require extensive information about employees. To foster these types of planning, you can track the following types of information about employees:

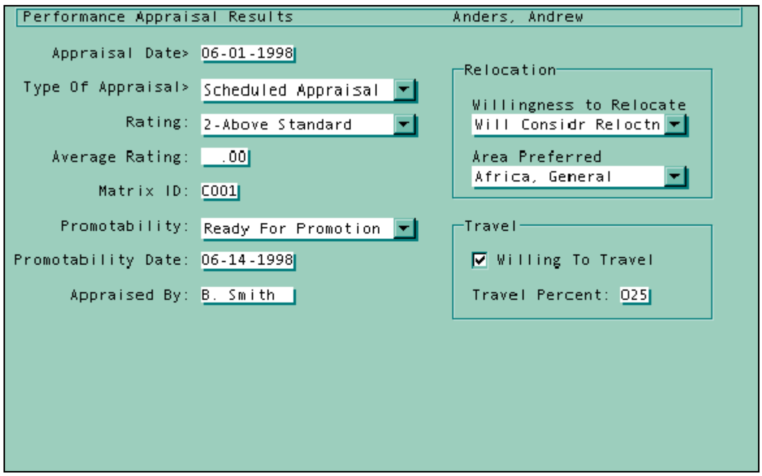
- Formal education
- Training scheduled and taken
- Tuition reimbursement
- Skills and competencies
- Certificates, licenses, permits, and their expiration dates
- Professional association memberships

☞ *Refer to* **Tracking Employee Skills,Competencies, and Training** *(on page 237) for more information.*

Tracking performance appraisals

Human Resources Administration provides facilities for you to both schedule/track performance appraisals and record their results.

Extensive information can be recorded about performance appraisals. The following form shows the results of a scheduled performance appraisal for employee Andrew Anders:



The two following reports are provided to help you track performance appraisals:

- Performance Appraisal Scheduled For Month Of: XX (1R-RPT)
- Performance Appraisals Not Returned By Expected Date (1Q-RPT)

If you are using Salary Administration, you can link performance appraisal ratings to automatically generate pay increases.

☞ *Refer to* **Tracking Performance Appraisals** *(on page 267) for more information.*

Training Administration

The Training Administration component allows you to define courses, schedule classes, and set up training programs. Complete registration and reporting facilities are provided, including automatic wait-listing of students for fully booked classes and class confirmation/cancellation and reminder notifications.

Cost analysis and chargebacks can be tracked using standard reports, including the following:

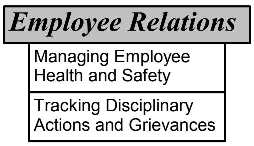
- Training Expenditure Charge-Back (27RRPT)
- Training Expenditure Disbursement (28RRPT)

Refer to the Using Training Administration documentation for more information.

Area 3: Employee Relations

'Employee relations' refers to aspects of the employee-organization relationship that are not already provided for under the areas of employee resourcing, employee development, and employee compensation. These are employee health and safety management and the tracking of disciplinary actions and employee grievances.

The two processes of the human relations area in an integrated HRM solution take their place in our diagram of an integrated HRM solution as shown here:



Managing employee health and safety

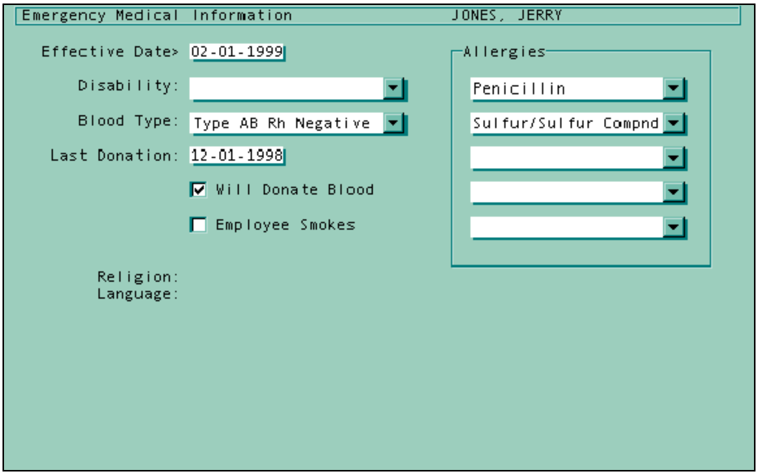
Facilities are provided for you to record, track, and report on the health and safety of employees including individual employee conditions, such as allergies, work restrictions, and workplace accidents. Standard reports are provided for reporting accidents to regulatory organizations, such as OSHA.

Job forming and wellness plans are accommodated through physical exam scheduling and reporting.

You can record and track the following:

- Emergency medical information (15-SCR)
- Injury, illnesses and work restrictions (17-SCR)
- Emergency contact and physician (16-SCR)
- Physical exams scheduled and completed (18-SCR)
- Physical exam test results (19-SCR)
- Injury Information (PR-SCR)
- Additional Injury Information (PROSCR)

The following form shows the emergency medical information recorded for an employee:



Refer to **Managing Employee Health and Safety** *(on page 285) for more information.*

Tracking discipline and grievances

Part of employee or labor relations includes the tracking of disciplinary actions taken against employees and the tracking of grievances filed by employees.

For disciplinary actions, you can track the date and type of problem and then the specific information about the action taken. You can also indicate whether a follow up review should take place, and, if so, when.

For grievances, you can record complete information about the grievance, including occurrence date, type of grievance, and location. You can also track additional information, such as references to any contract bearing on the grievance.

The following reports are provided to help you track disciplinary actions and grievances:

- Disciplinary Actions Report (3M-RPT)—This report provides a summary of the disciplinary actions taken against employees by the organization.
- Grievance Recording And Status Report (3V-RPT)—This report provides a summary of the employee grievance information on file.

Refer to **Tracking Discipline and Grievances** *(on page 319) for more information.*

Area 4: Employee Compensation

'Employee compensation' encompasses a range of business practices aimed at securing and retaining the right employees with the right skills. It refers to all forms of both monetary and nonmonetary compensation or remuneration paid to an employee.

An important emphasis of employee compensation is total or overall compensation. It refers to more than just payroll; it includes all forms of compensation between the organization and the employee. Those forms can be divided roughly into the two following broad categories:

- **Monetary compensation—**Includes basic payroll (salary or wages), performance-based bonuses and increases, cost-of-living adjustments, special-duty or hazard pay, annual and other periodic bonuses, and any other form of monetary compensation, including benefit plans (such as retirement programs) and reimbursement of employee relocation expenses.

- **Nonmonetary compensation—**Includes all other forms of compensation or perquisites, such as use of company property (automobiles, computers, and other equipment or tools), use of company credit cards, health-club memberships, and discount buying-club memberships.

The processes of managing the various forms of employee compensation take their place in our diagram as shown here:

Employee Compensation
Managing Employee Compensation
Tracking Employee Relocation Expenses
Allocating and Recovering Property from and Employee
Salary Administration
Benefits Administration

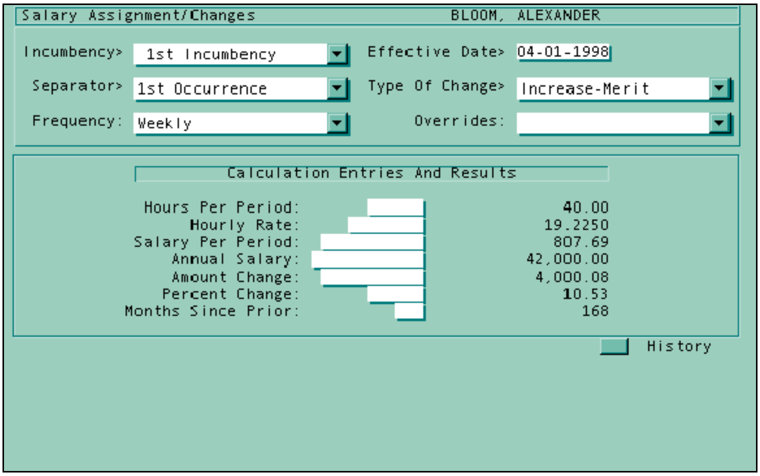
Managing employee compensation

Managing employee compensation involves the following issues:

- Salary changes
- Monetary perquisites and bonuses
- Salary reviews
- Analysis of salary data

Employee salary increases can be entered manually or generated using Salary Administration. All generated and calculated amounts can be overridden.

The following form (with Position Administration in use) shows the results of recording a salary change directly for an employee:



The system allows for the recording of both monetary perquisites, such as automobile allowances, travel subsidies, bonuses, and commissions.

Salary reviews are handled separately from performance reviews. Salary reviews can be scheduled online and tracked online or by using standard reports. The following reports are available to help manage the salary review process:

- Scheduled Salary Reviews Within Selected Months (19-RPT)
- Salary Review Forms Not Returned By Date (18-RPT)
- Salary Review Authorization Form I (5O-RPT)
- Salary Review Authorization Form II (5P-RPT)

Among the reports available for analysis of employee salary data are the following:

- Salary Analysis By Grade (14-RPT)
- Over Maximum/Under Minimum (17-RPT)
- No Salary Adjustment On File For Last 12 Month Period (1Z-RPT)
- Salary Distribution By Performance/Time-In Job (1Y-RPT)
- Salary Increase Analysis (1V-RPT)

☞ *Refer to* **Managing Employee Compensation** *(on page 335) for more information.*

Tracking employee relocation expenses

Facilities are provided for you to record and analyze all important aspects of employee relocation, including such items as:

- Employee relocation moves (34-SCR)
- Closing costs (35CSCR)
- House-hunting expenses (35HSCR)
- Moving expenses (35MSCR)
- Shipping/storage costs (35SSCR)
- Temporary living expenses (35TSCR)
- Bridge loans (36-SCR)

☞ *Refer to* **Tracking Employee Relocation Expenses** *(on page 369) for more information.*

Allocating and recovering property from an employee

You can track the costs and allocation measures associated with non-monetary perquisites, company property, and automobiles that are often tied to an employee's compensation package. Specifically, you can:

- Record non-monetary perquisites (20-SCR)
- Assign company property (22-SCR)
- Assign company automobiles (24-SCR)
- View company property and automobiles not yet returned (96RSCR)
- Record the return of company property (99-SCR)
- Record the recovery of company automobiles (98-SCR)

☞ *Refer to* **Allocating Property to and Recovering Property from Employees** *(on page 401) for more information.*

Benefits Administration

The Benefits Administration component provides complete functionality for defining and administering benefits plans. It retains information about employee eligibility and participation in any or all benefits plans, and tracks benefits costs for the employee as well as for the company. Specific features of Benefits Administration include the following:

Plan setup

All benefits plan rules are defined using standard tables. When an employee is enrolled in a plan, the plan rules are automatically invoked.

Using a benefits Control Number, each company can have its own set of benefits tables, or several or all companies can share the same benefits tables.

Plan administration

Benefits Administration provides complete support for the following categories of plans:

- Welfare
- Deferred (Defined Benefit, Defined Contribution, and Thrift/savings)
- Flexible Benefits

The system automatically recalculates coverage and contribution amounts based on changes to an employee's master record (for example, a salary increase) or to a plan in which an employee is enrolled (for example, a change in the employee contribution amount).

Facilities are provided for spouse, dependent, and beneficiary tracking. Multiple beneficiaries and associated percentages can be identified for a plan.

Reports used for the administration of benefits

An extensive library of standard reports is provided for organizational, administrative, and regulatory reporting. Types of reports include:

- Plan rules
- Enrollment registers
- Flex benefits communication forms
- Benefits activities
- Retirement counseling notices
- Plan premium statements
- Actuarial interface tapes can be created in your desired format

☞ *Refer to the Using Benefits Administration documentation for more information.*

Salary Administration

The Salary Administration component tracks job evaluations and merit increase guidelines, performs budgeting analysis, and automates the salary review and performance appraisal process. Salary Administration allows you to do the following:

Process salary reviews and conduct salary analysis

Facilities are provided to record the dates and types of reviews to be conducted, as well as their projected completion dates. Online or packaged reports are provided to determine who is due for a performance or merit review in a specified time period. Salary authorization forms can be produced for use as turnaround documents for management signatures.

Produce salary forecasts for budgetary purposes

Multiple salary plans can be created using different increase policies, creating 'what-if' scenarios. Within the various scenarios, employees can be simultaneously assigned to a maximum of three plans (for example, a 3 percent, 5 percent, and 8 percent increase), allowing you to compare the results among the three plans.

Salary Administration accommodates a variety of methods for budgeting of salary changes. These methods can be used interchangeably and in combination:

- Manager's discretion
- Increase matrices to consider each employee's job performance rating and position in salary grade
- Across-the-board increases targeted to specific groups of employees

Update salary grades and ranges

Each job may be tied to a salary grade and range, allowing you to access an employee's compa ratio and position in range. Once salary ranges have been established, they can be easily changed as salary grades are reevaluated. Changes to salary grades can be calculated and applied automatically using a percentage or midpoint formula.

Mass salary updates

Mass salary updates may be processed based on parameters entered on a parameters form. The update program has the ability to update as well as report mass salary changes. This program can also be used in a 'what-if' mode.

An audit report is produced each time the program is run, showing the results of the calculation for each selected employee. This report is produced in both update and report-only mode.

Report information used in the administration of salary changes/budgeting

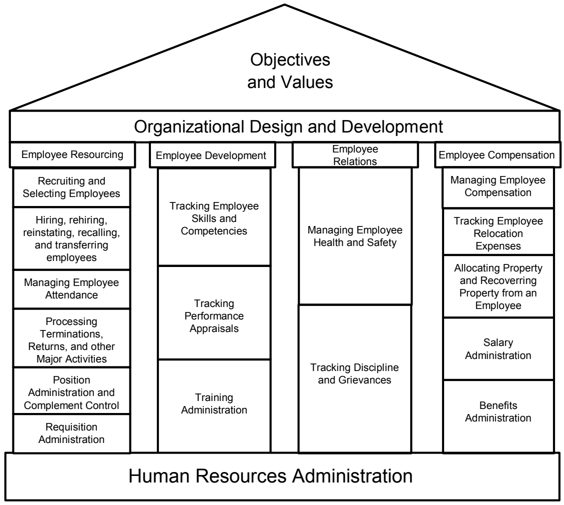
Numerous standard reports are provided, including the following:

- Salary Increase Analysis (1V-RPT)
- Annual Budget (5C-RPT)
- Over Maximum/Under Minimum (17-RPT)
- Budget to Actual Comparison (5J-RPT)

☞ *Refer to the Using Salary Administration documentation for more information.*

The complete, integrated HRM solution

The four functional areas of an integrated HRM solution are now complete:



eCyborg Interactive Workforce---to manage employee information

As you determine your HR strategy, consider the advantages of using eCyborg Interactive Workforce. This web-based employee self-service application gives your employees real-time access to view, add, and update their personal information held within The Solution Series. A user-friendly, web-based interface, Interactive Workforce enables employees to enter, update, or view their personal information. In addition, it contains a benefits module that enables your employees to enroll in benefits online and to view their current benefits enrollments.

Interactive Workforce does not display the forms used in The Solution Series. Instead, Interactive Workforce presents web pages on which users view, enter, or update information. Communication between Interactive Workforce and The Solution Series is performed via an application programming interface (API) that allows the two software applications to pass information to each other. Following are some of the factors to consider as you determine your HR strategy.

Added focus on HR strategic tasks

One of the obvious benefits of using eCyborg Interactive Workforce is that HR staff can spend less time dealing with tactical work, such as updating basic employee details and handling information requests. This allows more time to focus on strategic work.

Employee information more current

Employees who own their data can control their data by updating personal information immediately without assistance. Information is as current as employees choose to make it. Information maintained by employees includes:

- Marital status
- Family members
- Name and address including a separate mailing address
- Contact information including phone, fax, and email details
- Emergency contacts
- Emergency doctor

Online access to personal information for employees

Instant access to information is an important benefit to employees, particularly being able to review their pay information online. Employees can potentially access eCyborg Interactive Workforce any time they want at work via the network. If they have access to their organization's intranet from remote locations, they can also access their information from home or another offsite location.

Online benefits enrollment

Using the benefits enrollment functionality significantly reduces the level of HR staff involvement in benefits enrollment, leaving them more time to focus on the more strategic aspects of benefits administration.

Reporting options

Human Resources Administration provides a variety of reporting options.

Reporting Administration

Reporting Administration is a value-add product from Cyborg that combines the power of the business intelligence tools from Cognos Corporation, a Cyborg strategic partner, with a relational database (data mart) package from Cyborg.

Reporting Administration includes the following:

- Functionality to extract data from the system into a relational database data mart.
- Functionality to launch the Cognos reporting tools directly from the system.
- Cyborg-specific Impromptu catalogs for the delivered data mart, which promote intuitive user access to the data extracted from the system and placed in the data mart.
- Cognos reporting tools (Impromptu, Power Play, and so on).

Standard human resource management reports

Nearly 100 HR packaged reports are delivered with the system. You can use these reports as delivered, or customize them to meet your needs. The reports range from simple alphabetic listings of current employees to regulatory reports.

☞ *Refer to the* **Report Quick Reference** *(on page 421) for samples of the standard HR reports delivered with the system.*

HR queries and reports

Custom online queries and reports can be developed using Solution View. Queries are developed by choosing text boxes to be displayed and then specifying what mathematical operations to perform on the data (totals, averages, counts, and so forth). Selection criteria includes point-in-time reporting and literal comparisons (for example, equal to, less than, greater than, and, or, and/or). Query definitions can be saved for future use.

☞ *Refer to the Using Solution View documentation for more information on creating and running online queries and reports.*

P A R T 2

Employee Resourcing

In This Section

CHAPTER 3

Recruiting and Selecting Employees

In This Chapter

Introduction

The recruitment and selection of employees is one of the first steps in implementing the employee resourcing phase of your organization's integrated human resource management plan. This section focuses on the nine key stages of the recruitment and selection process and explains how you can use Cyborg's products to accomplish each of these stages and associated tasks.

Tasks

This section explains the following:

- Adding an applicant's basic information
- Entering an applicant's name and address details
- Entering an applicant's job or position applied for
- Entering an applicant's work history
- Entering an applicant's job references
- Recording an applicant's contact information
- Recording an applicant's identifying information
- Recording an applicant's preferred work environment
- Selecting candidates for interview
- Monitoring an applicant's interview process
- Reviewing the applicant's profile
- Entering the successful candidate's job details

☞ *Refer to* **Hiring, Rehiring, Reinstating, Recalling, or Transferring an Employee** *(on page 83) to learn how to transfer applicants to an active employee organization.*

Prerequisites

Before you can perform the tasks in this section, the following must be established:

- An employee template (Logical Employee Model) for the applicant organization
- Applicant tracking Control Numbers on the Company-To-Rules Cross-Reference for Applicant Tracking form (AT-SCR)
- System Options form (TG-SCR) with Position Administration option set to 'In Use' if you will be using the Position Administration

If you are not using Position Administration, set the Position Administration option on the System Options form (TG-SCR) to 'Not In Use'.

Questions answered

The following questions are answered in this section:

1. What are the options available when recruiting employees?
2. How can using applicant organizations facilitate the recruitment process?
3. How are templates used to enter information in the system?
4. What data is required and what data is optional when entering applicant information?

The recruitment and selection process

The recruitment and selection of employees is the first step in implementing the employee resourcing phase of your organization's integrated human resource management plan. Ideally, the process of recruiting and selecting employees follows a careful analysis of the skills, competencies, and other workforce characteristics needed by your organization. Individuals (from either inside or outside the organization) who possess the skills, competencies, and other characteristics identified through that analysis become the target of the recruitment and selection process. These individuals are generally recruited for a particular job or position in which their qualifications match the necessary skills. Qualifications are often classed into 'minimum required' qualifications and additional 'desired' qualifications that further distinguish one candidate as being more suitable than another for a particular job.

The process of recruiting and selecting employees may be developed from any of the various strategies. Each organization tends to go about recruitment and selection in its own unique way. In general, organizations typically complete the nine key stages in the recruitment and selection process that are discussed next.

1. Identify a vacancy and obtain authorization to fill it

Vacancies are customarily identified when a staff opening occurs in a team or work group, sometimes because an employee leaves a position or because of a budgetary allocation of an additional position. Your organization can also identify vacancies by using the Position Administration and Requisition Administration components. Requisition Administration is particularly useful because of its capability in tracking authorizations to fill vacant positions. Vacancies are easily tracked and managed using both Position Administration and Requisition Administration.

2. Define the particulars of the specific job or position to be filled

Once a vacancy has been identified and approved for filling, particulars such as starting salary, salary range, start date, department, and location must be defined. These factors usually become part of the information you will advertise to recruit candidates. Additionally, you will need to define details about the recruitment effort itself, such as the period of time to be allowed before the application-submission deadline, when the position is to be filled, and whether applicants from outside a particular department or from outside your organization will be considered.

3. Advertise the job opening and recruit potential candidates for the position

The job opening may be advertised either inside or outside of the organization, or both, depending on your organization's strategy for filling a particular position. Typical forms of recruitment advertising include mass advertising such as newspaper ads, radio spots, internet notices, internal postings, employee-referral programs, job-placement agencies, job fairs, campus recruiting, and professional search firms. Your organization may also use the system to identify current employees who have the skills and competencies needed to fill the available job.

The goal of all these forms of recruitment is to generate a pool of interested (yet not necessarily qualified) candidates. Internal candidates may complete a job-bid form or submit a full application to indicate their interest in the vacant position. An abbreviated application may be acceptable from internal candidates, as more in-depth information about current employees' qualifications and work history is maintained on each employee's record within the system. Applicants from outside the organization will typically complete a comprehensive job application. They may be asked to submit a personal resume or Curriculum Vitae showing recent work history, educational achievements, and other information about their qualifications.

4. Eliminate candidates who do not meet the minimum qualifications for the position

Once a pool of candidates has been created, you should evaluate and eliminate those candidates who do not meet the minimum qualifications for the position. Minimum qualifications are frequently described in easily quantifiable terms, such as 'two years of experience', 'Bachelor of Science degree', and 'current certification as medical technologist'. Candidates who do not possess the minimum qualifications are removed from the candidate pool and eliminated from further consideration for the position.

5. Assess the qualifications of the remaining candidates

Candidates who meet the minimum qualifications for the position should now be reevaluated in terms of skills, competencies, work history, educational achievements, licenses and certifications, and so forth. Depending on the nature of the job for which a candidate is being considered, your organization may complete such evaluation tasks as holding one or more interviews with each candidate, conducting assessment or other aptitude tests, and administering written or oral examinations of a candidate's knowledge, skills, and competencies. Your organization may also contact individuals whose names have been given as references for each candidate as a means of evaluating the employee's work habits, communication skills, problem-solving abilities, and so forth. It is possible that a candidate must pass a physical examination because of the physical requirements of a particular job. Cyborg's products become valuable tools as you record the results of each type of evaluation conducted for each candidate.

6. Select the individual or individuals who appear to best fit the organization's needs

The results of your evaluations of the candidates may be quantified by the use of a rating scale for each qualification or attribute being sought. You may decide to weigh certain qualifications more heavily than others because of the importance of those qualifications to your organization and/or position. Candidates with the highest overall score or those that best fit the ideal candidate profile are selected as being the most suitable for the position. You may want to avoid contacting any remaining qualified candidates to tell them they have not been selected for a position at this stage, since the candidate selected may not accept the terms of employment offered or may have accepted employment elsewhere during the time that passed since applying for the position.

7. Extend a job offer to the selected individuals

Although it is likely you will have already outlined the particulars about the available job to the candidate early in the recruitment process, this information should be reviewed in more detail when tendering a job offer to the successful candidate. Terms of employment such as working hours, starting date, and salary should be agreed upon. The candidate will either accept or reject your organization's offer at this time. Once the offer is accepted, the candidate becomes an employee. The system simplifies converting a candidate into an active employee, as the system uses the information captured during the recruitment and selection process to build what will become the employee record.

8. Notify unsuccessful candidates

Candidates not selected for employment should be told that they have not been selected for the job in a timely fashion. Typically, a letter is used to inform the unsuccessful candidates that the position has been filled by another candidate. It is a good idea to maintain a positive relationship with these unsuccessful candidates, as you may consider them for future positions for which they qualify. The system assists you in notifying the unsuccessful candidates and maintains data about each candidate for future evaluation.

9. Analyze the recruitment and selection process just completed

The overall success of your organization's recruitment and selection effort over the long term is greatly enhanced by effectively tracking candidate qualifications and your recruitment methods. It is also possible that information about your organization's recruitment efforts may be required by various government agencies for monitoring of fair employment practices or for other purposes.

As the final stage in the recruitment process, you should look back at the process and discover improvement opportunities for the future. You may want to analyze the effectiveness of the recruitment process by examining the number of candidates (qualified and not qualified) obtained from each recruitment source. You can also analyze recruitment results by job or the current status of each candidate. A list of all active applicants that can be considered for another position is readily available. The information recorded in the system throughout the recruitment and selection process makes all this analysis and reporting possible in an efficient and meaningful way.

Cyborg's products provide ample capability for tracking and managing information at each step in the recruitment and selection process, from identifying a vacancy and defining the job to be filled, to notifying unsuccessful candidates and hiring successful candidates as employees. Timely analysis of each recruitment effort is facilitated by having complete information about the job opening, candidates recruited, and recruiting sources available within the system.

Apply the Concept
What are the nine stages in the recruitment and selection process?

Which functionality to use in the recruitment and selection process

The system contains several components that can be used in the recruitment and selection process. Each of these components is designed to improve the efficiency of your recruitment processes, and to improve the quality and functionality of the data that is being tracked. The components that you select are entirely up to your organization. The functionality of the Applicant Tracking, Position Administration, Requisition Administration, and Complement Control components is discussed in the following sections in relation to the recruitment and selection process.

Use of Applicant Tracking functionality

The Applicant Tracking component allows you to store and track details about an applicant. It is up to you to determine when in the recruitment process that you will start using the system to record applicant details.

It is also up to your organization to decide how much detail will be recorded for each applicant. An applicant record can be created by entering a minimum of data. However, a wide range of forms are available for recording a variety of applicant data. Any data entered at the applicant stage is not a waste of time, as most of this data is transferred to the employee record when the candidate is hired and becomes an employee. You may choose to enter detailed information for only those applicants who are considered strong candidates for the position.

Use of Position Administration functionality

In the area of recruitment and selection, very strong links exist between the Position Administration and the Applicant Tracking components. Identifying candidates who meet your minimum requirements is easily accomplished by matching these requirements to those of the position for which the applicant is applying. For example, if your minimum requirement for a position is a degree in engineering, you can track the educational credentials of all candidates to find a match.

The Position Administration component can also help you identify internal applicants who meet the minimum requirements.

To create the link between Position Administration and your applicant organizations, you must switch the Position Administration setting on the System Options form (TG-SCR) to 'In Use'. Alternatively, you can set the Control Number for System Options on the Company-To-Rules Cross-Reference For HR form (AX-SCR) to the same Control Number in your position management organization.

☞ *Refer to the Using Position Administration documentation for more information.*

Use of Requisition Administration functionality

A key element in the recruitment and selection process is being able to adequately fill positions with the right candidate (or candidates) when vacancies occur. Requisition Administration allows your organization to fill vacancies with candidates who are either applicants or existing employees. While the Applicant Tracking component focuses on applicant details, the Requisition Administration component focuses on requisition details.

The use of Requisition Administration in your organization can improve management of the requisition process for a new job or position and can also help in facilitating the tracking of internal candidates for vacant positions. It allows you to track applicants and new hires throughout the recruitment and selection process. The system keeps track of all requisitions, and ensures that a position is not filled without a formal request. Particularly useful is the ability to notify you immediately when a vacancy has been filled. This prevents you from hiring more than one candidate for a given position. Use of the Position Administration component is not required to make use of the functionality found in the Requisition Administration component.

☞ *Refer to the Using Requisition Administration documentation for more information.*

Use of Complement Control functionality

The Complement Control component can be used during the recruitment and selection process to automatically identify a position vacancy and to manage the number of vacancies for which you can recruit. The Complement Control functionality provides you a comparison complement for each position. Position Administration must be in use to use the Complement Control functionality.

☞ *Refer to the Using Position Administration documentation for more information.*

Use of applicant organizations

It is critical that you keep applicant data safely apart from regular employee data so, for example, an applicant can never receive a paycheck. In order to access the applicant tracking forms within the system, you must use an applicant organization. The Company Category list box on the Company Options form (AF-SCR) identifies whether or not it is an applicant organization.

It is up to your company to determine how many applicant organizations to set up. For example, you could set up separate applicant organizations for current applicants, rejected applicants, and any other unsuccessful applicants. This will help you keep active applicants apart from inactive applicants who have been eliminated from consideration.

The decisions on which applicant organizations will be created within your organization are usually decided upon during implementation of the system. When you hire an applicant, basic information about the applicant is automatically transferred to the employee organization. If you transfer an applicant to another applicant organization, the basic data is also transferred.

Apply the Concept
How is a transfer defined in the system?

Use of templates

The system allows you to record applicant information on templates (also called Logical Employee Models) that are stored on the Employee Database. The use of templates ensures that vital applicant information is entered in a consistent, correct, and usable manner. It will also save you time because you will not have to reenter data that is common to a group of applicants.

You must use one of the applicant templates to add an applicant to the system. A base template with default information should be defined for adding your applicants and employees. The system also allows you to use more than one template in cases where you are entering different information for different groups of applicants. Templates should be set up when you implement the system.

The system allows you to change the default information when adding an applicant or employee if the information is different from that on the template.

A template must be named as follows: LMODEL<space>unique, two-character alphanumeric value. For example, 'LMODEL A1' is a valid applicant template name.

☞ *Refer to the Implementing Human Resources Administration documentation for more information on setting up Logical Employee Models.*

Note: *Position Administration must be set to 'Not in Use' on the System Options form (TG-SCR) in order to set up or edit Logical Employee Models. The setting can then be reset to 'In Use' after the Logical Employee Model has been created or changed.*

Required and optional applicant data

It may be helpful to know that only two forms are required to add an applicant record to the system. The remaining forms contain optional information.

Required applicant forms

These forms are required when adding applicants:

- Applicant Information (001SCR)—Used to add a new applicant to one of your applicant organizations. Also records basic applicant information such as applicant number, social security number (US), application date, and status.

- Applicant Name and Address (002SCR)—Used to record a job applicant's name and address information.

Optional applicant forms

The following forms are optional:

- Applicant Contact Information (008SCR)—Used to record information regarding when, where, and how an applicant wants to be contacted. This information will only reside on the applicant record.

- Applicant Identifying Documentation (005SCR)—Used to record an applicant's credentials, such as citizenship and visa information. This information will transfer to the employee record.

- Applicant Job Reference (009SCR)—Used to record information about the persons the applicant has supplied to you as job or personal references. An unlimited number of references can be recorded. This information will transfer to the employee record.

- Applicant Preferred Work Environment (004SCR)—Used to record the applicant's preferred work environment, current work status, and availability details. This information will only reside on the applicant record.

- Applicant Work History (006SCR)—Used to record an applicant's previous employment information. This information will only reside on the applicant record.

- Hired Applicant Pre-Transfer Information (020SCR)—Used to enter additional information about the successful candidate before being hired and transferred to an active employee organization. Location information will transfer to the employee record, but salary information will only reside on the applicant record.

- Interview Recap (007SCR)—Used to record the results from applicant interviews. A separate record for each interview is recorded. If an applicant is transferred to active employee status using the Applicant Transfer form, this form information is not transferred.

- Job or Position Applied For (003SCR)—Used to record information about the position for which an applicant has applied. The position interfaces with the Position Administration. If hired, the applicant is automatically linked to the position. For this to occur, you must also enter the position on the Applicant Transfer form. If you are not using Position Administration, you can enter the job for which the applicant is applying on this form.

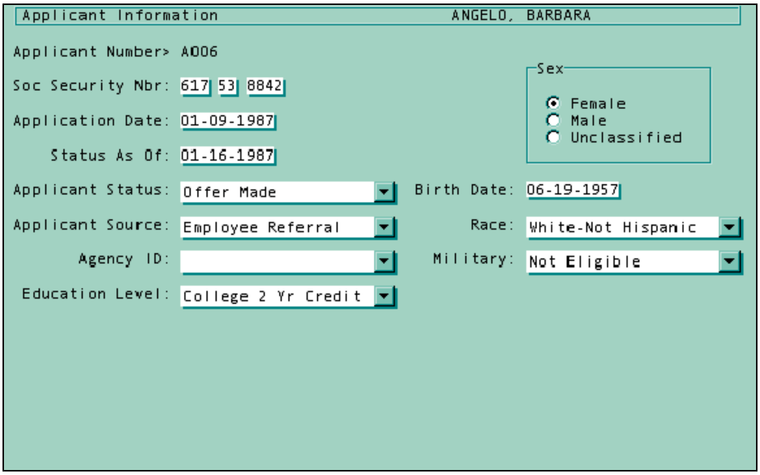
- On-Line Applicant Profile (010SCR)—Used to view the data that has been recorded for an applicant online.

Identification of applicants and references

Before you begin recording applicant information, devise a numbering scheme for uniquely identifying applicants and each of their references.

Applicant numbers

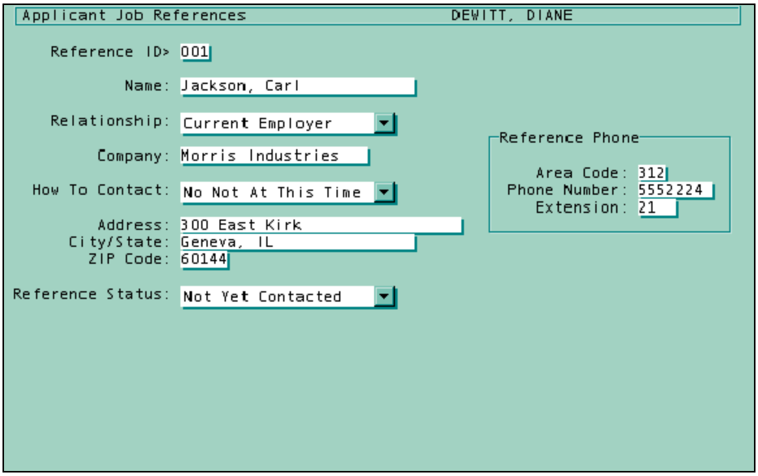
An applicant number is an alphanumeric identifier of up to ten positions. Your organization should devise a numbering scheme for assigning these, such as the example that follows:



Note: *The assignment of applicant numbers can be automated by customizing the system.*

Reference IDs

This text box contains the unique three-position identifier assigned to each of the business or personal references supplied by an applicant. You will need to devise a scheme for tracking these, such as the example that follows:



Applicant Job References
DEWITT, DIANE
Reference ID> 001
Name: Jackson, Carl
Relationship: Current Employer
Company: Morris Industries
How To Contact: No Not At This Time
Address: 300 East Kirk
City/State: Geneva, IL
ZIP Code: 60144
Reference Status: Not Yet Contacted
Reference Phone
Area Code: 312
Phone Number: 5552224
Extension: 21

Reports used for recruiting and selecting employees

Reporting is an important part of the recruitment and selection process, allowing you to check, review, and analyze the information you have recorded for your applicants. For example, you can produce reports that list all applicants that have been interviewed or all employees hired after a specified date.

The following is a list of the standard reports that are related to the employee recruitment and selection process:

- Active Applicants With Specific Education report (0U-RPT)—Identifies active applicants who have major and minor subjects on file that match your specified subject option(s), for example, education, degrees earned, or cumulative grade point averages achieved.

- Active Applicants With Specific Skills (0V-RPT)—Identifies active applicants whose recorded skills and abilities match your specified skill options, allowing you to identify which potential employees have the skills required to perform a job/position.

- Alphabetic Listing Of Active Applicants (0B-RPT)—Identifies active applicants within the Applicant Tracking component.

- Alphabetic Listing Of Active/Inactive Applicants (0A-RPT)—Identifies active and inactive applicants within the Applicant Tracking component.

- Applicant Certificates, Licenses, And Permits (0F-RPT)—Lists unexpired certificates, licenses, and permits (CLPs) for all applicants as of a specified date.

- Applicant Education And Skills Profile (0H-RPT)—Provides a list of the education and skills on file for all active applicants. The information included on this report is recorded on the Formal Education form (30-SCR) and the Skills And Competencies form (33-SCR).

- Applicant Expired Certificates, Licenses, And Permits (0G-RPT)—Provides a list all of your active applicant's certificates, licenses, and permits that have expired and are due to be renewed on or before a specified date. This allows you to identify which applicants to contact for renewal.

- Applicant Listing By Job Code (0J-RPT)—Produces a listing of applicants by the job code for which they have applied or are being considered. This report may be helpful in identifying those jobs that have a high turnover and those that have a large number of interviews conducted before an applicant is hired.

- Applicant Listing By Major Code and Education Level (0P-RPT)—Provides educational information for all active applicants.

- Applicant Listing By Position Number (0K-RPT)—Produces a listing of applicants by the positions for which they have applied or are being considered. The current applicant status and position status are also displayed.
- Applicant Listing By Skill Code And Proficiency Rating (0R-RPT)—Provides skill information for all active applicants.
- Applicant Listing By Source (0S-RPT)—Provides the source where your applicants first heard about a job opening along with applicable job agency information. This information may help you identify which advertising media are most effective in recruiting applicants for specific positions.
- Applicant Listing By Status (0I-RPT)—Produces a listing of all applicants by their current applicant status code and the jobs for which they are being or have been considered.
- Applicant Listing By Training Course (0T-RPT)—Produces a list of the recorded training information for applicants.
- Applicant Listing With Specified Training Course (0W-RPT)—Identifies active applicants who have a required training course code recorded.
- Applicant Mailing Address Labels (0Q-RPT)—Produces a mail label for correspondence with applicants.
- Applicant Preferred Work Environment (0Z-RPT)—Provides information on each applicant's preferred work environment, current work status, and availability details.
- Applicant Professional Associations (0E-RPT)—Provides a list of active applicants and their recorded professional membership information. The information on this report is recorded on the Professional Association Memberships form.
- Applicant References (03-RPT)—Provides an alphabetical list of all the reference information on an applicant's file, identifying if the reference has been contacted, and if so, any responses.
- Applicant Telephone Contact Directory (0C-RPT)—Provides all of the information necessary to contact an applicant by telephone. The report displays an alphabetical listing of all telephone information given by active applicants.
- EEO-1 Report for Applicants by All Jobs Applied For (02-RPT)—Produces a listing of applicants considered for jobs which are part of a formal, on-the-job training program.
- EEO-1 Report for Applicants by All Jobs Applied for and EEO Establishment (02ERPT)—Produces a listing of applicants considered for jobs which are part of a formal, on-the-job training program sorted by EEO location.

- EEO-1 Report for Applicants by Single Job and EEO Establishment (01ERPT)—Produces a listing of applicants totaled by sex, race and EEO job category sorted by EEO location.
- EEO-1 Report for Applicants Counted by Single Job (01-RPT)—Produces a listing of applicants totaled by sex, race and EEO job category.
- Interview Evaluation (04-RPT)—Creates an evaluation form to be sent to the interviewer of every applicant whose interview has not yet been evaluated.
- I.R.C.A. Record of Verification (0M-RPT)—Provides a listing of all applicants in regards to meeting the Immigration Reform and Control Act of 1986.
- Newly Added Applicants By Position Number (0N-RPT)—Produces a listing of newly added applicants by the positions for which they have applied or for which they are being considered.
- Newly Added Applicants With Job Code (0L-RPT)—Produces a list of applicants by job code within a specified range of original application dates.
- Reference Request Letter (0X-RPT)—Provides a personalized reference request letter for each of your applicant's job references, making it easy for the job reference to respond more promptly after being contacted.
- Telephone Reference Check (05-RPT)—Produces a checklist of questions to ask an applicant's job reference that you have been requested to contact by telephone.

Applicant letters

The following is a list of the letters that you can send candidates who send you resumes and who interview with you:

- Applicant Interview Response/Negative (04CRPT)—Prints a negative response letter to an applicant you have interviewed but do not want to continue interviewing or hire.
- Applicant Interview Response/Positive (04DRPT)—Prints a positive response letter to an applicant you have interviewed and want to return for additional interviewing.
- Applicant Resume Response/Negative (04ARPT)—Prints a negative response letter to an applicant for whom you have received a resume but do not want to interview.
- Applicant Resume Response/Positive (04BRPT)—Prints a positive response letter to an applicant for whom you have received a resume and want to interview.

Note: *These letters may be customized to include the name, title, phone number, and other information about the sender of the letter.*

Detailed Directions

Tasks

Completing the Guided Practice

In the Guided Practice for this section, you will be adding an applicant (applicant number A012, Andrew Anders) to an applicant organization (993333). You will be using employee template 'LMODEL AT'.

Before starting the Guided Practice, verify that the Company-To-Rules Cross-Reference For Applicant Tracking form (AT-SCR) for organization 993333 has '9999' in the System Options and Activities text boxes.

If using Position Administration, also verify that the System Options form (TG-SCR) for organization 993333 is set to Position Administration 'In Use'.

Where needed, there are separate instructions for Position Administration users and non-users.

Adding an applicant's basic information

To enter basic information for an applicant, follow these steps:

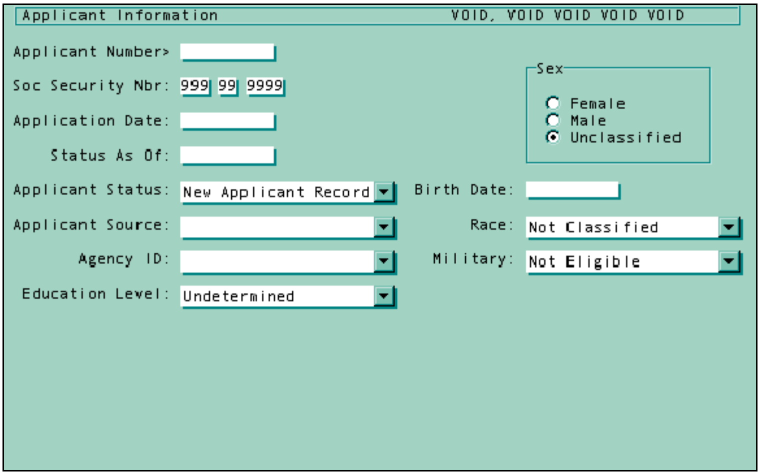
1. Access the Applicant Information form (001SCR)

The Applicant Information form (001SCR) is used to record basic applicant data and is similar to the Employee Information form for an active employee.

Access this form by making the following selection from the Navigator:

Component: Employee Resourcing
Process: Recruit and Select Employees
Task: Basic Information

For practice, access the Applicant Information form (AT-SCR) for employee number 'LMODEL AT' in the 993333 organization.



2. Enter the Applicant Number

Enter an alphanumeric identifier of up to ten positions.

For practice, type 'A012'.

3. Enter the Soc Security Nbr

Enter the nine-digit social security number.

For practice, type '012-01-2012'.

4. Enter the Application Date

Enter the date that the applicant applied for the job. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '12-15-1997' (US and Canada) or '15-12-1997' (elsewhere).

5. Enter the Status As Of

Enter the date that the application was submitted by the applicant. This text box is used in conjunction with the Applicant Status text box. When the status of an applicant changes, you must change the date in this text box to reflect the effective date of the change.

Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '12-15-1997' (US and Canada) or '15-12'1997' (elsewhere).

6. Select the Applicant Status

The Applicant Status is automatically displayed by the system as 'New Applicant Record'.

For practice, leave this text box as 'New Applicant Record'.

7. Select the Applicant Source

Select the source of how the applicant found out about the job opening. You may update this option list (HR21) to include all of the applicant source options needed by your organization.

For practice, select 'Employment Agency'.

8. Select the Agency ID

Select the name of the applicant's employment agency. You may update this option list (PP589) to include all of the applicant agency IDs needed by your organization.

For practice, select 'ABC Executive Search'.

9. Select the Education Level

Select the highest level of education achieved by the applicant. You may update this option list (HR31) to include all of the education level source options needed by your organization.

For practice, select 'Bachelor Deg Business'.

10. Select the Sex (if provided)

Select the gender of the applicant from one of the options.

For practice, select 'Male'.

11. Enter the Birth Date (if provided)

Enter the applicant's birth date in MM-DD-CCYY or CCYYMMDD format. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '09-15-1960' (US and Canada) or '15-09-1960' (elsewhere).

12. Select the Race

Select the applicant's race. This option list (HR22) should already include all of the necessary race options.

For practice, select 'White-Not Hispanic'.

13. Select Military

Select the applicant's military status. You may update this option list (HR07) to include all of the military source options needed by your organization.

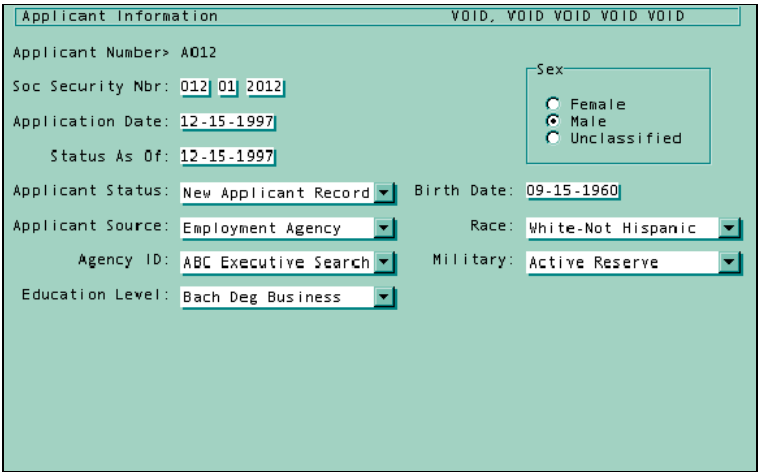
For practice, select 'Active Reserve'.

14. Click Save or press Enter

The applicant's information is now recorded.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



See also:

- Required and optional applicant data ***(on page 43)***

For a description of how this form is used to track applicant data.

Entering an applicant's name and address details

To enter an applicant's name and address details, follow these steps:

1. Access the Applicant Name and Address form (002SCR)

The Applicant Name and Address form (002SCR) is used to record a job applicant's name and address information.

Access this form by making the following selection from the Navigator:

Component: Employee Resourcing
Process: Recruit and Select Employees
Task: Name and Address

For practice, access the Applicant Name and Address form (002SCR) for applicant A012, Andrew Anders.

2. Enter the Name Code

Typically, this text box is populated from the template being used. It is a three-digit value that describes the function of the name and address information that immediately follows it on the form. For example, '001' specifies a legal name and address.

For practice, leave this text box as '001'.

Enter the name (Steps 3 through 7)

3. Select the Title

This list box selection identifies the applicant's name prefix or title.

For practice, select 'Mr'.

4. Enter the First (name)

Type the applicant's first name.

For practice, type 'Andrew'.

5. Enter the Middle (name)

Optionally, type the middle name of the applicant. The first character of this text box will display as the last position on the title line of each form.

For practice, type '#' and delete the remaining text in this text box to remove the 'VOID' entry.

6. Enter the Last (name)

Type the applicant's legal surname.

For practice, type 'Anders'.

7. Select the Suffix

This list box selection identifies the applicant's name suffix, such as Jr. or Sr.

For practice, make no selection in this list box.

8. Enter the Address

Enter the applicant's street address in the first text box. The second text box is reserved for additional address information, such as apartment number.

For practice, type '2020 Michigan Avenue' and make no entry in the second text box.

9. Enter the City/State

Enter the city and state portions of the applicant's address.

For practice, type 'Chicago' and 'IL'.

10. Enter the ZIP

Enter the applicant's five-digit postal code. Optionally, enter the four-digit extended postal code preceded by a hyphen.

For practice, type '60606-0899'.

11. Select the Country

Select the applicant's country of residence.

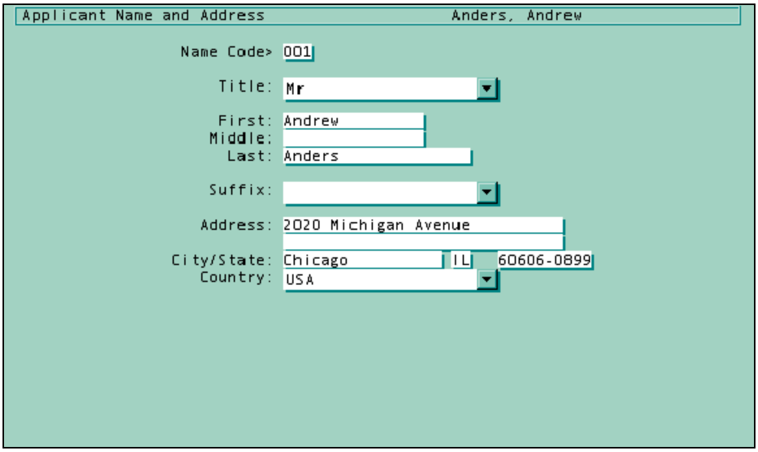
For practice, select 'USA'.

12. Click Save or press Enter

The applicant's name and address is now recorded.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



Applicant Name and Address   Anders, Andrew

Name Code> 001

Title: Mr

First: Andrew
Middle:
Last: Anders

Suffix:

Address: 2020 Michigan Avenue

City/State: Chicago IL 60606-0899
Country: USA

For a description of how this form is used to track applicant data.

Entering an applicant's job or position applied for

To enter the job or position for which the applicant has applied, follow these steps:

1. Access the Job Or Position Applied For form (003SCR)

The Job Or Position Applied For form (003SCR) is used to record information about the job(s) and/or position(s) for which an applicant has applied.

Access this form by making the following selection from the Navigator:

Component: Employee Resourcing
Process: Recruit and Select Employees
Task: Job/Position Applied for

For practice, access the Job Or Position Applied For form (003SCR) for applicant A012, Andrew Anders.

2. Select the Job Sequence Number

Select a number from 1 to 99 to identify the information for a specific job/position if the applicant is being considered for more than one job/position.

For practice, select '1'.

3. Enter the Date 1st Considered

Enter the date in which the applicant was first considered for the position for which he or she is applying. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '12-15-1997' (US and Canada) or '15-12-1997' (elsewhere).

4. Enter the Requisition ID (optional)

Enter an up-to-six-position requisition identification of the job and/or position. This is the organization-defined requisition identifier of the job and/or position for which the applicant is being considered.

For practice, type '1270'.

Note: If Position Administration is not used, this text box requires no entry.

For practice, leave this field blank.

5. Select the Position (optional)

Select the position for which the applicant is being considered.

For practice, select 'Zoo Manager'.

Note: If Position Administration is not used, use the Job Code/Extent text boxes to enter the job code and extent for which the applicant is being considered (Zoo Manager is not included in existing job codes).

For practice, type a job code of '68000' and an extent of '0001'.

6. Select the Interview Status

Select the stage of the applicant in the interview process. You may update this option list (AT12) to include all of the interview status options needed by your organization.

For practice, select '1st Interviews Sched'.

7. Select the Standing

Select the applicant's standing in the evaluation process. You may update this option list (AT02) to include all of the standing options needed by your organization.

For practice, select 'Under Consideration'.

8. Enter the Org

Enter the organization where the job and/or position being applied for is located.

For practice, type '999999'.

9. Select the Dept

Select the department location for the job and/or position. You may update this option list (HR439) to include all of your departments. If the Department organization level being used is not level 3, the Field Maintenance And Edit form (F-NAME) must be used to read the appropriate option list and then link it to the Department text box.

For practice, leave this text box blank.

10. Select the EEO Loc

Select the EEO location where the job and/or position being applied for is located. You may update this option list (EO069) to include all of the EEO locations needed by your organization.

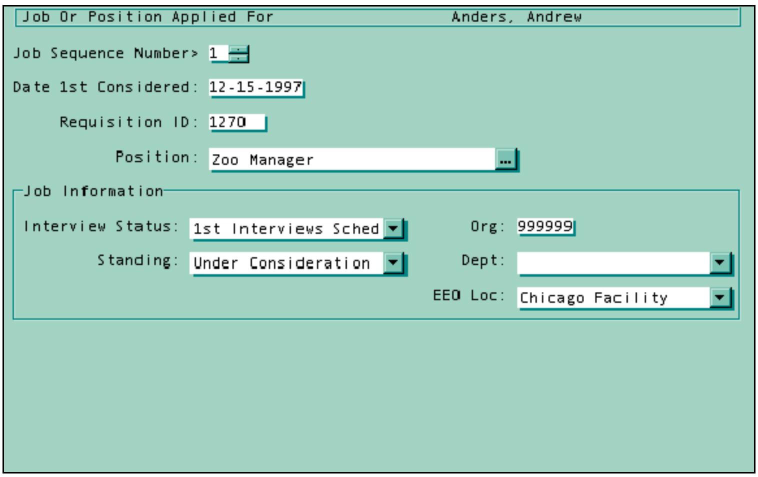
For practice, select 'Chicago Facility'.

11. Click Save or press Enter

The applicant's job or position applied for is now recorded.

For practice, click Save or press Enter.

If you completed the Guided Practice and are using Position Administration, the resulting form should look similar to the example that follows:



Job Or Position Applied For   Anders, Andrew

Job Sequence Number> 1

Date 1st Considered: 12-15-1997

Requisition ID: 1270

Position: Zoo Manager

Job Information

Interview Status: 1st Interviews Sched   Org: 999999

Standing: Under Consideration   Dept:

EEO Loc: Chicago Facility

If you completed the Guided Practice and are *not* using Position Administration, the resulting form should look similar to the example that follows:

- Required and optional applicant data ***(on page 43)***

For a description of how this form is used to track applicant data.

Entering an applicant's work history

To enter the work history for an applicant, follow these steps:

1. Access the Applicant Work History form (006SCR)

The Applicant Work History form (006SCR) is used to record information about an applicant's previous jobs. This information may be helpful when determining if an applicant has had the work experience necessary to make a contribution to your company.

Access this form by making the following selection from the Navigator:

Component: Employee Resourcing
Process: Recruit and Select Employees
Task: Work/Salary History

For practice, access the Work/Salary History form (006SCR) for applicant A012, Andrew Anders.

2. Enter the From Date

Enter the date that the applicant began a specific job. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '02-09-1996' (US and Canada) or '09-02-1996' (elsewhere).

3. Enter the To Date

Enter the date that the applicant stopped working at the job listed. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For example, type '12-01-1997' (US and Canada) or '01-12-1997' (elsewhere).

4. Select the Job Title Category

Select the job title category from the option list. You may update this option list (AT06) to include all of the job title categories needed by your organization. This text box allows you to record the job level held at the organization.

For practice, select 'Manager'.

5. Select the Job/Industry

Select the job/industry category of the applicant's former position. You may update this option list (AT07) to include all of the job/industry options needed by your organization.

For practice, select 'Sciences/Technology'.

6. Enter the Prior Company

Enter the name of the company for which the applicant worked.

For practice, type 'Widget, Inc.'

7. Enter the Prior Salary

Enter the last salary paid to the applicant at the job being reported if the applicant has provided a salary history. This is a numeric text box that contains 9 digits.

For practice, type '54,000.00'.

8. Select the Reason Left

Select the reason given by the applicant for leaving the employment listed. You may update this option list (AT08) to include all of the reasons for leaving needed by your organization.

For practice, select 'Dissatisfaction'.

9. Enter the Job Reference Xref

Enter the three-digit reference ID of the person the applicant has assigned as the business reference for this job. Job reference numbers make it possible for you to record multiple references. This text box cross references the Reference ID text box on the applicant form that is used to record information regarding work references.

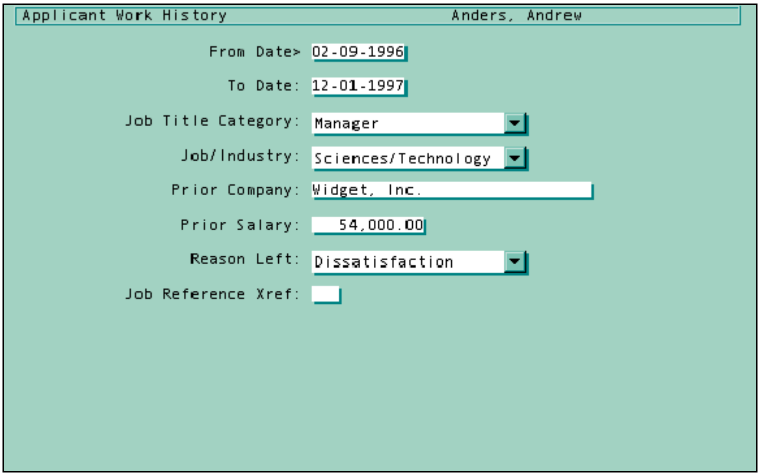
For practice, leave this text box blank.

10. Click Save or press Enter

The applicant's work history is now recorded.

For practice, click Save or press Enter.

If you competed the Guided Practice, the resulting form should look similar to the example that follows:



Applicant Work History   Anders, Andrew

From Date> 02-09-1996

To Date: 12-01-1997

Job Title Category: Manager

Job/Industry: Sciences/Technology

Prior Company: Widget, Inc.

Prior Salary: 54,000.00

Reason Left: Dissatisfaction

Job Reference Xref:

See also:

For a description of how this form is used to track applicant data.

Entering an applicant's job references

To enter the job references for an applicant, follow these steps:

1. Access the Applicant Job References form (009SCR)

The Applicant Job References form (009SCR) is used to record information about the persons the applicant has supplied to you for business or personal references. An unlimited number of references can be recorded.

Access this form by making the following selection from the Navigator:

Component: Employee Resourcing
Process: Recruit and Select Employees
Task: References

For practice, access the Applicant Job References form (009SCR) for applicant A012, Andrew Anders.

2. Enter the Reference ID

Enter the reference identification number assigned to each of the business or personal references supplied by the applicant.

For practice, type '001'.

3. Enter the Name

Enter the name of the business/personal reference supplied by the applicant.

For practice, type 'Smith, Tony'.

4. Select the Relationship

Select the relationship between the applicant and the business or personal reference supplied by the applicant. You may update this option list (AT10) to include all of the relationship options needed by your organization.

For practice, select 'Prior Manager'.

5. Enter the Company

Enter the business or personal reference's company name if the reference is to be contacted at a place of business.

For practice, type 'Widget, Inc.'

6. Select How To Contact

Select how and when the applicant wants you to contact the business or personal reference. You may update this option list (HR71) to include all of the contacts needed by your organization.

For practice, select 'Yes But Phone Only'.

7. Enter the Address

Enter the street address to be used to contact the applicant's business or personal reference by mail.

For practice, type '32 Barton Circle'.

8. Enter the City/State

Enter the city and state of the address for the business or personal reference supplied by the applicant.

For practice, type 'Chicago, IL'.

9. Enter the ZIP Code

Enter the postal code of the address for the applicant-supplied business or personal reference.

For practice, type '60111'.

10. Select the Reference Status

Select the status and results of the reference checking process. You may update this option list (AT13) to include all of the reference status options needed by your organization.

For practice, select 'Phone Interview Pos'.

11. Enter the Area Code

Enter the reference's three-digit telephone area code.

For practice, type '312'.

12. Enter the Phone Number

Enter the reference's seven-digit telephone number including the hyphen.

For practice, type '342-4444'.

13. Enter the Extension

Enter the reference's telephone extension number.

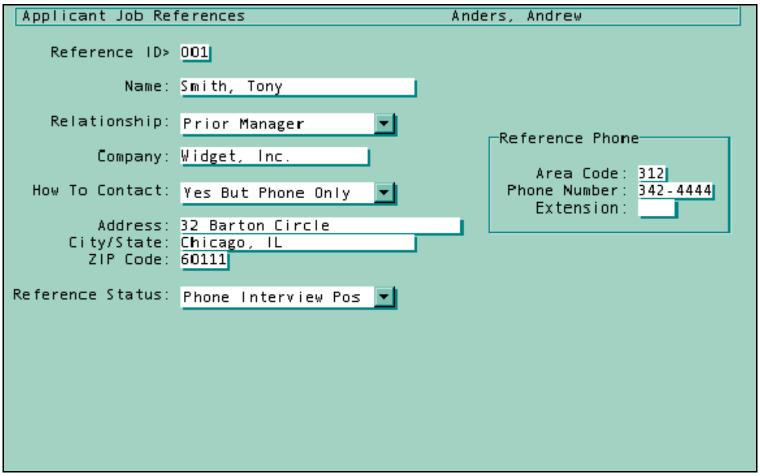
For practice, leave this text box blank.

14. Click Save or press Enter

The applicant's reference is now recorded.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



Applicant Job References Anders, Andrew

Reference ID> 001
Name: Smith, Tony
Relationship: Prior Manager
Company: Widget, Inc.
How To Contact: Yes But Phone Only
Address: 32 Barton Circle
City/State: Chicago, IL
ZIP Code: 60111
Reference Status: Phone Interview Pos

Reference Phone
Area Code: 312
Phone Number: 342-4444
Extension:

Recording an applicant's contact information

To enter contact information for an applicant, follow these steps:

1. Access the Applicant Contact Information form (008SCR)

The Applicant Contact Information form (008SCR) is used to record information regarding when, where, and how an applicant wants to be contacted by you.

Access this form by making the following selection from the Navigator:

Component: Employee Resourcing
Process: Recruit and Select Employees
Task: Contact Information

For practice, access the Applicant Contact Information form (008SCR) for applicant A012, Andrew Anders.

2. Enter the Home Area Code

Enter the area code of the applicant home telephone number.

For practice, type '312'.

3. Enter the Home Phone Number

Enter the home telephone number of the applicant including the hyphen.

For practice, type '454-5432'.

4. Enter the Contact Hours

Enter the time frame during which the applicant will be available to be contacted at the applicant's home telephone number.

For practice, type '8AM - 10PM'.

5. Enter the Work Area Code

Enter the area code of the applicant's work telephone number.

For practice, leave this text box blank.

6. Enter the Work Phone Number

Enter the work telephone number of the applicant.

For practice, leave this text box blank.

7. Enter the Work Extension

Enter the extension number to be used with the applicant's work telephone number.

For practice, leave this text box blank.

8. Enter the Contact Hours

Enter the time frame during which the applicant will be available to be contacted by you at the applicant's work telephone number.

For practice, type 'None'.

9. Select Mail

Select whether or not the applicant wants to be contacted by mail. You may update this option list (AT09) to include all of the mail contact preferences needed by your organization.

For practice, select 'Contact at Home Only'.

10. Select Phone

Select whether or not the applicant wants to be contacted by telephone. You may update this option list (AT09) to include all of the phone contact preferences needed by your organization.

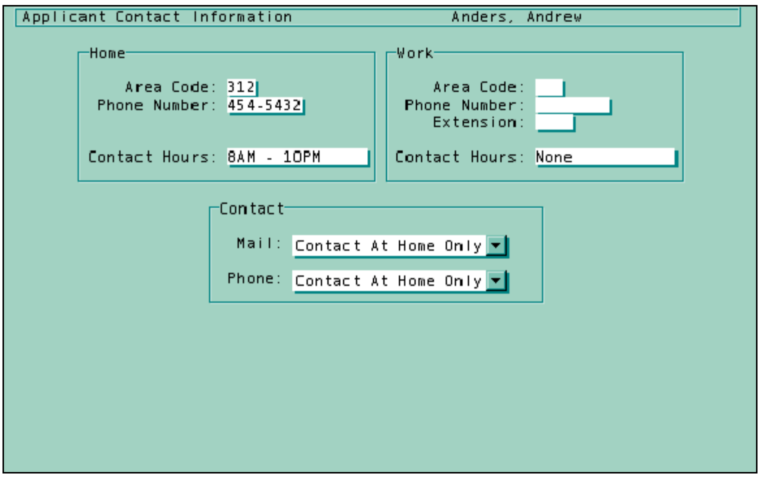
For practice, select 'Contact at Home Only'.

11. Click Save or press Enter

The applicant's contact information is now recorded.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



See also:

- Required and optional applicant data ***(on page 43)***

For a description of how this form is used to track applicant data.

Recording an applicant's identifying information

To record identifying information for an applicant, follow these steps:

1. Access the Applicant Identifying Documentation form (005SCR)

The Applicant Identifying Documentation form (005SCR) is used to continue recording applicant information and to add or change basic applicant data currently on an applicant's record.

Note: This type of information is usually not entered at this point in the recruitment process; typically, this is recorded after the applicant has been hired.

Access this form by making the following selection from the Navigator:

Component: Employee Resourcing
Process: Recruit and Select Employees
Task: Identifying Information Documentation

For practice, access the Applicant Identifying Documentation form (005SCR) for applicant A012, Andrew Anders.

2. Enter the Record Date

Enter the effective date of the form's information. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '12-15-1997' (US and Canada) or '15-12-1997' (elsewhere).

3. Select the Citizenship

Select the citizenship option of the country where the applicant holds citizenship. You may update this option list (HR05) to include all of the citizenship options needed by your organization.

For practice, select 'USA'.

4. Select the Visa

Select the visa type a non-citizen applicant has been granted. You may update this option list (HR06) to include all of the visa options needed by your organization.

For practice, leave this text box blank.

5. Enter Visa Expires

Enter the expiration date of the employee's current visa.

For practice, leave this text box blank.

6. Enter the Prior Name

Enter the employee's or applicant's prior surname (if applicant volunteered that a name change occurred).

For practice, leave this text box blank.

7. Select the Clearance (optional)

Select the level of security that has been granted this applicant. You may update this option list (HR08) to include all of the security levels needed by your organization.

For practice, leave this text box blank.

8. Enter the Clearing Agency (optional)

Enter the name of the agency used to establish the applicant's level of security clearance.

For practice, leave this text box blank.

9. Select the Verification

Select the identification procedure status. The status denotes whether or not the procedure has started and if identification could be produced. You may update this option list (HR49) to include all of the verification options needed by your organization.

For practice, select 'Documents Verified'.

10. Select the ID Provided

Select the type of identification document produced for verification. You may update this option list (HS09) to include all of the document options needed by your organization.

For practice, select 'Prov'd 2 Documents'.

11. Select the Identity

Select the type of document produced proving identity of the applicant. You may update this option list (HR49) to include all of the document options needed by your organization.

For practice, select 'Drivers License'.

12. Select the Employment

Select the type of document produced proving the applicant has employment authorization. You may update this option list (HR43) to include all of the document options needed by your organization.

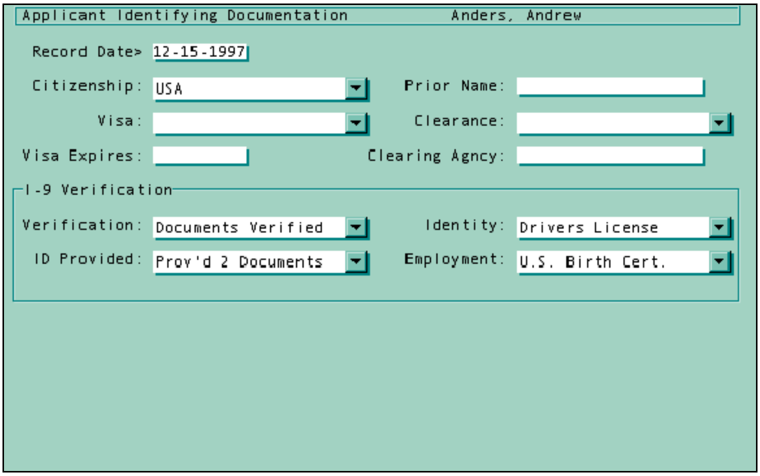
For practice, select 'U.S. Birth Cert.'

13. Click Save or press Enter

The applicant's identifying documentation is now recorded.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



See also:

■ Required and optional applicant data ***(on page 43)***
For a description of how this form is used to track applicant data.

Recording an applicant's preferred work environment

To record the preferred work environment for an applicant, follow these steps:

1. Access the Applicant Preferred Work Environment form (004SCR)

The Applicant Preferred Work Environment form (004SCR) is used to record the applicant's preferred work environment, current work status, and availability details.

Access this form by making the following selection from the Navigator:

Component: Employee Resourcing
Process: Recruit and Select Employees
Task: Preferred Work Environment

For practice, access the Applicant Preferred Work Environment form (004SCR) for applicant A012, Andrew Anders.

2. Enter Recorded

Enter the date on which the applicant's preferred work environment and availability was recorded. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '12-15-1997' (US and Canada) or '15-12-1997' (elsewhere).

3. Enter the Req Days Notice

Enter the number of days of notice the applicant must give when terminating prior employment.

For practice, leave this text box blank.

4. Enter the Earliest Available

Enter the earliest date on which the applicant may be available to begin work. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '01-01-1998'.

5. Check/do not check Lower Rated Job

Select the check box if the applicant prefers to be considered for a lower- or less-rated job than the one for which the original consideration was performed. If the applicant does not want to be considered for a lower rated job, leave the text box empty.

For practice, leave this text box blank.

6. Select Relocation Election

Select the applicant's willingness to relocate as a condition of employment. You may update this option list (HR19) to include all of the relocation elections needed by your organization.

For practice, select 'Will Consider Relocation'.

7. Select Preference 1

Select the applicant's geographic relocation preference. You may update this option list (HR20) to include all of the geographic preferences needed by your organization.

For practice, select 'USA Northwest'.

8. Select Preference 2

Select the applicant's second geographic relocation preference. You may update this option list (HR20) to include all of the geographic preferences needed by your organization.

For practice, leave this text box blank.

9. Check/do not check Will Work Shift

Select the check box if the applicant is willing to work on a job that requires working a shift other than straight days. If the applicant is not willing to do shift work, leave the text box empty.

For practice, leave this text box blank.

10. Select Shift Preference

Select which shift is acceptable to the applicant. You may update this option list (HR52) to include all of the shift preferences needed by your organization.

For practice, select '1st/ Day Shift Only'.

11. Select Schedule Preference

Select which of the work schedules the applicant prefers to work. You may update this option list (HR53) to include all of the schedule preferences needed by your organization.

For practice, select 'Any Schedule'.

12. Check/do not check Will Travel

Select the check box if the applicant is willing to travel as part of the job or position. If the applicant is not willing to travel, do not make an entry.

For practice, select 'Will Travel'.

13. Enter the Pct

If the applicant is willing to travel as part of the job or position, enter the percent of time the applicant finds acceptable for travel as part of a job or position.

For practice, type '025'.

14. Enter the Hourly

Enter the hourly rate the applicant expects to earn or the lowest amount the applicant will consider accepting as a starting hourly rate of pay.

For practice, bypass this entry. The text box will display .0000 when the form is saved.

15. Enter the Monthly

Enter the monthly salary that the applicant expects to be paid, or the lowest amount the applicant will consider as an acceptable starting monthly wage.

For practice, bypass this entry. The text box will display .00 when the form is saved.

16. Enter the Annual

Enter the annual salary that the applicant expects to be paid or the lowest amount the applicant will consider as an acceptable starting annual wage.

For practice, type '60,000'.

17. Enter the Term Date

Enter the date on which the applicant left your employment if they had previously worked for your organization. The date in this text box will help you determine if you have the Employee Database record on file. If so, you can process a rehire against the old record instead of entering a new record.

Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, leave this text box blank.

18. Enter the Empl Nbr

If the applicant was previously employed by your organization, enter the applicant's previous employee number. If the applicant has not been previously employed by your organization, leave this text box blank.

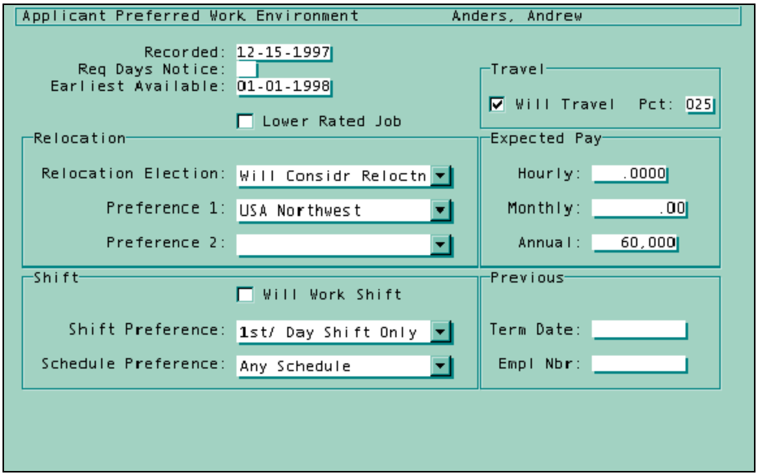
For practice, leave this text box blank.

19. Click Save or press Enter

The applicant's preferred work environment is now recorded.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



See also:

- Required and optional applicant data ***(on page 43)***

For a description of how this form is used to track applicant data.

Selecting candidates for interview

To select candidates for interview, follow these steps:

1. Update Applicant Status on the Job or Position Applied For form (003SCR)

The Job Or Position Applied For form (003SCR) is used to record information about the job(s) and/or position(s) for which an applicant has applied, or is being considered.

Access this form by making the following selection from the Navigator:

Component: Employee Resourcing
Process: Recruit and Select Employees
Task: Job/Position Applied for

For practice, access the Update Applicant Status on the Job or Position Applied For form (003SCR) for applicant A012, Andrew Anders.

2. Select the Interview Status

Select and update the applicant's status in the interview process for this job and/or position. You may update this option list (AT12) to include all of the interview status code options needed by your organization.

For practice, select '2nd Interviews Scheduled'.

3. Select the Standing

Select the status of an applicant's progress through the interview process for this job and/or position. You may update this option list (AT02) to include all of the standing status options needed by your organization.

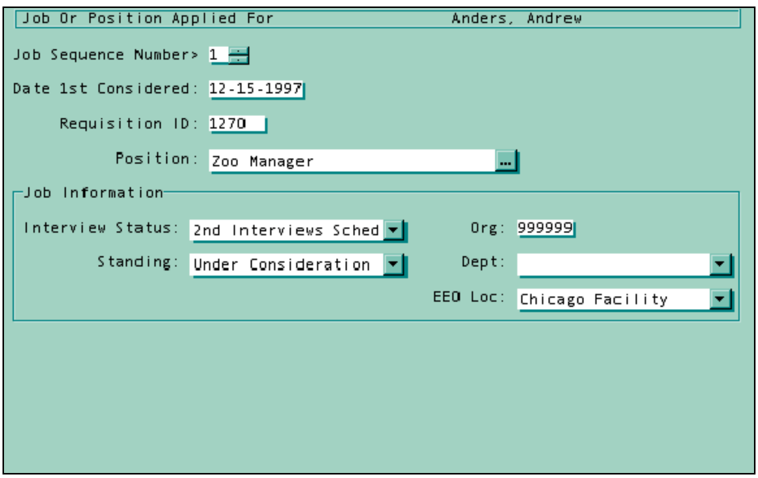
For practice, select 'Under Consideration'.

4. Click Save or press Enter

The applicant's updated status information is now recorded.

For practice, click Save or press Enter.

If you completed the Guided Practice and are using Position Administration, the resulting form should look similar to the example that follows:

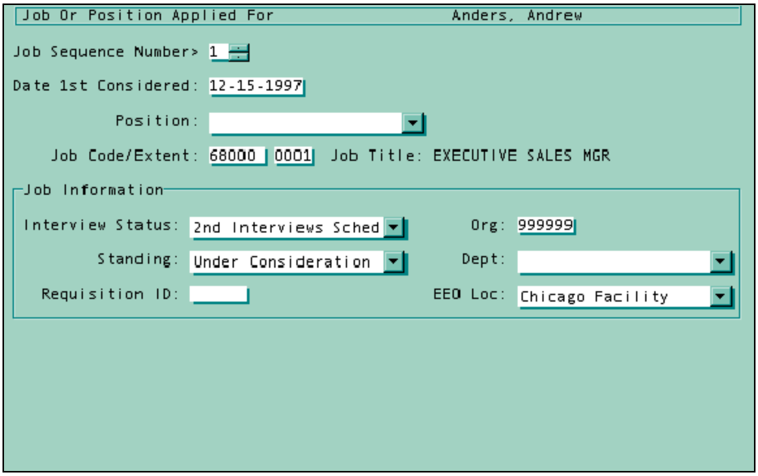


Job Or Position Applied For   Anders, Andrew

Job Sequence Number> 1
Date 1st Considered: 12-15-1997
Requisition ID: 1270
Position: Zoo Manager

Job Information
Interview Status: 2nd Interviews Sched   Org: 999999
Standing: Under Consideration   Dept:
EEO Loc: Chicago Facility

If you completed the Guided Practice and are *not* using Position Administration, the resulting form should look similar to the example that follows:



Job Or Position Applied For Anders, Andrew

For a description of how this form is used to track applicant data.

Monitoring an applicant's interview progress

To monitor an applicant's interview progress, follow these steps:

1. Complete the Interview Recap form (007SCR)

The Interview Recap form (007SCR) is used to record information about applicant interviews. A separate record for each interview is recorded.

Access this form by making the following selection from the Navigator:

Component:	Employee Resourcing
Process:	Recruit and Select Employees
Task:	Interview Results

For practice, access the Interview Recap form (007SCR) for applicant A012, Andrew Anders.

2. Select the Type

Select the type or level of the applicant interview that was conducted. You may update this option list (AT03) to include all of the interview recap type options needed by your organization.

For practice, select 'Second Department'.

3. Enter the Date

Enter the date on which the interview was conducted. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '12-22-1997' (US and Canada) or '22-12-1997' (elsewhere).

4. Select the Interviewer

Select the interviewer conducting the applicant interview. You may update this option list (AT03) to include all of the interviewers needed by your organization.

For practice, select 'Armstrong, Tom'.

5. Select the Sequence Number

Select the job sequence number of the job for which the interview was held.

For practice, select '1'.

6. Select the Rating

Select the rating the interviewer assigned to the applicant as a result of the interview. You may update this option list (AT05) to include all of the rating options needed by your organization.

For practice, select 'Recommend Hire'.

7. Enter the Interview Notes

Enter the notes from the interview that you may want to record for analysis purposes.

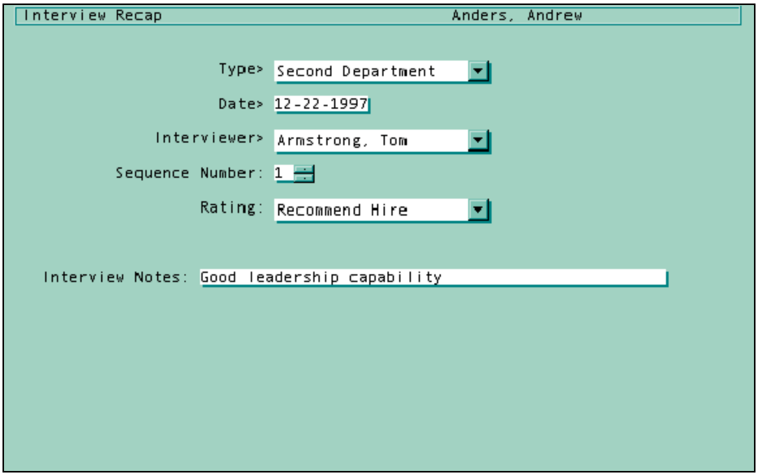
For practice, type 'Good leadership capability'.

8. Click Save or press Enter

The applicant's interview recap is now recorded.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



See also:

- Required and optional applicant data ***(on page 43)***

For a description of how this form is used to track applicant data.

Reviewing the applicant's profile

To review the applicant's profile, follow this step:

Access the On-Line Applicant Profile form (010SCR)

The On-line Applicant Profile form (010SCR) allows you to view an applicant's Employee Database record online. After you have established a starting point on the Employee Database record to begin the profile process, the system continues paging through the applicant's record and displays all occurrences of the segments as they appear on the file. Each segment's data is prefaced with a two-line heading defining the information that appears.

Access this form by making the following selection from the Navigator:

Component: Employee Resourcing
Process: Recruit and Select Employees
Task: View Applicant Profile

For practice, access the On-Line Applicant Profile form (010SCR) for applicant A012, Andrew Anders.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:

```

- Required and optional applicant data ***(on page 43)***

For a description of how this form is used to track applicant data.

Entering the successful candidate's job details

To enter the successful candidate's job details, follow these steps:

1. Access the Applicant Information form (001SCR)

The Status text box must be changed to 'Offer Accepted' on the Applicant Information form (001SCR) for the successful candidate.

Access this form by making the following selection from the Navigator:

Component: Employee Resourcing
Process: Recruit and Select Employees
Task: Basic Information

For practice, access the Applicant Information form (001SCR) for applicant A012, Andrew Anders.

2. Change Applicant Status to 'Offer Accepted'

The Applicant Status text box must be changed to 'Offer Accepted' for the successful candidate.

Applicant Status: Offer Accepted

For practice, select 'Offer Accepted'.

3. Click Save or press Enter

Execute the form to process the entry. The applicant status information is now recorded.

For practice, click Save or press Enter.

4. Access the Job or Position Applied For form (003SCR)

The Standing text box must be changed to 'Offer Accepted' on the Job Or Position Applied For form (003SCR) for the successful candidate.

Access this form by making the following selection from the Navigator:

Component: Employee Resourcing
Process: Recruit and Select Employees
Task: Update Applicant Status

For practice, access the Job Or Position Applied For form (003SCR) for applicant A012.

5. Change Standing to 'Offer Accepted'

The Standing text box must be changed to 'Offer Accepted' for the successful candidate.

For practice, select 'Offer Accepted'.

6. Click Save or press Enter

Execute the form to process the entry. The standing information is now recorded.

For practice, click Save or press Enter.

7. Access the Hired Applicant Pre-Transfer Information form (020SCR)

This form is used to enter some job details for the candidate when hired. This information does not transfer to the hired employee's record.

Access this form by making the following selection from the Navigator:

Component: Employee Resourcing
Process: Recruit and Select Employees
Task: Pre-Transfer Information

For practice, access the Hired Applicant Pre-Transfer Information form (020SCR) for applicant A012.

8. Enter the Date

Enter the date on which the applicant was or will be hired. It is also the date that will be used as the key date for the location segments that may be created. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '01-10-1998' (US and Canada) or '10-01-1998' (elsewhere).

9. Enter the Hourly Rate

Enter the hourly rate of pay that will be paid to the applicant when hired.

Note: Salary information does not transfer, so you may wish to simply provide an annual salary or an hourly rate for informational purposes.

For practice, bypass this text box. The text box will display .0000 when the form is saved.

10. Enter the Salary Per Period

Enter the salary per period that will be paid to the applicant when hired. Multiply the hourly rate by the number of hours in a period to determine the amount.

Note: Salary information does not transfer, so you may wish to simply provide an annual salary or an hourly rate for informational purposes.

For practice, bypass this entry. The text box will display .00 when the form is saved.

11. Enter the Annual Salary

Enter the annual salary that will be paid to the applicant when hired.

Note: Salary information does not transfer, so you may wish to simply provide an annual salary or an hourly rate for informational purposes.

For practice, type '64,500.00'.

12. Select the Pay Frequency

Select the pay frequency (PP29) that will be used to calculate the applicant's salary when hired.

For practice, select 'Semi Monthly'.

13. Enter the Hours Per Period

Enter the hours per pay period (in this case, semi-monthly) that the applicant will be working.

For practice, type '86.67'.

14. Select the Geographic Range

Select the geographic range (HR66) the applicant will, or is authorized to work within. Select 'All Locations' unless there are geographic differences in effect that apply to this particular position.

For practice, select 'All Locations'.

15. Select the Payment Type

Select the payment type that will be used to calculate the applicant's salary when hired. You may update this option list (PP40) to include all the various payment options you may require.

For practice, select 'Salary-Auto Paid'.

16. Select the EEO Establishment

Select the EEO establishment option for the location where the applicant will be working. You may update this option list (EO069) to include all of the EEO establishments you may require.

For practice, select 'Chicago Facility'.

17. Enter Organization Level 1

Enter the organization level 1 value in which the applicant's record will reside when it has been transferred at hire. This is an alphanumeric text box containing 2 characters.

For practice, type '99'.

18. Enter Organization Level 2

Enter the organization level 2 value in which the applicant's record will reside when it has been transferred at hire. This is an alphanumeric text box containing four characters.

For practice, type '9999'.

19. Select Organization Level 3

Select the organization level 3 value for the applicant's location when the applicant's record is transferred to the active organization as an employee.

For practice, select 'Region 3030'.

20. Select Organization Level 4

Select the organization level 4 value for the applicant's location when the applicant's record is transferred to the active organization as an employee.

For practice, select 'Department 4040'.

21. Select Organization Level 5

Select the organization level 5 value for the applicant's location when the applicant's record is transferred to the active organization as an employee.

For practice, select 'Section 5050'.

22. Select Organization Level 6

Select the organization level 6 value for the applicant's location when the applicant's record is transferred to the active organization as an employee.

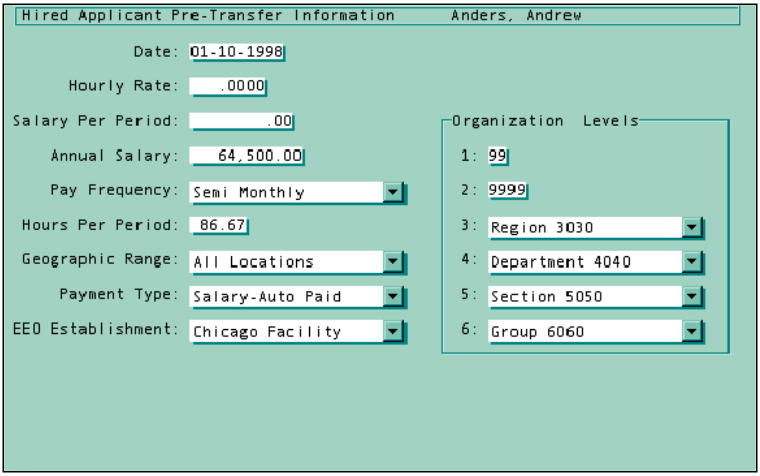
For practice, select 'Group 6060'.

23. Click Save or press Enter

The hired applicant's pre-transfer information is now recorded.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



See also:

- Required and optional applicant data *(on page 43)*

For a description of how this form is used to track applicant data.

Extended Practice

Using the Applicant Tracking organization of 993333 and an employee template of 'LMODEL AT', add yourself as a new applicant as of the 1st of the current month. Repeat your initials twice (example: NENE) for the applicant number. You are applying for the position (requisition number 1805) of Zoo Manager and already have the first round of interviews scheduled. Enter all of the appropriate data on the Applicant Information form (001SCR), Applicant Name and Address form (002SCR), and Job Or Position Applied For form (003SCR).

Use the appropriate form to enter two references (current manager and a neighbor) for yourself.

You were offered, and accepted, the Zoo Manager position today. Update the Status As Of and Applicant Status text boxes on the Applicant Information form (001SCR) and the Interview Status and Standing text boxes on the Job Or Position Applied For form (003SCR). Also, complete the appropriate pre-transfer information on the Hired Applicant Pre-Transfer Information form (020SCR). You will be paid an annual salary of 38,500.00 based on a weekly pay frequency and will be assigned to Region 3030, Department 4040, Section 5050, and Group 6060.

Review of Questions Answered

1. What are the options available when recruiting employees?

2. How can using the applicant organizations facilitate the recruitment process?

3. How are employee templates used to enter information in the system?

4. What data is required and what data is optional when entering applicant information?

Hiring, Rehiring, Reinstating, Recalling, or Transferring an Employee

In This Chapter

Introduction

This section discusses some of the most important processes that your organization performs—hiring new employees, rehiring, reinstating, or recalling former or inactive employees, and transferring existing employees to different organizations.

Tasks

This section explains the following:

- Transferring an applicant to an employee organization
- Hiring a new employee using the Quick Hire process (Position Administration users)
- Hiring a new employee using the Quick Hire process (Non-Position Administration users)
- Hiring a new employee using the Employee Information form
- Entering new hire activity details
- Adding/maintaining job assignment details
- Assigning/changing location
- Assigning/changing salary
- Recording contact information
- Recording personal and ID information
- Recording employee telephone numbers
- Recording spouse/dependent information
- Rehiring, reinstating, or recalling an employee
- Transfer an employee to another organization
- Recording contact information
- Recording personal and ID information
- Recording telephone numbers
- Recording spouse/dependent information
- Verifying employee information
- Recording employee, job, and institution information
- Recording demographic data for EEO and Affirmative Action (optional)
- Entering EEO-4 reporting information
- Recording EEO prior year totals

Prerequisites

Before you can perform the tasks in this section the following must be completed.

- You must have set up your organizations and implemented the system.

Questions answered

The following questions are answered in this section:

1. What considerations are there when hiring, rehiring, reinstating, or recalling, and transferring employees?
2. What information is required on the employee record for him or her to be active in the system?
3. How are major activities and employee statuses handled?

4. What are the various methods used for adding new employees to your organization?
5. How are positions and jobs handled when adding new employees?
6. What are the important dates used to track employees in the system?
7. Which employee-level data is optional when adding new employees?

Hiring, rehiring, reinstating, recalling, and transferring

The processes of hiring, rehiring, reinstating, recalling, and transferring your employees are similar from an administrative perspective because they all require the gathering and recording of certain key information. For example, hiring, rehiring, reinstating, and recalling all involve recordkeeping tasks that result in an employee record with an 'active status'. This indicates the individual employee is included in your organization's headcount and other statistical analyses. However, each process also requires its own unique considerations and tasks.

Apply the Concept
What are the differences between *rehiring*, *reinstating*, and *recalling* employees?

New hire considerations

Once a candidate has been selected to fill a vacant position in the organization and an employment agreement has been reached, one of your first tasks to be completed is information gathering. The new hire stage is an ideal opportunity for you to gather all the information that will be useful to your organization in managing, compensating, and training the employee and in fully using his or her skills and competencies to accomplish organizational objectives. An organized, carefully thought-out information-gathering process at the time the employee is hired is often more efficient than a piecemeal approach later.

The specific information to be gathered may vary somewhat from one employee to another. Individuals who have been tracked as applicants in the system will already have certain key information recorded about them. In such a case, you need to gather and add to the individual's record only the information that was not provided at the time of application. If applicants have been tracked manually, all of the information about each applicant will need to be recorded.

Some information is typically considered mandatory when hiring a new employee. These data elements include the individual's name, home address and telephone number, Social Security or National Insurance Number, position, salary, location, and starting employment date. Information that your organization may consider optional includes the employee's skills, competencies, training, education, emergency-contact information, medical and health information, and dependent information. Although such information may be considered optional, this information can help form a comprehensive and useful employee record and is gathered much more efficiently at the new hire stage than at any other time.

If you are using eCyborg Interactive Workforce, newly hired employees can enter and maintain much of their personal data. However, to gain access to Interactive Workforce, the following information must be in The Solution Series:

- First and last name
- Employee ID
- Employment date
- ID of organization (Control 1-2s) to which the employee belongs
- Status
- Pay frequency

Employees can not enter their salary information; therefore, the HR representative must enter the new employee's salary in The Solution Series .

Other new hire considerations may include other activities, such as scheduling reviews or tests and notifying other departments within the organization. Depending on your organization and the job or position for which a new employee has been hired, you may need to consider the following issues:

- Meeting legal requirements (proof of citizenship, fair-employment monitoring, and so forth)
- Scheduling new-employee orientation (induction training)
- Setting up a training plan
- Scheduling probationary reviews and the employee's first performance review
- Scheduling medical examinations or testing
- Enrolling the employee in benefit programs
- Setting up vacation and sick-leave benefits
- Allocating or assigning company property to the employee
- Setting up payroll details

Rehire, reinstatement, and recall considerations

The process of rehiring, reinstating, or recalling an employee is really very similar to the hiring process—you must gather and record certain key information and change the employee's status from 'inactive' to 'active'.

The key difference in the information-gathering activity for a rehire, reinstatement, or recall is, of course, that certain information about the employee will already exist in the organization's records. This information should be carefully reviewed for accuracy and completeness and updated as needed. The system makes it easy for you to review an employee's current record using system reports such as the Employee Personal Data Profile report (1J-RPT).

A key consideration when rehiring, reinstating, or recalling employees is the length of time the employee has been away from the job. The length of the gap in the employee's service to the organization may affect his or her seniority as well as certain benefit entitlements. The updates you make to the employee's record at the time of rehire, reinstatement, or recall must correctly reflect answers to questions like the following:

- Will this employee maintain the seniority earned before leaving, or will seniority calculations be adjusted by the amount of time the employee has been out of the organization's employ?

- Will this employee continue to accrue personal leave or vacation time at the same rate of accrual used before the employee status was changed to inactive, or will the new-hire accrual rate be applied?

You may need to make adjustments to a returning employee's key employment dates (original hire date, seniority-related dates, and so forth) to reflect your organization's policy governing employee leaves.

Transfer considerations

A transfer of an employee may be brought about by the employee's taking a position in a different company. When this occurs, it is an ideal opportunity to perform a thorough review of the employee's record so that all necessary information can be updated. Much like a rehire, reinstatement, or recall, a transfer may also affect the employee's benefits, taxes, or possibly even seniority.

Required employee data

The system provides the capability to record a wide range of employee level data, and some of these data elements must be recorded when an employee is hired to establish the employee as active.

If eCyborg Interactive Workforce is in use, you must set up newly hired employees within The Solution Series so that Interactive Workforce can extract their user IDs and generate their passwords. Before a new employee can access eCyborg Interactive Workforce, the following information must exist in The Solution Series for the employee:

- First and last name
- Employee ID
- Employment date
- ID of organization (Control 1-2s) to which the employee belongs
- Status
- Pay frequency

In addition, you may want to include the employee's date of birth and salary. Employees can not enter or maintain this information using Interactive Workforce.

If your organization uses eCyborg Interactive Benefits, you may need additional information in The Solution Series to calculate benefits information for the employee. Also, if your organization requires other information based on your business processes, the information must first exist in The Solution Series in order to be extracted and loaded into Interactive Workforce.

If Position Administration is in use, the required data elements include:

If you are using Position Administration	
What to record	**Form**
Basic employee information (employee number, name, address, social security number (US), gender, race, pay frequency, birth date, employment data, and the new hire activity, position, complement and requisition information, if used)	Manually enter the Employee Information form (EF-SCR) or Set Up A New Employee form (NH-SCR) (a two-panel form when Position Administration is in use).
New hire activity information	Automatically recorded on the New Hire form (01-SCR).
Position information	Automatically recorded on the Incumbency - Basic Details form (M40SCR) and the Job Assignment/ Changes form (05-SCR). Additional incumbencies must be recorded manually on the Incumbency - Basic Details form (M40SCR).
Salary information	Manually enter the Salary Assignment/Changes form (40-SCR) for any incumbencies.

If you are using Position Administration	
Location information	Manually enter the Location Assignment/Changes form (05CSCR) to maintain organization levels 3 through 6.

If you are not using Position Administration

If you are not using Position Administration, you have slightly different employee data requirements, as follows:

If you are not using Position Administration	
What to record	**Form**
Employee data requirements	Manually record on the Set Up A New Employee form (NH-SCR) to perform a 'Quick Hire'. (This two-panel form streamlines the new hire process by automatically populating five required forms.)
Basic employee information (including employee number, name, address, gender, race, pay frequency, birth date, and employment data)	Automatically recorded on the Employee Information (EF-SCR) and Additional Employee/Payroll Information (EG-SCR) forms.
New hire activity information	Automatically recorded on the New Hire form (01-SCR).
Job assignment information	Automatically recorded on the Job Assignment/Changes form (05-SCR).
Location information	Automatically recorded on the Location Assignment/Changes form (05CSCR).
Salary information	Automatically recorded on the Salary Assignment/Changes form (40-SCR).

The New Hire form (01-SCR) is used only for the initial entry. Each form listed above should be accessed individually for maintenance.

The Incumbency - Basic Details form (M40SCR) is not used.

Apply the Concept
What is the *Quick Hire* process?

Establishing data for government compliance reporting

The system provides several forms for recording government compliance information, such as Affirmative Action, EEO reporting, and OSHA reporting. You can customize your new hire process to include the necessary forms and ensure that appropriate data is entered.

The following table describes the forms you will use to set up data for compliance reporting:

Use this form	For this report
EEO/AAP Demographic Data form (TY-SCR)	EEO and Affirmative Action reports
Additional Personal and ID Information form (02-SCR)	EEO Vets-100 report (73-RPT) I.R.C.A. Immigration Reform Verification (1M-RPT) IPEDS Fall Staff Survey (76-RPT)
EEO-4 Reporting Information form (EO4SCR)	EEO-4 - State and Local Government Information (74-RPT)
IPEDS/Employee Tenure/Rank form (05ESCR)	EEO-6 Report for Higher Education Institutions (7E-RPT)
Set Up A New Employee form (NH-SCR)	New Hire Report (37-RPT)
Injury Information form (PR-SCR)	OSHA Form 200 Lost Time Detail (3S-RPT) OSHA Form 200 Lost Time Totals (3Q-RPT) OSHA Form 300 Log of Work-Related Injuries and Illnesses (20-RPT) OSHA Form 300A Summary of Work-Related Injuries and Illnesses (21-RPT) OSHA Form 301 Injury and Illness Incident Report (22-RPT)
Additional Injury Information form (PROSCR)	OSHA Form 300 Log of Work-Related Injuries and Illnesses (20-RPT) OSHA Form 300A Summary of Work-Related Injuries and Illnesses (21-RPT) OSHA Form 301 Injury and Illness Incident Report (22-RPT)
Employee Information form (EF-SCR), Job Assignment/Changes form (05-SCR), and Location Assignment/Changes form (05CSCR)	EEO-1 Report for Active Employees (75-RPT) EEO-1 Report for Active Employees in Detail (70DRPT) EEO-1 Report for Active Employees by EEO Establishment (70ERPT) EEO-1 Multiple Establishment Report in Computerized Format (70MRPT) EEO-1 Single Establishment Report in Computerized Format (70SRPT) EEO-5 Report for Active Employees (75-RPT)

☞ *Refer to the Managing Employee Health and Safety documentation for additional information about OSHA reporting.*

- Entering EEO-4 reporting information ***(on page 159)***
For detailed directions on enteringEEO-4 reporting information.
- Recording EEO prior year totals ***(on page 160)***
For detailed directions on Recording EEO prior year totals.

Major activities and employee statuses

You are able to track the major activities and status changes that affect your employees. This area focuses on the new hire activity but activities can include leaves, returns, separations, or terminations. Activities in turn cause changes to employee status. For example, a 'New Hire' activity can result in a status of 'Active-Salrd Reg FT' (active - salaried, regular full-time).

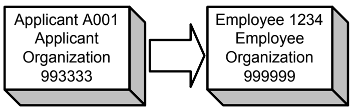
Methods for adding employees

To add or hire employees to your organization, employee records that contain the required data are added to the Employee Database. The options available to add employees to your organization include:

- Transferring an applicant
- Hiring a new employee
- Transferring an internal candidate
- Rehiring, reinstating, or recalling a former employee

Transferring an applicant

The system lets you easily hire an applicant whose applicant record is already recorded in an applicant organization. Essentially, you transfer an applicant from the applicant organization to an employee organization. This procedure requires you to use the Applicant Transfer form (ET-SCR) when using an applicant organization. When transferring an applicant from the Applicant Tracking organization, you must provide the new employee number, the new organization to which the applicant is being transferred, and the date the applicant was hired. If you are using Position Administration, you will also supply the position for which the applicant is being hired.



During the transfer process, certain applicant data automatically populates the appropriate text boxes in the active employee organization, which is also retained in the applicant record. The amount of information that transfers is dependent on which forms are used when processing your applicant information.

If you are using Position Administration, the Applicant Transfer form (ET-SCR) automatically creates the New Hire form (01-SCR), Job Assignment/Changes form (05-SCR), and Incumbency - Basic Details form (M40SCR) for you. It is recommended that before you transfer the applicant, you first record that the job offer was accepted by the applicant. This is done on the Job Or Position Applied For form (003SCR) by changing the Standing list box to 'Offer Accepted'. By doing this, a Location Assignment/Changes form (05CSCR) is automatically populated for the new employee during the transfer (it is only needed if you are going to track this kind of information when using Position Administration).

If you are not using Position Administration, you must manually enter the New Hire form (01-SCR) after transferring. It is recommended that before you transfer the applicant that you first record that the job offer was accepted by the applicant. This is done on the Job Or Position Applied For form (003SCR) by changing the Standing list box to 'Offer Accepted'. By doing this, a Job Assignment/Changes form (05-SCR) and Location Assignment/Changes form (05CSCR) are automatically created for the new employee during the transfer.

The system leaves the applicant record intact in the Applicant organization. Salary data and phone number information (if entered), does not transfer to the employee record.

☞ *Refer to* **Recruiting and Selecting Employees** *(on page 33) for a discussion about pre-transfer activities.*

Hiring a new employee

Hiring a new employee involves recording data on the following forms for the employee to be considered active.

Set Up A New Employee form or Employee Information form

You must enter one of these forms to hire a new employee who is not in one of your applicant organizations. Before you enter a new employee using one of these forms, you must decide which employee template (Logical Employee Model) to use. Employee templates are used to copy default information to the new employee's record. You can then add or change the information on the form that is specific to the new hire, such as birth date, social security number(US), name, address, and so forth.

☞ *Refer to the Implementing Human Resources Administration documentation for more information on setting up Logical Employee Models.*

If you are using Position Administration, both of these forms automatically create the New Hire form (01-SCR), Job Assignment/Changes form (05-SCR), and the Incumbency - Basic Details form (M40SCR) for the employee. An advantage to the Set Up A New Employee form (NH-SCR) is that it lets you enter a Union option value that will feed to the Incumbency - Basic Details form (M40SCR) if this applies to your organization.

If you are not using Position Administration, the Set Up A New Employee form (NH-SCR) automatically creates the New Hire form (01-SCR), Job Assignment/Changes form (05-SCR), Location Assignment/Changes form (05CSCR), and Salary Assignment/Changes form (40-SCR) for the employee if you enter the appropriate data. The Employee Information form (EF-SCR) does not create any of these forms.

If you are using eCyborg Interactive Workforce and have added a new employee, you can give the employee access to Interactive Workforce. The employee can then review and update their existing information as well as add other personal information not entered during the recruitment process. In addition, if you have eCyborg Interactive Benefits installed, the new employee can complete initial enrollment in benefits. Personal information the new employee can view or update depends on your settings.

New Hire form

If you are using Position Administration, this form is automatically created for you when you enter the Employee Information form (EF-SCR) or Set Up A New Employee form (NH-SCR). The form holds new hire data including the employee's original date of hire with your organization. The new hire activity and resulting status are also tracked on this form.

If you are not using Position Administration, the Set Up A New Employee form (NH-SCR) will create the New Hire form (01-SCR) for you. However, the Employee Information form (EF-SCR) will not. In the latter case, when you do enter the New Hire form (01-SCR), the date of hire is automatically copied to the employment date on the Employee Information form (EF-SCR) if this date was left blank originally. If the employment date was recorded on the Employee Information form (EF-SCR) and is different than the new hire date on the New Hire form (01-SCR), an informational warning message is displayed.

Job Assignment/Changes form

If you are using Position Administration, this form is automatically created for you when you enter the Employee Information form (EF-SCR) or Set Up A New Employee form (NH-SCR). This form is used to assign the new employee to a position.

If you are not using Position Administration, the Set Up A New Employee form (NH-SCR) will create the Job Assignment/Changes form (05-SCR) for you; however, the Employee Information form (EF-SCR) will not.

Salary Assignment/Changes form

The Salary Assignment/Changes form (40-SCR) is used to record salary information for the new employee. It is only automatically created for you when you enter this information on the Set Up A New Employee form (NH-SCR) and are not using Position Administration. Otherwise, you must enter this form.

Incumbency - Basic Details form

(Position Administration users only)

The Incumbency - Basic Details form (M40SCR) is used to assign new employees to a position or to multiple positions. The first position incumbency is automatically created for you by the Employee Information form (EF-SCR) or the Set Up A New Employee form (NH-SCR) when using Position Administration.

Location Assignment/Changes form

(Non-Position Administration users only)

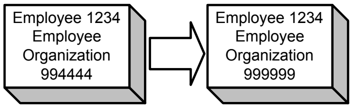
The Location Assignment/Changes form (05CSCR) is used to record the new employee's work location in terms of EEO Establishment and HR organization levels 3 through 6. It displays External Labor Market (ELM) options. This form is not required unless you have multiple establishments for EEO reporting or are subject to VETS-100 reporting. If you are using Position Administration, employee location is tracked by Organization Units, not organization levels 3 through 6 values.

You may specify the number assigned to the OSHA Establishment to which the employee usually reports by using the OSHA Establishment list box (option list HS52) on this form. This entry provides information that will be used for the OSHA Form 300A Summary of Work-Related Injuries and Illnesses.

Additionally, for VETS-100 reporting you may specify the number assigned to the hiring location to which an employee reports using the VETS Establishment list box (option list EO???).

Transferring an internal candidate

The system lets you transfer a candidate whose record is already on the system to a new position. As in the process of hiring an applicant, you will be transferring an applicant from one organization to another organization. When transferring an internal candidate, you may be transferring from either an active or inactive organization. This procedure also requires you to use the Employee Transfer form (ET-SCR).



When transferring an internal candidate to a different organization, you must provide the new employee number, the new organization, and the date that the transfer took place. The system also allows you to choose whether to move resident data from the Payroll, Human Resources, or Benefits Administration components. For example, if you are transferring an internal candidate who is an active employee in the US, you may want to move the payroll data to the new organization so that only one W-2 tax document is created at year-end. This helps you to avoid creating multiple W-2s and also prevents duplicate earning and tax information.

Note: *Moving an internal candidate to a different job or position in the same organization does not require a transfer. It may require only a job or position change.*

Note: *Transferring an internal candidate to a different position in a new organization can be complicated because of labor and tax laws among other issues. You should investigate these issues before transferring your employees.*

Rehiring, reinstating, or recalling a former employee

The system lets you easily rehire, reinstate, or recall a former employee. It is likely you still have the former employee's record on file. To rehire the employee, you need to enter new information on the Rehire/Reinstatement/Recall form (04-SCR). This form is used to record an employee rehire, reinstatement, or recall to work. For this form to be processed, a separation or termination activity must have already been recorded on the system for the candidate. Only certain activities are allowed on this form:

- 021—02x Rehire Activity
- 031—03x Reinstatement Activity
- 041—04x Recall Activity
- 051—05x Return from Non-CSSS Location
- 061—06x Return from Labor Dispute Activity
- 081—08x User-defined Return Activity
- 091—09x User-defined Return Activity

After processing the Rehire/Reinstatement/Recall form (04-SCR), the termination date on the Employee Information form (EF-SCR) will be automatically cleared for rehire activities (021-02x). For all other activities, the termination date on the Employee Information form (EF-SCR) must be manually cleared.

You may also want to change the employment date on the Employee Information form (EF-SCR) after processing the Rehire/Reinstatement/Recall form (04-SCR). Typically, when processing a rehire, you will change the employment date. When processing a reinstatement, however, you would typically not change the employment date, since the employee will likely be restored full benefit credit as if the employee never left.

Note: *The original hire date displayed on the New Hire form (01-SCR) should not be changed in a rehire/recall/reinstate situation. This date should always remain intact as the original hire date.*

The system automatically calculates a rehired employee's seniority status. The Parity Requal date text box on the Rehire/Reinstatement/Recall form (04-SCR) is defined by ERISA as the date by which a separated employee or an employee on leave must return to prevent incurring a break in service. It is informational only, but the Parity Requal date can be used along with your company policies to track the seniority status of a rehired employee.

The Adjusted Seniority text box on the Rehire/Reinstatement/Recall form (04-SCR) contains a date that is propagated through activity history when you invoke a New Hire Activity or another service adjustment status change. By adjusting this date here, all of your future-dated entries on forms and reports that use the Adjusted Seniority date will return this new date. Historical data on the system will still have the Adjusted Seniority date that was effective at the time the employee was originally hired.

Note: *If you are using eCyborg Interactive Workforce, you can give the employee access so that he or she can view personal details and update any information that has changed.*

Viewing employee information

At any time during the processing of an employee's record, you may view all of the existing information by accessing the Online Employee Profile form (PROFIL). Once you have established where you want to begin, the system pages through the employee's record and displays all occurrences of the forms on file. Descriptive headings are displayed above each data element.

If you are using eCyborg Interactive Workforce, employees can view their own data and make any changes when needed.

Verifying employee information

Employers are required to provide employee verification for various reasons: loans, mortgages, background checks, previous dates of employment, and so forth. The Employment Verification form (EMVSCR) makes it easy to access information at a glance. This form provides employee information relating to date of hire, last date activity occurred, last increase, status, pay frequency and amount of pay per period.

Positions and jobs

When you hire a new employee, you must select the employee's position on either the Employee Information form (EF-SCR) or Set Up A New Employee form (NH-SCR). This position is automatically written to the Job Code text box on the Job Assignment/Changes form (05-SCR).

If you are not using Position Administration

Positions are not used, so you must enter the employee's job code on the Set Up A New Employee form (NH-SCR) or Job Assignment/Changes form (05-SCR). This option is not available on the Employee Information form (EF-SCR).

Important dates

This chart defines some of the important dates used when tracking employees.

Date Type	Use
Original Hire Date	This is the original hire date and does not change. It is displayed on the New Hire form (01-SCR).
Employment Date	This is the date of the most recent hire and is replaced by a new date if the employee leaves the company, then subsequently returns. It is recorded on the Employee Information form (EF-SCR).
Adjusted Seniority Date	This date can be used on the Rehire/Reinstatement/Recall form (04-SCR), depending on your organization policies, to reflect adjustments to seniority per employee activities.

Optional employee data

The system provides the capability for you to record these optional data elements:

- Personal and identification information, including marital and citizenship status, visa information, military status, and security clearance. This information is recorded on the Additional Personal And ID Information form (02-SCR).

- Contact information, including the employee's email address, fax number, cellular, car, and pager numbers. This information is recorded on the Employee Contact form (EM-SCR).

- Telephone and employment information, including work and home telephone numbers, original applicant number, and employment agency used for hiring, if applicable. If you are using the applicant tracking component, these data elements are automatically populated. This information is recorded on the Phone Numbers And Employment Information form (03-SCR).

- Spouse and dependent information, which is helpful for tracking benefit entitlements. Data that can be recorded includes names, ages, and birth dates. Each spouse and dependent is assigned a unique, three-character ID. This information is recorded on the Spouse/Dependent Information form (10-SCR). Using eCyborg Interactive Workforce, you can set up a dependent numbering scheme, and eCyborg Interactive Workforce automatically creates a number for any dependents entered by the employee or the HR representative. When generating a new dependent ID, eCyborg Interactive Workforce always checks to be sure the number has not already been used in The Solution Series. eCyborg Interactive Workforce will not duplicate dependent ID numbers regardless of whether the number was created using eCyborg Interactive Workforce or by an administrator entering a dependent directly into The Solution Series.

eCyborg Interactive Workforce---to manage employee information

Maintaining employee information is an important and time-consuming part of hiring, rehiring, and reinstating employees. During all these processes the HR department must enter and maintain a certain amount of personal information for the candidate or employee. At a minimum, the individual's name, gender, birth date, address, contact information, and Social Security or National Insurance Number must be entered into the system. If the individual is an employee rather than a candidate, information on dependents and benefit enrollments must also be entered.

Review these details carefully for accuracy and completeness, and update as needed. Using eCyborg Interactive Workforce, Cyborg's web-based solution, employees can maintain their personal information, thus ensuring that the information is up-to-date. Information maintained by employees includes:

- Marital status
- Family members
- Name and address including a separate mailing address
- Contact information including phone, fax, and email details
- Emergency contacts
- Emergency doctor

Reports used for hiring, rehiring, reinstating, recalling, and transferring employees

Reporting is an important part of the hiring process, allowing you to check, review, and analyze the information you have recorded for your current employees.

The following is a list of the standard reports that are related to the hiring, rehiring, and transferring process:

- Alphabetic Listing Of Active and Inactive Employees report (1A-RPT)—Identifies active and inactive employees in alphabetical order.
- Alphabetic Listing report (3C-RPT)—Provides an alphabetical listing of active employees on file.
- Anniversary Listing report (1F-RPT)—Lists all employees who will attain an anniversary within the current calendar year.
- Birthday Listing report (1G-RPT)—Provides a listing of all employees having a birthday during a three-month period from the date entered in the report parameters.
- Current Job Report (3W-RPT)—Lists all active employees and their current job and salary data, with associated salary grade information.
- EEO-1 Multiple Establishment Report in Computerized Format (70MRPT)—Produces the EEO-1 report for one EEO establishment of a multiple establishment reporting company. The format of the report follows the EEOC specifications for a computer printed Multiple Establishment EEO-1 report.
- EEO-1 Report for Active Employees (70-RPT)—Produces a one page report totaling required EEO-1 data for a single organization.
- EEO-1 Report for Active Employees by EEO Establishment (70ERPT)—Produces a one page report totaling required EEO-1 data for each establishment within a single organization.
- EEO-1 Report for Active Employees in Detail (70DRPT)—Produces a listing of employees showing required EEO-1 data for a single organization.
- EEO-1 Single Establishment Report in Computerized Format (70SRPT)—Produces a one page total EEO-1 report for a single EEO establishment that combines all employees in a Control 1-2. The format of the report follows the EEOC specifications for a computer printed Single Establishment EEO-1 report.
- EEO-4 Report - State and Local Government Information (74-RPT)—Produces data that can be used to complete EEOC Form 164, State and Local Government

Information (74-RPT) for state and local governments that have more than 249 full-time employees

- EEO-4 State and Local Government Employer Detail Report (74DRPT)—Provides the detailed information about the employees who are counted on the EEO-4 State and Local Government Report. This report can be used to validate the EEO-4 State and Local Government Employer Detail Report.
- EEO-5 Report for Active Employees (75-RPT)—Produces the required data for your EEO-5 report totaled by sex, race and EEO job category which is filed by certain elementary and secondary school systems and districts every other year
- EEO Vets-100 Report (73-RPT)—Provides the information for your VETS-100 report, which reports annually the number of special disabled and Vietnam-era veterans by job category and hiring location
- EEO Vets-100 Employer Detail Report (73DRPT)—Provides the detailed information about the employees who are counted on the EEO Vets-100 Report (73-RPT). This report can be used to validate the EEO Vets-100 Report (73-RPT).
- Employee Profile Report (1K-RPT)—Prints a multi-page Human Resource Profile for all employees.
- Employee Headcount (1N-RPT)—Provides a statistical count of the number of employees on file by Resulting Employee Status and Job Type.
- Employee Job Listing (3N-RPT)—Lists all employees, showing their current job and rating information and providing a length of time in the current job in years, months, and days.
- Employees Active, Inactive, Separated Within Three Months (1B-RPT)—Provides an alphabetic listing of all active, inactive, and separated employees.
- Internal Mailing Labels (1E-RPT)—Provides an internal mailing list of all employees.
- IPEDS Employee Tenure and Rank (7E-RPT)—Provides information pertaining to the employee, job, and institutions of higher education.
- IPEDS Fall Staff Survey (76-RPT)—Provides information on staff that is employed at all post-secondary institutions for the National Center for Education Statistics (NCES). Formerly the EEO-6 report.
- I.R.C.A. Immigration Reform Verification (1M-RPT)—Provides information regarding employees who have or have not presented proper identification to satisfy the requirements of the Immigration Reform and Control Act of 1986

- Job Change Activity Report (3A-RPT)—Lists all employees who have had a job change since the specified date.
- LOA/Disability (1T-RPT)—Lists all active employees who are currently on a leave of absence or disability leave.
- Major Activity Listing (1U-RPT)—Lists all major activities within a specific time period.
- Monthly Payroll/Personnel Summary (3B-RPT)—Provides a summary of payroll and personnel activity within the organization.
- New Hire Report (37-RPT)—Provides federal government reporting requirements for new hires.
- Office And Home Telephone Directory (1D-RPT)—Provides a listing of all employees showing their office number, extension selection, and home telephone number.
- Office Telephone Directory (1C-RPT)—Lists all active employees, with office telephone numbers and extensions.
- Postal Mailing Labels (3D-RPT)—Produces multi-purpose, employee mailing labels for active employees.
- Seniority Listing (3K-RPT)—Lists the length of service of all active employees based on their original date of hire.
- Separation Analysis (1O-RPT)—Provides a summary of turnover activity within the organization, including monthly and cumulative statistics.
- Separation Detail Report (1S-RPT)—Lists all employees who have been separated from the organization within a specified one-month period.
- Termination Report (3X-RPT)—Lists all terminated employees.

Detailed Directions

This section provides detailed directions on completing a business task.

Tasks

Completing the Guided Practice

In the Guided Practice for this section, you will transfer applicant A012, Andrew Anders, from the applicant organization (993333) to an active employee organization (999999). You will then record the information needed for him to become an active employee in the organization.

There is also an example of how to add new employees to the file using the Set Up A New Employee form (NH-SCR) and the Employee Information form (EF-SCR).

You must have completed the Guided Practice in the preceding sections to guarantee the successful completion of the Guided Practice that follows.

Transferring an applicant to an employee organization

To transfer an applicant to an employee organization, follow these steps:

1. Access the Applicant Transfer form (ET-SCR)

The Applicant Transfer form (ET-SCR) is used to transfer Employee Database records from an applicant organization to an active employee organization. This form must be used online and can not be processed in a batch run. Transfers are made online and in real time so you can immediately verify, modify, or add data.

Note: *If transferring an applicant record to a live pay organization, the new employee number is usually different from the applicant number that was used by the applicant organization.*

Access this form by making the following selection from the Navigator:

Component:	Employee Resourcing
Process:	Hire, Rehire, Reinstate an Employee
Task:	Transfer Emp to New Organization

For practice, access the Applicant Transfer form (ET-SCR) for applicant A012 in the 993333 organization.

2. Enter the New Employee Number

Enter the new employee number.

For practice, type '0012'.

3. Enter the New Control 1-2

Enter the organization to which the applicant is being transferred.

For practice, type '999999'.

4. Enter the Applicant Hire Date

Enter the effective date of hire for the applicant. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

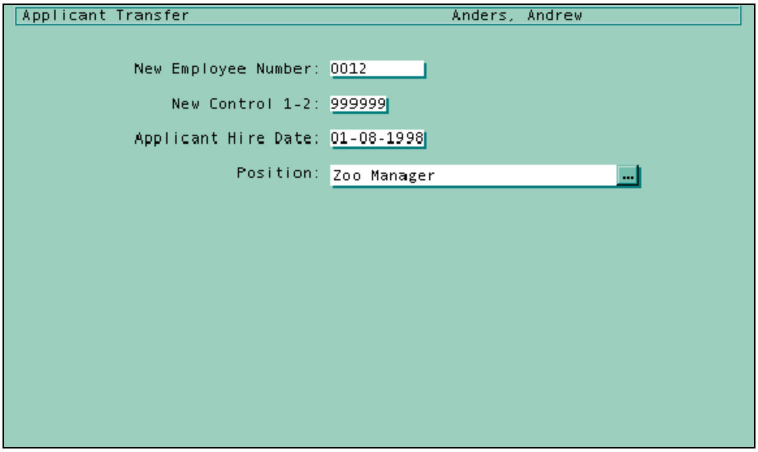
For practice, type '01-08-1998' (US and Canada) or '08-01-1998' (elsewhere).

5. Select the Position (Position Administration users only)

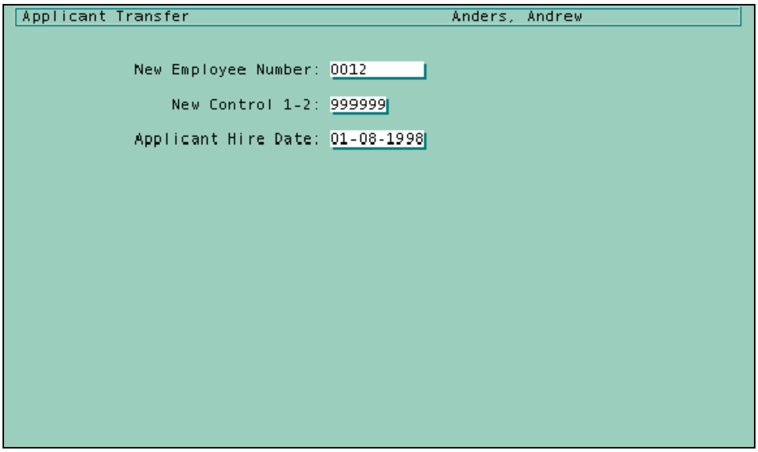
Select the new employee's position.

For practice, select 'Zoo Manager'.

If you completed the Guided Practice and Position Administration is in use, the resulting form should look similar to the example that follows:



If you completed the Guided Practice and Position Administration is *not* in use, the resulting form should look similar to the example that follows:



6. Click Save or press Enter

The second panel of the Applicant Transfer form (ET-SCR) is displayed if Position Administration is in use.

If Position Administration is *not* in use, this is the last step of the process. The transfer is processed.

For practice, click Save or press Enter.

7. Select the Status (Position Administration users only)

Select the Incumbency Status. This is typically 'Acting' or 'Regular', depending on the position.

For practice, select 'Regular'.

8. Select the Activity (Position Administration users only)

Select the appropriate new hire activity. You may update this option list (HR72) to include all of the activities needed by your organization.

For practice, select 'New Hire-Sal Reg FT' to hire the employee for salaried full-time.

If you completed the Guided Practice and Position Administration is in use, the resulting form should look similar to the example that follows:

9. Click Save or press Enter (Position Administration users only)

The applicant is transferred to the active employee organization and a 'Transfer successfully completed' message is displayed.

For practice, click Save or press Enter.

See also:

- Methods for adding employees ***(on page 94)***

For the considerations when transferring applicants.

Hiring a new employee using the Quick Hire process (Position Administration users)

To set up a new employee using the Quick Hire process, follow these steps:

1. Access the Set Up A New Employee form (NH-SCR)

The Set Up A New Employee form (NH-SCR) is used to add a new employee to the Employee Database. This is a different procedure than transferring an applicant to an active employee organization.

Access this form by making the following selection from the Navigator:

Component:	Employee Resourcing
Process:	Hire, Rehire, Reinstate an Employee
Task:	Quick Hire

An Employee Selection dialog box is displayed.

For practice, access the Set Up a New Employee form (NH-SCR).

2. Enter the Logical Employee Model designation

In the Number text box, enter the employee template to be used in creating this new employee record, for example, 'LMODEL E1'.

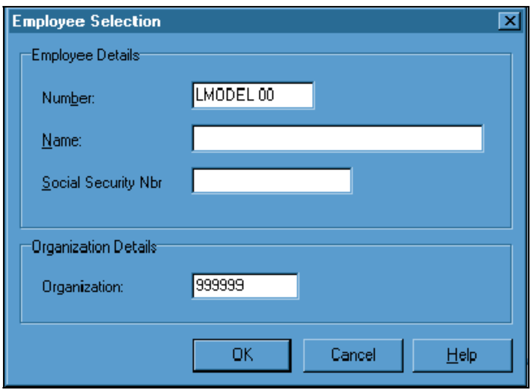
For practice, type 'LMODEL 00'.

3. Enter an Organization

In the Organization text box, enter the designation of the organization into which the employee is to be hired.

For practice, type '999999'.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



4. Click OK or press Enter

Click OK or press Enter to display the Set Up A New Employee form (NH-SCR) that contains the template's default information. Your next step is to modify this information to complete the Quick Hire process.

For practice, click on OK or press Enter.

5. Enter the Employee Number

Enter the assigned employee number for the employee.

For practice, type '4100'.

Enter the name (Steps 6 through 10)

6. Select the Title

This list box selection identifies the employee's name prefix or title.

For practice, select 'Mr'.

7. Enter the First (name)

Type the employee's first name.

For practice, type 'Frank'.

8. Enter the Middle (name)

Optionally, type the middle name of the employee. The first character of this text box will display as the last position on the title line of each form.

For practice, type '#' and delete the remaining text in this text box to remove the 'VOID' entry.

9. Enter the Last (name)

Type the employee's legal surname.

For practice, type 'Janson'.

10. Select the Suffix

This list box selection identifies the employee's name suffix, such as Jr. or Sr.

For practice, make no selection in this list box.

11. Enter the Address

Enter the employee's street address in the first text box. The second text box is reserved for additional address information, such as apartment number.

For practice, type '2112 Seattle Drive' and make no entry in the second text box.

12. Enter the City/State

Enter the city and state portions of the employee's address.

For practice, type 'Chicago' and 'IL'.

13. Enter the ZIP

Enter the employee's five-digit postal code. Optionally, enter the four-digit extended postal code preceded by a hyphen.

For practice, type '60632-5431'.

14. Select the Country

Select the employee's country of residence.

For practice, select 'USA'.

15. Enter the SSN (Social Security Number)

Enter the new employee's nine-digit social security number.

For practice, type '555995112'.

16. Select the Position

Select the new employee's position.

For practice, select 'Trainee Bird Keeper'.

17. Select the Race

Select the new employee's race. You may update this option list (HR22) to include all of the races needed by your organization.

For practice, select 'White-Not Hispanic'.

18. Select the Gender

Select the gender designation for the new employee.

For practice, select 'Male'.

19. Select the Normal Shift

Select the new employee's normal shift. You may update this option list (PP43) to include all of the normal shifts needed by your organization.

For practice, select '1st Shift HED'.

20. Select the Payment Type

Select whether the new employee is to be paid automatically or through time document entry. You may update this option list (PP40) to include all of the payment types needed by your organization.

For practice, select 'Hourly-Auto Paid'.

21. Select the Frequency

Select the new employee's pay frequency. You may update this option list (PP29) to include all of the pay frequencies needed by your organization.

For practice, select 'Semi Monthly'.

22. Enter the Birth (date)

Enter the new employee's date of birth. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

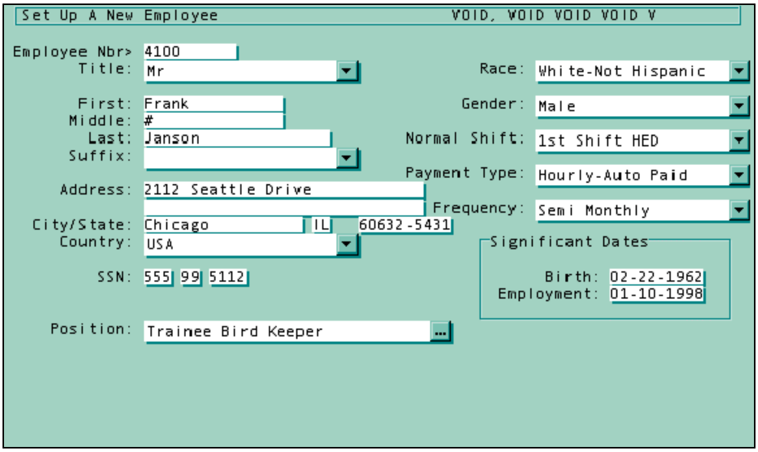
For practice, type '02-22-1962' (US and Canada) or '22-02-1962' (elsewhere).

23. Enter the Employment (date)

Enter the date employment becomes effective. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '01-10-1998' (US and Canada) or '10-01-1998' (elsewhere).

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



24. Click Save or press Enter

The second form panel for the Set Up A New Employee form (NH-SCR) is displayed.

For practice, click Save or press Enter.

25. Select the Status

Select the Incumbency Status. This is typically 'Acting' or 'Regular' depending on the position.

For practice, select 'Regular'.

26. Select the Activity

Select the appropriate new hire activity. You may update this option list (HR09) to include all of the activities needed by your organization.

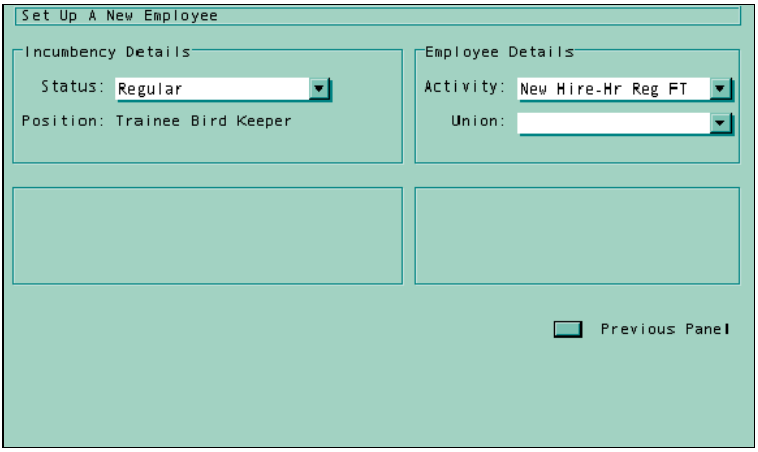
For practice, select 'New Hire-Hr Reg FT' to hire the employee for hourly full-time.

27. Select the Union

Select the union designation. You may update this option list (PP429) to include all of the unions needed by your organization.

For practice, leave this list box blank.

If you completed the Guided Practice and Position Administration is in use, the resulting form should look similar to the example that follows:



28. Click Save or press Enter

The first panel is displayed and the employee has now been set up in an active organization.

For practice, click Save or press Enter.

■ Methods for adding employees ***(on page 94)***

For the considerations when hiring new employees using the Set Up A New Employee form (NH-SCR).

Hiring a new employee using the Quick Hire process (Non-Position Administration users)

To set up a new employee using the Quick Hire process, follow these steps:

1. Access the Set Up A New Employee form (NH-SCR)

The Set Up A New Employee form (NH-SCR) is used to add a new employee record. This is a different procedure than transferring an applicant to an active employee organization.

Access this form by making the following selection from the Navigator:

Component: Employee Resourcing
Process: Hire, Rehire, Reinstate an Employee
Task: Quick Hire

An Employee Selection dialog box is displayed.

For practice, access the Set Up a New Employee form (NH-SCR) using LMODEL 00 (employee template) for organization 999999.

2. Enter the Logical Employee Model designation

In the Number text box, enter the employee template to be used in creating this new employee record, for example, 'LMODEL E1'.

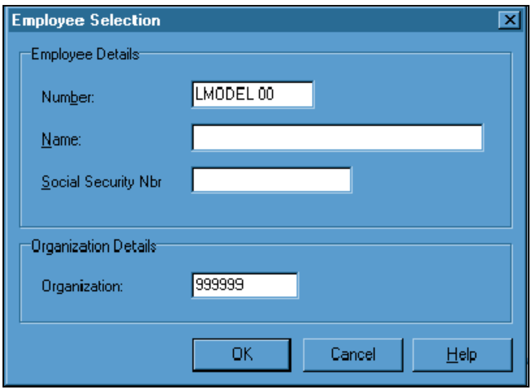
For practice, type 'LMODEL 00'.

3. Enter an Organization

In the Organization text box, enter the designation of the organization into which the employee is to be hired.

For practice, type '999999'.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



4. Click OK or press Enter

Click OK or press Enter to display the Set Up A New Employee form (NH-SCR) that contains the template's default information. Your next step is to modify this information to complete the Quick Hire process.

For practice, click on OK or press Enter.

5. Enter the Employee Number

Enter the assigned employee number for the employee.

For practice, type '4100'.

Enter the name (Steps 6 through 10)

6. Select the Title

This list box selection identifies the employee's name prefix or title.

For practice, select 'Mr'.

7. Enter the First (name)

Type the employee's first name.

For practice, type 'Frank'.

8. Enter the Middle (name)

Optionally, type the middle name of the employee. The first character of this text box will display as the last position on the title line of each form.

For practice, type '#' and delete the remaining text in this text box to remove the 'VOID' entry.

9. Enter the Last (name)

Type the employee's legal surname.

For practice, type 'Janson'.

10. Select the Suffix

This list box selection identifies the employee's name suffix, such as Jr. or Sr.

For practice, make no selection in this list box.

11. Enter the Address

Enter the employee's street address in the first text box. The second text box is reserved for additional address information, such as apartment number.

For practice, type '2112 Seattle Drive' and make no entry in the second text box.

12. Enter the City/State

Enter the city and state portions of the employee's address.

For practice, type 'Chicago' and 'IL'.

13. Enter the ZIP

Enter the employee's five-digit postal code. Optionally, enter the four-digit extended postal code preceded by a hyphen.

For practice, type '60632-5431'.

14. Select the Country

Select the employee's country of residence.

For practice, select 'USA'.

15. Enter the SSN (Social Security Number)

Enter the new employee's nine-digit social security number.

For practice, type '555995112'.

16. Select the Race

Select the new employee's race. You may update this option list (HR22) to include all of the races needed by your organization.

For practice, select 'White-Not Hispanic'.

17. Select the Gender

Select the gender designation for the new employee.

For practice, select 'Male'.

18. Select the Normal Shift

Select the new employee's normal shift. You may update this option list (PP43) to include all of the normal shifts needed by your organization.

For practice, select '1st Shift HED'.

19. Select the Payment Type

Select whether the new employee is to be paid automatically or through time document entry. You may update this option list (PP40) to include all of the payment types needed by your organization.

For practice, select 'Hourly-Auto Paid'.

20. Select the Frequency

Select the new employee's pay frequency. You may update this option list (PP29) to include all of the pay frequencies needed by your organization.

For practice, select 'Semi Monthly'.

21. Enter the Birth (date)

Enter the new employee's date of birth. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

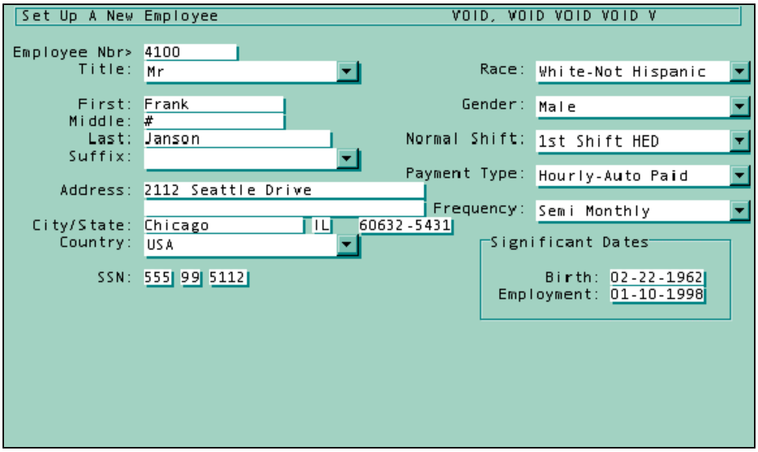
For practice, type '02-22-1962' (US and Canada) or '22-02-1962' (elsewhere).

22. Enter the Employment (date)

Enter the date employment becomes effective. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '01-10-1998' (US and Canada) or '10-01-1998' (elsewhere).

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



Set Up A New Employee VOID, VOID VOID VOID V

Employee Nbr> 4100
Title: Mr
First: Frank
Middle: #
Last: Janson
Suffix:
Address: 2112 Seattle Drive
City/State: Chicago IL 60632-5431
Country: USA
SSN: 555 99 5112

Race: White-Not Hispanic
Gender: Male
Normal Shift: 1st Shift HED
Payment Type: Hourly-Auto Paid
Frequency: Semi Monthly

Significant Dates
Birth: 02-22-1962
Employment: 01-10-1998

23. Click Save or press Enter

The first panal for the Set Up A New Employee form (NH-SCR) is accepted.

For practice, click Save.

24. Click Continue New Hire

Click the Continue New Hire button to display the second panal of the Set Up A New Employee form (NH-SCR).

For practice, click Continue New Hire.

25. Enter the Job Code and Extent

Type the code that identifies the job assignment for this employee.

For practice, select '10500' and '0001'.

26. Select the Union

Select a union code. This option list (PP429) should include all of the union types your organization may need.

For practice, bypass this entry.

27. Enter the Hours per Period

Type the number of scheduled hours in the employee's pay period. This value can default if populated on the Pay Rate Or Salary form (H1-SCR).

For practice, type '86.67'.

28. Enter the Hourly Rate or Annual Salary

You must make an entry in one of these two text boxes, Hourly Rate or Annual Salary. Do not complete both text boxes.

Hourly rate is the amount that the employee will be paid per hour. If you do not type a rate in this text box, the system calculates it based on the annual salary. Type this amount with a decimal point or with four decimal places, for example, 8.67 or 86700.

Annual salary is the result of calculating the hourly rate times the number of hours per period times the number of periods in the year. If you do not enter this amount, the system calculates it. Type this amount with a decimal point or with two decimal places, for example 23452. or 2345200.

For practice, type '24,350.00' in the Annual Salary text box.

29. Select the New Hire Activity

Select an option that identifies the new-hire activity type for this employee. As a shortcut, type a search value of 'N' to quickly go to the part of the alphabetized list that contains the new-hire options.

For practice, select 'New Hire-Hr Reg FT' to hire the employee for hourly full-time.

30. Select the OL 3 (HR Location)

Select an option to specify the new employee's Human Resource organization level 3 assignment.

For practice, select 'Region 3030'.

31. Select the OL 4 (HR Location)

Select an option to specify the new employee's Human Resource organization level 4 assignment.

For practice, select 'Department 4040'.

32. Select the OL 5 (HR Location)

Select an option to specify the new employee's Human Resource organization level 5 assignment.

For practice, select 'Section 5050'.

33. Select the OL 6 (HR Location)

Select an option to specify the new employee's Human Resource organization level 6 assignment.

For practice, select 'Group 6060'.

34. Select the EEO Locale

Select an option to record where the employee is located or counted for EEO purposes.

For practice, select 'Chicago Facility'.

35. Enter the Geographic

Select an option that indicates the employee's location assignment used to associate the employee with salary grades by location. If your company uses only one location for salary grade purposes, select 'All Locations' in the list box.

For practice, select 'All Locations'.

36. Enter the Home Phone

Type the employee's area code in the first text box and seven-digit phone number in the second text box. If this information is entered, it will update the Phone Numbers And Employment Information form (03-SCR) automatically.

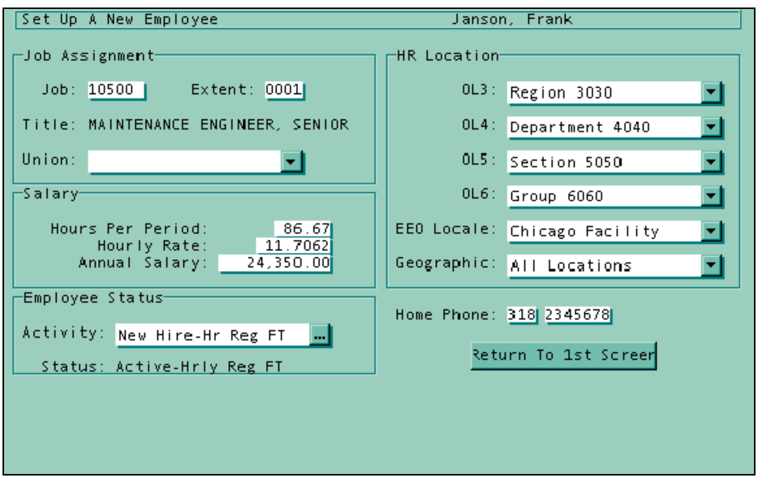
For practice, type '318' and '2345678'.

37. Click Save or press Enter

The employee has now been set up in an active organization.

For practice, click Save.

If you completed the Guided Practice and Position Administration is *not* in use, the resulting form should look similar to the example that follows:



See also:

- Methods for adding employees ***(on page 94)***

For the considerations when hiring new employees using the Set Up A New Employee form (NH-SCR).

Hiring a new employee using the Employee Information form

To hire a new employee using the Employee Information form, follow these steps:

1. Access the Employee Information form (EF-SCR)

The Employee Information form (EF-SCR) is used to add new employees to an active organization using a Logical Employee Model. The form can also be used to update and maintain basic employee information.

Note: *This task assumes you are adding a new employee using a Logical Employee Model. If you have already transferred an applicant using the Applicant Transfer form (ET-SCR) or added a new employee using the Quick Hire process Set Up a New Employee form (NH-SCR), you do not have to add the employee again using this task. This task is an alternative to the previous two tasks. If you want to maintain employee information, access this form for an employee, then only change or enter the necessary text boxes.*

Access this form by making the following selection from the Navigator:

Component:	Employee Resourcing
Process:	Hire, Rehire, Reinstate an Employee
Task:	Add Basic Employee Information

For practice, access the Employee Information form (EF-SCR) using Logical Employee Model 'LMODEL 00'.

2. Enter the Employee Nbr

Enter the assigned employee number for the employee.

For practice, type '4200'.

3. Enter the Name Code

Only '001' is valid for a new hire's name code.

For practice, type '001'.

Enter the name (Steps 6 through 10)

4. Select the Title

This list box selection identifies the employee's name prefix or title.

For practice, select 'Miss'.

5. Enter the First (name)

Type the employee's first name.

For practice, type 'Geena'.

6. Enter the Middle (name)

Optionally, type the middle name of the employee. The first character of this text box will display as the last position on the title line of each form. If no middle name is to be entered, type '#' and delete the remaining text in this text box to remove the 'VOID' entry.

For practice, type 'Louise'.

7. Enter the Last (name)

Type the employee's legal surname.

For practice, type 'Sandran'.

8. Select the Suffix

This list box selection identifies the employee's name suffix, such as Jr. or Sr.

For practice, make no selection in this list box.

9. Enter the Address

Enter the employee's street address in the first text box. The second text box is reserved for additional address information, such as apartment number.

For practice, type '1118 South Central' in the first text box and '#208' in the second text box.

10. Enter the City/State

Enter the city and state portions of the employee's address.

For practice, type 'Chicago' and 'IL'.

11. Enter the ZIP

Enter the employee's five-digit postal code. Optionally, enter the four-digit extended postal code preceded by a hyphen.

For practice, type '60642-5454'.

12. Select the Country

Select the employee's country of residence.

For practice, select 'USA'.

13. Enter the SSN (Social Security Number)

Enter the employee's nine-digit social security number.

For practice, type '222334444'.

14. Select the Position (Position Administration users only)

Select the new employee's position.

For practice, select 'Senior Bird Keeper'.

15. Enter the Birth date

Enter the employee's date of birth. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '09-15-1960' (US and Canada) or '15-09-1960' (elsewhere).

16. Enter the Employment date

Enter the effective date of employment. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

Position Administration users, type '12-22-1997' (US and Canada) or '22-12-1997' (elsewhere).

Non-Position Administration users, leave this field blank so it can be filled from the New Hire form (01-SCR).

17. Enter the Termination date

No entry is required in this field for a new hire. This is the date the employee was terminated from employment, or was transferred to another organization. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, leave this text box blank.

18. Select the Gender

Select the gender designation for the employee.

For practice, select 'Female'.

19. Select the Race

Select the employee's race. You may update this option list (HR22) to include all of the races needed by your organization.

For practice, select 'White-Not Hispanic'.

20. Select the FLSA

Select the Fair Labor Standards Act (FLSA) designation for overtime calculation that applies to the employee's job. You may update this option list (HR13) to include all of the FLSA designations needed by your organization.

For practice, leave this list box blank.

21. Select the Frequency

Select the employee's pay frequency. You may update this option list (PP29) to include all of the pay frequencies needed by your organization.

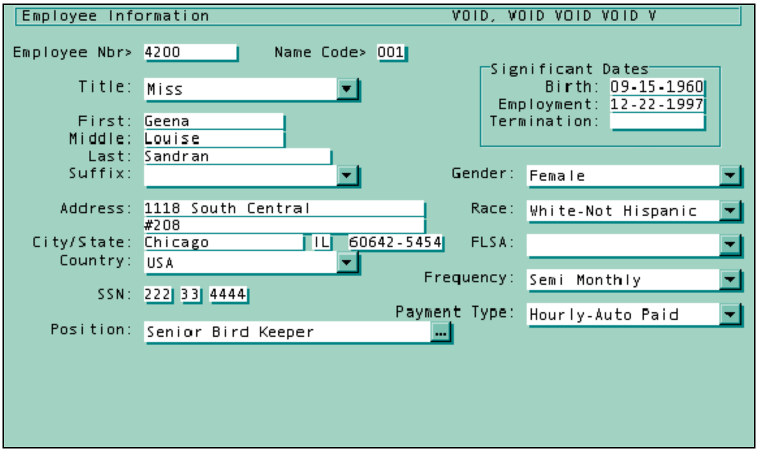
For practice, select 'Semi Monthly'.

22. Select the Payment Type

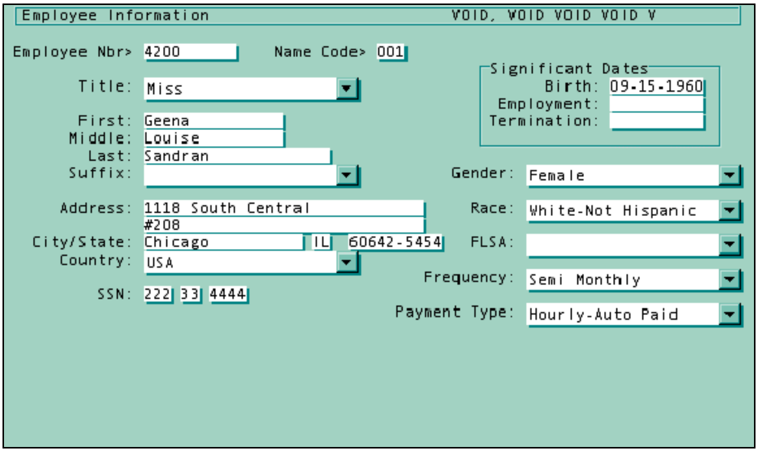
Select whether an employee is to be paid automatically or through time document entry. You may update this option list (PP40) to include all of the payment types needed by your organization.

For practice, select 'Hourly-Auto Paid'.

If you completed the Guided Practice and Position Administration is in use, the resulting form should look similar to the example that follows:



If you completed the Guided Practice and Position Administration is *not* in use, the resulting form should look similar to the example that follows:



23. Click Save or press Enter

If Position Administration is in use, the second panel of the Employee Information form (EF-SCR) is displayed. Continue the new hire process by completing steps 22 through 24.

If Position Administration is *not* in use, a second form is used to complete the new hire process. Continue the new hire process by completing steps 25 through 32.

For practice, click Save or press Enter.

Position Administration users only

24. Select the Status

Select the Incumbency Status. This is typically 'Acting' or 'Regular', depending on the position.

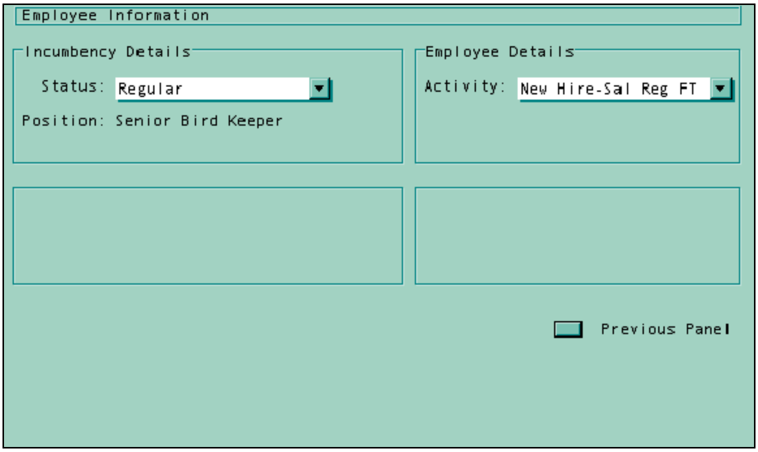
For practice, select 'Regular'.

25. Select the Activity

Select the appropriate new hire activity. You may update this option list (HR09) to include all of the activities needed by your organization.

For practice, select 'New Hire-Sal Reg FT' to hire the employee for salaried full-time.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



26. Click Save or press Enter

The first panel of the form is displayed and the employee information has now been set up. This is the last step of the new hire process.

For practice, click Save or press Enter.

Non-Position Administration users only

27. Access the Additional Employee/Payroll Information form (EG-SCR)

The Additional Employee/Payroll Information form (EG-SCR) is used to record supplemental payroll information for a new hire.

Access this form by making the following selection from the Navigator:

Component: Employee Resourcing
Process: Hire, Rehire, Reinstate an Employee
Task: Basic Employee Information 2

For practice, access the Additional Employee/Payroll Information form (EG-SCR) for employee 4200 in the 999999 organization.

28. Select the Normal Shift

Select the employee's normal shift. You may update this option list (PP43) to include all of the normal shifts needed by your organization.

For practice, select '1st Shift HED'.

29. Select Split Type

Select the split type that determines how time document earnings and automatic earnings are to be divided for labor distribution purposes. You may update this option list (PP44) to include all of the split types needed by your organization.

For practice, select 'Split Auto and TE'.

30. Select the Union

Select the union. You may update this option list (PP429) to include all of the unions needed by your organization.

For practice, leave this list box blank.

31. Enter the Workers Comp Code

Enter a user-defined Workers' Compensation Code. This entry identifies the worker's compensation policy for a job. This assignment can also be made on the Job Code Table form (TA-SCR) for all employees assigned to a job.

For practice, leave this text box blank.

32. Enter the Auto Pay Override

Auto Pay Override is used to stop payment to an automatically paid employee for a specified number of pay periods. The system decrements the number entered here each time the employee's pay frequency is paid.

'00' is the default entry for this text box. Automatic pay is not prevented when this value is displayed.

For practice, type '00' if the entry is not already present.

33. Enter the User Field (optional)

Enter user-defined values here.

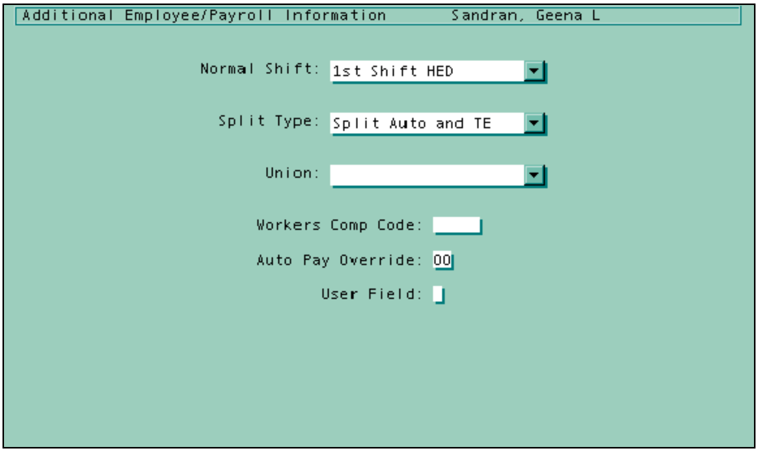
For practice, leave this text box blank.

34. Click Save or press Enter

The remaining employee new hire information has been recorded.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



See also:

- Methods for adding employees ***(on page 94)***

For the considerations when hiring new employees using the Employee Information form (EF-SCR).

Entering new hire activity details

To enter new hire activity details, follow these steps:

1. Access the New Hire form (01-SCR)

The New Hire form (01-SCR) is used to record the effective date of an employee's new hire activity.

Access this form by making the following selection from the Navigator:

Component: Employee Resourcing
Process: Hire, Rehire, Reinstate an Employee
Task: Record Status for New Hire

For practice, access the New Hire form (01-SCR) for employee 4200 in the 999999 organization.

2. Enter the Effective Date

Enter the date the employee's new hire is effective. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

Position Administration users, leave this text box as is because the Effective Date has already been entered on the Employee Information form (EF-SCR).

Non-Position Administration users, type '12-22-1997' (US and Canada) or '22-12-1997' (elsewhere).

3. Select the Activity

Select the major activity affecting the employee. You may update this option list (HR09) to include all of the activities needed by your organization.

Position Administration users, leave this list box as is because the Activity has already been entered on the Employee Information form (EF-SCR).

Non-Position Administration users, select 'New Hire-Hr Reg FT'.

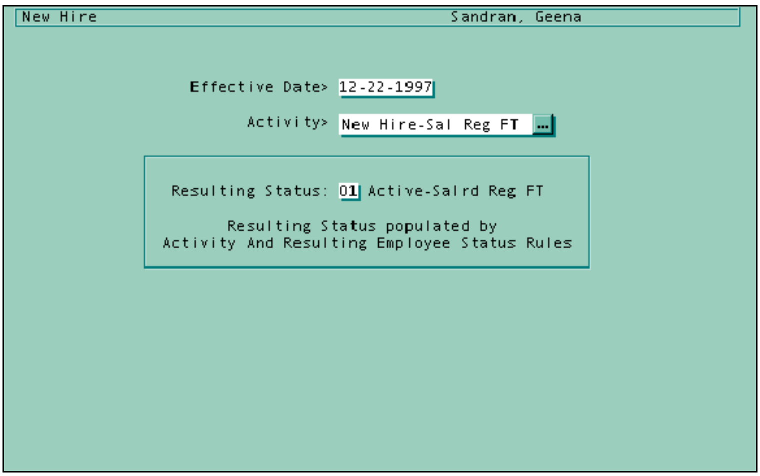
4. Click Save or press Enter

The system automatically generates the Resulting Status based on the Activity.

Position Administration users, do not click Save, because the Resulting Status has already been generated by the system.

Non-Position Administration users, click Save.

If you completed the Guided Practice in the previous tasks, the resulting form should look similar to the example that follows:



See also:

- Methods for adding employees ***(on page 94)***

For the considerations when using the New Hire form (01-SCR).

Adding/maintaining job assignment details

When using Position Administration, the system automatically assigns the position for the employee in the Job Code and Job Code Extent on the Job Assignment/Changes form (05-

SCR) when the employee is hired. If you are not using Position Administration, you must enter this form by following these steps:

1. Access the Job Assignment form (05-SCR)

The Job Assignment/Changes form (05-SCR) is used to record employee job assignments.

Access this form by making the following selection from the Navigator:

Component: Employee Resourcing
Process: Hire, Rehire, Reinstate an Employee
Task: Assign Job

For practice, access the Job Assignment/Changes form (05-SCR) for employee 0012 in the 999999 organization.

2. Enter the Effective Date

Enter the effective date of the job code/job code extent. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

Position Administration users, leave this text box as is.

Non-Position Administration users, type '01-08-1998' (US and Canada) or '08-01-1998' (elsewhere).

3. Select the Key Separator

Position Administration automatically assigns a Key Separator of 'Tenth Occurrence'. If you are not using Position Administration, select the key separator to ensure multiple entries of a segment on the same date will be sequenced properly on the employee's record. You may update this option list (HR70) to include all of the key separators needed by your organization.

Position Administration users, leave this list box as is.

Non-Position Administration users, select '1st Occurrence'.

4. Select the Type Of Change

Position Administration automatically assigns a Type of Change of 'Created by PM'. If you are not using Position Administration, select the reason the job assignment change is taking place. You may update this option list to include all of the change types needed by your organization.

Position Administration users, leave this list box as is.

Non-Position Administration users, select 'New Hire'.

5. Enter the Job Code/Extent

Position Administration automatically assigns the position you selected when the employee was hired into the active organization. A Job Code Extent of '9999' is also assigned. If you are not using Position Administration, enter the Job Code/Extent for the job to which you want to assign the employee.

Position Administration users, leave this text box as is.

Non-Position Administration users, type '10500' and '0001'.

6. Select the Union

Select the employee's union. You may update this option list (PP429) to include all of the unions needed by your organization.

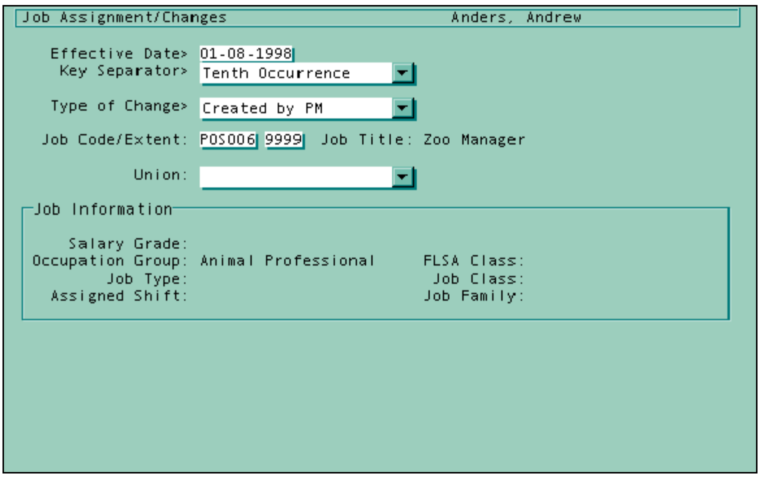
For practice, leave this list box blank.

7. Click Save or press Enter

The employee's job/position information is now set up. The Occupation Group for the job/position is automatically displayed.

For practice, click Save or press Enter.

If you completed the Guided Practice for Transferring an applicant to an employee organization, and Position Administration is in use, the applicant transfer populates this form and it should look similar to the example that follows:

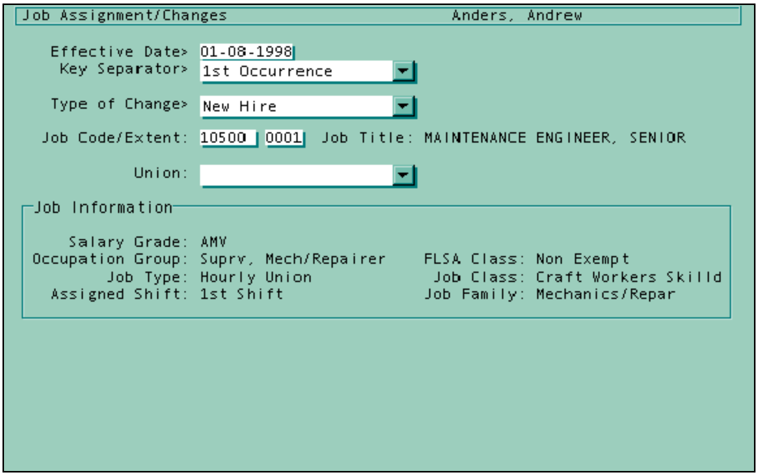


Job Assignment/Changes Anders, Andrew

Effective Date> 01-08-1998
Key Separator> Tenth Occurrence
Type of Change> Created by PM
Job Code/Extent: POS006 9999 Job Title: Zoo Manager
Union:

Job Information
Salary Grade:
Occupation Group: Animal Professional FLSA Class:
Job Type: Job Class:
Assigned Shift: Job Family:

If you completed the Guided Practice and Position Administration is *not* in use, the resulting form should look similar to the example that follows:



Note: *You may access the Job Assignment Inquiry form (06-SCR) to view the results of the entry recorded on the Job Assignment/Changes form (05-SCR).*

See also:

- Methods for adding employees ***(on page 94)***

For the considerations when using the Job Assignment/Changes form.

Assigning/changing location

An employee's location information is assigned using the Location Assignment/Changes form (05CSCR). However, if you are using Position Administration, entry of this form may be unnecessary because employee location is tracked by Organization Units, not organization levels. If you want to assign an employee's location here, for such things as mail distribution location, follow these steps:

1. Access the Location Assignment/Changes form (05CSCR)

The Location Assignment/Changes form (05CSCR) is used to record location change data due to a change in an employee's job or assigned location.

Access this form by making the following selection from the Navigator:

Component: Employee Resourcing
Process: Maintain Employee Details
Task: Location Change

For practice, access the Location Assignment/Changes form (05CSCR) for employee 0012 in the 999999 organization.

2. Enter the Effective Date

Enter the effective date of the location change. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '01-08-1998' (US and Canada) or '08-01-1998' (elsewhere).

3. Select the Key Separator

Select the key separator to ensure multiple entries of a segment on the same date will be sequenced properly on the employee's record. You may update this option list (HR70) to include all of the key separators needed by your organization.

For practice, select '1st Occurrence'.

4. Select the Type Of Change

Select the location assignment change. You may update this option list to include all of the change types needed by your organization.

For practice, select 'Trfr from Applic'.

5. Select the EEO Establishment

Select the EEO establishment number assigned to the location where the employee will work. You may update this option list to include all of the EEO establishments needed by your organization.

For practice, select 'Chicago Facility'.

6. Select the Geographic Range

Select the area of the country in which the employee is being placed. You may update this option list (HR66) to include all of the geographic ranges needed by your organization.

For practice, select 'All Locations'.

7. Enter the Mail Distribution

Enter the internal mail station or distribution data that is used in producing internal mailing labels.

For practice, type 'FL 9 North' to indicate the mail stop on the 9th floor at the north side of the office.

8. Select the OSHA Establishment

Select the number assigned to the OSHA Establishment to which the employee usually reports. You may update this option list (HS52) to include all of the OSHA Establishments needed by your organization.

For practice, leave this entry blank or select 'None'.

9. Select the OL 3

Select the organization level 3 value assigned this employee. You may update this option list (HR439) to include all of the organization level 3 values needed by your organization.

For practice, leave this list box blank.

10. Select the OL 4

Select the organization level 4 value assigned this employee. You may update this option list (HR449) to include all of the organization level 4 values needed by your organization.

For practice, leave this list box blank.

11. Select the OL 5

Select the organization level 5 value assigned this employee. You may update this option list (HR459) to include all of the organization level 5 values needed by your organization.

For practice, leave this list box blank.

12. Select the OL 6

Select the organization level 6 value assigned this employee. You may update this option list (HR469) to include all of the organization level 6 values needed by your organization.

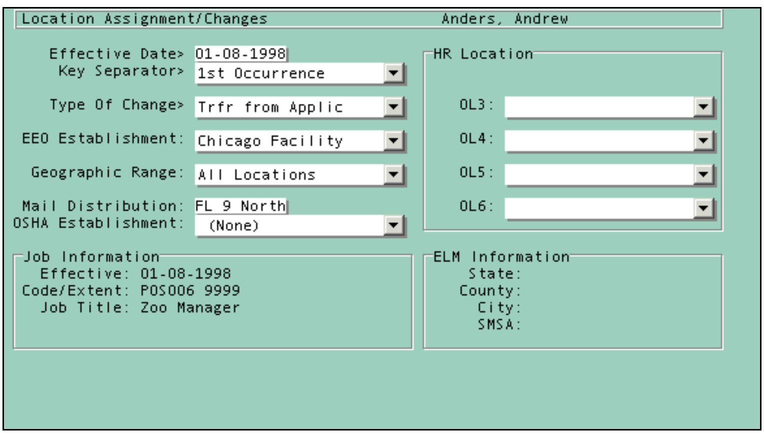
For practice, leave this list box blank.

13. Click Save or press Enter

The Location Assignment/Changes form (05CSCR) is now recorded. Job, position, and ELM (External Labor Market) information is automatically displayed.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



Location Assignment/Changes Anders, Andrew

Effective Date> 01-08-1998
Key Separator> 1st Occurrence
Type Of Change> Trfr from Applic
EEO Establishment: Chicago Facility
Geographic Range: All Locations
Mail Distribution: FL 9 North
OSHA Establishment: (None)

HR Location
OL3:
OL4:
OL5:
OL6:

Job Information
Effective: 01-08-1998

SMSA:

See also:

- Methods for adding employees ***(on page 94)***

For the considerations when using the Location Assignment/Changes form (05CSCR).

Assigning/changing salary

To assign or change an employee salary, follow these steps:

1. Access the Salary Assignment/Changes form (40-SCR)

The Salary Assignment/Changes form (40-SCR) is used to record authorized salaries, hourly rates, and changes to any of those amounts. You may also view an employee's salary history.

Access this form by making the following selection from the Navigator:

Component:	Employee Resourcing
Process:	Maintain Basic Employee Details
Task:	Salary Change

For practice, access the Salary Assignment/Changes form (40-SCR) for employee 0012 in the 999999 organization.

2. Select the Incumbency (Position Administration users only)

Select the position incumbency for this salary entry.

For practice, select '1st Incumbency'.

3. Enter the Effective Date

Enter the effective date of the salary change. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '01-08-1998' (US and Canada) or '08-01-1998' (elsewhere).

4. Select the Key Separator

Select the key separator to distinguish between two salary changes made on the same date. You may update this option list (HR70) to include all of the key separators needed by your organization.

For practice, select '1st Occurrence'.

5. Select the Type Of Change

Select the reason for a salary change. You may update this option list to include all of the change types needed by your organization.

For practice, select 'New Hire'.

6. Select the Frequency (optional)

Select the employee's pay frequency. You may update this option list (PP29) to include all of the pay frequencies needed by your organization.

If you do not enter data in this list box, the system uses the value in the Frequency list box on the Employee Information form (EF-SCR).

If you select an option in the list box, the system compares it to the value in the Frequency list box on the Employee Information form (EF-SCR). If the values are different, the system displays a warning message. If you accept the warning, the salary calculation will no longer equate to the Payroll frequency.

For practice, select 'Weekly'.

7. Select the Override (optional)

Select one of these override options, if applicable:

- History—No PR Update: Used to enter salary history records that have no direct effect on the Payroll system.
- Not 1st Change For Date—Used to process multiple salary changes on the same date with a Key Separator list box entry of '2nd Occurrence' or higher.
- Override Calculation—Used to calculate a salary change manually. This option requires that you enter all the text boxes on this form. The form records exactly what you entered.

For practice, leave this list box blank.

8. Enter the Hours Per Period (optional)

Enter the normal hours in the employee's pay period. This is a five-digit text box with two decimal places.

If you do not enter data in this text box, the system uses the value in the Normal Hours text box in the Employee Pay Rate Or Salary form (H1-SCR).

If you type an entry in this text box, the system uses it to calculate the pay assignment.

For practice, type '40.00'.

9. Enter the Hourly Rate

Enter the employee's hourly rate of pay. This is a seven-digit text box with four decimal places. You only need to enter information in one calculation text box (Hourly Rate, Salary Per Period, or Annual Salary); the system calculates the results in the remaining text boxes based on your single entry.

For practice, leave this text box blank.

10. Enter the Salary Per Period

Enter the amount of the employee's salary per pay period. This is an eight-digit text box with two decimal places. You only need to enter information in one calculation text box (Hourly Rate, Salary Per Period, or Annual Salary); the system calculates the results in the remaining text boxes based on your single entry.

For practice, leave this text box blank.

11. Enter the Annual Salary

Enter the amount of the employee's annual salary. This is a nine-digit text box with two decimal places. You only need to enter information in one calculation text box (Hourly Rate, Salary Per Period, or Annual Salary); the system calculates the results in the remaining text boxes based on your single entry.

For practice, type '65000.00'.

12. Enter the Amount Change

Enter the amount the salary has changed. This is an eight-digit text box with two decimal places. For an initial salary assignment, the system calculates this text box based on your single entry in one of the salary amount text boxes.

For practice, leave this text box blank.

13. Enter the Percent Change

Enter the percentage change in salary amount. This is a five-digit text box with two decimal places. For an initial salary assignment, the system calculates this text box based on your single entry in one of the salary amount text boxes.

For practice, leave this text box blank.

14. Enter the Months Since Prior (optional)

Enter the number of months between the employee's prior and current salary effective dates. If you make no entry in this text box, the system fills the text box with zeros for the initial calculation. Thereafter, this text box is calculated based on the most recent salary change.

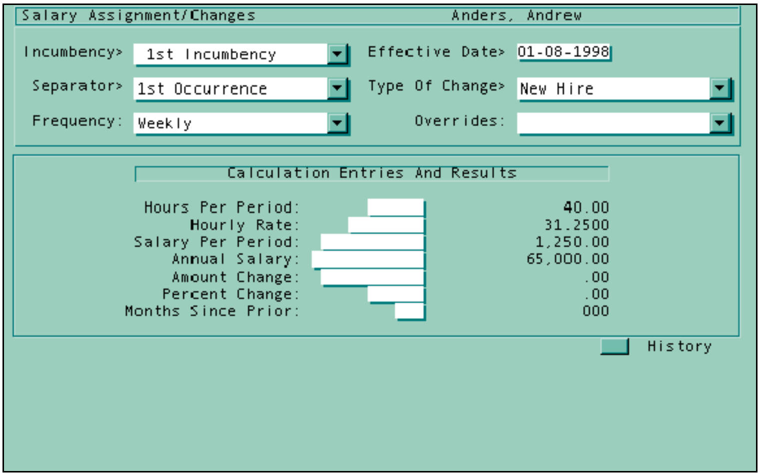
For practice, leave this text box blank.

15. Click Save or press Enter

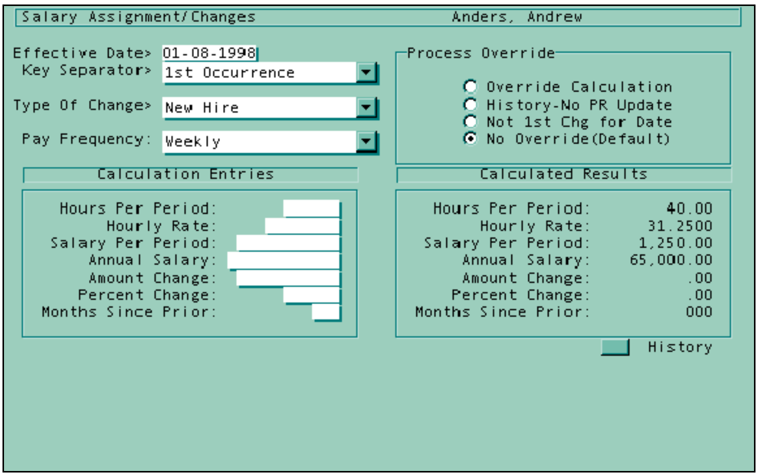
The employee salary has been set up. The entries made in one or more of the amount text boxes are used to calculate the remaining amounts. For example, if you entered an annual salary for the employee, the system calculates the hourly rate, salary per period, amount change, and percent change.

For practice, click Save or press Enter.

If you completed the Guided Practice and Position Administration is in use, the resulting form (after the calculation) should look similar to the example that follows:



If you completed the Guided Practice and Position Administration is *not* in use, the resulting form (after the calculation) should look similar to the example that follows:



See also:

- Methods for adding employees ***(on page 94)***

For the considerations when using the Salary Assignment/Changes form (40-SCR).

Recording contact information

To record contact information, follow these steps:

1. Access the Employee Contact Information form (EM-SCR)

The Employee Contact Information form (EM-SCR) is used to record electronic mail (email) address, cellular telephone number, or other employee contact information. Multiple types of employee contact information can be recorded, including (but not limited to): email address, fax number, cellular phone, car phone, pager number.

Note: *The email address recorded on this form is used by the Communication Events feature of the system.*

☞ *Refer to the Optimizing System Features documentation for more information about Communication Events.*

Access this form by making the following selection from the Navigator:

Component:	Employee Resourcing
Process:	Maintain Basic Employee Details
Task:	Employee Contact Information

For practice, access the Employee Contact Information form (EM-SCR) for employee 0012 in the 999999 organization.

2. Select the Contact Type

Select the type of contact such as email, fax, cell phone, and so forth. You may update this option list (HR71) to include all of the contact types needed by your organization.

For practice, select 'Cell Phone Number'.

3. Enter the Contact Effective

Enter the date this employee contact information is effective. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '01-08-1998' (US and Canada) or '08-01-1998' (elsewhere).

4. Enter the Contact Expired

Enter the date this employee contact information will no longer be valid. This text box can be entered later if the date is not currently known. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, leave this text box blank.

5. Select the Contact Sequence

Select the contact sequence number for this contact information. This tells the viewer in what order this contact information should be used. For example, which address should be used first, second, and so forth.

For practice, select '1'.

6. Click the Confidential check box

Click this check box to indicate if the contact information can be used to send confidential information to the employee.

For practice, do not click this check box.

7. Click the Unlisted check box

Click this check box to indicate if the contact information may be made available to others without the employee's permission.

For practice, click on 'Unlisted'.

8. Enter the Contact Information (optional)

Enter any additional details about the contact information in this 50-character text box.

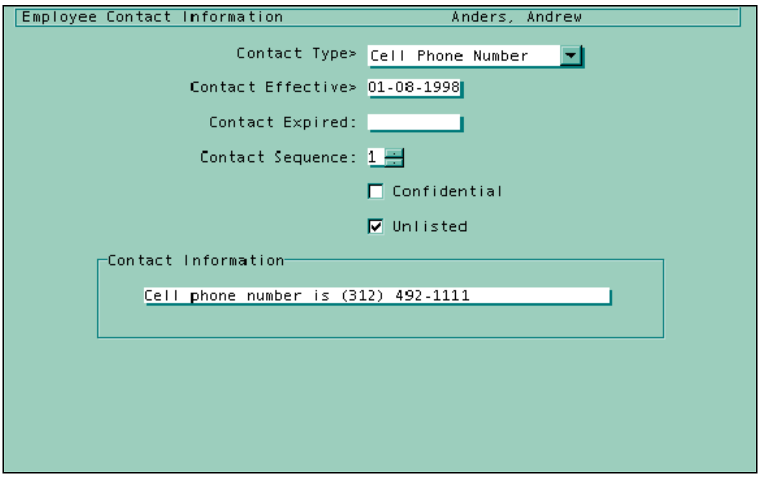
For practice, type 'Cell phone number is (312) 492-1111'.

9. Click Save or press Enter

The Employee Contact information form (EM-SCR) is now recorded.

For practice, click Save or press Enter.

If you competed the Guided Practice, the resulting form should look similar to the example that follows:



See also:

- Optional employee data ***(on page 102)***

For a description of the Employee Contact form (EM-SCR).

Recording personal and ID information

To record personal and ID information, follow these steps:

1. Access the Additional Personal And ID Information form (02-SCR)

The Additional Personal And ID Information form (02-SCR) is used to continue the employee New Hire process, to add optional information, and to change basic employee data on an employee's record.

Note: *If you have already transferred an applicant using the Applicant Transfer form (ET-SCR), some steps described here will be unnecessary, as many text boxes are automatically populated from the applicant record. Skip any steps that have already been completed.*

Access this form by making the following selection from the Navigator:

Component: Employee Resourcing
Process: Maintain Employee Details
Task: Personal Information

For practice, access the Additional Personal and ID Information form (02-SCR) for employee 0012 in the 999999 organization.

2. Enter the Effective Date

Enter the effective date of the form's information. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '01-08-1998' (US and Canada) or '08-01-1998' (elsewhere).

3. Select the Marital Status

Select the employee's current marital status. You may update this option list (HR04) to include all of the marital status types needed by your organization.

For practice, select 'Divorced'.

4. Select Dependents

Select the number of employee dependents.

For practice, select '2'.

5. Enter the Prior Name

Enter the employee's prior surname if employee volunteers information.

For practice, leave this text box blank.

6. Select the Citizenship

Select the country where the employee holds citizenship. You may update this option list (HR05) to include all of the citizenship types needed by your organization.

For practice, select 'USA'.

7. Select the Military Status

Select the employee's military status. You may update this option list (HR07) to include all of the military status types needed by your organization.

For practice, select 'Inactive Reserve'.

8. Enter Military Separation date

Enter the date upon which the employee was discharged or released from active duty. If this date falls between the VETS-100 reporting run dates, the employee is considered a 'Newly Separated Veteran'.

For practice, type '??-??-????'

9. Select the Visa

Select the visa type that a non-citizen employee has been granted. You may update this option list (HR06) to include all of the visa types needed by your organization.

For practice, leave this list box blank.

10. Enter Expires On

Enter the expiration date of the employee's current visa. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, leave this text box blank.

11. Select the Security Clearance

If applicable, select the level of security granted to this employee. You may update this option list (HR08) to include all of the security clearances needed by your organization.

For practice, select 'Confidential'.

12. Enter the Agency

Enter the agency used to establish the employee's level of security clearance, if applicable. You are required to make an entry here only when you have made an entry in the security clearance text box.

For practice, type 'Federal Gov't'.

13. Select the Verification

Select the identification procedure status that denotes whether or not the procedure has started and if identification could be produced. You may update this option list (HR50) to include all of the ID/Work Authorization types needed by your organization.

For practice, select 'Documents Verified'.

14. Select the ID Provided

Select the type of identification document produced. You may update this option list (HR47)to include all of the identification types needed by your organization. When two documents have been submitted for identification, subsequent entries in the employment and identity list boxes are required to identify the two separate documents.

For practice, select 'Prov'd 2 Documents'.

15. Select Identity

Select the type of document produced to prove the identity of the employee. You may update this option list (HR49) to include all of the identity documents needed by your organization.

For practice, select 'Drivers License'.

16. Select Employment

Select the type of document produced to prove that the employee has employment authorization. You may update this option list (HR48) to include all of the employment documents needed by your organization.

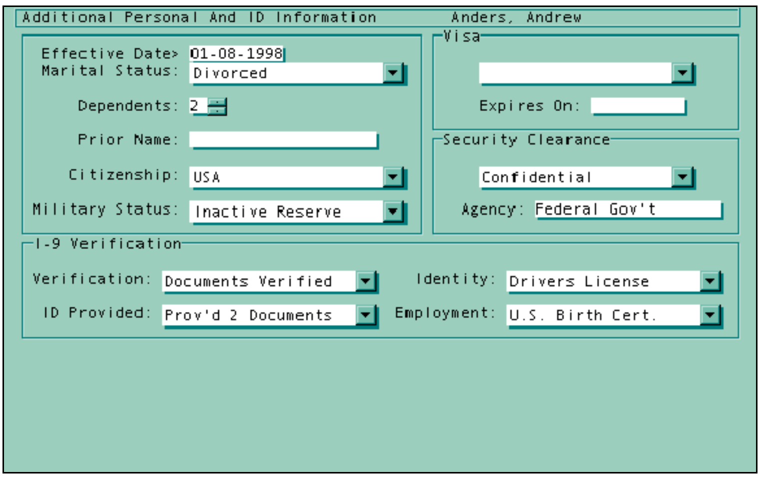
For practice, select 'U.S. Birth Cert'.

17. Click Save or press Enter

The personal and ID information is now recorded.

For practice, click Save or press Enter.

If you have completed the Guided Practice, the resulting form should look similar to the example that follows:



See also:

- Optional Employee Data ***(on page 102)***

For a description of the Additional Personal And ID Information form (02-SCR).

Recording employee telephone numbers

To record telephone numbers, follow these steps:

1. Access the Phone Numbers And Employment Information form (03-SCR)

The Phone Numbers And Employment Information form (03-SCR) is used to continue the New Hire process. This form allows you to add or change basic data on an employee record.

Note: If you have already transferred an applicant using the Applicant Transfer form (ET-SCR), some steps described here will be unnecessary, as many text boxes are automatically populated for you from the applicant record. Skip any steps that have already been completed.

Access this form by making the following selection from the Navigator:

Component: Employee Resourcing
Process: Maintain Basic Employee Details
Task: Telephone/Previous Applicant Info

For practice, access the Phone Numbers And Employment Information form (03-SCR) for employee 0012 in the 999999 organization.

2. Enter the Effective Date

Enter the effective date of the form information. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '01-08-1998' (US and Canada) or '08-01-1998' (elsewhere).

3. Enter the Applicant Number

If you use the Applicant Tracking component and transferred this employee from the applicant organization, the applicant's number is displayed here.

For practice, leave this text box as is.

4. Select the Employee Source

Select the source of hire for this employee. You may update this option list (HR21) to include all of the sources needed by your organization.

For practice, leave this list box as is.

5. Enter the Agency Fee

Enter the finding fee paid to an outside employment agency or to an employee for referring an employee. This entry must be to the nearest whole amount.

For practice, type '1500'.

6. Enter the Relocation Expense

Enter the amount of all relocation expenses paid to the employee. This entry must be to the nearest whole amount.

Note: The Employee Relations component allows the detailed entry of relocation-related costs.

☞ *Refer to* **Tracking Employee Relocation Expenses** *(on page 369) for details.*

For practice, leave this text box blank.

7. Enter Home

Enter the employee's home telephone number, including area code.

For practice, leave this text box as is.

8. Enter Work

Enter the employee's work telephone number, including area code.

For practice, leave this text box blank.

9. Enter the Ext

Enter the work telephone extension, if applicable.

For practice, leave this text box as is.

10. Select the Language

Select the employee's native language. You may update this option list (PP54) to include all of the languages needed by your organization.

For practice, select 'English'.

11. Select the Religion

Select the employee's religious preference. You may update this option list (HR35) to include all of the religious preferences needed by your organization.

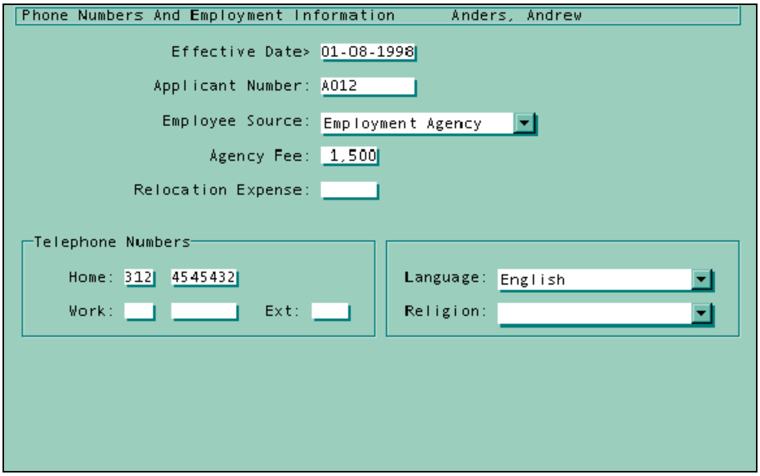
For practice, select 'None'.

12. Click Save or press Enter

The phone numbers and other employment information are now recorded.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



See also:

- Optional employee data ***(on page 102)***

For a description of the Phone Numbers And Employment Information form (03-SCR).

Recording spouse/dependent information

To record spouse/dependent information, follow these steps:

1. Access the Spouse/Dependent Information form (10-SCR)

The Spouse/Dependent Information form (10-SCR) is used to record information concerning an employee's spouse and dependents. This information can be especially useful for verifying benefit coverage eligibility or coordinating benefits and is used by Benefits Administration.

Access this form by making the following selection from the Navigator:

Component: Employee Resourcing
Process: Maintain Employee Details
Task: Dependent Information

For practice, access the Spouse/Dependent Information form (10-SCR) for employee 0012 in the 999999 organization.

2. Enter the Dependent ID

Type the identification number for the employee's dependent. The number of spouse and dependent records should equal at least the number of dependents entered on the Additional Personal And ID Information form (02-SCR). These numbers will vary only if the number of dependents living with the employee, and entered on the Additional Personal And ID form (02-SCR), is also entered on this form as children covered by legal decree for insurance purposes but who may not be living at home.

Each spouse and dependent record is identified by a unique three-position Dependent ID. Establish a numbering scheme for this text box value that allows you to easily identify which type of record (spouse or dependent) you are viewing.

For practice, type '001'.

3. Enter the Name

Type the name of the employee's spouse or dependent, using the format: last name, [space] first name.

For practice, type 'Anders, Emily'.

4. Select the Relationship

Select an option to indicate the relationship of the spouse or dependent to the employee. You may update this option list (HR23) to include all of the relationships needed by your organization.

For practice, select 'Daughter'.

5. Select the Student Status

Select a value from this option list (HR30) to indicate whether or not the spouse or dependent named in this form is a student and what level of school participation is involved.

For practice, select 'Full Time Student'.

6. Enter the Birth Date

Type the date of birth for the spouse or dependent listed on this form. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '09-10-1992' (US and Canada) or '10-09-1992' (elsewhere).

7. Enter the Social Security Nbr

Type the social security number of the spouse or dependent listed on this form.

For practice, type '444221111'.

8. Enter the Telephone Number

Type the telephone number of the spouse or dependent listed on this form.

For practice, type '3124545432'.

9. Enter the Insurance Carrier

Type the insurance carrier for the spouse or dependent listed on this form.

For practice, type 'CIGNA'.

10. Enter the Employer Name

Type the name of the employer of the spouse or dependent listed on this form.

For practice, leave this text box blank.

11. Enter the Address

Type the street address for the employer of the spouse or dependent listed on this form.

For practice, leave this text box blank.

12. Enter the City/State

Type the city/state portion of the address of the employer of the spouse or dependent listed on this form.

For practice, leave this text box blank.

13. Enter the ZIP Code

Type the postal code of the employer of the spouse or dependent listed on this form.

For practice, leave this text box blank.

14. Select the Sex

Select the appropriate gender classification of the spouse or dependent.

For practice, select 'Female'.

15. Click the Alternate Taxpayer ID command box (optional)

Click 'Alternate Taxpayer ID' to record alternate tax identification data for a employee's spouse or dependent. This form is identical to the Spouse/Dependent Information form (10-SCR), with the exception of the Social Security Number text box described here. This text box is renamed as Taxpayer ID. The Taxpayer ID number is also the Social Security Number of the spouse or dependent being listed. The text box accepts up to 12 characters (as opposed to nine for Social Security Number).

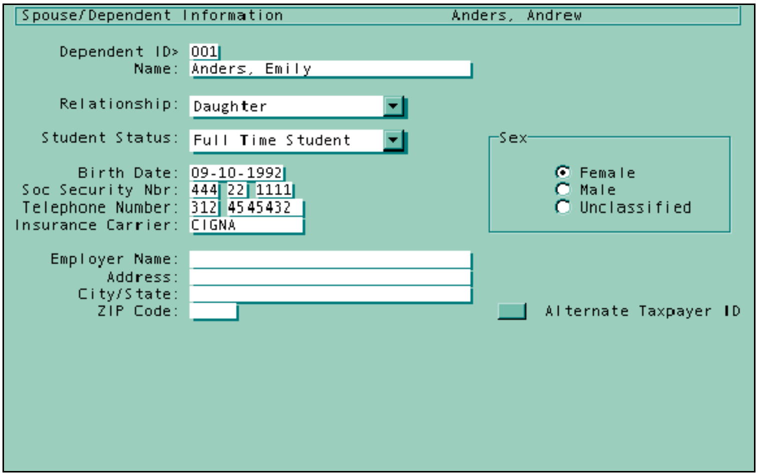
For practice, do not click this command box.

16. Click Save or press Enter

The spouse and dependent information is now recorded for the employee.

For practice, click Save or press Enter.

If you competed the Guided Practice, the resulting form should look similar to the example that follows:



See also:

- Optional employee data ***(on page 102)***

For a description of the Spouse/Dependent form (10-SCR).

Rehiring, reinstating, or recalling an employee

To rehire, reinstate, or recall an employee, follow these steps:

1. Access the Rehire/Reinstatement/Recall form (04-SCR)

The Rehire/Reinstatement/Recall form (04-SCR) is used to record an employee reinstatement, rehire, or recall to work. For this form to be processed, a separation, termination, or major activity (such as return from labor dispute) must have been recorded for the employee on the Separations And Terminations form (96-SCR) or Status Changes form (08-SCR).

Access this form by making the following selection from the Navigator:

Component: Employee Resourcing
Process: Hire, Rehire, Reinstate an Employee
Task: Rehire/Reinstatement

For practice, access the Rehire/Reinstatement/Recall form (04-SCR) for employee 1975 in the 999999 organization.

2. Enter the Effective Date

Enter the date the employee's rehire, recall to work, or reinstatement is effective. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '01-15-1998' (US and Canada) or '15-01-1998' (elsewhere).

3. Select the Activity

Select the description of the rehire, reinstatement, or recall activities. You may update this option list (HR09) to include all of the activities needed by your organization.

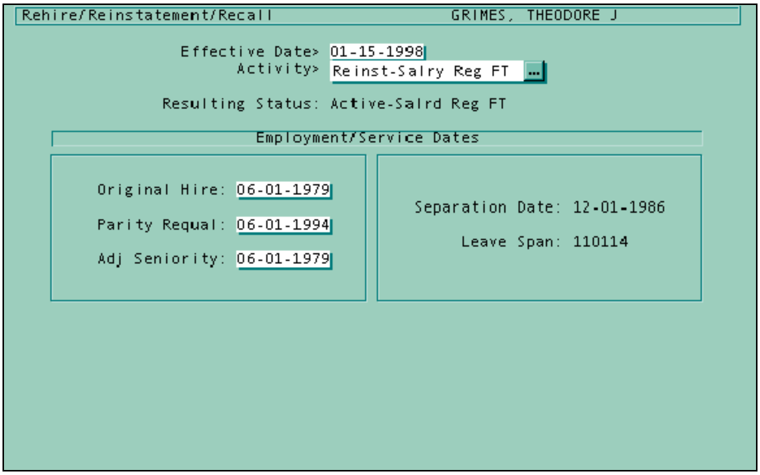
For practice, select 'Reinst-Salry Reg FT' to rehire this employee to a salaried full time status.

4. Click Save or press Enter

The Rehire/Reinstatement/Recall information form (04-SCR) is now recorded and the Original Hire, Parity Requal, and Adj Seniority dates are automatically populated by the system.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



Note: *Remember to access the Employee Information form (EF-SCR) and delete the Termination date and change or update the Employment date.*

See also:

- Methods for adding employees ***(on page 94)***

For a description of how rehiring, reinstating, and recalling employees is accomplished.

Transferring an employee to another organization

To transfer an employee to another organization, follow these steps:

1. Access the Employee Transfer form (ET-SCR)

The Employee Transfer form (ET-SCR) is used to transfer Employee Database records from one organization to another. This form can not be processed in a batch run. It must be entered online. The transfer is made in 'real-time' so you can immediately modify or add data.

Access this form by making the following selection from the Navigator:

Component: Employee Resourcing
Process: Hire, Rehire, Reinstate an Employee
Task: Transfer Emp to New Organization

For practice, access the Employee Transfer form (ET-SCR) for employee 2001 in the 999999 organization.

2. Enter the New Employee Number

If you want the employee to have a different employee number in the new organization, enter it here. Otherwise, enter the employee's current number here.

For practice, type '2001' to keep the same employee number in the new organization.

3. Enter the New Control 1-2

Enter the employee's new organization designation.

Note: *The system may display error messages if the new organization does not have taxes set up.*

For practice, type '991111'.

4. Enter the Transfer Date

Enter the effective date of the transfer. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '01-15-1998' (US and Canada) or '15-01-1998' (elsewhere).

5. Select the Payroll Data

Select one of the payroll data/amount options described in this chart. Information is to move to the new organization, stay with the old organization, or reside on Employee Database records in both organizations.

Data	Amounts	Description
Old/New C1-2s	Old Control 1-2	Payroll data resides on the old and new organizations. Amounts reside on the old organization only.
New Control 1-2	New Control 1-2	Payroll data and amounts reside on the new organization only.
Old/New C1-2s	Old/New C1-2s	Payroll data and amounts reside on the old and new organizations.
Old/New C1-2s YTD Wage	Old Control 1-2 Old/New C1-2s	Payroll data resides on the old and new organizations. Amounts reside on the old organization. YTD wages also reside on the new organization.

For practice, select 'Data Amounts YTD Wage' (last option).

6. Select the Basic HR Data

Select the basic human resource data that designates whether information is to move to the new organization, stay with the old organization, or reside on the Employee Database records in both organizations.

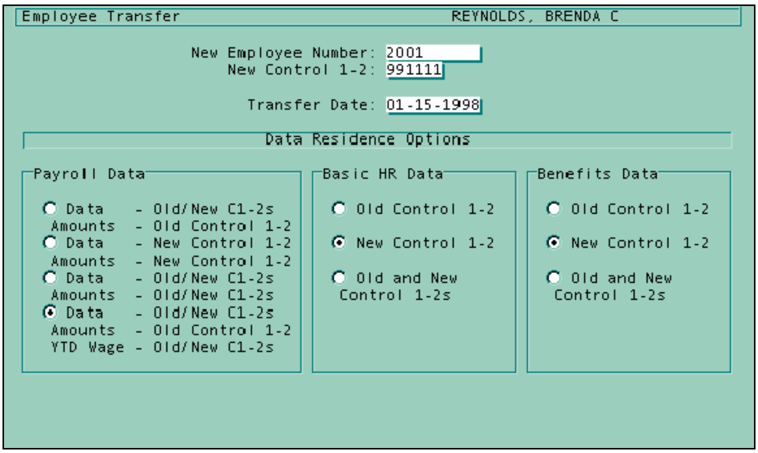
For practice, select 'New Control 1-2' (second option).

7. Select the Benefits Data

Select the benefits data that designates whether information is to move to the new organization, stay with the old organization, or reside on Employee Database records in both organizations.

For practice, select 'New Control 1-2' (second option).

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



8. Click Save or press Enter

The employee transfer information is now recorded. A 'Transfer successfully completed' message is displayed.

For practice, click Save or press Enter.

See also:

- Methods for adding employees ***(on page 94)***

For the considerations when transferring employees within the organization.

Verifying employee information

To verify employee information, follow this step:

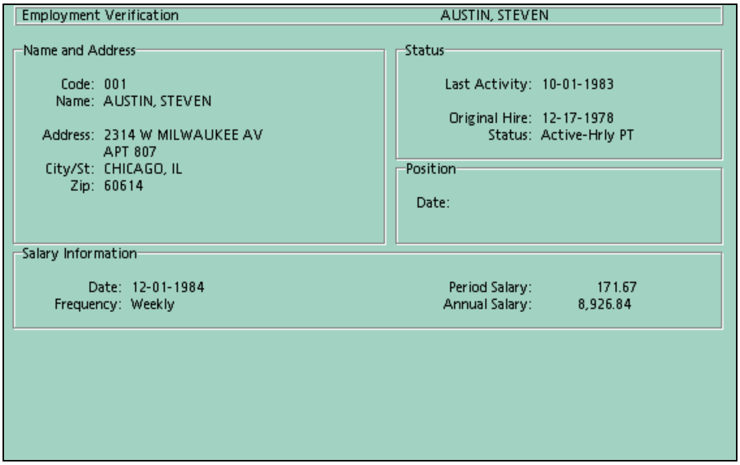
Access the Employment Verification form (EMVSCR)

Access this form by making the following selection from the Navigator:

Component: Employee Resourcing
Process: Maintain Basic Employee Details
Task: Employment Verification

For practice, access the Employment Verification form (EMVSCR) for employee 1234 in the '999999' organization.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



See also:

- Methods for adding employees ***(on page 94)***

For information about the reports related to the data on this form.

Recording employee, job, and institution information

The IPEDS Employee Tenure and Academic Rank form (O5ESCR) is used to record the employee, job, and institution information required by the EEO-6 Report for Higher Education Institutions (7E-RPT). Information entered on this form is completed for each employee and maintained during employment. This information is not available on any other Human Resources Administration segments. This form can be completed as part of the new hire process.

Complete this task be performing the following steps:

1. Access the IPEDS Employee Tenure and Academic Rank form (O5ESCR)

Access this form by making the following selection from the Navigator:

Component: Employee Resourcing
Process: Maintain Additional Employee Details
Task: IPEDS/Employee Tenure/Rank

For practice, access the IPEDS Employee Tenure and Academic Rank form (05ESCR) for Steven Austin, employee 1234.

2. Enter the effective date

This is the date on which the employee's EEO-6 pertinent data was recorded. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '01-01-1999'.

3. Select the Rank/Tenure

This value defines the employee as having rank or tenure.

For practice, select 'No Rank/Tenure'.

4. Select the On Track Tenure

This option defines whether an employee who does not have tenure is in a job or position which will lead to tenure.

For practice, leave this field blank.

5. Select the length of contract

This option defines which contract length category the employee's contract falls.

For practice, select 'No Contract'.

6. Select the soft money option

This option defines whether the monies paid to the employee are from soft money sources (not from the general fund).

For practice, leave this field blank.

7. Select the FICE ID

This is the FICE (Federal Interagency Committee of Education) Code for the Campus to which the employee is assigned.

This FICE Code is an unstructured number unique for each organization.

For practice, leave this field blank.

8. Select the Main Campus

This is the Main Campus FICE Code for when an institution is multi-campus. The FICE Code (Federal Interagency Committee of Education) is an unstructured number unique for each organization.

In those institutions consisting of a main campus and one or more branch campuses, this is the location of the core, primary, or most comprehensive program.

If there is only one location for the institution, this field will be blank.

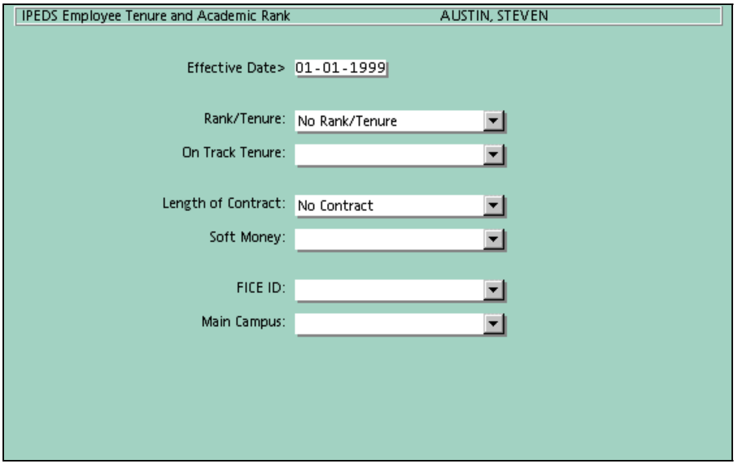
For practice, leave this field blank.

9. Click Save or press Enter

The information is saved.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



See also:

■ Required employee data ***(on page 89)***

For information about the reports related to the data on this form.

Recording demographic data for EEO and Affirmative Action (optional)

Use the EEO/AAP Demographic Data form (TY-SCR) to record demographic data for EEO and Affirmative Action analysis. Data entered on this form includes the total persons in each occupation group and the percentage distribution by race, by demographic region, as defined by you. The demographic area can be defined as region, state, SMSA, city, or county, depending in your reporting requirements. This is an optional form.

To record employee information, follow these steps:

1. Access the EEO/AAP Demographic Data form (TY-SCR)

Access this form by making the following selection from the Navigator:

Component: HR Setup
Process: Setup EEO Rules
Task: EEO/AAP Demographic Data

For practice, access the EEO/AAP Demographic Data form (TY-SCR) for the 999999 organization.

2. Select the level of demographic data

Select a Level of demographic data from the option list (EO02). This value determines what type of data is resident in the remainder of the form fields.

For practice, select 'State'.

3. Select the state in which to record the data

If you are entering state demographic data, select the state from the option list (EO01).

For practice, select 'Louisiana'.

4. Enter the CSS Code

Enter the CSS Code if you are recording SMSA (Standard Metropolitan Statistical Area) data.

For practice, leave this field blank.

5. Select the Occupation Group Level

Select an Occupation Group Level from the option list (EO13). This value determines if the data is based on an EEO, Occupation Group, or user-defined grouping.

For practice, select 'User Defined'.

6. Select the Occupation Group

Select an Occupation Group from the big option list (EO08).

For practice, select 'Accountnts & Auditrs' from the big option list.

7. Enter the Total Force

Type the total number of persons in the work force for the demographic level specified on this table.

This total is used with the individual ELM 4 percentages to determine the numbers of males and females by race for EEO/AAP analysis purposes.

For practice, type '2,500'.

8. Enter the Male percentages

Type the percentages in the Male Percentages text boxes. Enter the values using two decimal places. For example, enter 43 percent as 04300.

The values entered for each demographic must equal the percentage in the Total text box.

For practice, type the following values:
Total: 58%
Native American: 5%
Asian: 13%
Black: 10%
Hispanic: 12%
White: 18%

9. Enter the Female percentages

Type the percentages in the Female Percentages text boxes. Enter the values using two decimal places. For example, enter 43 percent as 04300.

The values entered for each demographic must equal the percentage in the Total text box.

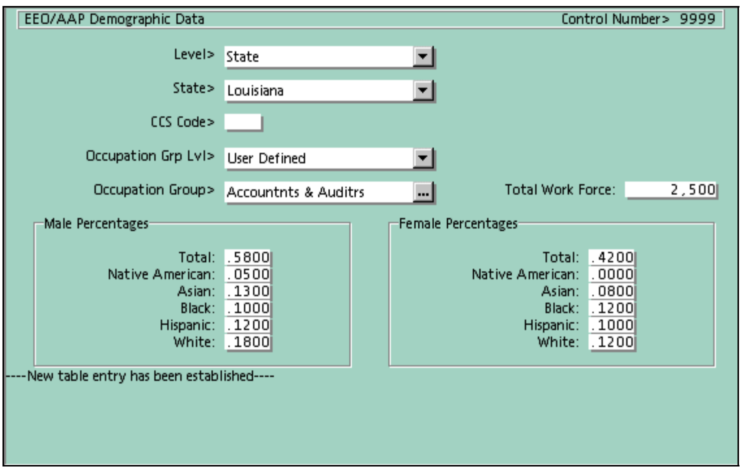
For practice, type the following values:
Total: 42%
Native American: 0%
Asian: 8%
Black: 12%
Hispanic: 10%
White: 12%

10. Click Save or press Enter

The message '---New table entry has been established—' confirms the changes.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



EEO/AAP Demographic Data   Control Number> 9999

Level> State
State> Louisiana
CCS Code>
Occupation Grp Lvl> User Defined
Occupation Group> Accountnts & Auditrs
Total Work Force: 2,500

Male Percentages
Total: .5800
Native American: .0500
Asian: .1300
Black: .1000
Hispanic: .1200
White: .1800

Female Percentages
Total: .4200
Native American: .0000
Asian: .0800
Black: .1200
Hispanic: .1000
White: .1200

----New table entry has been established----

For information about the reports related to the data on this form.

Entering EEO-4 reporting information

The EEO-4 Reporting Information form (EO4SCR) provides additional data for the EEO-4 Report- State and Local Government Information report (74-RPT). This form displays the function to which the employee belongs, including the effective date. When an employee changes function, create a new form with the new effective date. This form can be added to the new hire process.

To enter report information, follow these steps:

1. Access the EEO-4 Reporting Information form (EO4SCR)

Access this form by making the following selection from the Navigator:

Component: Employee Resourcing
Process: Maintain Additional Employee Details
Task: EEO-4 Reporting Information

The EEO-4 Reporting Information form is displayed for the selected employee.

For practice, access the EEO-4 Reporting Information form (EO4SCR) for Steven Austin, employee 1234.

2. Enter the effective date

Enter the date on which the change is effective. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '01-01-1999'.

3. Select the EEO-4 Function

Select an EEO-4 value from this option list (EO21). This value is used as a breakdown as defined by the EEOC for reporting purposes.

For practice, select 'Other'.

4. Select the EEO-4 exemption status

This field is used to exempt certain elected and appointed officials from the EEO-4 report (74-RPT). Any employee with an exemption status on this form will not be included in the EEO-4 Report - State and Local Government Information report (74-RPT).

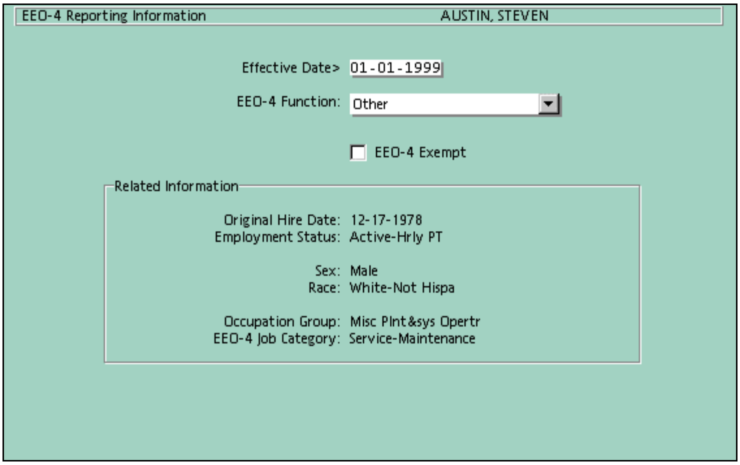
For practice, leave this check box blank.

5. Click Save or press Enter

The information is saved and will be noted on the EEO-4 Report - State and Local Government Information (74-RPT).

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



See also:

- Required employee data ***(on page 89)***

For information about the reports related to the data on this form.

Recording EEO prior year totals

This form is used to record prior year EEO-1 total, which is reported on the EEO-1 Report (70-RPT). You must have an EEO Establishment Totals form (TW-SCR) recorded for the prior year for each of your EEO Establishments. This form should be updated on an annual basis to ensure accurate reporting.

To record prior year EEO-1 Report totals, follow these steps:

1. Access the EEO Establishment Totals form (TW-SCR)

Access this form by making the following selection from the Navigator:

Component: HR Setup
Process: Setup EEO Rules
Task: EEO Prior Year Totals

For practice, access the EEO Establishment Totals form (TW-SCR).

2. Select the EEO Establishment

From the values in this option list (EO069), select the name of the EEO Establishment that has been assigned to the location where the employee works.

For practice, select 'Chicago Facility'.

3. Enter the Effective Date

Enter the effective date of the Table entry. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '03-01-2000' (US and Canada) or '01-03-2000' (elsewhere).

4. Enter the Male totals

Enter the number of male employees recorded on last year's EEO-1 report. The total of these categories is calculated automatically by the EEO Establishment Totals form (TW-SCR) when it is returned.

For practice, type the following values:
White: 111
Black: 110
Hispanic: 68
Asian or Pacific Islander: 67
American Indian/Alaskan Native: 1

5. Enter the Female totals

The total of these categories is calculated automatically by the EEO Establishment Totals form (TW-SCR) when it is returned.

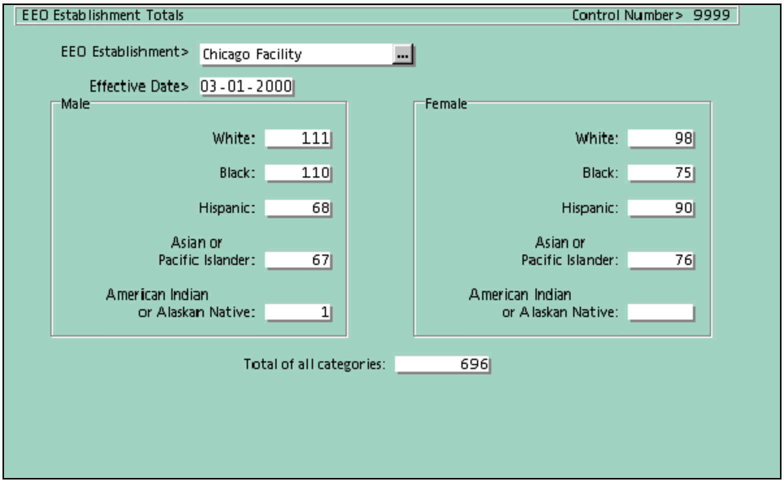
For practice, type the following entries:
White: 98
Black: 75
Hispanic: 90
Asian or Pacific Islander: 76
American Indian/Alaskan Native: 0

6. Click Save or press Enter

Note: *After you run the 70SRPT or 70MRPT reports, the current years totals are automatically written to the EEO Establishment Totals form (TW-SCR). These are used for the prior year totals for next years EEO-1 Report (70-RPT). If the reports are run multiple successful times in one year, the totals are rewritten each time.*

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



See also:

- Required employee data ***(on page 89)***

For the considerations when setting up government compliance data.

Extended Practice

Note: You must have completed the Extended Practices in the prior sections to guarantee the successful completion of the Extended Practice that follows.

1. Transfer the applicant record you created in the last section to the active employee organization as of today. Use your applicant number as your employee number. Confirm that you now exist in both the applicant organization (993333) and the active organization (999999).

   Complete the new hire process by using the Set Up A New Employee form (NH-SCR) to add your weekly pay frequency and payment type of 'salaried auto-paid'.

   View these forms to be sure that all of the needed new hire information has been populated:

- Employee Information (EF-SCR)
- New Hire (NH-SCR)
- Job Assignment/Changes (O5-SCR)
- Location Assignment/Changes (05CSCR)
- Salary Assignment/Changes (40-SCR)

2. Use the Set Up A New Employee form (NH-SCR) with Logical Employee Model 'LMODEL 01' to hire a new employee, Thomas Larson, as of January 15th of this year. He did not go through the applicant tracking process. Thomas Larson is a white male hired as a Head Reptile Keeper.

Review of Questions Answered

1. What considerations are there when hiring new employees?

2. What information is required on the employee record for him or her to be active in the system?

3. How are major activities and employee statuses handled?

4. What are the various methods used for adding new employees?

5. How are positions and jobs handled when adding new employees?

6. What are the important dates used to track employees in the system?

7. What employee-level data is optional when adding new employees?

CHAPTER 5

Managing Employee Attendance

In This Chapter

Introduction

Developing a productive, efficient workforce starts with good attendance management. Attendance management involves recording, reporting, and analyzing all employee absences, whether authorized or unauthorized. Cyborg's products provide the functionality to help you accomplish the tasks of recording and reporting your employees' absences.

Tasks

This section explains how to do the following:

- Setting annual paid absence entitlements
- Recording employee absences
- Recording unauthorized time off
- Viewing employee absences
- Viewing employee absences by type
- Viewing employee absences by points

Prerequisites

Before you can manage your employee attendance, the following must be established:

- Companies (organizations)
- Employees

☞ *Refer to* **Recruiting and Selecting Employees** *(on page 33) and* **Hiring, Rehiring, Reinstating, Recalling, or Transferring an Employee** *(on page 83) for more information.*

Note: Position Administration can be implemented and used to find replacement staff when employees are absent by matching skills, competencies, education, and so forth.

☞ *Refer to the Using Position Administration documentation for more information.*

Questions answered

The following questions are answered in this section:

1. What needs to be considered when managing employee attendance effectively?
2. What functionality is available to manage employee attendance?
3. What are absence types and absence points and how are they used?
4. How are annual paid absence entitlements used?

Overview of employee attendance management

Your organization is likely to have developed its own policies regarding employee absence and procedures for managing absences. Those policies and procedures may provide different courses of action for various types of absences (planned, unplanned, authorized, unauthorized, long-term, short-term, emergency) that may affect employee compensation, performance appraisals, employee status, and leave eligibility. Your organization's ability to implement or enforce its own policies and follow its established procedures will be dependent on good recordkeeping and reporting of employee absences.

An effective attendance-management process includes the following five stages:

- Record employee leave entitlements
- Consider implications of each absence
- Record employee absence information
- Manage leave entitlement
- Analyze absences

Record employee leave entitlements

'Leave entitlement' is the amount of time an employee is entitled to leave work, generally for specified purposes (such as vacation or holiday, sickness, jury duty, and funerals). Leave entitlement is referred to in various ways. Your organization may refer to it as vacation benefit, sick leave benefit, accrued vacation time, or available personal time off.

Leave entitlement is generally managed on an annual basis and it may accrue throughout the year at a specified rate for each month worked or be granted in lump-sum fashion at the beginning of each calendar year or an individual employee's year of employment. How leave entitlement is granted and recorded is governed by your organization's specific leave policy. For example, if your organization awards leave entitlements in lump-sum fashion at the beginning of each calendar year, you would record a number of days or hours of leave entitlement for vacation, sick leave, and so on for each employee at the beginning of the year.

Consider implications of employee absences

Any employee absence may have a number of implications within your organization. The primary implications are the effect on payroll, the term of the absence and its possible effect on employee status, and work coverage during the absence.

Payroll implications

The question of an absence's effect on payroll is tied directly to your organization's policy. That policy may specify the effect of the absence on payroll and is influenced by whether the absence was planned or unplanned, authorized or unauthorized, or within the employee's available leave entitlement. If the absence is to be unpaid, you must not only record the absence but also take action to deduct the appropriate amount from the employee's pay. Also, the employee's return to work will need to be verified and resumption of regular payroll initiated.

Term-of-absence implications

Most short-term absences, including reportable tardiness, are recorded simply as absences. If the absence is long term (according to your organization's policy) or at the point a short-term absence becomes long-term, you may need to change the employee's status.

☞ *Refer to* **Processing Terminations, Leaves and Returns, and Other Major Activities** *(on page 205) for more information.*

Work-coverage implications

Depending on the employee's job and the duration of the absence, work coverage could be a significant implication of the absence. Finding qualified employees who are available to cover for the absent employee is frequently an extremely important and time-sensitive task. You can use the Position Administration component to generate a list of other available employees who have the skills and competencies needed to cover for an absent employee.

☞ *Refer to the Using Position Administration documentation for more information.*

Record employee absence information

Accurate and timely recording of each employee absence is critical to good absence management. Generally, the following details are recorded:

- Date, day, time, and duration of the absence
- Type of absence (vacation, sickness, jury duty, emergency at home, and so forth)
- Whether the absence was authorized
- Whether the absence was planned
- Whether the employee is to be paid for the time off work

Recording this type of information about each absence enables you to analyze patterns and causes of absences within the organization. All of this information can be recorded and tracked using Cyborg's products.

Manage leave entitlement

By managing leave entitlement (employees use of vacation and sick-leave time) instead of simply letting it happen, your organization can facilitate leave scheduling to help employees avoid the loss of unused leave hours to which they are entitled, to maintain organizational productivity, and to schedule workers more effectively. The task of managing leave entitlement is essentially a matter of monitoring actual employee absences in view of time-off entitlements. The system is very helpful in accomplishing this because it automatically produces a list of the authorized time-off hours remaining in the current calendar year for each employee. After reviewing the list, you can take appropriate steps to notify employees of the need to schedule and obtain authorization for planned leaves or to notify department managers of the need to anticipate worker absences and plan for work coverage.

For detailed directions on viewing employee absences.

Analyze absences

Analyzing absences is possible only when the previous steps of recording individual employee leave entitlements and actual absences have been completed accurately and in a timely fashion. You are then able to generate absence reports that will help you:

- Look for patterns. Within the entire workforce, or within an individual employee's record, look for proximity of absences to public holidays and weekends, sports events, completion of major projects, and so on. Look for organization-wide patterns as well as departmental or individual employee patterns. Do certain buildings, locations, departments, or job types show absence patterns that would help managers schedule work coverage more effectively or take other corrective actions?

- Analyze business impact. Examine the cost of absences, their impact on productivity, and their effect on work coverage, product delivery, and customer service.

- Determine causes. Are absences caused by lack of motivation? Poor management? Environmental conditions? Stress? Drug and alcohol abuse? Reviewing any discernible patterns of employee absence may help you determine why the absences are occurring and how to solve any problems.

- Take corrective and preventative action. The patterns, effects, and causes you have examined will help you determine appropriate corrective and preventative action within the context of your organization's policy. Such action could include such steps as disciplinary action against individual employees, reassignment of employees or managers, restructuring of work hours or locations, better scheduling of personal time off for holidays, and so forth.

As with many other important human resource management functions, managing employee attendance is rooted in good record keeping, effective reporting, and timely report analysis. The system gives you all the tools you need to accomplish these steps with a high degree of effectiveness and efficiency.

Overview of the absence functionality

When considering the absence functionality, you may need to consider how the following components interact with the absence functionality:

- Time and Attendance
- Payroll Administration

Time and Attendance component interaction with the absence functionality

The Time and Attendance Administration provides separate functionality that collects, maintains, and processes employee time entry data for upload into the Cyborg Payroll Administration. Although this functionality may not be implemented by all clients, many absence tracking features and forms are available to all users, letting you track employee absences and monitor when excessive absences are occurring. If your organization uses Time and Attendance, the general ledger interface feature automatically books the accrual of excused and unexcused absences. When in use, this component lets you focus solely on tracking excessive absences or to actually trigger payments or deductions through the Payroll Administration.

The following forms are used in recording and tracking employee absences:

- Absences form (93-SCR)
- Absences (Single & Multiple) form (93XSCR)
- Authorized Time-Off Hours Remaining form (93ASCR)
- Absence Entitlement form (93BSCR)
- Unauthorized Time-Off Hours Taken form (93USCR)
- Absence Inquiry form (93ISCR)
- Absence Points form (93PSCR)
- Absence Inquiry By Type form (93TSCR)

These forms can be used even if you are not using the full functionality of the Time and Attendance Administration. However, the forms are limited to tracking and reporting on employee absence data and no interface with the Payroll Administration is possible.

Note: *The Absences (Single & Multiple) (93XSCR) and the Absence Entitlement (93BSCR) are used by the time away function in Interactive Manager. You can, however, use these forms without having Interactive Manager installed.*

☞ *Refer to the Using the Time and Attendance Administration documentation for more information.*

Absences form (93-SCR)

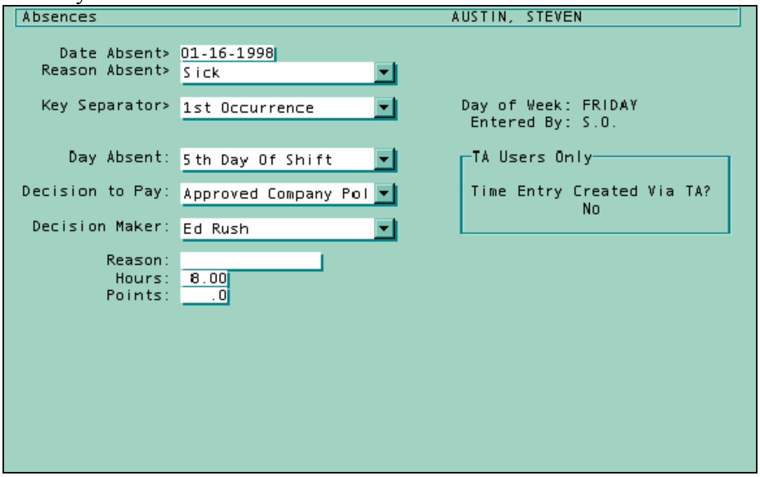
This form is used to record excused and unexcused absences for your employees. These absences are set up in the Absence Type option list (TA01). This option list can be changed and options can be added to meet the needs of your organization.

The Absences form (93-SCR) records the date and type of absence as well as the number of hours your employees are absent. The form also records approvals to pay for excused absences, including the name of the person who gave the approval.

The day of the week on which an absence occurred and any relationship that a day may have had to a holiday or to a day the employee was scheduled to work can be assigned here. This enables you to identify absence trends as related to holidays or other non-work days.

The number of points that you want to assign to the absence can also be entered on this form. Absence points are user-defined and can be totaled over time to determine if an employee is within the accepted number of points for a time period.

Here is an example of an Absences form (93-SCR) that has been entered for Steven Austin for a day he was absent from work because he was sick:



Note: *This form can be used along with the functionality of the Time and Attendance Administration by setting up a table record for each type of absence to be paid. This is done by generating a time entry from an Absence record by setting up the Absence Type/HED Number Cross Reference form (TAASCR). When you are generating a time entry using this form, you need to be aware that the Decision to Pay list box (TA03) must be one of your approved choices for the Time and Attendance component to generate a time entry from the Absence record. For this to occur, the option must start with the letter 'A.' If no table record is found for the Reason Absent list box (TA01), an error message will be displayed. Also, once a time entry is created from an absence, you are notified in the TA Users Only recess box on the Absences form (93-SCR).*

☞ *Refer to the Using the Time and Attendance Administration documentation for more information.*

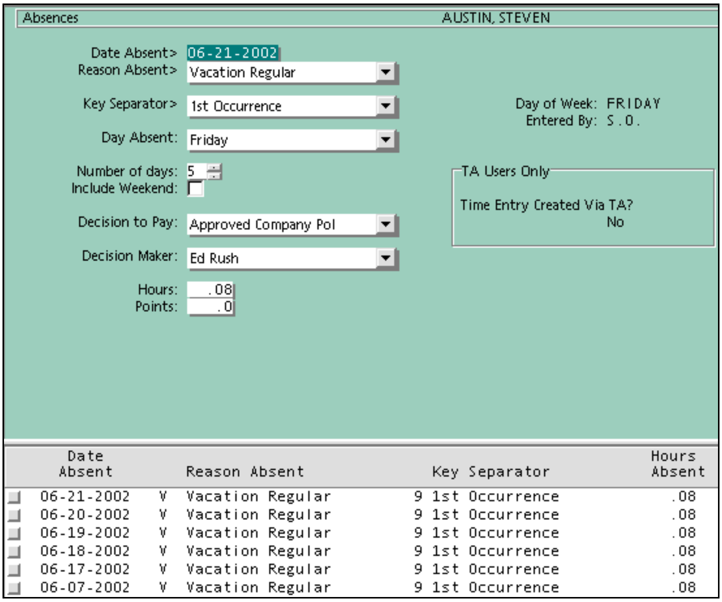
Absences (Single and Multiple) form (93XSCR)

This form is similar to the Absences form (93-SCR) in that it is used to record excused and unexcused absences for your employees. However, this form has additional entries and functionality. The following lists the added entries and the purpose of each.

- Number of Days—Total number of days the employee will be away from work
- Include Weekend—If the employee normally works on weekends and you check this box, the system will include Saturday and Sunday when creating absence records

The increased functionality allows you to create multiple absence records by completing the form only once. When you enter an absence for an employee that spans more than a single day, you enter the number of days and indicate whether to include weekends. The system then generates the absence records.

Following is an example of an Absences (Single and Multiple) form (93XSCR) created for Steven Austin for a week he was on vacation. The entries on the form generated the records that appear in the message area.



Absences AUSTIN, STEVEN

Date Absent> 06-21-2002
Reason Absent> Vacation Regular
Key Separator> 1st Occurrence
Day Absent: Friday
Number of days: 5
Include Weekend:
Decision to Pay: Approved Company Pol
Decision Maker: Ed Rush
Hours: .08
Points: .0

Day of Week: FRIDAY
Entered By: S.O.

TA Users Only
Time Entry Created Via TA? No

Date Absent		Reason Absent	Key Separator	Hours Absent
06-21-2002	V	Vacation Regular	9 1st Occurrence	.08
06-20-2002	V	Vacation Regular	9 1st Occurrence	.08
06-19-2002	V	Vacation Regular	9 1st Occurrence	.08
06-18-2002	V	Vacation Regular	9 1st Occurrence	.08
06-17-2002	V	Vacation Regular	9 1st Occurrence	.08
06-07-2002	V	Vacation Regular	9 1st Occurrence	.08

Note: *The Absences (Single & Multiple) (93XSCR) is used by the time away function in Interactive Manager. You can, however, use these forms without having Interactive Manager installed.*

☞ *Refer to the Interactive Workforce: The Administrators' Guide for additional information on the Time Away process.*

Authorized Time-Off Hours Remaining form (93ASCR)

This form is intended to be used at the beginning of a year to record authorized time-off hours by absence type. The system will allow you only one record per year, with the record being updated each time an entry is made for a year. The year may be a calendar year or any other annual period for which you record and maintain records for employee absences. History can be kept from year to year.

When one of your employees uses authorized hours, you will need to record these hours on the Absences form (93-SCR). After recording these hours, you must adjust the remaining hours on the Authorized Time-Off Hours Remaining form (93ASCR). Whether unauthorized hours taken are paid or not, they should be recorded on the Unauthorized Time-Off Hours Taken form (93USCR).

Note: *If you are using the Authorized Time-Off Hours Remaining form (93ASCR) and have the eCyborg Interactive Workforce installed, employees can view their remaining time-off balances online.*

Absence Entitlement form (93BSCR)

This form is similar to the Authorized Time-Off Hours Remaining form (93ASCR) in that the form displays the time off remaining for an employee. However, this form works with the Absences (Single and Multiple) form (93XSCR) by recalculating the entitlement balance for each entry made on the record created on the Absences (Single and Multiple) form (93XSCR).

The following list shows the functionality available on the Absence Entitlement form (93BSCR):

- Allows you to enter up to 40 valid reasons for absence
- For each reason, you can enter the entitlement amount carried over from the previous year
- The system calculates and displays the total absence hours taken, for each reason, between the beginning of the current year (Start Date) and a specified date in the current year (As of Date)
- The system calculates and displays the entitlement balance for each reason, at a specific date in the current year

Note: *The Absence Entitlement (93BSCR) is used by the time away function in Interactive Manager. You can, however, use these forms without having Interactive Manager installed.*

☞ *Refer to the Interactive Workforce: The Administrators' Guide for additional information on the Time Away process.*

Unauthorized Time-Off Hours Taken form (93USCR)

This form is used to identify and to accumulate the hours that your employees are away from their regularly scheduled work that are not considered as authorized time off. Generally, employees are not paid for unauthorized time off. After you have recorded the unauthorized time-off absence (s) on the Absences form (93-SCR) for each category, you will use the Unauthorized Time-Off Hours Taken form (93USCR) to add these unauthorized time-off hours to the appropriate category total.

Absence Inquiry form (93ISCR)

This is a display form that lets you view an employee's absence history. This form enables you to display all absences for an employee by date, starting with the most recent occurrences. As more than one form of absence history may be on file for an employee, you can page through the absence history to find the earliest occurrences.

Absence Points form (93PSCR)

This form is also used to view the absence points an employee has had for a single absence type.

Absence Inquiry By Type form (93TSCR)

This form is used to view the absence history for an employee by absence type. All absences of a specified type for an employee by date starting with the most recent occurrences are displayed. More than one form of absence history may be on file for the employee. You can page through absence history to find the earliest occurrences.

Apply the Concept

How does the Time and Attendance component interact with managing employee attendance?

Payroll Administration interaction with the absence functionality

Using the Payroll Administration, you may choose to use the reduced payment option. This means a reduced payment is made based on insufficient accrued hours or company-determined rules for excessive absences. The system accumulates both the time taken and the payments made to an employee, while producing either detail or summary reports.

Absence types

When recording an employee absence, you must indicate the absence type, or the category of the absence. Values for absence types are supplied from the Absence Type option list (TA01), and include the following: birth in family, holiday, and sick time. Your organization should modify this option list to reflect the values you need.

It is often useful to be able to view all of the absences an employee has had of a single absence type. This can be accomplished using the Absence Inquiry By Type form (93TSCR). Enter the Absence Type from the Absence Type option list (TA01) entered with the number of years, months, and days for which to search from the current date. For example, you may want to view the number of sick days an employee has taken over a specified period of years, months, and days. xx

See also:

- Viewing employee absences by type ***(on page 194)***

For detailed directions on viewing employee absences by type.

Absence points

When you record an absence for an employee using the Absences form (93-SCR), you can optionally assign a number of absence points to the absence. The number of absence points you assign for an absence is up to your organization. By adding up the number of absence points an employee has accumulated over a period of time, you can determine if the employee is within the allowable number of absence points. If not, you may want to pursue some form of disciplinary action.

For example, you could assign one absence point to an employee for each excused absence and two absence points for each unexcused absence from work. At the end of a sixth month period, you could send all employees that exceed a total of five absence points a written warning that their attendance must improve in the next six months.

Absence point totals can be viewed by employee on the Absence Points form (93PSCR). You can enter the number of years, months, and days to search for absences and their assigned absence points from the current date.

See also:

- Viewing employee absences by points ***(on page 196)***

For detailed directions on viewing employee absences by points.

Apply the Concept
What are absence points?

When to set annual paid absence entitlement

The system requires you to determine annual paid absence entitlements at the beginning of a year period, or when the employee is hired. The system will allow you only one record per year, with the record being updated each time an entry is made for a year. The year may be a calendar year or any other annual period for which you record and maintain records for employee absences. The system accommodates different types of absences that begin at different times of the year through the 'Year-end Date' and 'As-of Date' text boxes on the Authorized Time-Off Hours Remaining form (93ASCR).

Any annual absence entitlements used by the employee will be prorated based on the start date that you record when they are set up on the system. Annual entitlements can also change for existing employees due to job promotions or changes in their contractual relationships.

A leave-of-absence entitlement is also considered an absence entitlement. Leave-of-absence entitlements can change due to an employee beginning or returning from a leave of absence.

See also:

- Setting annual paid absence entitlements ***(on page 185)***

For detailed directions on setting annual paid absence entitlements.

Employee attendance reports and their uses

A suite of batch reports are delivered with the system that are designed to assist you in managing your employee attendance. The following categories of reports are delivered.

Managing absence entitlement

- Remaining Time Off - Current Year (6A-RPT)—Provides a list of all employees and how much authorized time off they have remaining.
- Absence Record By Employee (6B2RPT)—Provides a list of all absences for employees in employee number order. All absences within a specified date range are displayed and grouped by employee, allowing you to maintain a record of absences for each employee.
- Denied Absence (6U2RPT)—Displays all absences that have been denied pay within a specified date range, grouped by employee, to allow you to maintain a record of such absences.

Looking for absence patterns

- Absence Record-By Employee-Specified Period report (6B-RPT)—Provides a list of employees who have been absent within a range of dates. The exact date an employee was absent along with the reason is also printed.
- Absence Record By Date report (6B1RPT)—Provides a list of all absences for employees in date order. All absences are displayed within a specified date range in order of occurrence to allow you to maintain a record of absences.
- Absence Record By Employee report (6B2RPT)—Provides a list of all absences for employees in employee number order. All absences within a specified date range are displayed and grouped by employee, allowing you to maintain a record of absences for each employee.
- Absence Record Summary report (6B4RPT)—Displays a summary of the absence data that can be maintained for comparison purposes for past and future periods to determine trends.

Analyzing business impact

- Unauthorized Time Off-Year To Date report (6U-RPT)—Provides a list of employees and how much unauthorized time off they have used.
- Approved Absences report (6N1RPT)—Provides a list of all absences that have been approved for payment. It allows for selection of specific absent types to be included. This report can be used to show all absences of specified types that have been approved for payment. It can be used to list all non-work hours that must be paid.

- Paid/Non-Paid Absence report (6N2RPT)—Provides a list of all absences. Absences are grouped based on whether or not they have been paid.

Determining cause

- Absence Log-By Absence Type report (6C-RPT)—Provides a list of employees who have been absent for a specified absence type.
- Absence Record By Type report (6B3RPT)—Provides a list of all absences for employees grouped by Absence Type. All absences within a specified date range are displayed, grouped by absence type, allowing you to maintain a record of the different types of absences and their frequency of occurrence.

Taking corrective action

- Unauthorized Time Off-Year To Date report (6U-RPT)—Provides a list of employees and how much unauthorized time off they have used.
- Absence Record By Employee report (6B5RPT)—Displays all absences within a specified date range and prints one employee per page. It allows you to provide feedback to individual employees regarding their absenteeism.
- Unexcused Absence report (6U1RPT)—Details all unexcused absence data within a specified date range for managers to view or maintain as a permanent record.

Time away setup for Interactive Manager

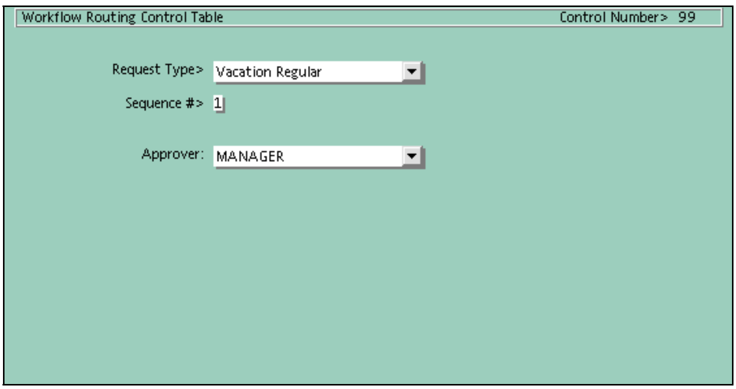
Interactive Manager uses a number of The Solution Series forms to route, record, approve, and track employee absences. The forms used include:

- Workflow Routing Control Table form (T93SCR)
- Absences (Single and Multiple) form (93XSCR)
- HR-Approve/Deny Requests form (93MSCR)
- System Administrator – Approve/Deny Requests form (93WSCR)
- Absences Entitlement form (93BSCR)

Time away work flow routing setup

When you implement Interactive Manager, you give employees the ability to request time away from work online. When an employee submits an online request for time away, Interactive Manager can route the request to the employee's manager and/or to the HR department. Using the work flow Routing Control Table form (T93SCR) you determine where you want each time away request type routed.

Note: *If a time request type has no routing set up, the system automatically approves any requests for that type of time away.*



You can set a different approval routing for each of the request types that appear in the drop down option list. The number in the sequence field tells Interactive Workforce the order in which you want the request routed. Following are examples for routing requests for the request type, Vacation Regular:

- Enter 1 in the sequence field, select Manager in the Approve field, and click Save or press Enter. If you make no other entries, the system routes the request to the Manager. When the manager responds, the request is routed back to the employee's In box.
- Enter 1 in the sequence field, select Manager in the Approve field, and click Save or press Enter. Then enter 2 in the sequence field, select HR, and click Save or press Enter. If the manager approves the request, the request continues on to the HR

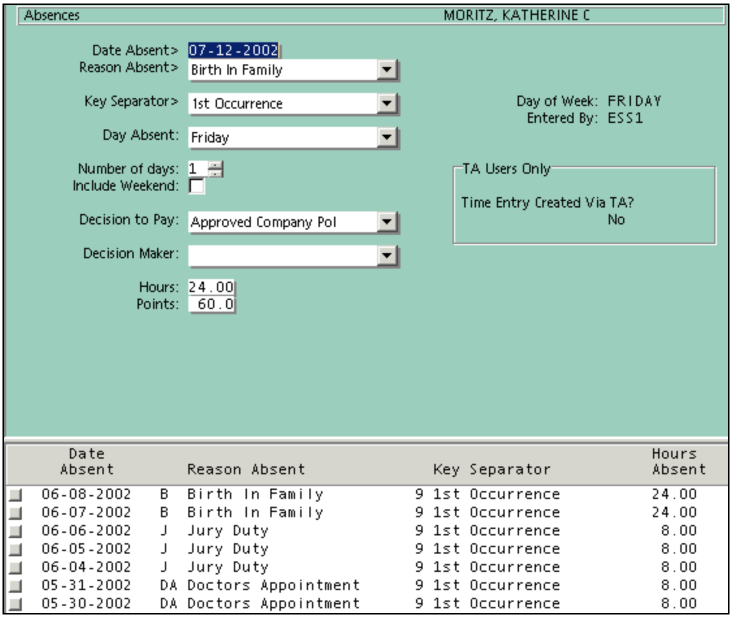
department for approval. When the HR department responds, the system routes the request back to the employee's In box.

If the request is denied at the first destination on the routing, the denied request is sent back to the In box of the employee who originated the request. No further routing occurs.

Note: *Time away request types are on the TA05 option list.*

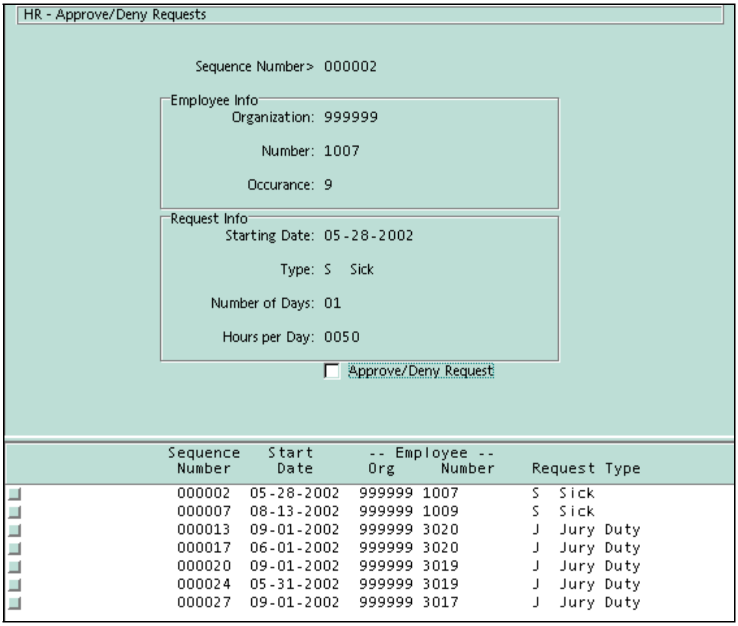
Employee absence records

If the manager and/or HR department approve an employee's request for time away from work, Interactive Manager creates the records for the absences using the Absences form (93XSCR). The following illustration shows examples of these records in the message area of the form.



Approval/Denial of time away requests by HR

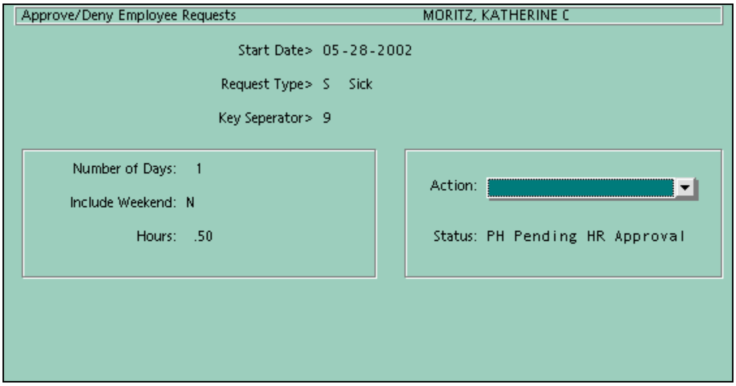
If you configured an online time away request in Interactive Manager to be approved by the HR department, HR users access the HR-Approve/Deny Requests form (93MSCR) to approve or deny the request.



Note: *Only pending time away requests with an HR routing display on the HR-Approve/Deny Requests form (93MSCR).*

The form shows Employee and Request Information along with a text box to enter a response. The employee information includes the organization for which the employee works, the employee's number, and the number of requests the employee has made for time away from work. The request information has the starting date for the time away, the type of time away requested, the number of days included in the request including the start date, and the hours the employee is regularly scheduled to work each day. The message area of the form shows the employee's requests that require an HR response.

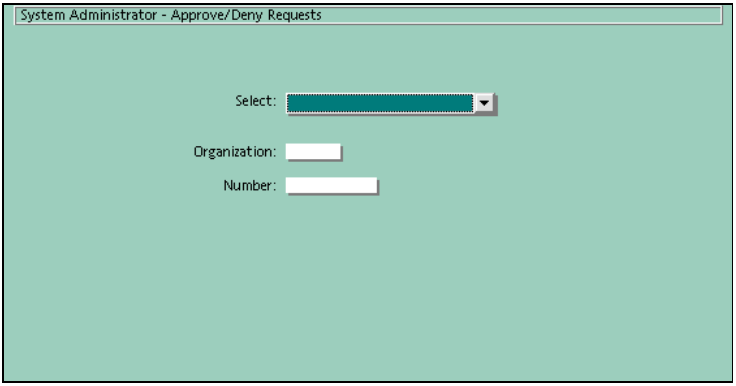
To respond to a request, select the record, and click the Approve/Deny Request checkbox.



The system then displays the Approve/Deny Employee Requests form (93RSCR), which contains the time-away request information. Use the arrow to display the drop down menu of options and select the appropriate response. If the HR department approves the request and the request does not need to be routed further, the system generates the appropriate absence records and updates the employee's time away balances.

Approval/Denial of time away requests by systems administrator

Your organization determines the work flow for the time away request. A request is pending until approved or denied. System administrators can access and act on any pending time away request in the system. Using the System Administrator - Approve/Deny Requests form (93WSCR) the administrator first selects a manager or employee request using the drop down list of options and then enters the organization (control 1-2) and employee number of the manager or employee.



If the administrator selects manager, the system displays the Direct Report - Approve/Deny Requests form (93NSCR). The message area shows the pending requests in the manager's In box. The administrator selects a record and clicks the checkbox, Approve/Deny Request.

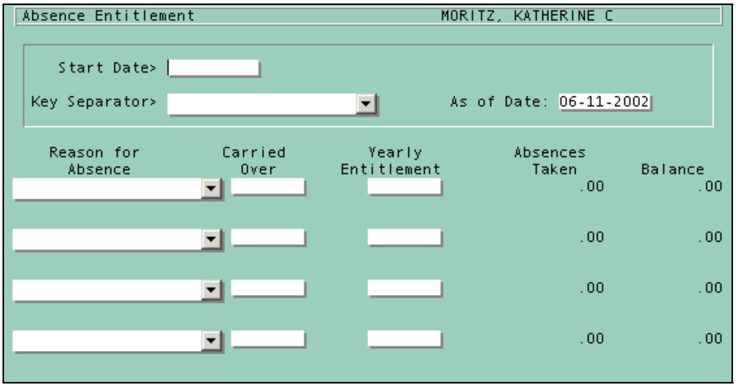
The system then displays the Approve/Deny Employee Requests form (93RSCR) allowing the administrator to select an Action from the drop down list.

If the administrator selects Employee on the System Administrator - Approve/Deny Requests form (93WSCR), the system displays the Approve/Deny Employee Requests form (93RSCR) allowing the administrator to select an Action from the drop down list.

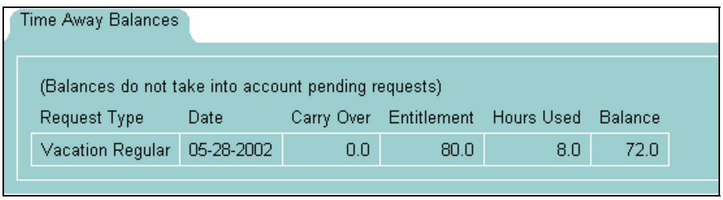
If the approved request is configured to be routed to HR after manager approval, the request is still pending subject to the response of the HR department representative.

Time away balances

When a time away request is approved by a manager and/or the HR department, the system updates the appropriate time away balances for the employee on the Absence Entitlement form (93BSCR).



When an employee or manager checks time away balances, the information they view in Interactive Manager originates from this form. The following graphic shows the Time Away Balances page viewed online with the browser.



Detailed Directions

This section provides detailed directions on completing a business task.

Tasks

Completing the Guided Practice

In the Guided Practice for this section, you will add absence information for Robert Morris, employee number 1005. He is an active employee at Acme Manufacturing.

You must have completed the Guided Practices in the preceding sections to guarantee the successful completion of the Guided Practice that follows.

Setting annual paid absence entitlements

To set annual paid absence entitlements, follow these steps:

1. Access the Authorized Time-Off Hours Remaining form (93ASCR)

The Authorized Time-Off Hours Remaining form (93ASCR) is used to record authorized time-off hours, by absence type, at the beginning of a year. Generally, authorized time off is paid.

Access this form by making the following selection from the Navigator:

Component: Employee Resourcing
Process: Manage Employee Attendance
Task: Authorized Hours Remaining

For practice, access the Authorized Time-Off Hours Remaining form (93ASCR) for employee 1005.

Note: *The text boxes on this form that are used to enter authorized time-off hours are optional. If no entry is made in a text box, it is recorded as having .00 hours.*

2. Enter the Year-end Date

Enter the last day of the entitlement year. This is the year-end date of the period for which the authorized time off category amounts are recorded. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '12-31-1998' (US and Canada) or '31-12-1998' (elsewhere).

3. Enter the As-of Date

Enter the as of date for this data. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '01-01-1998'.

4. Enter Vacation (hours)

Enter the amount of vacation hours awarded to the employee or the amount of vacation time remaining. Vacation time differs from 'holiday' time (entered in step 6 below) in that 'vacation' refers to those days for which an employee is authorized to be off work for purposes of vacation.

Note: There are several ways to enter data in this text box, but each entry must always include a decimal point (.). For example, to indicate four hours, you can type '4.', '4.0' or 4.00'.

For practice, type '80.00'.

5. Enter Sick (hours)

Enter the sick leave hours for which the employee will receive payment. These are days the employee can use when ill and unable to attend work and for which they will be paid.

Note: There are several ways to enter data in this text box, but each entry must always include a decimal point (.). For example, to indicate four hours, you can type '4.', '4.0' or 4.00'.

For practice, type '40.00'.

6. Enter Holiday (hours)

Enter the holiday time for which the employee will receive payment. Holiday time differs from 'vacation' time (entered in step 4 above) in that 'holiday' refers to those legal holidays for which employees are authorized to be off work.

Note: There are several ways to enter data in this text box, but each entry must always include a decimal point (.). For example, to indicate four hours, you can type '4.', '4.0' or 4.00'.

For practice, type '72.00'.

7. Enter Personal (hours)

Enter the personal hours that the employee has been awarded. Personal days are authorized for personal use. These absences are generally considered paid time away from regularly scheduled work, but can be either paid or unpaid.

Note: There are several ways to enter data in this text box, but each entry must always include a decimal point (.). For example, to indicate four hours, you can enter '4.', '4.0' or 4.00'.

For practice, type '16.00'.

8. Enter Comp Time (hours)

Enter the comp time for which the employee is to be compensated. Comp time is personal time off with pay that an employee is granted in lieu of money for hours worked.

Note: There are several ways to enter data in this text box, but each entry must always include a decimal point (.). For example, to indicate four hours, you can enter '4.', '4.0' or 4.00'.

For practice, leave this text box blank.

9. Enter Excused Absences (hours)

Enter the excused time off that has been awarded to the employee.

Note: There are several ways to enter data in this text box, but each entry must always include a decimal point (.). For example, to indicate four hours, you can enter '4.', '4.0' or 4.00'.

For practice, leave this text box blank.

10. Enter Jury Duty (hours)

Enter the number of hours that are expected to be used for jury duty.

Note: There are several ways to enter data in this text box, but each entry must always include a decimal point (.). For example, to indicate four hours, you can enter '4.', '4.0' or 4.00'.

For practice, leave this text box blank.

11. Enter Family Funeral (hours)

Enter the funeral time off for which the employee will receive pay while attending the funeral of an immediate family member.

Note: There are several ways to enter data in this text box, but each entry must always include a decimal point (.). For example, to indicate four hours, you can enter '4.', '4.0' or 4.00'.

For practice, type '16.00'.

12. Enter Other Funeral (days)

Enter the time for which the employee will receive pay to attend funerals for persons other than the employee's immediate family.

Note: There are several ways to enter data in this text box, but each entry must always include a decimal point (.). For example, to indicate four hours, you can enter '4.', '4.0' or 4.00'.

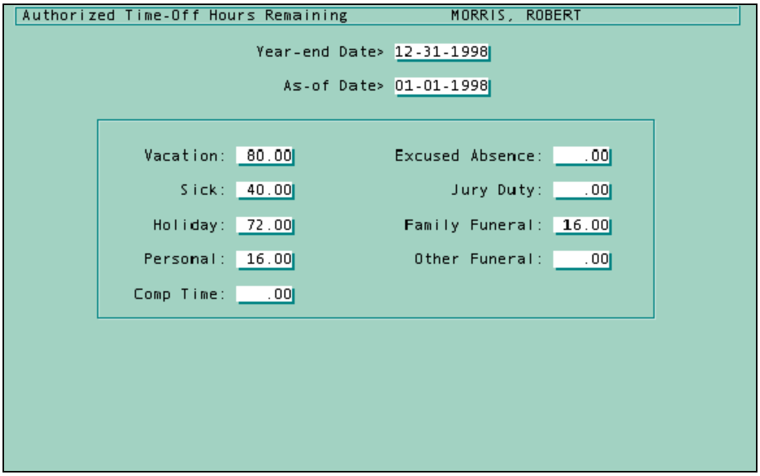
For practice, leave this text box blank.

13. Click Save or press Enter

The Authorized Time-Off Hours Remaining form (93ASCR) is now recorded.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



Authorized Time-Off Hours Remaining MORRIS, ROBERT

Year-end Date> 12-31-1998

As-of Date> 01-01-1998

Vacation:	80.00	Excused Absence:	.00
Sick:	40.00	Jury Duty:	.00
Holiday:	72.00	Family Funeral:	16.00
Personal:	16.00	Other Funeral:	.00
Comp Time:	.00		

See also:

- When to set annual paid absence entitlement ***(on page 177)***

For an explanation of annual paid absence entitlements.

Recording employee absences

To record absences, follow these steps:

1. Access the Absences form (93-SCR)

The Absences form (93-SCR) is used to record employee excused and unexcused absences. On this form, you may also record the date and type of absence and the number of hours absent.

Access this form by making the following selection from the Navigator:

Component: Employee Resourcing
Process: Manage Employee Attendance
Task: Absences

For practice, access the Absences form (93-SCR) for employee 1005.

2. Enter the Date Absent

Enter the date the employee was absent from scheduled work. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '02-04-1998' (US and Canada) or '04-02-1998' (elsewhere).

3. Select the Reason Absent

Select the type of absence. If you are using the full functionality of the Time and Attendance component, this is used in the process to create time entries from absence data. For a time entry to be generated from an Absences form (93-SCR) entry, a corresponding Absence Type/HED Number Cross Reference form (TAASCR) must be established for the entry to this list box.

For practice, select 'Unexcused Absence'.

4. Select the Key Separator

Select the key separator to ensure that multiple entries of a segment on the same date with the same reason absent are sequenced properly on the employee's record. Each key combination may have a maximum of ten entries for the same absent-date and absent type. You may update this option list (HR70) to include all of the key separators needed by your organization.

For practice, select '1st Occurrence'.

5. Select the Day Absent

Select the day absent and its relationship to a holiday or the day of the employee's scheduled shift on which the absence occurred. You may update this option list (TA-02) to include all of the absence types needed by your organization.

For practice, select '3rd Day of Shift'.

6. Select the Decision to Pay

Select the designation of whether the employee's absence was approved (paid) or denied (not paid) and the determining authority. You may update this option list (TA03) to include all of the decision types needed by your organization.

For practice, select 'Denied Pay Personnel'.

7. Select the Decision Maker

Select the name of the person who determined the type of absence and whether it was approved for payment. You may update this option list (TA049) to include all of the decision makers needed by your organization.

For practice, select 'Ed Rush'.

8. Enter the Reason

Use this text box to enter details on the absence. For instance, an employee may have an excused absence, with 'car trouble' entered in this text box to provide more detail.

For practice, leave this text box blank.

9. Enter the Hours

Enter the number of hours the employee was absent from work. This is a numeric text box containing four digits and one decimal position. For example, 12.4 hours would be entered as '12.4', '1240', or 12.40'.

For practice, type '8.00'.

10. Enter the Points

Enter the user-defined point value you want to assign for this absence. This is a numeric text box containing three digits and one decimal position, for example, 4.5 points would be entered as '45' or '4.5'.

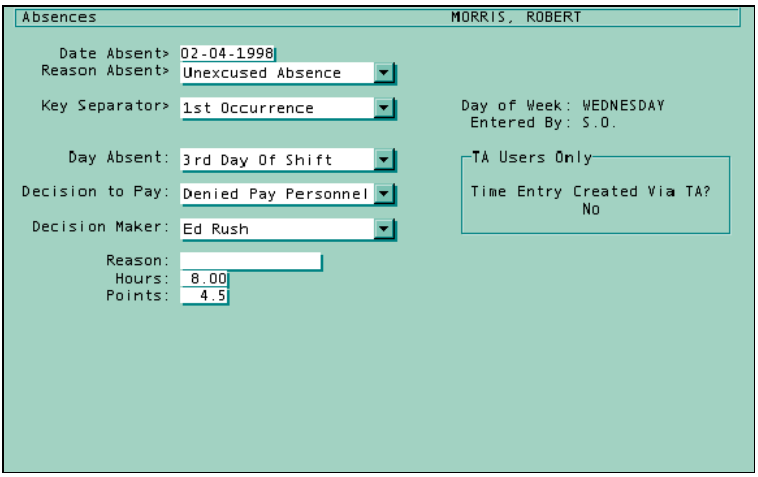
For practice, type '4.5'.

11. Click Save or press Enter

The absences information is now recorded.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



See also:

- Absences form (93-SCR ***(see "Absences form (93-SCR)" on page 170))***
For an explanation of how this form is used.

Recording unauthorized time off

To record unauthorized time off, follow these steps:

1. Access the Unauthorized Time-Off Hours Taken form (93USCR)

The Unauthorized Time-Off Hours Taken form (93USCR) is used to accumulate the unauthorized hours an employee was absent from work and that typically are not considered paid time off. This form is recorded only when an unauthorized absence has been recorded on the Absences form (93-SCR) and you wish to add those hours to an appropriate category total for tracking, accumulation, and reporting purposes.

Access this form by making the following selection from the Navigator:

Component: Employee Resourcing
Process: Manage Employee Attendance
Task: Unauthorized Hours Taken

For practice, access the Unauthorized Time-Off Hours Taken form (93USCR) for employee 1005.

2. Enter the Year-end Date

Enter the date of the last day of the year during which unexcused time accumulated. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '12-31-1998' (US and Canada) or '31-12-1998' (elsewhere).

3. Enter the As-of Date

Enter the date through which unexcused hours have been accumulated. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '02-04-1998' (US and Canada) or '04-02-1998' (elsewhere).

4. Enter the Left Early (hours)

Enter the accumulated number of hours that the employee left early this year. This is a numeric text box containing 4 digits and 1 decimal position. For example, 12.5 hours would be entered as '12.5', '1250', or 12.50'.

For practice, leave this text box blank.

5. Enter the Tardy (hours)

Enter the accumulated number of hours that the employee was tardy this year. This is a numeric text box containing 4 digits and 1 decimal position. For example, 12.5 hours would be entered as '12.5', '1250', or 12.50'.

For practice, type leave this text box blank.

6. Enter the Unexcused Absence (hours)

Enter the accumulated number of unexcused hours that the employee was absent this year. This is a numeric text box containing 4 digits and 1 decimal position. For example, 12.5 hours would be entered as '12.5', '1250', or 12.50'.

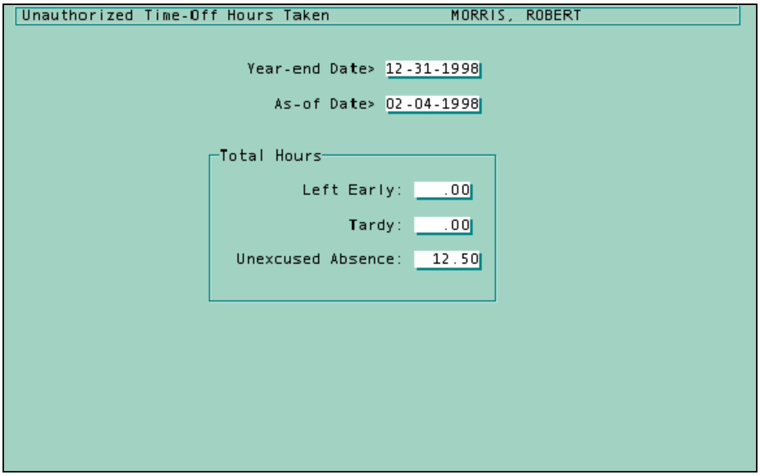
For practice, type '12.50'.

7. Click Save or press Enter

The Unauthorized Time-Off Hours Taken form (93USCR) is now recorded.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



See also:

- Unauthorized Time-Off Hours Taken form (93USCR) ***(on page 173)***

For an explanation of how this form is used.

Viewing employee absences

To view employee absences in Display mode, follow these steps:

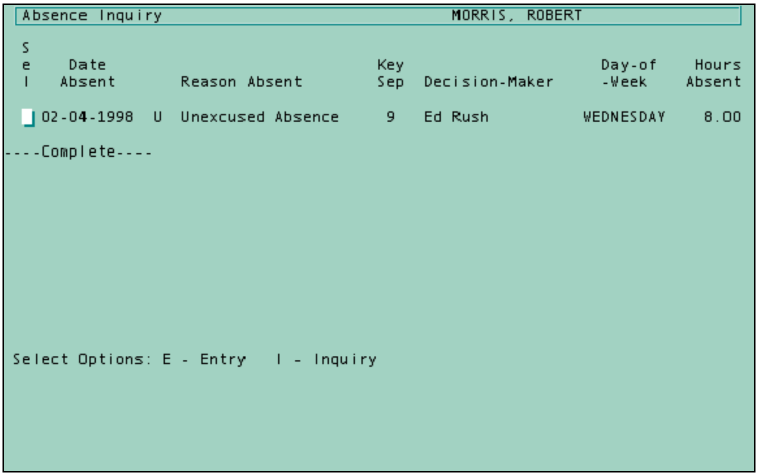
1. Access the Absence Inquiry form (93ISCR)

Access this form by making the following selection from the Navigator:

Component:	Employee Resourcing
Process:	Manage Employee Attendance
Task:	View Absences

For practice, access the Absence Inquiry form (93ISCR) for employee 1005.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



2. Enter the Sel(ection)

Enter 'E' for Entry or 'I' for Display mode for the absence you want to view in the Selection text box. The Entry option displays the Absences form (93-SCR) for the absence. The Display option displays an Absence detail form panel that lists the absence information in Display mode.

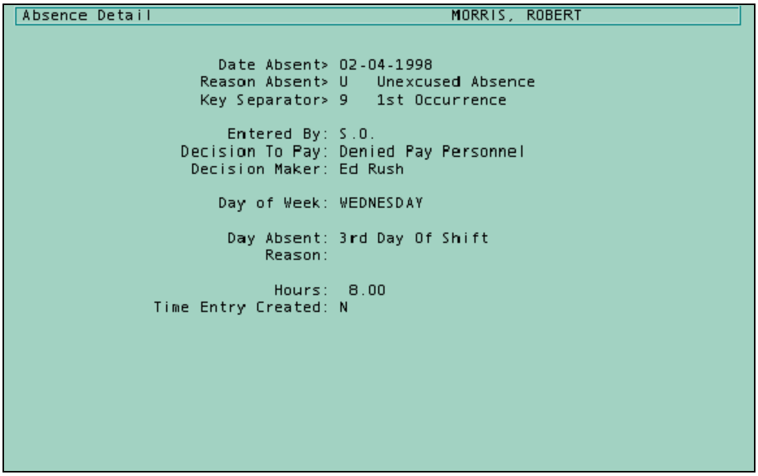
For practice, type 'I'.

3. Click Save or press Enter

The appropriate form panel is displayed according to your entry in the Selection text box.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



Absence Detail MORRIS, ROBERT

Date Absent> 02-04-1998
Reason Absent> U Unexcused Absence
Key Separator> 9 1st Occurrence

Entered By: S.O.
Decision To Pay: Denied Pay Personnel
Decision Maker: Ed Rush

Day of Week: WEDNESDAY

Day Absent: 3rd Day Of Shift
Reason:

Hours: 8.00
Time Entry Created: N

See also:

- Absence Inquiry form (93ISCR ***(see "Absence Inquiry form (93ISCR)" on page 173))***

For an explanation of how this form is used.

Viewing employee absences by type

To view employee absences by type, follow these steps:

1. Access the Absence Inquiry By Type form (93TSCR)

Access this form by making the following selection from the Navigator:

Component:	Employee Resourcing
Process:	Manage Employee Attendance
Task:	View Absences by Type

For practice, access the Absence Inquiry By Type form (93TSCR) for employee 1005.

2. Select the Absence Type

Select the type of absence you want to view.

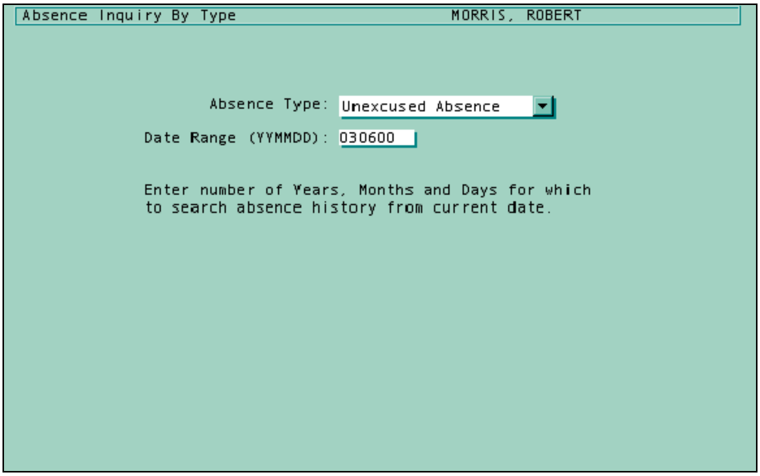
For practice, select 'Unexcused Absence'.

3. Enter a Date Range (optional)

Enter the number of years, months, and days in YYMMDD format to search for absence history from the current date. For example, an entry of '010300' is one year and three months from the current date.

For practice, type a range that indicates 3.5 years, '030600'.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



Absence Inquiry By Type MORRIS, ROBERT

Absence Type: Unexcused Absence

Date Range (YYMMDD): 030600

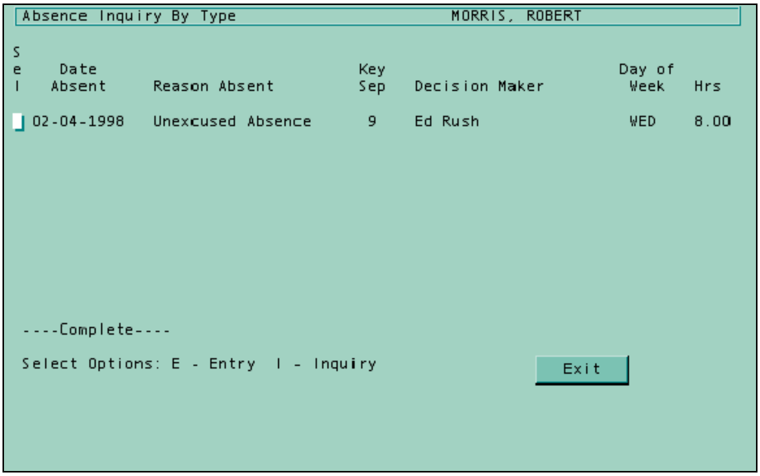
Enter number of Years, Months and Days for which
to search absence history from current date.

4. Click Save or press Enter

The absence records for the type you specified are displayed. You can now access the absence records using the same method as used on the Absence Inquiry form (93ISCR).

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



Absence Inquiry By Type MORRIS, ROBERT

Sel	Date Absent	Reason Absent	Key Sep	Decision Maker	Day of Week	Hrs
	02-04-1998	Unexcused Absence	9	Ed Rush	WED	8.00

----Complete----

Select Options: E - Entry I - Inquiry

Exit

Note: *Click Exit to return to the first form panel.*

See also:

- Absence types ***(on page 175)***

For an explanation of how this form is used.

Viewing employee absences by points

To view employee absences by points, follow these steps:

1. **Access the Absence Points form (93PSCR)**

   This form is used to view absence history (including points, if assigned), starting with the most recent occurrence. Pressing Enter on this form allows you to page through absence history to the earliest occurrence as specified in the Date Range text box. Only part of each record is displayed, but you may select one or more records for a more detailed view by typing 'E' (entry) or 'I' (display) in the appropriate Sel(ection) text boxes.

   Access this form by making the following selection from the Navigator:

   Component: Employee Resourcing
   Process: Manage Employee Attendance
   Task: View Absences with Points

   For practice, access the Absence Points form (93PSCR) for employee 1005.

2. **Enter a Date Range**

   Enter the number of years, months, and days in YYMMDD format to search for absence history from the current date. For example, an entry of '010300' is one year and three months from the current date and '000100' is one month from the current date.

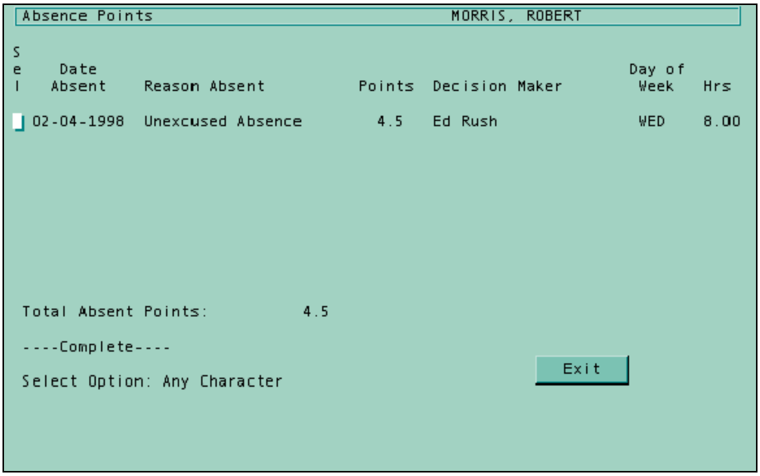
   For practice, type '030600' for 3.5 years.

3. **Click Save or press Enter**

   The absence points for the date range you specified are displayed. You can now access the absence records using the same method as used on the Absence Inquiry form (93ISCR).

   For practice, click Save or press Enter.

   If you completed the Guided Practice, the resulting form should look similar to the example that follows:



Absence Points MORRIS, ROBERT

Sel	Date Absent	Reason Absent	Points	Decision Maker	Day of Week	Hrs
	02-04-1998	Unexcused Absence	4.5	Ed Rush	WED	8.00

Total Absent Points: 4.5

----Complete----

Select Option: Any Character

Exit

Note: *Click Exit to return to the first form panel.*

For an explanation of how this form is used.

Setting up time away request routing

When an employee submits an online request for time away, Interactive Manager can route the request to the employee's manager and/or to the HR department. Using the work flow Routing Control Table form (T93SCR) you determine where you want the request routed. You can set a different approval routing for each of the request types that appear in the drop down option list. The number in the sequence field tells Interactive Workforce the order in which you want the request routed.

Follow these steps to set up a time away work flow routing.

1. Access the work flow routing control table form (T93SCR)

Access this form by making the following selections from the Navigator:

Component: Employee Resourcing
Process: Manage Employee Attendance
Task: Time Away Workflow

For practice, access the Workflow routing control table form (T93SCR).

2. Select a Request Type

From the drop down list, select a Request Type for which you want to set a workflow routing.

For practice, select Vacation Regular.

3. Enter the Sequence Number

Enter 1 for the Sequence Number if:

- this request type will be routed only to one destination
- this is the first destination to which this request type will be routed

Enter 2 for the Sequence Number if this is the second destination to which this request type will be routed.

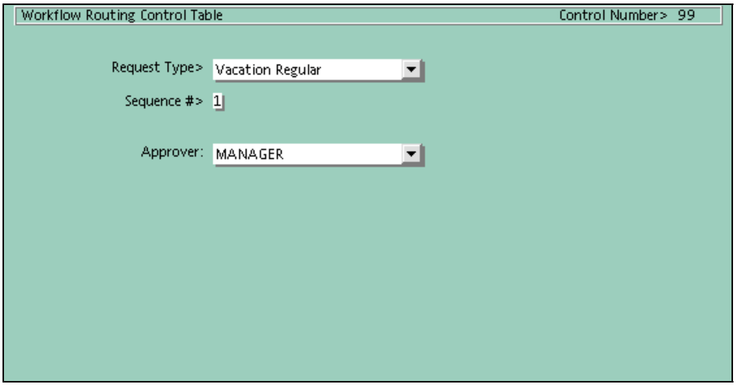
For practice, enter 1.

4. Select the Approver

From the drop down list, select Manager or HR.

For practice, select Manager.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



5. Click Save or press Enter

The system saves your routing destinations for the request type.

For practice, press Enter.

Approving/denying time away requests by HR

If you configured a time away request completed online in Interactive Manager to be approved by the HR department, HR users access the HR-Approve/Deny Requests form (93MSCR) to approve or deny the request. Follow these steps to approve a time away request.

1. Access the HR-Approve/Deny Requests form (93MSCR)

Access this form by making the following selections from the Navigator:

Component: Employee Resourcing
Process: Manage Employee Attendance
Task: Time Away HR Approval

For practice, access the HR-Approve/Deny Requests form (93MSCR).

2. Select a time away request

Select, from the message area of the form, the time away request to which you want to respond.

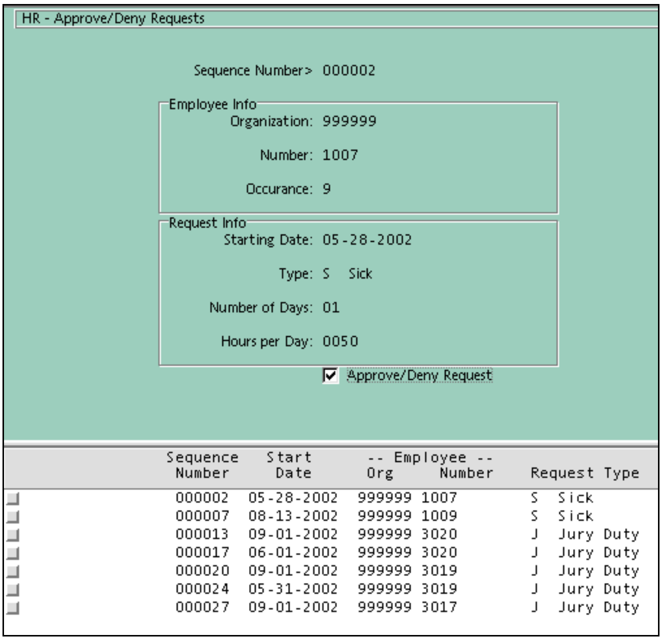
For practice, select the first record from the records displayed.

3. Check the Approve/Deny Request checkbox

Click the Approve/Deny Request checkbox, and click Save or press Enter.

For practice, place a check in the checkbox, and press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



HR - Approve/Deny Requests

Sequence Number> 000002

Employee Info
Organization: 999999
Number: 1007
Occurance: 9

Request Info
Starting Date: 05-28-2002
Type: S Sick
Number of Days: 01
Hours per Day: 0050

☑ Approve/Deny Request

Sequence Number	Start Date	-- Employee -- Org	Number	Request Type
000002	05-28-2002	999999	1007	S Sick
000007	08-13-2002	999999	1009	S Sick
000013	09-01-2002	999999	3020	J Jury Duty
000017	06-01-2002	999999	3020	J Jury Duty
000020	09-01-2002	999999	3019	J Jury Duty
000024	05-31-2002	999999	3019	J Jury Duty
000027	09-01-2002	999999	3017	J Jury Duty

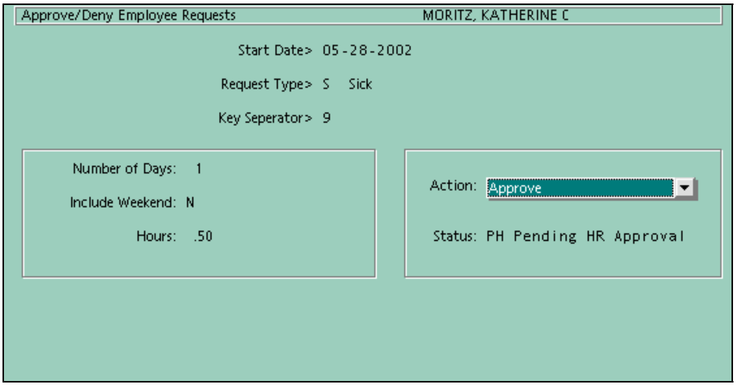
The system displays the Approve/Deny Employee Requests form (93RSCR).

4. Select an Action

From the drop down list on the Approve/Deny Employee Requests form (93RSCR) select Approve or Deny.

For practice, select Approve.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



5. Click Save or press Enter

The system saves your response and routes the time away request to the next destination in the routing work flow. If no other routing is required, the system returns the request to the employee's In box.

For practice, press Enter.

Approving/denying time away requests by the systems administrator

The system administrator has access to all pending time away requests and can approve or deny the request. If a manager and/or the HR representative is unexpectedly not available to respond to a request that requires an immediate response, the system administrator can access and respond to the request.

1. Access the System Administrator - Approve/Deny Requests form (93WSCR)

Access this form by making the following selections from the Navigator:

Component: Employee Resourcing
Process: Manage Employee Attendance
Task: In box Maintenance

For practice, access the System Administrator - Approve/Deny Requests form (93WSCR).

2. Select a manager or employee

Select, from the drop down list, manager or employee to view a manager's or employee's pending time away requests.

For practice, select the first record from the records displayed.

3. Enter the manager's or employee's organization (control 1-2)

In the Organization text box enter the organization (control 1-2) of the employee or manager.

For practice, select Manager.

4. Enter the ID number of the employee or manager

In the Number text box enter the ID of the employee or manager.

If you selected employee, continue to Step 5.

If you selected manager, the system displays the Direct Report - Approve/Deny Requests form (93NSCR). Go to Step 6.

For practice, enter .

If you completed the Guided Practice, the resulting form should look similar to the example that follows:

5. Check the Approve/Deny Request box

The system displays the time away request information. Check Approve/Deny Request and press Enter or Click Save. The system displays the Approve/Deny Employee Requests form (93RSCR).

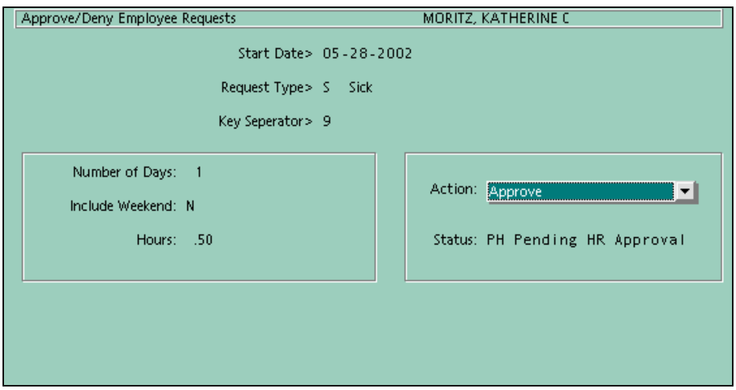
For practice, check the Approve/Deny Request and press Enter.

6. Select an Action.

From the drop down list on the Approve/Deny Employee Requests form (93RSCR) select Approve or Deny.

For practice, select Approve.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



7. Click Save or press Enter

The system saves your response and routes the time away request to the next destination in the routing work flow. If no other routing is required, the system send the request to the employee's In box.

For practice, press Enter.

Extended Practice

Note: You must have completed the Extended Practices in the prior sections to guarantee the successful completion of the Extended Practice that follows.

1. Record some authorized time-off remaining hours for yourself, the new employee in the '999999' organization you set up in the last section. Use the last day of the current year as your year-end date and first day of the year as the as of date. Enter the following hour amounts:

   - Vacation 96.00
   - Sick 40.00
   - Holiday 64.00
   - Personal 16.00
   - Family Funeral 16.00

2. You used one of your personal days on January 30 and were sick on February 17. You properly notified your manager, Bill Ryder, according to company policy. Record each of these paid absences (8.00 hours per day) on the appropriate form. Your company does not use absence point values.

3. Use the Absence Inquiry to view, in Display mode, the detail for each of the absences you just recorded.

Review of Questions Answered

1. What needs to be considered when managing employee attendance effectively?

2. What functionality is available to manage employee attendance?

3. What are absence types and absence points and how are they used?

4. How are annual paid absence entitlements used?

CHAPTER 6

Processing Terminations, Leaves and Returns, and Other Major Activities

In This Chapter

Introduction

Employment status can be affected by a number of major activities that include changes in full- or part-time status, leaves of absence, returns from leave, and separation or termination from employment because of retirement, resignation, dismissal, or death. Major activities and status changes are dated so you can track a history of these events for each of your employees. This section focuses on how to enter major activities into the system to prompt the appropriate employee-status changes.

Tasks

This section explains the following:

- Processing terminations and retirements
- Recording exit interview details
- Performing termination reviews
- Processing leaves
- Processing returns from leaves of absence
- Recording status changes
- Viewing employee status history

Prerequisites

Before you can process separations, terminations, or any other major activities, the following must be established:

- Companies (organizations)
- Employees

☞ *Refer to* **Recruiting and Selecting Employees** *(on page 33) and* **Hiring, Rehiring, Reinstating, Recalling, or Transferring an Employee** *(on page 83) for more information.*

Questions answered

The following questions are answered in this section:

1. What types of employee status changes are typically used in an organization?
2. How are activities and employee statuses used in the system?
3. What are the payroll implications of employee status changes?
4. What are the benefits implications of employee status changes?
5. What are the Position Administration implications of employee status changes?

Managing employment changes

A variety of changes in the relationship between an individual employee and your organization can affect the employee's 'status' or relationship with the organization. Those changes can be brought about by such major activities as these:

- Change in part-time or full-time work status
- Change in permanent, temporary, or seasonal employment classification
- Leaves of absence (short- or long-term disability leave, sabbatical leave, family leave, military leave, disciplinary leaves or suspensions, bereavement leaves, jury leave, or simple leaves of absence requested by the employee)
- Returns from leave
- Separation from employment because of retirement, resignation, dismissal, or death

For each type of employee status change, regulatory requirements and your organization's own policies will dictate the specific actions or processes that must be completed.

Important issues that need to be considered in the case of any change in an employee's status include changes to the employee's:

- Compensation
- Seniority
- Benefit entitlements (vacation and sick-leave benefits as well as insurance benefits and company property or other perks)
- Job location
- Service dates
- Eligibility for future or continued employment

Generally, for any type of change in employee status, you will probably complete at least these steps:

1. Record all pertinent information about the major activity and status change.
2. Complete necessary documentation and communication to other functions (such as payroll administration or outside regulatory agencies).

In addition, your organization may choose to complete one additional step:

3. Generate status-change reports and analyze trends.

Generating reports and analyzing trends in employee status changes on a departmental or organizational level is particularly helpful in managing leaves, turnover, work coverage, and attrition. Gathering and recording complete information at the time a leave, separation, or other activity occurs is critical to producing useful reports for performing statistical analysis about change in your organization and managing that change.

The following suggested process may help you manage status changes, leaves, and separations effectively:

Consider relevant issues and plan accordingly

As soon as you become aware of an employee status change and the cause of the change, whether it be a separation, a leave, or just a job transfer, plan for such issues as legal implications of the change, separation and relocation counseling, payroll changes, company property recovery, benefits entitlements, completion of necessary documentation, and possible necessary communication to the employee's co-workers or to customers and suppliers. In addition, particularly in the case of separations or extended leaves, schedule exit interviews and exit appraisals, and consider determination of rehire or return-to-work eligibility.

Recover company property

Initiate appropriate action to recover company property that has been assigned to the employee. Although the need for this action is obvious in the case of separations, you may also need to recover company property from employees who are changing from full-time work to part-time (or vice versa), who are transferring from one job or location to another, or who are beginning some form of a leave of absence. Of course, the nature of the company property and the nature of the change in employee status will determine what action is necessary in each instance.

☞ *Refer to* **Allocating Property to and Recovering Property from Employees** *(on page 401) for more information about recovering company property.*

Conduct an exit interview

Much like recovering company property (which is often done in conjunction with an exit interview), the need and reason for conducting an exit interview is obvious in the case of separations; it is to the benefit of your organization to know the reasons why an employee left. An 'exit' interview may also be useful and appropriate in the case of leaves (particularly long-term leaves).

Record major activity and status-change information

Make a timely and complete record of all pertinent information concerning the employee's major activity and change of status: cause, date, new status, rehire or return-to-work eligibility, exit interview or appraisal results, benefits continuation eligibility, and so forth. The system will be a valuable resource to you as you record this key information.

Notify others

Notify your payroll department and benefits administrator of all adjustments brought about by the major activity and status change. In the case of employees who walk off the job or who are dismissed for cause, you should make such notification immediately. Depending on the nature of each job change, you may also need to notify other employees with whom the employee worked or will work, your organization's security officers, other department managers, and regulatory agencies.

Analyze employee status changes

Generate and then analyze reports of the various types of status changes taking place in your organization, using the information you record whenever someone leaves your organization or makes other changes in their employee status. The system provides specific reports to help you, such as the Job Change Activity report (3A-RPT), the Separation Analysis by Reason/Service report (1P-RPT), and the Termination report (3X-RPT). That information will help you analyze future attrition, analyze the business impact of the employee status changes, and look for patterns:

- Look for reasons why people leave your organization.
- Determine how long entry-level employees remain in their initial job assignments until they are ready for promotion.
- See which departments, locations, or work environments have the highest turnover because of transfers or separations.
- Analyze how rapidly attrition is occurring in your organization or in particular departments or locations because of retirement.
- Identify high turnover among newer employees (possibly indicating 'induction crisis').
- Identify high numbers of people at a particular job grade (possibly indicating the need for employee development or compensation review).
- Anticipate future high turnover among newer employees because of low turnover at senior levels.
- Identify extremely low turnover (perhaps indicating a need for new blood, new ideas, and increased creativity in the organization).

With status-change information properly gathered, recorded, reported, and analyzed, your organization can conduct effective workforce planning by taking corrective, preventative, and strategic action as appropriate.

As with many other fundamental human resource management functions, the key to managing employee status changes, leaves and returns, and separations/terminations is workforce tracking: information gathering, reporting, and analysis. The system is designed to help you accomplish these important functions efficiently.

Understanding major activities and employee statuses

Using the system, you are able to track the major activities and status changes that affect your employees. Activities can include leaves, returns, separations, or terminations. These activities in turn cause changes to an employees status. Often, a status change requires you to perform minor activities such as changes in salary, location, job title, and so forth.

Several forms are used to record employee major activities and status changes. Each of these forms deals with a specific type of activity. It is good practice to only enter one major activity for a single date.

Form Name	**Purpose**
Leaves And Returns (95-SCR)	Records various types of leaves (both paid and unpaid) and returns from those leaves.
Status Changes (08-SCR)	Records activities that result in an employee's status remaining active, such as: transfers, conversions, file additions, changes from full-time to part-time status or vice versa, and adjustments to benefit service dates.
Separations And Terminations (96-SCR)	Records employee separations and terminations that would change the employee's status from active to inactive, such as voluntary or involuntary terminations, retirement, deaths and layoffs.
Employee Status History (09-SCR)	Displays each major activity and the resulting status for an employee.

Note: The New Hire form (01-SCR) and the Rehire/Reinstatement/Recall form (04-SCR) are also used to record major activities. These forms are covered in Hiring, Rehiring, Reinstating, Recalling, or Transferring an Employee.

Apply the Concept
How do *major activities* affect changes in *employee status*?

Activity And Resulting Employee Status Rules form (TF-SCR)

The valid activities and resulting employee statuses for each of the major activity forms are set up on the Activity And Resulting Employee Status Rules form (TF-SCR). This form checks if an activity can be processed for an employee based on the employee's current status. Ten pairs of status ranges can be entered on this form. A new, resulting employee status is then defined for this activity/status relationship. If the activity/status relationship is not valid on this form, the activity form will reject and a message is displayed that the activity is not allowed for the current employee status.

You can set up a range of valid statuses for each activity. This should be done for all of your valid employee statuses prior to entering activity forms for your employees. Activities are set up in the Activity Codes option list (HR09) and employee statuses are set up in the Employee Status option list (HR10).

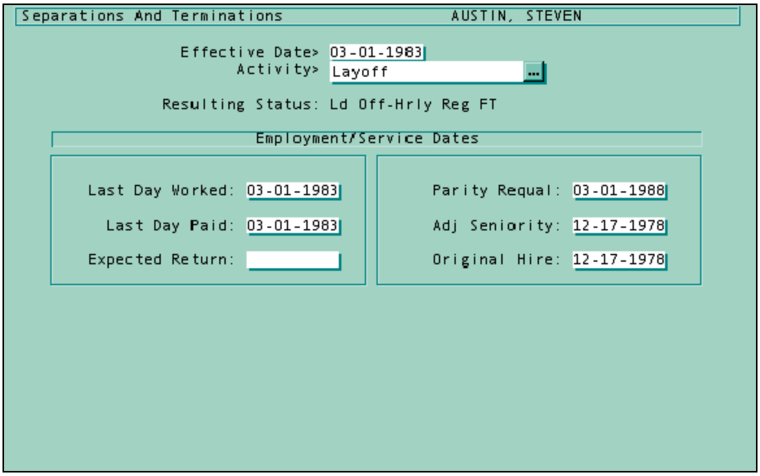
Major activity forms

The chart that follows summarizes which forms to use for each of the major activities. Each form allows a specific range of activities.

Form	Activities allowed
Separations And Terminations (96-SCR)	Death Involuntary termination Layoff Retirement Voluntary termination
Leaves And Returns (95-SCR)	Beginning disability (long-term disability) Beginning family leave with pay Beginning family leave without pay Beginning leave of absence with pay Beginning leave of absence without pay Return from disability (long-term disability) Return from leave of absence, paid and unpaid
Status Changes (08-SCR)	Adjustment to benefits service dates Beginning of labor dispute/labor walkout Changes in status (such as full-time to part-time) File conversions and file adds Transfers between organizations

Separations And Terminations form (96-SCR)

Use this form to enter activities that result in an inactive status for the employee. Such activities include death, termination, retirement, and layoff as shown on the following form:



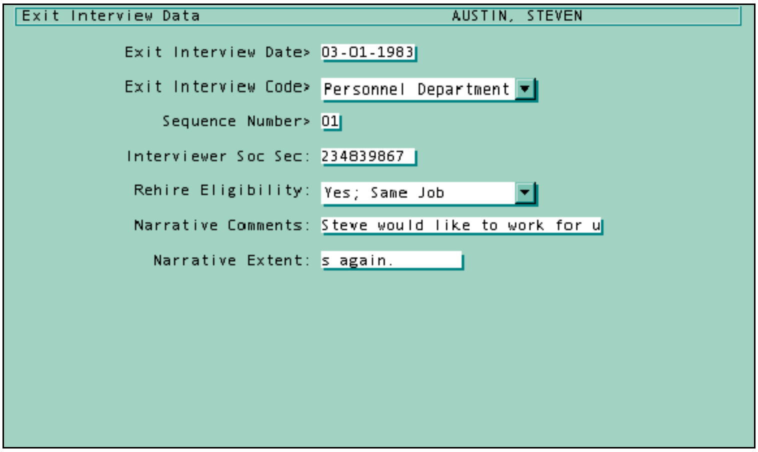
Entering an Activity Date with a termination Activity here updates the Termination date text box on the Employee Information form (EF-SCR).

If you leave the Last Day Worked and Last Day Paid text boxes blank, these text boxes default to the Effective Date. If pay is continuing for a period of time following the separation (such as for severance pay), enter the last day for which pay will be received in the Last Day Paid text box. If this is a layoff activity, use the Expected Return text box to record the anticipated date the employee is expected to return to work. Otherwise, leave this text box blank. The Parity Requal(ification) date is calculated by the system and is defined by ERISA (US only) as the date by which a separated employee or an employee on a leave of absence must return to work to prevent incurring a break-in-service. The Adjusted Seniority and Original Hire dates default from the Activity Date on the prior segment, which may or may not be a new hire.

When an employee is separated or terminated using the Separations And Terminations form (96-SCR) the employee is automatically unassigned from all positions on the Incumbency - Basic Details form (M40SCR) in Position Administration. A message is displayed notifying you of this.

Exit Interview Data form (97-SCR)

Use this form to record exit interview data for an employee who is separating from your organization:



In addition to the date of the exit interview, you can record the relationship of the interviewer (such as the Personnel Department) to the separating employee in the Exit Interview Code text box. The Social Security Number or other identifier of the interviewer can be recorded as can the interviewer's decision on whether the separating employee is eligible to be rehired.

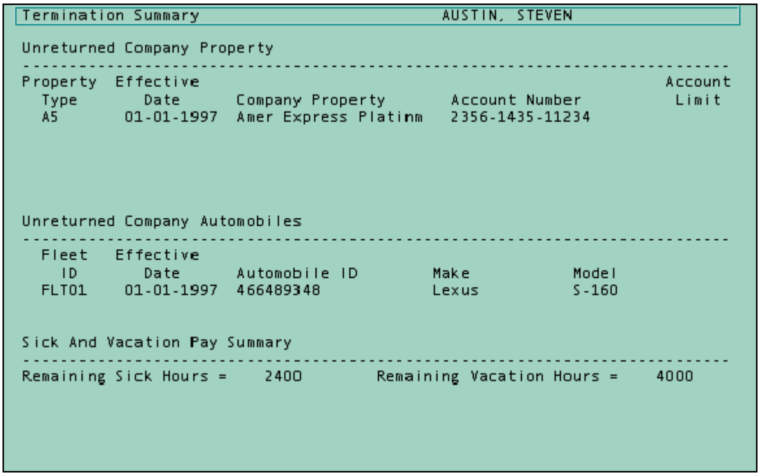
Text boxes are also provided here for narrative comments that come up during the exit interview. A Sequence Number text box is included to allow for multiple narrative comment entries. For example, the first narrative comment is entered with a sequence number of '01', the second with '02', and so forth. The other text boxes on the form can remain the same.

Note: *The Exit Interview Narrative form (97ISCR) can be used to view the exit interview data in Display mode.*

Termination Summary form (96RSCR)

Use this form to produce a display summary of the company property and vehicles assigned to the terminating employee that have not been returned to the company. Additionally, any remaining sick and vacation hours are displayed if you change the program source code using the EDIT Utility form (EDIT) to define the HED numbers used for sick and vacation pay.

The sick and vacation pay summary information comes from the HED Amount One hours for vacation and sick time on the Employee Earnings And Deductions form (HH-SCR):



```
Termination Summary                                AUSTIN, STEVEN

Unreturned Company Property
---------------------------------------------------------------------------
Property  Effective                                                 Account

Sick And Vacation Pay Summary
---------------------------------------------------------------------------
Remaining Sick Hours =    2400       Remaining Vacation Hours =    4000
```

Company property is assigned to employees using the Company Personal Property form (22-SCR) and company automobiles are assigned on the Automobile Information form (24-SCR).

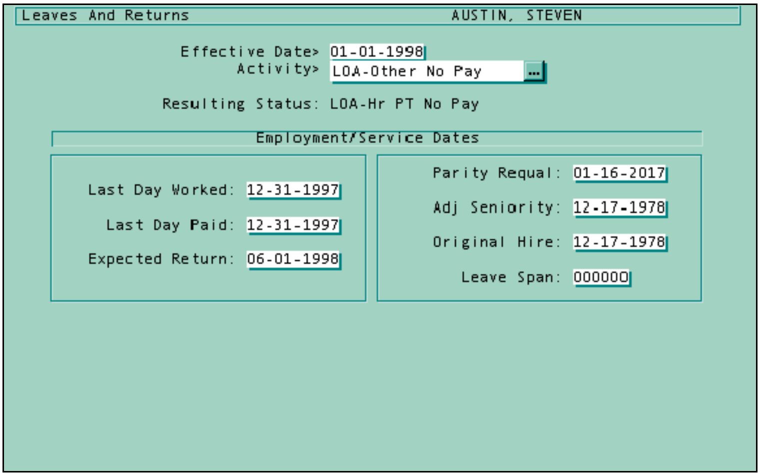
Use the Separations: Recovery Of Company Property form (99-SCR) and the Separations: Recovery Of Automobiles form (98-SCR) to recover the company property and automobiles when the employee is terminated.

☞ *Refer to* **Allocating Property to and Recovering Property from Employees** *(on page 401) for more information.*

Leaves And Returns form (95-SCR)

Use this form to record regular, family, and disability leaves (inactive status) and the subsequent return to active status. The resulting statuses are generated by the entries on the Activity And Resulting Employee Status Rules form (TF-SCR).

When an employee returns from a leave of absence, record that activity on this form. Once completed, the form will display the employee's new active status and calculate the leave span:



Form processing

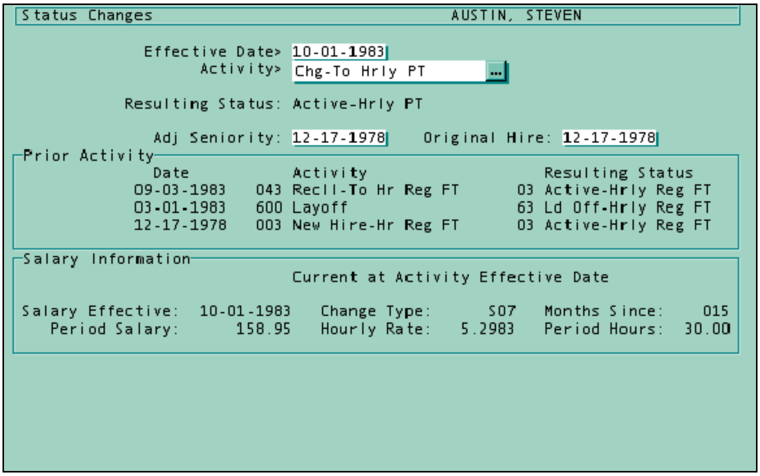
If you leave the Last Day Worked and Last Day Paid text boxes blank, these text boxes default to the Activity Date. Typically, however, the Last Day Worked will be at least one day prior to the Activity Date if pay is continuing during a leave, so the last day for which pay will be received can be recorded in the Last Day Paid text box. For unpaid leaves, the Last Day Worked and Last Day Paid text boxes are usually the same. The Expected Return date is required unless you are entering a permanent leave activity. The Parity Requal(ification) Date text box is calculated by the system and is defined by ERISA (US only) as the date by which a separated employee or an employee on a leave of absence must return to work to prevent incurring a break-in-service. The Adjusted Seniority and Original Hire dates default from the Activity Date on the prior segment, which may or may not be a new hire. The Leave Span (in months, days, and years) is the amount of time between the separation Activity Date and the return Activity Date.

Apply the Concept

What is the difference between a *leave of absence* and a *retirement*?

Status Changes form (08-SCR)

Use this form to record activities that result in an employee remaining in active status, such as when an employee moves from full-time to part-time status, changes from hourly to salaried status, or to record an employee's transfer-in activity from another organization:



Status Changes AUSTIN, STEVEN

Effective Date> 10-01-1983
Activity> Chg-To Hrly PT

Resulting Status: Active-Hrly PT

Adj Seniority: 12-17-1978 Original Hire: 12-17-1978

Prior Activity

Date		Activity		Resulting Status
09-03-1983	043	Recll-To Hr Reg FT	03	Active-Hrly Reg FT
03-01-1983	600	Layoff	63	Ld Off-Hrly Reg FT
12-17-1978	003	New Hire-Hr Reg FT	03	Active-Hrly Reg FT

Salary Information

Current at Activity Effective Date

Salary Effective: 10-01-1983 Change Type: S07 Months Since: 015
Period Salary: 158.95 Hourly Rate: 5.2983 Period Hours: 30.00

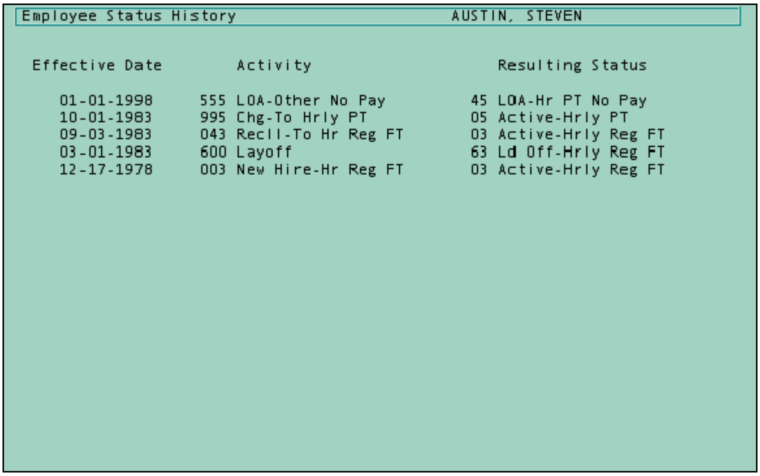
Form processing

After entering the Effective Date and Activity and pressing Enter, this form displays the three most recent major activities for the employee and the most recent salary change in Display mode. Employee salary changes as a result of status changes can not be made on this form, only on the Salary Assignment/Changes form (40-SCR).

You can change the Adj(usted) Seniority and/or the Original Hire dates here, if needed. This may be necessary if you have employees hired from a subsidiary and you want the New Hire form's Activity Date to reflect the date they began work with your organization, while the Original Hire date may remain the date they began at the subsidiary.

Employee Status History form (09-SCR)

This form provides a quick review of each major activity and the resulting status held on file for an employee:



Employee Status History AUSTIN, STEVEN

Effective Date	Activity	Resulting Status
01-01-1998	555 LOA-Other No Pay	45 LOA-Hr PT No Pay
10-01-1983	995 Chg-To Hrly PT	05 Active-Hrly PT
09-03-1983	043 Recll-To Hr Reg FT	03 Active-Hrly Reg FT
03-01-1983	600 Layoff	63 Ld Off-Hrly Reg FT
12-17-1978	003 New Hire-Hr Reg FT	03 Active-Hrly Reg FT

Payroll implications of status changes

Once you have performed a leave or termination activity, you can check if any holiday or sick payments are outstanding and calculate the final payment for payroll. The pay period in which the leave or termination process occurs will impact how the final payment is calculated. When an employee leaves or is terminated between payroll periods, payroll does not automatically prorate the final payroll and benefit payments. Some manual intervention is usually required to give an off-cycle payment or to prorate the normal period amount.

When you process a termination on the Separations And Terminations form (96-SCR), the termination date is automatically entered on the Employee Information form (EF-SCR) and automatic pay is turned off. Pay may still be produced for terminated employees using a time entry.

☞ *Refer to the Payroll Administration documentation for more information.*

Benefits implications of status changes

When an employee is separated or terminated from the organization, your benefits department should be alerted. Employees may lose their benefits coverage based on the benefit plan rules that have been established for your organization.

☞ *Refer to the Using Benefits Administration documentation for more information on methods that can be used to flag terminated employees.*

Position Administration system implications

Position Administration allows you to strategically manage the in-and-out flow to positions within your company.

In cases where you are terminating an employee, you need to be aware that when you unassign an employee in a single incumbency, he or she will be unassigned from the most recent position held. The system will automatically unassign employees who hold multiple incumbencies from all positions held.

☞ *Refer to the Using Position Administration documentation for more information.*

Status change reporting options

A number of reports are delivered that report on data related to employee major activities. The following reports are related to employee terminations, leaves, and returns:

- LOA/Disability Report (1T-RPT)—Lists all active employees who are currently on leave of absence or disability leave.
- Major Activity Listing (1U-RPT)—Lists all of the major activities that have occurred during a period of time.
- Separation Analysis (1O-RPT)—Provides you with an analysis of turnover activity within the organization. Monthly and cumulative statistics are provided for the number of separations and rate of turnover, as well as annual rate of turnover.
- Separation Analysis By Reason And Service (1P-RPT)—Provides an analysis of separations by reason and service on a monthly basis. Statistics for both current month and year-to-date are provided.
- Separation Detail Report (1S-RPT)—Lists all employees who have been separated from the organization within a one-month period.
- Termination Report (3X-RPT)—Lists all employees terminated from the organization.

☞ *Refer to the* **Report Quick Reference** *(on page 421) for samples of these reports and the parameters used to define these reports.*

Detailed Directions

This section provides detailed directions on completing a business task.

Tasks

Completing the Guided Practice

You must have completed the Guided Practice from the preceding sections to guarantee the successful completion of the Guided Practice that follows.

Processing terminations and retirements

To enter the information for processing terminations and retirements, follow these steps:

1. Access the Separations And Terminations form (96-SCR)

The Separations And Terminations form (96-SCR) is used to record activities that result in an inactive status. These activities include terminations, layoffs, retirements, and deaths.

Access this form by making the following selection from the Navigator:

Component: Employee Resourcing
Process: Managing Terminations, Leaves and Returns
Task: Terminate/Retire

For practice, access the Separations And Terminations form (96-SCR) for employee 1764, Steven W. Hancock. Mr. Hancock has decided to take another job.

Note: *If the previous termination activity displays, click on the Clear button on the toolbar to clear the text boxes on the form.*

2. Enter the Effective Date

Enter the date an employee's separation is effective. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '12-18-1997' (US and Canada) or '18-12-1997' (elsewhere).

3. Select the Activity

Select the specific activity that is occurring. This option list (HR09) should include all of the activities you want, but only activities that are terminations, retirements, deaths, or layoffs are allowed on this form.

For practice, select 'Term - Job Opportunity'.

4. Enter the Last Day Worked (optional)

Enter the last date the employee worked before leaving the organization. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere). This text box defaults to the Effective Date if no entry is made here.

For practice, leave this text box blank.

5. Enter the Last Day Paid (optional)

Enter the last date for which regular pay was received or will be received as a result of this activity. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere). This text box defaults to the Effective Date if no entry is made here. This text box is for informational purposes only.

For practice, leave this text box blank.

6. Enter the Expected Return (optional)

If this is a separation or layoff activity, enter the date the employee is expected to return; otherwise, leave this text box blank. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, leave this text box blank.

7. Enter the Parity Requal (optional)

This date represents the parity re-qualification date as defined by ERISA (US only). It is the date by which a separated employee or an employee on leave must return to prevent incurring a break in service. This text box will be automatically populated when you click Save or press Enter.

For practice, leave this text box blank.

8. Enter the Adj Seniority (optional)

This is the adjusted seniority date for an employee. This date is initially entered on the New Hire form (01-SCR) when the new hire activity is entered and is equal to the activity date. This text box will be automatically populated when you click Save or press Enter.

For practice, leave this text box blank.

9. Enter the Original Hire (optional)

This is the employee's original date of hire that was initially entered by the New Hire form (01-SCR). This text box will be automatically populated when you click Save or press Enter.

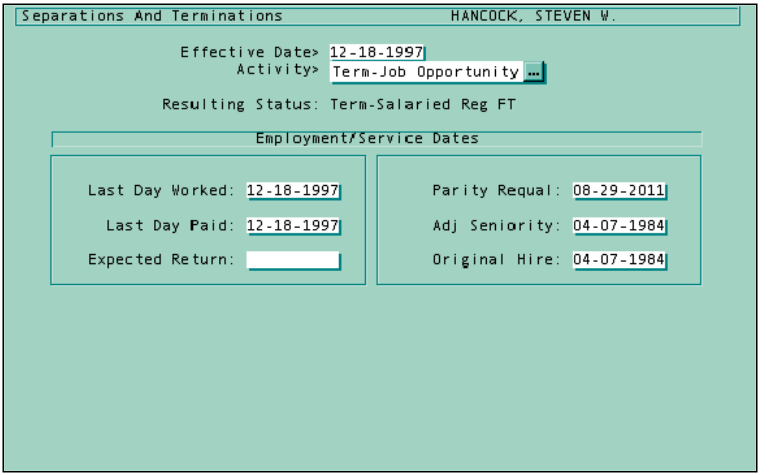
For practice, leave this text box blank.

10. Click Save or press Enter

The Separations And Terminations form (96-SCR) is now recorded.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



See also:

- Separations And Terminations form (96-SCR) ***(on page 212)***

For details on how to process this form.

Recording exit interview details

To enter the information from employee exit interviews, follow these steps:

1. Access the Exit Interview Data form (97-SCR)

Access this form by making the following selection from the Navigator:

Component:	Employee Resourcing
Process:	Managing Terminations, Leaves and Returns
Task:	Record Exit Interview Results

For practice, access the Exit Interview Data form (97-SCR) for employee 1764, Steven W. Hancock.

2. Enter the Exit Interview Date

Enter the date of the separating employee's exit interview. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '12-18-1997' (US and Canada) or '18-12-1997' (elsewhere).

3. Select the Exit Interview Code

Select an option to identify the relationship of the exit interviewer to the separating employee.

For practice, select 'Immediate Supervisor'.

4. Enter the Sequence Number

Type the sequence number as a value ranging between 01–99. This number is used to link multiple exit interview narrative comments.

For practice, type '01'.

5. Enter Interviewer Soc-Sec (optional)

Type the social security number, employee number, or other identifying scheme for the person responsible for conducting the exit interview.

For practice, type '529689988'.

6. Select the Rehire Eligibility (optional)

Select the rehire eligibility option that indicates the separating employee's rehire potential.

For practice, select 'Yes, same job'.

7. Enter the Narrative Comments (optional)

Type the interviewer's comments pertaining to the exit interview.

For practice, type 'Steve has a better opportunity'.

8. Enter the Narrative Extent (optional)

Type any additional comments the interviewer may have pertaining to the exit interview.

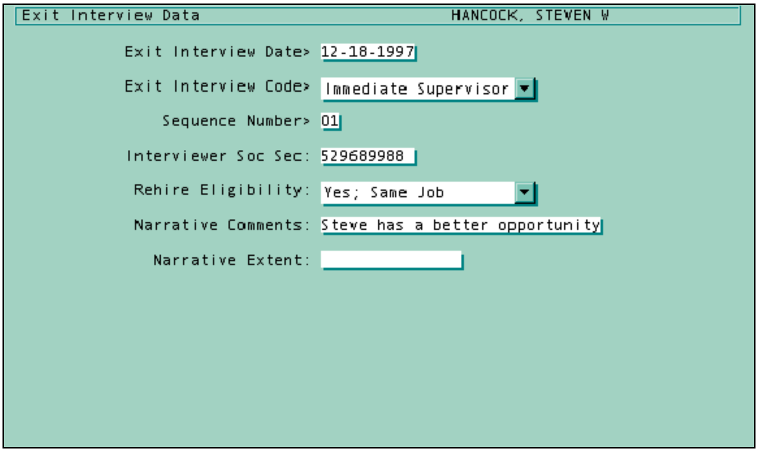
For practice, leave this text box blank.

9. Click Save or press Enter

The Record Exit Interview Results form (97-SCR) is now recorded.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



See also:

- Exit Interview Data form (97-SCR) ***(on page 213)***

For details on how to process this form.

Performing termination reviews

To perform a termination review, follow this step:

Access the Termination Summary form (96RSCR)

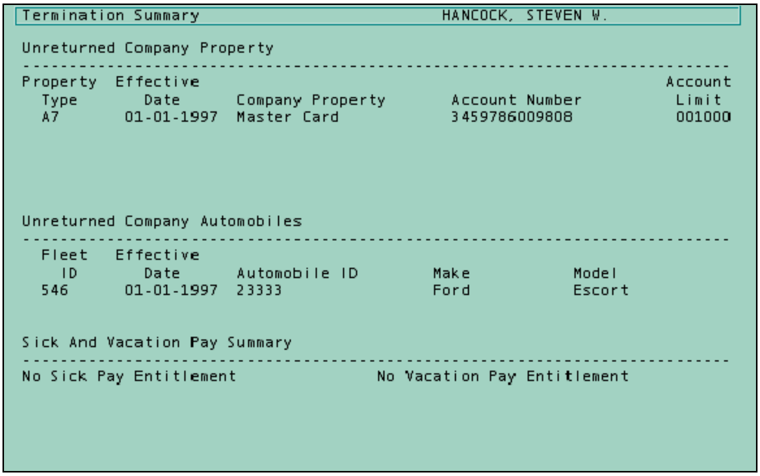
View the Termination Summary form (96RSCR) to see a display summary of company property and/or vehicles that were assigned to a terminated employee and must now be recovered.

Access this form by making the following selection from the Navigator:

Component:	Employee Resourcing
Process:	Managing Terminations, Leaves and Returns
Task:	Termination Review

For practice, access the Termination Summary form (96RSCR) for employee 1764.

The resulting form will look similar to the example that follows, provided company property and/or automobile information had been entered for this employee.



Termination Summary HANCOCK, STEVEN W.

Unreturned Company Property

Property Type	Effective Date	Company Property	Account Number	Account Limit
A7	01-01-1997	Master Card	3459786009808	001000

Unreturned Company Automobiles

Fleet ID	Effective Date	Automobile ID	Make	Model
546	01-01-1997	23333	Ford	Escort

Sick And Vacation Pay Summary

No Sick Pay Entitlement No Vacation Pay Entitlement

See also:

- Termination Summary form (96RSCR) ***(on page 213)***

For details on how to process this form.

Processing leaves

To process leaves of absence, follow these steps:

1. Access the Leaves And Returns form (95-SCR)

Note: *The Leaves And Returns form (95-SCR) is used to record major activities pertaining to a leave of absence or disability leave.*

Access this form by making the following selection from the Navigator:

Component: Employee Resourcing
Process: Managing Terminations, Leaves and Returns
Task: Leave/Return

For practice, access the Leaves And Returns form (95-SCR) for employee 1111, Jerry Jones. Mr. Jones has decided to take a temporary, unpaid leave of absence.

Note: *If the previous leave and return activity displays, click on the Clear button on the toolbar to clear the text boxes on the form.*

2. Enter Effective Date

Enter the date an employee's major activity is effective. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '11-07-1997' (US and Canada) or '07-11-1997' (elsewhere).

3. Select the Activity

Select the major activity that is occurring. This option list (HR09) should already include all of the activities needed by your organization, but only activities that are regular or long-term disability leaves of absence or returns of leaves of absence are allowed on this form.

For practice, select 'LOA-Other No Pay'.

4. Enter the Last Day Worked

Enter the last date the employee worked prior to the start of this leave activity. This is typically one day prior to the leave date. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '11-06-1997' (US and Canada) or '06-11-1997' (elsewhere).

5. Enter the Last Day Paid (optional)

Enter the last date for which regular pay was or will be received as a result of this activity. If left blank, this text box will be automatically populated when you click Save or press Enter. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, leave blank.

6. Enter the Expected Return

Enter the date the employee is expected to return. If you are processing a leave activity, you must provide a date. If the exact date of return is unknown, enter an estimated date and reevaluate it periodically. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

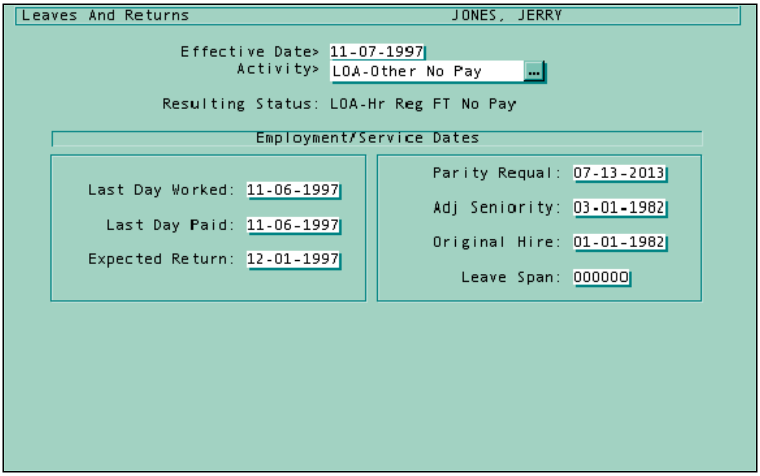
For practice, type '12-01-1997' (US and Canada) or '01-12-1997' (elsewhere).

7. Click Save or press Enter

The Leaves And Returns form (95-SCR) is now recorded.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



See also:

- Leaves And Returns form (95-SCR) ***(on page 214)***

For information on how to process this form for leaves of absence.

Processing returns from leaves of absence

To process returns, follow these steps:

1. Access the Leaves And Returns (95-SCR)

The Leaves And Returns form (95-SCR) is used to record major activities pertaining to a leave of absence or disability leave.

Access this form by making the following selection from the Navigator:

Component: Employee Resourcing
Process: Managing Terminations, Leaves and Returns
Task: Leave/Return

For practice, access the Leaves And Returns form (95-SCR) for employee 1111, Jerry Jones. You will process his return from his unpaid leave of absence.

2. Enter Effective Date

Enter the date an employee's major activity is effective. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '12-01-1997' (US and Canada) or '01-12-1997' (elsewhere).

3. Select the Activity

Select the major activity that is occurring. This option list (HR09) should already include all of the activities needed by your organization.

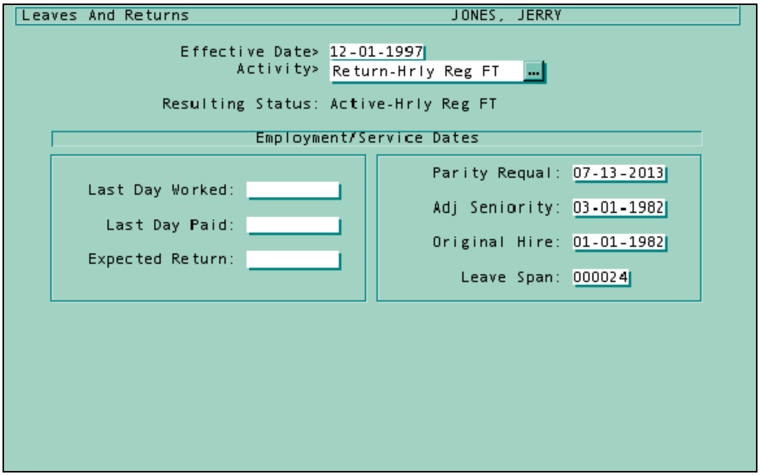
For practice, select 'Return-Hrly Reg FT'.

4. Click Save or press Enter

The Leaves And Returns form (95-SCR) is now recorded.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



Leaves And Returns JONES, JERRY

Effective Date> 12-01-1997
Activity> Return-Hrly Reg FT

Resulting Status: Active-Hrly Reg FT

Employment/Service Dates

Last Day Worked:
Last Day Paid:
Expected Return:

Parity Requal: 07-13-2013
Adj Seniority: 03-01-1982
Original Hire: 01-01-1982
Leave Span: 000024

See also:

- Leaves And Returns form (95-SCR) ***(on page 214)***

For information on how to process this form for returns from leaves of absence.

Recording status changes

To record employee status changes, follow these steps:

1. Access the Status Changes form (08-SCR)

The Status Changes form (08-SCR) is used to process an activity that changes an active employee's status (and the employee remains active). For example, you can change an employee from hourly to salaried, or part-time to full-time.

Access this form by making the following selection from the Navigator:

Component: Employee Resourcing
Process: Managing Terminations, Leaves and Returns
Task: Change Employee Status

For practice, access the Status Changes form (08-SCR) for employee 1111, Jerry Jones. You will change Mr. Jones' status from an hourly, regular full-time employee to a salaried, regular, full-time employee.

2. Enter the Effective Date

Enter the date an employee's major activity is effective. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '12-19-1997' (US and Canada) or '19-12-1997' (elsewhere).

3. Select the Activity

Select the major activity that is occurring. This option list (HR09) should already include all of the activities needed by your organization, but only activities that are transfers between organizations, beginning labor disputes, file conversions/file adds, and changes in status (where the employee remains active) are allowed on this form.

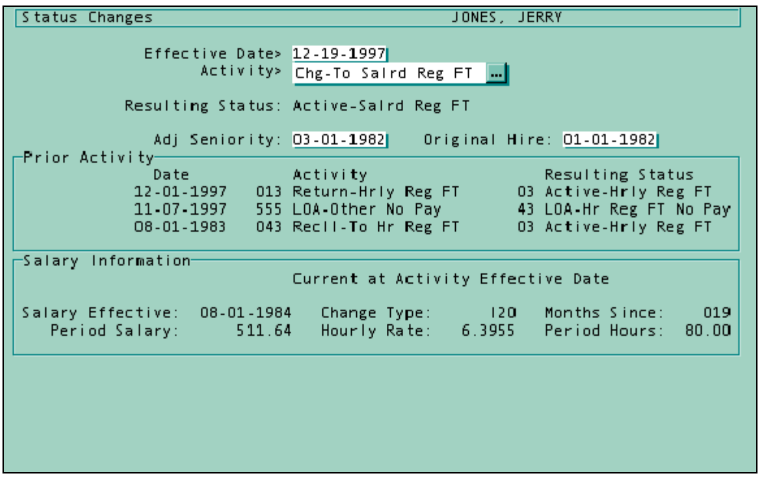
For practice, select 'Chg-To Salrd Reg FT'.

4. Click Save or press Enter

The Status Changes form (08-SCR) is now recorded.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



See also:

- Status Changes form (08-SCR) ***(on page 215)***

For details on how to process this form.

Viewing employee status change history

To view a history of employee status changes online, follow these steps:

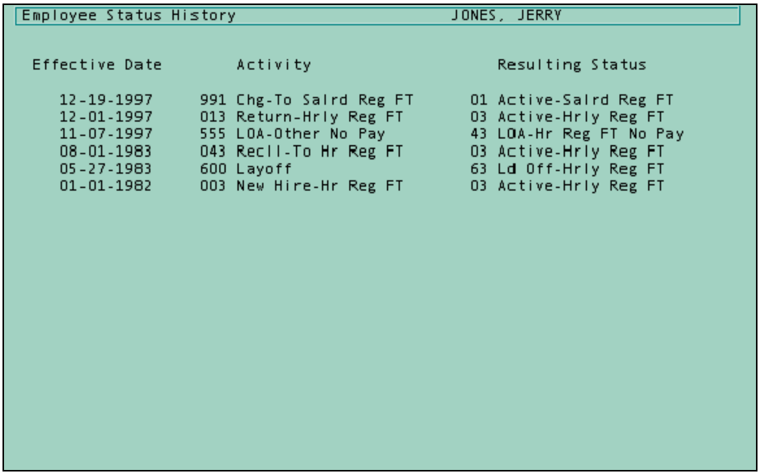
Access the Employee Status History form (09-SCR)

Access this form by making the following selection from the Navigator:

Component: Employee Resourcing
Process: Maintain Basic Employee Details
Task: View Historical Changes

For practice, access the Employee Status History form (09-SCR) for employee 1111, Jerry Jones.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



Employee Status History JONES, JERRY

Effective Date	Activity	Resulting Status
12-19-1997	991 Chg-To Salrd Reg FT	01 Active-Salrd Reg FT
12-01-1997	013 Return-Hrly Reg FT	03 Active-Hrly Reg FT
11-07-1997	555 LOA-Other No Pay	43 LOA-Hr Reg FT No Pay
08-01-1983	043 Recll-To Hr Reg FT	03 Active-Hrly Reg FT
05-27-1983	600 Layoff	63 Ld Off-Hrly Reg FT
01-01-1982	003 New Hire-Hr Reg FT	03 Active-Hrly Reg FT

See also:

- Employee Status History form (09-SCR) ***(on page 217)***

For details on how to process this form.

Extended Practice

Note: *You must have completed the Extended Practices in the prior sections to guarantee the successful completion of the Extended Practice that follows.*

1. Alexander Bloom, employee number 3001, found a better job opportunity and terminated his employment on February 27 of this year. He met with the personnel department for an exit interview on his last day of work. Enter Alexander's termination record as well as the following exit interview comments: 'Alexander had an offer he just could not refuse and we were unable to match salary. He is definitely eligible for rehire in the Accounting Department.'

Note: *You will need to use multiple sequence numbers to enter the narrative and you can view the entire exit interview narrative in Display mode on the Exit Interview Narrative form (97ISCR).*

2. Record a paid maternity leave that began April 1 of this year and will continue through May 15 for Brenda Reynolds. She worked up to the day prior to the start of her leave and will be paid through May 15. Brenda is expected to return to work on Monday, May 18.

3. Brenda Reynolds did return to work on her expected return date. Record her return from leave of absence. Her status will remain Salaried, Regular, Full-Time.

Review of Questions Answered

1. What types of employee status changes are typically used in an organization?

2. How are activities and employee statuses used in the system?

3. What are the payroll implications of employee status changes?

4. What are the benefits implications of employee status changes?

5. What are the Position Administration implications of employee status changes?

PART 3

Employee Development

In This Section

CHAPTER 7

Tracking Employee Skills,Competencies, and Training

In This Chapter

Introduction

Employee development focuses on the qualitative characteristics of your organization's employees or employee abilities. This section focuses on how to record and track key information about employee abilities, including formal training and education, tuition costs, certificates, and licenses.

Tasks

This section explains the following:

- Recording completed and ongoing formal education information
- Tracking training scheduled and/or taken
- Tracking tuition costs
- Recording skills and competencies
- Tracking certificates, licenses, and permits
- Tracking professional association memberships
- Tracking driver license information

Prerequisites

Before you can perform the tasks in this section, the following must be established:

- You must have implemented and added your employees to the system.

☞ *Refer to* **Recruiting and Selecting Employees** *(on page 33) and* **Hiring, Rehiring, Reinstating, Recalling, or Transferring an Employee** *(on page 83) for more information.*

- If you will be combining the features introduced in this section with those of Position Administration associated with job and/or position-related skill/education requirements, you must have implemented Position Administration.

☞ *Refer to the Using Position Administration documentation for more information.*

- If you will be combining the features introduced in this section with those of Training Administration, you must have implemented the Training Administration component.

☞ *Refer to the Using Training Administration documentation for more information.*

Questions answered

The following questions are answered in this section:

1. How is an up-to-date record of an employee's qualifications maintained?
2. How is training scheduled and completed for an employee recorded in the system; and how are training costs tracked?
3. How are qualifications-related information such as licenses, certificates, permits, association memberships, and driver's licenses tracked?

Overview of tracking employee skills, competencies, and training

Whereas the main focus of employee resourcing or deployment can seem to be very quantitative, the employee development function focuses on the qualitative characteristics of the workforce or employee abilities. Measuring and tracking employee skills and competencies will help your organization to increase and enhance the abilities of the workforce through strategically-planned training and development efforts.

The role of competency tracking

The main steps required for useful tracking of employee skills, competencies, and training are built around the process of 'competency gap analysis':

1. Identify the competencies needed to complete the work to be done in the organization. This can be done at the job, position, project role, department or function, or organizational level.
2. Identify and record the qualifications of individual employees.
3. Compare the needed workforce competencies to the current workforce competencies to determine the competency 'gap' (as well as competency matches).
4. Take action to assign employees with particular skills to jobs requiring those skills, and to develop skills in employees whose current or anticipated jobs in the organization require greater abilities than those employees currently possess.
5. Record and track training completed and new skills and competencies acquired by individual employees so that future competency gap analyses will reflect the increased qualifications of the workforce.

In fact, competency gap analysis becomes not only the key to strategic employee-development planning but also the underlying rationale for tracking skills, competencies, and training.

How competency tracking and gap analysis are used

The usefulness of competency gap analysis is apparent in such areas as recruitment and selection, performance management, succession and career planning, and workforce planning.

Recruitment and selection

Whenever recruitment is conducted within your organization to find employees currently qualified to fill new vacancies or to take on project roles or temporary assignments, you record the requirements of the job or assignment using the Position Administration functionality. The system can then be used to produce a list of current employees who are qualified (or partially qualified) for the promotion, transfer, or assignment.

Performance management

Creating appropriate training and development plans for individual employees within the context of organizational development plans is the focus of performance management. Competency gap analysis is conducted on an individual-employee level to compare the requirements for a particular job or role to the individual's qualifications and determine the specific training needs for that employee. Those training needs, and the employee's completion of training in response to those needs, can be recorded and tracked within the Training Administration functions.

Succession and career planning

Succession planning focuses on finding and developing employees for placement into identified key positions that are expected to become vacant sometime in the future. For example, you may know that the manager of a large division of your organization will be retiring in one year. You would likely want to initiate succession planning to identify and develop potential employees to move into that manager's position with the required qualifications.

Career planning, on the other hand, focuses on providing career incentives for individual employees and on meeting organizational needs through planning for promotional or learning opportunities for individuals. For example, an employee adequately qualified for his or her current position as a marketing executive could, through career planning, acquire the skills needed to be promoted sometime in the future into a job as a marketing manager. The individual would thus have additional career incentive and commitment to the organization, and the organization would benefit from having an available qualified employee for promotion into another job when the need arises.

In both succession planning and career planning, competency gap analysis is the key to equipping current employees for potential future jobs within the organization or to finding potential candidates for a particular anticipated vacancy.

Apply the Concept
What is career planning?

Workforce planning

Similar to career planning for an individual employee, workforce planning attempts to identify the competencies the organization will need in the future and then determine the gap between those competencies and those generally possessed by the current workforce. The organization can then identify the training and development efforts that will be required to enable it to respond to its anticipated future needs. For example, an organization's former methods of manufacturing a product by hand may be in the process of conversion to computerized production. Competency gap analysis may indicate the need for basic computer skills among the organization's workers, and appropriate computer training could then be planned.

Workforce planning is particularly crucial to organizations going through change brought about by technological advances, a maturing market or product line, changes in the available labor force, or even changes in environmental conditions that affect the company's manufacturing methods or product functionality.

Apply the Concept
What is the importance of tracking employee skills, competencies, and training in an organization?

The tracking tasks

The tasks required for tracking skills, competencies, and training are essentially those of data entry, reporting, and analysis. The most obvious data you will want to enter are the current skills and competencies identified in individual employees, and the training scheduled and completed for each employee. In addition, the system provides for easy and effective recording of such other relevant information as the following:

- Licenses
- Certificates
- Permits
- Professional or trade association memberships
- Driver licenses

The system also allows you to record expiration dates for these competency-related documents and certifications. This lets you take the appropriate steps to ensure that renewals are completed in a timely fashion. Timely renewal of certificates, licenses, and permits could be critical to organizational compliance with governmental regulations or restrictions.

In many cases, a license, certificate, or permit is also the clearest way to identify employees with certain skills or competencies. Accurate recording of that information can be a great help to effective competency gap analysis.

In addition, the system lets you record and track tuition costs incurred for enrolling individual employees in classes or other training, to track training costs to the organization generally, and to allocate costs to departments, divisions, or other areas within the organization. It can also record and track reimbursements paid to individual employees for training costs they have incurred, as may be specified by the policies and procedures of your particular organization.

Recordkeeping aspects of tracking employee skills, competencies, and training

The tasks of tracking employee skills, competencies, and training are primarily recordkeeping in nature. When recording this information you will find some interaction between the Training Administration component and other components of the system. Most of the information that you gather for tracking employee skills, competencies, and training will be recorded manually on Base Human Resource forms. The forms that you will be using to record this information are as follows:

- Certificates, Licenses And Permits (28-SCR)—Used to record any certificates, licenses, and/or permits an employee or applicant has been granted.
- Driver License Information (25-SCR)—Records driver license information for those employees operating company vehicles, or applicants who will be required to operate company vehicles if they are hired.
- Formal Education (30-SCR)—Used to record an employee's or applicant's formal education, both completed and in-progress.
- Professional Association Memberships (29-SCR)—Used to record any professional associations of which an employee or applicant is a member, both personally and on behalf of the company.
- Skills And Competencies (33-SCR)—Used to record skills and competencies acquired by an employee or applicant through formal education, work experience, and training courses.
- Training Scheduled/Taken (31-SCR)—Used to record training courses an employee or applicant has attended or is scheduled to attend.
- Tuition Information (32-SCR)—Used to record information about education reimbursements granted for each course taken by an employee in a tuition reimbursement program. The amount refunded to the employee for the course is recorded here. A separate form must be recorded for each course taken by the employee. Modifications may be made to this form to automatically generate a time entry to pay tuition reimbursements to the employee.

Uses of Position Administration to record required skills, competencies and training

When you are using the Position Administration component to track job and/or position-related skill, competency, and training requirements, you will be involved in aspects of workforce and/or training planning. Your attention will be focused on identifying the types of job and position-related skills, education, training, experience, and other job/position attributes that will be necessary later when trying to match employees or applicants to jobs and/or specific positions. This analysis will assist you in identifying an individual's shortfall between skill-based requirements already acquired and those that may be needed to effectively pursue a particular job or position.

The Position Administration functionality allows you to enter job requirement information on the following optional forms:

- Job - Education Required (30-SCR)—Used to enter the education required for a job.
- Job - Experience Required (05-SCR)—Used to enter experience required for a job.
- Job - Licenses Required (28-SCR)—Used to enter the licenses required for a job.
- Job - Memberships Required (29-SCR)—Used to enter the memberships required for a job.
- Job - Skills/Competencies Required (33-SCR)—Used to enter the skills and competencies required for a specific job.
- Job - Training Required (31-SCR)—Used to enter the training required for a job.

The Position Administration functionality allows you to enter position requirement information on the following optional forms:

- Position - Education Required (M15SCR)—Used to enter the education required for a position.
- Position - Experience Required (M1ESCR)—Used to enter experience required for a position.
- Position - Licenses Required (M16SCR)—Used to enter the licenses required for a position.
- Position - Memberships Required (M14SCR)—Used to enter the memberships required for a position.
- Position - Skills/Competencies Required (M13SCR)—Used to enter the skills and competencies required for a position.

- Position - Training Required (M1TSCR)—Used to enter the training required for a position.

☞ *Refer to the Using Position Administration documentation for more information on recording required skills, competencies, and training.*

The added functionality of the Training Administration component

The Training Administration component has been designed to provide you with information that you can use to make informed decisions about department staffing, scheduling employees for training, deciding whether new courses or classes need to be added, and so forth. This system component is designed to assist your organization in the administration of employee training classes. Administrative support is provided, allowing you to have detailed recordkeeping pertaining to employee training history, class results, and skills/competencies acquired during training.

The Training Administration component is designed to record when training is required for an employee, and it uses this data to alert you that there are potential future students for a class. Once a class has been completed, class results can be recorded and stored in your system. The system allows you to keep a history of past training and class results on file for analysis and reporting purposes.

Linking the Training Administration functionality to other HRMS components

Without a formal link between tracking skills and competencies on the Base HR component and information on the Training Administration component, the system enables you to manually map information held for an employee in relation to a specific position. This Base HR component information allows you to do a gap analysis that shows the employee qualifications versus job or position expectations. Using the Position Administration, Base HR, and Training Administration components, you can manually run reports or create your own reports. The Training Administration component provides you with a variety of online queries that will help you make decisions regarding employee training plans and class development. Use of these components should help you maintain greater control of employee training.

The Skills/Competencies panel found on the Course Directory form (10RSCR) in the Training Administration component lets you input skills that will be obtained by students/employees who successfully complete a course. These skills will subsequently be populated onto the student/employee's skills history panel found on the Skills And Competencies form (33-SCR) upon successful completion of the course. This effectively reduces the amount of data input that would be necessary for you to maintain a current and accurate skills log record on employees.

If your organization chooses not to track skills and competencies information in the Training Administration component, you are still able to record this information on the Skills And Competencies form (33-SCR) found in the Base HR component. This form serves as supplement to the Training Administration component's management tools and provides decision-making information regarding department or organization staffing requirements.

☞ *Refer to the Using Training Administration documentation for more information on prerequisites and skills.*

Reports for tracking employee skills, competencies, and training

The following reports are related to tracking employee skills, competencies, and training:

- Certificate, License And Permit (1I-RPT)—Provides a listing of all employees for whom unexpired certificates, licenses, and permits have been recorded.
- Driver License Information (15-RPT)—Displays information on employee driver licenses.
- Education And Tuition Refund Profile (1L-RPT)—Lists education backgrounds past and present for all active employees. This report also contains tuition refund information, if any is to be applied.
- Education Information-Formal And In-Progress (30-RPT)—Displays a list of all your employee's formal and in-progress education information.
- Education Statistics (3Y-RPT)—Provides a listing of formal education totals for active employees, the type of education received, and the average and total years of education.
- Employee Listing Of Skills And Abilities (33-RPT)—Provides skill information for active employees. The skill codes, level of proficiency, and method of verification for each employee is included.
- Employee Listing Of Training Courses Scheduled/Attended (31-RPT)—Displays training information for active employees, including the training course, completion status, instructor, and evaluation.
- Expired Certificates, Licenses And Permits (3I-RPT)—Provides a listing of all active employee's certificates, licenses, and permits that have expired and are due to be renewed.
- Tuition Information (32-RPT)—Provides tuition reimbursement information. The report lists all employees with tuition information, or just employees who have tuition that has not been paid.

☞ *Refer to the Using Training Administration documentation for more information on additional reports you may find useful in tracking employee skills.*

Detailed Directions

This section provides detailed directions on completing a business task.

Tasks

Completing the Guided Practice

You must have completed the Guided Practices in the prior sections to guarantee the successful completion of the Guided Practice in this section. In the Guided Practice for this section, you will be going through the seven tasks listed above for tracking employee skills, competencies, and training for an employee (employee number 0012, Andrew Anders) in an employee organization (999999).

Recording formal education details

To record formal education details, follow these steps:

1. Access the Formal Education form (30-SCR)

The Formal Education form (30-SCR) is used to record an employee's or applicant's formal education, both completed and in-progress. For in-progress education, you may want to update both the current and cumulative grade point averages, as well as the credit hours completed, at the conclusion of each semester. However, this is not a requirement.

Access this form by making the following selection from the Navigator:

Component: Employee Development
Process: Employee Skills, Competencies, Training
Task: Formal Education

For practice, access the Formal Education form (30-SCR) for employee number 0012, Andrew Anders.

2. Select the Education Level

Select the type of education an employee has completed or is in the process of completing.

For practice, select 'Bach Deg Business'.

3. Select the School Code

Select the school that the employee attended or is currently attending.

For practice, select 'Abraham Baldwin Ag C'.

4. Select the Major

Select the employee's primary course of study.

For practice, select 'Business Economics'.

5. Select the Minor

Select the employee's secondary course of study.

For practice, select 'Accounting'.

6. Enter the Years Attended

Enter the numeric, two-digit number of years the employee attended at the indicated school.

For practice, type '04' to indicate four years.

7. Enter the Year Graduated

Enter the numeric, two-digit year the employee graduated from the indicated school. Enter the year in YY format.

For practice, type '83' to indicate 1983.

8. Enter the Grade Point Average (Current)

Enter the grade point average for the current term completed by the employee. This is a numeric text box containing three digits with two decimal places, for example, the number 3.75 would be entered as '3.75'.

For practice, type '3.60'.

9. Enter the Grade Point Average (Cumulative)

Enter the grade point average of all courses completed by the employee at the indicated school. This is a numeric text box containing three digits with 2 decimal places, for example, the number 3.75 would be entered as '3.75'.

For practice, type '3.40'.

10. Enter the Credit Hours (Required)

Enter the number of credit hours required to be completed by the employee before the degree defined by the education-level code could be granted. This is a three-digit, numeric text box.

For practice, type '125' to indicate 125 credit hours.

11. Enter the Credit Hours (Completed)

Enter the total number of credit hours actually completed by the employee at the school defined by the school code.

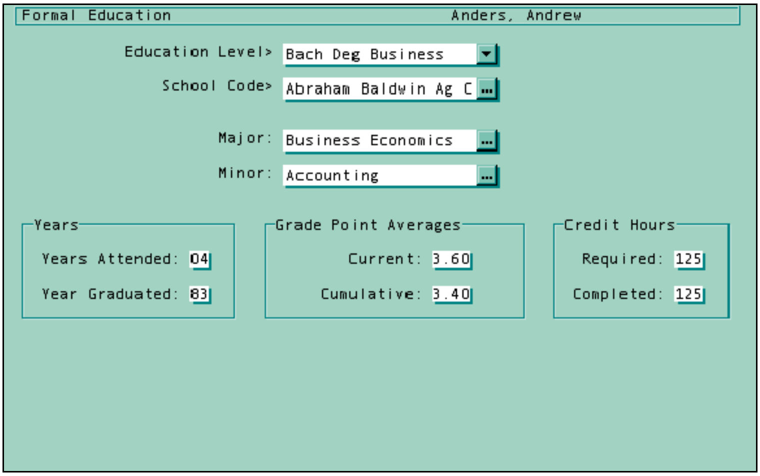
For practice, type '125' to indicate 125 credit hours.

12. Click Save or press Enter

The Formal Education form (30-SCR) is now recorded.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



See also:

- Recordkeeping aspects of tracking employee skills, competencies, and training ***(on page 242)***

For additional information on using this form.

Tracking training scheduled and/or taken

To track training scheduled and/or taken, follow these steps:

1. Access the Training Scheduled/Taken form (31-SCR)

The Training Scheduled/Taken form (31-SCR) is used to record training courses an employee or applicant has attended or is scheduled to attend. A status is assigned to each course identifying whether the course is completed or scheduled for a later date. The Training Scheduled/Taken (31-SCR) form also may be used to record the rating and credits the employee or applicant has received by taking a training course.

Note: *If the Training Administration component is being used, then it is likely the Training Scheduled/Taken form (31-SCR) will not be used, particularly since the Training Course* *option list (MP02) as used on this form is totally separate from the Course Codes option list (TR33) used on multiple forms in the Training Administration component.*

Access this form by making the following selection from the Navigator:

Component: Employee Development
Process: Employee Skills, Competencies, Training
Task: Training Scheduled/Taken

For practice, access the Training Scheduled/Taken form (31-SCR) for employee number 0012, Andrew Anders.

2. Select the Course

Select the training course that the employee has, or is scheduled to, attend. You may update this option list (TR33) to include all of the training courses needed by your organization.

For practice, select 'Manager Training'.

3. Enter the Year

Enter the two-digit equivalent for the year the training is scheduled to be taken. Enter the year in YY format.

For practice, type '98'.

4. Enter the Number

This is the sequence of the course in the year this record identifies.

For practice, type '1' to indicate it is the first course taken this year.

5. Select the Status

Select the status of the trainee in the course recorded. This code also identifies courses in which the employee may be enrolled, but has not yet attended.

For practice, select 'Course Scheduled Fut'.

6. Select the Type

Select the type of training course being recorded. This option list (MP03) identifies whether the training is internal or external and if taking it has any impact on the employee's job or employment status.

For practice, select 'Internal Comp Policy'.

7. Select the Location

Select the physical location where the training was held. You may update this option list (TR13) to include all of the locations needed by your organization.

For practice, select 'Headquarters 12th W'.

8. Select the Instructor

Select the instructor of the course. You may update this option list to include all of the instructors needed by your organization.

For practice, select 'Unknown'.

9. Select the Evaluation

Select the attending employee's evaluation of the course. It is used to determine if a course should be continued or would be beneficial for other employees.

For practice, leave this list box blank.

10. Enter the Rating

Enter the rating the employee received in the course. This text box is left blank when attendees do not receive ratings.

For practice, leave this text box blank.

11. Enter the Credit

Enter the number of credits awarded to the employee for satisfactory completion of the course. This text box is left blank when no credit is given.

For practice, leave this text box blank.

12. Enter the Course Dates (Start)

Enter the starting date the course is/was scheduled to begin. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '12-15-1998' (US and Canada) or '15-12-1998' (elsewhere).

13. Enter the Course Dates (Complete)

Enter the date the course was/will be completed. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere). Leave blank for a course that is scheduled but not yet taken, or if the employee did not attend.

For practice, type '12-17-1998' (US and Canada) or '17-12-1998' (elsewhere).

14. Select the PL3

Select the payroll level 3 value to which costs of the course are to be charged. You may update this option list (HR439) to include all of the payroll level 3s needed by your organization.

For practice, select 'Region 3030'.

15. Select the PL4

Select the payroll level 4 value to which the costs of the course are to be charged. You may update this option list (HR449) to include all of the payroll level 4s needed by your organization.

For practice, select 'Department 4040'.

16. Select the PL5

Select the payroll level 5 value to which the costs of the course are to be charged. You may update this option list (HR459) to include all of the payroll level 5s needed by your organization.

For practice, select 'Section 5050'.

17. Select the PL6

Select the payroll level 6 value to which the costs of the course are to be charged. You may update this option list (HR469) to include all of the payroll level 6s needed by your organization.

For practice, select 'Group 6060'.

18. Enter the Costs

Enter the cost of the training course the employee attended. Enter the total amount whether or not the company pays a portion or all of the cost. This is a six-digit text box with two decimal places.

For practice, type '1500.00'.

19. Enter Company Paid

Enter the amount of the training cost paid by the company. Normally, this text box contains only course costs, but you may wish to include related expenses as well. This is a six-digit text box with two decimal places.

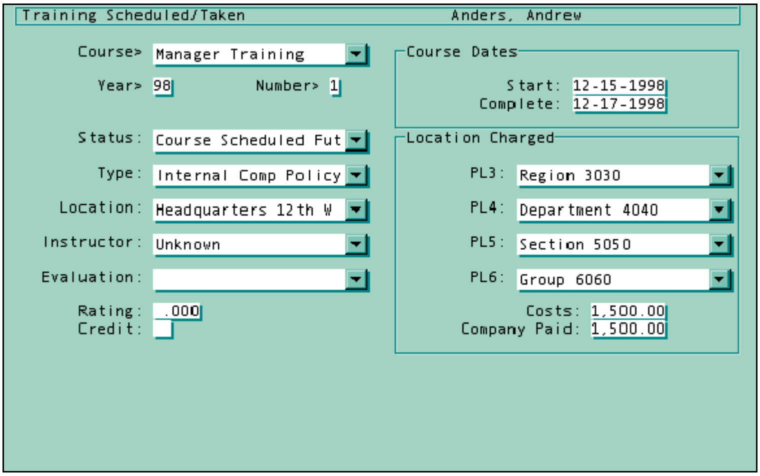
For practice, type '1500.00'.

20. Click Save or press Enter

Completed and ongoing formal education information is now recorded.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



See also:

- Recordkeeping aspects of tracking employee skills, competencies, and training ***(on page 242)***

For additional information on using this form.

Recording skills and competencies

To track employee skills and competencies, follow these steps:

1. Access the Skills And Competencies form (33-SCR)

The Skills And Competencies form (33-SCR) is used to record skills and competencies acquired by an employee or applicant through formal education, work experience, and training courses. This form allows you to record these skills and competencies by code, along with the source, and the evaluated proficiency.

Note: *If the Training Administration component is in use— and if the skills panel of the Course Directory form (10RSCR) is completed—then this employee-level form is automatically updated with the skill and proficiency levels acquired as a result of successful completion of a course. In such cases, the following text boxes will be populated: Skill Code, Date Obtained, Proficiency, and Training Admin.*

Access this form by making the following selection from the Navigator:

Component: Employee Development
Process: Employee Skills, Competencies, Training
Task: Skills and Competencies

For practice, access the Skills And Competencies form (33-SCR) for employee number 0012, Andrew Anders.

2. Select the Skill Code

Select the option that describes the skill the employee or applicant possesses.

For practice, select 'Management'.

3. Enter the Date Obtained

Enter the date on which the employee or applicant obtained the skill or the training course was completed. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '04-15-1997' (US and Canada) or '15-04-1997' (elsewhere).

4. Select the Proficiency

Select the assessment of the employee's or applicant's skill proficiency. You may update this option list (MP08) to include all of the skill proficiencies needed by your organization.

For practice, select 'Above Average Knowld'.

5. Select the Source

Select the means or source through which the employee or applicant obtained the skill.

For practice, select 'Formal Education'.

6. Select the School Attended

Select the school or university from which the employee or applicant obtained the skill.

For practice, select 'Chicago, U of'.

7. Select the Skill Verified By

Select the means used to verify the fact the employee actually does possess the skill indicated.

For practice, select 'Certificate Provided'.

8. Select the Training Admin

This list box would be used only if you are using Training Administration. Otherwise, you must skip this list box and go on to the Base HR list box.

Note: If you are using the Training Administration functionality, this list box is populated automatically with the appropriate course from which the skill level was derived.

For practice, leave this list box blank.

9. Select the Base HR

Select the training course from which the employee obtained the skill.

For practice, leave this list box blank.

10. Enter the User Fields, 1-4

These four 6-digit alphanumeric text boxes are provided to allow the customer to define and enter skill-related data for analysis purposes. If applicable, this text box's definition may be modified to access a customer-defined option list.

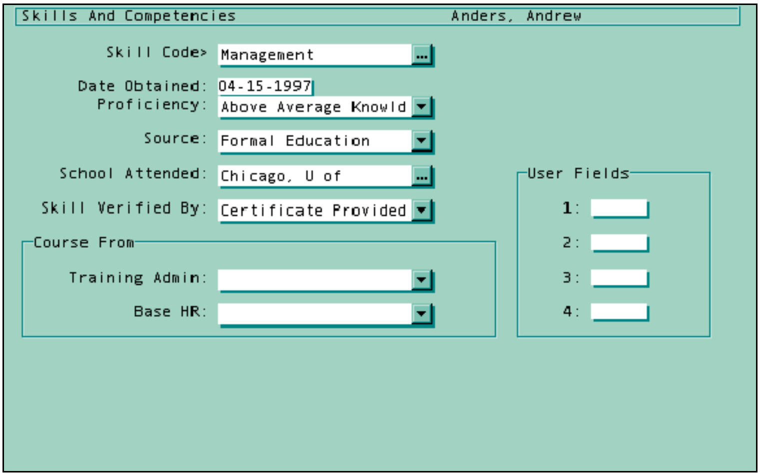
For practice, leave these text boxes blank.

11. Click Save or press Enter

The Skills And Competencies form (33-SCR) is now recorded.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



See also:

- Recordkeeping aspects of tracking employee skills, competencies, and training ***(on page 242)***

For additional information on using this form.

Tracking tuition costs

To track tuition costs, follow these steps:

1. Access the Tuition Information form (32-SCR)

The Tuition Information form (32-SCR) is used to record information about education reimbursements granted for each course taken in a tuition reimbursement program.

Note: *The employee's Education Level and School attended should be entered on the Formal Education form (30-SCR) prior to processing reimbursements on the Tuition Information form (32-SCR).*

Access this form by making the following selection from the Navigator:

Component: Employee Development
Process: Employee Skills, Competencies, Training
Task: Course Completion and Refund

For practice, access the Tuition Information form (32-SCR) for employee number 0012, Andrew Anders.

2. Select Education Level

Select the education an employee has completed or is in the process of completing.

For practice, select 'Master Deg Bus Admin'.

3. Select the School

Select the school the employee attended or is currently attending. You may update this option list (HR32) to include all of the schools needed by your organization.

For practice, select 'Abraham Baldwin Ag C'.

4. Enter the Year

Enter the year the course was taken or will be taken by the employee.

For practice, type '98'.

5. Enter the Course Number

Enter a unique value for each course taken in a semester/quarter. This allows for separate reimbursement records when more than one course is attended within the same term.

For practice, type '1'.

6. Enter the Title

Enter the title of the course taken by the employee. The course number or code assigned by the school may be entered here when it is necessary to track multiple attempts at the same course.

For practice, type 'Business Strate'.

7. Enter the Semester/Quarter

Enter the semester or quarter the course was taken by the employee.

For practice, type '1'.

8. Enter the Grade

Enter the grade the employee earned for the course.

For practice, leave this text box blank.

9. Enter the HED Cross Reference

Enter the HED number used to pay the reimbursement.

Note: This HED cross-reference is a customer-defined reference text box that is intended for informational purposes only. There is no direct link or feed to payroll. Payroll will need to be notified.

For practice, type '120'.

10. Enter the Tuition Paid Date

Enter the date on which the tuition reimbursement was paid to the employee. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '01-27-1998' (US and Canada) or '27-01-1998' (elsewhere).

11. Enter the Tuition Amount

Enter the amount of the tuition reimbursement. This is a six-digit text box with two decimal places.

For practice, type '1500.00'.

12. Enter the Tuition Percent

Enter the three-digit percentage represented by the tuition reimbursement. For example, if the tuition cost is 100.00 and the reimbursed amount is 75.00, then this percentage is '075'.

For practice, type '080'.

13. Enter the Books Amount

Enter the amount of reimbursement for book charges. This is a six-digit text box with two decimal places.

For practice, type '250.00'.

14. Enter the Books Percent

Enter the three-digit percentage represented by the book reimbursement. For example, if the book cost is 100.00 and the reimbursed amount is 50.00, then this percentage is '050'.

For practice, type '050'.

15. Enter Fees/Other Amounts

Enter the amount of reimbursement for fees and other charges. This is a six-digit text box with two decimal places.

For practice, type '75.00'.

16. Enter the Fees/Other Percent

Enter the three-digit percentage represented by the fee/other amounts reimbursement. For example, if the fee is 100.00 and the reimbursed amount is 25.00, then this percentage is '025'.

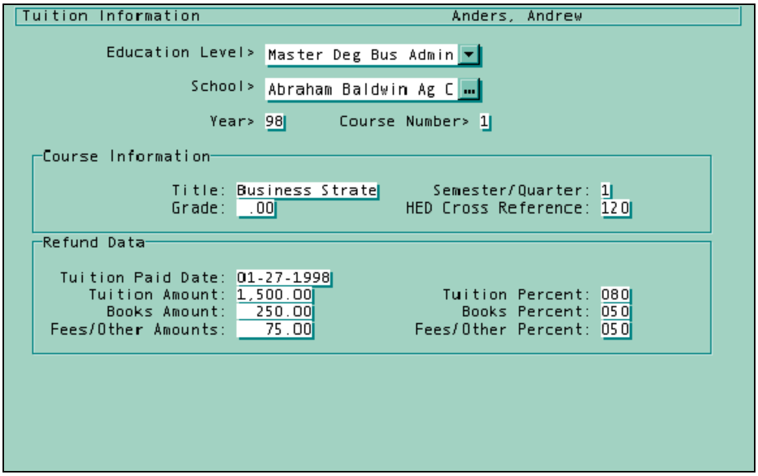
For practice, type '050'.

17. Click Save or press Enter

Completed and ongoing formal education information is now recorded.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



See also:

- Recordkeeping aspects of tracking employee skills, competencies, and training ***(on page 242)***

For additional information on using this form.

Tracking certificates, licenses, and permits

To track certificates, licenses, and permits, follow these steps:

1. Access the Certificates, Licenses And Permits form (28-SCR)

The Certificates, Licenses And Permits form (28-SCR) is used to record any certificates, licenses, and/or permits an employee or applicant has been granted.

Access this form by making the following selection from the Navigator:

Component: Employee Development
Process: Employee Skills, Competencies, Training
Task: Certificates, Licenses and Permits

For practice, access the Certificates, Licenses And Permits form (28-SCR) for employee number 0012, Andrew Anders. You should clear the text boxes on the form before entering the data.

2. Select the Type of CLP

Select the type of certificate, license, or permit the employee holds. You may update this option list (HR62) to include all of the certificates, licenses, and/or permits needed by your organization.

For practice, select 'Auditor, Internal'.

3. Enter the Date Recorded

Enter the date you recorded the certificate, license, or permit information. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '11-01-1997' (US and Canada) or '01-11-1997' (elsewhere).

4. Enter the CLP Number

Enter the identification number of the certificate, license, or permit.

For practice, type 'Audit1515'.

5. Enter the Expiration Date

If applicable, enter the expiration date of the certificate, license, or permit. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '11-01-1999' (US and Canada) or '01-11-1999' (elsewhere).

6. Select the Current Status

Select the current status (expired or renewed) of the recorded certificate, license, or permit.

For practice, select 'Renewed'.

7. Select the State Of Issue

Select the state in which the certificate, license, or permit was issued.

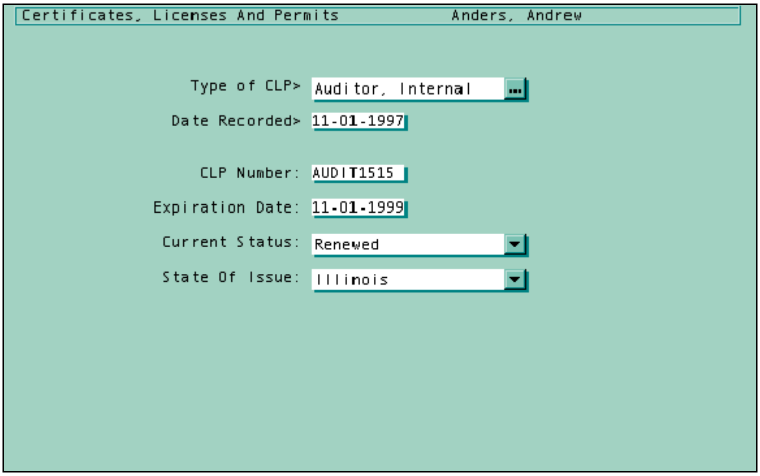
For practice, select 'Illinois'.

8. Click Save or press Enter

The Certificates, Licenses And Permits form (28-SCR) is now recorded.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



See also:

- Overview of tracking employee skills, competencies, and training ***(on page 239)***

For additional information on using this form.

Tracking professional association memberships

To track professional association memberships, follow these steps:

1. Access the Professional Association Memberships form (29-SCR)

The Professional Association Memberships form (29-SCR) is used to record any professional associations of which an employee or applicant is a member, whether personally or on behalf of the company.

Access this form by making the following selection from the Navigator:

Component: Employee Development
Process: Employee Skills, Competencies, Training
Task: Professional Associations

For practice, access the Professional Association Memberships form (29-SCR) for employee number 0012, Andrew Anders.

2. Select the Association

Select the association to which the employee belongs. You may update this option list (HR58) to include all of the associations needed by your organization.

For practice, select 'Assn Intl Mgmnt Con'.

3. Enter the Membership Date

Enter the date the employee became affiliated or renewed membership with the association. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '02-25-1997' (US and Canada) or '25-02-1997' (elsewhere).

4. Enter the Membership Number

Enter the membership identification number, using up to ten alphanumeric characters.

For practice, type 'AM-4275'.

5. Enter the Expiration

If applicable, enter the association membership expiration date. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

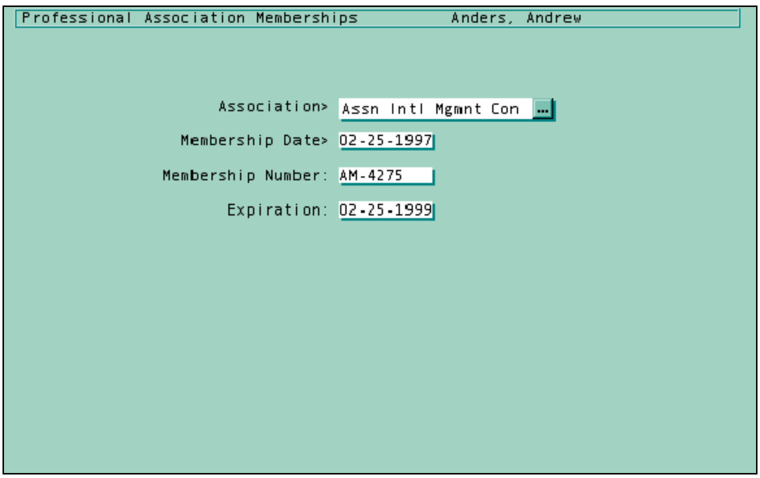
For practice, type '02-25-1999' (US and Canada) or '25-02-1999' (elsewhere).

6. Click Save or press Enter

The Professional Association Memberships form (29-SCR) is now recorded.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



See also:

- Recordkeeping aspects of tracking employee skills, competencies, and training ***(on page 242)***

For additional information on using this form.

Tracking driver license information

To track driver license information, follow these steps:

1. Access the Driver License Information form (25-SCR)

The Driver License Information form (25-SCR) is recorded for employees operating company vehicles, or applicants who will be required to operate company vehicles if they are hired.

Access this form by making the following selection from the Navigator:

Component:	Employee Resourcing
Process:	Maintaining Employee Details
Task:	Drivers License

For practice, access the Driver License Information form (25-SCR) for employee number 0012, Andrew Anders.

2. Enter the License ID

Enter the driver license ID number assigned to the employee.

For practice, type 'DL001'.

3. Enter the Date

Enter the effective date of the employee's driver license information. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '03-01-1994' (US and Canada) or '01-03-1994' (elsewhere).

4. Enter the Number

Enter the employee's driver license number as printed on the license.

For practice, type 'ILDL439507602'.

5. Enter the State

Enter the state where the employee's driver license is valid.

For practice, type 'Illinois'.

6. Enter the Class

Enter the driver license class from the employee's driver license.

For practice, type 'A'.

7. Enter the Restrictions

Enter the driving restrictions stated on the employee's driver license.

For practice, type 'None'.

8. Enter the Expiration

Enter the date on which the driver license will expire. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

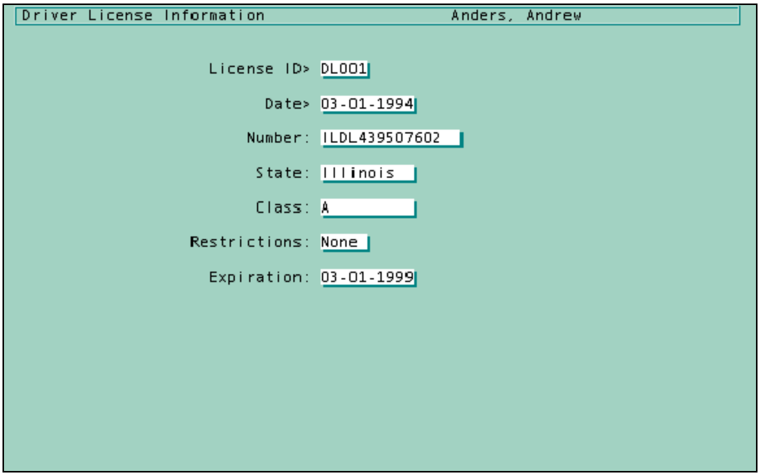
For practice, type '03-01-1999' (US and Canada) or '01-03-1999' (elsewhere).

9. Click Save or press Enter

The Drivers License Information form (25-SCR) is now recorded.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



See also:

- Recordkeeping aspects of tracking employee skills, competencies, and training ***(on page 242)***

For additional information on using this form.

Review of Questions Answered

1. How is an up-to-date record of an employee's qualifications maintained?

2. How is training scheduled and completed for an employee recorded in the system; and how are training costs tracked?

3. How are qualifications-related information such as licenses, certificates, permits, association memberships, and driver's licenses tracked?

CHAPTER 8

Tracking Performance Appraisals

In This Chapter

Introduction

Tracking the performance of your employees is essential to maintaining an effective workforce. The performance appraisal process involves assessing the individual work-related strengths and weaknesses of employees. This process is linked to salary considerations, employee development, advancement, and status record updates. Cyborg's products provide the functionality to make the performance appraisal process a valuable aspect of your organization's performance management systems.

Tasks

This section explains the following:

- Scheduling and tracking performance appraisals
- Recording performance appraisal results

Prerequisites

Before you can perform the tasks in this section, the following must be established:

- Your companies (organizations)
- Your employees

☞ *Refer to* **Recruiting and Selecting Employees** *(on page 33) and* **Hiring, Rehiring, Reinstating, Recalling, or Transferring an Employee** *(on page 83) for more information.*

Questions answered

The following questions are answered in this section:

1. What different types of performance appraisals can be given to employees?
2. What is the performance appraisal process when using the system?
3. What reports are available to aid in the performance appraisal process?
4. How can performance appraisals be linked to salary reviews?

Scheduling and tracking performance appraisals

Performance management is critically important to the success of your organization. It seeks to improve the work performance of individual employees and to increase the success of the organization as a whole. A key element in effective performance management is the process of giving performance appraisals to your employees.

The aim of performance appraisals

Performance appraisals assess individual employee strengths and areas of improvement in relation to job performance and help the organization to build on those strengths and facilitate improvement. The process of giving performance appraisals is tied closely to the process of tracking employee skills, competencies, and training. In fact, performance appraisals are often key in first identifying and then closing the competency gap identified through competency tracking. Performance appraisals may affect employee compensation, job assignment, or even job status.

☞ *Refer to* **Tracking Employee Skills, Competencies, and Training** *(see "Tracking Employee Skills,Competencies, and Training" on page 237) for more information.*

Apply the Concept
What is the aim of performance appraisals for an organization?

Frequency of appraisals

Performance appraisals are generally viewed as a continuous process that take place in some form each day an employee works. Formal performance appraisals are often performed on an annual basis (on an employee's hire-date anniversary or at a specific time of year), but they may be performed more frequently, especially if an employee is working on probationary status following a new hire, reinstatement, transfer, promotion, or other status change.

Types of performance appraisals

Formal performance appraisals can be conducted in a variety of ways, using a wide range of performance appraisal systems. Perhaps most traditional of the various systems in use today is the 'top-down' rating made by a supervisor or manager of an employee's capabilities. Such an appraisal is generally based on the supervisor's or manager's day-to-day observation of the employee's work performance and will usually include an appraisal interview with the employee. In the appraisal interview, the supervisor and the employee may review both positive and negative incident reports entered in the employee's file during the previous year (or other time period), discuss improvements made and training completed, and review the supervisor's evaluation of the employee's performance.

In addition to the typical manager-subordinate appraisal, many organizations use 'peer-group' appraisal, 'upward' appraisal, and '360-degree' appraisal methods. Peer-group appraisals use performance evaluations completed by an individual employee's co-workers or project team members. Upward appraisals call for evaluations by those who work under the direction of the employee being evaluated. Finally, 360-degree appraisals include evaluations from an employee's managers and supervisors, peers, subordinates, and even customers, clients, and suppliers.

Regardless of the type of performance appraisal conducted, typical results of an appraisal include the assessment (or performance evaluation) itself, as well as performance goals or objectives and specific training and development needs. At the conclusion of a performance appraisal, the date of the next appraisal is usually set and recorded.

A potentially large amount of information will result from one of these performance appraisal processes and the key task is recording appraisal results so they can be used in the organization's efforts to most effectively use the capabilities of each employee. The system is designed to make performance-review scheduling and results tracking as easy as possible. Whether your organization utilizes a simple manager-employee appraisal or a more complex 360-degree appraisal, the system will help you record and manage all the necessary information for effective performance management.

Typical appraisal tasks

The basic tasks associated with tracking performance appraisals are as follows:

1. Schedule the next performance appraisal for an employee.
2. Identify employees eligible for a performance appraisal within a customer-defined timeframe.
3. Prepare the appraisal forms and distribute them to the appropriate reviewers.
4. Record the results of the performance appraisal (depending on the type of appraisal used by your organization, you may need to record the results of multiple evaluations, such as for a 360-degree appraisal).
5. Enter other changes brought about by the performance appraisal. For example: If the appraisal process results in employee salary increases/changes, these can be entered using the Salary Assignment/Changes form (40-SCR). And, if you are using Salary Administration, additional features are available to help you manage the compensation-related events in your organization with a bit more sophistication, including the ability to link an employee's performance rating to a specific pay-for-performance salary increase.

☞ *Refer to* **Managing Employee Compensation** *(on page 335) or the Using Salary Administration documentation for more information on salary assignments and changes.*

Appraisals may identify training and development needs for an individual employee. Training requirements can be scheduled using the Training Scheduled/Taken form (31-SCR). Or, the Training Administration functionality can be used to facilitate the entry of requests for future employee training (both required and elective) and the administration of those requests that ultimately become class registrations.

☞ *Refer to* **Tracking Employee Skills, Competencies, and Training** *(see "Tracking Employee Skills,Competencies, and Training" on page 237) for more information.*

Skills and competencies that are not yet part of an employee's record may be identified during the appraisal. These can be entered on the Skills And Competencies form (33-SCR) so the employee's work qualifications are accurately recorded for future reference and competency gap analysis.

A promotion or other job change may result from the appraisal. Such job changes may also require changes in salary, job location, company property assigned to an employee, and so forth. Those changes must be entered as well as the promotion or job change itself.

Cyborg's products will be the key to your organization's efforts to manage employee performance by helping you track performance appraisals effectively. The system gives you the capability to comprehensively schedule appraisals, record appraisal results and related impacts on training, compensation, and employee status.

See also:

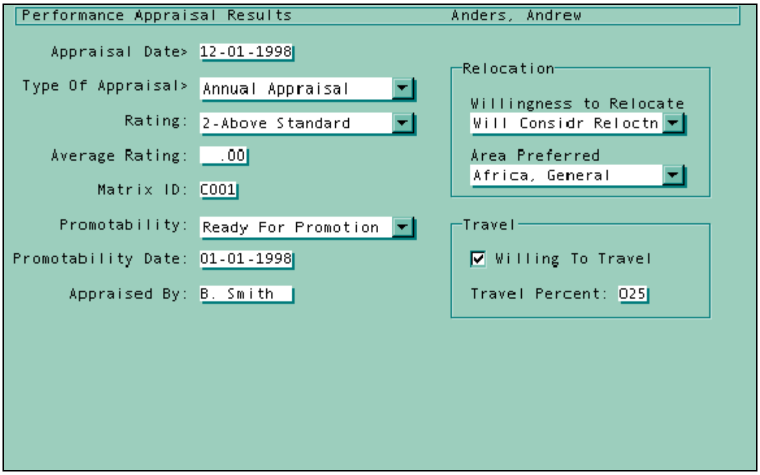
- Scheduling and tracking performance reviews ***(on page 277)***

For detailed directions on scheduling and tracking performance reviews.

Apply the Concept
What tasks are typically associated with tracking performance appraisals?

The recording of performance appraisal results

The Performance Appraisal Results form (49-SCR) is used to record the results for all of the performance appraisal types discussed in this section. The types of appraisals your organization uses can be added to the option list that is shown on the following form:



In the case of the 360-degree appraisals, the option list could be modified to include the relationship the appraiser has to the employee being reviewed (for example, manager, peer, direct report, and so forth). This gives you the ability to record a number of separate appraisals for the same appraisal date, as the appraisal type is a key text box (unique identifier) for the record.

In addition to recording the appraisal rating, you may record a promotability assessment and the date the employee should be considered for promotion as well as the employee's willingness to travel or to relocate.

See also:

- Recording performance appraisal results ***(on page 279)***

For detailed directions on recording performance appraisal results.

Linking performance appraisals and salary reviews

Many organizations link performance appraisals with salary reviews. The system can easily accommodate this approach. To link a performance appraisal with a salary review, you must use functionality in the Salary Administration component. The Salary Administration component accommodates three types of salary reviews:

- Across-the-board
- Discretionary
- Pay-for-performance

You can use any one of these, but if you want the salary review to be directly linked to the performance appraisal, you must use the Pay-for-Performance option. To use this option, you must set up rules for the salary increase amounts that are related to each appraisal score.

☞ *Refer to the Using Salary Administration documentation for more information on performance appraisal and salary reviews.*

Processing unrelated performance appraisals and salary reviews

To conduct a performance appraisal that is not connected to a salary review, you schedule the review using the Schedule/Track Performance Appraisals form (50-SCR) and then record the performance appraisal results on the Performance Appraisal Results form (49-SCR). The Performance Appraisals Scheduled For Month Of: XX report (1R-RPT) provides a distribution list of performance appraisals scheduled for a given month.

Use of matrix IDs

Pay-for-Performance salary plans require a number of different table records to be set up in the system that contain the rules of the salary plan. These tables are linked together as a matrix. These matrices are chart representations of salary increase variables that give the specifications of what level of salary employees should be paid under specific qualifying circumstances. The system allows you to set up different rules for different groups of employees, locations, grades, and time periods. Each employee is linked to a specific pay-for-performance rule set using a matrix ID that is entered on the Performance Appraisal Results form (49-SCR). If you are not using a Pay-for-Performance salary plan, an entry is not required in this text box.

☞ *Refer to the Using Salary Administration documentation for more information about the salary administration process and linking salary reviews with performance appraisals.*

Creation of training plans

As part of the appraisal process, it is common to look at enhancement opportunities or skills gaps and create a training plan for an employee. The Training Administration component is used to accomplish this. You can easily use this component's functionality to capture future training requirements for employees; and, once classes are established and scheduled, the actual registrations can be processed with speed and efficiency. The training results history for each employee is easily tracked and maintained using Training Administration.

☞ *Refer to the Using Training Administration documentation for more information on how to use this component.*

Performance appraisal reports

To help you with this process, there are also two useful reports:

- Performance Appraisals Scheduled For Month Of: XX report (1R-RPT)—Provides a distribution list of performance appraisals scheduled for a given month.
- Performance Appraisal Forms Not Returned By Expected Date report (1Q-RPT)—Identifies employee records that have not been updated with appraisal results by the due date.

☞ *Refer to the* **Report Quick Reference** *(on page 421) for more information on available reports related to performance appraisals and the Using Salary Administration documentation for more information on reports related to this component.*

Detailed Directions

This section provides detailed directions on completing a business task.

Tasks

Completing the Guided Practice

In the Guided Practice for this section, you will be scheduling, recording, and tracking a performance review for Andrew Anders, employee number 0012.

Scheduling and tracking performance reviews

To schedule and track performance reviews, follow these steps:

1. Access the Schedule/Track Performance Appraisals form (50-SCR)

The Schedule/Track Performance Appraisals form (50-SCR) is used to record data for an employee's next scheduled performance appraisal.

Access this form by making the following selection from the Navigator:

Component: Employee Development
Process: Track Performance Appraisals
Task: Next Performance Review Date

For practice, access the Schedule/Track Performance Appraisals form (50-SCR) employee number 0012, Andrew Anders.

2. Enter the Date Scheduled

Enter the date the next appraisal review is to be performed. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '06-01-1998' (US and Canada) or '01-06-1998' (elsewhere).

3. Select the Type Of Appraisal

Select the type of appraisal review that is to be performed. You may update this option list to include all of the appraisal types needed by your organization.

For practice, select 'Scheduled Appraisal'.

4. Enter the Location Delivered

Enter the mail or distribution information indicating where the performance appraisal form was or will be sent.

For practice, type 'Chic, Off'.

5. Enter the Date Distributed

Enter the date the performance appraisal form was or will be sent. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '05-25-1998' (US and Canada) or '25-05-1998' (elsewhere).

6. Enter the Person Responsible

Enter the name of the person who will be completing and returning the form; or in the case of mass distribution, the person responsible for collecting completed performance appraisal forms.

For practice, type 'Jones, John - Supervisor'.

7. Enter the Date Expected

Enter the date the performance appraisal form is due back to the originating department. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '06-14-1998' (US and Canada) or '14-06-1998' (elsewhere).

8. Enter the Date Returned

Enter the date the performance appraisal was actually received back in the originating department. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

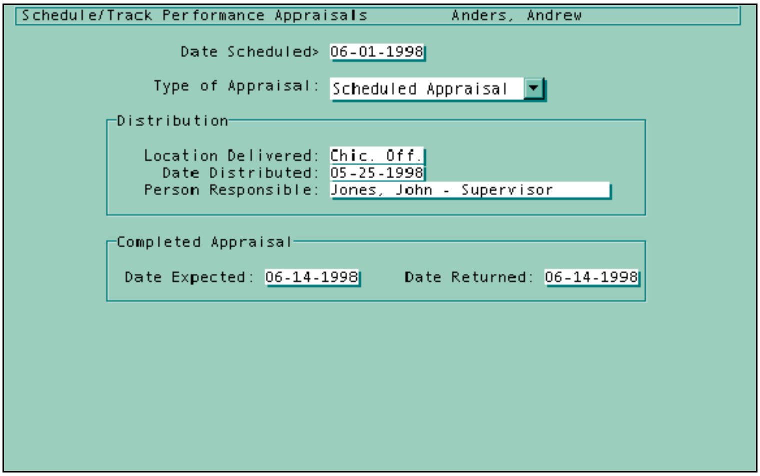
For practice, type '06-14-1998' (US and Canada) or '14-06-1998' (elsewhere).

9. Click Save or press Enter

The Schedule/Track Performance Analysis form (50-SCR) is now recorded.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



See also:

- Scheduling and tracking performance appraisals ***(on page 269)***

For an explanation of the contents and use of this form.

Recording performance appraisal results

To enter performance appraisal results, follow these steps:

1. Access the Performance Appraisal Results form (49-SCR)

The Performance Appraisal Results form (49-SCR) is used to record the results of an employee's performance appraisal.

Access this form by making the following selection from the Navigator:

Component: Employee Development
Process: Track Performance Appraisals
Task: Performance Appraisal Results

For practice, access the Performance Appraisal Results form (49-SCR) for employee number 0012, Andrew Anders.

2. Enter the Appraisal Date

Enter the date of the employee's performance appraisal. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '06-01-1998' (US and Canada) or '01-06-1998' (elsewhere).

3. Select the Type Of Appraisal

Select the type of performance appraisal performed for the employee. You may update this option list (HR15) to include all of the appraisal types needed by your organization.

For practice, select 'Scheduled Appraisal'.

4. Select the Rating

Select the employee's performance appraisal rating.

Note: *The values in this option list (HR16) should never be changed because it is a calculation option list. However, you may change the descriptions.*

For practice, select '2-Above Standard'.

5. Enter the Average Rating

If desired, enter the average of the employee's scores in the various performance appraisal rating categories.

For practice, leave this text box blank.

6. Enter the Matrix ID

This matrix ID should be completed if a pay-for-performance salary plan is being used.

For practice, type 'C001' in this text box.

7. Select the Promotability (optional)

Select the employee's promotability potential. You may update this option list (HR17) to include all of the promotability options you many need.

For practice, select 'Ready For Promotion'.

8. Enter the Promotability Date (optional)

Enter the date the employee may be considered for a promotion. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '06-14-1998' (US and Canada) or '14-06-1998' (elsewhere).

9. Enter Appraised By

Enter the employee number or any other identification scheme that indicates the person or persons responsible for completing and/or administering the employee's performance appraisal.

For practice, type 'B. Smith' to identify the person performing the appraisal.

10. Select the Willingness To Relocate

Select the employee's willingness to relocate. You may update this option list (HR19) to include all of the variables needed by your organization.

For practice, select 'Will Consdr Reloctn'.

11. Select the Area Preferred

Select the employee's geographic preference for relocation. You may update this option list (HR20) to include all of the geographic preferences needed by your organization.

For practice, select 'Africa, General'.

12. Click the Willing To Travel check box

Click this check box if the employee is willing to travel as part of the job.

For practice, click 'Willing to Travel'.

13. Enter the Travel Percent

Enter the percentage of time the employee is willing to travel as part of the job.

Note: *Decimals are not used when entering numbers in this text box.*

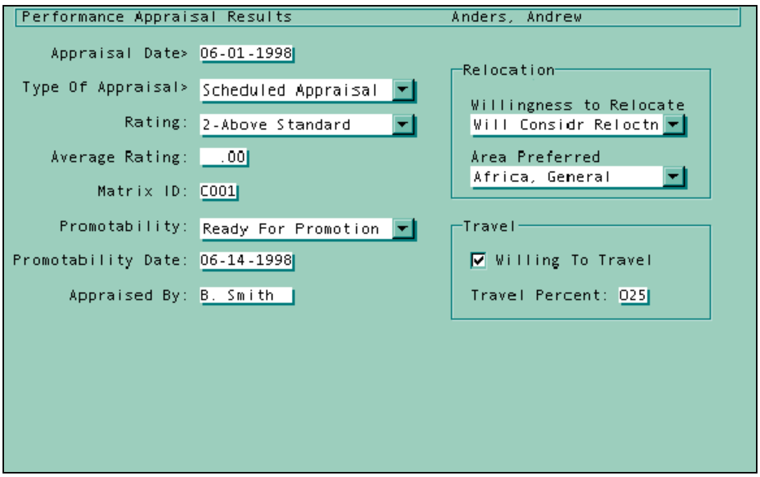
For practice, type '25', indicating the employee is willing to travel twenty-five percent of the time.

14. Click Save or press Enter

The Performance Appraisal Results form (49-SCR) is now recorded.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



See also:

- The recording of performance appraisal results ***(on page 272)***

For an explanation of the contents and use of this form.

Review of Questions Answered

1. What different types of performance appraisals can be given to employees?

2. What is the performance appraisal process when using the system?

3. What reports are available to aid in the performance appraisal process?

4. How can performance appraisals be linked to salary reviews?

CHAPTER 9

Managing Employee Health and Safety

In This Chapter

Introduction

Managing the health and safety of your employees starts by maintaining adequate employee records. Cyborg's products provide you with the necessary functionality to record employee information such as medical exams, blood types, disabilities, and emergency contacts.

Tasks

This section explains the following:

- Recording employee health information
- Recording disabilities and restrictions
- Recording physician and emergency contact information
- Recording language and religion information
- Scheduling physical exams
- Entering physical exam results
- Recording illness and injury information

Prerequisites

Before you can perform the tasks in this section, the following must be established:

- You must have implemented and added your employees to the system.

☞ *Refer to* **Recruiting and Selecting Employees** *(on page 33) and* **Hiring, Rehiring, Reinstating, Recalling, or Transferring an Employee** *(on page 83) for more information.*

Questions answered

The following questions are answered in this section:

1. How is the health and safety functionality used in the system?
2. What is the advantage of recording language and religion information for your employees?
3. What is the possible impact of health and safety information on Benefits Administration?

Employee health and safety

The system focuses on the effective deployment and development of employees to accomplish organizational objectives. Your organization's success is dependent on the ability of your employees to fully use their skills and competencies on behalf of the organization. Employee health and safety on the job is a major factor in your employees' ability to do so. This ability is further enhanced by the employees' feeling that they work in a safe and healthy environment where there is evidence of management's proactive interest in their welfare.

A proactive health and safety program is a key element in your organization's success. Such a program provides benefits for each employee and for the organization. Good health and safety management can reduce business costs from losses and damages resulting from on-the-job accidents, injuries, and illnesses. This can improve workforce morale, reduce the cost of liability insurance, reduce workforce absences and related costs, reduce the risk of legal actions against the organization because of workplace accidents, enhance the overall image of the organization in the marketplace, and avoid penalties imposed by health and safety regulatory agencies.

Employee health and safety programs will generally include these basic steps:

- Implement programs and procedures to avoid workplace accidents, injuries, and illnesses and to promote general workplace health and safety.
- Prepare for proper handling of accidents, injuries, illnesses, and other emergencies by having key health and safety information readily available for each employee.
- Record accurate and timely information about each accident, injury, or illness that occurs so that employee leaves, medical claims, and disabilities can be managed appropriately.
- Report and analyze accident, injury, and illness information so that trends can be identified, lessons can be learned from failures, and steps can be taken to prevent recurrences.

The system provides the foundation for an effective employee health and safety management program by recording employee-level information used for ongoing health and safety maintenance or for handling of emergency situations. The types of information that can be recorded include:

- Scheduled medical exams
- Medical exam results
- Employee blood type
- Allergies
- Disabilities
- Religious preferences
- Native language
- Emergency contacts
- Physician names and contact information
- On-the-job accident and injury details

In addition, Cyborg's products provide important tie-ins between health and safety incidents to employee salary and benefits and job-performance appraisals that may be affected. It also provides the reporting capability required for management analysis of health and safety information.

The information recorded can help your organization fulfill its legally-mandated recordkeeping obligations. It provides evidence of required health and safety monitoring. This information is essential to properly monitor on-the-job health risks and to meet the legal implications potentially associated with any on-the-job accident, injury, or illness.

The system will help your organization efficiently manage employee health and safety. This allows employees to perform to their fullest potential and allows management to focus more on achieving organizational objectives rather than on the details of resolving avoidable health and safety problems.

See also:

- Recording employee health information ***(on page 298)***

For detailed directions on recording employee health information.

Note: *If you are using eCyborg Interactive Workforce, employees can view and maintain their physician, emergency contact, and smoker information online.*

Apply the Concept
What are the advantages of tracking health and safety information for your employees?

Using the health and safety functionality

The system allows you to create a health and safety profile on new and existing employees. You may choose to begin gathering information to create a health and safety profile on potential employees during the applicant recruitment stages. This information, if entered, will transfer to the employee's record at time of hire. Or, you may choose to begin entering this type of data and actively maintain it after the employee is hired. The Health and Safety forms can be accessed by using applicant organizations or active organizations.

A Health and Safety profile is helpful in emergency situations and should include the following information:

- Blood type and allergies—Emergency Medical Information form (15-SCR).
- Smoker/non-smoker status—Emergency Medical Information form (15-SCR).
- Disabilities and any resulting work restrictions—Injury/Illness And Work Restriction form (17-SCR).
- On-the-job accident and injury information—Injury/Illness And Work Restriction form (17-SCR) is used to record if an employee is disabled and/or has any work-related restrictions. The Injury Information form (PR-SCR) is used to record employee injury and illness information.
- Physician and emergency contact information—Emergency Contact/Physician form (16-SCR).
- On-the-job accident and injury information—Injury/Illness And Work Restriction form (17-SCR) is used to record if an employee is disabled and/or has any work-related restrictions. The Injury Information form (PR-SCR) is used to record OSHA or non-OSHA related employee injury and illness information. The Additional Injury Information form (PROSCR) is used to store supplemental information for an initial injury or illness event. This form contains only data related to OSHA-reportable events.
- Results of physical exams—Physical Exam Scheduled/Completed form (18-SCR) is used to record information about the physical examinations an employee or applicant has taken or is scheduled to take. Several fields on this form provide information to the OSHA 300 record keeping reports. The information may or may not be related to an OSHA injury or illness event. The Physical Exam Test/Results form (29-SCR) is used to record the tests an employee or applicant received during a scheduled physical examination. Medical test results may also be recorded.

Establishing data for government compliance

The system provides two reports for government compliance reporting: The OSHA Form 200- Lost Time Totals report (3Q-RPT) and the OSHA Form 200 - Lost Time Details report (3S-RPT). These reports provide analyses of injuries, locations, time lost, disability or worker's compensation status, and the OSHA qualifications. Use the Injury Information form (PR-SCR) to record this information.

Three other reports are available for employers who are responsible for OSHA Establishment reporting:

- OSHA Form 300 Log of Work-Related Injuries and Illnesses (20-RPT)
- OSHA Form 300A Summary of Work-Related Injuries and Illnesses (21-RPT)
- OSHA Form 301 Injury and Illness Incident Report (22-RPT)

To correctly generate these reports, the following forms must be completed if applicable to the injury or illness:

- Location Assignment/Changes (05CSCR)
- Injury Information (PR-SCR)
- Additional Injury Information (PROSCR)
- Physical Exam Scheduled/Completed (18-SCR)

Employee OSHA location

You may specify the number assigned to the OSHA Establishment to which the employee usually reports by using the OSHA Establishment (option list HS52) on the Locations/Assignment Changes form (05CSCR). This satisfies the requirements of the new OSHA Form 300A Summary of Work-Related Injuries and Illnesses.

This entry is tied to the OSHA Establishment Information form (OE-SCR), where the establishment information is stored. It is also tied to the Additional Injury Information form (PROSCR), where the OSHA Establishment site of the injury must be reported.

☞ *Refer to the Implementing the Human Resources Administration documentation for more information about setting up the OSHA Establishment Information form (OE-SCR).*

The option—Chg to OSHA Est (C40)—in the Location Chng Reason option list (HR65) allows modification of the establishment location.

Employee injury information

The Injury Information form (PR-SCR) is used to store information related to an initial injury or illness event by the initial occurrence date, rather than by subsequent events related to that initial event. This form may store non-OSHA related data for an employee as well.

You may use the Days Transferred text box to represent the number of days the employee was assigned to another job on a temporary basis because of the illness or injury.

The Most Serious Result list box (option list HS51) stores the classification of the most serious outcome associated with the injury/illness case recorded on the form. Each of these values is considered an escalating event from highest to lowest code (40-10).The values for this list box are as follows:

Code	Description
#	(None)

Code	Description
10	Death Employee died as a result of work-related illness or injury
20	Days away from work Employee experienced days away from work as a result of work-related illness or injury
30	Transfer or Restriction Employee remained at work but was transferred or restricted due to work-related illness or injury
40	Other Recordable Cases Employee remained at work but experienced an OSHA-recordable illness or injury

The first character of the Injury Code represents whether an illness or injury has occurred, and its type. The first character of the Injury Code must be a 1, 2, 3, 4, 5, 6, 7, 8, 9, or A. The remaining characters are user-defined.

The first character must conform with the following definitions so that OSHA reporting can properly classify and display the injury/illness totals.

Option Code	Illness	Injury	OSHA Report 300 column
1	Skin Disease – Disorders or illnesses caused by work exposure to chemicals, plants, or other substances		Skin disorder
2	Lung Dust – Disorders of the lungs (Pneumoconioses)		Respiratory condition
3	Respiratory – illnesses associated with breathing hazardous biological agents, chemicals, dust, gases, vapors or fumes at work		Respiratory condition
4	Poisoning –examples: disorders evidenced by abnormal concentrations of toxic substances in blood, other tissues, other bodily fluids or the breath that are caused by the ingestion or absorption of toxic substances into the body.		Poisoning
5	Disorder – agents: Disorders due to physical agents (other than toxic materials)		All other illnesses

Option Code	Illness	Injury	OSHA Report 300 column
6		Disorder – trauma: Disorders associated with repeated trauma	Injury
7	Other illness – All other occupational illnesses. Examples: heatstroke, sunstroke, heat exhaustion, heat stress and other effects of environmental heat; freezing, frostbite and other effects of exposure to low temperatures; decompression sickness; effects of ionizing radiation (isotopes, x-rays, radium); effects of nonionizing radiation (welding flash, ultra-violet rays, lasers); anthrax; blood borne pathogenic diseases such as AIDS, HIV, hepatitis B or hepatitis C; brucellosis; malignant or benign tumors; histoplasmosis; coccidioidomycosis.		All other illnesses
8	User defined		All other illnesses
9	User defined		All other illnesses
A		Injury – any wound or damage to the body resulting from an event in the work environment.	Injury

Employee additional injury information

You must use the Additional Injury Information form (PROSCR) to store supplemental information for an initial injury or illness event if you are reporting an OSHA event. This form contains only data related to OSHA-reportable events. The information on this form supports the requirements of OSHA Form 300 Log of Work-Related Injuries and Illnesses (20-RPT) and OSHA Form 301 Injury and Illness Incident Report (22-RPT).

A special 'Privacy Case' indicator allows you to display the text 'PRIVACY CASE' instead of personally identifiable information on the OSHA Forms 300 and 301. The following types of cases MUST be considered privacy concern cases:

- An injury or illness to an intimate body part or to the reproductive system
- An injury or illness resulting from a sexual assault
- A mental illness
- A case of HIV infection, hepatitis, or tuberculosis
- A needlestick injury or cut from a sharp object that is contaminated with blood or other potentially infectious material
- Other illnesses, if the employee independently and voluntarily requests that his or her name not be entered on the log

The OSHA 'Reportable' or 'Non-reportable' selection on this form specifies whether or not the injury or illness is reportable to OSHA. The OSHA Form 300 utilizes this indicator to determine whether or not the injury/illness will be included in the report.

Physical exam information

Several entries on the Physical Exam Scheduled/Completed form (18-SCR) provide information to the OSHA 300 record keeping reports. The information may or may not be related to an OSHA injury or illness event. The Claim Nbr text box is the OSHA case number; it is used to determine the first exam occurrence for correct reporting on OSHA Form 301. Options in the Type of Exam list box (option list HS07) that will be used for OSHA reporting are:

- OSHA Scheduled (9)
- Post-Accident Chemcl (7)
- Post-Accident Physcl (8)

See also:

- Recording disabilities and work restrictions ***(on page 300)***

For detailed directions on recording disabilities and work restrictions.

- Recording emergency contact and physician information ***(on page 302)***

For detailed directions on recording emergency contact and physician information.

- Scheduling physical exams ***(on page 306)***

For detailed directions on scheduling physical exams.

- Entering physical exam results ***(on page 309)***

For detailed directions on entering physical exam results.

- Recording illness and injury information ***(on page 311)***

For detailed directions on recording illness and injury information.

Language and religion information

During the applicant recruiting process, or after hiring a new employee, you may want to record information regarding an employee's native language and religious preference. If entered in the applicant organization, this information transfers with the employee record to the active organization. Language and religion information could be useful in emergency situations and is recorded on the Phone Numbers And Employment Information form (03-SCR).

See also:

- Recording language and religion information (optional) ***(on page 304)***

For detailed directions on recording language and religion information (optional).

Health implications for Benefits Administration

Health and safety data you have recorded for your employees may have a direct impact on the area of benefits administration. For example, in many organizations employees who smoke pay more for their benefits than do non-smokers. There could also be associated legal ramifications. It is possible the government could make judgments or set employee safety standards based on the information you track regarding employee health and safety. Governmental organizations may require reporting from your employee health and safety records.

Health and safety reports and their uses

The following is a list of reports related to employee health and safety:

- Blood Donors report (3H-RPT)—Provides a list of those employees who have indicated that they are willing to donate blood. This information is recorded on the Emergency Medical Information form (15-SCR).
- Disability And Work Restrictions report (5X-RPT)—Displays your employees who have disabled conditions and/or any work-related restrictions. This information is recorded on the Injury/Illness And Work Restriction form (17-SCR).
- Emergency Contact Listing report (3F-RPT)—Provides a listing of all active employees by employee name and employee number, including the emergency contact name and address, personal physician name and address, emergency phone number, and physician phone number. This information is recorded on the Emergency Contact/Physician form (16-SCR).
- Emergency Medical Information report (5W-RPT)—Displays emergency medical information recorded on the Emergency Medical Information form (15-SCR) for active employees.
- Injury/Illness Report (3R-RPT)—Provides a listing of general information regarding injuries and recorded illnesses. This information is recorded on the Injury Information form (PR-SCR).
- OSHA Form 200 Lost Time Totals report (3Q-RPT)—Provides the injury and illness totals necessary for OSHA reporting.
- OSHA Form 200 Lost Time Detail report (3S-RPT)—Provides injury and illness details necessary for OSHA reporting.
- OSHA Form 300 Log of Work-Related Injuries and Illnesses (20-RPT)—Displays the information that satisfies the record keeping requirements for employers subject to the Occupational Safety and Health Act of 1970.
- OSHA Form 300A Summary of Work-Related Injuries and Illnesses (21-RPT)—Displays the information that satisfies the record keeping requirements for employers subject to the Occupational Safety and Health Act of 1970.
- OSHA Form 301 Injury and Illness Incident Report (22-RPT)—Displays a separate page for each OSHA-reportable injury/illness, which satisfies the record keeping requirements for employers subject to the Occupational Safety and Health Act of 1970.

- Physical Examinations Schedule (5Y-RPT)—Displays a physical examination schedule. The information recorded on the Physical Exam Scheduled/Completed form (18-SCR) is displayed on this report.

Detailed Directions

This section provides detailed directions on completing a business task.

Tasks

Completing the Guided Practice

You must have completed the Guided Practices in the prior sections to guarantee the successful completion of the Guided Practice in this section. In the Guided Practice for this section, you will be recording health and safety information for employee number 0012, Andrew Anders, in the 999999 organization.

Recording employee health information

To record employee health information, follow these steps:

1. Access the Emergency Medical Information form (15-SCR)

The Emergency Medical Information form (15-SCR) is used to record personal and health related information that may be helpful in an emergency. You may want to record this data if your employees participate in a Blood Donor program or if you have a company medical facility. The information on this form may be helpful to your medical staff in treating employees in a medical emergency.

Access this form by making the following selection from the Navigator:

Component: Employee Relations
Process: Manage Employee Health and Safety
Task: Blood Type/Allergies

For practice, access the Emergency Medical Information form (15-SCR) for employee number 0012, Andrew Anders.

2. Enter the Effective Date

Enter the date the emergency information was effective or is being recorded. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '01-01-1998'.

3. Select the Disability

Select the option that identifies an employee's disability. You may update this option list (HS03) to include all of the disabilities needed by your organization.

For practice, select 'Allergic/Endocrine'.

4. Select the Blood Type

Select the employee's blood type.

For practice, select 'Type A RH Positive'.

5. Enter the Last Donation

Enter the date when the employee last donated blood. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '12-07-1980' (US and Canada) or '07-12-1980' (elsewhere).

6. Click the Will Donate Blood check box

Click this check box if the employee is willing to donate blood.

For practice, click 'Will Donate Blood'.

7. Click the Employee Smokes check box

Click this check box only if the employee smokes.

For practice, do not click this check box.

8. Select the Allergies

Select the allergic condition(s) that apply to this employee.

For practice, select 'Aspirin' in the first allergy list box.

9. Select additional Allergies

Select additional allergic condition(s) which apply to this employee.

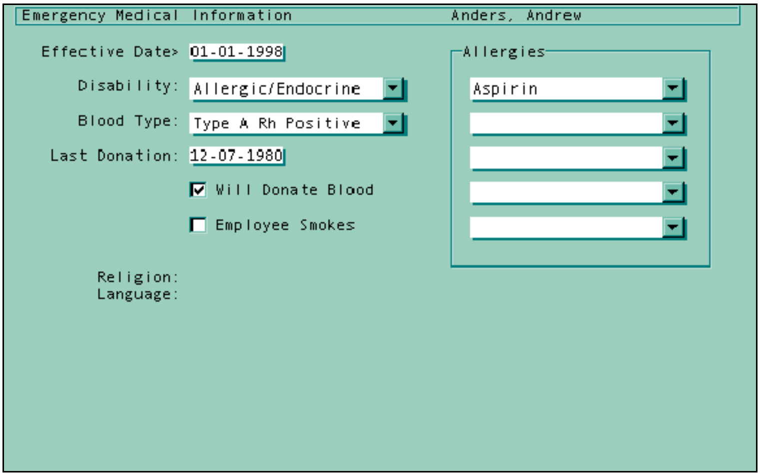
For practice, leave the remaining allergy list boxes unselected.

10. Click Save or press Enter

The Emergency Medical Information form (15-SCR) is recorded.

For practice, click Save or press Enter.

If you completed the guided practice, the resulting form should look similar to the example that follows:



See also:

- Employee health and safety ***(on page 287)***

For an explanation of the contents and use of this form.

Recording disabilities and work restrictions

To record disabilities and work restrictions, follow these steps:

1. Access the Injury/Illness And Work Restriction form (17-SCR)

The Injury/Illness And Work Restriction form (17-SCR) is used to record an employee's disabled condition (if any) and/or any work-related restrictions.

Access this form by making the following selection from the Navigator:

Component: Employee Relations
Process: Manage Employee Health and Safety
Task: Disabilities/Restrictions

For practice, access the Injury/Illness And Work Restriction form (17-SCR) for employee number 0012, Andrew Anders.

2. Enter the Effective Date

Enter the date the emergency information was effective. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '01-01-1998.

3. Select the Work Restriction

Select the employee's work restriction. You may update this option list (HS05) to include all of the work restrictions needed by your organization.

For practice, select 'Chemical Allergies'.

4. Select the Injury/Illness

Select the option that best identifies the employee's condition. You may update this option list (HS04) to include all of the disabilities needed by your organization.

For practice, select 'Respiratory Condition'.

5. Enter the Restriction Date

Enter the date the employee's disability occurred. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

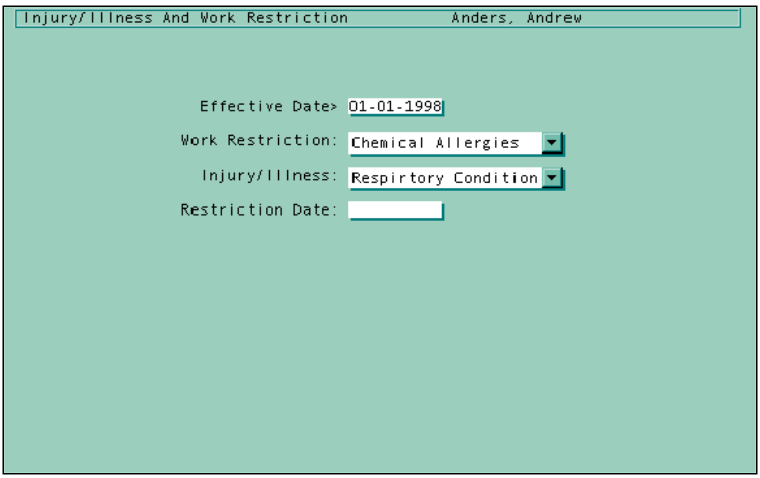
For practice, leave this text box blank.

6. Click Save or press Enter

The Injury/Illness And Work Restriction form (17-SCR) is recorded.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



See also:

- Using the health and safety functionality ***(on page 289)***

For additional information on using this form.

Recording emergency contact and physician information

To record physician and emergency contact information, follow these steps:

1. Access the Emergency Contact/Physician form (16-SCR)

The Emergency Contact/Physician form (16-SCR) is used to record emergency contact information for an employee. This information includes the person(s) to contact in the case of an emergency, the employee's personal physician(s), and the phone number and address of these individuals.

Note: *Adding physician data is an optional feature. Most organizations do not enter this data, because an employee's physician can change frequently. However, it is helpful to add this data if the employee has a known medical problem that may require immediate attention from a personal physician.*

Access this form by making the following selection from the Navigator:

Component: Employee Relations
Process: Manage Employee Health and Safety
Task: Physicians and Emergency Contacts

For practice, access the Emergency Contact/Physician form (16-SCR) for employee number 0012, Andrew Anders.

2. Enter the Emergency Key

Enter a three-character identifier to separate multiple emergency records for a given employee.

Note: *The Emergency Key for the primary contact must always be '001'. This is the individual that will appear on the Emergency Contact Listing report and the ESS Emergency Doctor page, even if there are multiple emergency contacts listed. Other emergency contacts could be numbered '002' for the employee's parent, '003' for the employee's neighbor, and so on.*

For practice, type '001'.

3. Enter the Contact

Enter the name of the individual that the employee has authorized to contact in an emergency. Enter the name in the following format: Last Name, (comma/blank) First Name (blank) Middle Initial (period).

For practice, type 'Goodman, Ronald P.'

4. Enter the Area Code/Phone

Enter the telephone number of the person to contact in an emergency.

For practice, type '505 456-7890'.

5. Enter the Address

Enter the street address of the person to contact in an emergency.

For practice, type '2750 Monroe Place'.

6. Enter the City/State

Enter the city and state portion of the emergency contact's address.

For practice, type 'Chicago, IL'.

7. Enter the ZIP Code

Enter the postal code for the emergency contact's address.

For practice, type '60606'.

8. Enter the Physician (optional)

Enter the name of the physician the employee requests you contact in case of an emergency. Enter the name in the following format: Last Name, (comma/blank) First Name (blank) Middle Initial (period).

For practice, type 'Johnson, Dr. Robert L.'

9. Enter the Area Code/Phone

Enter the telephone number of the physician to contact in an emergency.

For practice, type '901 957-4321'.

10. Enter the Address

Enter the street address of the physician to contact in an emergency.

For practice, type '8000 Medical Plaza'.

11. Enter the City/State

Enter the city and state portion of the physician's address.

For practice, type 'Chicago, IL'.

12. Enter the ZIP Code

Enter the postal code for the physician's address.

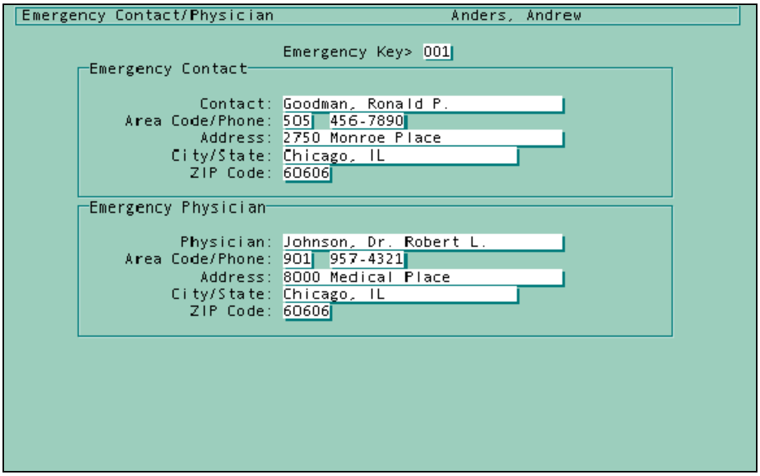
For practice, type '60606'.

13. Click Save or press Enter

The Emergency Contact/Physician form (16-SCR) is recorded.

For practice, click Save or press Enter.

If you completed the guided practice, the resulting form should look similar to the example that follows:



Emergency Contact/Physician Anders, Andrew

Emergency Key> 001

Emergency Contact

Contact: Goodman, Ronald P.
Area Code/Phone: 505 456-7890
Address: 2750 Monroe Place
City/State: Chicago, IL
ZIP Code: 60606

Emergency Physician

Physician: Johnson, Dr. Robert L.
Area Code/Phone: 901 957-4321
Address: 8000 Medical Place
City/State: Chicago, IL
ZIP Code: 60606

See also:

- Using the health and safety functionality ***(on page 289)***

For additional information on using this form.

Recording language and religion information (optional)

The Phone Numbers And Employment Information form (03-SCR) is used to enter and track an employee's language and religion. If it is entered on this form, it will also display on the Emergency Medical Information form (15-SCR), if this form has been activated/entered for an employee. From a medical standpoint, the Emergency Medical Information form (15-SCR) is the preferred location for language and/or religion information, particularly if pastoral intervention is needed quickly.

☞ *Refer to* **Hiring, Rehiring, Reinstating, Recalling, or Transferring an Employee** *(on page 83) for more information on completing this form.*

To enter language and religion details, follow these steps:

1. Access the Phone Numbers And Employment Information form (03-SCR)

The Phone Numbers And Employment Information form (03-SCR) is used to record information about an employee's language and religion.

Access this form by making the following selection from the Navigator:

Component: Employee Resourcing
Process: Maintain Basic Employee Details
Task: Telephone/Previous Applicant Info

For practice, access the Phone Numbers And Employment Information form (03-SCR) for employee number 0012, Andrew Anders.

2. Enter the Effective Date (optional)

Enter the effective date for this entry. However, it this form has already been entered for the employee, no entry needs to be made here. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, leave this text box blank.

3. Select the Language

Select the employee's native language.

For practice, select 'Danish'.

4. Select the Religion

Select the employee's religious preference.

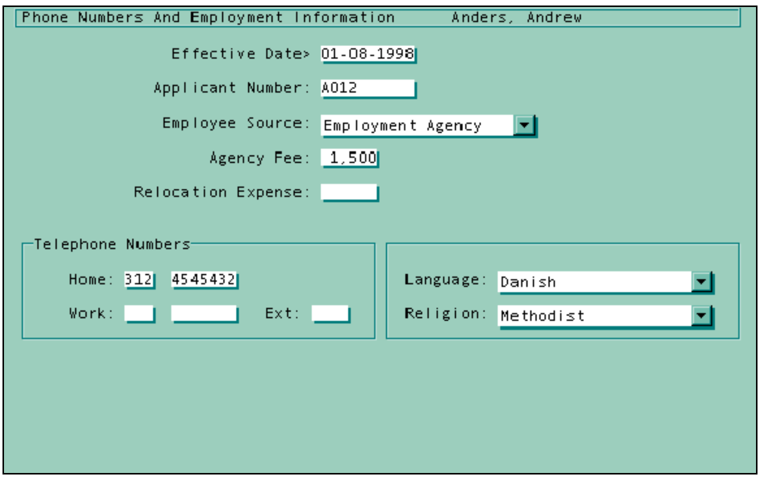
For practice, select 'Methodist'.

5. Click Save or press Enter

The language and religion information is recorded on the Phone Numbers And Employment Information form (03-SCR). This information is now updated and will display on the Emergency Medical Information form (15-SCR).

For practice, click Save or press Enter.

If you completed the guided practice, the resulting form should look similar to the example that follows:



See also:

■ Language and religion information ***(on page 294)***
For an explanation of the contents and use of this form.

Scheduling physical exams

To schedule physical exams, follow these steps:

1. Access the Physical Exam Scheduled/Completed form (18-SCR)

The Physical Exam Scheduled/Completed form (18-SCR) is used to record information about the physical examinations an employee or applicant has taken or is scheduled to take.

Access this form by making the following selection from the Navigator:

Component: Employee Relations
Process: Manage Employee Health and Safety
Task: Physical Exams Scheduled/Completed

For practice, access the Physical Exam Scheduled/Completed form (18-SCR) for employee number 0012, Andrew Anders.

2. Enter the Date Recorded

Enter the date on which the physical examination data was recorded. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '01-01-1998'.

3. Select the Type Of Exam

Select the type of physical examination scheduled or taken by the employee or applicant. You may update this option list (HS06) to include all of the examination types needed by your organization.

Valid delivered options for OSHA reporting are:

- OSHA Scheduled
- Emergency
- Post-Accident Chemcl
- Post-Accident Physcl

For practice, select 'Insurance'.

4. Enter the Claim Nbr

Type the OSHA case number, used to determine the first exam occurrence for reporting on OSHA Form 301.

For practice, leave ths entry blank.

5. Select the Physician

Select the physician who is in charge of the employee's or applicant's physical examination.

For practice, select 'Bechtel, Dr. Mary'.

6. Select the Exam Reason

Select the reason why the physical examination is to be performed. You may update this option list (HS07) to include all of the reasons needed by your organization.

For practice, select 'Required Insurance'.

7. Enter the Cost

Enter the cost of the physical examination. This is an eight-digit text box with two decimal places. For OSHA purposes, this may be the cost the employer pays for the OSHA examination.

Note: *This information may be taken into consideration when reporting on an employee's total compensation package.*

For practice, type '65.00'.

8. Enter the Date Scheduled

Enter the date on which the physical examination is scheduled to be performed. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '03-18-1998' (US and Canada) or '18-03-1998' (elsewhere).

9. Enter the Date Taken

Enter the date on which the physical examination was actually performed. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '03-18-1998' (US and Canada) or '18-03-1998' (elsewhere).

10. Select the Facility

Select the location where the physical examination will be. You may update this option list (HS089) to include all of the physical examination locations needed by your organization.

For practice, select 'Main Plant Medical'.

11. Enter the Address

Type the address of the facility where the exam or treatment took place, if away from the work site.

For practice, leave this entry blank.

12. Enter the City/ST

Type the city and state of the facility where the exam or treatment took place, if away from the work site.

For practice, leave this entry blank.

13. Enter the ZIP Code

Type the postal code of the facility where the exam or treatment took place, if away from the work site.

For practice, leave this entry blank.

14. Select the Result

Select the overall outcome of the physical examination. This option may also indicate whether or not an additional examination is required.

For practice, since we are only scheduling the exam, leave this list box blank.

15. Click the Exam Provided As Perq check box

Click this check box if the examination was provided to the employee/applicant as a perquisite.

For practice, do not click this check box.

16. Click the Emergency Room check box

Click this check box if the employee was treated in an emergency room for an OSHA-reportable event.

For practice, do not click this check box.

17. Click the Hospitalized Overnight check box

Click this check box if the employee stayed in the hospital as an inpatient for an OSHA-reportable event.

For practice, do not click this check box.

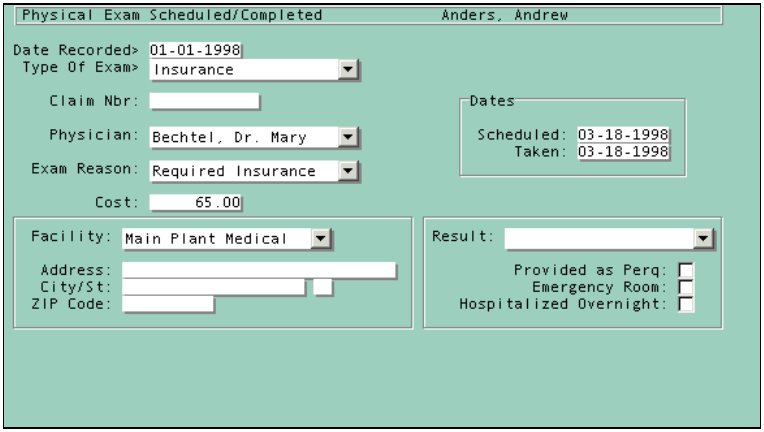
18. Click Save or press Enter

The Physical Exam Scheduled/Competed form (18-SCR) is recorded.

Note: *To continue recording the injury/illness information, access the Injury Information form (PR-SCR) and the Additional Injury Information form (PROSCR) from the menu or Navigator.*

For practice, click Save or press Enter.

If you completed the guided practice, the resulting form should look similar to the example that follows:



See also:

- Establishing data for government compliance ***(on page 289)***

For additional information on using this form.

Entering physical exam results

To enter physical exam results, follow these steps:

1. Access the Physical Exam Test/Results form (19-SCR)

The Physical Exam Test/Results form (19-SCR) is used to record the tests and results of a scheduled physical examination of an employee or applicant.

Access this form by making the following selection from the Navigator:

Component: Employee Relations
Process: Manage Employee Health and Safety
Task: Physical Exam Tests/Results

For practice, access the Physical Exam Test/Results form (19-SCR) for employee number 0012, Andrew Anders.

2. Enter the Date Of Physical

Enter the same date as the 'physical scheduled' or 'physical taken' date. The date selection depends on whether you enter the date before or after the physical examination is performed. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '03-18-1998' (US and Canada) or '18-03-1998' (elsewhere).

3. Enter the Form Number

Enter the number of this form. This allows multiple sets of physical examination tests to be entered for an employee or applicant.

For practice, type '1'.

4. Select the Tests/Results 1

Select the physical examination tests. Multiple sets of tests may be entered.

For practice, select 'Cardiovascular Stres' for the first Test list box.

5. Enter the Results

Enter the result of the corresponding physical examination test. This is a free-form text box to use as needed for any individual test result.

For practice, type 'Normal' in the first Results text box.

6. Select the Tests/Results 2

Select the physical examination tests. Multiple sets of tests may be entered.

For practice, select 'Alcohol, Blood Chem' for the second Test list box.

7. Enter the Results

Enter the result of the corresponding physical examination test. This is a free-form text box to use as needed for any individual test result.

For practice, type 'Normal' in the second Results text box.

8. Select the Tests/Results 3

Select the physical examination tests. Multiple sets of tests may be entered.

For practice, select 'Carbon Monoxide' for the third Test list box.

9. Enter the Results

Enter the result of the corresponding physical examination test. This is a free-form text box to use as needed for any individual test result.

For practice, type 'High' in the third Results text box.

10. Select the Tests/Results 4

Select the physical examination tests. Multiple sets of tests may be entered.

For practice, select 'Drug Screen' for the fourth Test list box.

11. Enter the Results

Enter the result of the corresponding physical examination test. This is a free-form text box to use as needed for any individual test result.

For practice, type 'Passed' in the fourth Results text box.

12. Click the More check box or the Last check box

Click 'More' if there are additional tests/results to be entered than can be entered on the first form. Click 'Last' if all of the tests/results have been entered.

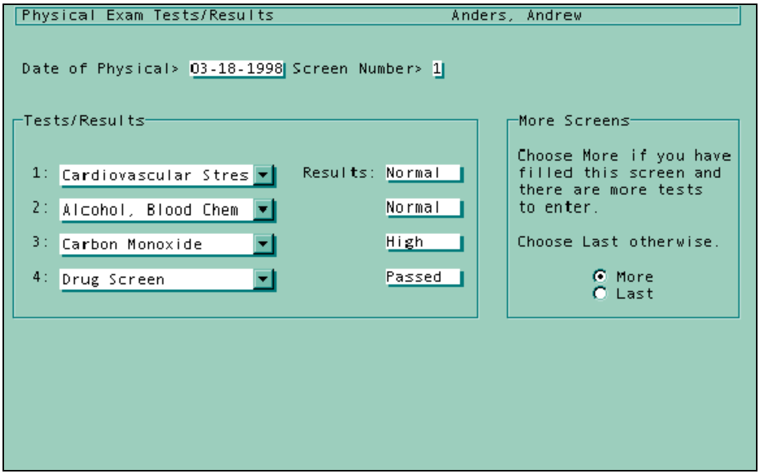
For practice, do not click the check boxes.

13. Click Save or press Enter

The Physical Exam Test/Results form (19-SCR) is recorded.

For practice, click Save or press Enter.

If you completed the guided practice, the resulting form should look similar to the example that follows:



See also:

- Using the health and safety functionality ***(on page 289)***

For additional information on using this form.

Recording illness and injury information

To record illness and injury information, follow these steps:

1. Access the Injury Information form (PR-SCR)

The Injury Information form (PR-SCR) is used to record illness and injury information that is used for government compliance reporting.

Access this form by making the following selection from the Navigator:

Component: Employee Relations
Process: Manage Employee Health and Safety
Task: Illness/Injury Status

For practice, access the Injury Information form (PR-SCR) for employee 3001, Alexander Bloom.

2. Enter the Injury Date

Enter the date that the injury or initial illness diagnosis took place. If an absence of work occurred before the diagnosis of illness, use this entry to record the first day of the absence attributable to the illness that was later diagnosed or recognized. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '01-05-1999' (US and Canada) or '05-01-1999' (elsewhere).

3. Enter the Injury Code

Enter the code corresponding to the type of illness or injury that the employee has. The text box allows up to 4 alphanumeric characters. The first position must follow the Cyborg-defined coding scheme because all Cyborg-delivered reports are coded to use the first position in a consistent manner. The remaining positions are user-defined.

For practice, type 'A001'.

4. Enter the Injury

Enter a description of the illness or injury.

For practice, type 'Chronic Back Pain'.

5. Enter the Claim Number

Enter the claim number associated with the illness or injury. This is the OSHA case number and can contain letters and dashes, if appropriate.

For practice, type 'D-7654'.

6. Enter the Days Lost

Enter the number of days that the employee was absent from work due to the illness or injury, starting from the day after the event occurred.

For practice, type '7'.

7. Enter Days Restricted

Enter the number of days that the employee was not working in his or her normal capacity, starting from the day after the event occurred. The employee may be assigned to another job on a temporary basis, working at his or her permanent job less than full time, or otherwise be unable to perform normal duties due to the illness or injury.

For practice, type '5'.

8. Enter Days Transferred

Enter the number of days that the employee was assigned to another job on a temporary basis because of the injury/illness.

For practice, leave this entry blank.

9. Enter the Home Department

Enter the user-defined code for the department to which the employee is regularly assigned.

For practice, type '3131'.

10. Select the Most Serious Result

Select the classification of the most serious outcome associated with the injury/illness case recorded on this form. Options for this list box are listed in the Most Serious Result option list (HS51). This entry may be changed subsequently to report a more serious result.

For practice, select 'Transfer or Restrict'.

11. Click the Still Missing Days/Restricted Work check box

Click this check box if the employee is still losing days or is in restricted status due to the illness or injury.

For practice, do not check this box.

12. Select the Litigation

Select the appropriate option to indicate the status of litigation as a result of the illness or injury.

For practice, select 'No Litigation'.

13. Select the Disability Type

Select the appropriate option to indicate whether or not a Disability Claim was filed.

For practice, select 'No Disability'.

14. Select the OSHA

Select the appropriate option to indicate whether or not the illness or injury was reported to OSHA.

For practice, select 'Reportable'.

15. Select the Worker's Compensation

Select the appropriate option to indicate whether or not the employee has received Worker's Compensation for the illness or injury.

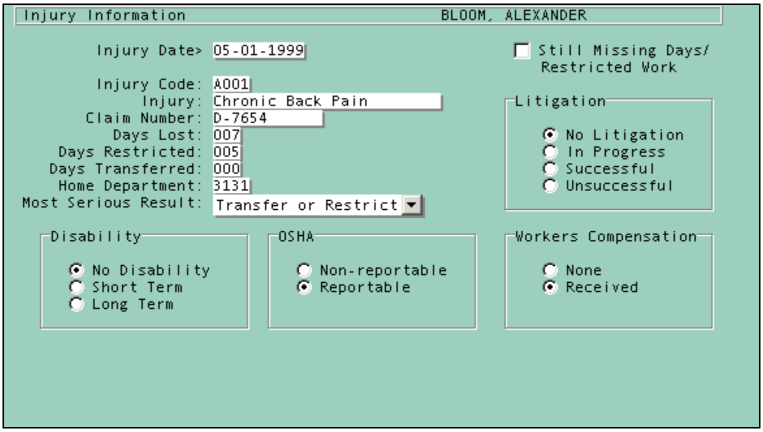
For practice, select 'Received'.

16. Click Save or press Enter

The Injury Information form (PR-SCR) is recorded.

For practice, click Save or press Enter.

If you completed the guided practice, the resulting form should look similar to the example that follows:



See also:

- Establishing data for government compliance ***(on page 289)***

For more information about government compliance reporting.

Recording additional injury information

To record OSHA-related injury information using the Additional Injury Information form (PROSCR), follow these steps:

1. Access the Additional Injury Information form (PROSCR)

The Additional Injury Information form (PROSCR) is used to record injury or illness information that is used for government compliance reporting. This form contains only data related to OSHA-reportable events.

Access this form by making the following selection from the Navigator:

Component: Employee Relations
Process: Manage Employee Health and Safety
Task: Additional Injury Information

2. Enter the Injury Date

Enter the date on which the injury or initial illness diagnosis took place. If an absence of work occurred before the diagnosis of illness, use this entry to record the first day of the absence attributable to the illness that was later diagnosed or recognized. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

3. **Click the Privacy Case**

   Use this entry to specify whether the injury or illness is of a privacy concern. If this check box is selected, the employee's personally identifiable information will be suppressed on OSHA reports that are run with a privacy parameter.

   The following types of cases MUST be considered privacy concern cases:

   - An injury or illness to an intimate body part or to the reproductive system
   - An injury or illness resulting from a sexual assault
   - A mental illness
   - A case of HIV infection, hepatitis, or tuberculosis
   - A needlestick injury or cut from a sharp object that is contaminated with blood or other potentially infectious material
   - Other illnesses, if the employee independently and voluntarily requests that his or her name not be entered on the log

4. **Select the Report OSHA Est**

   Select the OSHA Establishment for which the injury should be reported. This option list (HS52) is user-defined and may be updated to meet the needs of your organization.

5. **Enter Where did the event occur**

   Type a short description of where the event occurred, for example, 'Loading dock north end'.

6. **Enter What object or substance harmed employee**

   Type a short description of the object or substance that harmed the employee. Leave this entry blank if it does not apply to the event.

7. **Enter What happened**

   Type a short description of how the injury occurred. Text may be abbreviated to fit into this text box.

8. **Enter What employee was doing before the incident**

   Type a short description of the employee activity as well as the tools and equipment being used.

9. **Enter the Time Employee Started**

   Type the time the employee began work on the day of the event. You may right-click the text box to display a Show Clock dialog from which you can select the time entry.

10. **Enter the Time Injury Occurred**

    Type the time of the event. You may right-click the text box to display a Show Clock dialog from which you can select the time entry. If the entry is left blank, then the OSHA 301 report will display the phrase 'Not determined'.

11. **Click Save or press Enter**

    The Additional Injury Information form (PROSCR) is recorded.

Note: *To continue recording the injury/illness information, access the Injury Information form (PR-SCR) from the menu or Navigator.*

Review of Questions Answered

1. How is the health and safety functionality used in the system?

2. What is the advantage of recording language and religion information for your employees?

3. What is the possible impact of health and safety information on Benefits Administration?

CHAPTER 10

Tracking Discipline and Grievances

In This Chapter

Introduction

Tracking your organization's employee discipline and grievances starts with having appropriate procedures in place. These procedures allow you to manage discipline and grievance issues from the inception of a problem to any action taken by the organization. Cyborg's products provide functionality that enables you to track discipline and grievances, review procedures and legal requirements, investigate cases, conduct meetings or hearings, and to record any actions taken.

Tasks

This section explains the following:

- Tracking disciplinary actions
- Tracking grievances

Prerequisites

Before you can perform the tasks in this section, the following must be established:

- You must have implemented and added your employees to the system.

☞ *Refer to* **Recruiting and Selecting Employees** *(on page 33) and* **Hiring, Rehiring, Reinstating, Recalling, or Transferring an Employee** *(on page 83) for more information.*

Questions answered

The following questions are answered in this section:

1. How are employee grievances and disciplinary actions recorded using the system?
2. What reports are available to track employee grievances and disciplinary actions taken by the organization?

Overview of tracking disciplinary and grievance actions

Just as the feeling that employee health and safety considerations in the work environment have been met is critical to a worker's ability to contribute effectively, a feeling that an employee's grievances (or the organization's disciplinary actions against the employee) are handled appropriately is critical to the worker's peace of mind, morale, and motivation to perform well for the organization.

Disciplinary actions

Disciplinary actions are generally directed at the employee by a supervisor or manager in response to what the organization perceives as poor job performance, unsafe work practices, inappropriate or ineffective dealings with other employees or with customers or clients, habitual tardiness or unplanned and unauthorized absences, and so forth. The goal of most disciplinary actions is to help employees improve their work performance and become more valuable to the organization. When disciplinary actions fail to bring about the desired improvements, the record of any disciplinary actions on file becomes a key supporting factor in the organization's decision to reassign the employee or terminate the individual's employment. Of course, some disciplinary actions deal with matters that are serious enough to warrant dismissal or demotion of an employee without the need for additional or repeated disciplinary actions.

Grievances

Employee grievances are generally directed at what the employee perceives to be poor working conditions, unfair employment or supervision practices, inequitable treatment in matters of pay or other benefits, harassment by others on the job, and so forth. Employee grievances often enable the organization to identify opportunities for improvement of job processes, procedures, or policies, or to make changes in the workforce that will boost productivity, morale, and employee health and safety. Employees who see that their grievances are being handled professionally and in a timely manner are likely to feel that they are in fact being heard by management and that their concerns are of interest to the organization. Those employees are most likely to maintain their commitment to organizational success and to providing their best work performance.

Apply the Concept
What are disciplinary actions and grievances?

Disciplinary and grievance procedures

Your organization has likely established formal procedures for handling both disciplinary actions and employee grievances. Those procedures probably require accurate, timely, and detailed recording of key information about each action. Recording and tracking disciplinary actions and grievances is important because of the possible legal implications and employee-relations issues connected with them. It also provides opportunities for improving the situations that brought about the disciplinary action or grievance.

The following is a typical disciplinary/grievance procedure:

1. Review and plan for adherence to your organization's disciplinary and grievance procedure and any applicable legal requirements.
2. Investigate the facts surrounding the disciplinary action or grievance. This investigation could include interviewing supervisors or managers, visiting the work site and observing conditions, and so forth.
3. Conduct a disciplinary meeting or grievance hearing with the employee and other concerned individuals in attendance.
4. Determine the action to be taken to resolve the grievance or to impose appropriate discipline. The action taken to resolve an employee grievance or disciplinary action may include one or more of the following:

   - Issuing a warning to the employee or others
   - Dismissal
   - Demotion
   - Reassignment
   - Counseling
   - Training
   - Changes to a policy or procedure

5. Record the results of the disciplinary meeting or grievance hearing.
6. Notify the employee (and any others affected) and take necessary action.

The system provides the foundation for managing these potentially sensitive employee-relations issues by recording employee-level information about critical dates, actions, and resulting statuses. It also provides important tie-ins or cross-references to paper documentation required for proper handling of employee disciplinary actions or grievances.

In addition, you may want to take an overall view of the level of disciplinary or grievance action occurring within your organization. The standard reporting functions provide the capability to view information recorded at the employee level in response to each instance of a grievance or disciplinary action.

Use of disciplinary and grievance actions

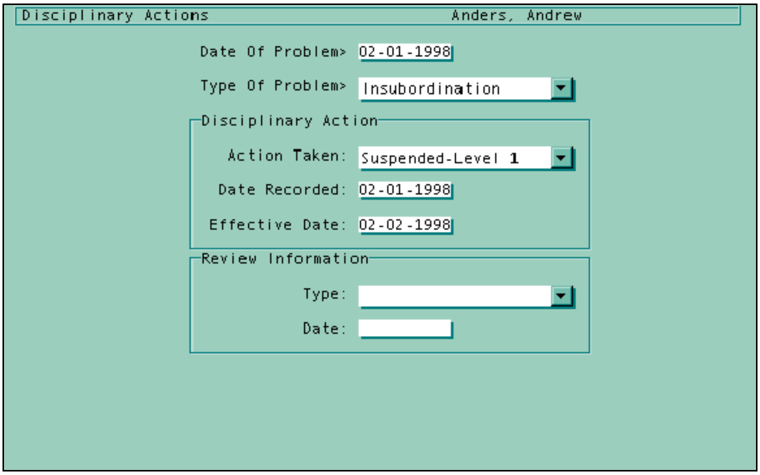
These forms are used to track employee disciplinary actions and grievance procedures:

Disciplinary Actions form (DA-SCR)

This form is used to record disciplinary actions taken against employees by your organization.

You can record the type of problem and the disciplinary actions taken. Each incident is dated to keep an accurate history of actions taken. You may also record any review information, if applicable. In the example shown below, the Disciplinary Actions form (DA-SCR) displays a disciplinary action filed against employee Andrew Anders on February 1, 1998 for insubordination. The disciplinary action taken was to issue the employee a level one suspension that became effective on February 2, 1998:

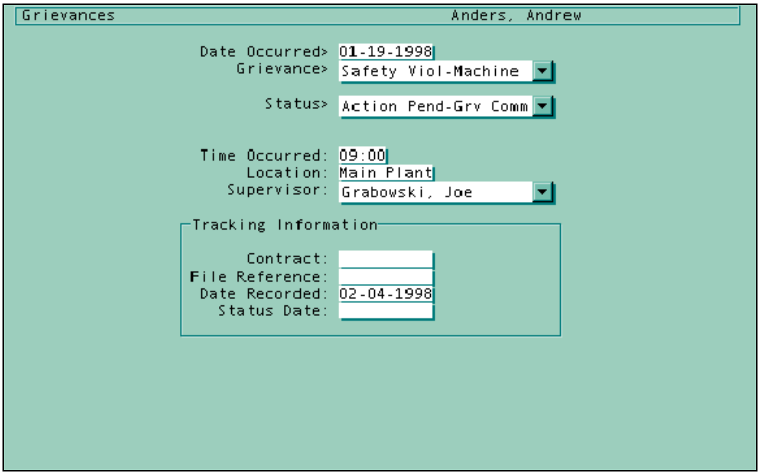
Note: *The review information area on this form provides an opportunity to record the type of disciplinary follow-up review that may be needed as a result of this disciplinary problem, as well as the date on which that follow-up review should be conducted.*



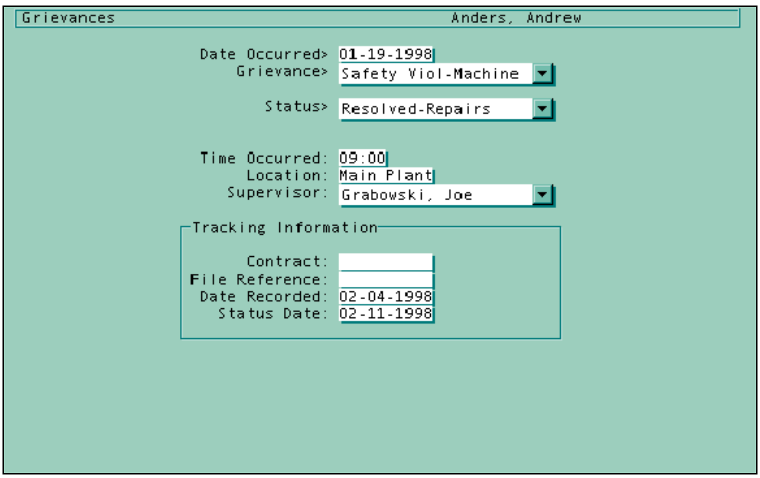
Grievances form (GT-SCR)

This form is used to record the details of grievances that are filed by your employees. A history of each time the status of a grievance changes can be tracked.

You can also track information such as supervisor name, contract number, file reference, date recorded, and status date. The first form below is an example of how the Grievances form (GT-SCR) looks initially when a grievance is filed by an employee. In this case, employee Andrew Anders has filed a grievance for a safety violation on a piece of machinery in the main plant that occurred on January 19, 1998. The violation was recorded on February 4, 1998:



The second form shows what the Grievances form (GT-SCR) looks like after resolution of the grievance. In this case, as of the status date, February 11, 1998, the machine was repaired and the grievance was resolved:



See also:

- Tracking disciplinary actions ***(on page 327)***

For detailed directions on tracking disciplinary actions.

- Tracking grievances ***(on page 329)***
For detailed directions on tracking grievances.

Disciplinary and grievance reports and their uses

The following is a list of reports that are related to employee disciplinary actions and grievances:

- Disciplinary Actions Report (3M-RPT)—Provides a summary of the disciplinary actions taken against employees by the organization as recorded on the Disciplinary Actions form (DA-SCR).

- Grievance Recording And Status Report (3V-RPT)—Provides a summary of the employee grievance information on file as recorded on the Grievances form (GT-SCR).

☞ *Refer to the* **Report Quick Reference** *(on page 421) for more information on these reports.*

Detailed Directions

This section provides detailed directions on completing a business task.

Tasks

Tracking disciplinary actions

To track disciplinary actions, follow these steps:

1. Access the Disciplinary Actions form (DA-SCR)

The Disciplinary Actions form (DA-SCR) is used to record information about disciplinary actions taken by your organization against an employee.

Access this form by making the following selection from the Navigator:

Component: Employee Relations
Process: Tracking Discipline and Grievances
Task: Track Disciplinary Actions

For practice, access the Disciplinary Actions form (DA-SCR) for employee number 1117, Richard Adams.

2. Enter the Date of Problem

Enter the date on which the action occurred that warranted disciplinary action. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '02-02-1997'.

3. Select the Type Of Problem

Select the reason for the disciplinary action. You may update this option list (ER04) to include all of the types needed by your organization.

For practice, select 'Intoxicated Drugs'.

4. Select the Action Taken

Select the disciplinary action that has taken place. You may update this option list (ER05) to include all of the disciplinary actions needed by your organization.

For practice, select 'Probation-Level 2'.

5. Enter the Date Recorded

Enter the date on which the disciplinary action is actually recorded. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '02-03-1997' (US and Canada) or '03-02-1997' (elsewhere).

6. Enter the Effective Date

Enter the date on which the disciplinary action goes into effect. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '02-03-1997' (US and Canada) or '03-02-1997' (elsewhere).

7. Select the Type

Select the review required for the disciplinary action. You may update this option list (ER06) to include all of the review types needed by your organization.

For practice, leave this list box blank.

8. Enter the Date

Enter the date the disciplinary action review is scheduled for. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

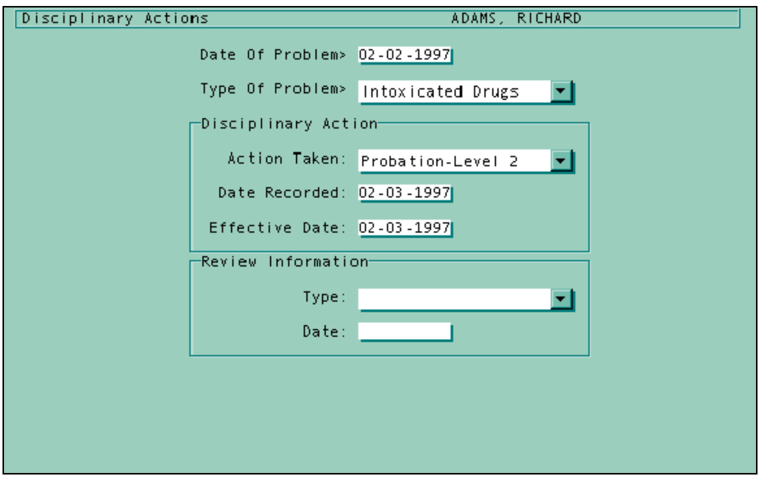
For practice, leave this text box blank.

9. Click Save or press Enter

The Disciplinary Actions form (DA-SCR) is recorded.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



See also:

- Use of disciplinary and grievance actions ***(on page 323)***

For an explanation of the contents and use of this form.

Tracking grievances

To track grievances, follow these steps:

1. Access the Grievances form (GT-SCR)

The Grievances form (GT-SCR) is used to record information regarding grievances filed by an employee.

Access this form by making the following selection from the Navigator:

Component: Employee Relations
Process: Tracking Discipline and Grievances
Task: Track Grievances

For practice, access the Grievances form (GT-SCR) for employee number 1113, Jonathan Batholow III.

2. Enter the Date Occurred

Enter the date on which the incident that prompted the grievance occurred. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '10-05-1997' (US and Canada) or '05-10-1997' (elsewhere).

3. Select the Grievance

Select the grievance that is being recorded. You may update this option list (ER01) to include all of the grievance types needed by your organization.

For practice, select 'On Call Dispute'.

4. Select the Status

Select the status of the grievance. You may update this option list (ER02) to include all of the various status descriptions needed by your organization.

For practice, select 'Action Pending-Grv Comm'.

5. Enter the Time Occurred

Enter the time (military) at which the incident that prompted the grievance occurred.

For practice, type '12:00'.

6. Enter the Location

Enter the location where the incident that prompted the grievance took place.

For practice, type 'Chicago'.

7. Select the Supervisor

Select the supervisor of the employee. You may update this option list (ER039) to include all of the supervisors needed by your organization.

For practice, select 'Carling, Martin'.

8. Enter the Contract

Enter up to a 10-digit alphanumeric reference number that indicates the location of a cross-reference in a contract (union or otherwise). This may be a legal and/or contractual reference to the occurrence of an incidence like the one that prompted the grievance.

For practice, leave this text box blank.

9. Enter the File Reference

Enter up to a 10-digit alphanumeric number or notation to identify where additional information concerning the grievance may be obtained.

For practice, leave this text box blank.

10. Enter the Date Recorded

Enter the date on which the grievance was recorded. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '10-06-1997' (US and Canada) or '06-10-1997' (elsewhere).

11. Enter the Status Date

Enter the date on which the status of the grievance was evaluated. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

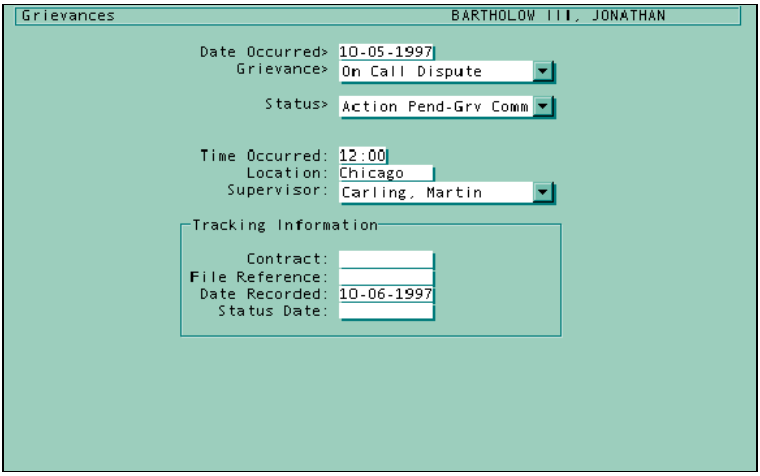
For practice, leave this text box blank.

12. Click Save or press Enter

The Grievances form (GT-SCR) is recorded.

For practice, click Save or press Enter.

If you competed the Guided Practice, the resulting form should look similar to the example that follows:



See also:

- Use of disciplinary and grievance actions ***(on page 323)***

For an explanation of the contents and use of this form.

Review of Questions Answered

1. How are employee grievances and disciplinary actions recorded using the system?

2. What reports are available to track employee grievances and disciplinary actions taken by the organization?

PART 5

Employee Compensation

In This Section

CHAPTER 11

Managing Employee Compensation

In This Chapter

Introduction

Effective management of employee compensation starts with having the proper compensation management systems in place. The management of employee compensation requires you to have a knowledge of events that trigger compensation changes and an understanding of the compensation data that is recorded. The system enables you to administer employee pay and benefits, formulate compensation policies and procedures, and develop compensation cost containment and management strategies.

Tasks

This section explains the following:

- Entering a salary change directly
- Recording monetary perquisites and bonuses
- Scheduling a future review
- Viewing the results of a salary calculation

Prerequisites

Before you can perform the tasks in this section, the following must be established:

- Salary Grade tables
- Job Code tables
- Job Points tables (optional)
- Salary assignments for each employee
- Job/position assignments for each employee
- Location assignments for each employee, if you are not using Position Administration

☞ *Refer to the Implementing Human Resources Administration documentation for information on setting up HR tables.*

Questions answered

The following questions are answered in this section:

1. What considerations are involved in managing employee compensation?
2. What are the different methods of entering salary changes?
3. Why is periodically reviewing the salary review process beneficial to your organization?
4. What are the different ways to analyze cost results?
5. What are the implications of the different system components on managing employee compensation?

Managing your employee compensation

Much more than simply 'payroll administration', employee compensation management is key to your organization's ability to recruit and retain an effective workforce, especially when integrated with the employee relations, development, and resourcing activities conducted by your organization. Compensation issues are generally viewed by employees as one of the most important considerations affecting their relationship with the organization.

Managing compensation effectively is a critical human resources management function. The system is equipped to help your organization succeed in that function by providing a range of compensation-management tools from employee-level recordkeeping to organizational budgeting and reporting.

What is compensation management?

Compensation management is the process of maintaining the types and levels of compensation that enable an organization to recruit and retain the workforce it needs to fulfill organizational objectives at an acceptable cost to the organization. In other words, it is the process of paying the right amount of money and other benefits to get the right employees with the right skills to help your organization succeed.

The key elements of compensation management

The most obvious focus of compensation management is providing types and levels of competitive wages, salaries, benefits, and other forms of compensation to your employees that allow the organization to recruit and retain suitably skilled and experienced employees. When compensation falls below competitive levels, the organization is unable to attract new employees with desired qualifications, and employee turnover increases as current employees leave the organization for better compensation elsewhere.

Designing and delivering competitive compensation is rarely accomplished without careful analysis and planning and a carefully formulated compensation strategy and policy. Keeping an organization's compensation policy effective in the face of changing market conditions is an important objective of compensation management activities.

An effective compensation policy has another purpose besides the establishment of competitive compensation levels—cost management. Cost management includes a variety of costing or budgeting activities, including scenario modeling of compensation changes and identification of your organization's total labor costs.

Managing employee compensation includes three key elements:

- Individual compensation administration (including both pay and benefits)
- Compensation policy formulation
- Compensation cost management

Cost management is accomplished through effective policy formulation. Policy formulation not only governs individual compensation administration but also is influenced by (and is dependent on) information gathered at the individual employee level. The foundation of good employee compensation management is the administration of individual employee compensation. Other influences on policy formulation will include information on external labor markets, such as salary surveys, benchmarking, and competitor analysis.

Tasks in administering individual employee compensation

Administering individual employee compensation includes three key tasks:

1. Recording total compensation for each employee
2. Recording changes in employee compensation
3. Scheduling upcoming compensation-related activities

The initial task of recording total compensation for each employee involves recording such items as the following:

- Basic salary or wages
- Allowances
- Special payments
- Performance-related pay
- Bonuses
- Financial and non-financial benefits such as health insurance, pensions, and company property
- Overtime payments
- Employee loans or certain expense reimbursements

Recording and tracking these various forms of compensation is facilitated by the Human Resources, Payroll, Salary Administration, and Benefits Administration components.

☞ *Refer to the Using Benefits Administration manual and Using Salary Administration manual for additional information on the impact on your employee benefits, salary issues, and paying your employees.*

The task of recording changes in employee compensation may take place annually, but will often occur more frequently. Basic salary or wage changes as well as changes in other forms of compensation (such as assignment of company property) can be brought about by such events as performance appraisals, promotions or other job changes, reduction or increase in hours worked, transfers, and status changes between part-time and full-time employment. Each compensation change is documented by such details as effective date of the change, reason for the change, and amount of the change.

The remaining task in administering individual employee compensation is the scheduling of each employee's next compensation review. The system will automatically prompt you when the next salary review is due to ensure timely handling of this type of event.

Policy formulation tasks

With employee-level compensation information accurately recorded, you are able to use the consolidated reporting functionality to identify patterns or trends within your organization's workforce. Identification of trends may be helpful in analyzing the effectiveness of your organization's compensation policy. For example, consolidated reporting that shows a high level of turnover tied to compensation issues may prompt your organization to review its compensation policy for competitiveness in the market. In addition, many organizations use external benchmarking to compare their compensation programs to market norms. 'Benchmarking' is the process of gathering comparative information about types and levels of compensation being offered by other organizations in the market (through use of salary surveys, for example). The Salary Administration, Benefits Administration, and Payroll components can help you complete these important benchmarking comparison activities and other advanced management and analysis functions relating to compensation policy formulation.

Cost management tasks

Many cost management tasks focus on the current implementation of your organization's compensation policy. For example, charging compensation costs to appropriate divisions or departments within your organization and identifying total labor costs. Other cost management tasks focus on the future implementation of compensation policy or on anticipated changes in compensation policy.

Apply the Concept

What are the key elements of compensation management?

How to enter salary changes

Salary changes that result from a new hire or employee review (or any other types of necessary salary changes) are recorded manually by entering the actual salary information into the system. As an alternative, the Salary Administration component gives you the added flexibility to convert proposed salary increase information from an employee's salary budget record to an actual salary increase.

☞ *Refer to the Using Salary Administration documentation for more information.*

Direct entry of salary changes

The Salary Assignment/Changes form (40-SCR) is used to record individual employee salary and hourly rate changes. The system accommodates the entry of current and future-dated salary changes, as well as historical salary changes. You can also override a salary calculation by choosing the override option and entering new amounts in any or all of the numeric text boxes.

Even if you are using Salary Administration to process salary changes, you always have the option to manually record changes directly on the Salary Administration/Changes form (40-SCR). Of course, the alternative is to allow the system to convert your proposed salary information into actual salary changes.

Multiple changes on the same date

It occasionally may be necessary to process multiple salary changes with the same effective date, such as merit and promotional increases. If you enter multiple salary changes for an employee as percentages (versus multiple changes as monetary values), each percentage is calculated on the same annual salary base instead of being compounded with each addition.

For example, if an employee has a starting annual salary of 10,000 and you give that person a merit increase of 5 percent and a promotional increase of 10 percent on the same date, the system calculates the increase amounts as follows:

```
Merit          =      10,000 x 5 percent      =        500
Promotion      =      10,000 x 10 percent     =      1,000
New salary     =      10,000 + 500 + 1000     =     11,500
```

It is important to enter salary changes in the order in which you want to have them presented on reports and forms. For example, enter a merit increase before a promotional increase or vice versa, because the last entry will be considered the most current salary change.

Viewing future-dated salary changes

Once salary changes have been entered into the system, you may want to follow up on those that are future-dated. A future-dated increase is one that will become actual on a date that exceeds the current pay period ending date.

You may monitor these salary changes by using the Future Dated Salary Adjustments On File report (3T-RPT). The report parameters allow the entry of an 'as of' date. Only salary changes with an effective date greater than the 'as of' date are included in the report.

Monetary perquisites and bonuses

In addition to salary changes, you may also approve employee bonuses or monetary perquisites based on employee performance ratings, or have a need to record this type of information on some other discretionary basis not directly linked to performance.

Use the Bonus/Commission Information form (26-SCR) to record bonuses awarded to an employee. This information is often considered part of total compensation and is stored on the employee record. Authorization data can be entered, including location and the person or department.

The Perquisites: Monetary form (27-SCR) is used to record monetary perquisites or special allowances granted to an employee. These may be generally recurring payments such as automobile allowances, travel subsidies, and so forth.

Multiple perquisites may be active at the same time as long as each is paid by a separate HED. The Date Awarded text box is not necessarily the first date a perquisite was paid—you can award a perquisite that is not to be paid until the employee relocates, receives a green card, or meets some other criterion. You may want to record the award now as the Date Awarded and enter the perquisites effective date in the Start Text box.

If you need to change the perquisite parameters, inactivate the existing perquisite and add a new perquisite with a new date and amount. Do this instead of changing the current perquisite. This provides a running history of the perquisites.

Bonus and monetary perquisite information does not automatically update payroll information. Time entries or one-time payments must be processed to actually compensate the employee. However, both of these forms can be modified to create a payment automatically.

See also:

■ Entering a salary change directly ***(on page 356)***
For detailed directions on entering a salary change directly.

■ Recording bonus information ***(on page 361)***
For detailed directions on recording bonuses.

■ Recording monetary perquisites ***(on page 363)***
For detailed directions on recording monetary perquisites.

Salary effective date considerations

The system can be set up to have Human Resources automatically update Payroll with salary change information entered on the Salary Assignment/Changes form (40-SCR). This is done by selecting 'HR Controls Field' for the Pay Freq, Hourly Rate, Normal Hours, and Sal Per Period list boxes on the System Options form (TG-SCR).

Note: *If Position Administration is in use, an employee must have an Incumbency - Basic Details form (M40SCR) on file to allow the Salary Assignment/Changes form (40-SCR) to update payroll.*

The system uses the Effective Date of the salary change and the employee's pay frequency to determine the pay period during which the salary change will be processed by Payroll. The Employee Information form (EF-SCR) indicates an employee's pay frequency, for example, 'Monthly'. The pay frequency's period end date is then used by the Salary Assignment/Changes form (40-SCR) to perform specific functions.

An organization record contains the period end dates for each pay frequency. The Company Pay Frequencies form (AJ-SCR) is updated with the following information each time a pay run occurs for the pay frequency:

- Anniversary Date—Contains the period end date of the next pay run for a pay frequency
- Period-end Date—Contains the period end date for the last pay run for a pay frequency

Salary Change processing

If you choose to have salary changes update the Employee Pay Rate Or Salary form (H1-SCR), then the Effective Date plays an important role in determining just when the updating will occur. The following Effective Date definitions apply to salary changes you can make:

Salary changes dated prior to the current pay period

This is considered a retroactive increase. The salary effective date is prior to the last pay period ending date for an employee's frequency. The Salary Assignment/Changes form (40-SCR) automatically updates HED 001 (Regular Pay) on the Employee Pay Rate Or Salary form (H1-SCR) so on the next pay run for the employee's pay frequency, the employee will be paid at the new rate.

The retroactive amount due the employee prior to the current pay period may be handled using a time entry. It may also be calculated and a time entry automatically created by using the Set Up A Retroactive Pay form (RT-SCR).

The Salary Assignment/Changes form (40-SCR) does not create an HR To Payroll Salary Information form (PH-SCR). To have this form created for a retroactive increase, you may modify the Cyborg Scripting Language code for the Salary Changes Edit Routine (40EDIT). Refer to the documentation within the form coding for more information about this modification.

Salary changes dated within the current pay period

The salary effective date is within the current pay period for an employee's frequency. The Salary Assignment/Changes form (40-SCR) does not immediately update HED 001 (Regular Pay) on the Employee Pay Rate Or Salary form (H1-SCR). HED 001 (Regular Pay) is updated on the next pay run for the employee's pay frequency and the employee is paid at the new rate.

You may choose to have increases within the period automatically update HED 001 by making the changes documented in the form coding. If this programming is activated, any increase within the current pay period will be applied to all the earnings in the pay period.

The Salary Assignment/Changes form (40-SCR) creates an HR To Payroll Salary Information form (PH-SCR) for the pay period. This allows mid-period increases to be paid on the actual effective date and prior days to be paid at the prior rate. This feature can be implemented on the Company Options form (AF-SCR).

Salary changes dated after the current pay period

This is considered a future-dated salary increase. The salary effective date is greater than the next pay period ending date for an employee's frequency. The Salary Assignment/Changes form (40-SCR) does not automatically update HED 001 (Regular Pay) because the Employee Pay Rate Or Salary form (H1-SCR) has no Effective Date text box. Instead, it creates an HR To Payroll Salary Information form for the future-dated change, so the system can hold it until the appropriate pay period. HED001 (Regular Pay) is updated in the pay period in which the effective date occurs.

Job and position changes

Changing an employee's job or position can affect his or her salary grade. A new salary grade can obviously affect an employee's compensation, position-in-range, and so forth.

If you change an employee's Job or Position on the Job Assignment/Changes form (05-SCR), a new Salary Assignment/Changes form (40-SCR) record is automatically created to reflect the salary grade for the new job or position. The type of change is 'Sys Chg for Job-Assg' for jobs and positions. Once the new Salary Assignment/Changes form (40-SCR) is created, the Salary Information form (41-SCR) may be displayed to show the new compa ratio, position in range, and red/green indicator, all of which would change if the salary grade changed.

Note: *A change to the Job Assignment/Changes form (40-SCR) code will prevent the Salary Assignment/Changes form (40-SCR) from being created for a job change, if desired.*

Review schedules

As soon as salary review results have been recorded on the employee's record, you may schedule the next salary review and/or performance appraisal. When your organization's salary review policy includes a fixed period, a procedure of setting schedules in advance makes the review process more efficient. Future review dates can be canceled or rescheduled if changes occur.

Salary review schedules

The next salary review may be scheduled on the Scheduled Salary Review Data form (43-SCR). This information may be used by these Salary Administration reports to determine who is eligible for a salary review:

- Scheduled Salary Reviews Within Selected Months report (59-RPT)
- Salary Review Authorization Form I (5O-RPT)
- Salary Review Authorization Form II (5P-RPT)

These HRMS reports may also be used for a salary review:

- Salary Review Authorization Form I (3O-RPT)
- Salary Review Authorization Form II (3P-RPT)

Performance appraisal schedules

You may schedule future-dated performance appraisals on the Schedule/Track Performance Appraisals form (50-SCR). This information may be used by the Performance Appraisals Scheduled For Month Of: XX report (1R-RPT) to determine who is eligible for a performance appraisal.

See also:

- Scheduling a future review ***(on page 365)***

For detailed directions on scheduling a future review.

Overview of the review analysis process

Once the salary review process is completed and the results are recorded, you may want to periodically review and analyze the information for an employee or group of employees. Salary increase analysis allows you to monitor current employee compensation as compared with the corporation's proposed salary budget. You may even have a policy of monitoring and then updating the salary budget at specific points in the fiscal year.

You may decide you need to review one or a combination of the reports provided by the system to see how your budgeted projections varied or what you may need to change for next year's salary projections. There may be a need for a display of summary information for employee groups or you may want to display totals with embedded individual employee salary information.

The information the system provides can specifically help you to analyze employee salary distribution by performance rating or by job. A summary salary analysis by salary grade is available. Any employee whose salary is over the maximum or under the minimum salary allowed by the salary grade can be reported as well. You may also want to monitor periods during which compensation incentive programs are in place, to learn whether employee job performance shows any improvement.

You can schedule monthly, quarterly, or as-needed reporting to satisfy your corporation's analysis requirements. You can also view individual employee salary grade and performance information online.

☞ *Refer to the Using Salary Administration documentation for more information.*

Ways of analyzing cost results

As salary reviews occur and employee salary changes are entered, you will need to review the effects of the changes. You may do this online or by using the several reports that are available for this purpose.

Employee salary calculation information

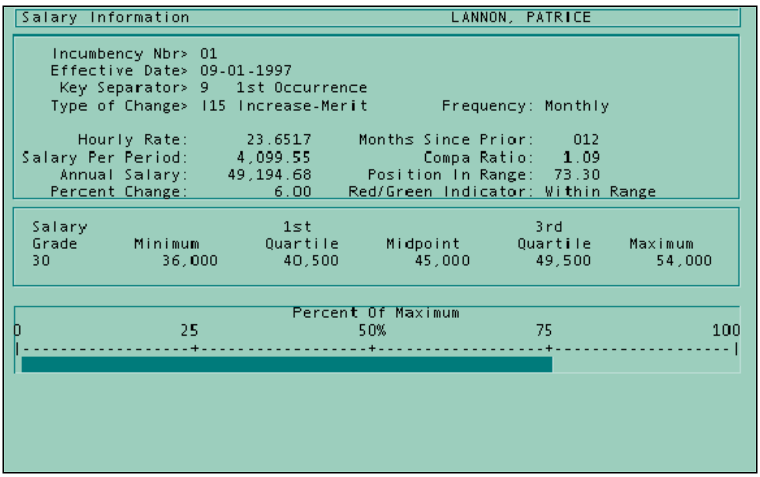
The effect of an employee's salary calculation can be viewed online as soon as the salary change entry has been recorded. The Salary Information form (41-SCR) displays not only the result of the calculation, but several other indicators that may be helpful in reviewing the cost results of a salary change.

The salary grade used in the form calculation is displayed on the form. The salary grade range is shown in levels or quartiles, whichever is appropriate.

Also displayed is the red/green indicator resulting from a comparison of an employee's salary with the maximum and minimum of the salary grade range for the grade associated with an employee's job assignment on the Job Assignment/Changes form (05-SCR).

A histogram shows the percent of maximum and graphically indicates where an employee's salary falls in the salary grade range.

In the following illustration, Patrice Lannon's most recent merit increase is represented on this inquiry-only form. Her salary now represents a compa ratio of 1.09 and a position in range of 73.30. The red/green indicator shows that her salary is within the salary grade range. The histogram at the bottom of the form pictorially shows her salary's range penetration as a percent of maximum:



```
Salary Information                                LANNON, PATRICE

   Incumbency Nbr> 01

|-----------------+------------------+------------------+-------------------|
```

See also:

- Viewing the results of a salary calculation ***(on page 366)***

For detailed directions on viewing the results of a salary calculation.

Implications of the Salary Administration component

As an integrated component of the Human Resource Administration functionality, the Salary Administration component is designed to help you manage the salary-related functions in your organization. The Salary Administration component provides you with the resources to track job evaluations, establish merit increase guidelines, perform budgeting analysis, and automate the salary review and performance appraisal processes. Specifically, the Salary Administration component is able to:

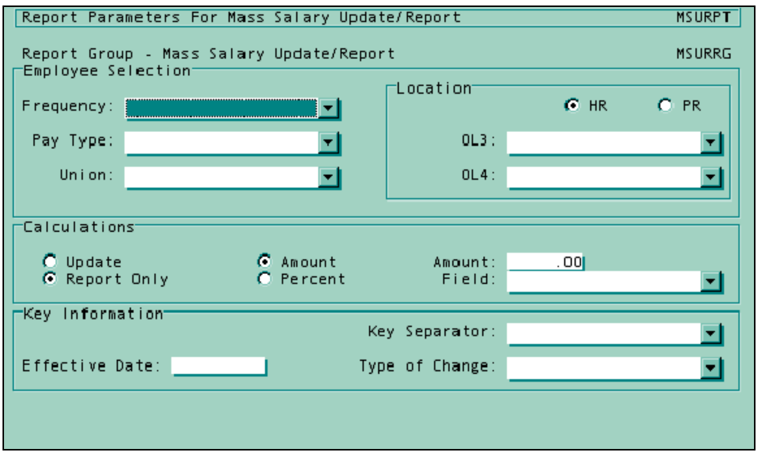
- Process salary reviews and conduct salary analysis
- Produce salary forecasts for budget purposes
- Update salary grades and ranges
- Report information used in the administration of salary changes/budgeting

☞ *Refer to the Using Salary Administration documentation for more information.*

Mass Salary Update/Report

The Mass Salary Update/Report program (MSURPT) is used to process mass salary updates based on parameters entered on a parameters form. It has the ability to update as well as report mass salary changes.

A parameters form is used to specify the parameters of the Mass Salary Update/Report program (MSURPT):



An audit report is produced each time the Mass Salary Update/Report program (MSURPT) is run, showing the results of the calculation for each selected employee. This report is produced in both update and report-only mode. The mode is indicated in the heading of the report, as can be seen in the sample that follows:

```
 RATION  99   ACME MANUFACTURING                Mass Salary Update/Report    REPT                          PAGE

☞ *Refer to the Using Salary Administration documentation for complete information about the Mass Salary Update/Report program (MSURPT).*

Implications of the Benefits Administration component

If you are using the Benefits Administration component, the Salary Assignment/Changes form (40-SCR) can be used to calculate Benefit Plan coverage amounts for life insurance plans, health coverage, retirement plans, and other company-paid benefits that are included in an employee's total compensation.

The most recent salary information for your employees can be obtained from the Salary Assignment/Changes form (40-SCR) to calculate Benefit Plan amounts.

Salary-based benefits plans

Some benefits plan's coverage or costs are based on employee salary information. For example, a life insurance plan may cover employees for one or two times their annual salary. Salary is recorded on the Salary Assignment/Changes form (40-SCR). If an employee's salary information changes because of an increase or change in position, the life insurance coverage also changes.

There are two situations where plan coverage and costs are not based on the current salary recorded on the Salary Assignment/Changes form (40-SCR). Some benefits plans calculate coverage and costs for the whole year based on employees' salary as of a certain date or at the end of the previous year, so that a salary change will not affect coverage or costs during the plan year. Other plans, which have employees that receive multiple salaries for different positions concurrently, calculate coverage and costs based on a total annual salary. Salary information in either case would come from the Alternative Compensation Totals form (BACSCR). This salary information must be entered or calculated prior to enrolling the employee in the plan.

For benefits plans that base coverage or costs on the previous year's salary or the salary as of a specified date, you must record this information on the Alternative Compensation Totals form (BACSCR). You can record this information in the Previous Years Salary or Frozen Salary text box.

☞ *Refer to the Using Benefits Administration documentation for more information.*

Implications of the Payroll component

When managing employee compensation, the key function of the Payroll component is to process accurate organizational payrolls so employees are paid correctly and on time. The Payroll component allows you to maintain the payroll cycle, involving such functions as timekeeping, compensation, and benefits. The management of employee compensation requires constant update and maintenance of your organization and employee records. This maintenance includes the online processing of newly-hired employees, terminations, employee status changes, organization and employee earnings and deductions, time entries, and adjustments.

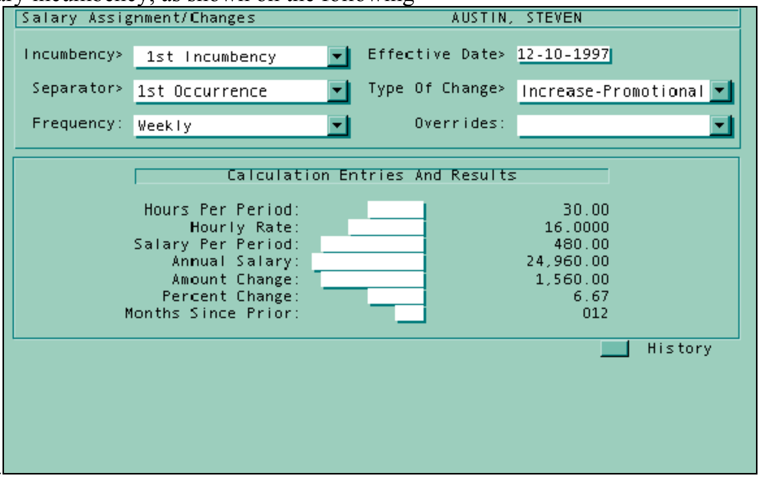
Payroll is a production process, and with the Payroll component you are able to automate most of the tasks of calculating employee pay, updating organization and employee records, and generating pay documents. The Payroll component allows you to produce payroll-related reports, interface files, and direct deposit tapes. The system also allows you to perform many post-payroll functions like balancing the payroll and distributing data to companion applications such as the general ledger, time and attendance, tax filing services, and archives.

☞ *Refer to the Payroll documentation for more information.*

Implications of the Position Administration component

An 'incumbent' is an employee who is linked with a specific position or role within your organization. This relationship, called an 'incumbency', is accomplished using the Position Administration component. You are able to link an employee with multiple incumbencies, which means he or she holds more than one position at a time. An employee who does this is considered to have multiple incumbencies. Employees are assigned to positions using the Incumbency - Basic Details form (M40SCR).

To meet this requirement for multiple incumbencies, the Salary Assignment/Changes form (40-SCR) has an Incumbency identifier when Position Administration is being used. The Incumbency identifier allows for multiple incumbencies, salaries, or rates of pay for a single employee. When multiple incumbencies exist, the employee will be paid through the primary incumbency, as shown on the following



form.

☞ *Refer to the Using Position Administration documentation for more information.*

Multi-incumbency and salary-based benefits plans

Position Administration enables organizations to assign multiple incumbencies to employees. Benefits plans coverage and costs can be based on an employee's total salary and hours. An Alternative Compensation Totals form (BACSCR) will automatically be created and the total salary and hours will be calculated when multiple incumbencies and salaries are assigned to an employee.

☞ *Refer to the Using Benefits Administration documentation for more information.*

Reports used for employee compensation

A suite of batch reports are provided that are related to the employee compensation process. A brief description of each report follows:

- Future Dated Salary Adjustments On File report (3T-RPT)—Provides a listing of employees who have a future-dated salary adjustment that will become actual on the effective date as recorded on the Salary Assignment/Changes form (40-SCR).

- No Salary Adjustment On File For Last 12 Month Period report (1Z-RPT)—Identifies employees who have had no salary adjustment for 12 months as recorded on the Salary Assignment/Changes form (40-SCR).

- Over Maximum/Under Minimum report (17-RPT)—Lists employees whose salary amounts are either above the maximum or below the minimum of the salary grade range as recorded on the Salary Assignment/Changes form (40-SCR).

- Salary Analysis By Grade report (14-RPT)—Provides a statistical analysis of salary variance by job code within a salary grade for all active employees as recorded on the Salary Assignment/Changes form (40-SCR) and the Job Assignment/Changes form (05-SCR).

- Salary Distribution By Performance/Time-In Job report (1Y-RPT)—Provides an analysis (with supporting employee detail) of salary treatment by time-in job within a performance appraisal period as recorded on the Salary Assignment/Changes form (40-SCR), Job Assignment/Changes form (05-SCR), and Performance Appraisal Results form (49-SCR).

- Salary Increase Analysis report (1V-RPT)—Provides an analysis of the number and distribution of job appraisal ratings and the average percent of salary change as classified by appraisal rating as recorded on the Salary Assignment/Changes form (40-SCR) and the Job Assignment/Changes form (05-SCR).

- Salary Review Forms Not Returned By Date report (18-RPT)—Lists employees who are scheduled for a salary review and have not had the salary review paperwork returned to the originating department by a specified date as recorded on the Scheduled Salary Review Data form (43-SCR).

- Scheduled Salary Reviews Within Selected Months report (19-RPT)—Lists employees who are scheduled to receive salary reviews within the next month as recorded on the Scheduled Salary Review Data form (43-SCR).

What is a garnishment?

A garnishment is a court action initiated by a creditor in an effort to obtain a part of an employee's earnings before the earnings are turned over to the employee. Garnishments include child support, IRS liens for non-payment of taxes, and so forth.

Once the employer receives the copy of the court documents, the employer is required to deduct the amount ordered from the employee's pay.

The Garnishment Administration form

The Garnishment Administration form (PO-SCR) contains all the data necessary to enter basic child support information and update withholding information.

The Illinois Child Support Register (6H6H), Illinois ACH Tape (6161), and the Direct Deposit Register (6R6R) produce the ACH Garnishment Interface file to automate child support payments through use of Electronic Funds Transfer.

☞ *Refer to the Payroll Employee Setup documentation for detailed instructions for establishing a garnishment.*

Detailed Directions

This section provides detailed directions on completing a business task.

Tasks

Completing the Guided Practice

In the Guided Practice for this section, you will be entering a salary change directly for employee 3001, Alexander Bloom. Then you will record a bonus for the employee. This is followed by the scheduling of the employee's next salary review. The last task explains how to view your salary entry and calculation for the employee.

You must have completed the Guided Practices in the previous sections to guarantee the successful completion of the Guided Practice that follows.

Entering a salary change directly

To enter salary changes directly on an employee record using the Salary Assignment/Changes form (40-SCR), follow these steps:

Note: *This procedure assumes that an initial salary assignment has already been recorded for the employee at the time of hire.*

Note: *Salary reductions may be recorded by preceding amount entries with a minus sign (-).*

1. Access the Salary Assignment/Changes form (40-SCR)

Access this form by making the following selection from the Navigator:

Component: Employee Compensation
Process: Manage Employee Compensation
Task: Salary Change

For practice, access the Salary Assignment/Changes form (40-SCR) for employee 3001, Alexander Bloom.

2. Click the Clear button

To avoid copying pre-existing information, select the Clear button on the toolbar to clear the text boxes on the form.

For practice, click the Clear button.

3. Select the Incumbency (Position Administration users only)

Select the position incumbency for this salary entry.

For practice, select ' 1st Incumbency'.

4. Enter the Effective Date

Type the effective date. This is the effective date of the employee's salary change. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '04-01-1998' (US and Canada) or '01-04-1998' (elsewhere).

5. Select the Separator

Select the key separator.

The key separator is used to distinguish between two salary changes effective on the same date.

- If only one salary change is entered on a date, you must select '1st Occurrence' in this list box.
- If more than one salary change is effective on the same date, you must select an incremental key separator for each salary change. For example, the first change for the date must be entered with a key separator of '1st Occurrence', the second with '2nd Occurrence', and so on.

Note: *If an entry other than '1st Occurrence' is selected in this list box, 'Not 1st Chg for Date' must be selected in the Overrides list box.*

For practice, select '1st Occurrence'.

6. Select the Type Of Change

Select the type of change. This value identifies the reason for the employee's salary change.

Note: *Do not change the meaning of the Change Type options, because they are used by other forms and reports. Changing the meaning could result in conflicting reports/calculations.*

For practice, select 'Increase-Merit'.

7. Select the Frequency (optional)

Select a pay frequency option.

You may leave this list box blank and allow the system to insert an entry.

- If you do not select an option in this list box, the system uses the value in the Frequency list box on the Employee Information form (EF-SCR).
- If you select an option in this list box, the system compares it with the value in the Frequency list box on the Employee Information form (EF-SCR). If the values are different, the system displays a warning message. If you accept the warning message, the salary calculation will no longer equate to the payroll frequency. The selected value will be used to calculate the salary.

For practice, select 'Semi Monthly'.

8. Select the Override (optional)

Select an override value, if applicable:

- History-No PR Update—Used to enter salary history records that have no direct effect on the Payroll system.
- Not 1st Chg For Date—Used to process multiple salary changes on the same date with a Key Separator list box entry of '2nd Occurrence' or greater.
- Override Calculation—Used to calculate a salary change manually. This option requires that you enter all the text boxes on this form. The form records exactly what you entered.

For practice, leave this list box blank.

9. Enter the Hours Per Period (optional)

Enter the normal hours in the employee's pay period. This is a five-digit text box with two decimal places.

You may leave this text box blank and allow the system to insert an entry.

- If you do not enter data in this text box, the system uses the value in the Normal Hours text box in the Employee Pay Rate Or Salary form (H1-SCR).
- If you type an entry in this text box, the system uses it to calculate the pay assignment.

For practice, leave this text box blank.

10. Enter the Hourly Rate

Enter the employee's hourly rate of pay. This is a seven-digit text box with four decimal places. You only need to enter information in one calculation text box (Hourly Rate, Salary Per Period, Annual Salary, Amount Change, or Percent Change); the system calculates the results in the remaining text boxes based on your single entry.

For practice, leave this text box blank.

11. Enter the Salary Per Period

Enter the amount of the employee's salary per pay period. This is an eight-digit text box with two decimal places. You only need to enter information in one calculation text box (Hourly Rate, Salary Per Period, Annual Salary, Amount Change, or Percent Change); the system calculates the results in the remaining text boxes based on your single entry.

For practice, leave this text box blank.

12. Enter the Annual Salary

Enter the amount of the employee's annual salary. This is a nine-digit text box with two decimal places. You only need to enter information in one calculation text box (Hourly Rate, Salary Per Period, Annual Salary, Amount Change, or Percent Change); the system calculates the results in the remaining text boxes based on your single entry.

For practice, type '42000.00'.

13. Enter the Amount Change

Enter the amount the salary has changed. This is an eight-digit text box with two decimal places. You only need to enter information in one calculation text box (Hourly Rate, Salary Per Period, Annual Salary, Amount Change, or Percent Change); the system calculates the results in the remaining text boxes based on your single entry.

For practice, leave this text box blank.

14. Enter the Percent Change

Enter the percentage change in salary amount. This is a five-digit text box with two decimal places. You only need to enter information in one calculation text box (Hourly Rate, Salary Per Period, Annual Salary, Amount Change, or Percent Change); the system calculates the results in the remaining text boxes based on your single entry.

For practice, leave this text box blank.

15. Enter the Months Since Prior (optional)

Enter the number of months between the employee's prior and current salary effective dates.

You may leave this text box blank and allow the system to insert an entry.

If you make no entry in this text box, the system fills the text box with zeros for the initial calculation. Thereafter, this text box is calculated based on the most recent salary change.

For practice, leave this text box blank.

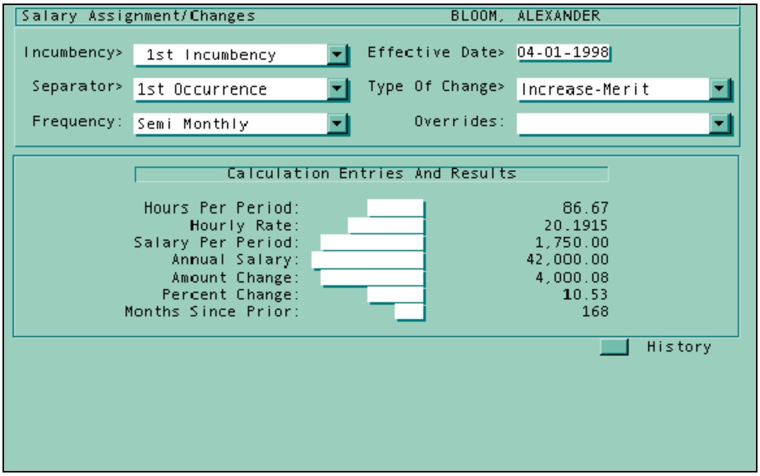
16. Click Save or press Enter

The system performs all calculations and displays the results in the Calculated Results section on the form. The number of months since the last salary change occurred is also calculated and displayed.

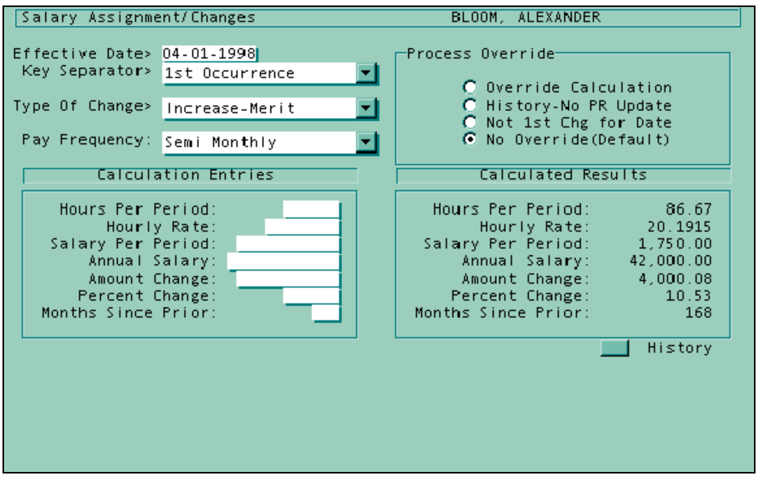
Note: *If the form displays a warning about the employee's incumbency, click on the Yes command button to override the warning.*

For practice, click Save or press Enter.

If you completed the Guided Practice and Position Administration is in use, the resulting form (after the calculation) should look similar to the example that follows:



If you completed the Guided Practice and Position Administration is *not* in use, the resulting form (after the calculation) should look similar to the example that follows:



Note: *Because this form has calculation capabilities, salary errors can be corrected in the following ways:*

- *To recalculate the form, access the erroneous form and type zero (0) in the Percent Change text box. Execute the form. The system zero-fills all calculation text boxes on* *the returned form.* Then *enter the correct data and execute the form. When complete, only the correct data will be on the employee's record.*

- *To delete the form when an incorrect Effective Date or Type of Change was used or when an entry for an employee should not have been made, click the Del Entry button on the toolbar.*

See also:

- Direct entry of salary changes ***(on page 340)***

For an explanation of this method of entering salary changes.

Recording bonus information

To record an employee bonus using the Bonus/Commission Information form (26-SCR), follow these steps:

Note: *This form is only used to record bonus/commission information and does not interact with the payroll information used to pay the employee bonus/commission unless modified to do so.*

1. Access the Bonus/Commission Information form (26-SCR)

Access this form by making the following selection from the Navigator:

Component: Employee Compensation
Process: Manage Employee Compensation
Task: Bonuses and Commissions

For practice, access the Bonus/Commission Information form (26-SCR) for employee 3001, Alexander Bloom.

2. Select the HED Xref

Select the appropriate earning HED.

This list box is used to record the Payroll Hours, Earnings, or Deduction by which the bonus is paid to the employee.

For practice, select 'Bonus'.

3. Enter the Date Recorded

Type the award date. This text box is used to record the date on which the bonus was granted. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '04-01-1998' (US and Canada) or '01-04-1998' (elsewhere).

4. Enter the Amount Awarded

Type the award amount using up to eight digits with two decimals, for example, 1,275.00 is entered as '1,275.' (or '127500').

This text box is used to record the amount of the bonus to be paid.

For practice, type '1500.00'.

5. Enter the Date Paid

Type the date of the payment. This text box is used to record the check/pay run date of the bonus payment. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '04-07-1998' (US and Canada) or '07-04-1998' (elsewhere).

6. Select the Authorization Location

Select the authorization location.

This list box is used to specify the plant, office, or department location where the bonus was authorized.

For practice, select 'Accounting Dept'.

7. Enter the Authorization By

Type an up-to-30-character name for the authorizing person, function, department, or other agency.

For practice, type 'J.P. Miller'.

8. Enter the Bonus/Commission Year

Type a two-digit year for which the bonus was granted.

For practice, type '98'.

9. Enter the Bonus/Commission Month

Type a two-digit month for which the bonus was granted.

This is the month to which the bonus applies. Generally, you will record a bonus-month or bonus-quarter to further define the bonus-year.

For practice, leave this text box blank.

10. Enter the Bonus/Commission Quarter

Type a single-digit quarter for which the bonus was granted.

This is the quarter to which the bonus applies. Generally, you will record either a bonus-month or bonus-quarter to further define the bonus-year.

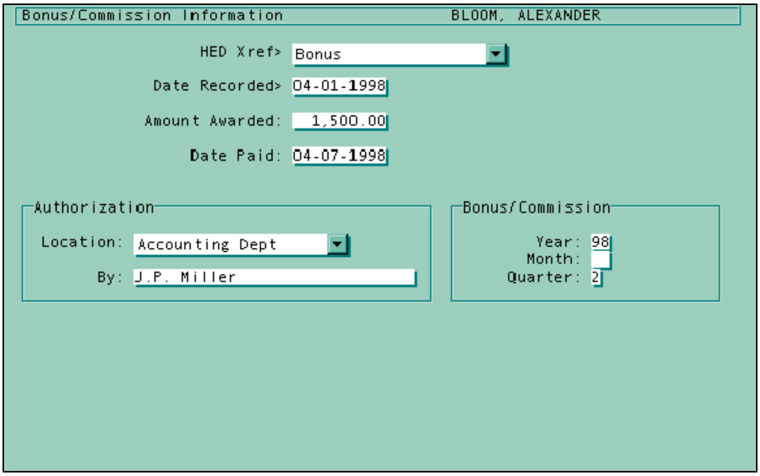
For practice, type '2'.

11. Click Save or press Enter

The employee bonus information is recorded.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



Bonus/Commission Information BLOOM, ALEXANDER

HED Xref> Bonus

Date Recorded> 04-01-1998

Amount Awarded: 1,500.00

Date Paid: 04-07-1998

Authorization

Location: Accounting Dept

By: J.P. Miller

Bonus/Commission

Year: 98

Month:

Quarter: 2

See also:

- Monetary perquisites and bonuses ***(on page 341)***

For an explanation of recording employee bonuses.

Recording monetary perquisites

To record an employee monetary perquisite using the Perquisites: Monetary form (27-SCR), follow these steps:

1. Access the Perquisites: Monetary form (27-SCR)

Access this form by making the following selection from the Navigator:

Component: Employee Compensation
Process: Manage Employee Compensation
Task: Monetary Perquisites

For practice, access the Perquisites: Monetary form (27-SCR) for employee 3001, Alexander Bloom.

2. Select the HED Xref

Select the earning HED.

This list box is used to record the Payroll Hours, Earnings, or Deduction by which the monetary perquisite is paid to the employee.

For practice, select 'Housing Allowance'.

3. Enter the Date Awarded

Type the award date. This text box is used to record the date on which the monetary perquisite was awarded. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '04-01-1998' (US and Canada) or '01-04-1998' (elsewhere).

4. Enter the Amount Awarded

Type the award amount using up to eight digits with two decimals, for example, 455.00 is entered as '455.' (or '45500').

This text box is used to record the amount of the monetary perquisite to be paid each period.

For practice, type '25500.00'.

5. Enter the Start Field (optional)

Type the start date in the format YYMMDD. This text box is for informational use only. The start date used for an automatic payment of the perquisite must be entered on the Employee Earnings And Deductions form (HH-SCR).

For practice, leave this text box blank.

6. Select the Stop Method (optional)

Select the stop method. This list box is for informational use only. The stop method used for an automatic payment of the perquisite must be entered on the Employee Earnings And Deductions form (HH-SCR).

For practice, leave this list box blank.

7. Enter the Stop Field (optional)

Type the stop date in the format YYMMDD. This text box is for informational use only. The stop date used for an automatic payment of the perquisite must be entered on the Employee Earnings And Deductions form (HH-SCR).

For practice, leave this text box blank.

8. Click the Active check box

Click the Active check box to indicate that the perquisite is active and still being paid.

If you need to change the perquisite parameters, set the Active check box to inactive by clicking it again; then add a new perquisite with a new date and amount. Do this instead of changing the existing perquisite. This provides a running history of the perquisites.

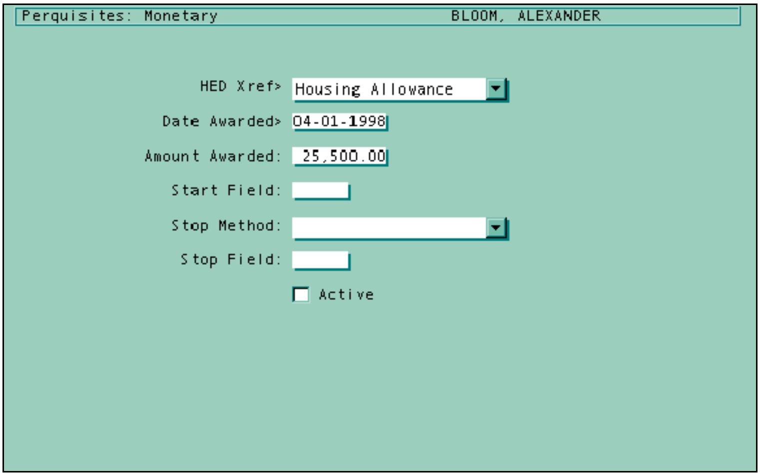
For practice, do not click this check box.

9. Click Save or press Enter

The monetary perquisite information is recorded.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



See also:

- Monetary perquisites and bonuses ***(on page 341)***

For an explanation of recording monetary perquisites.

Scheduling a future review

To schedule a future salary review using the Scheduled Salary Review Data form (43-SCR), follow these steps:

1. Access the Scheduled Salary Review Data form (43-SCR)

Access this form by making the following selection from the Navigator:

Component:	Employee Compensation
Process:	Manage Employee Compensation
Task:	Next Salary Review Date

For practice, access the Scheduled Salary Review Data form (43-SCR) for employee 3001, Alexander Bloom.

2. Enter the Next Review Date

Type the next review date Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

This text box contains the date of the next salary review to be performed.

For practice, type '03-16-1999' (US and Canada) or '16-03-1999' (elsewhere).

3. Select the Type of Review

Select the type of review.

This list box defines the type of salary review to be performed.

For practice, select 'Sal Review Annual'.

Note: *The remaining text boxes may be left blank until the review date approaches and the form is actually sent out, or you can enter the pertinent information now, if known.*

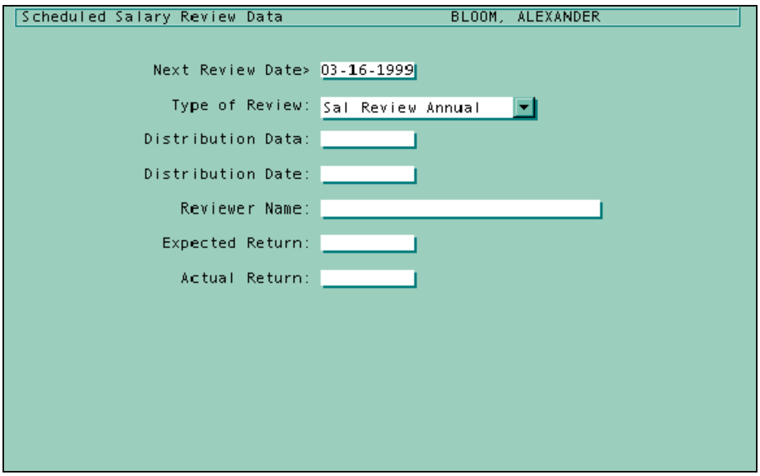
4. Click Save or press Enter

The next scheduled salary review date is recorded and may be used by the following Salary Administration reports to determine who is eligible for a salary review:

- Scheduled Salary Reviews Within Selected Months report (59-RPT)
- Salary Review Authorization Form I (5O-RPT)
- Salary Review Authorization Form II (5P-RPT)

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



Scheduled Salary Review Data BLOOM, ALEXANDER

Next Review Date> 03-16-1999

Type of Review: Sal Review Annual

Distribution Data:

Distribution Date:

Reviewer Name:

Expected Return:

Actual Return:

See also:

- Salary review schedules ***(on page 345)***

For an explanation of scheduling future salary reviews.

Viewing the results of a salary calculation

To view the results of a salary calculation using the Salary Information inquiry form (41-SCR), follow this step:

Access the Salary Information inquiry form (41-SCR)

Access this form by making the following selection from the Navigator:

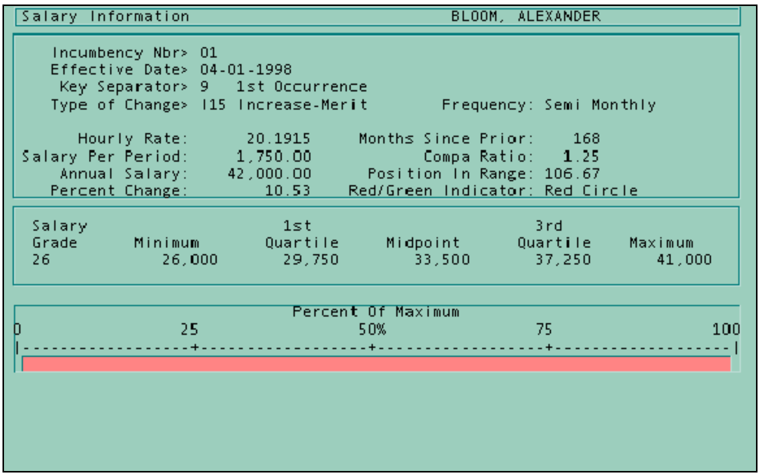
Component: Employee Compensation
Process: Manage Employee Compensation
Task: View Salary/Range Information

The Salary Information form (41-SCR) displays the calculated results of entries made to the Salary Assignment/Changes form (40-SCR) for an employee's new compa ratio and position in range.

This is a display-only form. Calculations may not be updated on this form.

For practice, access the Salary Information inquiry form (41-SCR) for employee 3001, Alexander Bloom.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



See also:

- Employee salary calculation information ***(on page 347)***

For an explanation of how this form is used to view the results of the salary calculation.

Review of Questions Answered

1. What considerations are involved in managing employee compensation?

2. What are the different methods of entering salary changes?

3. Why is periodically reviewing the salary review process beneficial to your organization?

4. What are the different ways to analyze cost results?

5. What are the implications of the different system components on managing employee compensation?

CHAPTER 12

Tracking Employee Relocation Expenses

In This Chapter

Introduction

The tracking of employee relocation expenses is a process that involves matching organizational policies and procedures with employee needs and entitlement. To effectively manage this process, you must understand the compensation issues that are involved in employee relocations. The system allows you to record and analyze all of the important aspects of employee relocation, including such issues as bridge loans, temporary living expenses, moving expenses, and house-hunting expenses.

Tasks

This section explains the following:

- Defining employee relocation moves
- Recording closing costs
- Recording house-hunting expenses
- Recording moving expenses
- Recording shipping/storage costs
- Recording temporary living expenses
- Recording bridge loans
- Creating relocation expenses summary

Prerequisites

Before you can perform the tasks in this section, the following must be established:

- You must have implemented and added your employees to the system.

☞ *Refer to* **Recruiting and Selecting Employees** *(on page 33) and* **Hiring, Rehiring, Reinstating, Recalling, or Transferring an Employee** *(on page 83) for more information.*

Questions answered

The following questions are answered in this section:

1. What considerations are involved in tracking employee relocation expenses?
2. What forms are provided for managing employee relocations?

Overview of tracking employee relocation expenses

Employees are sometimes required to relocate their residences in order to accept employment with an organization or to accept a transfer, promotion, or reassignment to a new work location. Many organizations compensate employees for the costs associated with such a relocation, particularly when the relocation involves the sale of one residence and the purchase of another.

The nature of relocation expense compensation will vary from one organization to another. Organizational policy may specify a total allowance for each type of expense or for each relocation and may base the allowance on distance and type of employee, among other factors. Compensation for relocation expenses may be considered part of the overall compensation plan and may form part of the overall employee-compensation management process. Relocation cost compensation can also be a negotiated part of a new or existing employee's total compensation package.

Relocation compensation policies typically provide for some or all of the following:

- Compensation for all costs associated with selling the employee's former residence.
- Compensation for all costs associated with the purchase of a new residence.
- Compensation for costs associated with house-hunting trips, transportation of the employee and the employee's family to the new location, shipping of household goods, personal belongings, and automobiles to the new location, as well as temporary living arrangements and storage of goods and belongings in the new area if the new home isn't complete at the time of the employee's arrival in the area.
- 'Grossing up' of compensated costs to allow for payment of taxes that may be imposed against the expense compensation received by the employee.
- Bridge loans (also known as equity advance loans) that assist the employee in purchasing a new residence before the sale of the former residence is complete (for example, to enable the employee to make a down payment on the new residence).
- Advances of money in anticipation of relocation costs so the employee does not have to pay expenses out of his or her own pocket.

When an employee relocation is complete, the employee's 'relocation account' must be balanced, with actual expenses, advances, and loans considered. Accurate and thorough recordkeeping is essential because relocation compensation is part of the overall compensation package and has important tax implications for the individual employee.

The system provides complete functionality for recording and tracking all key aspects of an employee relocation, including house-hunting, closing, transportation, shipping and storage, temporary living, gross-up costs, bridge loans, and cash advances. The system also gives you the ability to view a summary of all relocation-related expenses and to track all advances made to an employee. Balancing an employee's relocation account and generating reports showing outstanding relocation advances are accomplished easily and accurately. If you use the Applicant Tracking component, all aspects of applicant relocation can also be recorded and tracked in an applicant organization. This information will transfer to your active pay organization after processing the Applicant Transfer form (ET-SCR).

On an organizational level, it also allows you to perform consolidated reporting to view and analyze relocation costs. Reporting can be done by type of expense or type of relocation. For example, you could generate reports that help you analyze relocation compensation costs for domestic and international relocations, or relocations to specific company work sites. Organizational-level reporting and analysis are made possible by accurate and complete recording of employee-level information.

Apply the Concept

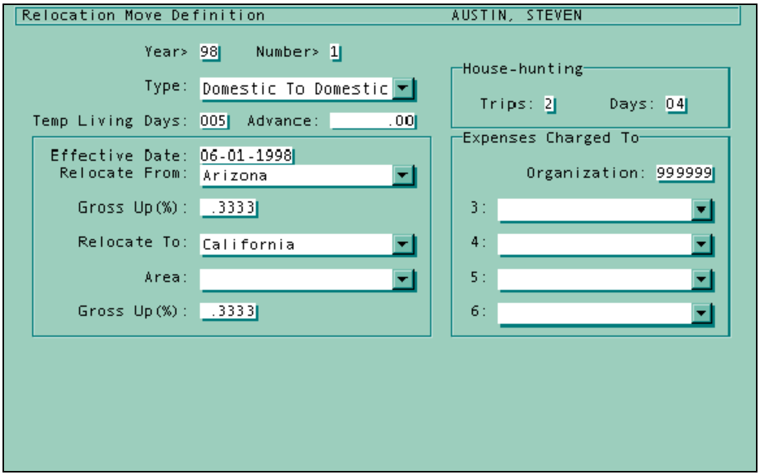
What are the different types of costs associated with relocating employees?

Use of the relocation feature

Effectively using the relocation feature involves a number of forms. These forms are discussed in the following sections.

Relocation Move Definition form (34-SCR)

This form records the primary indicative data related to the move, including year of the move, whether the move is domestic or international, number of approved temporary living days, cash advance amount, effective date, old and new residence sites, gross-up percentages to be used to calculate the amount of tax gross-up for expenses reportable to the old and new residence sites, number of approved house hunting trips and days, and the organization level 1-6 values where the employee's relocation expenses are to be charged. This form should be entered first when setting up an employee relocation, as shown in the following example:



Relocation Move Definition AUSTIN, STEVEN

Year> 98 Number> 1

Type: Domestic To Domestic

Temp Living Days: 005 Advance: .00

House-hunting

Trips: 2 Days: 04

Effective Date: 06-01-1998

Relocate From: Arizona

Gross Up(%): .3333

Relocate To: California

Area:

Gross Up(%): .3333

Expenses Charged To

Organization: 999999

4:

5:

6:

Gross-up calculations

Several text boxes have been provided to help you calculate gross-up amounts. These amounts are added to the employee's gross taxable and tax deduction amounts. Gross-up amounts are used to ensure that a company-requested move, or one that is applicant-negotiated, does not cost the employee or applicant any out-of-pocket money. Whether you use gross-up amounts depends on your organizational relocation policy.

The gross-up amount is usually calculated by multiplying the expense amount by a percentage. This percentage can be a fixed amount set by your organizational policy or it may vary depending on the employee's annual salary and whether local income taxes apply. The total gross-up amount should be added to the employee's taxable gross wages.

- Defining an employee relocation move ***(on page 377)***

For detailed directions on defining an employee relocation move.

Relocation Closing Cost Expenses form (35CSCR)

This form is used to record the amounts that have been paid to the employee for reimbursement of the closing costs for his or her new residence. These expenses may include sales commissions, advertising costs, attorney fees, title and escrow fees, and so forth. The name of realty companies involved and the number of points given for the closing can also be recorded. One form can be recorded for each tax year.

See also:

- Recording closing costs ***(on page 381)***

For detailed directions on recording closing costs.

Relocation House Hunting Expenses form (35HSCR)

This form is used to record the house hunting expenses incurred by the employee (and spouse) to travel to the new location to secure housing. Expenses are entered on this form by Trip number. Before recording these expenses, you should ensure that the number of authorized trips allowed on the Relocation Move Definition form (34-SCR) has not been exceeded. The expenses entered on this form are for that trip only Expenses should not be brought forward.

See also:

- Recording house-hunting expenses ***(on page 383)***

For detailed directions on recording house-hunting expenses.

Relocation Moving Expenses form (35MSCR)

This form is used to record the moving expenses incurred by the employee during the physical move from the old residence to the new residence. These expenses may include transportation and lodging. Expenses related to the packing and moving of the employee's belongings are not included on this form.

See also:

- Recording moving expenses ***(on page 386)***

For detailed directions on recording moving expenses.

Relocation Shipping Inventory Expenses form (35SSCR)

This form is used to record the relocation expenses related to the packing, moving, storage, and insuring of the household goods and personal effects of the employee from the old residence to the new residence. If it is necessary to store the inventory because the new residence is not yet available, the number of authorized storage days and the days actually used can be tracked. Special text boxes are provided to record the cost of shipping automobiles and boats.

See also:

- Recording shipping/storage costs ***(on page 389)***

For detailed directions on recording shipping/storage costs.

Relocation Temporary Living Expenses form (35TSCR)

This form is used to record the temporary living expenses incurred by the employee while in temporary quarters at the old and/or new residence. Before you record these expenses, verify that adding these days will not exceed the number of days authorized for temporary living on the Relocation Move Definition form (34-SCR). The expenses entered on this form should not be brought forward.

See also:

- Recording temporary living expenses ***(on page 391)***

For detailed directions on recording temporary living expenses.

Relocation Expenses Summary form (35-SCR)

This form is used to record the total relocation monetary amounts, by expense type, paid to the employee for a relocation. Entries here should be made by tax year.

The amounts entered here will not automatically update the employee's taxable income and tax deduction amounts. This can be accomplished by creating a timecard and generating a check using Payroll Administration. You can also enter the reimbursement and tax deduction amounts on the Manual Payment form (KA-SCR).

See also:

- Creating a relocation expenses summary ***(on page 396)***

For detailed directions on creating a relocation expenses summary.

Relocation Bridge Loan form (36-SCR)

This form is used to record the details of a loan given to an employee who has purchased a residence in the new work location but has not yet sold the current residence. The employee may need the money to finalize the new home purchase.

See also:

- Recording a bridge loan ***(on page 394)***

For detailed directions on recording a bridge loan.

Reports used for tracking relocation expenses

The following reports are related to tracking employee relocation expenses:

- Outstanding Relocation Advances report (34-RPT)—Provides a list of employees who have outstanding relocation advances as recorded on the Relocation Bridge Loan form (36-SCR).
- Relocation Total Costs - Form 4782 (3G-RPT)—Produces a distribution-ready Form 4782 that reflects the relocation expenses reimbursed or paid on behalf of an employee or applicant by expense, reimbursement, and payment type.
- Total Relocation Closing Costs report (35CRPT)—Provides a listing of employees with relocation closing costs as recorded on the Relocation Closing Cost Expenses form (35CSCR).
- Total Relocation Costs By Employee report (35-RPT)—Displays a listing of each employee's relocation costs listed by expense type.
- Total Relocation Costs By Expense Type report (36-RPT)—Provides a listing of relocation expenses by expense type.
- Total Relocation House Hunting Expenses report (35HRPT)—Provides a listing of employees with relocation house hunting expenses as recorded on the Relocation House Hunting Expenses form (35HSCR).
- Total Relocation Moving Expenses report (35MRPT)—Provides a listing of employees with relocation moving expenses as recorded on the Relocation Moving Expenses form (35MSCR).
- Total Relocation Shipping Inventory Costs report (35SRPT)—Provides a listing of employees with relocation shipping inventory costs as recorded on the Relocation Shipping Inventory Expenses form (35SSCR).
- Total Relocation Temporary Living Expenses report (35TRPT)—Provides a listing of employees with relocation temporary living expenses as recorded on the Relocation Temporary Living Expenses form (35TSCR).

Detailed Directions

This section provides detailed directions on completing a business task.

Tasks

Completing the Guided Practice

In the Guided Practice for this section, you will be entering relocation information for employee 1234, Steven Austin. Since this is an existing employee, this Guided Practice does not depend on the completion of the Guided Practices in previous sections.

Defining an employee relocation move

To define an employee relocation move, follow these steps:

1. Access the Relocation Move Definition form (34-SCR)

The Relocation Move Definition form (34-SCR) is used to record indicative data concerning an employee's or applicant's relocation move.

Access this form by making the following selection from the Navigator:

Component: Employee Compensation
Process: Tracking Employee Relocation Expenses
Task: Define Employee Relocation Move

For practice, access the Relocation Move Definition form (34-SCR) for employee number 1234, Steven Austin.

2. Enter the Year

Enter the calendar year in which the employee's relocation activities occurred or were initiated.

For practice, type '98'.

3. Enter the Number

Enter the number of the move for the employee during the calendar year indicated in the previous step.

For practice, type '1'.

4. Select the Type

Select the type of relocation occurring. You may update this option list (ER08) to include all of the various types of moves needed by your organization.

For practice, select 'Domestic to Domestic'.

5. Enter the House-hunting Trips

Enter the number of trips that have been authorized to the employee and spouse for the purpose of house hunting in the new location.

For practice, type '3'.

6. Enter the House-hunting Days

Enter the number of days that have been authorized to the employee and spouse for the purpose of house hunting in the new location.

For practice, type '06'.

7. Enter the Temp Living Days

Enter the number of days that have been authorized and for which the company will pay temporary living expenses for the employee and the employee's family.

For practice, type '60'.

8. Enter the Advance

Enter the amount of money advanced to the employee for moving expenses. This money is treated as any other travel advance and must be offset by expense reports or returned to the company if unused. Enter the advance with up to five whole numbers and two decimals.

Note: This text box is informational only and does not impact payroll.

For practice, type '2000.00'.

9. Enter the Effective Date

Enter the effective date of the relocation or the day on which the employee is to report to work in the new location. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '01-07-1998' (US and Canada) or '07-01-1998' (elsewhere).

10. Select the Relocate From

Select the location from which the employee is relocating. You may update this option list (HR20) to include all of the locations needed by your organization.

For practice, select 'California'.

11. Enter the Gross Up (%)

Enter the percent to be used to calculate the amount of tax gross-up for expenses reportable to the old residence state. This is a five-digit text box with four decimal places, for example, 25 percent is entered as '.2500'.

For practice, type '.3333'.

12. Select the Relocate To

Select the location to which the employee is relocating. You may update this option list (HR20) to include all of the locations needed by your organization.

For practice, select 'Arizona'.

13. Select the Area

Select the area to which the employee is relocating. You may update this option list (HR20) to include all of the relocation areas needed by your organization.

For practice, select 'USA Southwest'.

14. Enter the Gross Up (%)

Enter the percent to be used to calculate the amount of tax gross-up for expenses reportable to the new residence state. This is a five-digit text box with four decimal places, for example, 25 percent is entered as '.2500'.

For practice, type '.3333'.

15. Enter the Expenses Charged To Control 1-2

Enter the organization designation to which the employee's relocation expenses are to be charged.

Note: *This text box is informational only and does not impact payroll.*

For practice, type '999999'.

16. Select the Expenses Charged To (organization level) 3

Select the OL3 value where the employee's relocation expenses are to be charged. You must update this option list (HR439) to include all of the organization level 3 values needed by your organization.

Note: *This list box is informational only and does not impact payroll.*

For practice, select 'Midwest'.

17. Select the Expenses Charged To (organization level) 4

Select the OL4 value where the employee's relocation expenses are to be charged. You must update this option list (HR449) to include all of the organization level 4 values needed by your organization.

Note: *This list box is informational only and does not impact payroll.*

For practice, select 'Department 4040'.

18. Select the Expenses Charged To (organization level) 5

Select the OL5 value where the employee's relocation expenses are to be charged. You must update this option list (HR459) to include all of the organization level 5 values needed by your organization.

Note: *This list box is informational only and does not impact payroll.*

For practice, select 'Section 5050'.

19. Select the Expenses Charged To (organization level) 6

Select the OL6 value where the employee's relocation expenses are to be charged. You must update this option list (HR469) to include all of the organization level 6 values needed by your organization.

Note: *This list box is informational only and does not impact payroll.*

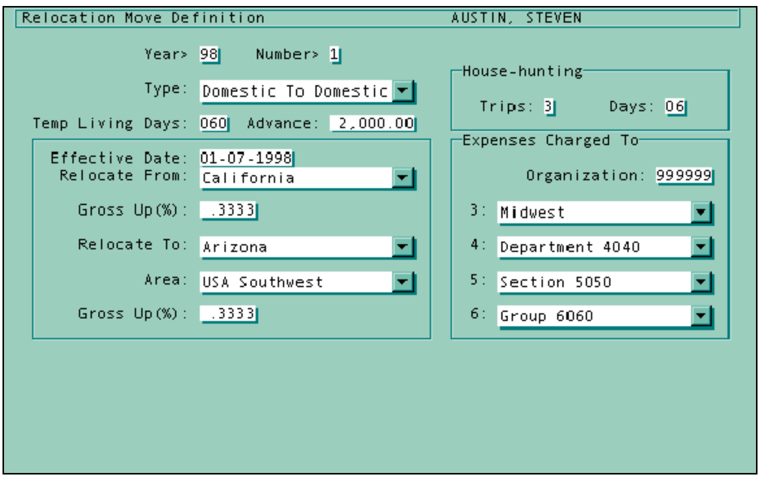
For practice, select 'Group 6060'.

20. Click Save or press Enter

The relocation move definition information is recorded.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



See also:

- Relocation Move Definition form (34-SCR) ***(on page 373)***

For an explanation of the contents and use of this form.

Recording closing costs

To record closing costs, follow these steps:

1. Access the Relocation Closing Cost Expenses form (35CSCR)

The Relocation Closing Cost Expenses form (35CSCR) is used to record the amounts that have been paid to, or on behalf of, the employee or applicant for reimbursement of closing costs covered by the organization's relocation policy. These expenses may be any of the following: sales commissions, advertising costs, attorney's fees, title and escrow fees, state transfer taxes, and costs to settle an unexpired lease or to get a new lease.

Access this form by making the following selection from the Navigator:

Component:	Employee Compensation
Process:	Tracking Employee Relocation Expenses
Task:	Record Closing Costs

For practice, access the Relocation Closing Cost Expenses form (35CSCR) for employee number 1234, Steven Austin.

2. Enter the Year

Enter the calendar year in which the relocation occurs.

For practice, type '98'.

3. Enter the Number

Enter the number of this move during the year entered in the previous step.

For practice, type '1'.

4. Enter the Tax Year

Enter the tax year in which the move expenses are to be credited.

For practice, type '98'.

5. Select the Prior Residence, Realty

Select the realty company used to handle the sale of the employee's prior residence. You may update this option list (ER12) to include all of the realty companies needed by your organization.

For practice, select 'Century 21'.

6. Enter the Prior Residence, Date

Enter the date of the closing for the prior residence. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '04-14-1998' (US and Canada) or '14-04-1998' (elsewhere).

7. **Enter the Prior Residence, Closing**
Enter the amount of the closing costs associated with the prior residence. This is a seven-digit text box with two decimal places.

For practice, type '5000.00'.

8. **Enter the Prior Residence, Points**
Enter the number of closing points for the prior residence that will be reimbursed. This is a three-digit text box with two decimal places.

For practice, type '1.00'.

9. **Enter the Prior Residence, Amount**
Enter the monetary amount associated with the points assigned to the closing on the prior residence. This is a seven-digit text box with two decimal places.

For practice, type '1000.00'.

10. **Select the New Residence, Realty**
Select the realty company that handled the new residence sale. You may update this option list (ER12) to include all of the realty companies needed by your organization.

For practice, select 'Century 21'.

11. **Enter the New Residence, Org Fee**
Enter the amount of the mortgage origination fees. This is a seven-digit text box with two decimal places.

For practice, type '250.00'.

12. **Enter the New Residence, Date**
Enter the date of the closing for the new residence. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '02-24-1998' (US and Canada) or '24-02-1998' (elsewhere).

13. **Enter the New Residence, Closing**
Enter the amount of the closing costs associated with the new residence. This is a seven-digit text box with two decimal places.

For practice, type '6000.00'.

14. **Enter the New Residence, Points**
Enter the number of closing points for the new residence that will be reimbursed. This is a three-digit text box with two decimal places.

For practice, type '3.00'.

15. Enter the New Residence, Amount

Enter the monetary amount associated with the points assigned to the closing on the new residence. This is a seven-digit text box with two decimal places.

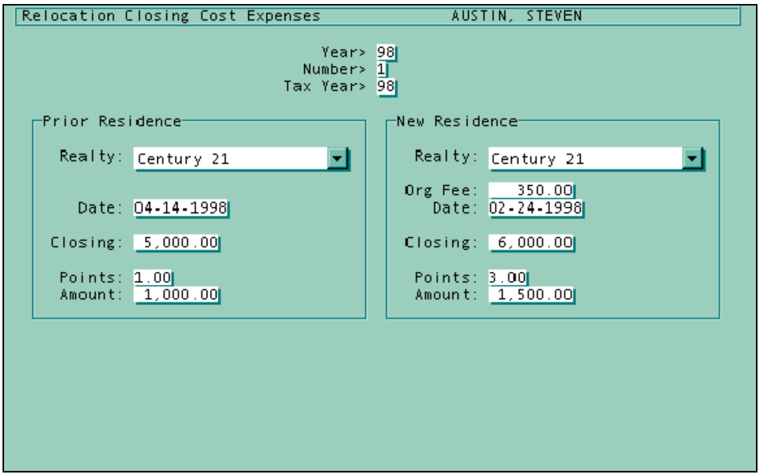
For practice, type '1500.00'.

16. Click Save or press Enter

The relocation closing cost expense information is recorded.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follow:



See also:

- Relocation Closing Cost Expenses form (35CSCR) ***(on page 374)***

For an explanation of the contents and use of this form.

Recording house-hunting expenses

To record house-hunting expenses, follow these steps:

1. Access the Relocation House Hunting Expenses form (35HSCR)

The Relocation House Hunting Expenses form (35HSCR) is used to record the house hunting expenses incurred by the employee or applicant and spouse to travel to the new location to secure housing. These expenses should be submitted on expense reports for reimbursement, advance offset, tax reporting, and taxable income gross-up calculations.

Access this form by making the following selection from the Navigator:

Component: Employee Compensation
Process: Tracking Employee Relocation Expenses
Task: Record House Hunting Expenses

For practice, access the Relocation House Hunting Expenses form (35HSCR) for employee number 1234, Steven Austin.

2. Enter the Year

Enter the calendar year in which the move commenced.

For practice, type '98'.

3. Enter the Number

Enter the number of the move for the employee during this calendar year.

For practice, type '1'.

4. Enter the Tax Year

Enter the tax year into which the amounts from this house hunting trip are to be added.

For practice, type '98'.

5. Enter the Trip

Enter the number of the house hunting trip being recorded.

For practice, type '1'.

6. Enter the Expense Date

Enter the date on which the expense report was recorded, or if you prefer, the date of the expense report. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '02-18-1998' (US and Canada) or '18-02-1998' (elsewhere).

7. Enter the Trip Days

Enter the number of days covered by this trip.

For practice, type '06'.

8. Enter the Expenses, Meals

Enter the amount reported by the employee during this house hunting trip as meal expenses. This is a six-digit text box with two decimal places.

For practice, type '240.00'.

9. Enter the Expenses, Lodging

Enter the amount reported by the employee during this house hunting trip as lodging expenses. This is a six-digit text box with two decimal places.

For practice, type '440.00'.

10. Enter the Expenses, Telephone

Enter the amount reported by the employee during this house hunting trip as telephone expenses. This is a six-digit text box with two decimal places.

For practice, type '12.50'.

11. Enter the Expenses, Air/Train

Enter the amount reported by the employee during this house hunting trip as air, train, or other travel expenses. This is a six-digit text box with two decimal places.

For practice, type '457.00'.

12. Enter the Expenses, Automobile

Enter the amount reported by the employee during this house hunting trip as automobile expenses. This is a six-digit text box with two decimal places.

For practice, type '455.00'.

13. Enter the Expenses, Misc

Enter the amount reported by the employee during this house hunting trip as miscellaneous expenses. This is a five-digit text box with two decimal places.

For practice, leave this text box blank.

14. Enter the Expenses, Total

Enter the total amount of house hunting expenses for this trip. This is a seven-digit text box with two decimal places.

For practice, type '1604.50'.

15. Enter the Expenses, Advance Offset

Enter the amount of the relocation advance reduction because of this expense report. This is a seven-digit text box with two decimal places.

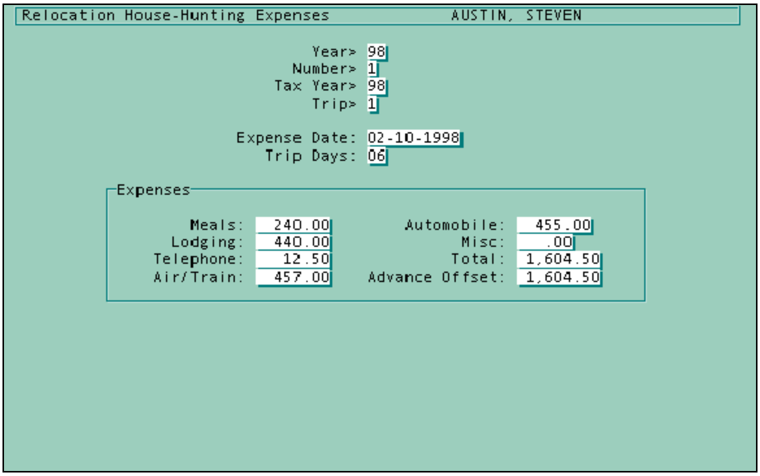
For practice, type '1604.50'.

16. Click Save or press Enter

The relocation house hunting expense information is recorded.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



See also:

■ Relocation House Hunting Expenses form (35HSCR) ***(on page 374)***
For an explanation of the contents and use of this form.

Recording moving expenses

To record moving expenses, follow these steps:

1. Access the Relocation Moving Expenses form (35MSCR)

The Relocation Moving Expenses form (35MSCR) is used to record the relocation expense report submitted by the employee or applicant that covers the expenses incurred during the physical move of the of employee and family members or applicant and family members from the old location to the new location.

Access this form by making the following selection from the Navigator:

Component: Employee Compensation
Process: Tracking Employee Relocation Expenses
Task: Record Transportation Costs

For practice, access the Relocation Moving Expenses form (35MSCR) for employee number 1234, Steven Austin.

2. Enter the Year

Enter the calendar year in which the employee relocated.

For practice, type '98'.

3. Enter the Number

Enter the number of the move for the employee during the calendar year.

For practice, type '1'.

4. Enter the Tax Year

Enter the tax year in which the moving expenses are to be reported.

For practice, type '98'.

5. Enter the Expense Date

Enter the date on which the expense report was filed or the date the report was recorded. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '03-14-1998' (US and Canada) or '14-03-1998' (elsewhere).

6. Enter the Trip Days

Enter the number of days it took for the employee to move to the new location.

For practice, type '04'.

7. Enter the Expenses, Meals

Enter the total expense incurred for meals during the trip to the new residence. This is a six-digit text box with two decimal places.

For practice, type '150.00'.

8. Enter the Expenses, Lodging

Enter the total expense incurred for lodging during the trip to the new residence. This is a six-digit text box with two decimal places.

For practice, type '375.00'.

9. Enter the Expenses, Air/Train

Enter the total expense incurred for air, train, or other transportation during the trip to the new residence. This is a six-digit text box with two decimal places.

For practice, leave this text box blank.

10. Enter the Expenses, Telephone

Enter the total expense incurred for telephone usage during the trip to the new residence. This is a six-digit text box with two decimal places.

For practice, leave this text box blank.

11. Enter the Expenses, Automobile

Enter the total expense incurred for automobile use during the trip to the new residence. This is a six-digit text box with two decimal places.

For practice, type '300.00'.

12. Enter the Expenses, Misc

Enter the total expense incurred for miscellaneous expenses during the trip to the new residence. This is a five-digit text box with two decimal places.

For practice, type '27.00'.

13. Enter the Expenses, Total

Enter the total of all expenses reported on the expense report submitted for the move from the old to the new residence. This is a seven-digit text box with two decimal places.

For practice, type '852.00'.

14. Enter the Expenses, Advance Offset

Enter the amount of the relocation advance reduction due to amounts given in this expense report. This is a seven-digit text box with two decimal places.

For practice, type '852.00'.

15. Click Save or press Enter

The relocation moving expense information is recorded.

For practice, click Save or press Enter.

Recording shipping/storage costs

To record shipping/storage costs, follow these steps:

1. Access the Relocation Shipping Inventory Expenses form (35SSCR)

The Relocation Shipping Inventory Expenses form (35SSCR) is used to record the relocation expenses related to the packing, moving, storage, and insuring of the household goods and personal effects of an employee/applicant.

Access this form by making the following selection from the Navigator:

Component:	Employee Compensation
Process:	Tracking Employee Relocation Expenses
Task:	Record Shipping/Storage Costs

For practice, access the Relocation Shipping Inventory Expenses form (35SSCR) for employee number 1234, Steven Austin.

2. Enter the Year

Enter the calendar year of the move.

For practice, type '98'.

3. Enter the Number

Enter the number of the move this calendar year.

For practice, type '1'.

4. Enter the Tax Year

Enter the tax year in which these amounts are to be reported.

For practice, type '98'.

5. Enter the Loading Date

Enter the date on which the employee's belongings were loaded.

For practice, type '01-03-1998'.

6. Enter the Delivery Date

Enter the date on which the delivery of the inventory was made to the new residence.

For practice, type '02-28-1998'.

7. Select the Shipping Co

Select the company used to ship the employee's belongings. You may update this option list (ER10) to include all of the shipping companies needed by your organization.

For practice, select 'Allied Van Lines'.

8. Enter the Move Weight

Enter the weight of the employee's belongings moved and/or stored. This is a five-digit text box with no associated weight type.

For practice, type '4500'.

9. Enter the Inventory

Enter the cost of moving the employee's belongings (furniture, and so on). This is a seven-digit text box with two decimal places.

For practice, type '2250.00'.

10. Enter the Autos

Enter the number of automobiles (if any) being moved.

For practice, leave this text box blank.

11. Enter the Cost

Enter the cost to ship the automobile(s) for the employee. This is a seven-digit text box with two decimal places.

For practice, leave this text box blank.

12. Enter the Boats

Enter the number of boats being moved.

For practice, leave this text box blank.

13. Enter the Cost

Enter the cost to ship the boat(s) for the employee. This is a seven-digit text box with two decimal places.

For practice, leave this text box blank.

14. Select the Storage Co

Select the company used to store the employee's belongings. You may update this option list (ER11) to include all of the storage companies needed by your organization.

For practice, select 'Allied Warehouse'.

15. Enter the Days Authorized

Enter the number of days that have been authorized for storage of belongings.

For practice, type '90'.

16. Enter the Days Used

Enter the actual number of days used for storage of the employee's belongings.

For practice, type '56'.

17. Enter the Cost

Enter the cost to store the employee's belongings. This is a seven-digit text box with two decimal places.

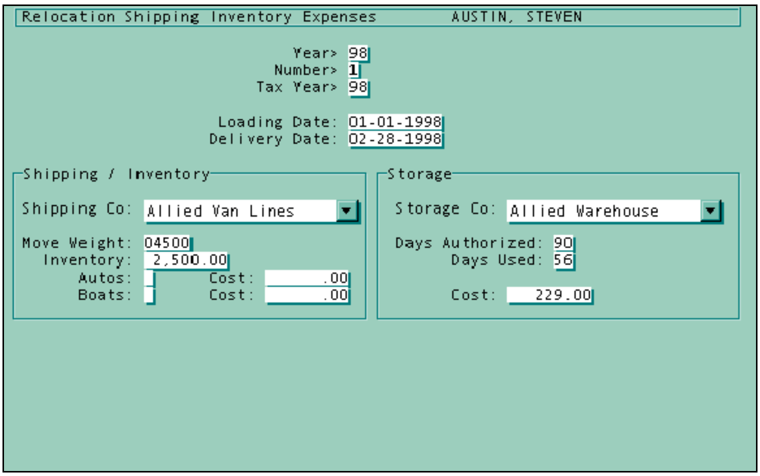
For practice, type '229.00'.

18. Click Save or press Enter

The relocation shipping inventory expense information is recorded.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



See also:

- Relocation Shipping Inventory Expenses form (35SSCR) ***(on page 374)***

For an explanation of the contents and use of this form.

Recording temporary living expenses

To record temporary living expenses, follow these steps:

1. Access the Relocation Temporary Living Expenses form (35TSCR)

The Relocation Temporary Living Expenses form (35TSCR) is used to record the temporary living expenses incurred by the employee and family, or applicant and family, while in temporary quarters at the old and/or new location (depending on your company relocation policy). These expenses should be submitted on expense reports for reimbursement, advance offset, tax reporting, and taxable income gross-up calculations.

Access this form by making the following selection from the Navigator:

Component:	Employee Compensation
Process:	Tracking Employee Relocation Expenses
Task:	Record Temporary Living Expense

For practice, access the Relocation Temporary Living Expenses form (35TSCR) for employee number 1234, Steven Austin.

2. Enter the Year

Enter the calendar year in which the employee's relocation occurred.

For practice, type '98'.

3. Enter the Number

Enter the number of the move for the employee in the calendar year.

For practice, type '1'.

4. Enter the Tax Year

Enter the tax year in which the expenses will be reported.

For practice, type '98'.

5. Enter the Expense Date

Enter the date on which the expense report was filed. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '03-04-1998' (US and Canada) or '04-03-1998' (elsewhere).

6. Enter the Number of Days

Enter the number of days covered by the expense report.

For practice, type '03'.

7. Enter the Number of People

Enter the number of people covered by the expense report.

For practice, type '04'.

8. Select the Location

Select the location for which temporary living expenses are being reported.

For practice, Select 'Arizona'.

9. Enter the Temporary Expenses, Meals

Enter the amount of expenses that are for meals during this temporary living period. This is a six-digit text box with two decimal places.

For practice, type '3250.00'.

10. Enter the Temporary Expenses, Lodging

Enter the amount of expenses that are for lodging during this temporary living period. This is a six-digit text box with two decimal places.

For practice, type '2500.00'.

11. Enter the Temporary Expenses, Telephone

Enter the amount of expenses that are for telephone usage during this temporary living period. This is a six-digit text box with two decimal places.

For practice, type '250.00'.

12 Enter the Temporary Expenses, Automobile

Enter the amount of expenses that are for automobile use during this temporary living period. This is a six-digit text box with two decimal places.

For practice, type '350.00'.

13. Enter the Temporary Expenses, Miscellaneous

Enter the amount of expenses that are defined as miscellaneous during this temporary living period. This is a five-digit text box with two decimal places.

For practice, leave this text box blank.

14. Enter the Temporary Expenses, Total

Enter the total amount of expenses reported on this expense report. This is a seven-digit text box with two decimal places.

For practice, type '6325.00'.

15. Enter the Temporary Expenses, Advance Offset

Enter the amount by which the relocation advance is to be reduced because of this expense report. This is a seven-digit text box with two decimal places.

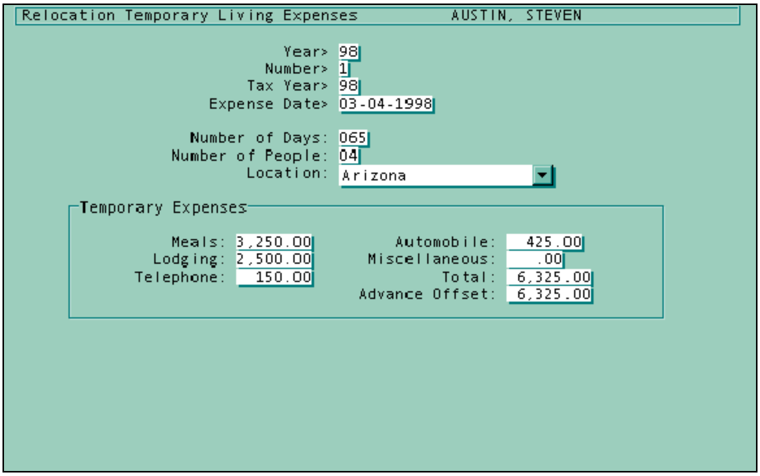
For practice, type '6325.00'.

16. Click Save or press Enter

The relocation temporary living expense information is recorded.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



Relocation Temporary Living Expenses AUSTIN, STEVEN

Year> 98
Number> 1
Tax Year> 98
Expense Date> 03-04-1998

Number of Days: 065
Number of People: 04
Location: Arizona

Temporary Expenses

Meals:	3,250.00	Automobile:	425.00
Lodging:	2,500.00	Miscellaneous:	.00
Telephone:	150.00	Total:	6,325.00
		Advance Offset:	6,325.00

For an explanation of the contents and use of this form.

Recording a bridge loan

To record a bridge loan, follow these steps:

1. Access the Relocation Bridge Loan form (36-SCR)

The Relocation Bridge Loan form (36-SCR) records the details of a relocation bridge loan. These loans are often given to employees who have purchased a new residence in the new work location but have not yet sold their old residence. For example, the employee might not have the down payment for the new residence. Companies often supply the necessary money so the employee can purchase the new residence. Relocation bridge loans are also known as equity advance loans.

Access this form by making the following selection from the Navigator:

Component: Employee Compensation
Process: Tracking Employee Relocation Expenses
Task: Record Bridge Loan

For practice, access the Relocation Bridge Loan form (36-SCR) for employee number 1234, Steven Austin.

2. Enter the Year

Enter the year in which the move occurred.

For practice, type '98'.

3. Enter the Number

Enter the number of the relocation move during the calendar year entered in the previous step.

For practice, type '1'.

4. Enter the Bridge Loan Info, Date

Enter the date on which the bridge loan was granted. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '02-21-1998' (US and Canada) or '21-02-1998' (elsewhere).

5. Enter the Bridge Loan Info, Amount

Enter the original amount of the bridge loan. This is an eight-digit text box with two decimal places.

For practice, type '10000.00'.

6. Enter the Bridge Loan Info, Percent

Enter the percentage of interest to be paid for the bridge loan. This is a five-digit text box with four decimal places.

For practice, type '6.00'.

7. Enter the Bridge Loan Info, Due Date

Enter the date on which the bridge loan is due. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '07-19-1998' (US and Canada) or '19-07-1998' (elsewhere).

8. Enter the Bridge Loan Info, Equity

Enter the amount of the equity for this bridge loan. This is an eight-digit text box with two decimal places.

For practice, leave this text box blank.

9. Select the Bridge Loan Info, Funded By

Select the means by which the bridge loan was funded. You may update this option list (ER09) to include all of the funding sources needed by your organization.

For practice, select 'Internal Resources'.

10. Enter the Bridge Loan Info, Date Paid

Enter the date on which the bridge loan was paid. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, leave this text box blank.

11. Enter the Bridge Loan Info, Amount Paid

Enter the amount paid toward the retirement of the bridge loan. This is an eight-digit text box with two decimal places.

Note: *An amount is entered in this text box when the bridge loan is paid in part or in whole.*

For practice, leave this text box blank.

12. Enter the Bridge Loan Info, Interest

Enter the amount of the interest due on the bridge loan. This is a seven-digit text box with two decimal places.

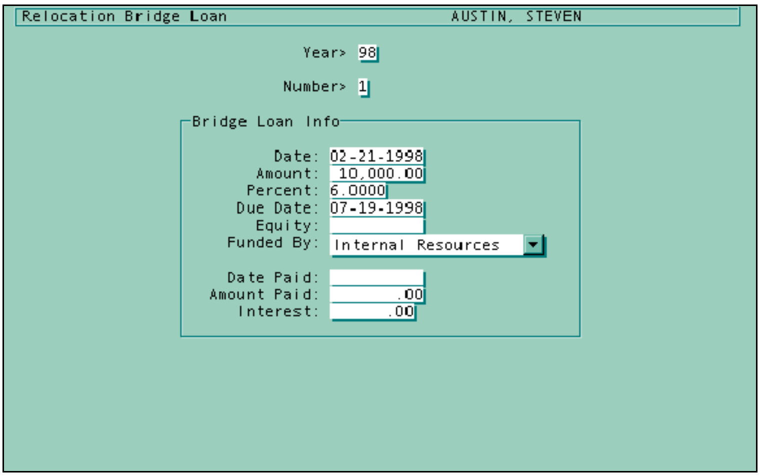
For practice, leave this text box blank.

13. Click Save or press Enter

The relocation bridge loan information is recorded.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



See also:

For an explanation of the contents and use of this form.

Creating a relocation expenses summary

To create a relocation expenses summary, follow these steps:

1. Access the Relocation Expenses Summary form (35-SCR)

The Relocation Expenses Summary form (35-SCR) is used to record the total relocation monetary amounts, by reimbursement/payment type, paid to an employee or applicant.

Access this form by making the following selection from the Navigator:

Component:	Employee Compensation
Process:	Tracking Employee Relocation Expenses
Task:	Summary of Relocation Costs

For practice, access the Relocation Expenses Summary form (35-SCR) for employee number 1234, Steven Austin.

2. Enter the Year

Enter the calendar year in which the employee's relocation activities occurred or were initiated.

For practice, type '98'.

3. Enter the Number

Enter the number of the move for the employee during the calendar year.

For practice, type '1'.

4. Enter the Tax Year

Enter the year in which the relocation payments to the employee will be reported.

For practice, type '98'.

5. Enter the House-hunting Exp, Non-Taxable

Enter the non-taxable monetary amount paid to or on behalf of the employee attributable to house hunting activities. This is a six-digit text box with two decimal places.

For practice, leave this text box blank.

6. Enter the House-hunting Exp, Taxable

Enter the taxable monetary amount paid to or on behalf of the employee attributable to house hunting activities. This is a nine-digit text box with two decimal places.

For practice, type '1604.50'.

7. Enter the House-hunting Exp, Gross-up

Enter the amount of the tax gross-up paid on behalf of the employee attributable to house hunting activities. This is a nine-digit text box with two decimal places.

For practice, type '534.78'.

8. Enter the House-hunting Exp, Meals

Enter the amount spent for meals while house hunting. This is a six-digit text box with two decimal places.

For practice, type '240.00'.

9. Enter the Temp Living Expenses, Non-Taxable

Enter the non-taxable monetary amount attributable to temporary living expenses. This is a six-digit text box with two decimal places.

For practice, leave this text box blank.

10. Enter the Temp Living Expenses, Taxable

Enter the taxable monetary amount attributable to temporary living expenses. This is a nine-digit text box with two decimal places.

For practice, type '6325.00'.

11. Enter the Temp Living Expenses, Gross-up

Enter the amount of the tax gross-up attributable to temporary living expenses. This is a nine-digit text box with two decimal places.

For practice, type '2108.12'.

12. Enter the Temp Living Expenses, Meals

Enter the amount spent for meals while on temporary living because of a relocation. This is a six-digit text box with two decimal places.

For practice, type '3250.00'.

13. Enter the Moving Expenses, Meals

Enter the amount spent for meals while moving from old residence to new. This is a six-digit text box with two decimal places.

For practice, type '150.00'.

14. Enter the Moving Expenses, Travel Non Tax

Enter the non-taxable monetary amount paid to or on behalf of the employee attributable to the physical move from the old to the new residence. This is a nine-digit text box with two decimal places.

For practice, type '852.00'.

15. Enter the Moving Expenses, Shipping Non Tax

Enter the amount of the invoice for shipping the employee's personal possessions from the old to the new residence (include in transit storage fees). This is a nine-digit text box with two decimal places.

For practice, type '2454.00'.

16. Enter the Closing Expenses, Non Taxable

Enter the non-taxable monetary amount paid to or on behalf of the employee attributable to closing costs. This is a six-digit text box with two decimal places.

For practice, leave this text box blank.

17. Enter the Closing Expenses, Taxable

Enter the taxable monetary amount paid to or on behalf of the employee attributable to closing costs. This is a nine-digit text box with two decimal places.

For practice, type '13500.00'.

18. Enter the Closing Expenses, Gross-up

Enter the amount of the tax gross-up paid on behalf of the employee attributable to the employee's housing closing costs. This is a nine-digit text box with two decimal places.

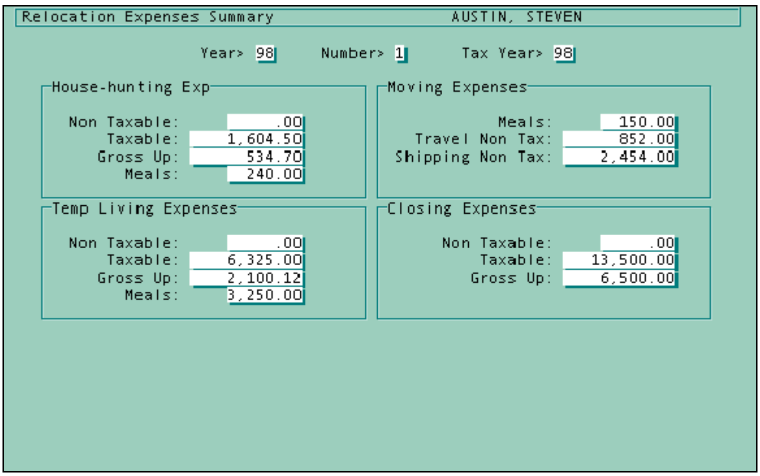
For practice, type '4500.00'.

19. Click Save or press Enter

The relocation expenses summary information is now recorded.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



Relocation Expenses Summary AUSTIN, STEVEN

Year> 98 Number> 1 Tax Year> 98

House-hunting Exp
Non Taxable: .00
Taxable: 1,604.50
Gross Up: 534.70
Meals: 240.00

Moving Expenses
Meals: 150.00
Travel Non Tax: 852.00
Shipping Non Tax: 2,454.00

Temp Living Expenses
Non Taxable: .00
Taxable: 6,325.00
Gross Up: 2,100.12
Meals: 3,250.00

Closing Expenses
Non Taxable: .00
Taxable: 13,500.00
Gross Up: 6,500.00

Review of Questions Answered

1. What considerations are involved in tracking employee relocation expenses?

2. What forms are provided for managing employee relocations?

CHAPTER 13

Allocating Property to and Recovering Property from Employees

In This Chapter

Introduction

Developing efficient procedures for allocating property to and recovering the property from your employees begins with establishing accurate and timely recordkeeping. The system lets you track the costs and allocation measures associated with nonmonetary perquisites, company property, and automobiles that are often tied to an employee's compensation package.

Tasks

This section explains the following:

- Recording nonmonetary perquisites
- Assigning company property
- Assigning company automobiles
- Viewing company property and automobiles not yet returned
- Recording return of company property
- Recording recovery of company automobiles

Prerequisites

Before you can perform the tasks in this section, the following must be completed:

- You must have implemented and added your employees to the system.

☞ *Refer to* **Recruiting and Selecting Employees** *(on page 33) and* **Hiring, Rehiring, Reinstating, Recalling, or Transferring an Employee** *(on page 83) for more information.*

Questions answered

The following questions are answered in this section:

1. What needs to be considered when allocating property to and recovering property from employees?
2. What reports are available to assist in allocating property to and recovering property from employees?

Achieving allocation and recovery of company property

Using the system, you are able to allocate and recover property to and from your employees. Details can be recorded for nonmonetary perquisites, company property, and company automobiles. This data may be accessed through a variety of forms or displayed on a termination review form to let you collect all company property upon employee termination:

- **Automobile Information (24-SCR)—**Records company automobiles allocated to the employee.
- **Company Personal Property (22-SCR)—**Records company personal property allocated to the employee, such as credit cards or computer equipment.
- **Perquisites: Non-Monetary (20-SCR)—**Records nonmonetary perquisites allocated to the employee, such as health club memberships or restaurant accounts.
- **Separations: Recovery of Automobiles (98-SCR)—**Records that an employee has returned the company automobile that was allocated to him or her.
- **Separations: Recovery of Company Property (99-SCR)—**Records that an employee has returned the company property that was allocated to him or her. A summary of sick and vacation hours that remain credited to the employee is also provided.
- **Termination Summary (96RSCR)**—Provides a summary of company property and automobiles that have been allocated to the employee but not yet returned.

Allocating and recovering company property

Property may be allocated to employees either as perquisites awarded for performance, because of seniority or position in the organization, or as tools necessary for completing their assigned work. Property typically allocated to employees for their personal use (as perquisites) includes such items as health or country club memberships, store accounts, use of a company condominium, medical examinations, and use of a company automobile. Other property typically allocated to employees for their use on the job includes such items as computer equipment, company credit cards, and company vehicles.

Property allocated to employees can represent a major organizational investment. Managing that property is as important as managing any other organizational asset. Proper management starts with accurate accounting or recordkeeping about the asset, including recording such information as a complete description of the property and the date it was allocated to an employee, as well as the date the property was returned to the company. With accurate recordkeeping methods in place, an organization can then move beyond basic property tracking to the more important tasks of budgeting property costs and calculating the value of allocated property as part of total employee compensation packages.

Company property is typically allocated or awarded to employees at the time of an event such as a new hire or a transfer or promotion into a new position. Other changes in an employee's work assignments, such as a change in specific duties performed in his or her current position, may call for allocation of new or different property. Transfers, promotions, and employment termination or separation generally call for recovery of the property from the employee.

The system is key to your organization's efforts to track and manage company property assigned to employees. Besides providing the necessary functionality for recording the allocation and return of nonmonetary perquisites, company property, and company automobiles, the system provides a range of standard reports to assist you in managing those assets. Also, all property allocated to an employee can be easily reviewed so recovery of the property can become a part of an employee's termination or separation process.

Apply the Concept
What are perquisites?

Allocation and recovery considerations

The Perquisites: Non-Monetary (20-SCR), Company Personal Property (22-SCR), and Automobile Information (24-SCR) forms are used to allocate property or perquisites to the employee when they are hired or during his or her employment with your organization.

When the employee is terminating or separating from your organization, the Termination Summary form (96RSCR) is used to review the company property and automobiles allocated to the employee that must be returned. It is important to understand that any perquisites that were recorded on the Perquisites: Non-Monetary form (20-SCR) are not displayed on the Termination Summary form (96RSCR). The recovery of company property is then achieved on the Separations: Recovery Of Company Property form (99-SCR) while automobiles are returned on the Separations: Recovery Of Automobiles form (98-SCR). The recovery of the property and autos can be verified on the Company Personal Property form (22-SCR) and Automobile Information form (24-SCR) that are automatically updated with a 'Date Returned'. This allows you to keep a history of the allocation and recovery. Perquisites are returned (if applicable) by entering the 'Date Returned' on the Perquisites: Non-Monetary form (20-SCR).

It is recommended that you limit the use of the Perquisites: Non-Monetary form (20-SCR) to recording such items as awards or other perquisites that do not actually need to be recovered. Then a quick review of the Termination Summary form (96RSCR) will alert you to exactly what needs to be recovered when the employee separates from the organization.

Apply the Concept
How is company property allocated and recovered?

Reports used for allocating and recovering company property

The following is a list of the batch reports that can be used when allocating property to and recovering property from employees:

- Automobile Information report (16-RPT)—Provides a listing of the organization's automobile-related data as recorded on the Automobile Information form (24-SCR).
- Company Personal Property Information report (12-RPT)—Provides information on company property assigned to employees as recorded on the Company Personal Property form (22-SCR).
- Monetary Perquisite Information report (3E-RPT)—A Salary Administration report that provides a listing of employees who have received monetary perquisites as recorded on the Perquisites: Monetary form (27-SCR).
- Non-Monetary Perquisite Information report (13-RPT)—Provides information on nonmonetary perquisites assigned to employees as recorded on the Perquisites: Non-Monetary form (20-SCR).

Detailed Directions

This section provides detailed directions on completing a business task.

Tasks

Completing the Guided Practice

In the Guided Practice for this section, you will be assigning and recovering company property and a company automobile for employee 0012, Andrew Anders.

Because this employee was hired in a previous section, you must have completed the Guided Practices in that section to guarantee the successful completion of the Guided Practice that follows.

Recording nonmonetary perquisites

To record nonmonetary perquisites, follow these steps:

1. Access the Perquisites: Non-Monetary form (20-SCR)

The Perquisites: Non-Monetary form (20-SCR) is used to record nonmonetary perquisites awarded to an employee for performance or granted due to seniority or position.

Access this form by making the following selection from the Navigator:

Component: Employee Resourcing
Process: Maintain Additional Employee Details
Task: Non-Monetary Perquisites

For practice, access the Perquisites: Non-Monetary form (20-SCR) for employee number 0012, Andrew Anders.

2. Select the Perquisite Type

Select the perquisite type granted the employee. You may update this option list (HR24) to include all of the perquisites needed by your organization.

For practice, select 'Amer Express Gold'.

3. Enter the Perquisite Date

Enter the date on which the perquisite was awarded to the employee. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '01-10-1998' (US and Canada) or '10-01-1998' (elsewhere).

4. Enter the Member Number

Enter the membership or account number that relates to a particular perquisite. For example, in the case of a credit card, enter the credit card account number.

For practice, type '2890-566009-17880'.

5. Enter the Dollar Value

Enter the monetary value, rounded to the nearest whole amount, of each perquisite awarded an employee. For example, in the case of a credit card, enter the monetary amount limit the employee is authorized to charge against the credit card. This is a six-digit text box with no decimal places.

Note: All entries in this text box are automatically right justified.

For practice, type '1000'.

6. Enter the Expiration Date

Enter the date the perquisite is due to expire and must be renewed. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '01-01-1999'.

7. Enter the Date Returned

Enter the date the perquisite was returned or canceled. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

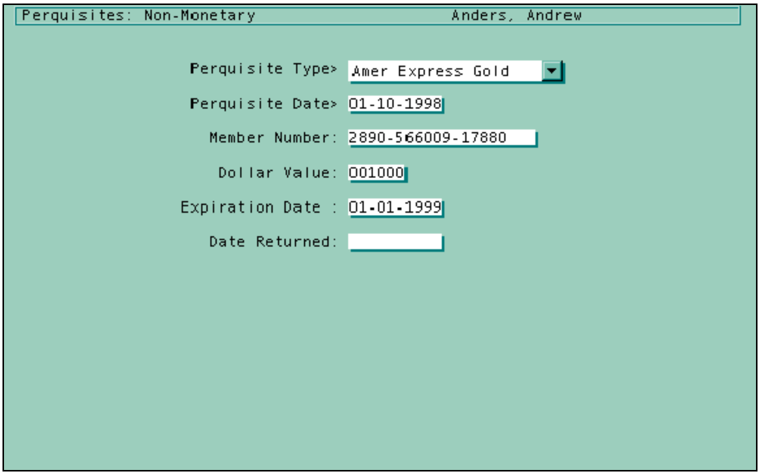
For practice, leave this text box blank to indicate that the perquisite has not been returned or canceled.

8. Click Save or press Enter

The Perquisites: Non-Monetary form (20-SCR) is now recorded.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



See also:

- Achieving allocation and recovery of company property ***(on page 403)***

For an explanation how this form is used to record nonmonetary perquisites.

Assigning company property

To assign company property, follow these steps:

1. Access the Company Personal Property form (22-SCR)

The Company Personal Property form (22-SCR) is used to record and track company property allocated to an employee.

Access this form by making the following selection from the Navigator:

Component: Employee Resourcing
Process: Maintain Additional Employee Details
Task: Company Property

For practice, access the Company Personal Property form (22-SCR) for employee 0012, Andrew Anders.

2. Select the Property Type

Select the type of property given to an employee. You may update this option list (HR24) to include all of the company property needed by your organization.

For practice, select 'Computer Printer'.

3. Enter the Property Date

Enter the date property was given to an employee. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '01-10-1998' (US and Canada) or '10-01-1998' (elsewhere).

4. Enter the Account Number

Enter the account number of a credit card or the account or serial number of property given to an employee.

For practice, type '0090-11221'.

5. Enter the Account Limit

Enter the monetary limit of an account given to an employee if the company property is a credit card or other property with a monetary limit associated with it. Round the amount to the nearest whole figure. This is a six-digit text box with no decimal places. All entries in this text box are automatically right justified.

For practice, type '550'.

6. Enter the Expiration Date

Enter the date the company property in an employee's possession may be used, must be turned in, or will be canceled. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '12-31-2000' (US and Canada) or '31-12-2000' (elsewhere).

7. Enter the Date Returned

This date reflects when the employee has returned the property to the organization. It is automatically populated by the system when a Separations: Recovery Of Company Property form (99-SCR) is recorded. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

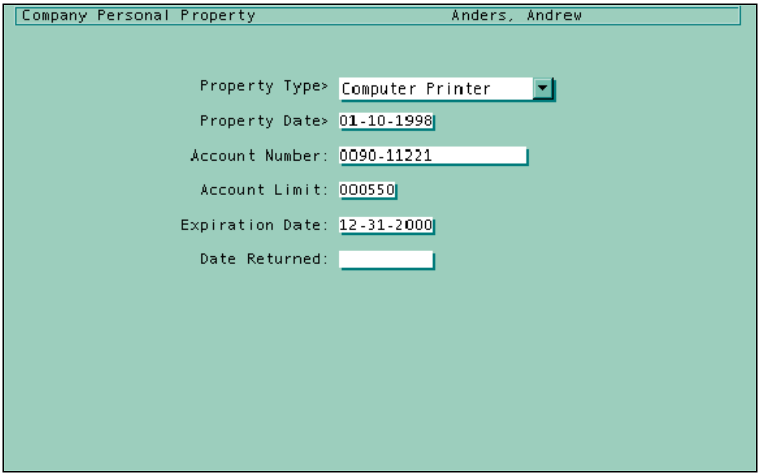
For practice, leave this text box blank to indicate that the property has not yet been returned.

8. Click Save or press Enter

The Company Personal Property form (22-SCR) is now recorded.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



Company Personal Property Anders, Andrew

Property Type> Computer Printer

Property Date> 01-10-1998

Account Number: 0090-11221

Account Limit: 000550

Expiration Date: 12-31-2000

Date Returned:

See also:

- Achieving allocation and recovery of company property ***(on page 403)***

For an explanation how this form is used to assign company property.

Assigning company automobile(s)

To assign a company automobile, follow these steps:

1. Access the Automobile Information form (24-SCR)

The Automobile Information form (24-SCR) is used to record information related to the company auto assigned to an employee for business use.

Access this form by making the following selection from the Navigator:

Component: Employee Resourcing
Process: Maintain Additional Employee Details
Task: Automobile

For practice, access the Automobile Information form (24-SCR) for employee 0012, Andrew Anders.

2. Enter the Fleet ID

Enter the number assigned by the fleet department, or according to company policy, to identify the company automobile assigned to an employee. This is a 5-digit alphanumeric text box.

For practice, type '00001'.

3. Enter the Date

Enter the date the automobile was given to the employee. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '01-10-1998' (US and Canada) or '10-01-1998' (elsewhere).

4. Enter the Number

Enter the serial number (or vehicle identification number) of the employee's company automobile.

For practice, type 'F-4900-567-4485'.

5. Enter the Make

Enter the make or brand of the employee's company automobile.

For practice, type 'Ford'.

6. Enter the Model

Enter the model or type of the employee's company automobile.

For practice, type 'Mustang'.

7. Enter the Color

Enter the color of the company automobile.

For practice, type 'Green'.

8. Enter the Miles

Enter the mileage listed on the odometer of the company automobile when the employee receives the auto, or the mileage when it was last serviced. This is a six-digit text box with no decimal places.

For practice, type '24500'.

9. Enter the Serviced (MM/YY)

Enter the month in the first text box and the year in the second text box when the company auto was last serviced.

For practice, type '12' and '97'.

10. Enter the Date Recovered

This date reflects when the employee has returned the automobile to the organization. It is automatically populated by the system when a Separations: Recovery Of Automobiles form (98-SCR) is recorded. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

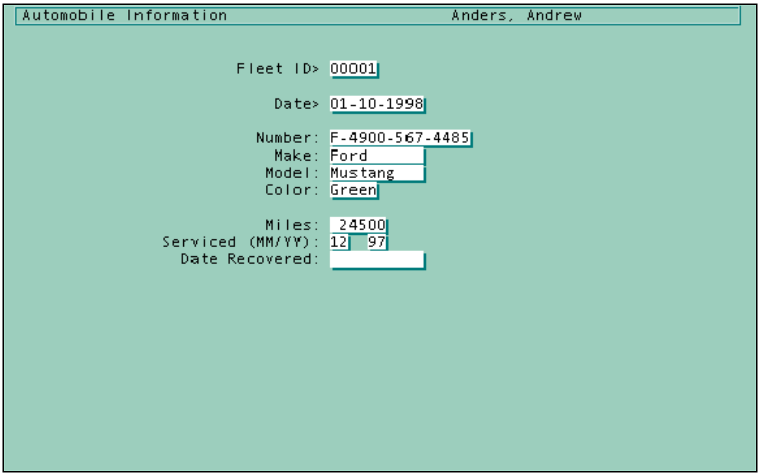
For practice, leave this text box blank to indicate that the automobile has not yet been returned.

11. Click Save or press Enter

The Automobile Information form (24-SCR) is now recorded.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



Automobile Information Anders, Andrew

Fleet ID> 00001

Date> 01-10-1998

Number: F-4900-567-4485
Make: Ford
Model: Mustang
Color: Green

Miles: 24500
Serviced (MM/YY): 12 97
Date Recovered:

See also:

- Achieving allocation and recovery of company property ***(on page 403)***

For an explanation of how this form is used to assign company automobiles to employees.

Viewing company property and automobiles not yet returned

To view company property and automobiles not yet returned, follow this step:

Access the Termination Summary form (96RSCR)

The Termination Summary form (96RSCR) provides a summary of the company property and vehicles, assigned to this employee, that have not been returned to the company.

Note: *Nonmonetary perquisites are not displayed on this form.*

Access this form by making the following selection from the Navigator:

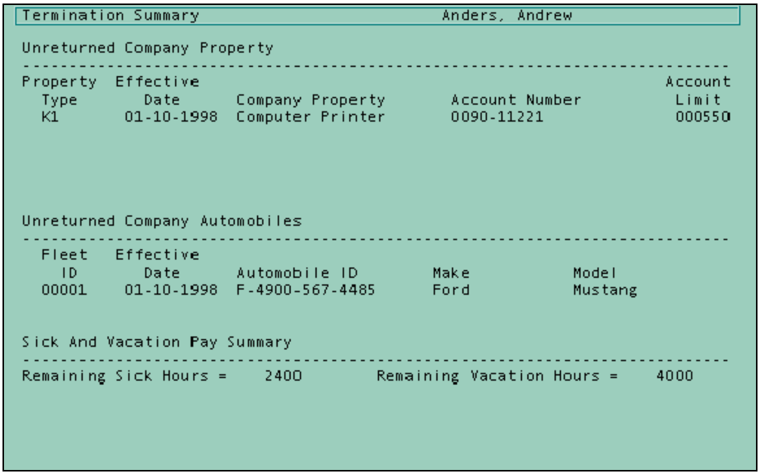
Component: Employee Resourcing
Process: Managing Terminations, Leaves and Returns
Task: Termination Review

You can now view the termination summary, including unreturned company property, unreturned company automobiles, and a sick and vacation pay summary. The terminating employee's remaining sick and vacation day hours are reported from the sick and vacation HEDs set up in the Amount One text box on the Employee Earnings And Deductions form

(HH-SCR). This information will display here after you enter a Separations And Terminations form (96-SCR) for the employee.

For practice, access the Termination Summary form (96RSCR) for employee 0012, Andrew Anders.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



Termination Summary Anders, Andrew

Unreturned Company Property

Property Type	Effective Date	Company Property	Account Number	Account Limit
K1	01-10-1998	Computer Printer	0090-11221	000550

Unreturned Company Automobiles

Fleet ID	Effective Date	Automobile ID	Make	Model
00001	01-10-1998	F-4900-567-4485	Ford	Mustang

Sick And Vacation Pay Summary

Remaining Sick Hours = 2400 Remaining Vacation Hours = 4000

See also:

- Achieving allocation and recovery of company property ***(on page 403)***

For an explanation of how this form is used to view company property and automobiles not returned.

Recording the return of company property

To record the return of company property, follow these steps:

1. Access the Separations: Recovery of Company Property form (99-SCR)

The Separations: Recovery Of Company Property form (99-SCR) displays all company property issued to an employee during his or her employment with the company that has not been returned. Each type of company property is displayed on a separate form panel. After entering the return date for a property type, the next property type is displayed.

Access this form by making the following selection from the Navigator:

Component:	Employee Resourcing
Process:	Managing Terminations, Leaves and Returns
Task:	Return Company Property

For practice, access the Separations: Recovery of Company Property form (99-SCR) for employee number 0012, Andrew Anders.

2. Enter the Date Returned

Enter the date the employee returned the company property to the company. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

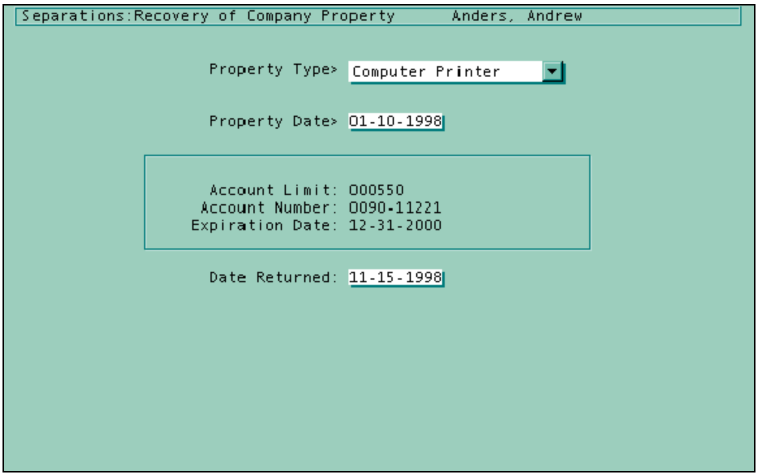
For practice, type '11-15-1998' (US and Canada) or '15-11-1998' (elsewhere).

3. Click Save or press Enter

The returned property is recorded. The Company Property form (22-SCR) is automatically updated to reflect that the property was returned and the property will no longer be displayed on the Termination Summary form (96RSCR) as not being returned.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



See also:

- Achieving allocation and recovery of company property ***(on page 403)***

For an explanation of how this form is used to return company property.

Recording the recovery of company automobiles

To record the recovery of company automobiles, follow these steps:

1. Access the Separations: Recovery of Automobiles form (98-SCR)

The Separations: Recovery of Automobiles form (98-SCR) form displays information regarding the company automobile(s) issued to an employee during his or her employment with the company that has not been recovered.

Access this form by making the following selection from the Navigator:

Component: Employee Resourcing
Process: Managing Terminations, Leaves and Returns
Task: Recover Company Automobile

For practice, access the Separations: Recovery of Automobiles form (98-SCR) for employee number 0012, Andrew Anders.

2. Enter the Recovery Date

Enter the date the employee returned the company automobile. Dates are entered in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '11-15-1998' (US and Canada) or '15-11-1998' (elsewhere).

3. Click Save or press Enter

The returned automobile is recorded. The Automobile Information form (24-SCR) is automatically updated to reflect that the auto was returned and the auto is no longer displayed on the Termination Summary form (96RSCR) as not being returned.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:

APPENDIX A

Report Quick Reference

In This Appendix

Introduction

This section provides a quick reference guide to the Human Resources Administration reports. Three Time and Attendance reports are included for your convenience.

Absence Log-By Absence Type (6C-RPT)

The Absence Log-By Absence Type report (6C-RPT) is a Time and Attendance tool that provides a list of all employees who have been absent for a specified absence type.

Business Tasks

This report is used to complete the following business tasks:

- Track patterns in employee absence behavior.
- Analyze the frequency of approved and non-approved absences among your employees.

Report field details

- **Absent Type**—Two characters that identifies an absent type.
- **Description**—Description of the absent type.
- **Absent Date**—Day of the week and its relationship to a holiday or the day of the employee's scheduled shift on which the absence occurred.
- **Employee Name**—First 25 positions of an employee's legal name.
- **Number**—Unique employee identifier, up to 10 characters in length.
- **Hours**—Number of hours the employee was absent from scheduled work.
- **Day-Code/Description**—Day of the week and its relationship to a holiday or the day of the employee's scheduled shift on which the absence occurred.
- **Approval-Code/Desc**—Designation of whether the employee's absence was approved (paid) or denied (not paid) and the determining authority.

Report sort order

As delivered, the sort order of this report is CONTROL 1-2, ABSENT-TYPE-CODE, and EMPLOYEE-NAME.

Parameter options and setup

- **As Of Date**—Enter a date in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere). If this text box is left blank, the entry defaults to the current date.

Absence Record-By Employee-Specified Period (6B-RPT)

The Absence Record-By Employee-Specified Period report (6B-RPT) is a Time and Attendance tool that provides a list of employees who have been absent within a range of dates. The exact date that an employee was absent along with the reason is also printed.

Business Tasks

This report is used to complete the following business tasks:

- Analyze patterns of employee absences within a specific range of time.
- Analyze patterns of absences for specific employees by reporting the number of hours absent, the day of the week on which an employee absence occurred, and whether or not the absence was approved.

Report field details

- **Absent Date**—Day of the week on which the absence occurred and its relationship to a holiday or the day of the employee's scheduled shift.
- **Type**—Type of absence day taken whether excused or unexcused.
- **Code/Desc**—Type of absence recorded for the employee.
- **Employee Name**—Absent employee's last and first name.
- **Number**—Employee's identification number.
- **Hours**—Number of hours the employee was absent from scheduled work.
- **Day-Code/Description**—Day of the week on which the absence occurred and its relationship to a holiday or the day of the employee's scheduled shift.
- **Approval-Code/Desc**—Designation of whether the employee's absence was approved (paid) or denied (not paid) and the determining authority.

Report sort order

As delivered, the sort order of this report is CONTROL 1-2, SAVE-DATE, ABSENT-TYPE-CODE, and EMPLOYEE-NAME-15.

Parameter options and setup

- **From Date**—Enter the absence start date in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).
- **To Date**—Enter the absence ending date in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

Active Applicants With Specific Education (0U-RPT)

The Active Applicants With Specific Education report (0U-RPT) identifies active applicants who have major and minor subjects on file that match specified subject code(s), such as education, degrees earned, or cumulative grade point averages achieved.

Business Tasks

This report is used to complete the following business tasks:

- Identify potential candidates for a job or position based on education requirements.
- Narrow a position search by looking at applicants' major and minor fields of study.
- Set job criterion for positions being filled by looking specifically at an applicant's cumulative grade point average, the number of years the applicant was in school, and the year of graduation.

Report field details

- **Applicant Name**—Applicant's first and last name.
- **Applicant Number**—Unique applicant identifier, up to ten characters in length.
- **Education Code/Level**—Three characters that identify the type of education that an employee has completed or is in the process of completing.
- **Cum GPA**—Grade point average of all courses completed by the employee at the indicated school.
- **# Yrs**—Number of years the employee attended at the indicated school.
- **Grad**—Year the employee graduated from the indicated school.

Report sort order

As delivered, the sort order of this report is CONTROL-1-2, W8-03-803 (which holds the subject code that matched the applicant to one of the report subject codes), W8-01-806 (which holds the flag that indicates major or minor), EDUCATION-LEVEL, GRADE-PT-AVG-CUML, and APPLICANT-NAME.

Parameter options and setup

- **First**—Enter the applicant's first subject code.
- **Second**—Enter the applicant's second subject code.
- **Third**—Enter the applicant's third subject code.

An active applicant is printed on the report if he or she matches a major or minor subject, at any recorded level of education. The subject codes do not have to be entered in any particular order, but are printed in alphanumeric order. You only have to specify one subject code to receive report output.

Active Applicants With Specific Skills (0V-RPT)

The Active Applicants With Specific Skills report (0V-RPT) lists active applicants whose recorded skills and abilities match specified skill codes, allowing you to identify which potential employees have the skills required to perform the job/position being interviewed for.

Business Tasks

This report is used to complete the following business tasks:

- Narrow the field of candidates for a specific position by setting job requirements and parameters based on a level of skill proficiency.
- Verify whether an applicant has actually attained a skill proficiency and has achieved the skill proficiency rating reported.

Report field details

- **Applicant Name**—Applicant's first and last name.
- **Number**—Unique applicant identifier, up to ten characters in length.
- **Skills Code**—Code that describes the skill which the employee or applicant possesses.
- **Skills Description**—Description of the skill.
- **Proficiency Code**—Code that describes the assessment of the employee or applicant's skill proficiency.
- **Proficiency Desc**—Description of the proficiency.
- **Verification Code**—Code that identifies the means used to verify the fact that the employee does possess the skill.
- **Verification Description**—Description of the verification.

Report sort order

As delivered, the sort order of this report is CONTROL-1-2, SKILLS-CODE, SKILL-PROFICIENCY-CD, APPLICANT-NAME, and W8-02-803 that holds the skill level (the first two characters of a SKILLS-CODE) if a level is entered on the parameter form rather than an entire SKILLS-CODE.

Parameter options and setup

- **First**—Select the first skill code.
- **Second**—Select the second skill code.

Only one skill code or skill level is necessary to generate report output. If you only specify a skill level, information is printed for all active applicants who have a skill code recorded which begins with this level.

Alphabetic Listing Of Active And Inactive Employees (1A-RPT)

The Alphabetic Listing Of Active And Inactive Employees report (1A-RPT) provides you with a listing of all active and inactive employees in alphabetical order. An employee count is also provided.

Business Tasks

This report is used to complete the following business task:

- Display current information such as the employee's name, number, and resulting employee status.

Report field details

- **Employee Name**—Employee's legal name.
- **Employee Number**—Unique employee identifier, up to 10 characters in length.
- **Ctrl Three**—Organization level 3 value assigned this employee.
- **Ctrl Four**—Organization level 4 value assigned this employee.
- **Ctrl Five**—Organization level 5 value assigned this employee.
- **Ctrl Six**—Organization level 6 value assigned this employee.
- **Mail Distribution**—Employee's internal mail station or distribution data.
- **Hire Date**—Employee's original date of hire.
- **Employee Status**—Employee's status as a result of an activity.

Report sort order

As delivered, the sort order of this report is CONTROL-1, CONTROL-2, and EMPLOYEE-NAME.

Parameter options and setup

There are no parameters specified for this report.

Alphabetic Listing Of Active Applicants (0B-RPT)

The Alphabetic Listing Of Active Applicants report (0B-RPT) lists active applicants within the Applicant Tracking component.

Business Tasks

This report is used to complete the following business tasks:

- View employee's application history, including current and original application dates.
- Quickly find an applicant's information by displaying current information such as the applicant's name, number, and social security number information.

Report field details

- **Applicant Name**—Applicant's first and last name.
- **Number**—Unique applicant identifier, up to ten characters in length.
- **Social Security**—Social security (or insurance) number of the employee or applicant being added to the Employee Database.
- **Original Application**—Initial date when the applicant's application was taken.
- **Date**—Effective date of the current applicant status code.
- **Code**—Status of the applicant's request for employment with your organization.
- **Description**—Description of the status of the applicant's request for employment with your company.

Report sort order

As delivered, the sort order of this report is CONTROL-1-2, APPLICANT-NAME, and APPLICANT-NUMBER.

Parameter options and setup

There are no parameters specified for this report.

Alphabetic Listing Of Active/Inactive Applicants (0A-RPT)

The Alphabetic Listing Of Active/Inactive Applicants report (0A-RPT) lists active and inactive applicants within the Applicant Tracking component.

Business Tasks

This report is used to complete the following business tasks:

- Eliminate the need to sort through an entire history of applications by separating active applicants from inactive applicants.
- View employee's application history, including current and original application dates.
- Quickly find an applicants information by displaying current information such as the applicant's name, number, and social security number information.

Report field details

- **Applicant Name**—Applicant's first and last name.
- **Number**—Unique applicant identifier, up to ten characters in length.
- **Social Security**—Social security (or insurance) number of the employee or applicant.
- **Original Application**—Initial date indicating when the applicant's application was taken.
- **Date**—Effective date of the current applicant status code.
- **Code**—Status of the applicant's request for employment with your organization.
- **Description**—Description of the status of the applicant's request for employment.
- **Hire Date**—Date on which the applicant was or will be hired.

Report sort order

As delivered, the sort order of this report is CONTROL-1-2, APPLICANT-NAME, and APPLICANT-NUMBER.

Parameter options and setup

There are no parameters specified for this report.

Alphabetic Listing (3C-RPT)

The Alphabetic Listing report (3C-RPT) provides an alphabetical listing of active employees on file. Modification instructions to print this report in strict alphabetical sequence (not by organization), are documented internally in the report source program.

Business Tasks

This report is used to complete the following business tasks:

- Review employee organization level information.
- Verify active employee total count.

Report field details

- **Employee Name**—Employee's legal name.
- **Control One**—A value that represents the highest level of your company's hierarchy.
- **Control Two**—A value that represents the second level of your company's hierarchy.
- **Control Three**—Organization level 3 value assigned this employee.
- **Control Four**—Organization level 4 value assigned this employee.
- **Control Five**—Organization level 5 value assigned this employee.
- **Control Six**—Organization level 6 value assigned this employee.
- **Employee Number**—Unique employee identifier, up to 10 characters in length.
- **Social Security**—Unique employee identifier used for taxation in the USA.

Report sort order

As delivered, the sort order of this report is CONTROL-1, CONTROL-2, and EMPLOYEE-NAME.

Parameter options and setup

There are no parameters specified for this report.

Anniversary Listing (1F-RPT)

The Anniversary Listing report (1F-RPT) lists all employees who will attain an anniversary within the period of current date through one year from current date.

As delivered, the anniversary definitions will be one, five, ten, 15, 20, and 25 years. To change these definitions, you must change program instructions 00800 and 01060.

Business Tasks

This report is used to complete the following business task:

- Anticipate employee service anniversaries by listing them in advance of the actual anniversary date.

Report field details

- **Anniv Year—**Number of years elapsed since original hire date.
- **Anniv MM/DD—**Month and day on which anniversary will occur.
- **Employee Name—**Employee's legal name.
- **Employee Number—**Unique employee identifier, up to 10 characters in length.
- **Ctrl Three—**Organization level 3 value assigned this employee.
- **Ctrl Four—**Organization level 4 value assigned this employee.
- **Ctrl Five—**Organization level 5 value assigned this employee.
- **Ctrl Six—**Organization level 6 value assigned this employee.
- **Original Hire Date—**Employee's original date of hire.
- **Adjusted Seniority—**Adjusted date of hire based on break-in-service episodes.

Report sort order

As delivered, the sort order of this report is CONTROL-1, CONTROL-2, and EMPLOYEE-NAME.

Parameter options and setup

There are no parameters specified for this report.

Applicant Certificates, Licenses, and Permits (0F-RPT)

The Applicant Certificates, Licenses, and Permits report (0F-RPT) lists active applicants' unexpired certificates, licenses, and permits (CLPs) 'as of' a specified date.

Business Tasks

This report is used to complete the following business tasks:

- Notify employees that their CLPs are due to expire
- Access CLP information quickly through an alphabetically ordered arrangement of CLP codes and names within CLP codes

Report field details

- **CLP Type**—Type of certificate, license, or permit held by the employee.
- **Cert/License/Permit**—Description of CLPs.
- **Applicant Name**—Applicant's first and last name.
- **Applicant Number**—Unique applicant identifier, up to ten characters in length.
- **CLP Number**—Identification number of the certificate, license, or permit.
- **CLP Date Recorded**—Date the certificate, license, or permit information is recorded.
- **CLP Date Expired**—Expiration date of the certificate, license, or permit.
- **CLP Status**—Status (expired or renewed) of the recorded certificate, license, or permit entry.
- **Expire IND**—Indicator for CLPs due to expire within the two months following the date entered in the report parameters.

Report sort order

As delivered, the sort order is CONTROL-1-2, CLP-TYPE, and APPLICANT-NAME.

Parameter option and setup

- **As Of Date**—Enter a date in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere). If this text box is left blank, the entry defaults to the current date.

If a CLP has no expiration date, it will always print. If no date is entered on the report parameter form, then every CLP entered for each applicant will be printed.

Applicant Education And Skills Profile (0H-RPT)

The Applicant Education And Skills Profile report (0H-RPT) lists the education and skills on file for active applicants. The information included on this report is recorded on the Formal Education form and the Skills and Abilities form.

Business Tasks

This report is used to complete the following business tasks:

- Analyze an applicant's education profile and employment application.
- Research areas of expertise that have not been included on the employment application and that may be a source of questions that the interviewer can ask an applicant.

Report field details

- **Name**—Applicant's legal name.
- **SS#**—Social security (or insurance) number of the employee or applicant.
- **Appl #**—Applicant identifying number.
- **Date**—Date the report is being run.
- **Ctrl- 1-2**—Identifies a company and the employees associated with the company.
- **Original Appl Date**—First application date for a specific position.
- **Current Applicant Status**—Status of the applicant's employment request.
- **Education Level**—Type of education that an employee has completed or is in the process of completing.
- **School Attended**—School that the employee attended or is attending.
- **Education Major Subject**—Employee's primary course of study.
- **Education Minor Subject**—Employee's secondary course of study.
- **Education # Years**—Number of years the employee attended the indicated school.
- **Year Graduated**—Year the employee graduated from the indicated school.
- **Grade Point Avg Current**—Grade point average for the current term.
- **Grade Point Avg Cum**—Grade point average of all courses completed.
- **Credit Hour Req**—Number of required credit hours completed before the degree is granted.
- **Credit Hour Comp**—Number of credit hours completed.
- **Code**—Code that describes the skill.
- **Date Obtained**—Date on which the skill was obtained or the training course was completed.
- **Source**—Source of the skill.
- **Proficiency Rating**—Assessment of the skill proficiency.
- **Applicable Course**—Training course at which the employee obtained the skill.
- **Field1, 2, 3, 4**—Skill-related data for analysis purposes.

Report sort order

As delivered, the sort order of this report is CONTROL-1-2 and APPLICANT-NUMBER.

Parameter options and setup

There are no parameters specified for this report.

Applicant Expired Certificates, Licenses, And Permits (0G-RPT)

The Applicant Expired Certificates, Licenses, And Permits report (0G-RPT) lists all active applicants' certificates, licenses and permits that have expired and are due to be renewed on or before the date entered on the report parameter form.

Business Tasks

This report is used to complete the following business task:

- Identify applicants who need to be notified that their certificates, licenses, or permits are due to expire.

Report field details

- **CLP Type**—Code that identifies the type of certificate license or permit held by the employee.
- **Cert/License/Permit**—Description of the CLP.
- **Applicant Name**—Applicant's legal name.
- **Applicant Number**—Unique applicant identifier, up to ten characters in length.
- **CLP Date Recorded**—Date the certificate license or permit information is recorded.
- **CLP Number**—Identification number of the certificate, license, or permit.
- **CLP Date Expired**—Expiration date of the certificate, license, or permit.
- **CLP Code**—Code that identifies the status (expired or renewed) of the recorded certificate, license, or permit entry.
- **CLP Status**—Description of CLPs status.

Parameter options and setup

- **As Of Date**—Enter a date in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere). If this text box is left blank, the entry defaults to the current date.

Applicant Interview Response/Negative (04CRPT)

The Applicant Interview Response/Negative report (04CRPT) prints a negative response letter to an applicant you have interviewed but do not want to continue interviewing or hire.

The applicant must have an Applicant Status list box entry of Send Reject Letter-I, Send Reject Letter-1, Send Reject Letter-2, or Send Reject Letter-3 on the Applicant Information form. There must be a corresponding Type list box entry on the Interview Recap form for a letter to be generated.

Acceptable code combinations are:

- **Send Reject Letter-I**—Investigation.
- **Send Reject Letter-1**—First Department.
- **Send Reject Letter-2**—Second Department.
- **Send Reject Letter-3**—Third Department.

After the letter has been generated, the applicant's Applicant Status list box is changed by the report to a rejection code (Rejection After Init, 1st, 2nd, or 3rd) on the Applicant Information form.

You must insert the appropriate sender's name and title in Paragraph P270-CLOSING in the report program. There is one line reserved for the name and two lines reserved for their title. Insert the name and title between the quotation marks on the appropriate lines. If the individual only has a one line title, insert spaces in the second title line.

Business Tasks

This report is used to complete the following business task:

- Communicate a negative interview response to an applicant.

Report field details

This report is a letter format that has no columnar format.

Parameter options and setup

- **Applicant Number**—Enter the number of the applicant for whom you are printing the letter. Up to ten alphanumeric characters may be entered.
- **Date Of Letter**—Enter the date in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere). This is the date that will be printed at the top of the letter. Leave this entry blank to use the current date.

November 20, 1997

EUGENE MCKOY
7927 LANGLEY
CHICAGO, IL          60632

Dear EUGENE,

Thank you for taking the time from your schedule to come for the
interview on 11-15-1997.  While we were impressed with your
credentials, we are sorry we do not have an open position at this time
which meets your qualifications and interests.

As we stated before, we have entered your resume into our Applicant
Tracking system data bank.  We will notify you at the address and/or
telephone number you submitted on your resume should we have an open
position which requires your skills and background.

Thank you again for taking the time to submit your resume to
ACME MANUFACTURING.

Sincerely,

(Name entered in P-EDIT PROGRAM)
(Title entered in P-EDIT PROGRAM)
(Second title line or blanks)
```

Applicant Interview Response/Positive (04DRPT)

The Applicant Interview Response/Positive report (04DRPT) prints a positive response letter to an applicant you have interviewed and want to return for additional interviewing. The letter includes a date and time for the interview, a phone number to contact, the length of the interview, and the appropriate sender's name and title in the closing. You must have a Job Sequence Number list box entry recorded on the Job Or Position Applied For form. A matching Sequence Number list box entry recorded on the Interview Recap form to have a letter generated.

You must insert the appropriate sender's name and title in Paragraph P280-CLOSING in the report program. This is the individual who signs the letter in the space provided. There is one line reserved for the name and two lines reserved for their title. Insert the name and title between the quotation marks on the appropriate lines. If the individual only has a one line title, insert spaces in the second title line.

You must also insert the appropriate contact phone number in Paragraph P250-SCHEDULE-INTERVIEW and the length of the interview in Paragraph P260-MORE-INFO in the report program.

Business Tasks

This report is used to complete the following business task:

- Communicate a next interview response to an applicant.

Report field details

This report is a letter format that has no columnar format.

Parameter options and setup

- **Applicant Number**—Enter the number of the applicant for whom you are printing the letter. Up to ten alphanumeric characters may be entered.
- **Date Of Letter**—Enter a date in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere). This is the date that will be printed at the top of the letter. Leave this entry blank to use the current date.
- **Interview Date**—Enter a date in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).
- **Interview Time**—Enter the scheduled appointment time for the interview in HHMM format.

TIMOTHY BENTKOWSKI
14715 KEDVALE
OAK FOREST, IL             60523

Dear TIMOTHY,

Thank you for taking the time from your schedule to come for the
interview on 01-09-1998.  We would like to schedule an additional series
of interviews with the management and associates concerning our
position of GRINDING MACHINE SETTER.

We would like to give these people the opportunity to further discuss
your credentials and interests.  Our schedule indicates we would be
able to meet with you on 01-20-1998 at 9:00 a.m.  Please contact me or
my secretary at 312-454-1865 to confirm or reschedule this
appointment.

This interview should take about two hours.  If you have additional
information you feel may be of interest to these people, please bring
it with you to the interview.

Thank you for your interest in ACME MANUFACTURING.
We look forward to seeing you on 01-20-1998 at 9:00 a.m.

Sincerely,

(Name entered in P-EDIT PROGRAM)

Applicant Listing By Job Code (0J-RPT)

The Applicant Listing By Job Code report (0J-RPT) lists applicants by the job code for which they have applied or are being considered. This could prove helpful in identifying positions that have a high turn-over or those that have a large number of interviews being conducted prior to an applicant being hired.

Business Tasks

This report is used to complete the following tasks:

- Identify those jobs which have a high turn-over and those jobs which have a large number of interviews that are being conducted before an applicant is hired.

Report field details

- **Applicant Name**—Applicant's legal name.
- **Number**—Unique applicant identifier, up to ten characters in length.
- **Job Code**—Alphanumeric identifier of the job for which the applicant is being considered.
- **Job Code Extent**—Four-digit number that works in conjunction with the job code text box to further identify the job for which the applicant is being considered.
- **Job Title**—Title assigned to the job code/job code extent for the job for which an applicant is being considered.
- **Current Applicant Status Code**—Code that identifies the status of an applicant's progress through the interview process for this job and/or position.
- **Current Applicant Status Description**—Description of the status of an applicant's progress through the interview process for this job and/or position.
- **Job Application Status Code**—Code that identifies the status of an applicant's standing in the hiring process.
- **Dept**—Code that identifies the department in which the job and/or position opening exists.

Report sort order

As delivered, the sort order of this report is CONTROL-1-2, JOB-CODE-CONSIDERED, JOB-EXTENT-CONSIDERD, APPLICANT-NAME, and JOB-SEQ-NBR.

Parameter options and setup

There are no parameters specified for this report.

Applicant Listing By Position Number (0K-RPT)

The Applicant Listing By Position Number report (0K-RPT) lists applicants by the positions for which they have applied or are being considered. The current applicant status and position status are also displayed.

Business Tasks

This report is used to complete the following tasks:

- Identify how many applicants are being considered for a specific position by displaying each applicant's current status and applicant position status.
- Identify positions which have a high turn-over ratio.
- Identify those jobs that have a large number of interviews that are being conducted before an applicant is hired.

Report field details

- **Applicant Name**—Applicant's legal name.
- **Number**—Unique applicant identifier, up to ten characters in length.
- **Position Code**—Code which identifies the position for which the applicant is being considered.
- **Position Title**—Position title description.
- **Curr Appl Status Code**—Status code of the applicant's request for employment.
- **Curr Appl Status Description**—Description of the current status of the applicant's request for employment.
- **Position Standing Date**—Date on which the applicant's position standing was reviewed.
- **Position Standing Code**—Status of an applicant's progress through the interview process for this job and/or position.
- **Position Standing Description**—Applicant's standing in relation to the position being considered.

Applicant Listing By Source (0S-RPT)

The Applicant Listing By Source report (0S-RPT) displays the source from which applicants first heard about a job opening, along with applicable job agency information. The applicant's name, number, source, and agency information are printed.

Business Tasks

This report is used to complete the following business task:

- Analyze and determine the most effective media for applicant recruiting for specific positions.

Report field details

- **Applicant Name**—Applicant's legal name.
- **Number**—Unique applicant identifier, up to ten characters in length.
- **Applicant Source Code**—Original source of the application.
- **Applicant Source Description**—Description of the application source.
- **Source Agency Code**—Unique two-character code identifying the employee's employment agency.
- **Source Agency Name**—Name of the source (employment) agency.

Report sort order

As delivered, the sort order of this report is CONTROL-1-2, APPLICANT-SOURCE-CD, AGENCY-ID, APPLICANT-NAME, and APPLICANT-NUMBER.

Parameter options and setup

There are no parameters specified for this report.

Applicant Listing By Status (0I-RPT)

The Applicant Listing By Status report (0I-RPT) lists all applicants by their current applicant status code and the jobs for which they are being, or have been, considered.

Business Tasks

This report is used to complete the following business tasks:

- Prepare for the interview process by reviewing all of the applicants who have not yet started the interview process for a specific position.
- Identify those applicants who should be moved to a 'dead' applicant file that contains applicants who have been hired or are not actively being considered for employment with your organization (moving these applicants to this file prevents them from showing up on active applicant reports).

Report field details

- **Name**—Applicant's legal name.
- **Number**—Unique applicant identifier, up to ten characters in length.
- **Current Applicant Status Code**—Status of the applicant's request for employment with your company.
- **Current Applicant Status Description**—Description of an applicant's current application status.
- **Job Code**—Alphanumeric identifier of the job for which the applicant is being considered.
- **Job Extent**—Four-digit number that works in conjunction with the job code text box to further identify the job for which the applicant is being considered.
- **Job Title**—Title assigned to the job code/job code-extent for the job for which an applicant is being considered.
- **Job Application Status Date**—Date on which the applicant's application status for a specific position was reviewed.
- **Job Application Status Code**—Code that identifies the status of an applicant's progress through the interview process for this job and/or position.
- **Job Application Status Description**—Description of an applicant's job application status.
- **Department**—Code that identifies the department in which the job and/or position opening exists.

Report sort order

As delivered, the sort order of this report is CONTROL-1-2, CURRENT-APPL-STATUS, APPLICANT-NAME, and JOB-SEQ-NBR.

Parameter options and setup

There are no parameters specified for this report.

Applicant Listing By Training Course (0T-RPT)

The Applicant Listing By Training Course report (0T-RPT) displays the recorded training information for all applicants.

Business Tasks

This report is used to complete the following business tasks:

- Find applicants who have taken specific training courses.
- Focus on applicants with the most recent training by including dates that applicants attended specific courses.

Report field details

- **Applicant Name**—Applicant's legal name.
- **Number**—Unique applicant identifier, up to ten characters in length.
- **Training Course Code**—Code that identifies the training course which the employee has attended or is scheduled to attend.
- **Training Course Description**—Description of the training course which the employee has attended or is scheduled to attend.
- **Course Completion**—Status of the trainee in the course; also identifies the courses in which the employee is enrolled, but has not yet attended.
- **Year**—Year in which the training is scheduled to be, or was, taken.
- **Course #**—Number assigned to the specified course.

Report sort order

As delivered, the sort order of this report is CONTROL-1-2, TRAINING-COURSE-CODE, TRAINING-YEAR, TRAINING-COURSE-NO, and APPLICANT-NAME.

Parameter options and setup

There are no parameters specified for this report.

Applicant Listing With Specified Training Course (0W-RPT)

The Applicant Listing With Specified Training Course report (0W-RPT) lists active applicants who have a required training course code recorded.

Business Tasks

This report is used to complete the following business task:

- Narrow the list of possible candidates for a specific position by producing a list of applicants who have completed necessary training courses within a certain range of time.

Report field details

- **Applicant Name**—Applicant's first and last name.
- **Number**—Unique applicant identifier, up to ten characters in length.
- **Training Course Code**—Code that identifies the training course which the employee has attended or is scheduled to attend.
- **Training Course Desc**—Description of the training course.
- **Course Completion**—Description of the manner in which the course was completed.
- **Year**—Year in which the training has been scheduled or was taken.
- **Course #**—Number assigned to the course taken in the year that this record identifies.

Report sort order

As delivered, the sort order of this report is CONTROL-1-2, TRAINING-COURSE-CODE, TRAINING-YEAR, TRAINING-COURSE-NO, and APPLICANT-NAME.

Parameter options and setup

- **Training Course Code**—Select the three-character training course code.

- See also:
- Reports used for recruiting and selecting employees ***(on page 47)***

Applicant Mailing Address Labels (0Q-RPT)

The Applicant Mailing Address Labels report (0Q-RPT) produces a mailing label for correspondence with applicants.

Business Tasks

This report is used to complete the following business task:

- Improve the efficiency of correspondence with applicants through the creation of mailing labels with the applicant's name and address.

Report field details

- **Name/Address**—Applicant's name and address.
- **Zip Code**—Applicant's zip code.

Parameter options and setup

- **As of Date**—Enter the 'as of' date text box in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere). If a date is specified, only applicants whose original application date is equal to or later than the specified date are printed. If this text box is left blank, a label is printed for all active applicants.

Applicant Preferred Work Environment (0Z-RPT)

The Applicant Preferred Work Environment report (0Z-RPT) lists information on each applicant's preferred work environment, current work status, and availability details.

Business Tasks

This report is used to complete the following business tasks:

- Sort through applicant work environment preferences to find applicants who are willing to work in a position that has a required work schedule or shifts.
- Analyze applicant information to find all applicants who are willing to travel the necessary amount for a specific position.
- Track applicants' willing to relocate to a specific location, and the time-frame during which applicants will be available for work, and the number of days notice that they need to give their current employer.
- Monitor which candidates will consider a lower-rated job/position and their expectations concerning hourly, monthly, and/or annual pay.
- Analyze the qualifications of applicants who are previous employees, giving a prior termination date and employee number to help you locate the old employee record.

Report field details

- **Applicant Name**—Applicants first and last name.
- **Number**—Unique applicant identifier, up to ten characters in length.
- **Recorded**—Date on which the data of the applicant's preferred work environment and availability was recorded.
- **Earliest Available**—Earliest date on which the applicant may be available to begin work.
- **Required Days-Notice**—Number of days notice the applicant must give when terminating prior employment.
- **Lower Rated-Job**—Indicator of whether or not the applicant wants to be considered for a lower or less-rated job than the one for which the original consideration was performed.
- **Will-Travel/Percent**—Applicant's willingness to relocate as a condition of employment.
- **Relocation Election**—Description of an applicant's willingness to relocate.
- **Will-Relocate-To**—Details of an applicant's relocation preferences.

Report sort order

As delivered, the sort order of this report is CONTROL-1-2, and EMPLOYEE- NAME-15.

Parameter options and setup

There are no parameters specified for this report.

Applicant Professional Associations (0E-RPT)

The Applicant Professional Associations report (0E-RPT) lists active applicants and their recorded professional membership information.

Business Tasks

This report is used to complete the following business task:

- Track applicant association memberships in alphabetical order by applicant name and association number.

Report field details

- **Applicant Name**—Applicant's legal name.
- **Applicant Number**—Unique applicant identifier, up to ten characters in length.
- **Association Date**—Date the employee became affiliated or renewed membership with the association.
- **Association Code**—Code that identifies the association.
- **Association Name**—Name of the association.
- **Association Number**—Membership identification number.
- **Association Expire**—Association membership expiration date.

Report sort order

As delivered, the sort order of this report is CONTROL-1-2, APPLICANT-NAME, and ASSOCIATION-CODE.

Parameter options and setup

There are no parameters specified for this report.

Applicant Profile (0D-RPT)

The Applicant References report (03-RPT) provides an alphabetical list of all the reference information on an applicant's file, identifying whether the applicant has been contacted and, if so, any responses given.

Business Tasks

This report is used to complete the following task:

- Track the details of communication with an applicant's references by printing the reference status on the report for each reference, identifying whether the reference has been contacted and, if so, the response.

Report field details

- **Applicant Name**—Applicant's last and first name.
- **Number**—Unique applicant identifier, up to ten characters in length.
- **Reference Name**—Name of the job/personal reference supplied by the applicant.
- **Relationship**—Relationship of the job or personal reference to the applicant.
- **Contact Instructions**—Indicator for how and when the applicant wants job or personal reference to be contacted.
- **Reference Status**—Status and results of the reference checking process.

Report sort order

As delivered, the sort order of this report is CONTROL-1-2, APPLICANT-NAME-15, and REF-ID.

Parameter options and setup

- **Option**—Specify 'ALL' to print reference information for active and inactive applicants. Leave the text box blank to select that only active applicant information be printed.

Applicant Resume Response/Negative (04ARPT)

The Applicant Resume Response/Negative report (04ARPT) prints a negative response letter to an applicant for whom you have received a resume but do not want to interview.

You must insert the sender's name and title in Paragraph P270-CLOSING in the report program. This is the individual who signs the letter in the space provided. There is one line reserved for the name and two lines reserved for their title. Insert the name and title between the quotation marks on the appropriate lines. If the individual only has a one line title, insert spaces in the second title line.

Business Tasks

This report is used to complete the following task:

- Communicate a negative response to the resume submitted by an applicant.

Report field details

This report is a letter format that has no columnar format.

Parameter options and setup

- **Applicant Number**—Enter the number of the applicant for whom you are printing the letter. Up to ten alphanumeric characters may be entered.
- **Date Of Letter**—Enter the date in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere). This is the date that will be printed at the top of the letter. Leave this entry blank to use the current date.

April 30, 1998

JOSEPH GOMEZ
4386 S. HOYNE
CHICAGO, IL         60622

Dear JOSEPH,

Thank you for submitting your resume for our consideration.  We have
reviewed your qualifications and while we were impressed with your
credentials, we do not have an open position at this time which meets
your qualifications and interests.

However, we have entered your resume into our Applicant Tracking
system data bank.  We will notify you at the address and/or telephone
number you submitted on your resume should we have an open position
which requires your skills and background.

Thank you again for taking the time to submit your resume to
ACME MANUFACTURING.

Sincerely,

 (Name entered in P-EDIT PROGRAM)
(Title entered in P-EDIT PROGRAM)
(Second title line or blanks)
```

Applicant Resume Response/Positive (04BRPT)

The Applicant Resume Response/Positive report (04BRPT) prints a positive response letter to an applicant for whom you have received a resume and want to interview. The letter includes a date and time for the interview, a phone number to contact, the length of the interview, and the appropriate name and title in the closing.

You must insert the appropriate name and title in Paragraph P280-CLOSING in this report program. This is the individual who signs the letter in the space provided. There is one line reserved for the name and two lines reserved for their title. Insert the name and title between the quotation marks on the appropriate lines. If the individual only has a one line title, insert spaces in the second title line.

You must also insert the appropriate contact phone number in Paragraph P250-SCHEDULE-INTERVIEW and the length of the interview in Paragraph P260-MORE-INFO in this program.

Business Tasks

This report is used to complete the following task:

- Communicate a positive response to the resume submitted by an applicant.

Report field details

This report is a letter format that has no columnar format.

Parameter options and setup

- **Applicant Number**—Enter the number of the applicant for whom you are printing the letter. Up to ten alphanumeric characters may be entered.
- **Date Of Letter**—Enter the date in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere). This is the date that will be printed at the top of the letter. Leave this entry blank to use the current date.
- **Interview Date**—Enter the interview date in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).
- **Interview Time**—Enter the scheduled appointment time for the interview in the format HHMM.

November 11, 1997

KENNETH BRADY
2554 W. BYRON
EVANSTON, IL         60604

Dear KENNETH,

Thank you for submitting your resume for our consideration.  We have
reviewed your qualifications and would like to schedule an interview
to further discuss your credentials and determine if we have an open
position at this time which meets your qualifications and interests.

Our schedule indicates we would be able to meet with you on 11-20-1997
at 10:00 a.m. Please contact me or my secretary at 312-454-1865 to
confirm or reschedule this appointment.

This interview should take about two hours.  We have entered your
resume into our Applicant Tracking system data bank, but we will want
to have you complete an application before the interview to gather
additional information.  If you have additional information you feel
we should have, please bring it with you to the interview.

Thank you for your interest in ACME MANUFACTURING.
We look forward to meeting you on 11-20-1997 at 10:00 a.m.

Sincerely,

(Name entered in P-EDIT PROGRAM)
(Title entered in P-EDIT PROGRAM)

Automobile Information (16-RPT)

The Automobile Information report (16-RPT) displays information about company automobiles.

Business Tasks

This report is used to complete the following tasks:

- List company automobiles that need to be serviced within a specified month.
- List all company automobile data.

Report field details

- **Fleet ID**—Number assigned according to company policy to identify the company automobile assigned to an employee.
- **Employee Name**—Employee's legal name.
- **Employee Number**—Unique employee identifier, up to 10 characters in length.
- **Automobile Date**—Date the automobile was assigned to the employee.
- **Automobile Number**—Serial number of the employee's company automobile.
- **Automobile Make**—Make or brand of the employee's company automobile.
- **Automobile Model**—Model or type of the employee's company automobile.
- **Color**—Color of the company automobile.
- **Miles**—Mileage listed on the odometer of the company automobile when the employee receives the auto or it is serviced.
- **Date Last Serviced**—Date on which the company automobile was last serviced.
- **Date Recovered**—Date on which the employee returned the company automobile.

Parameter options and setup

- **Servicing Date**—Enter the date in YYMM format to print a report listing all company autos that were last serviced more than six months prior to the Servicing Date. Leave this text box blank to report all automobiles.

Birthday Listing (1G-RPT)

The Birthday Listing report (1G-RPT) provides a listing of all employees having a birthday during a three-month period from the date entered in the report parameters.

Business Tasks

This report is used to complete the following task:

- Provide employee birth date information.

Report field details

- **Birth Month**—Month of the year during which the employee was born.
- **Birth Day**—Day of the month on which the employee was born.
- **Employee Name**—Employee's legal name.
- **Ctrl Three**—Organization level 3 value assigned this employee.
- **Ctrl Four**—Organization level 4 value assigned this employee.
- **Ctrl Five**—Organization level 5 value assigned this employee.
- **Ctrl Six**—Organization level 6 value assigned this employee.
- **Sex Code**—Employee's gender.
- **Mail Distr Data**—Employee's internal mail station or distribution data.

Report sort order

As delivered, the sort order of this report is BIRTH-MONTH, BIRTH-DAY, and EMPLOYEE-NAME.

Parameter options and setup

- **As Of Date**—Enter the date MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere). If this text box is left blank, the current date is used.

Blood Donors (3H-RPT)

The Blood Donors report (3H-RPT) lists employees who have indicated that they are willing to donate blood.

Business Tasks

This report is used to complete the following business tasks:

- Provide a quick reference of donors alphabetically by name, including their internal mail distribution number and the last date that each donor gave blood so that you can determine when enough time has passed for the employee to give blood again.
- Identify and to locate employees with a specific blood type when there is a shortage or emergency.
- Quickly schedule employees for donation appointments during a blood drive.

Report field details

- **Employee Name**—Employee's legal name.
- **Employee Number**—Unique employee identifier, up to 10 characters in length.
- **Ctrl Three**—Organization level 3 value assigned to this employee.
- **Control Four**—Organization level 4 value assigned to this employee.
- **Control Five**—Organization level 5 value assigned to this employee.
- **Control Six**—Organization level 6 value assigned to this employee.
- **Blood Type**—Code that identifies an employee's blood type.
- **Willing To Give**—Code that identifies an employee's willingness to donate blood.
- **Date of Last Donation**—Date that identifies when an employee last donated blood.
- **Work Phone**—Employee's work telephone number.
- **Work Ext.**—Employee's work telephone extension number.
- **Mail Distrib Data**—Employee's internal mail station or distribution data.

Report sort order

As delivered, the sort order of this report is CONTROL-1, CONTROL-2, AND EMPLOYEE-NAME.

Parameter options and setup

There are no parameters specified for this report.

Certificate, License And Permit (1I-RPT)

The Certificate, License And Permit report (1I-RPT) lists employees who have certificates, licenses, and permits (CLPs) recorded.

Business Tasks

This report is used to complete the following business tasks:

- Provide a quick reference of the CLPs held by employees, indicating within a specified range of time which CLPs are due to expire.
- Focus on specific CLPs by grouping all employees who have the specified CLP together.

Report field details

- **CLP Type**—Code that identifies the type of certificate license or permit the employee holds.
- **Cert/License/Permit**—Description of CLP Type code.
- **Employee Name**—Employee's last and first name.
- **Employee Number**—Unique employee identifier, up to 10 characters in length.
- **Ctrl Four**—Organization level 4 value assigned this employee.
- **CLP Number**—Identification number of the certificate license or permit.
- **CLP Date Recorded**—Date the certificate license or permit information is recorded.
- **CLP Date Expired**—Expiration date of the certificate license or permit.
- **CLP Status**—Code that identifies the status (expired or renewed) of the recorded certificate license or permit entry.
- **Expire IND**—Indicator to identify the expiration of CLPs within two months of a stated date.

Report sort order

As delivered, the sort order of this report is CONTROL-1, CONTROL-2, CLP-TYPE, and EMPLOYEE-NAME.

Parameter options and setup

- **As Of Date**—Enter a date in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

Company Personal Property Information (12-RPT)

The Company Personal Property Information report (12-RPT) provides information on company property that has been assigned to employees.

Business Tasks

This report is used to complete the following business tasks:

- Provide a quick reference listing of company property accounts, including expiration dates within a specified range of time.
- Analyze company property that has been assigned to employees.
- Monitor balances of credit cards and other company accounts.
- Provide a listing of company property that must be collected or cancelled prior to an employee's termination.
- Record the date that company property is recovered.

Report field details

- **Employee Name**—Employee's last and first name.
- **Employee Number**—Unique employee identifier, up to 10 characters in length.
- **Property Date**—Date property was given to an employee.
- **Company Property Type**—Code that identifies the type of property given to an employee.
- **Company Property Description**—Description of the property given to an employee.
- **Account Number**—Account number of a credit card/account or serial number of property given to an employee.
- **Account Limit**—Limit amount for an employee credit account.
- **Expiration Date**—Last date that specific company property in an employee's possession may be used.
- **Date Returned**—Date the employee returned the company property to the company.

Report sort order

As delivered, the sort order of this report is CONTROL-1, CONTROL-2, EMPLOYEE-NAME, EMPLOYEE-NUMBER, PROPERTY-TYPE, and PROPERTY-DATE.

Parameter options and setup

- **Expiration Date**—Enter a date in YYMM format to print a report listing only those company property accounts due to expire, for example, company credit card accounts.

Leave the date parameter blank to list all company property assigned to employees.

Current Job Report (3W-RPT)

The Current Job Report (3W-RPT) lists all active employees and their current job and salary data, with associated salary grade information.

Business Tasks

This report is used to complete the following business tasks:

- Monitor employee current job information.
- Compare salary grade range penetration for employees in the same job.
- Analyze salary grade range information for employees.

Report field details

- **Job Code**—Alphanumeric identifier for the job that is currently assigned to the employee.
- **Job Code Extent**—Four-digit number that works in conjunction with the job code text box to further identify the job assigned to the employee.
- **Job Title**—Description assigned to this job.
- **Salary Grade**—Designation of the salary grade assigned to this job.
- **Employee Name**—Employee's legal name.
- **Hire Date**—Employee's original date of hire.
- **Converted Salary**—Employee's annual salary expressed in the same terms as the salary grade table being used, for example, annual, per period, or hourly.
- **Job Salary Range Minimum**—Lowest value on the salary range for this job.
- **Job Salary Range Midpoint**—Midpoint on the salary range for this job.
- **Job Salary Range Maximum**—Highest value on the salary range for this job.
- **Compa Ratio**—Ratio of the employee's salary compared to the midpoint of the salary range.

Report sort order

As delivered, the sort order of this report is CONTROL-1, CONTROL-2, JOB-CODE, and JOB-CODE-EXTENT.

Parameter options and setup

There are no parameters specified for this report.

Disability And Work Restrictions (5X-RPT)

The Disability And Work Restrictions report (5X-RPT) displays employees who have disabled conditions and/or any work-related restrictions. This information is recorded on the Injury/Illness And Work Restriction form (17-SCR).

Business Tasks

This report is used to complete the following business task:

- Verify or report disabilities or work-related restrictions that prevent employees from performing certain jobs.

Report field details

- **Employee Name**—Employee's last and first name.
- **Employee Number**—Unique employee identifier, up to 10 characters in length.
- **Emergency Effective Date**—Effective date of the emergency information.
- **Disability Codes**—Code that identifies the employee's disability condition.
- **Work Restriction Codes**—Code that identifies the employee's work restriction.
- **Disability Date**—Date that the employee's disability occurred.

Parameter options and setup

- **As of Date**—Enter a date in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

Disciplinary Actions Report (3M-RPT)

The Disciplinary Actions Report report (3M-RPT) provides an alphabetical listing of employees who have disciplinary actions recorded. The information on this report is recorded on the Disciplinary Actions form.

Business Tasks

This report is used to complete the following business tasks:

- Analyze reasons for disciplinary action.
- Monitor dates of disciplinary actions.
- Monitor scheduling and levels of disciplinary reviews.

Report field details

- **Employee Name**—Employee's last and first name.
- **Number**—Unique employee identifier, up to 10 characters in length.
- **Occur Date**—Date on which the action occurred which warranted the disciplinary action.
- **Reason Code**—Code that represents the reason for disciplinary action.
- **Reason Desc**—Description of the reason for disciplinary action taken.
- **Action Date**—Date on which the disciplinary action goes into effect.
- **Action Code**—Code that represents the disciplinary action which has taken place.
- **Action Desc**—Description of the disciplinary action taken.
- **Record Date**—Date on which the disciplinary action is actually recorded.
- **Review Date**—Date on which the disciplinary action review is scheduled.
- **Review Required Code**—Code that represents the review required for the disciplinary action.
- **Review Required Desc**—Description of the required disciplinary review.

Report sort order

As delivered, the sort order of this report is CONTROL-1-2, EMPLOYEE-NAME, EMPLOYEE-NUMBER, DIS-OCCUR-DATE, and DIS-REASON-CODE.

Parameter options and setup

There are no parameters specified for this report.

Driver License Information (15-RPT)

The Driver License Information report (15-RPT) displays employee driver license information as recorded on the Driver License Information form (25-SCR).

Business Tasks

This report is used to complete the following business tasks:

- Monitor employee driver license information.
- Identify employees who should have their drivers licenses renewed within a specified month.
- Identifies employees with driving restrictions that prohibit them from driving under certain conditions.

Report field details

- **Employee Name**—Employee's last and first name.
- **Employee Number**—Unique employee identifier, up to 10 characters in length.
- **Driver License ID**—Driver license ID number assigned to the employee.
- **Driver License Date**—Effective date of the employee's drivers license information.
- **Driver License Number**—Employee's drivers license number.
- **Driver License State**—State where the employee's drivers license is registered.
- **Driver License Class**—Driver license class from the employee's drivers license.
- **Driver License Restrictions**—Driving restrictions stated on the employee's drivers license.
- **Driver License Expiration**—Date on which the drivers license will expire.

Parameter options and setup

- **Expiration Date**—Enter a date in YYMM format to print a report listing employee driver licenses that are due to expire within a specified month. Type all zeros in this entry to print driver license information for all employees.

Education And Tuition Refund Profile (1L-RPT)

The Education And Tuition Refund Profile report (1L-RPT) lists education backgrounds past and present for all active employees. This report also contains tuition refund information, if any is to be applied.

Business Tasks

This report is used to complete the following business tasks:

- Monitor employee education information.
- Identify employees who have tuition refunds to be processed.

Report field details

- **Name**—Employee's last and first name.
- **SS #**—Unique employee identifier used for taxation in the USA.
- **Emp #**—Unique employee identifier, up to 10 characters in length.
- **Education Level**—Type of education that an employee has completed or is in the process of completing.
- **School Code & Name**—Identifier and name of the school that the employee attended or is currently attending.
- **#Yrs**—Number of years the employee attended this school.
- **Grad**—Year the employee graduated from this school.
- **Major**—Employee's primary course of study.
- **Minor**—Employee's secondary course of study.
- **Grade Pt Curr**—Grade point average for the current term completed by the employee.
- **Grade Pt Cum**—Grade point average of all courses completed by the employee at this school.
- **Hrs Comp**—Number of credit hours completed by the employee at this school .
- **Hrs Req**—Number of required credit hours to be completed before the degree defined by this education level is granted.
- **Tuition Refund Yr**—Year in which the course was taken.
- **Tuition Refund Qtr**—Quarter in which the course was taken.
- **Tuition Refund Course No & Title**—Unique value for a course taken in a semester when more than one course is taken.
- **Tuition Refund Grade**—Grade the employee earned for the course.
- **HED Xref**—HED number used to pay the tuition refund.
- **Tuition Pct**—Percent of reimbursed tuition granted the employee for this course.
- **Tuition Amount**—Amount of reimbursed tuition granted the employee for this course.
- **Books Pct**—Percent of reimbursement for book charges.
- **Books Amount**—Amount of reimbursement for book charges.
- **Fees Pct**—Percent of reimbursement for fees and other charges.
- **Fees Amount**—Amount of reimbursement for fees and other charges.

Report sort order

As delivered, the sort order of this report is CONTROL-1, CONTROL-2 and SORT-KEY-SEPARATOR.

Parameter options and setup

There are no parameters specified for this report.

Education Statistics (3Y-RPT)

The Education Statistics report (3Y-RPT) provides a list of totals of active employees for whom formal education data has been recorded, the type of education, and the average and total years of education.

Business Tasks

This report is used to complete the following business tasks:

- Research total years for elementary, high school, college, post graduate, and trade school/business education, by department, division, and corporation.
- Analyze education totals for active employees by employees with formal education, total education years, and average education years, by department, division, and corporation.

Report field details

- **Elem**—Years of elementary education.
- **High**—Years of high school education.
- **College Assoc**—Years applied towards an associate degree.
- **College Bach**—Years applied towards a bachelor degree.
- **College Other**—Years of other higher education recorded.
- **Post Grad Master**—Years attended towards a masters degree.
- **Post Grad Doct**—Years attended towards a doctorate degree.
- **Trade/Bus Tech**—Years attended towards a technical degree.
- **Trade/Bus Appr**—Years attended towards an apprentice degree.
- **Trade/Bus Nurse**—Years attended towards a nursing degree.
- **Active Emps**—Number of active employees in this organization level 4.
- **Emps W/Ed**—Number of active employees with education recorded.
- **Total Yrs**—Number of years of education recorded for the requested organization level 4.
- **Avg Yrs**—Average number of years of education attended by dividing Total Yrs by Emps W/Ed.

Report sort order

As delivered, the sort order of this report is subtotals by CTRL-FOUR and totals by CONTROL 1-2.

Parameter options and setup

There are no parameters specified for this report.

EEO-1 Single Establishment Report in Computerized Format (70SRPT)

The EEO-1 Single Establishment Report in Computerized Format (70SRPT) provides EEO-1 reporting for a single EEO Establishment.

Business Tasks

The report is used to complete the following business tasks:

- Run report for annual filing in computer format. (Pre-approval from EEOC required.)
- Analyze EEO data by single EEO Establishment.

Report field details

- **EEO Job Category**—The first column lists EEO Job Categories as set up set up on TE table.
- **Race/Sex**—The remaining columns total EEO Race categorizations for each gender.

Report Sort Order

As delivered, the sort order of this report is Control 1-2, Job category, Gender, Race.

Parameters options and setup

- **Payroll Begin Date**—Beginning Date of Payroll Period Being Reported.
- **Payroll End Date**—Ending Date of Payroll Period Being Reported.

Note: The above dates DO NOT determine the payroll period used for reporting. Current data is ALWAYS used. If you want to report on a specific payroll period, you must load the appropriate System Control Repository (FILE01) and Employee Database (FILE02) before running the report. These dates are only used to print on the report.

- **Answers Other Question 2 on Line 41**—Does the Company Employee Apprentices?

EEO Vets-100 Report (73-RPT)

The EEO Vets-100 Report (73-RPT) collects and formats data required for Vets-100 reporting to the Department of Labor. The information contained on this report categorizes the number of employees in your organization who are military veterans. One page per location will be generated at the beginning of this report. For example, if you have entered 5 locations, you will have 5 pages with this informational message.

Business Tasks

The report is used to complete the following business tasks:

- Output information for filing of Vets-100 report.
- Analyze data by EEO job category, total Veterans employed, and Veterans who are new hires.

Report field details

Total number of employees and new hires broken down by 9 EEO job categories and special disabled veterans, Vietnam era veterans status and total of both statuses.

Report Sort Order

As delivered, the sort order of this report is Control 1-2, Job category, Veteran status.

Parameters options and setup

- **From Date**—The beginning date of a date range for which you want the report to run.
- **To Date**—The ending date of a date range for which you want the report to run.
- **Create an electronic file?**—Select this option to create an electronic file and a printed report.

IMPORTANT!

If you are creating an electronic file, you *must* run this report in batch mode.

EEO Vets-100 Report in Detail (73DRPT)

The EEO Vets-100 Report in Detail (73DRPT) provides detailed information for the annual Vets-100 Report. The data on this report serves as an audit report for the Vets-100 report (73-RPT) and includes more in depth information than is necessary for filing. This report lists the names of the employees who are considered Vietnam veterans by their job category.

Business Tasks

The report is used to complete the following business tasks:

- Output information for filing of Vets-100 report.
- Analyze data by EEO job category, or Control 1-2.

Report field details

- **Control 1-2**—Company in which the employee is setup.
- **Employee number**—Unique employee identifier, up to 10 characters in length.
- **Employee name**—Employee's legal name.
- **Job Code**—Job Code of the employee's position.
- **Job Extent**—Four-digit identifier used in conjunction with the job code field to further identify the employee's position.
- **Job description**—Description of the employee's position.
- **Employment date**—Date on which the employee began employment.

Report Sort Order

As delivered, the sort order of this report is Control 1-2, Job category, Veteran status.

Parameters options and setup

- **From Date**—Enter the beginning date of the date range for which you want the report to run.
- **To Date**—Enter the ending date of the date range for which you want the report to run.

Emergency Contact Listing (3F-RPT)

The Emergency Contact Listing report (3F-RPT) lists all active employees and their emergency contact information. The report includes: emergency contact name, address and phone; and physician name, address, and phone.

Business Tasks

This report is used to complete the following business tasks:

- Contact an employee's personal physician or emergency contact.
- Access phone numbers to make emergency contact as quick and as easy as possible.
- Maintain addresses of emergency contacts in case written follow-up is necessary.

Report field details

- **Employee Name**—Employee's legal name.
- **Employee Number**—Unique employee identifier, up to 10 characters in length.
- **Emergency Contact Information**—Emergency contact's last and first name, address and telephone number.
- **Personal Physician Information**—Personal physician's last and first name, address, and telephone number.

Report sort order

As delivered, the sort order of this report is CONTROL-1, CONTROL-2, and EMPLOYEE-NAME.

Parameter options and setup

There are no parameters specified for this report.

Emergency Medical Information (5W-RPT)

The Emergency Medical Information report (5W-RPT) displays employee emergency medical information. The information for this report is recorded on the Emergency Medical Information form.

Business Tasks

This report is used to complete the following business tasks:

- Monitor critical health information including the employee's blood type, the date of last blood donation, and up to five allergic conditions.
- Reference vital information in situations where an employee cannot communicate with emergency staff.

Report field details

- **Employee Number**—Unique employee identifier, up to 10 characters in length.
- **Employee Name**—Employee's legal name.
- **Record Date**—Date that the emergency medical information was recorded.
- **Handicap Code/Desc**—Description of an employee's handicap.
- **Blood Type/Desc**—Employee's blood type.
- **Give Code**—Code that identifies the employee's willingness to donate blood.
- **Date Last Gave**—Date of when the employee last donated blood.
- **Allergy-1 through 5 Code/Desc**—Codes and descriptions that identify an employee's allergic condition.

Parameter options and setup

- **As of Date**—Enter a date in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

Employee Job Listing (3N-RPT)

The Employee Job Listing report (3N-RPT) lists all employees, showing their current job and rating information and providing a length of time in the current job in years, months, and days.

Business Tasks

This report is used to complete the following business tasks:

- Review employee job assignments.
- Analyze employee length of time in current job.

Report field details

- **Job Code**—Alphanumeric identifier for the job that is currently assigned to the employee.
- **Job Extn**—Four-digit number that works in conjunction with the job code text box to further identify the job assigned to the employee.
- **Job Title**—Description assigned to this job.
- **Employee Number**—Unique employee identifier, up to 10 characters in length.
- **Employee Name**—Employee's legal name.
- **Time In Job-Yrs, Mos, Day**—Current date minus the job assignment effective date, expressed in a time span of years, months, and days.
- **Perf Rate**—Code that identifies an employee's performance appraisal rating.
- **Salary Grade**—Code for the salary grade assigned to this job.
- **Race Code**—Code used to designate employee's race for purposes of reporting.
- **Sex**—Gender of the employee.
- **Job Class**—Generic job group used for reporting.

Report sort order

As delivered, the sort order of this report is CONTROL-1, CONTROL-2, JOB-CODE, JOB-CODE-EXTENT, and EMPLOYEE-NAME.

Parameter options and setup

There are no parameters specified for this report.

Employee Listing Of Training Courses Scheduled/Attended (31-RPT)

The Employee Listing Of Training Courses Scheduled/Attended report (31-RPT) displays training information for active employees, including the training course, completion status, instructor, and evaluation.

Business Tasks

This report is used to complete the following business tasks:

- Analyze the overall training of your workforce.
- Monitor current and completed training.
- Monitor the cost of training to the organization.
- Review employee-based evaluations of the courses for future reference.

Report field details

- **Employee Name**—Employee's legal name.
- **Number**—Unique employee identifier, up to 10 characters in length.
- **Course Number**—Course that this record identifies.
- **Course Code/Name**—Training Course which the employee has attended or is scheduled to attend.
- **Completion Year**—Date on which the training course was completed and attendees dismissed.
- **Completion Code**—Status of the trainee in the course.
- **Completion Description**—Courses in which the employee is enrolled, but has not yet attended.
- **Type**—Type of training course being recorded, identifying whether the training is internal or external and if taking it has any impact on the employee's job or employment status.
- **Location**—Physical location of where the training course was held.
- **Start Date**—Date the training course is/was scheduled to begin.
- **End Date**—Date the training course is/was scheduled to end.
- **Rating**—Rating for the employee's performance in the training course.
- **Credit**—Number of credits that have been granted for satisfactory completion of the training course.
- **Costs**—Cost of the training course.
- **Company Pd**—Amount of the training cost paid by the company.
- **Ctrl 3 - 6**—Organization level 3 - 6 values to which the costs of the training course are to be charged.
- **Instructor**—Course instructor.
- **Evaluation**—Employee's evaluation of the course.

Report sort order

As delivered, the sort order of this report is CONTROL-1-2, EMPLOYEE-NAME, TRAINING-YEAR, TRAINING-COURSE-CODE, and TRAINING-COURSE-NO.

Parameter options and setup

There are no parameters specified for this report.

Employee Personal Data Profile (1J-RPT)

The Employee Personal Data Profile report (1J-RPT) lists all active employee personal backgrounds, past and present. This report also contains employee emergency, medical, allergy, security, and insurance data. This report lists one employee per page.

Business Tasks

This report is used to complete the following business tasks:

- View employee personal information.
- Quickly obtain employee emergency contact and physician information.

Report field details

- **Name**—Employee's last and first name.
- **SS #**—Unique employee identifier used for taxation in the USA.
- **Emp #**—Unique employee identifier, up to 10 characters in length.
- **Date**—Report date.
- **Address**—Street number and street name portion of the employee's address.
- **Address-2**—Additional address information .
- **City/State**—City and state portion of the employee's address.
- **Zip**—Employee's five-digit zip code.
- **Birth Date**—Employee's date of birth.
- **Race Code**—Employee's race code as used for reporting.
- **Sex**—Employee's gender.
- **Area Code**—Area code portion of the employee's home telephone number.
- **Phone**—Employee's home telephone number.
- **Key**—Three-digit identifier for this emergency contact.
- **Emergency Contact**—Name of this emergency contact.
- **Area Code**—Area code portion of the emergency contact's home telephone number.
- **Phone #**—Emergency contact's home telephone number.
- **Contact Address**—Street number and street name portion of this emergency contact's address.
- **City / State**—City and state portion of this emergency contact's address.
- **Zip Code**—Emergency contact's five-digit zip code.
- **Key**—Three-digit identifier for this physician.
- **Physician Name**—Name of this physician.
- **Area Code**—Area code portion of this physician's home telephone number.
- **Phone Number**—Physician's home telephone number.
- **Physician Address**—Street number and street name portion of this physician.
- **City / State**—City and state portion of this physician's address.
- **Zip Code**—Physician's five-digit zip code.
- **Marital Status**—Employee's current marital status.
- **Total Depts**—Number of employee dependents.
- **Citizenship**—Code of the country where the employee holds citizenship.
- **Military Status**—Employee's military status.
- **Visa Type**—Visa type a non-citizen employee has been granted.
- **Expires**—Expiration date of the employee's current visa.

Report sort order

As delivered, the sort order of this report is CONTROL-1, CONTROL-2, and SORT-KEY-SEPARATOR.

Parameter options and setup

There are no parameters specified for this report.

Employee Profile Report (1K-RPT)

The Employee Profile Report (1K-RPT) prints a multi-page Human Resource Profile for all employees. Report parameters may be selected to produce a report of only those employees who have had any of the following form information changed:

- New Hire (01-SCR)
- Additional Personal And ID Information (02-SCR)
- Phone Numbers And Employment Information (03-SCR)
- Rehire/Reinstatement/Recall (04-SCR)
- Job Assignment/Changes (05-SCR)
- Location Assignment/Changes (05CSCR)
- Status Changes (08-SCR)
- Salary Assignment/Changes (40-SCR)
- Performance Appraisal Results (49-SCR)
- Leaves And Returns (95-SCR)

Business Tasks

This report is used to complete the following business tasks:

- Verify employee record changes.
- Research employee information on hard copy.

Report field details

Refer to each form's help for text box definitions.

Parameter options and setup

- **Employees To Include**—Type 'ALL' to print a profile for all employees.
- **Option**—Leave this entry blank to print only employees who have had changes to HR forms.
- **Type Of Employees Option**—Type 'A' to print the profile for active employees only. Leave this entry blank to print all employees.

Employees Active, Inactive, Separated Within Three Months (1B-RPT)

The Employees Active, Inactive, Separated Within Three Months report (1B-RPT) provides an alphabetic listing of all active, inactive, or separated employees.

Modifications are documented within the report program to specify that separated employees are included only if their separation status was achieved during the last one, six, nine, or 12 months.

Business Tasks

This report is used to complete the following business tasks:

- Analyze the overall status of your workforce.

Report field details

- **Employee Name**—Employee's legal name.
- **Employee Number**—Unique employee identifier, up to 10 characters in length.
- **Ctrl Three**—Organization level 3 value assigned this employee.
- **Ctrl Four**—Organization level 4 value assigned this employee.
- **Ctrl Five**—Organization level 5 value assigned this employee.
- **Ctrl Six**—Organization level 6 value assigned this employee.
- **Mail Distribution**—Employee's internal mail station or distribution data.
- **Hire Date**—Employee's original date of hire.
- **Employee Status**—Employee's status as a result of an activity.
- **Separation Date**—Date of the most recent separation occurrence found in the employee's record.

Report sort order

As delivered, the sort order of this report is CONTROL-1, CONTROL-2, and EMPLOYEE-NAME.

Parameter options and setup

- **As of Date**—Enter a date in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).

Future Dated Salary Adjustments On File (3T-RPT)

The Future Dated Salary Adjustments On File report (3T-RPT) lists employees with a future-dated salary adjustment on file that will become actual on the effective date.

Business Tasks

This report is used to complete the following business tasks:

- Monitor employee salary changes.
- Review future-dated salary adjustments.

Report field details

- **Employee Name**—Employee's legal name.
- **Employee Number**—Unique employee identifier, up to 10 characters in length.
- **Effective Date**—Effective date of the employee's salary change.
- **Change Type**—Value identifying the reason for the employee's salary change.
- **Hourly Rate**—Employee's hourly rate of pay.
- **Period Hours**—Number of normal hours in the employee's pay period.
- **Pay Freq**—Value identifying the interval at which the employee is paid.
- **Salary Per Period**—Employee's salary per pay period.
- **Annual Salary**—Employee's annual salary amount.
- **Annual Amt Change**—Amount of annual salary change from the prior salary to the most recent salary.
- **Percent Change**—Percent change between the prior salary and the current one.
- **Months Since**—Number of months between the prior salary effective date and the current one.
- **Compa Ratio**—Ratio of the employee's salary compared with the midpoint of the salary range.

Report sort order

As delivered, the sort order of this report is CONTROL-1, CONTROL-2, CTRL-THREE, CTRL-FOUR, CTRL-FIVE, CTRL-SIX, and EMPLOYEE-NAME.

Parameter options and setup

- **As Of Date**—Enter a date in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere). If this text box is left blank, the entry defaults to the current date.

Injury/Illness Report (3R-RPT)

The Injury/Illness Report (3R-RPT) lists information regarding employee injuries and illnesses.

Business Tasks

This report is used to complete the following business task:

- Monitor the status of employee injuries and illnesses as it affects the status of such areas as disability, workers compensation, OSHA (U.S.), and litigation.

Report field details

- **SIN/SS Number**—Social Insurance Number (Canada) or Social Security Number (US) of the employee.
- **Employee Name**—Employee's legal name.
- **Date**—Date of the injury or illness.
- **Code**—Code that describes the type of illness or injury.
- **Job Description**—Title assigned to the job that the employee holds.
- **Dept**—Department to which the employee was regularly assigned even though the employee may be temporarily assigned to another department at the time of illness.
- **Claim No.**—Claim-number associated with the injury.
- **Disability**—Indicator of whether or not a disability claim was filed.
- **Wk Co**—Indicator of whether or not Worker's Compensation has been received for the injury.
- **OSHA**—Indicator of whether or not the injury or illness is reportable to OSHA (US-specific).
- **Litigation**—Indicator that designates whether or not litigation is pending as a result of the injury or illness.

Parameter options and setup

- **Range Of Years**—Enter a date range in YYyy format. For example, an entry of 9597 would print injury and illness information for the years 1995, 1996, and 1997.

See also:

- Health and safety reports and their uses ***(on page 296)***

Internal Mailing Labels (1E-RPT)

The Internal Mailing Labels report (1E-RPT) provides an internal mailing list of all employees. This report lists the employee name, employee number, and mail distribution data.

This report is formatted to print on labels, but to do so you must run this in a separate batch run from all other reports.

Business Tasks

This report is used to complete the following business task:

- Produce internal mailing labels.

Report field details

- **Employee Name**—Employee's legal name.
- **Employee Number**—Unique employee identifier, up to 10 characters in length.
- **Mail Distribution Data**—Employee's internal Mail station or distribution data.

Report sort order

As delivered, the sort order of this report is CONTROL-1, CONTROL-2, MAIL-DISTRIBUTE-DATA and EMPLOYEE-NAME.

Parameter options and setup

There are no parameters specified for this report.

See also:

- Reports used for hiring, rehiring, reinstating, recalling, and transferring employees ***(on page 104)***

Interview Evaluation (04-RPT)

The Interview Evaluation (04-RPT) creates an interview evaluation for interviewer for applicants not yet evaluated or for a specific applicant within the Applicant Tracking component.

Note: *Every field except the Rating field on the Interview Recap form (007SCR) must be complete for this report to run.*

Business Tasks

The report is used to complete the following business tasks:

- Create an evaluation form for applicants to be used by interviewers.
- Customize categories to meet specific job skills.
- Use form for consistent interviewing processes.

Report field details

- **Applicant Name**—Applicant's first and last name.
- **Date**—Date evaluation form is run.
- **Job/Position**—Position applicant is being evaluated for.
- **Department**—Department in which position falls.
- **EEO Location**—EEO Location in which position falls.
- **Interviewer**—Interview name.
- **Type**—Type of interview being conducted.
- **Category**—Categories which candidate is being evaluated. These can be customized by job.
- **Overall Evaluation**—Overall ratings for candidate.
- **Recommended Action**—Recommendation to hire/not hire applicant.
- **Explain Action**—Comments for recommendation.
- **Signature**—Signature of interviewer.
- **Title**—Title of interviewer.
- **Date**—Date of interview.

Report Sort Order

As delivered, the sort of this report is Control 1-2, SORT-KEY-SEPARATOR.

Parameters options and setup

- **Applicant Number**—Enter the Applicant Number.

IPEDS Fall Staff Survey (76-RPT)

Produces required data for the IPEDS Fall Staff Survey (76-RPT) filed every other year.

Business Tasks

The report is used to complete the following business tasks:

- Run report for filing w/ EEOC (computerized format acceptable with prior approval from EEOC).
- Analyze data provided by occupation group code, wages, and sex.

Report field details

Sections included on this report include:

IIA. Full-time faculty

IIB. All other full time employees

IIC. Additional information

Full Time Faculty by Rank and Tenure

Other employment data

Report Sort Order

As delivered, the sort order of this report is CONTROL 1-2, W6-01-110, W6-01-111, W6-01-112, W6-01-113, W6-01-114.

Parameters options and setup

- **Survey Year**—Survey year for which to run the report. If a Survey Year is specified, the report uses the specified year with October 1st as the first day and September 30th as the last day.
  If a year is not specified, the report checks to see if the current month is before October. If it is before October, the report uses the prior year.
  If the current month is after October, the report uses the current year.

LOA/Disability Report (1T-RPT)

The LOA/Disability Report (1T-RPT) lists all active employees who are currently on a leave of absence or disability leave.

Business Tasks

This report is used to complete the following business task:

- Monitor whether an employee has not returned to work by an expected return date.

Report field details

- **Ctrl Three**—Organization level 3 value assigned this employee.
- **Ctrl Four**—Organization level 4 value assigned this employee.
- **Ctrl Five**—Organization level 5 value assigned this employee.
- **Ctrl Six**—Organization level 6 value assigned this employee.
- **Employee Name**—Employee's legal name.
- **Actv Code**—Code that identifies which major activity is occurring.
- **Activity Description**—Description of the major activity taking place.
- **Date Of Leave**—Date an employee's major activity is effective.
- **Time Of Leave**—Time span expressed as years, months, and days; calculated by subtracting the activity date from the report parameter date.
- **Expected Return**—Date the employee is expected to return.
- **Past Return Indicator**—Indicator that identifies any employee whose expected return is past the current date, with an asterisk (*).

Report sort order

As delivered, the sort order of this report is CONTROL-1, CONTROL-2, CTRL-THREE, CTRL-FOUR, CTRL-FIVE, CTRL-SIX, ACTIVITY-CODE, and EMPLOYEE-NAME.

Parameter options and setup

- **As Of Date**—Enter a date in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere). If this field is left blank, the entry defaults to the current date.

Monthly Payroll/Personnel Summary (3B-RPT)

The Monthly Payroll/Personnel Summary report (3B-RPT) provides an analysis of payroll and personnel activity within the organization. Monthly statistics are provided for each pay frequency. This report lists statistics only for the month entered in the report parameters.

Business Tasks

This report is used to complete the following business tasks:

- Analyze the overall turnover of the workforce.
- Track the monetary impact of turnover on payroll activity.

Report field details

- **Pay Class**—Payroll frequency at which employees are paid.
- **Hired**—Number of employees hired in this pay class.
- **Terminated**—Number of employees terminated for this pay class.
- **Other Adds**—Number of employees added to this pay class.
- **Other Separations**—Number of employees separated from this pay class.
- **Pct Change**—Net change divided by the total number of active employees.
- **Net Change**—Number of hired - number of separations + number of other additions - number of other separations.
- **Active Employees**—Number of employees having a resulting employee status that indicates the employee is active.
- **$ Added Payroll**—Total amount of annual salary to be added to the annual payroll due to new hires or other adds.
- **$ Deleted Payroll**—Total amount of annual salary that will reduce the annual payroll due to terminations and other separations.
- **Net Change To Payroll**—Deleted payroll minus added payroll amounts.
- **Annual Payroll**—Annual payroll amount showing the result of 'added payroll' additions and 'deleted payroll' reductions.

Report sort order

As delivered, the sort order of this report is CONTROL-1, CONTROL-2, and PAY-FREQUENCY.

Parameter options and setup

- **As Of Date**—Enter a date in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere). If this field is left blank, the entry defaults to the current date.

Newly Added Applicants By Position Number (0N-RPT)

The Newly Added Applicants By Position Number report (0N-RPT) lists newly added applicants by the positions for which they have applied or for which they are being considered.

Business Tasks

This report is used to complete the following business task:

- Analyze newly added applicants within a specified range of dates.

Report field details

- **Applicant Name**—Applicant's legal name.
- **Number**—Applicant's identifying number.
- **Position Code**—Code that identifies the position for which the applicant is being considered.
- **Position Title**—Description of the position for which the applicant is being considered.
- **Applicant Status Code**—Status of the applicant's request for employment.
- **Applicant Status Description**—Description of the applicant's status.
- **Position Standing Date**—First date on which the applicant was considered for a position.
- **Position Standing Code**—Code that identifies the status of an applicant's progress through the interview process for this job and/or position.
- **Position Standing Description**—Description of the applicant's position standing.
- **Dept**—Department in which the job and/or position opening exists.

Report sort order

As delivered, the sort order of this report is CONTROL-1-2, POSITION-CONSIDERED, APPLICANT-NAME-10, and JOB-SEQ-NBR.

Parameter options and setup

- **Earliest Date**—Enter a date in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere). To list all applicants after this date, enter only this date and not the date in the next step.
- **Latest Date**—Enter a date in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere). To list all applicants before this date, enter only this date and not the date in the previous step.

No Salary Adjustment On File For Last 12 Month Period (1Z-RPT)

The No Salary Adjustment On File For Last 12 Month Period report (1Z-RPT) lists employees have not had a salary adjustment in more than 12 months. This report includes only those employees in 'Pay-Normal Master' companies, as indicated in the Company Category list box on the Company Options form.

This report can be modified to include employees who are on leave of absence. Also, the time span may be modified to 18 months. Instructions for these modifications are documented within the report program.

Business Tasks

This report is used to complete the following business tasks:

- Track employees who have not had a salary adjustment in more than 12 months.

Report field details

- **Employee Name**—Employee's legal name.
- **Employee Number**—Unique employee identifier, up to 10 characters in length.
- **Status**—Code that indicates the employee's status resulting from the most recent major activity.
- **Current Salary**—Employee's current annual salary.
- **Effective Date**—Effective date of the employee's salary change.
- **Change Type**—Description of salary change type.
- **Compa Ratio**—Ratio of the employee's salary compared to the midpoint of the salary range.
- **Scheduled Date**—Date the next salary review is to be performed.
- **Salary Review**—Description of the next-review type.
- **Review Type If Present**—Type of salary review to be performed.

Report sort order

As delivered, the sort order of this report is CONTROL-1, CONTROL-2, CTRL-THREE, CTRL-FOUR, CTRL-FIVE, CTRL-SIX, and EMPLOYEE-NAME.

Parameter options and setup

There are no parameters specified for this report.

Non-Monetary Perquisite Information (13-RPT)

The Non-Monetary Perquisite Information report (13-RPT) displays information on non-monetary perquisites that have been assigned to employees.

Business Tasks

This report is used to complete the following business tasks:

- Track non-monetary perquisites that should be collected or canceled before a terminated employees leaves.
- Verify perquisite recovery dates.
- Monitor employee perquisites that are assigned to employees, or are due to expire.
- Review non-monetary perquisites, their dollar value, and expiration dates, if applicable.

Report field details

- **Employee Name**—Employee's legal name.
- **Employee Number**—Unique employee identifier, up to 10 characters in length.
- **Perq Date**—Date on which the monetary perquisite was awarded to the employee.
- **Perquisite Type**—Perquisite type granted the employee.
- **Perquisite Desc**—Description of the perquisite granted the employee.
- **Member Number**—Membership or account number associated with this perquisite.
- **Dollar Value**—Monetary value of this perquisite, rounded to the nearest whole amount.
- **Return Date**—Date on which the perquisite was returned by the employee or cancelled.
- **Date of Expiration**—Date on which the perquisite is due to expire and must be renewed.

Report sort order

As delivered, the sort order of this report is CONTROL-1, CONTROL-2, EMPLOYEE NAME, EMPLOYEE NUMBER, PERQUISITE TYPE, and PERQUISITE DATE.

Parameter options and setup

- **As Of Date**—Enter a date in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere) to print a list as of this expiration date.

To print a report listing all employee perquisites assigned to employees, do not enter an expiration date in this text box.

OSHA Form 200 Lost Time Detail (3S-RPT)

The OSHA Form 200 Lost Time Detail report (3S-RPT) provides the audit of the injury and illness total provided on the OSHA Form 200 Lost Time Totals report (3Q-RPT).

Business Tasks

The report is used to complete the following business tasks:

- Analyze injuries by department, time lost/restricted, and whether claim is open.
- Analyze data to determine if repeated injuries are occurring in certain locations.
- Analyze data to determine if illness/injury patterns are developing for certain employees.

Report field details

- **Home Department**—Number of department which employee resides at time of illness/injury.
- **Social Security**—Social Security number of employee who reported injury/illness.
- **Employee Name**—First and last name of employee.
- **Injury/Ill Date**—Date injury/illness occurred.
- **Injury Days**—Days work time lost due to injury.
- **Illness Days**—Days work time lost due to illness.
- **Description**—Description of injury/illness.
- **Open Code**—whether or not claim is still open.

Report Sort Order

As delivered, the sort order of this report is CONTROL 1-2, HOME-DEPARTMENT, SOCIAL-SECURITY-NBR, SORT-KEY-SEPARATOR

Parameters options and setup

- **Year Starting**—Enter the first year of the range of years you wish to report on in CCYY format.
- **Year Ending**—Enter the last year of the range of years you wish to report on in CCYY format.

OSHA Form 200 Lost Time Totals (3Q-RPT)

The OSHA Form 200 Lost Time Totals report (3Q-RPT) provides injury/illness totals necessary for OSHA reporting.

Business Tasks

The report is used to complete the following business tasks:

- Use report to provide data required for completing the OSHA form 200.
- Get a snapshot of time lost due to injuries/illness.
- Analyze report for patterns of injuries/illness in certain departments or injury due to certain illnesses.

Report field details

- **Home Department**—Department which employee resides when injury/illness occurs.
- **Total Description**—Lists total injuries/illness, lost/restricted time, lost time, restricted time and description of illness/injury.
- **Count**—Total of categories listed above.
- **No. of Days**—Number of days time is lost due to illness/injury.

Report Sort Order

As delivered, the sort order of this report is CONTROL 1-2, HOME-DEPARTMRNT.

Parameters options and setup

- **Year Starting**—Enter the first year of the range of years you wish to report on in CCYY format.
- **Year Ending**—Enter the last year of the range of years you wish to report on in CCYY format.

OSHA Form 300 Log of Work-Related Injuries and Illnesses (20-RPT)

The OSHA Form 300 Log of Work-Related Injuries and Illnesses (20-RPT) displays the information that satisfies the record keeping requirements for employers subject to the Occupational Safety and Health Act of 1970. It allows you to maintain for each OSHA Establishment a log of all recordable occupational injuries and illnesses, the OSHA Form 300.

Employees will be selected for this report only if they have an Injury Information form (PR-SCR) where the Most Serious Result is not blank, the OSHA Code is 'Reportable', and their injury date falls within the year parameters specified on the parameter options.

This report may be run in either Confidential or non-Confidential mode.

Business Tasks

This report is used to complete the following business task:

- Submit the data reportable on the OSHA Form 300.

Report field details

- **Claim Number**—OSHA case number as recorded on the Injury Information form (PR-SCR).
- **Occur. Date**—Initial date of the injury or initial illness diagnosis.
- **Employee Name**—First 30 positions of an employee's legal name.
- **Date of Death**—Date on which employee died.
- **Death**—Count of employees whose injury or illness resulted in death.
- **Days Away**—Count of employees who experienced days away from work as a result of injury/illness.
- **Job Xfer**—Days transferred or restricted due to serious result.
- **Other Rec**.—Other recordable cases due to serious result.
- **Nbr Of Days Xfer**—Number of days transferred and/or restricted due to serious result.
- **Nbr Of Days Lost**—Number of days lost due to serious result.
- **Injury/Illness Type**—Type of illness: Inj (injury), SD (skin disease), RC (respiratory condition), P (poisoning), and Other.
- **Job Title**—Employee job title at the time of the event.
- **Loc.**—Injury location.
- **Desc.**—Injury description.

Report sort order

As delivered, the sort order of this report is OSHA-ESTABLISHMENT, INJURY-DATE, CLAIM-NUMBER, and EMPLOYEE-NUMBER.

Parameter options and setup

- Year Ending—Enter in CCYY format to include the injuries and illnesses for the year specified in this text box.
- Show Privacy Detail—If this entry is unchecked, the employee name, job title, and injury location will display **PRIVACY CASE** on the report if 'Privacy Case' was checked on the Injury Information form (PR-SCR). To produce a non-confidential run of this report, the entry must contain a check mark prior to running the report.
- Print All OSHA Ests.—If checked, all OSHA Establishments will be included in the report.
- OSHA Establishments—Select up to five OSHA locations if there is no check mark in the previous parameter.

OSHA Form 300A Summary of Work-Related Injuries and Illnesses (21-RPT)

The OSHA Form 300A Summary of Work-Related Injuries and Illnesses Report (21-RPT) displays the information that satisfies the record keeping requirements for employers subject to the Occupational Safety and Health Act of 1970. It allows you to generate for each OSHA Establishment a summary of all recordable occupational injuries and illnesses, to be used to complete the OSHA Form 300A.

A company executive must manually complete the signature and certification entries at the bottom of the report.

Business Tasks

This report is used to complete the following business task:

- Provide the data reportable on the OSHA Form 300A

Report field details

- **Description**—Category titles for total counts. Titles are described fully in the field details for the OSHA Form 300 Log of Work-Related Injuries and Illnesses (20-RPT).
- **Total Count**—Total number of cases or illness types included in the category.
- **No. of Days**—Total number of days included in the category.

Report sort order

As delivered, the sort order of this report is OSHA-ESTABLISHMENT, INJURY-DATE, CLAIM-NUMBER, and EMPLOYEE-NUMBER.

Parameter options and setup

- **Year Ending**—Enter in CCYY format to include the injuries and illnesses for the year specified in this text box.
- **Print All OSHA Ests**—If checked, all OSHA Establishments will be included in the report.
- **OSHA Establishments**—Select up to five OSHA locations if there is no check mark in the previous parameter.

OSHA Form 301 Injury and Illness Incident Report (22-RPT)

The OSHA Form 301 Injury and Illness Incident Report (22-RPT) displays a separate page for each OSHA-reportable injury/illness, which satisfies the record keeping requirements for employers subject to the Occupational Safety and Health Act of 1970. This report is to be used as supporting documentation for the OSHA Form 300 Log of Work-Related Injuries and Illnesses (20-RPT).

This report may be run in either Confidential or non-Confidential mode.

Business Tasks

This report is used to complete the following business tasks:

- Provide detail support for OSHA Form 300 report

Report sort order

As delivered, the sort order of this report is REPORT-OSHA-EST, INJURY-DATE, and CLAIM-NUMBER.

Report field details

- **Employee Name**—First 30 positions of an employee’s legal name.
- **Birth Date**—Employee’s date of birth.
- **Date of Hire**—Employee’s most recent hire date.
- **Gender**—Employee’s gender.
- **Physician Name**—Physician’s last and first name,
- **Where Conducted**—Location of the physical examination.
- **Treated in Emergency Room?**—Reflects whether the employee was treated in an emergency room for an OSHA-reportable event.
- **Hospitalized Overnight?**—Reflects whether the employee stayed in the hospital as an inpatient for an OSHA-reportable event.
- **Case Number**—OSHA claim number.
- **Date of Injury/Illness**—Injury or illness diagnosis date.
- **Time Employee Began Work**—Time the employee began work on the day of the event.
- **Time of Event**—Time of the injury or illness.
- **What was the employee…..**—Description of the activity being performed at the time of the injury/illness.
- **What Happened?**—Supplemental information about the injury/illness event.
- **What was the Injury or Illness?**—Description of the injury/illness.
- **What Object or Substance….**—Description of what harmed the employee.

Parameter options and setup

- **Beginning Date**—Enter a beginning date for the range to be included in this report in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).
- **Ending Date**—Enter an ending date for the range to be included in this report in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere).
- **Show Privacy Detail**—If this entry is unchecked, the employee identifiable information will display **PRIVACY CASE** on the report if 'Privacy Case' was checked on the Injury Information form (PR-SCR). To produce a non-confidential run of this report, the entry must contain a check mark prior to running the report.
- **Print All OSHA Ests**.—If checked, all OSHA Establishments will be included in the report.
- **Employee Number**—To produce a report for a single employee, type an employee number in this text box. If this entry is filled, you must also click the ‘Print All OSHA Est’ check box. If this entry is left blank, all reportable employees will display.
- **OSHA Establishments**—Select up to three OSHA locations if there is no check mark in the previous parameter.

Outstanding Relocation Advances (34-RPT)

The Outstanding Relocation Advances report (34-RPT) provides an alphabetical listing of employees who have outstanding relocation advances.

Business Tasks

This report is used to complete the following business tasks:

- Analyze employee relocation information including the year of relocation, the move number within that year, and the effective date of the move.
- Monitor remaining balances of relocation advances within specific organization level 1 - 6 values and accounts charged for relocation.

Report field details

- **Employee Name**—Employee's legal name.
- **Employee Number**—Unique employee identifier, up to 10 characters in length.
- **Move Year**—Calendar year in which the employee's relocation activities occurred or were initiated.
- **Move No.**—Number of the move for the employee in the calendar year.
- **Effective Date**—Effective date of the relocation; the day on which the employee is to report to work in the new location.
- **Relocation Advance**—Amount of money advanced to the employee for moving expenses. This money is treated as any other travel advance and must be offset by expense reports or returned to the company if unused.
- **Relocation Cost Center 1-2**—Organization designation where the employee's relocation expenses are to be charged.
- **Relocation Cost Center 3**—Organization level 3 value where the employee's relocation expenses are to be charged.
- **Relocation Cost Center 4**—Organization level 4 value where the employee's relocation expenses are to be charged.
- **Relocation Cost Center 5**—Organization level 5 value where the employee's relocation expenses are to be charged.
- **Relocation Cost Center 6**—Organization level 6 value where the employee's relocation expenses are to be charged.

Report sort order

As delivered, the sort order of this report is CONTROL-1-2, EMPLOYEE-NAME, RELOC-MOVE-YEAR, and RELOC-MOVE-NO.

Parameter options and setup

There are no parameters specified for this report.

Performance Appraisal Forms Not Returned By Expected Date (1Q-RPT)

The Performance Appraisal Forms Not Returned By Expected Date report (1Q-RPT) lists performance appraisal forms not returned by the expected date.

Business Tasks

This report is used to complete the following business tasks:

- Track employees who have passed their scheduled performance appraisal date and for whom no rating results have been recorded.
- Record the date the form was actually returned.

Report field details

- **Ctrl Three**—Organization level 3 value assigned to this employee.
- **Ctrl Four**—Organization level 4 value assigned to this employee.
- **Ctrl Five**—Organization level 5 value assigned to this employee.
- **Ctrl Six**—Organization level 6 value assigned to this employee.
- **Employee Name**—Employee's legal name.
- **Employee Number**—Unique employee identifier, up to 10 characters in length.
- **Appraisal Scheduled Date**—Date the next performance appraisal is to be performed.
- **Appraisal Scheduled Type**—Value and description of the type of review to be performed.
- **Expected Return Date**—Date the performance appraisal form is due in the originating department.
- **Actual Return Date**—Date the salary review form was actually returned to the originating department.

Report sort order

As delivered, the sort order of this report is CONTROL-1, CONTROL-2, CTRL-THREE, CTRL-FOUR, CTRL-FIVE, CTRL-SIX.

Parameter options and setup

- **As Of Date**—Enter a date in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere). This date is used as the 'past due' date. If this text box is left blank, the entry defaults to the current date.

Reference Request Letter (0X-RPT)

The Reference Request Letter report (0X-RPT) provides a personalized reference request letter for each of an applicant's job references. The letter contains the applicant's name, social security number, information pertaining to previous employment, requests for verification of the employment dates and position held while employed, and the reason for termination.

This letter is printed for every Applicant Work History form with a Job Reference Xref text box entry equal to the Reference ID text box entry on the Applicant Job References form. This letter is only printed if the How To Contact list box entry is 'Yes Phone Or Write' or 'Yes But Write Only' and the Reference Status list box entry is 'Not Yet Contacted'. These list boxes are found on the Applicant Job References form.

Business Tasks

This report is used to complete the following business task:

- Create customized applicant reference letters.

Report field details

- **Current-Date**—Current date.
- **Reference-Name**—Name of the job/personal reference supplied by the applicant.
- **Prior-Company-Name**—Name of the applicant's prior employer.
- **Reference-Address**—Street address of the applicant's prior employer.
- **Reference-City/State**—City and state of the applicant's prior employer.
- **Reference-Zip**—Zip Code of the applicant's prior employer.
- **RE: Applicant-Name**—Applicant's legal name.
- **Social-Security**—Social security (or insurance) number of the applicant.
- **Job-From-Date**—Date on which an applicant began working at the prior employer.
- **Job-To-Date**—Last day an applicant was employed by the prior employer.
- **Job Category**—Description of the job held by the applicant at the prior employer.
- **Date of Employment**—Employment verification date supplied by the reference, indicating when the applicant began work at the former employer.
- **Date of Termination**—Employment termination date supplied by the reference, indicating when the applicant was terminated by the former employer.
- **Position Held**—Position held information supplied by the reference, indicating what position the applicant held at the former place of employment.
- **Reason For Termination**—Reason for being terminated at prior employer.
- **Please Check**—Assessment of the applicant's overall quality of work while in the reference employer's employ.
- **Any Injury On The Job?**—Injury information supplied by the reference to verify whether or not the applicant had any on-the-job injuries, and if so, how much job time was lost.
- **Would you re-employ?**—Re-employment information to be filled in by the reference to assess whether or not the reference would rehire the applicant.
- **Do you recommend the applicant?**—Recommendation information to be filled in by the reference.

Report sort order

As delivered, the sort order of this report is CONTROL-1-2 and SORT-KEY-SEPARATOR.

Parameter options and setup

There are no parameters specified for this report.

Relocation Total Costs - Form 4782 (3G-RPT)

The Relocation Total Costs - Form 4782 (3G-RPT) produces a distribution-ready Form 4782 that reflects the relocation expenses reimbursed or paid on behalf of an employee or applicant by expense, reimbursement, and payment type. The data elements on this report are recorded on the Relocation Total Costs form (35-SCR) for an employee or applicant.

The non-taxable and taxable amounts for house-hunting, temporary living, and closing costs are reported as two separate items on their respective Form 4782 lines. The total relocation expense on the form is calculated by the system, based on the individual amount entries. Schedule this report to run after all of the expenses for the employee for the tax year have been recorded.

Business Tasks

This report is used to complete the following business task:

- Report total relocation expenses.

Report field details

- **Expense type 1, column B**—Relocation shipping - nontaxable.
- **Expense type 2, column A**—Relocation travel to new residence, nontaxable.
- **Expense type 3, column A**—Relocation travel to new residence, meals.
- **Expense type 4, column A, Line 1**—Relocation house hunting expenses, nontaxable.
- **Expense type 4, column A, Line 2**—Relocation house hunting expenses, taxable.
- **Expense type 4, column B, Line 2**—Relocation house hunting expenses, gross-up taxes.
- **Expense type 5, column A, Line 1**—Relocation temporary living expenses, nontaxable.
- **Expense type 5, column A, Line 2**—Relocation temporary living expenses, taxable.
- **Expense type 5, column B, Line 2**—Relocation temporary living expenses, gross-up taxes.
- **Expense type 6, column A, Line 1**—Relocation house hunting and temporary living expenses, meals.
- **Expense type 7, column A, Line 1**—Relocation qualified expenses for closing costs, nontaxable.
- **Expense type 7, column A, Line 2**—Relocation qualified expenses for closing costs, taxable.
- **Expense type 7, column B, Line 2**—Relocation qualified expenses for closing costs, gross-up taxes.

Parameter options and setup

- **Payment Year**—Enter a year in YY format. If YY is left blank, it defaults to the current year; otherwise, you may enter the tax year for which the report is to be run.

Remaining Time Off - Current Year (6A-RPT)

The Remaining Time Off - Current Year report (6A-RPT) is a Time and Attendance report that provides a listing of active employees and the number of hours of authorized time off they have remaining in the calendar year.

Business Tasks

This report is used to complete the following business task:

- Monitor time off recorded for each employee.

Report field details

- **Employee Name**—Employee's legal name.
- **Number**—Unique employee identifier, up to 10 characters in length.
- **Year-End**—Year-end date of the period for which the authorized time off category amounts are recorded.
- **As-Of-Date**—As-of-date for this information.
- **Vacation**—Amount of vacation time that has been awarded to the employee or the amount of vacation time remaining if this is not the first time off for the year.
- **Sick-Leave**—Amount of sick leave time for which the employee will received payment.
- **Holiday**—Amount of holiday time for which the employee will receive payment.
- **Personal**—Amount of personal time that the employee has been awarded.
- **Comp-Time**—Amount of comp time for which the employee is to compensated.
- **Excused-Absence**—Amount of excused absence time off which has been awarded to the employee.
- **Jury-Duty**—Amount of time that is expected to be used for jury duty.
- **Funeral Family**—Amount of funeral time off for which the employee will receive pay to attend the funeral of an immediate family member.
- **Funeral Other**—Amount of funeral time for which the employee will receive pay to attend funerals for persons other than the employee's immediate family.

Report sort order

As delivered, the sort order of this report is CONTROL-1-2, EMPLOYEE-NAME, and EMPLOYEE-NUMBER.

Parameter options and setup

- **Last Date**—Enter a date in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere). This is the last date for which you want time off information printed.

Salary Analysis By Grade (14-RPT)

The Salary Analysis By Grade report (14-RPT) provides a statistical analysis of salary variance by job code within a salary grade for all active employees.

Business Tasks

This report is used to complete the following business task:

- Convert annual salaries to the frequency salary grade assigned to a job.

Report field details

- **Salary-Grade**—Salary grade code assigned to this job code/job code extent.
- **Geographic Index**—Area of the country in which the employees are located for purposes of salary grade.
- **Job-Code**—Alphanumeric identifier of the job.
- **Job Code Extent**—Four-digit number that works in conjunction with the job code text box to further identify the job.
- **Job Title**—Title assigned to the job code/job code-extent for the job.
- **Grade Midpoint**—Midpoint on the salary range for this job.
- **Converted Salary**—Total annual salary expressed in the same terms as the salary grade table being used, for example, annual, per period, or hourly.
- **Compa Ratio**—Ratio of the employees' salary compared to the midpoint of the salary range.
- **Actual Salary**—Actual salary for the employees included in this total.
- **Total Employees**—Total employees included in this job code, job code extent, or salary grade.
- **Average Actual**—Actual salary total divided by the number of employees in this job code, job code extent, or salary grade.

Report sort order

As delivered, the sort order of this report is CONTROL-1, CONTROL-2, SALARY-GRADE, JOB-CODE, and JOB-CODE-EXTENT.

Parameter options and setup

There are no parameters specified for this report.

Salary Distribution By Performance/Time-In Job (1Y-RPT)

The Salary Distribution By Performance/Time-In Job report (1Y-RPT) provides an analysis (with supporting employee detail) of salary treatment by time in job within a performance appraisal.

Business Tasks

This report is used to complete the following tasks:

- Analyze compensation distribution by time-in-job.
- Evaluate the frequency of performance appraisals based on time-in-job for individuals or departments.

Report field details

- **Ctrl Three**—Organization level 3 value assigned to this employee.
- **Ctrl Four**—Organization level 4 value assigned to this employee.
- **Ctrl Five**—Organization level 5 value assigned to this employee.
- **Ctrl Six**—Organization level 6 value assigned to this employee.
- **Employee Name**—Employee's legal name.
- **Employee Number**—Unique employee identifier, up to 10 characters in length.
- **Job Title**—Description of the job assigned to an employee.
- **Salary Grade**—Value associated with each salary grade and its range.
- **Compa Ratio**—Ratio of the employee's salary compared with the midpoint of the salary range.
- **Annual Salary**—Employee's current annual salary amount.
- **Time-In Job**—Job effective date subtracted from the current date. The result is in YYMMDD format.
- **Pct Chg**—Percent change between the prior salary and the current one.
- **Salary Effective**—Effective date of the last salary change.

Report sort order

As delivered, the sort order of this report is CONTROL-1, CONTROL-2, CTRL-THREE, CTRL-FOUR, CTRL-FIVE, CTRL-SIX, RATING-VALUE, and SALARY-GRADE.

Parameter options and setup

- **As Of Date**—Enter a date in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere). If this text box is left blank, the entry defaults to the current date.

Salary Increase Analysis (1V-RPT)

The Salary Increase Analysis report (1V-RPT) provides an analysis of the number and distribution of job appraisal ratings and the average percentage of salary change as classified by job appraisal rating.

Business Tasks

This report is used to complete the following business tasks:

- Analyze the overall percentage of salary change for employees by job type and associated appraisal ratings.
- Review rating trends related to compensation incentive programs.

Report field details

- **Ctrl Three**—Organization level 3 value assigned to this employee.
- **Ctrl Four**—Organization level 4 value assigned to this employee.
- **Ctrl Five**—Organization level 5 value assigned to this employee.
- **Ctrl Six**—Organization level 6 value assigned to this employee.
- **Job Type**—Generic category that further identifies a job.
- **Job Type Description**—Description of the job type associated with an employee's job.
- **Rating 1-8**—Count and percentage of salary changes per performance rating. An employee may be counted more than once depending on the number of increases that fall within the date entered on the parameter form.

Report sort order

As delivered, the sort order of this report is CONTROL-1, CONTROL-2, CTRL-THREE, CTRL-FOUR, CTRL-FIVE, CTRL-SIX, JOB-TYPE, and SALARY-CHANGE-TYPE.

Parameter options and setup

- **As Of Date**—Enter a date in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere). If this text box is left blank, the entry defaults to the current date.

Salary Review Authorization Form I (3O-RPT)

The Salary Review Authorization Form I (3O-RPT) provides detailed and basic salary data on the employee as well as space to manually enter or automatically print proposed and actual increase amounts, effective dates, and so forth, for any employee who is scheduled on the Scheduled Salary Review Data form
(43-SCR) to receive a merit increase within the month requested. This report prints one 8.5" x 11" form per employee.

The employee's current salary reflects, or is converted to, the frequency of the applicable salary grade table. For example, if the record is a Salary Grade - Annual form (TBASCR), the employee's annual salary prints. If the record is a Salary Grade - Per Period form (TBBSCR) with a frequency identifying it as a monthly amount, the employee's salaary is converted to, and prints as, a monthly amount.

Business Tasks

This report is used to complete the following business tasks:

- Initiate the salary review process
- Review salary history and statistics
- Record salary increase information
- Record salary increase authorization signatures
- Enter review information online

Report field details

- **Salary Change Type**—Value and description that explains how the proposed salary increase was determined.
- **Salary Effective Date**—Effective date of the proposed salary increase.
- **Increase Amount**—Annual amount of the proposed increase.
- **New Salary/Wage**—Proposed salary expressed as an annual, per pay period, or hourly amount based on the salary grade table associated with the employee's salary grade.
- **Percent Change**—Percentage difference between the current salary and the proposed salary amount.
- **New Compa Ratio**—Compa ratio of the proposed salary.
- **Next Review Date**—Date of next review.
- **Next Review Type**—Review type of next review.

Parameter options and setup

- **As Of Date**—Enter a date in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere). If this text box is left blank, the entry defaults to the current date.

Salary Review Authorization Form II (3P-RPT)

The Salary Review Authorization Form II (3P-RPT) provides detailed and basic salary data on the employee as well as space to manually enter or automatically print proposed and actual increase amounts, effective dates, and so forth, for any employee who is scheduled on the Scheduled Salary Review Data form (43-SCR) to receive a merit increase within the month requested. This report prints two employee forms per landscape page.

The employee's current salary reflects, or is converted to, the frequency of the applicable salary grade table. For example, if the record is a Salary Grade - Annual form (TBASCR), the employee's annual salary prints. If the record is a Salary Grade - Per Period form (TBBSCR) with a frequency identifying it as a monthly amount, the employee's salary is converted to, and prints as, a monthly amount.

Business Tasks

This report is used to complete the following business tasks:

- Initiate the salary review process
- Review salary history and statistics
- Record salary increase information
- Record salary increase authorization signatures
- Enter review information online

Report field details

- **Salary Change Type**—Value and description that explains how the proposed salary increase was determined.
- **Salary Effective Date**—Effective date of the proposed salary increase.
- **Increase Amount**—Annual amount of the proposed increase.
- **New Salary/Wage**—Proposed salary expressed as an annual, per pay period, or hourly amount based on the salary grade table associated with the employee's salary grade.
- **Percent Change**—Percentage difference between the current salary and the proposed salary amount.
- **New Compa Ratio**—Compa ratio of the proposed salary.
- **Next Review Date**—Date of next review.
- **Next Review Type**—Review type of next review.

Parameter options and setup

- **As Of Date**—Enter the effective date in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere). The program will use the system date if the literal 'CCYYMMDD' is entered.

Salary Review Forms Not Returned By Date (18-RPT)

The Salary Review Forms Not Returned By Date report (18-RPT) lists all employees for whom salary review paperwork has not been returned by the expected return date.

Business Tasks

This report is used to complete the following business task:

- Track salary review forms not returned by the expected return date.

Report field details

- **Ctrl Three**—Organization level 3 value assigned to this employee.
- **Ctrl Four**—Organization level 4 value assigned to this employee.
- **Ctrl Five**—Organization level 5 value assigned to this employee.
- **Ctrl Six**—Organization level 6 value assigned to this employee.
- **Employee Name**—Employee's legal name.
- **Employee Number**—Unique employee identifier, up to 10 characters in length.
- **Review Scheduled Date**—Date the next salary review is to be performed.
- **Review Scheduled Type**—Value that defines the type of salary review to be performed.
- **Expected Return Date**—Date the salary review form is due back in the originating department.
- **Actual Return Date**—Date the salary review form was actually received in the originating department.

Report sort order

As delivered, the sort order of this report is CONTROL-1, CONTROL-2, CTRL-THREE, CTRL-FOUR, CTRL-FIVE, CTRL-SIX, and DATE-RETURN-EXPECTED.

Parameter options and setup

- **As Of Date**—Enter a date in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere). If this text box is left blank, the entry defaults to the current date.

Scheduled Salary Reviews Within Selected Months (19-RPT)

The Scheduled Salary Reviews Within Selected Months report (19-RPT) lists employees who are scheduled to receive salary reviews within the next month.

This report shows existing salary data and the Next Review Date text box entry from the Scheduled Salary Review Data form.

You may enter a date on the report's parameter form to determine the desired month or have the program default to the current date.

Business Tasks

This report is used to complete the following business tasks:

- Track employees due for a salary review in a specified month.

Report field details

- **Ctrl Three**—Organization level 3 value assigned this employee.
- **Ctrl Four**—Organization level 4 value assigned this employee.
- **Ctrl Five**—Organization level 5 value assigned this employee.
- **Ctrl Six**—Organization level 6 value assigned this employee.
- **Employee Name**—Employee's legal name.
- **Employee Number**—Unique employee identifier, up to 10 characters in length.
- **Salary**—Current pay amount based on salary grade frequency (annual, per period, or hourly).
- **Salary Chg Date**—Employee's most recent salary change date.
- **Months Since**—Number of months since employee's last salary change.
- **Compa Ratio**—Ratio of the employee's salary compared with the midpoint of the salary range.
- **Rating Date**—Date of the performance appraisal rating.
- **Rate Code**—Performance appraisal rating value.
- **Salary Grade**—A value associated with each salary grade and its range.
- **Salary Range**—Description and amount for each major point on the salary grade range.

Report sort order

As delivered, the sort order of this report is CONTROL-1, CONTROL-2, CTRL-THREE, CTRL-FOUR, CTRL-FIVE, and CTRL-SIX.

Parameter options and setup

- **As Of Date**—Enter a date in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere). If this text box is left blank, the entry defaults to the current date.

Seniority Listing - Active And LOA Employees (1H-RPT)

The Seniority Listing - Active And LOA Employees report (1H-RPT) lists the length of service of all active and LOA employees based on their adjusted seniority date.

This report may be modified to produce the listing based on Original Hire Date, and to include employees on Layoff. Instructions for these modifications are documented within the report.

A total of all employees listed is provided at the end of the report.

Business Tasks

This report is used to complete the following business task:

- Track seniority for employees based on adjusted seniority.

Report field details

- **Control Three**—Organization level 3 value assigned this employee.
- **Control Four**—Organization level 4 value assigned this employee.
- **Control Five**—Organization level 5 value assigned this employee.
- **Control Six**—Organization level 6 value assigned this employee.
- **Employee Name**—Employee's legal name.
- **Number**—Unique employee identifier, up to 10 characters in length.
- **Hire Date**—Employee's original date of hire.
- **Job Code**—Alphanumeric identifier for the job that is currently assigned to the employee.
- **Job Ext**—Four-digit number that works in conjunction with the job code text box to further identify the job assigned to the employee.
- **Job Title**—Description assigned to this job.

Report sort order

As delivered, the sort order of this report is CONTROL-1, CONTROL-2, CTRL-THREE, CTRL-FOUR, CTRL-FIVE, CTRL-SIX, and ADJUSTED-SENIORITY (from most recent to earliest).

Parameter options and setup

There are no parameters specified for this report.

Seniority Listing (3K-RPT)

The Seniority Listing report (3K-RPT) lists the length of service of all active employees based on their original date of hire. This report may be modified to use the Adjusted Seniority Date. Instructions for this modification are documented within the report program.

A total is provided at the end of the report.

Business Tasks

This report is used to complete the following business tasks:

- Identify long-term employees based on original hire date.
- Monitor employee turnover.

Report field details

- **Hire Date**—Employee's original date of hire.
- **Years-Months of Service**—Current date minus the employee's original hire date, expressed in years and months.
- **Employee Name**—Employee's legal name.
- **Number**—Unique employee identifier, up to 10 characters in length.
- **Ctrl Three**—Organization level 3 value assigned this employee.
- **Ctrl Four**—Organization level 4 value assigned this employee.
- **Ctrl Five**—Organization level 5 value assigned this employee.
- **Ctrl Six**—Organization level 6 value assigned this employee.
- **Status**—Employee's current status as a result of an activity.
- **Union**—Code that identifies the employee's union affiliation.
- **Job Code**—Alphanumeric identifier for the job that is currently assigned to the employee.
- **Job Description**—Title assigned to this job.

Report sort order

As delivered, the sort order of this report is CONTROL-1, CONTROL-2, and ORIGINAL-HIRE-DATE (from most recent to earliest).

Parameter options and setup

There are no parameters specified for this report.

Separation Analysis By Reason And Service (1P-RPT)

The Separation Analysis By Reason And Service report (1P-RPT) provides an analysis of separations by reason and length of service.

Business Tasks

This report is used to complete the following business tasks:

- Review month-to-date and year-to-date separation totals.
- Monitor employees with an Activity Date that is not earlier than the current calendar year, and not later than the specified date.

Report field details

- **Ctrl Three**—Organization level 3 value assigned this employee.
- **Ctrl Four**—Organization level 4 value assigned this employee.
- **Ctrl Five**—Organization level 5 value assigned this employee.
- **Ctrl Six**—Organization level 6 value assigned this employee.
- **Separation Activity Code**—Major activity that is occurring.
- **Separation Activity Reason**—Reason that the separation activity is occurring.
- **Service Plateau**—Service plateau per separation type: Time Span: Less than 6 Months, 6-12 Months, 13-18 Months, 19-35 Months, 3 To 8 Years, 9-15 Years, Over 15 Yrs.
- **Total Separations**—Total year-to-date, and current-month counts per separation type.

Report sort order

As delivered, the sort order of this report is CONTROL-1, CONTROL-2, CTRL-THREE, CTRL-FOUR, and ACTIVITY-CODE.

Parameter options and setup

- **As Of Date**—Enter a date in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere). If this text box is left blank, the entry defaults to the current date.

Separation Analysis Report (1O-RPT)

The Separation Analysis Report (1O-RPT) provides an analysis of turnover activity.

Business Tasks

This report is used to complete the following business tasks:

- Analyze turnover with monthly, cumulative, and annual statistics.
- Assess the total number of active employees.
- Review the total number of separations in a given month.
- Analyze monthly turnover percentages.
- Review the average monthly number of active employees.

Report field details

- **Ctrl Three**—Organization level 3 value assigned this employee.
- **Ctrl Four**—Organization level 4 value assigned this employee.
- **Ctrl Five**—Organization level 5 value assigned this employee.
- **Ctrl Six**—Organization level 6 value assigned this employee.
- **Active Employees**—Total number of active employees included in this organization level 3-6.
- **Separations This Month**—Total number of separated employees included in this organization level 3-6 for the specified month.
- **Turnover % This Month**—Total percentage of turnover included in this organization level 3-6 for the specified month.
- **Average NBR Active EMPS**—Average number of active employees included in this organization level 3-6.
- **Cumulative Separations**—Total number of separated employees included in this organization level 3-6.
- **Cumulative Turnover Rate**—Total turnover of employees included in this organization level 3-6.
- **Annual Turnover Rate**—Turnover rate for the current year to date.

Report sort order

As delivered, the sort order of this report is CONTROL-1, CONTROL-2, CTRL-THREE, CTRL-FOUR, CTRL-FIVE, and CTRL-SIX.

Parameter options and setup

- **As Of Date**—Enter a date in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere). If this text box is left blank, the entry defaults to the current date.

Separation Detail Report (1S-RPT)

The Separation Detail Report (1S-RPT) provides a detailed listing of employees separated within a specified one-month period.

Business Tasks

This report is used to complete the following business tasks:

- Analyze employee separation by race, sex, job code, job title, and EEO Job Category.
- Review an employee's date of separation, years/months of service, and reason for separation.

Report field details

- **Ctrl Three**—Organization level 3 value assigned this employee.
- **Ctrl Four**—Organization level 4 value assigned this employee.
- **Ctrl Five**—Organization level 5 value assigned this employee.
- **Ctrl Six**—Organization level 6 value assigned this employee.
- **Employee Name**—Employee's legal name.
- **Employee Number**—Unique employee identifier, up to 10 characters in length.
- **Original Hire Date**—Employee's original date of hire.
- **Appraisal Rating**—Code that identifies an employee's performance appraisal rating.
- **EEO Code**—Generic job group used by private employers for reporting purposes.
- **Race Code**—Employee's race code used in reporting.
- **Sex**—Employee's gender.
- **Separation Date**—Date of the employee's most recent separation occurrence.
- **Service Yrs**—Number of years the employee worked.
- **Service Mths**—Number of months employee worked beyond full years.

Report sort order

As delivered, the sort order of this report is CONTROL-1, CONTROL-2, CTRL-THREE, and EMPLOYEE-NAME.

Parameter options and setup

- **As Of Date** Enter a date in MM-DD-CCYY format (US and Canada) or DD-MM-CCYY (elsewhere). If this text box is left blank, the entry defaults to the current date.

Telephone Reference Check (05-RPT)

The Telephone Reference Check report (05-RPT) produces a telephone reference checklist of questions to ask an applicant's job reference that you are contacting by telephone.

Business Tasks

This report is used to complete the following business tasks:

- Analyze applicant profiles by applicant name and information pertaining to previous employment.
- Analyze previous employment dates and salaries, and the categories of previous job/position(s).
- Review reasons for termination and evaluations of applicant in predetermined categories.

Report field details

- **Applicant**—Applicant's legal name.
- **Date**—Current date.
- **Reference ID**—Unique three-position identifier assigned to each of the job or personal references supplied by the applicant.
- **Reference Name**—Name of the job/personal reference supplied by the applicant.
- **Date Called**—Manual entry of the date of the reference call.
- **Relationship**—Code and description of the relationship of the job or personal reference to the applicant.
- **Telephone**—Telephone number of the applicant-supplied job or personal reference to be used to contact the reference.
- **Company**—Name of the applicant's prior employer.
- **Left**—Description of the reason for leaving.
- **Start Date**—Date on which an applicant began working at the prior company.
- **End Date**—Last day an applicant was employed by the prior company.
- **Job Title**—Description of the job held by the employee in the prior company.
- **Prior Job Salary**—Last salary paid to the applicant at this job if the applicant provides a salary history.

Report sort order

As delivered, the sort order of this report is the CONTROL-1-2 and SORT-KEY-SEPARATOR.

Parameter options and setup

There are no parameters specified for this report.

Termination Report (3X-RPT)

The Termination Report (3X-RPT) provides a listing of all terminated employees.

Business Tasks

This report is used to complete the following business task:

- Analyze information on terminated employees with regard to the department where the employee worked, the original hire, adjusted seniority, separation dates, the reason for termination, and years of service.

Report field details

- **Employee Name**—Employee's legal name.
- **Employee Number**—Unique employee identifier, up to 10 characters in length.
- **Home Dept**—Department the employee was regularly assigned to even though the employee may be temporarily assigned to another department at the time of the activity.
- **Date of Hire**—Employee's original date of hire.
- **Adjusted Seniority**—Adjusted date of hire based on break-in-service episodes.
- **Separation Date**—Date of the most recent separation occurrence found in the employee's record.
- **Time of Service Yrs**—Number of years employee worked.
- **Time of Service Mos**—Number of months employee worked beyond full years.
- **Time of Service Days**—Number of days employee worked beyond full months.
- **Activity Code**—Code value of the termination activity.
- **Activity Description**—Description of the termination activity.

Report sort order

As delivered, the sort order of this report is CONTROL-1, CONTROL-2, CTRL-FOUR, and EMPLOYEE-NAME.

Parameter options and setup

There are no parameters specified for this report.

See also:

- Reports used for hiring, rehiring, reinstating, recalling, and transferring employees ***(on page 104)***

Total Relocation Closing Costs (35CRPT)

The Total Relocation Closing Costs report (35CRPT) provides an alphabetic listing of employees with relocation closing costs for a specified move and/or tax year.

Business Tasks

This report is used to complete the following business tasks:

- Analyze closing costs for both the employee's prior and new residences.
- Analyze information regarding realty companies, closing date, closing costs, cost of points, and the amount that was reimbursed, if applicable.
- Monitor whether a reimbursed mortgage origination fee for the new residence was given.

Report field details

- **Employee Name**—Employee's legal name.
- **Number**—Unique employee identifier, up to 10 characters in length.
- **Move Year**—Calendar year in which the relocation occurs.
- **Move #**—Number of the move for the employee in the calendar year.
- **Tax Year**—Tax year in which the relocation occurs.
- **Prior Realty Code**—Code value of the prior realty company.
- **Prior Realty Desc**—Description of the prior realty company.
- **Close Date Prior Res**—Date of the closing for the prior residence.
- **Cost Prior Res**—The amount of the closing costs associated with the prior residence.
- **Pts Prior Reim/Cost**—Number of closing points for the prior residence that will be reimbursed.
- **Mortgage Org Fee**—Amount of the mortgage origination fees.
- **Pts New Reim/Cost**—Number of closing points for the new residence that will be reimbursed.

Report sort order

As delivered, the sort order of this report is CONTROL-1-2, EMPLOYEE-NAME, RELOC-TAX-YEAR, RELOC-MOVE-YEAR, and RELO-MOVE-NO.

Parameter options and setup

- **Move Year**—Enter a date in YY format.
- **Tax Year**—Enter a date in YY format.

If only the Move Year is entered, the report prints all relocation costs for that Move Year and associated Tax Years. If only the Tax Year is entered, the report prints all relocation costs for that Tax Year and associated Move Years. If both Move Year and Tax Year are entered, relocation costs are printed for just that Move and Tax Year.

Total Relocation Costs By Employee (35-RPT)

The Total Relocation Costs By Employee report (35-RPT) lists each employee's relocation costs.

Business Tasks

This report is used to complete the following business tasks:

- Tracks relocation costs for each employee on the Employee Database record.
- Analyze total relocation costs for each tax year within a move.
- Analyze totals as they will appear on government forms. For example, Form 4782 (in the US), which is distributed to the employees with their W-2 Form.
- Analyze totals for non-taxable, taxable, and gross-up amounts, including all expense types printed in the far right column of the report.

Report field details

- **Employee Name**—Employee's legal name.
- **Employee Number**—Employee number that is the key to the employee record on the Employee Database.
- **Move Year**—Calendar year in which the employee's relocation activities occurred or were initiated.
- **Tax Year**—Year in which the relocation monies are to be reported to the employee on Form 4782 and included in that year's W-2 wages and gross-up into W-2 taxes.
- **House Hunting**—Amount of tax gross-up dollars, or non-taxable dollars, or taxable dollars paid to or on behalf of the employee attributable to house hunting activities.
- **Move Travel**—Amount of non-taxable dollars paid to or on behalf of the employee attributable to the physical move from the old to the new residence.
- **Temporary Living**—Amount of the tax gross-up, or taxable dollars, or non-taxable dollars attributable to Temporary Living expenses.
- **Closing Costs**—Amount of the tax gross-up, or taxable dollars, or non-taxable dollars paid on behalf of the employee attributable to the employee's housing Closing Costs.
- **Ship Furniture**—Amount of the invoice for shipping employee's personal possessions from the old to the new residence (include in transit storage fees).

Report sort order

As delivered, the sort order of this report is CONTROL-1-2, EMPLOYEE-NAME, RELOC-TAX-YEAR, RELOC-MOVE-YEAR, and RELO-MOVE-NO.

Parameter options and setup

- **Move Year**—Enter a date in YY format.
- **Tax Year**—Enter a date in YY format.

If only the Move Year is entered, the report prints all relocation costs for that Move Year and associated Tax Years. If only the Tax Year is entered, the report prints all relocation costs for that Tax Year and associated Move Years. If both Move Year and Tax Year are entered, relocation costs are printed for just that Move and Tax Year.

Total Relocation Moving Expenses (35MRPT)

The Total Relocation Moving Expenses report (35MRPT) provides an alphabetical listing of employees who have relocation physical move expense reports recorded for a specified move and/or tax year.

Business Tasks

This report is used to complete the following business task:

- Analyze total relocation moving expenses.

Report field details

- **Employee Name**—Employee's legal name.
- **Number**—Unique employee identifier, up to 10 characters in length.
- **Move Yr**—Calendar year in which the move began.
- **Move #**—Number of the move for the employee in the calendar year.
- **Tax Yr**—Tax year in which the move began.
- **Expense Date**—Date on which the expense report was filed or the date the report was recorded.
- **Trip Days**—Number of days it took for the employee to move to the new location.
- **Meals Expense**—Total expense incurred for meals during the trip to the new residence.
- **Lodging Expense**—Total expense incurred for lodging during the trip from the old to the new residence.
- **Telephone Expense**—Total telephone expense incurred during the move to the new residence.
- **Air/Train Expense**—Air, train or other major transportation expense incurred during the physical move from the old to new residence.
- **Auto Expense**—Total automobile expense incurred during the physical move to the new residence.
- **Misc Expense**—Total miscellaneous expenses incurred during the move from the old to the new residence.

Report sort order

As delivered, the sort order of this report is CONTROL-1-2, EMPLOYEE-NAME, RELOC-TAX-YEAR, RELOC-MOVE-YEAR, and RELO-MOVE-NO.

Parameter options and setup

- **Move Year**—Enter a date in YY format.
- **Tax Year**—Enter a date in YY format.

If only the Move Year is entered, the report prints all relocation costs for that Move Year and associated Tax Years. If only the Tax Year is entered, the report prints all relocation costs for that Tax Year and associated Move Years. If both Move Year and Tax Year are entered, relocation costs are printed for just that Move and Tax Year.

Total Relocation Shipping Inventory Costs (35SRPT)

The Total Relocation Shipping Inventory Costs report (35SRPT) provides an alphabetical listing of employees who have relocation shipment of household inventory expenses recorded for a specified move and/or tax year.

Business Tasks

This report is used to complete the following business tasks:

- Analyze the expense details of the shipment of household inventory as listed by move and/or tax year and move number.
- Monitor information regarding shipping and storage companies, loading date, weight of load, and delivery date.
- Track number of automobiles and boats moved and the cost incurred.
- Track the total cost of storage, the number of authorized storage days, and the actual number of storage days used.
- Track the cost of shipment from the prior residence to the new residence or storage warehouse.

Report field details

- **Employee Name**—Employee's legal name.
- **Number**—Unique employee identifier, up to 10 characters in length.
- **Move Yr**—Calendar year in which the move began.
- **Move #**—Number of the move for the employee in the calendar year.
- **Tax Yr**—Tax year in which the move began.
- **Shipping Company**—Name of the company responsible for shipping this inventory.
- **Loading Date**—Date on which the employee's belongings were loaded.
- **Move Weight**—Freight weight of the employee's belongings moved and/or stored.
- **Cost Auto**—Number of automobiles being moved.
- **Ship Auto**—Cost to ship the automobile for the employee.
- **Cost Boat**—Number of boats being moved.
- **Ship Boat**—Cost to ship the boat for the employee.
- **Store Days Auth**—Number of days that have been authorized for storage of belongings.
- **Store Days Used**—Actual number of days used for storage of the employee's belongings.

Report sort order

As delivered, the sort order of this report is CONTROL-1-2, EMPLOYEE-NAME, RELOC-TAX-YEAR, RELOC-MOVE-YEAR, and RELO-MOVE-NO.

Parameter options and setup

- **Move Year**—Enter a date in YY format.
- **Tax Year**—Enter a date in YY format.

If only the Move Year is entered, the report prints all relocation costs for that Move Year and associated Tax Years. If only the Tax Year is entered, the report prints all relocation costs for that Tax Year and associated Move Years. If both Move Year and Tax Year are entered, relocation costs are printed for just that Move and Tax Year.

Tuition Information (32-RPT)

The Tuition Information report (32-RPT) lists tuition reimbursement information.

Business Tasks

This report is used to complete the following business task:

- Monitor the tuition information for all employees or just employees who have tuition that has not been paid.

Report field details

- **Employee Name**—Employee's legal name.
- **Employee Number**—Unique employee identifier, up to 10 characters in length.
- **Education Level**—Type of education that an employee has completed or is in the process of completing.
- **School Code**—Code that identifies the school that the employee attended or is currently attending.
- **School Name**—Name of the school that the employee attended or is currently attending.
- **YR**—Year the recorded course was taken by the employee.
- **Course Cd**—Unique value for each course taken in a semester/quarter allowing for separate reimbursement records when more than one course is attended within the same term.
- **Title Description**—Title of the course taken by the employee this semester/quarter. A number assigned by the school may be entered here when it is necessary to track multiple attempts at the same course.
- **Sem Qtr**—Semester or quarter the recorded course was taken by the employee.
- **Course Grade**—Grade the employee earned for the course.
- **HED XRef**—HED number used to pay the reimbursement.
- **Reimbursement Date**—Date on which the tuition reimbursement was paid to the employee.
- **Tuition Pct**—Percent of reimbursed tuition granted the employee for this course.
- **Tuition Amount**—Amount of the tuition reimbursement.
- **Books Pct**—Percentage of reimbursement for book charges.
- **Books Amount**—Amount of reimbursement for book charges.
- **Fees/Other Pcnt**—Percentage of fees and other expenses to be paid.
- **Fees/Other Amount**—Amount of reimbursement for fees and other charges.

Report sort order

As delivered, the sort order of this report is CONTROL-1-2, EDUCATION-LEVEL, YEAR, EMPLOYEE-NAME, and EMPLOYEE-NUMBER.

Parameter options and setup

- **Tuition Status Option**—Enter a tuition status option of 'PAY' to print only employees with unpaid tuition. Leave this entry blank to print all employees with tuition.

Form Title/Form ID/Segment Cross-reference

In This Appendix

About this section

This section provides a quick reference guide to the Human Resources Administration forms covered in this documentation. It provides a listing of the form title, form ID, and the segment code associated with the form. The listing is presented in three formats:

- Form title sequence
- Segment code sequence
- Form ID sequence

HR Forms in Form Title sequence

APPENDIX C

Practice and Review Answers

In This Appendix

Recruiting and Selecting Employees

Apply the Concept

1. What are the nine key stages in the recruitment and selection process?

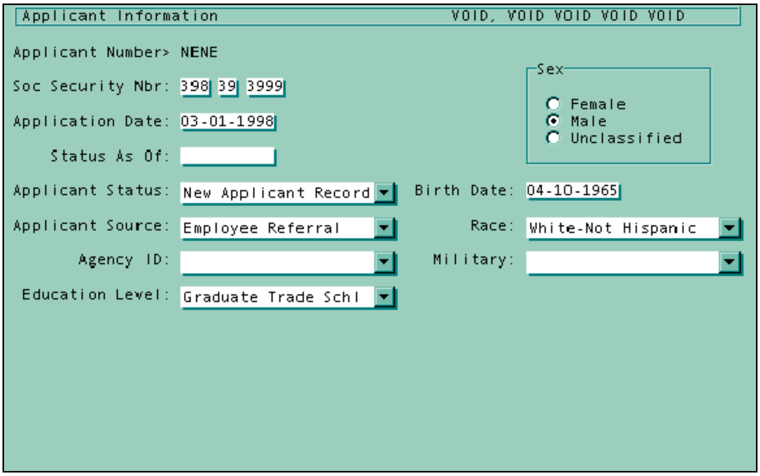
   - *Identify a vacancy and obtain authorization to fill it.*
   - *Define the particulars of the specific job or position to be filled.*
   - *Advertise the job opening and recruit potential candidates for the position.*
   - *Eliminate candidates who do not meet the minimum qualifications for the position.*
   - *Assess the qualifications of the remaining candidates.*
   - *Select the individual or individuals who appear to best fit the organization's needs.*
   - *Extend a job offer to the selected individuals.*
   - *Notify unsuccessful candidates.*
   - *Analyze the recruitment and selection process just completed.*

2. How is a *transfer* defined in the system?

   It is the process of moving an employee from one organization to another organization in your organization, such as moving an applicant from the applicant organization to the active employee organization.

Extended Practice

Using the Applicant Tracking organization 993333 an employee template of 'LMODEL AT', add yourself as a new applicant as of the 1st of the current month. Repeat your initials twice (example: NENE) for the applicant number. You are applying for the position (requisition number 1805) of Zoo Manager and already have the first round of interviews scheduled. Enter all of the appropriate data on the Applicant Information form (001SCR), Applicant Name and Address form (002SCR), and Job Or Position Applied For form (003SCR).



Applicant Information VOID, VOID VOID VOID VOID

Applicant Number> NENE

Soc Security Nbr: 398 39 3999

Application Date: 03-01-1998

Status As Of:

Applicant Status: New Applicant Record

Applicant Source: Employee Referral

Agency ID:

Education Level: Graduate Trade Schl

Sex

Female

Male

Unclassified

Birth Date: 04-10-1965

Race: White-Not Hispanic

Military:

Applicant Name and Address Employee, New A

Name Code> 001

Title: Mr

First: New

Middle: A

Last: Employee

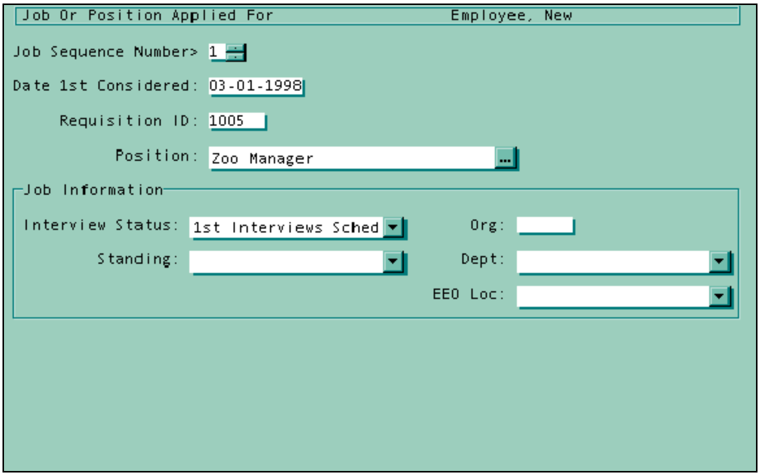
Suffix:

Address: 2355 Smith Road

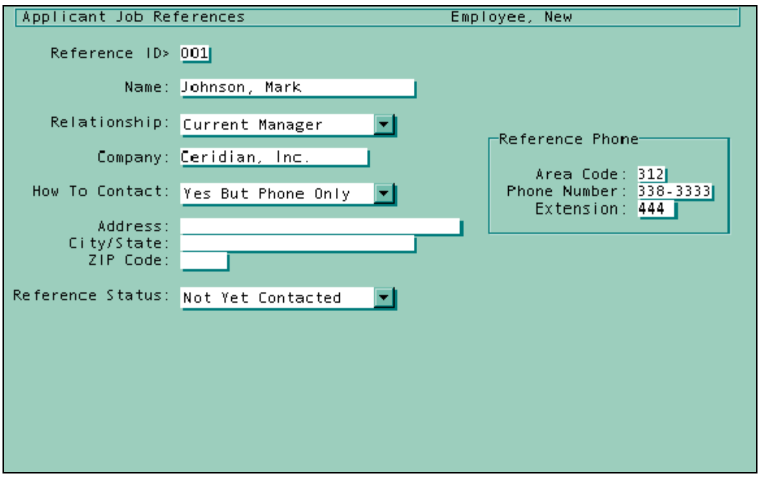
PO Box 45

City/State: Chicago IL 60606-2303

Country: United States



Use the appropriate form to enter two references (current manager and a neighbor) for yourself.



You were offered, and accepted, the Zoo Manager position today. Update the Status As Of and Applicant Status text boxes on the Applicant Information form (001SCR) and the Interview Status and Standing text boxes on the Job Or Position Applied For form (003SCR). Also, complete the appropriate pre-transfer information on the Hired Applicant Pre-Transfer Information form (020SCR). You will be paid an annual salary of 38,500.00 based on a weekly pay frequency and will be assigned to Region 3030, Department 4040, Section 5050, and Group 6060.

Review of Questions Answered

1. What are the options available when recruiting employees?

   Recruiting can be done using Applicant Tracking, Position Administration, Requisition Administration, and Complement Control.

2. How can using applicant organizations facilitate the recruitment process?

   It allows you to keep your applicant data safely apart from your active employee data.

3. How are employee templates used to enter information in the system?

   They are used to enter default data attributes for employees and applicants. The system allows you to record applicant information on templates (also called Logical Employee Models) that are stored on the Employee Database. The use of templates ensures that vital applicant information is entered in a consistent, correct, and usable manner. It will also save you time because you will not have to reenter data that is common to a group of applicants.

4. What data is required and what data is optional when entering applicant information?

   Applicant name and address information is required. Optional entries include contact information, identifying documentation, job references, preferred work environment, work history, pre-transfer information, interview recap, and job or position applied for.

Hiring, Rehiring, Reinstating, Recalling, or Transferring an Employee

Apply the Concept

1. What is the difference between *rehiring*, *reinstating*, and *recalling* employees?

   The definitions of these terms are as follows:

   Rehire—The process of hiring a former employee of your organization. Typically, a break in service is incurred and benefits must start over (usually requiring a new adjusted seniority date if used in benefits tracking).

   Reinstatement—The process of returning a former employee to active status within a certain time period (such as 90 days), thus qualifying the employee to have certain benefits restored to the original hire date.

   Recall—Return a laid-off employee to active status, usually with no affect to benefits.

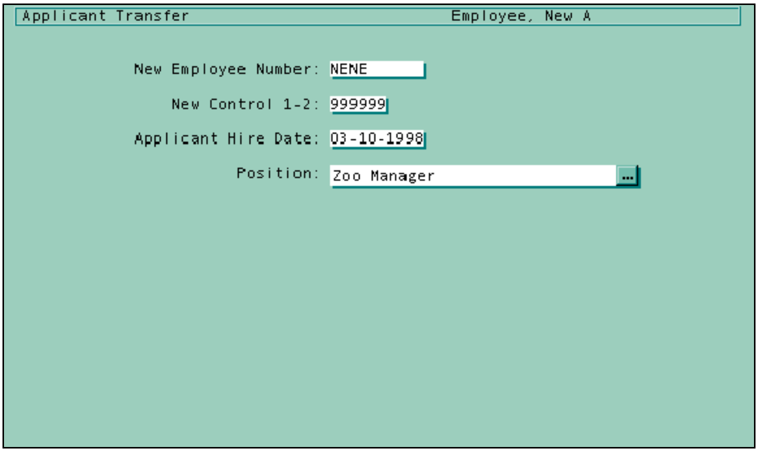
2. What is the *Quick Hire* process?

   This process streamlines hiring new employees by combining the required data on the Set Up A New Employee form (NH-SCR).

Extended Practice

Note: *You must have completed the Extended Practices in the prior chapters to guarantee the successful completion of the Extended Practice that follows.*

1. Transfer the applicant record you created in the last chapter to the active employee organization as of today. Use your applicant number as your employee number. Confirm that you now exist in both the applicant organization (993333) and the active organization (999999).



Applicant Transfer Employee, New A

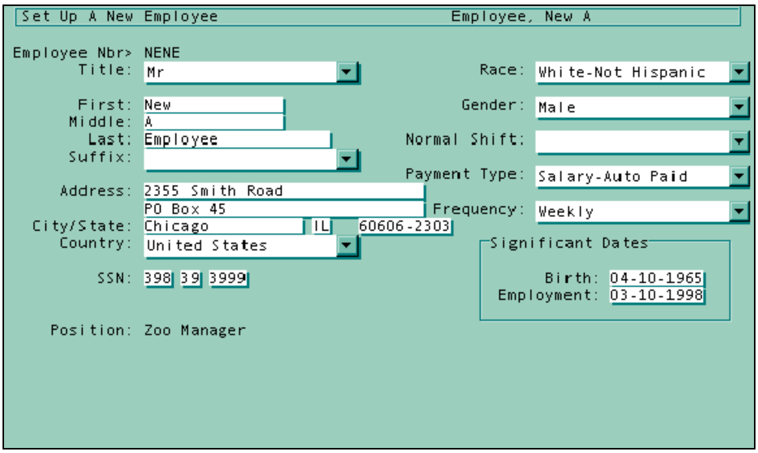
New Employee Number: NENE

New Control 1-2: 999999

Applicant Hire Date: 03-10-1998

Position: Zoo Manager

Complete the new hire process by using the Set Up A New Employee form (NH-SCR) to add your weekly pay frequency and payment type of 'salaried auto-paid'.



Set Up A New Employee Employee, New A

Employee Nbr> NENE

Title: Mr

Race: White-Not Hispanic

First: New

Middle: A

Last: Employee

Suffix:

Gender: Male

Normal Shift:

Payment Type: Salary-Auto Paid

Address: 2355 Smith Road

PO Box 45

Frequency: Weekly

City/State: Chicago IL 60606-2303

Country: United States

Significant Dates

SSN: 398 39 3999

Birth: 04-10-1965

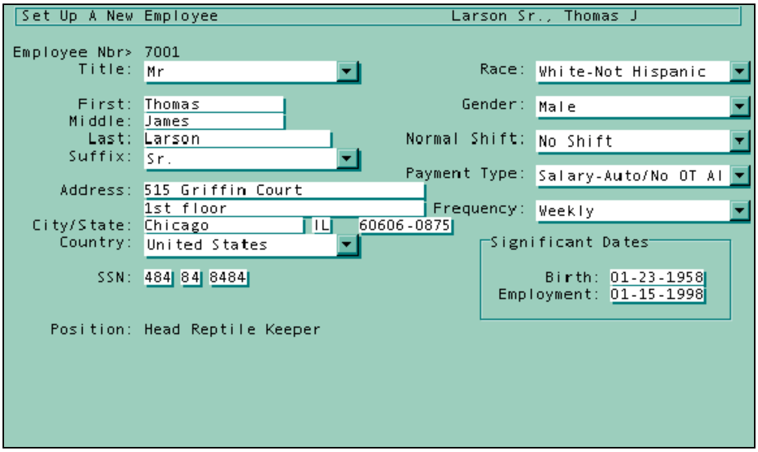
Employment: 03-10-1998

Position: Zoo Manager

View these forms to be sure that all of the needed new hire information has been populated:

- Employee Information (EF-SCR)
- New Hire (NH-SCR)
- Job Assignment/Changes (05-SCR)
- Location Assignment/Changes (05CSCR)
- Salary Assignment/Changes (40-SCR)

2. Use the Set Up A New Employee form (NH-SCR) with Logical Employee Model 'LMODEL 01' to hire a new employee, Thomas Larson, as of January 15th of this year. He did not go through the applicant tracking process. Thomas Larson is a white male hired as a Head Reptile Keeper.



Review of Questions Answered

1. What considerations are there when hiring new employees?

   Considerations include gathering the appropriate information, scheduling reviews or tests, notifying other departments, and so forth.

2. What information is required on the employee record for him or her to be active in the system?

   The required information is as follows: Basic employee data, new hire activity information, job and position data, salary information, and position incumbency information.

3. How are major activities and employment statuses handled?

   You are able to track the major activities and status changes that affect your employees. This area focuses on the new hire activity but activities can include leaves, returns, separations, or terminations. Activities in turn cause changes to employees status. For example, a New Hire activity can result in a status of Active, Salaried, Regular, Full-Time.

4. What are the various methods used for adding new employees?

   The methods for adding new employees include:

   - *Hiring a new employee*
   - *Transferring an applicant*
   - *Transferring an internal candidate*
   - *Rehiring, reinstating, or recalling a former employee*

5. How are positions and jobs handled when adding new employees?

When you hire a new employee, you must select the employee's position on either the Employee Information form (EF-SCR) or Set Up A New Employee form (NH-SCR). This code for the position is automatically written to the Job Code text box on the Job Assignment/Changes form (05-SCR).

6. What are the important dates used to track employees in the system?

   This chart defines some of the important dates used when tracking employees.

Date Type	**Use**
Original Hire Date	This is the original hire date and does not change. It is displayed on the New Hire form (01-SCR).
Employment Date	This is the date of the most recent hire and is replaced by a new date if the employee leaves the company, then subsequently returns. It is entered on the Employee Information form (EF-SCR).
Adjusted Seniority Date	This date can be used, depending on your company policies, to reflect adjustments to seniority per employee activities.

7. What employee-level data is optional when adding new employees?

   The system provides the capability to record these optional data elements:

- *Personal and identification information, including marital and citizenship status, visa information, and security clearance. This information is recorded on the Additional Personal And ID Information form (02-SCR).*
- *Contact information, including the employee's e-mail address, fax number, cellular, car, and pager numbers. This information is recorded on the Employee Contact Information form (EM-SCR).*
- *Telephone and employment information, including work and home telephone numbers, original applicant number, and employment agency used for hiring, if applicable. If you are using the applicant tracking component, these data elements are automatically populated. This information is recorded on the Phone Numbers And Employment Information form (03-SCR).*
- *Spouse and dependent information, which is helpful for tracking benefit entitlements. Data that can be recorded includes names, ages, and birth dates. Each spouse and dependent is assigned a unique, three-character ID. This information is recorded on the Spouse/Dependent Information form (10-SCR).*

Managing Employee Attendance

Apply the Concept

1. What are *absence points*?

   An absence point is a customer-defined number that is assigned for each employee absence that can be totaled over time to determine if an employee is within the accepted number of points for a time period.

2. How does the Time and Attendance component interact with managing employee attendance?

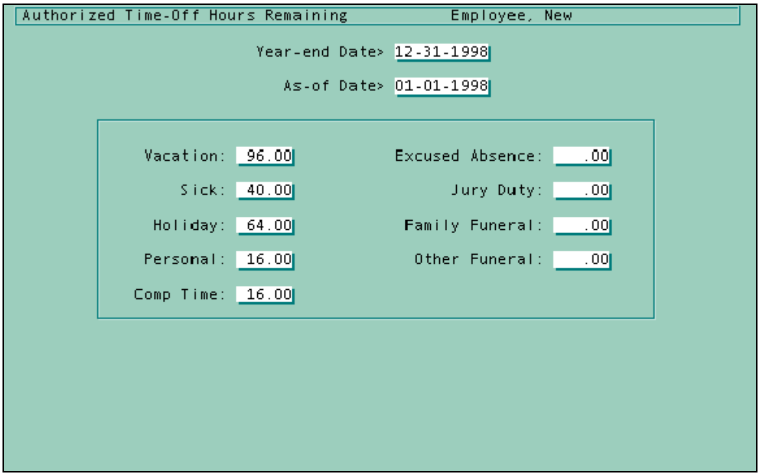
   Time and Attendance Administration provides separate functionality that collects, maintains, and processes employee time entry data for upload into the Cyborg Payroll Administration. Although this functionality may not be implemented by all clients, many absence tracking features and forms are available to all users, letting you track employee absences and monitor when excessive absences are occurring. If your organization uses Time and Attendance, the general ledger interface feature automatically books the accrual of excused and unexcused absences. When in use, this component lets you focus solely on tracking excessive absences or to actually trigger payments or deductions through the Payroll Administration.

Extended Practice

Note: *You must have completed the Extended Practices in the prior chapters to guarantee the successful completion of the Extended Practice that follows.*

1. Record some authorized time-off remaining hours for yourself, the new employee in the 999999 organization you set up in the last chapter. Use the last day of the current year as your year-end date and first day of the year as the as of date. Enter the following hour amounts:

- Vacation 96.00
- Sick 40.00
- Holiday 64.00
- Personal 16.00
- Family Funeral 16.00



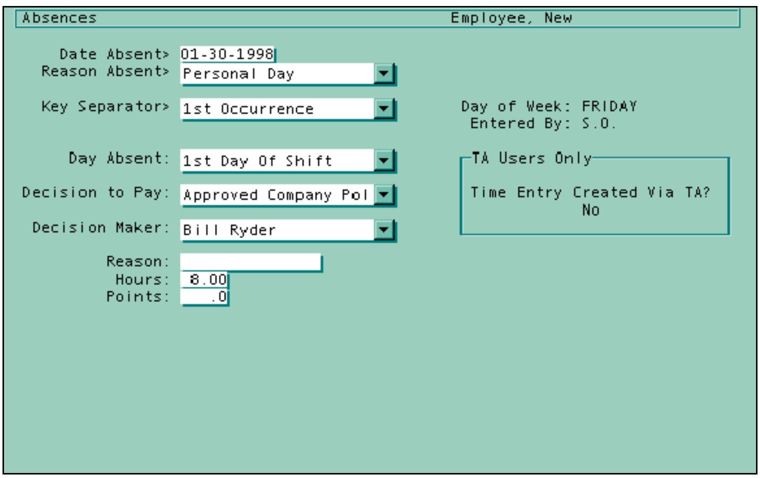
Authorized Time-Off Hours Remaining   Employee, New

Year-end Date> 12-31-1998

As-of Date> 01-01-1998

Vacation:	96.00	Excused Absence:	.00
Sick:	40.00	Jury Duty:	.00
Holiday:	64.00	Family Funeral:	.00
Personal:	16.00	Other Funeral:	.00
Comp Time:	16.00		

2. You used one of your personal days on January 30 and were sick on February 17. You properly notified your manager, Bill Ryder, according to company policy. Record each of these paid absences (8.00 hours per day) on the appropriate form. Your company does not use absence point values.



Absences   Employee, New

Date Absent> 01-30-1998
Reason Absent> Personal Day

Key Separator> 1st Occurrence

Day of Week: FRIDAY
Entered By: S.O.

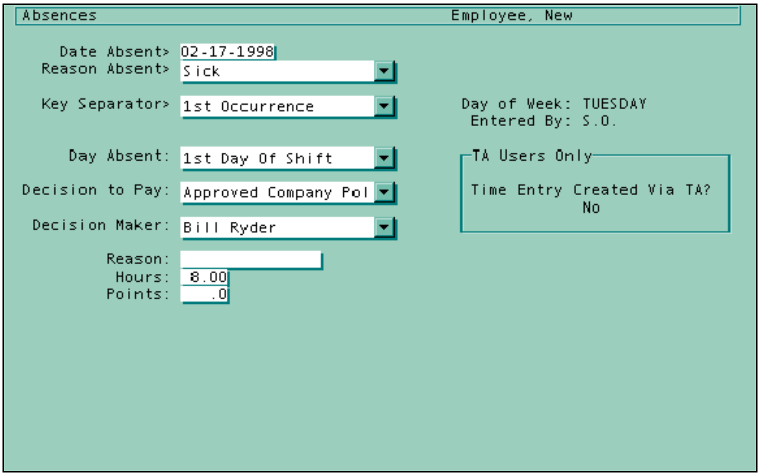
Day Absent: 1st Day Of Shift

Decision to Pay: Approved Company Pol

Decision Maker: Bill Ryder

TA Users Only
Time Entry Created Via TA?
No

Reason:
Hours: 8.00
Points: .0



Absences Employee, New
Date Absent> 02-17-1998
Reason Absent> Sick

Select Options: E - Entry I - Inquiry

Review of Questions Answered

1. What needs to be considered when managing employee attendance effectively?

Considerations should include the following:

- *Recording employee leave entitlements*
- *Considering implications of each absence*
- *Recording employee absence information*
- *Managing leave entitlement*
- *Analyzing absences*

2. What functionality is available to manage employee attendance?

   Functionality includes recording the details of employee absences, including date, type, hours, approval notice, and the name of the person who gave the approval.

3. What are absence types and absence points and how are they used?

   When recording an employee absence, you must indicate the absence type, or the category of the absence. Values for absence types are supplied from the Absence Type option list (TA01), and include the following: birth in family, holiday, and sick time. Your organization may modify this option list to reflect the values that are needed.

   When you record an absence for an employee using the Absences form (93-SCR), you can optionally assign a number of absence points to the absence. The number of absence points you assign for an absence is up to your organization. By adding up the number of absence points an employee has accumulated over a period of time, you can determine if the employee is within the allowable number of absence points. If not, you may want to pursue some form of disciplinary action.

4. How are annual paid absence entitlements used?

   The system requires you to determine annual paid absence entitlements at the beginning of a year period, or when the employee is hired. It will allow you only one record per year, with the record being updated each time an entry is made for a year. The year may be a calendar year or any other annual period for which you record and maintain records for employee absences. The system accommodates different types of absences that begin at different times of the year through the 'Year-end Date' and 'As-of Date' text boxes on the Authorized Time-off Hours Remaining form (93ASCR).

Processing Terminations, Leaves and Returns, and Other Major Activities

Apply the Concept

1. How do *major activities* affect changes in *employee status*?

   Major activities are events that cause a change in an employee's status, such as a new hire, termination, or rehire.

2. What is the difference between a *leave of absence* and a *retirement*?

   A leave of absence occurs when an employee leaves the organization for a period of time, usually temporary, for personal reasons such as medical leave.

Extended Practice

Note: *You must have completed the Extended Practices in the prior chapters to guarantee the successful completion of the Extended Practice that follows.*

1. Alexander Bloom, employee number 3001, found a better job opportunity and terminated his employment on February 27 of this year. He met with the personnel department for an exit interview on his last day of work. Enter Alexander's termination record as well as the following exit interview comments: 'Alexander had an offer he just could not refuse and we were unable to match salary. He is definitely eligible for rehire in the Accounting Department.'

Note: *You will need to use multiple sequence numbers to enter the narrative and you can view the entire exit interview narrative in Display mode on the Exit Interview Narrative form (97ISCR).*

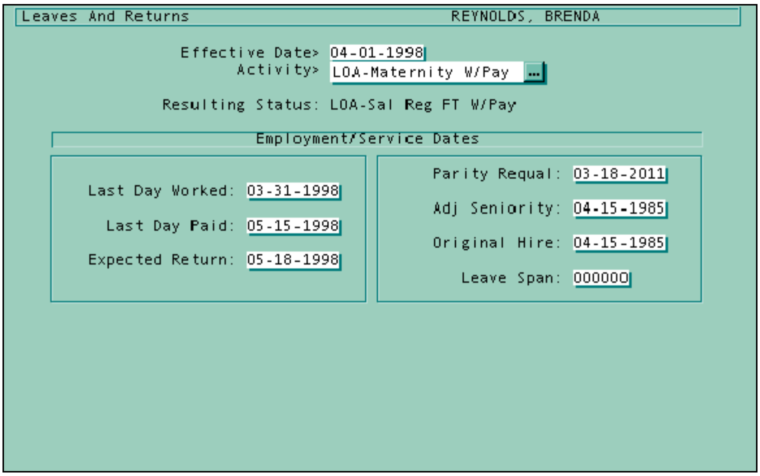
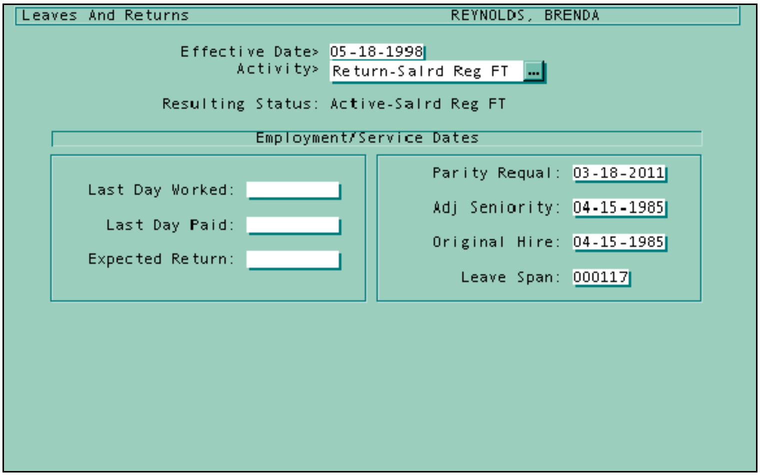
2. Record a paid maternity leave that began April 1 of this year and will continue through May 15 for Brenda Reynolds. She worked up to the day prior to the start of her leave and will be paid through May 15. Brenda is expected to return to work on Monday, May 18.



3. Brenda Reynolds did return to work on her expected return date. Record her return from leave of absence. Her status will remain Salaried, Regular, Full-Time.



Review of Questions Answered

1. What types of employment status changes are typically used in an organization?

   Typical changes include 'active', 'inactive', 'part-time', 'full-time', and so forth.

2. How are activities and employment statuses used in the system?

   Several forms are used to record employee major activities and status changes. Each of these forms deals with a specific type of activity. It is good practice to only enter one major activity for a single date.

Form Name	Purpose
Leaves And Returns (95-SCR)	*Records various types of leaves (both paid and unpaid) and returns from those leaves.*
Status Changes (08-SCR)	*Records activities that result in an employee's status remaining active, such as: transfers, conversions, file additions, changes from full-time to part-time status or vice versa, and adjustments to benefit service dates.*
Separations And Terminations (96-SCR)	*Records employee separations and terminations that would change the employee's status from active to inactive, such as voluntary or involuntary terminations, retirement, deaths, and layoffs.*
Employee Status History (09-SCR)	*Displays each major activity and the resulting status for an employee.*

3. What are the payroll implications of employee status changes?

Once you have performed a leave or termination activity, you can check if any holiday or sick payments are outstanding and calculate the final payment for payroll. The pay period in which the leave or termination process occurs will impact how the final payment is calculated. When an employee leaves or is terminated between payroll periods, payroll does not automatically prorate the final payroll and benefit payments. Some manual intervention is usually required to give an off-cycle payment or to prorate the normal period amount.

4. What are the benefits implications of employee status changes?

   When an employee is separated or terminated from the organization, the benefits department should be alerted. Employees may lose their benefits coverage based on the benefit plan rules that have been established for your organization.

5. What are the Position Administration implications of employee status changes?

   Position Administration allows you to strategically manage the in-and-out flow to positions within your company.

   In cases where you are terminating an employee, you need to be aware that when you unassign an employee in a single incumbency, they will be unassigned from the most recent position they held. The system will automatically unassign employees who hold multiple incumbencies from all positions held.

Tracking Employee Skills, Competencies, and Training

Apply the Concept

1. What is *career planning*?

   Career planning involves providing career incentives such as advancement and additional education and training for individual employees in order to meet projected organizational needs.

2. What is the importance of tracking employee skills, competencies, and training in an organization?

   Measuring and tracking employee skills and competencies will help your organization to increase and enhance the abilities of the workforce through strategically-planned training and development efforts.

Review of Questions Answered

1. How is an up-to-date record of an employee's qualifications maintained?

   The system easily maintains the following types of information:

   - *Licenses*
   - *Certificates*
   - *Permits*
   - *Professional or trade association memberships*
   - *Driver licenses*

2. How is training scheduled and completed for an employee recorded in the system; and how are training costs tracked?

   The following forms are used:

   - *Training Scheduled/Taken (31-SCR)—Used to record training courses an employee or applicant has attended or is scheduled to attend.*
   - *Employee Training Class Costs form (34RSCR)—Used to track the cost of training classes for an employee.*

3. How are qualifications-related information such as licenses, certificates, permits, association memberships, and driver's licenses tracked?

   The following forms are used:

- *Certificates, Licenses And Permits (28-SCR)—Used to record any certificates, licenses, and/or permits an employee or applicant has been granted.*
- *Formal Education (30-SCR)—Used to record an employee's or applicant's formal education, both completed and in-progress.*
- *Tuition Information (32-SCR)—Used to record information about education reimbursements granted for each course taken by an employee in a tuition reimbursement program. The amount refunded to the employee for the course is recorded here. A separate form must be recorded for each course taken by the employee.*
- *Skills And Competencies (33-SCR)—Used to record skills and competencies acquired by an employee or applicant through formal education, work experience, and training courses.*
- *Professional Association Memberships (29-SCR)—Used to record any professional associations of which an employee or applicant is a member, both personally and on behalf of the company.*
- *Driver License Information (25-SCR)—Records driver license information for those employees operating company vehicles, or applicants who will be required to operate company vehicles if they are hired.*

Tracking Performance Appraisals

Apply the Concept

1. What is the aim of performance appraisals for an organization?

   Performance appraisals assess individual employee strengths and areas of improvement in relation to job performance and help the organization to build on those strengths and facilitate improvement.

2. What tasks are typically associated with tracking performance appraisals?

   The basic tasks associated with tracking performance appraisals are as follows:

   - *Schedule the next performance appraisal for the employee.*
   - *Identify employees eligible for a performance appraisal within a customer-defined timeframe.*
   - *Prepare the appraisal forms and distribute them to the appropriate reviewers.*
   - *Record the results of the performance appraisal (depending on the type of appraisal used by your organization, you may need to record the results of multiple evaluations, such as for a 360-degree appraisal).*
   - *Enter other changes brought about by the performance appraisal.*

Review of Questions Answered

1. What different types of performance appraisals can be given to employees?

   The various types are: top-down ratings, peer group appraisals and 360-degree appraisal methods.

2. What is the performance appraisal process when using the system?

   Performance appraisals are recorded on the Performance Appraisal Results form (49-SCR).

3. What reports are available to aid in the performance appraisal process?

   - *Performance Appraisals Scheduled For Month Of: XX report (1R-RPT)—Provides a distribution list of performance appraisals scheduled for a given month.*
   - *Performance Appraisal Forms Not Returned By Expected Date report (1Q-RPT)—Identifies employee records that have not been updated with appraisal results by the due date.*

4. How can performance appraisals be linked to salary reviews?

   To link a performance appraisal with a salary review, you must use functionality in the Salary Administration component. You must use the Pay-for-Performance option. To use this option, you must set up rules for the salary increase amounts that are related to each appraisal score.

Managing Employee Health and Safety

Apply the Concept

What are the advantages of tracking health and safety information for your employees?

Such a program provides benefits for each employee and for the organization. Good health and safety management can reduce business costs from losses and damages resulting from on-the-job accidents, injuries, and illnesses.

Review of Questions Answered

1. How is the health and safety functionality used in the system?

   The system provides the foundation for an effective employee health and safety management program by recording employee-level information used for ongoing health and safety maintenance or for handling of emergency situations. The types of information that can be recorded include:

   - *Scheduled medical exams*
   - *Medical exam results*
   - *Employee blood type*
   - *Allergies*
   - *Disabilities*
   - *Religious preferences*
   - *Native language*
   - *Emergency contacts*
   - *Physician names and contact information*
   - *On-the-job accident and injury details*

2. What is the advantage of recording language and religion information for your employees?

   During the applicant recruiting process, or after hiring a new employee, you may want to record information regarding an employee's native language and religious preference. If entered in the applicant organization, this information transfers with the employee record to the active organization. Language and religion information could be useful in emergency situations and is recorded on the Phone Numbers And Employment Information form (03-SCR).

3. What is the possible impact of health and safety information on Benefits Administration?

   Health and Safety data you have recorded for your employees may have a direct impact on the area of Benefits Administration. For example, in many organizations employees who smoke pay more for their benefits than do non-smokers. There could also be associated legal ramifications. It is possible the government could make judgments or set employee safety standards based on the information you track regarding employee *health and safety. Governmental organizations may require reporting from your employee Health and Safety records.*

Tracking Discipline and Grievances

Apply the Concept

What are *disciplinary actions* and *grievances*?

The definitions of these terms are:

- *Disciplinary action—Action taken against an employee for violation of an organization policy or procedure.*
- *Grievance—A formal complaint made by an employee against the organization usually because of an unsatisfactory working condition or other work-related dispute.*

Review of Questions Answered

1. How are employee grievances and disciplinary actions recorded using the system?

   Recording takes place on the Disciplinary Action form (DA-SCR) and Grievances form (GT-SCR).

2. What reports are available to track employee grievances and disciplinary actions taken by the organization?

   - *Disciplinary Actions Report (3M-RPT)—Provides a summary of the disciplinary actions taken against employees by the organization as recorded on the Disciplinary Actions form (DA-SCR).*
   - *Grievance Recording And Status Report (3V-RPT)—Provides a summary of the employee grievance information on file as recorded on the Grievances form (GT-SCR).*

Managing Employee Compensation

Apply the Concept

What are the key elements of compensation management?

- *Individual compensation administration (including both pay and benefits)*
- *Compensation policy formulation*
- *Compensation cost management*

Review of Questions Answered

1. What considerations are involved in managing employee compensation?

    - *Individual compensation administration (including both pay and benefits)*
    - *Compensation policy formulation*
    - *Compensation cost management*

2. What are the different methods of entering salary changes?

    - *Direct entry*
    - *Multiple increases on the same date*
    - *Salary changes prior to the current pay period*
    - *Salary changes within the current pay period*
    - *Salary changes future to the current pay period*

3. Why is periodically reviewing the salary review process beneficial to your organization?

    It will allow you to make any necessary changes, which will be noticed by your employees and may result in higher employee morale.

4. What are the different ways to analyze cost results?

    As reviews occur and employee salary increases are entered, you will need to review the effects of the changes. You may view forms online or use the several batch reports that are available for this purpose.

5. What are the implications of the different system components on managing employee compensation?

    As an integrated component of the Human Resources Administration functionality, the Salary Administration component is designed to help you manage the salary-related functions in your organization. Salary Administration provides you with the resources to track job evaluations, establish merit increase guidelines, perform budgeting analysis, and automate the salary review and performance appraisal processes.

    If you are using Benefits Administration, the Salary Assignment/Changes form (40-SCR) can be used to calculate Benefit Plan coverage amounts for life insurance plans, *health coverage, retirement plans, and other company paid benefits that are included in an employee's total compensation.*

When managing employee compensation, the key function of your Payroll component is to process accurate organizational payrolls so employees are paid correctly and on time. The Payroll component allows you to maintain the payroll cycle, involving such things as timekeeping, compensation, and benefits.

Tracking Employee Relocation Expenses

Apply the Concept

What are the different types of costs associated with relocating employees?

- *Compensation for all costs associated with selling the employee's former residence.*
- *Compensation for all costs associated with the purchase of a new residence.*
- *Compensation for costs associated with house-hunting trips, transportation of the employee and the employee's family to the new location, shipping of household goods, personal belongings, and automobiles to the new location, temporary living arrangements, and storage of goods and belongings in the new area if the new home is not complete at the time of the employee's arrival in the area.*
- *'Grossing up' of compensated costs to allow for payment of taxes that may be imposed against the expense compensation received by the employee.*
- *Bridge loans (also known as equity advance loans) that assist the employee in purchasing a new residence before the sale of the former residence is complete (for example, to enable the employee to make a down payment on the new residence).*
- *Advances of money in anticipation of relocation costs so the employee does not have to pay the expenses.*

Review of Questions Answered

1. What considerations are involved in tracking employee relocation expenses?

   When an employee relocation is complete, the employee's 'relocation account' must be balanced, with actual expenses, advances, and loans considered. Because relocation compensation is part of the overall compensation package and has important tax implications for the individual employee, accurate and thorough recordkeeping is essential.

2. What forms are provided for managing employee relocations?

   - *Relocation Move Definition (34-SCR)*
   - *Relocation Closing Cost Expenses (35CSCR)*
   - *Relocation House Hunting Expenses (35HSCR)*
   - *Relocation Moving Expenses (35MSCR)*
   - *Relocation Shipping Inventory Expenses (35SSCR)*
   - *Relocation Temporary Living Expenses (35TSCR)*
   - *Relocation Cost Summary (35-SCR)*
   - *Relocation Bridge Loan (36-SCR)*

Allocating Property to and Recovering Property from Employees

Apply the Concept

1. What are *perquisites*?

   Perquisites are property or privileges extended to an employee.

2. How is company property allocated and recovered?

   You can allocate and recover property using these forms:

Form Name	***Purpose***
Automobile Information (24-SCR)	*Records company automobiles allocated to the employee.*
Company Personal Property (22-SCR)	*Records company personal property allocated to the employee, such as credit cards or computer equipment.*
Perquisites: Non-Monetary (20-SCR)	*Records non-monetary perquisites allocated to the employee, such as health club memberships or restaurant accounts.*
Separations: Recovery Of Company Property (99-SCR)	*Records that an employee has returned the company property that was allocated to him or her. A summary of sick and vacation hours that remain credited to the employee is also provided.*
Separations: Recovery of Automobiles (98-SCR)	*Records that an employee has returned the company automobile that was allocated to him or her.*
Termination Summary (96RSCR)	*Provides a summary of company property and automobiles that have been allocated to the employee but not yet returned.*

Review of Questions Answered

1. What needs to be considered when allocating property to and recovering property from employees?

   When the employee is terminating or separating from your organization, the Termination Summary form (96RSCR) is used to review the company property and automobiles allocated to the employee that must be returned. It is important to understand that any perquisites that were recorded on the Perquisites: Non-Monetary form (20-SCR) are not displayed on the Termination Summary form (96RSCR). The recovery of company property is then achieved on the Separations: Recovery Of Company Property form (99-SCR) while automobiles are returned on the Separations:

Recovery Of Automobiles form (98-SCR). The recovery of the property and autos can be verified on the Company Personal Property form (22-SCR) and Automobile Information form (16-RPT), which are automatically updated with a 'Date Returned'. This allows you to keep a history of the allocation and recovery. Perquisites are returned (if applicable) by entering the 'Date Returned' on the Perquisites: Non-Monetary form (20-SCR).

2. What reports are available to assist in allocating property to and recovering property from employees?

- *Automobile Information report (16-RPT)—Provides a listing of the organization's automobile-related data as recorded on the Automobile Information form (24-SCR).*
- *Company Personal Property Information report (12-RPT)—Provides information on company property assigned to employees as recorded on the Company Personal Property form (22-SCR).*
- *Monetary Perquisite Information report (3E-RPT)—A Salary Administration report that provides a listing of employees who have received monetary perquisites as recorded on the Perquisites: Monetary form (27-SCR).*
- *Non-Monetary Perquisite Information report (13-RPT)—Provides information on nonmonetary perquisites assigned to employees as recorded on the Perquisites: Non-Monetary form (20-SCR).*

Additional Injury Information form (PROSCR)

The Additional Injury Information form (PROSCR) is used to record additional information related to an initial injury or illness event. The information on this form only relates to OSHA-reportable events. This data supports the requirements of two OSHA forms—Log of Work-Related Injuries and Illnesses (Form 300) and Injury and Illness Incident Report (Form 301).

The Date Recorded represents the injury or illness diagnosis date. Multiple occurrences of an injury or illness are stored by date, by separate incident.

Business Tasks

This form is used to perform the following business task:

- ***Recording additional injury information*** (on page 314)

Glossary of Terms

.EXE
A binary file containing a program in machine language that is ready to be executed.

.INI
A file that contains the parameters (values) used by the .exe file (program).

360-degree appraisal
Appraisals that include evaluations from an employee's managers and supervisors, peers, subordinates, and even customers, clients, and suppliers.

Absence data
Employee-level absence information that is entered on the absences forms.

Absence point
User-defined number that may be assigned for a particular absence and that can be totaled over time to determine if an employee is within the accepted number of absences for a time period.

Absence type
A classification of an employee absence, such as 'jury duty' or 'sick'. Employee absences are recorded by date and absence type.

Account timeout
The period of time that elapses before a user's account becomes invalid because of inactivity.

Accumulator id
A three-position, alphanumeric identifier for a benefits accumulator.

Acrobat
A suite of programs developed by Adobe Systems, Inc. For creating and distributing electronic documents. Programs in the suite allow you to create a portable document format (PDF) file for a document. You can then distribute the PDF file electronically to people who view the document with their freely distributed acrobat reader. People viewing a PDF file (or document) with the Acrobat Reader see the document with the exact layout intended by the author.

Action button
An action button performs an action such as saving the information you entered or telling the system you finished reviewing a page. An action button consists of an icon (or button) accompanied by underlined text (link text). For example, at various places throughout eCyborg Interactive Workforce you may see an action button displaying a check mark accompanied by the underlined text 'save changes'. You can click either the text or the button to save your changes to the page.

Activity code
Describes the clock transaction (ring) activity, such as clock start or meal end.

Activity types
With the time and attendance solution, you can set up the system so that an employee or group of employees may clock in and out for up to eight different activities: clock-in (1), break 1 start (2), break 1 end (3), meal start (4), meal end (5), break 2 start (6), break 2 end (7), and clock end (8).

Actuarial valuation
An examination of a pension plan to determine if contributions are being accumulated at a rate sufficient to pay the promised pensions.

Administration home page
The administration page that displays when a user logs on using his or her administrator user ID and password. The administration page displays links to individual administrator pages (eCyborg Interactive Workforce, Human Resources Administration, Benefits Administration, and Payroll Administration).

Administrative User ID
User ID created by an administrator with the role of eCyborg Interactive Workforce administrator. This ID

differs from the employee user ID generated for the administrator.

Aggregate tax method
Method of calculating taxes in which year-to-date income is used to project annual wages (using prorating), on which taxes are calculated. With this method, the amount of tax withheld can vary from pay period to pay period. This method is useful in preventing a salesperson from being over withheld as the result of fluctuations in commission over various pay periods. It is activated on the payroll solution by selecting aggregate/cumula tax (9) from the Withholding Method (PR09) option list on the Employee Tax Record Maintenance form. It is also referred to as cumulative tax calculation method.

Annualization
Process of calculating the annual amount of pay based on the number of pay periods and pay period amounts. Calculated by multiplying the number of pay periods in the year by the current taxable wages in the pay period.

Annualization factor
The factor that is used to multiply current pay period wages to determine annual wages. For example, a monthly pay frequency has an annualization factor of 12. The Payroll Solution typically calculates income taxes on the basis of annual wages. The annualization factor is entered by selecting an option from the Annualization (PP33) option list on the Company Pay Frequencies form for each pay frequency.

Annuitant
Someone entitled to receive or currently receiving payments from an annuity.

Annuity
A contract providing an income for a specific period of time.

Applicant
A person who is applying for a job or position in your organization. Internal applicants come from within your organization while external applicants come from outside of your organization.

Appraisal rating
A method of ranking the performance of an employee during a given period using options ranging from 1-outstanding to 5-unsatisfactory.

ASCII
American **S**tandard **C**ode for **I**nformation **I**nterchange. The basis of character sets used in almost all present-day computers; US-ASCII uses only seven bits to convey some control codes, space, numbers, most basic punctuation, and unaccented letters a-z and A-Z.

Ask Me wizard
A natural language, full-text search facility within the online help. This allows users to type in a question, the wizard interprets the question, and displays related topics.

As-of reporting
Ability to report on data for a specified date or date range.

Audit record
A snapshot of information entered on a form. Audit records are stored on the employee database and are displayed on audit reports in an is/was reporting format. Adjustments and time entries are stored as audit records and are extracted for a payroll run in which they update the employee's record.

Audit report
A report that is available after the running of a program; it lists created records as well as error messages for records that could not be created.

Audit trail
A report of changes made to your employee database, such as the Payroll Audit Trail (0101) report.

Authorized absence
Absences that are generally considered as paid time away from regularly scheduled work.

Automatic plan
A plan that has been defined with a default option and default pre- or posttax indicator (also known as core/default plan).

Average deferral percentage
Percentage used in nondiscrimination and compliance testing mandated by US law. The calculation is defined as the contribution divided by the compensation.

Average rating
A rating used for performance appraisal systems with categories weighted by relative importance, where the average score reflects the weighted scores.

Back
Takes the user back to the previous page.

Badge
Time and Attendance Administration can be set up to use two different types of badge readers. The type of badge your organization uses, is determined by your third party badge reader software. The two types of badges are magnetic badges and bar code badges.

Badge error
Occurs when a badge is used to create a clock transaction (ring) and an employee has not been assigned to the badge.

Badge number
Up to ten-character ID stored on employee badges and clock transactions (rings) that tie clock transactions (rings) to an employee on the ***Employee Database*** (on page 728).

Banner
Banner forms separate groupings on forms produced from the Federal, State/Local, and Employee Queues.

Batch
A group of transactions submitted to the batch payroll processing system. Also, a collection of time entries that corresponds to an employee group, such as department.

Batch control record
Precedes all transactions separated by group; used to identify the company to which the transactions in that group apply. By entering anticipated totals for dollars and hours on the batch control record, you may verify your totals against those accumulated by the system.

Batch layout facility
A program that produces a segment layout for loading forms via batch. This was formerly known as BATCHL.

Batch number
An alphanumeric field on the batch control record containing a user-defined value used to identify a unique group of time entries or transactions.

Batch processing
A processing method that runs in the background and requires limited intervention.

Benchmark job
A standard or point of reference for determining total job points.

Beneficiary
A person named by the participant in an insurance or pension plan to receive any benefit provided by the plan if the participant dies.

Benefits control number
A four-position, alphanumeric identifier that specifies which tables are accessed for an organization.

Benefits statement
Report that indicates the coverage and cost of each benefits plan in which an employee participates.

Big option list
A large option list that includes a search facility. This was formerly known as a big codeset.

Bridge loan
A loan made to assist a relocated employee in purchasing a new residence before the sale of their old residence is complete.

Browser
Software application used to locate and display web pages. Modern browsers give users access to graphics, text, and multimedia information, including sound and video.

Budget plan year
A twelve-month period over which a salary budget is effective.

Budget scenario
The result of creating one or more salary plans in order to see the effect of different increase policies on the budget.

Budget setting
The process of analyzing and selecting an organization's salary budget for the coming plan year.

Cafeteria plan
A specific type of flexible benefit plan that allows employees to select their benefits from a number of benefit plans. This term may be used interchangeably with flexible benefits plan.

Calculation option list
An option list that contains calculation formula. This was formerly known as a calculation codeset.

Candidate
A person who is applying for a job or position in your organization and is under consideration.

Career planning
Providing career incentives such as advancement and additional education and training for individual employees in order to meet projected organizational needs.

Carrier record
A carrier record supplies information from one application area to another application.

Case-sensitive
A program that distinguishes between uppercase (capital) and lowercase (small) letters. A case-sensitive program that expects you to enter all commands in uppercase will not respond correctly if you enter one or more characters in lowercase.

Catalog
A file (with the extension of .cat) that contains all the information necessary for Impromptu to access and retrieve information from a relational database. The catalog provides a business view of the data, as well as information about what database to access, where the database is stored, and how the tables in the catalog are joined in the datamart.

Category code
General term used to refer to the option selected from category (PP01 and PP02) option lists on the company earnings and company deductions forms. It is used to indicate the type of earning or deduction.

CE/H
Abbreviation for considered earnings/hours.

Change control facility
A facility for updating and comparing your system control repository. This was formerly known as MAINTI/MAINTO.

Check box
A standard windows control that displays a yes/no setting, either checked (yes) or unchecked (no).

Check digit
Unique identifier that is generated by the TBLCHK program and used by the system to check the table relationship records.

Checklist
A list of tasks to be performed in sequence. The checklist displays within the navigator area. Checklists link tasks and other checklists together to perform work flow functions. Users can display a checklist by selecting a checklist icon within the tasks in the navigator.

eCyborg Interactive Workforce specific—a list of tasks/pages generally displayed in a chart with hot spots (links) for the checklist items. The user clicks the link to access the page.

Checklist item
An item appearing within the navigator when a checklist is being displayed. Checklist items include tasks, dialogs and even other checklists.

Checklist item status
Defines the status of a checklist item. These can be:

- Available to perform
- Required
- Not available
- Already completed

Checklist margin
The area of the navigator that displays the checklist item status when a checklist is being displayed.

Checkmark
If in the done column of a eCyborg Interactive Workforce checklist, indicates that an item on a checklist is complete. Can also indicate OK, finished, submit, and so forth.

Class
A class is an occurrence of a course that is specific to a location and a date, that is being administered using Training Administration. For example, 'eCyborg: Using the Web Client′ on Thursday, December 21, in Chicago is a class of the course 'eCyborg: Using the Web Client'.

Class evaluation results
These are the results as entered on the evaluation forms filled out by the class participants upon completion of the class. These results are recorded on the class evaluation results form.

Client data file
File containing information replicated from the System Control Repository. Used by client workstations to improve response time, since editing can be performed locally. May be located on each client workstation or may be located on a server and be shared by multiple client workstations on the network. Formerly known as the Client Control File.

Clock in and out
Also referred to as swipe/swiping the clock. When an employee uses their badge to record an activity time, they must pass their badge through the badge reader. This action can be referred to as clocking in and out.

Clock transaction
Record containing the information needed to create time entries for payroll processing. Clock transaction (ring) information includes date, time, and badge number. A clock transaction (ring) is created when a badge is swiped through a clock.

Clock transaction warning
Occurs when a clock transaction (ring) time falls outside of an employee's schedule warning times.

Closing costs
The costs associated with the purchase of a new house.

CLP
Abbreviation for certificates, licenses, and permits.

Codeset
A list of valid code values and associated descriptions from which you may select an appropriate entry. This is now known as an option list.

Coefficient
Customer-defined value used in the formula to calculate a new salary grade midpoint value.

Combined register (2222) report
A report that provides a detailed printout of all earnings, hours, taxes, and deductions for all the payments and adjustments made on a payroll run. It is Report Generator 2222.

Command button
A standard windows control that initiates a command of sets an option (previously known as push button).

Common tax organization
A method of setting up taxation in an organization in which all necessary tax specification records are contained in a single organization. The common tax organization often handles tax specification records more efficiently, since it avoids duplication of the federal tax records and of any state or local records used by multiple companies.

Communication event
A letter or email that can be triggered automatically or manually within the system. Communication events are set up by the system administrator and usually include data from a form or record.

Compa ratio
The ratio of a given salary compared with the midpoint of the salary range. The formula is the salary divided by the midpoint.

Competency
A requisite capacity to perform a single or set of skills or activities.

Complement limit
A 'complement limit' is the maximum number of complement units that can be assigned to a position at any one time.

Complement position
A 'complement position' is a position that is included in complement control.

Complement unit
A 'complement unit' is the type of unit used to measure the value of a position, for example, headcount, fte or hours.

Compliance
Conformity in fulfilling legal requirements.

Component
The first level of functional organization on the navigator or menu, such as employee resourcing or employee development.

Component icon
An icon that denotes the current component. There are a number of components within the system. Each component appears as an icon on the navigator.

Component plan
Any plan included under the flex master plan or grouped together under a group master.

Condition
Predefined criteria that can be added to a report's filter.

Considered earnings
An employee's paid earnings that are to be accumulated, based on plan rules, for use in determining credited service or calculations of final benefits amounts.

Considered earnings/hours (CE/H) accumulators
Used only in benefits plans to accumulate the earnings and hours an employee has acquired toward eligibility for a deferred plan. Accumulators may be retained on a monthly, quarterly, or annual basis.

Considered hours paid
Actual number of hours for which an employee was paid and that are to be accumulated based on plan rules.

Considered hours worked
Actual number of hours an employee worked. These hours are to be accumulated based on plan rules for use in determining credited service for a plan participant (or for a non-participant if eligibility has been met).

Consolidated reporting
Option that enables packaged reports to be processed for all organizations (consolidated).

Customer-defined value used in the formula to calculate a new salary grade midpoint value.

Context-sensitive help
Information about an object and its current condition. It answers the question 'what is this?'

Contribution type
The type of contribution being made to a benefits plan. The system allows for the deduction and accumulation of up to five different contributions per plan: basic employee pretax, basic employee posttax, supplemental employee pretax, supplemental post-tax, and organization.

Control 1-2
A company or group of employees (now known as an organization).

Control levels
A hierarchy of values used to determine the breakdown of an organization for reporting purposes. The values are user-defined.

Control number
An alphanumeric designation assigned to a table to define the table records that will be used for each organization.

Conversion
A method for transferring data from either a manual or automated system into the system.

Co-ordinator
A coordinator is an instructional institution, organization or person who administers training courses.

Core plan
One of the plans that make up the minimum benefits in which all eligible employees are required to enroll—for

example, medical and life. Employees who fail to return enrollment forms with their benefit choices may be automatically enrolled in the core plans (also known as default plans).

Cost categories

Cost categories are classifications or divisions used to separate costs for training into broad groupings, for example, equipment or operating costs.

Cost types

Cost types are used to further define training costs. For example, the category of equipment could be further broken down into the cost type of overhead projector and monitor rental.

Costing

Projecting the future cost of a benefits plan contribution for budget purposes.

Course

A course is a separate unit of instruction in a subject being administered using the training administration solution. For example, 'eCyborg: Using the Web Client′ is a course. This may be applied to a training course provided internally or externally.

Course directory

A course directory is a list of all available courses.

CPI

Characters **p**er **i**nch

Credited service

The number of years of employment for which an employee is given credit for use in determining final benefits amounts.

Crew

A group of employees who rotate from one schedule assignment (shift) to another, following a rotation pattern.

Crew code

A unique, one-character, alphanumeric identifier of a crew.

Cross-reference keys

Provide direct query access to data within the system database.

CSL

Abbreviation for ***Cyborg Scripting Language*** (on page 725).

Cumulative data

Also called 'to-date data'. includes payroll earning, deduction, net pay, taxable wage, and tax to-date figures for employees.

Cursor

A special symbol, usually a solid rectangle or a blinking underline character, that signifies where the next character will be displayed on the screen. To type in different areas of the screen, you need to move the cursor. You can use the arrow keys or a mouse to move the cursor.

Customer-defined

Values that depend on an organization-specific definition--for example, option list.

CYB88X

An English Language root program used to set the production version switch to on or off, in addition to other automatic settings.

Cyborg Scripting Language

Cyborg's fourth-generation programming language, previously called English Language.

Data extract

Method for extracting information from The Solution Series for the purpose of subsequently loading it into eCyborg Interactive Workforce databases.

Data load

The process of moving data from one system or media to another. It encompasses data mapping, data extraction and conversion, and the actual loading of the data. Also the method of loading data extracted from The Solution Series into eCyborg Interactive Workforce databases using programming scripts.

Data mapping

The process of identifying, comparing, and matching data (field to field) to be converted from one system or media to another.

Database

A collection of information organized so that a computer program can quickly search for and select

specific pieces of data. Think of a database as an electronic filing system.

Datamart
Relational tables with a defined structure that have been designed to automatically accept full datamart extract data seamlessly.

Deduct credits by plan
A method of distributing flexible benefit credits. The total monetary value for credits is prorated based on the employee's pay frequency. Credits are given to employees as earnings added to their pay; the cost of individual employee plans are collected through payroll deductions and listed on the employee's payment stub.

Deduct credits by plan method
A method of distributing flexible benefit credits. Credits are given to employees as earnings added to their pay; the individual employee plan costs are then collected through payroll deductions.

Deduction
An amount subtracted from available net pay. Deductions can be involuntary (child support or maintenance) or voluntary (pension plans).

Deduction cycle
A predetermined schedule for taking voluntary deductions, based on the defined frequency.

De-enrollment
The process of shutting off plan benefits for an employee for reasons other than a separation activity.

Deferred compensation
Any benefit that is not immediately payable to an employee, but is instead deferred to a later date. This term refers to retirement vehicles, including all defined benefit, defined contribution, stock, and thrift/savings plan.

Deferred plan
Any benefits plan in which benefits are not immediately payable to an employee, but are deferred to some later date. This term refers to retirement vehicles, including all defined benefit, defined contribution, stock, and thrift/savings plans.

Delimiter
A character that tells the system where an item of data ends and another starts.

Dependent
An individual who relies or depends on another for his or her support.

Dependent number
A unique number in the eCyborg Interactive Workforce database that identifies an employee's spouse and his or her other dependents.

Detail page
A page in eCyborg Interactive Workforce that displays detailed information. Summary pages contain links to the detail for each record.

Dialog box
A secondary window that appears on the screen to present information or request input. Dialog boxes are generally temporary—they disappear after you enter the requested information.

Disability insurance tax
A tax required by some us states to be funded by employee-paid contributions to pay all or part of the cost of disability insurance coverage. On the Payroll Solution, us state disability insurance tax records are established as Type 4 taxes.

Disciplinary action
Action taken against an employee for violation of an organization policy or procedure.

Discretionary increase
A salary increase amount or percentage determined by a manager according to the guidelines established by the organization.

Display
Make data or images display on a computer monitor.

Display box
An area on a form in which data is displayed (formally known as an inquiry field).

Disposable income
For garnishment purposes in the us, an employee's earnings minus deductions required by state or federal law.

Distributed location
A customer location where data changes are replicated and may be distributed. A DL is identified to the system by a unique 5-position alphanumeric node ID.

Distribution
The process of passing data from a source DL to one or more target DLs.

Distribution rules
A set of parameters that determine how data will be distributed from one DL to another. These are defined at each DL by the owner using the distribution rules screens. Distribution rules are stored in tables that are not replicated (thus, they cannot be distributed).

DL
Abbreviation for ***distributed location*** (on page 727).

Double-click
Click a mouse button twice in rapid succession.

Drop-down list
A drop-down list is a view of the acceptable entry options available for a text box.

Drop-down list box
A standard windows control that displays a current setting but can be opened to display a list of choices. The user selects a choice by double clicking on the choice. The user can type into the field, and the system moves the list of choices to the last letter typed.

Dynamic SQL
Statements created by a program that must be interpreted and converted to executable sql statements at run time.

Earned income credit
A refundable amount that reduces the tax owed by certain low-income individuals in the us who meet adjusted gross income levels.

Earning
Money paid in return for work performed or services rendered. In Payroll Administration, earnings are separated by earning numbers into various categories such as regular pay, overtime pay, shift pay, bonuses, and so forth.

Earnings category
Used to categorize similar earnings. For example, all the overtime earnings can be grouped into category 01, all the shift differentials/premiums into category 06, and so forth.

EBCDIC
Extended **B**inary **C**oded **D**ecimal **I**nterchange **C**ode; binary code for alphabetic and numeric characters developed by IBM for its computers.

eCyborg Interactive Workforce Home
Button on every page that returns the user to the eCyborg Interactive Workforce Home Page.

eCyborg Interactive Workforce Home page
Home page that displays each time employees log on to eCyborg Interactive Workforce after completing the new user tasks on the New User Home page.

Effective date
Date on which an event takes place, for example, an enrollment or benefits plan change.

EIC
Abbrevation for ***earned income credit*** (on page 727).

EL
Abbreviation for English Language, now called CSL (Cyborg Scripting Language).

Electronic Performance Support system
Online tools that help users perform their job quickly and efficiently. EPSS can include online help, computer-based training (CBT), electronic manuals, wizards, and so on.

Email
Literally 'electronic mail'. This is a message that is sent to one or more people within or outside of your organization by an automated email software package.

Employee cancellation
An employee cancellation occurs when an employee is canceled from attending a training class or training program.

Employee Database
The file that contains organization and employee records. This is File02. It was formerly known as the Master File.

Employee Database record
The complete record for an employee. It may be composed of multiple physical records.

English Language
Former name of Cyborg's fourth-generation programming language, now called Cyborg Scripting Language.

Enrollment form
A customer-defined form used by employees to record their benefits elections and any associated dependent and/or beneficiary information.

Entitlement accrual
An accumulation of hours for an employee benefit, such as sick leave or vacation time, commonly known as an accrual.

Entity
Each Organization Unit, Job, Position, and Incumbent is an entity. Together they are entities.

Entry field
An area on a screen or browser page where the user can input information.

Entry form
An entry form is a form used to enter data.

Environment
The host platform and workstations where your Cyborg system resides, and any communication protocols. Also, a work space dedicated to a specific processing type. For example: development, test, and production.

EPSS
Abbreviation for ***Electronic Performance Support system*** (on page 727).

Establishment Reporting
Establishment Reporting occurs when an employer with several business locations chooses to file wage reports, broken down by location or unit, to the Social Security Administration. Each unit is identified by a four-character code, called an Establishment Number. The employer obtains approval from the SSA to use Establishment Reporting. Establishment Reporting does not apply to 1099s.

Event
The combination of a trigger (changes made to system data) and an action (the creation of an email or letter). Events always consist of these two component halves.

Excused absence
Absences from regularly scheduled work that can be considered as either paid or unpaid time off.

Extract file
A data file generated to be used by another system or application.

Federal Insurance Contributions Act
The United States Federal Insurance Contributions Act imposes two taxes on both employers and employees. Tax is withheld from an employee's wages to finance the Old-Age, Survivor's, and Disability Insurance (OASDI) social security program and the Hospital Insurance (HI) medicare program. Employers are then required to match the amounts withheld from employees. On the Payroll Solution, employee information for FICA-OASDI social security tax is entered on tax record 101 and FICA-HI Medicare tax on tax record 103.

FICA
Abbreviation for Federal Insurance Contributions Act.

Field
A data item on the database. This is usually displayed on a form as a text box.

eCyborg Interactive Workforce specific—A space allocated for a particular item of information. A tax form, for example, contains a number of fields: one for your name, one for your Social Security number, one for your income, and so on. Every field has a name (also called a field label).

Filter
Device used by report to select certain rows of information from the database, thus limiting the amount of data from the database to be viewed in the report.

Finished
Users click Finished when they have completed all information on a checklist or other *ESS* page.

Flat rate tax
A US local tax that is calculated as a standard percentage rate and that is calculated in the same way for all employees (that is, factors such as marital status do not enter into the calculation). For many such local taxes, Cyborg does not provide tax specification information on the Tax Authority File. Instead, you need to enter a Tax Specification Record for the tax on a Tax Specification Information form, indicating the tax rate in the Flat Rate text box.

Flex credits
Units granted to an employee in order to purchase benefits under a Flexible Benefits Program.

Flex Master Plan
Defines your Flexible Benefits Program and ties component plans together as a group. Employees are enrolled in the Master Plan and then select the benefit plans in which they wish to participate—for example, medical, dental, and life. Flex master plans are set up in Benefits Administration and used by eCyborg Interactive Benefits to display benefit plans to users for initial and open enrollment.

Flex plan
A benefit plan where, in addition to a core of basic benefits (if applicable), the organization/company allocates to each employee a credit for purchasing additional benefits tailored to their individual needs. Flexible benefit plans may include a flexible spending account.

Flexible Benefits Plan
A specific type of benefit plan that allows employees to select their benefits from a number of benefit plans. This term may be used interchangeably with cafeteria plan.

Flexible Benefits Program
A benefits program in which an organization may allocate to each employee a pool of credits or a monetary amount that is to be used to purchase benefits tailored to individual needs.

Flexible Spending Arrangement
A benefits welfare plan set up as an account in an employee's name that is used to reimburse the employee for certain personal expenses. In the United States, these accounts are provided by employers as a way for employees to pre-fund dependent care, legal services, or medical expenses with pretax currency.

Folder
Logical organization device for the content of a Cognos catalog.

Form
A window of information that appears within The Solution Series, including text boxes and other controls. This was formerly known as a screen.

Form area
An area of the window that contains a form.

Form Builder
A tool provided by Cyborg Systems for use with The Solution Series for designing forms.

Formal education
Education that is obtained from a college or university.

Forward
Displays the next page.

FSA
Abbreviation for Flexible Spending Arrangement.

FTE
Abbreviation for Full Time Equivalent.

FTP
File **T**ransfer **P**rotocol. A means of allowing a user on one computer to transfer files to and from another computer over a network

Full Time Equivalent
The ratio of total working time to the time that represents full time employment for a single employee. For example, an FTE of 0.5 means working half of the time that represents full time employment.

Funeral days
Absences from regularly scheduled work due to a funeral, which at the discretion of the organization, can

be considered as authorized or unauthorized, paid or unpaid time off.

Gap analysis
Comparison of a current state of being with a desired state of being. For example, you could perform a skill or competency gap analysis on individual employees or on the workforce as a whole, comparing the existing state of skills and competencies with the required state or level of skills and competencies.

Garnishment
A legal procedure authorizing a deduction from an employee's earnings to satisfy a legal requirement.

General ledger interface
A file that provides a balanced payroll journal for the period. This file contains journal entries for labor expenses, withheld deductions, income, disability, UI, and other withheld taxes, net pay, and company-paid taxes. The interface may also be produced on paper.

Go to details
Displays a new page with detailed information. Used on summary pages.

Graphical User Interface
The Solution Series provides integrated human resource and payroll functionality via the Microsoft Windows Graphical User Interface. These are the elements that display on your screen.

Grievance
A formal complaint made by an employee against the organization usually because of an unsatisfactory working condition or other work-related dispute.

Gross wages
The total of all earnings paid to an employee.

It is stored in the Total Pay (field 119 of the US Tax Authority File) field of the employee's US FICA tax record 101 (FICA-OASDI). This figure appears on the Combined Register (2222) report as Total Pay. It does not appear on US W-2 forms.

Group box
A standard Windows control that groups a set of controls.

Group plan
Defines any number of benefit plans tied together as a group. Group plans are used to define common eligibility and to cluster plans for reporting purposes.

GUI
Abbreviation for Graphical User Interface.

Handicap
Having a physical or mental disability that substantially limits activities especially in relation to employment or education.

Health and safety profile
Data on the employee record that includes information such as the employee's blood type, language, physician, emergency contacts, and any disabilities.

HED
Acronym for Hours, Earnings, and Deductions. Each earning or deduction must be established in The Solution Series with a unique identifying three-digit code. HEDs are used to record pay, hours worked, and deduction amounts and arrears for each employee.

Help
Hot spot on an eCyborg Interactive Workforce page that displays step-by-step directions for completing the page.

History record
Part of an employee's payment history; a snapshot of a check paid to an employee or an adjustment made to an HED or tax.

Holiday days
The time off that all employees are entitled to based on the decision of the organization or government regulation.

Home page
The main page of a Web site that generally serves as an index or table of contents to other documents stored as pages on the site.

HTML
Abbreviation for **HyperText Markup Language,** the authoring language used to create documents on the World Wide Web. HTML defines the structure and layout of a Web document by using a variety of tags and attributes.

Import facility
A tool delivered with The Solution Series that moves data from an external source to any organization or employee form.

Import record
A line in a spreadsheet or delimited file that contains employee or company data.

Inactive plan
A benefits plan that no longer allows employee enrollment.

Inactive tax record
An employee tax record that is no longer in effect for a given employee. Neither wages nor taxes are accumulated for the particular tax record. However, any wages and/or taxes already accumulated remain until clearing is performed. Such clearing is usually performed in preparing the Employee Database for a new year. The inactive records can be deleted at this time. The process of making a tax inactive is called deactivating.

Incumbent
An incumbent is an employee linked with a specific position. The linking of an employee with a Position is an incumbency. An employee may be linked to more than one position; in other words, an employee with multiple incumbencies. A position to which more than one employee is linked has multiple incumbents.

Information-level security
These records grant access to employee and table data via specific password records.

Initial Administrator
Only user whose user ID and password are created during installation. The initial administrator always has authority to all administrative functions: eCyborg Interactive Workforce, Human Resources Administration, Benefits Administration, and Payroll Administration, and can assign administrative roles to others by creating administrative user IDs and passwords.

Initial passwords
Password generated by eCyborg Interactive Workforce for each user ID extracted from The Solution Series. Users must create a user-defined password when they log on to eCyborg Interactive Workforce for the first time.

InitialAdmin
See Initial Administrator.

Inquiry form
A inquiry form is a form used to view data already entered.

Instructional text
Any paragraph(s) on the page that explain the function of the page or fields to the user.

Internal candidate
An employee of your organization who is applying for another job or position in your organization.

Internet
A global network connecting millions of computers.

Intranet
A network belonging to an organization, usually a corporation accessible only by the organization's members, employees, or others with authorization and used to share information.

Investment funds
Different options or accounts available to employees for allocating their contributions, usually applicable to thrift/savings plans.

IPEDS
Integrated Postsecondary Education Data System.

Job assignment
A job associated with a particular employee.

Job code
A designation for a job assignment.

Job streams
A generic reference, Job Control Language, for your operating system's command language.

Alternately: Jobstreams

Job type
A generic category that further defines a particular job.

Jury duty
This is compulsory service on court appointed juries. Employers are required by law to excuse jury duty

related absences. They are not, however, required by law to pay the employee during this time away from the job.

Label
Text that describes the information the user enters into the field.

Labor record
A record containing the hours, amounts, associated charge-to control levels, and function assigned on the employee's Payroll Home Location/Pay Allocations form.

Leave of absence
Occurs when an employee leaves the organization for a period of time, usually temporary, for personal reasons such as medical leave.

Log off
Logs the user off the system. When referring to the Log Off button, use initial caps.

Logical Employee Model
A collection of default employee information that is used to create a model. Logical Employee Model templates are used when hiring new employees to save time and ensure that critical information is established consistently and correctly. These were formally known as LMODELs.

LPI
Lines **p**er **i**nch

Mailing address
An address, other than your legal residence address, to which you have your mail sent.

Maintenance payroll run
A maintenance payroll run automatically updates organization and employee records, but it does not process time entries or generate payments, pay slips, or deposit advices. It is also used to create payment history records.

Major activity
Event that causes a change in an employee's employment status, such as a new hire, termination, or rehire.

Mandatory field
A field that requires the user to enter information before the user can exit the screen or page.

Map file
Stores the predefined relationships between an import file and a form.

Mass time entry creation
Creating time entries for a group of employees through one program execution, such as for a paid holiday.

Master File (0202) report
A Cyborg report that produces a formatted display of the data in an employee's current batch Employee Database record. This includes the wages and taxes accumulated for the employee, covering current, month-to-date, quarter-to-date, and year-to-date information for individual tax codes. It is report generator 0202.

Matrix ID
Unique identifier for each pay-for-performance matrix.

Menu
A list of choices; the choices are generally links that take the user to another screen or page.

Menu bar item
A menu that appears on the menu bar.

Message area
An area of the window that contains messages or selection lists relevant to the current form. The Message Area can be turned on or off.

Method code
One of many specific routines (usually delivered by Cyborg and identified by a two-character code) used to calculate earnings and deductions.

Midpoint
The middle of the span of currency from the minimum to the maximum of the employee salary grade.

Minimart
Relational tables you create so you can insert data from your Subset data extractions.

Monetary perquisites
A privilege or profit that an employee is entitled to that is incidental to regular wages or salary.

Moving expenses
The expenses incurred by an employee due to moving from one location to another for employment purposes.

Multiple master
A file compression technique that duplicates the current employee Permanent Master Record as many times as there are payments to that employee during one pay period. These multiple masters are detail records reflecting the amounts for the payment being made (current), and the adjusted MTD, QTD, and YTD totals. The system uses multiple master records to create history records showing the current payment figures only.

Navigation bar
In eCyborg Interactive Workforce the Navigation bar shows the name of the page you are using, for example, 'Mailing Address'. The top line of the Navigation bar shows the path you took from the Home page to reach the present page. Links on the Navigation bar let you return to the home page or log off the system.

Navigator
Left pane of the work area which forms the main method of moving through the forms. From the Navigator users select the component, process, and task in which they are interested.

Net credit method
A method allocating flex credits. An employee's cost of benefits is calculated as either a net cash earning or a net deduction from the employee's pay. The net amount is the difference, either plus or minus, between the credits allocated to the employee and the cost of his or her flex benefits choices.

New hire
Process of hiring a new employee for your organization.

New user
A user of eCyborg Interactive Workforce who has not yet completed reviewing and updating their personal information on the New User Home page.

New User Home page
Home page that displays for new users of eCyborg Interactive Workforce until they complete reviewing and updating their personal information.

Node
A Distributed Location.

Node ID
A unique 5-position identifier for a node. The naming convention is defined by the user.

Number registered
This is the number of employees registered for a training class. It is updated and displayed on the Class Schedule form.

Object
Each System Control Repository record type is assigned an object code. A single record type can have several object codes assigned to allow limited display.

Object key
A field that allows you to specify the System Control Repository record group you want to display. The value of this field is dependent on the type of information you want to display.

Obsolete plan
A benefits plan that will no longer be used.

Off cycle
An off-cycle payroll run is an additional payroll for the period just completed. An off-cycle payroll run is commonly used to process nonstandard payments, such as bonuses. It is sometimes referred to as an additional or bonus payroll run.

Online
Turned on and connected, for example, printers are on-line when they are ready to receive data from the computer. Users are considered on-line when they are connected to a computer service through a modem. That is, they are actually on the line.

Open enrollment
A period of time during which employees can enroll in or change their benefit choices for the upcoming year, generally in October or November.

Operator ID
A four-character code that identifies the user to the system.

Option
An item in the option list for a field. This was formerly known as a codeset item.

eCyborg Interactive Benefits and Benefits Administration specific—In Benefits, the plan coverage that an employee selects, such as single or family coverage.

Option button
A standard Windows control that allows you to select from a fixed set of mutually exclusive options (previously known as radio button).

Option list
An option list is a list of options that are available within a Text box. This was formerly known as a Codeset.

eCyborg Interactive Workforce specific—Options available in The Solution Series that the eCyborg Interactive Workforce administrator loads in to eCyborg Interactive Workforce. The options are then available in the drop-down list boxes in eCyborg Interactive Workforce.

Organization
A group of employees who are employed in a common structure, governed by the same set of rules or policies, and eligible for the same earnings and deductions For example, your organization may be structured into parts that represent employee groups such as active, union, retirees, applicants, and so forth.

Formerly known as a company or Control 1-2.

Organization Level 3
A customer-defined value used to determine the breakdown of an Organization for Human Resource reporting or selection purposes. This control level may be translated to a division, plant site, section, and so forth, as defined by you.

Organization Level 4
A customer-defined value used to determine the breakdown of an Organization for Human Resource reporting or selection purposes. This control level may be translated to a division, plant site, section, and so on, as defined by you.

Organization Level 5
A customer-defined value used to determine the breakdown of an Organization for Human Resource reporting or selection purposes. This control level may be translated to a division, plant site, section, and so on, as defined by you.

Organization Level 6
A customer-defined value used to determine the breakdown of an Organization for Human Resource reporting or selection purposes. This control level may be translated to a division, plant site, section, and so on, as defined by you.

Organization Number
A six-character user-defined code that represents an organization; the highest level of the organizational structure in Payroll Administration.

Formerly known as a Control 1-2.

Organization Unit
An organization unit ('Org Unit') is a grouping of Positions within an organization (for example, Accounts Department).

Organization Validation table
A table that validates that an organization is valid and payments can be made.

Organization-specific tax setup
A method of implementing Tax Specification Records in which each organization involved in tax processing contains all the specification records required to process taxes for its employees, as opposed to a common tax organization.

Override file
A file used to maintain COBOL or Report Generator changes to the system.

Packaged reporting
A processing mode in which a job is scheduled to be run at a certain time.

Paid absence
Employee absence that will be paid by the organization. A time entry will be created for this absence.

Parallel run
The process of executing the same programs simultaneously on two separate systems to obtain the same or similar results.

Parameter form
A form that is displayed when certain programs are called from the Navigator or menus. The form facilitates entering parameters for the program.

Password
A secret series of characters, generally user defined, that enables you to access a computer, a software application, or a file. On multi-user systems, each user must enter his or her password before the computer will respond to commands.

In eCyborg Interactive Workforce, the password ensures that unauthorized users cannot access user-specific information.

Password aging
The period of time that elapses before a user-defined password expires and the user must change his or her password.

Pay allocation
A means of allocating, on a percentage basis, employee labor hours and amounts to multiple sets of control levels 3 through 6 and function to accurately reflect employees whose labor must be charged to more than one area within an organization.

Pay document
A pay slip or deposit advice with its associated pay stub.

Pay frequency
The interval at which a group of employees is paid. Examples are weekly and semimonthly. Also referred to as a payroll period.

Pay schedule
A predetermined schedule for a calendar year, identifying period-end and payment dates for each pay frequency.

Pay stub
A preprinted form, corresponding to a check or deposit advice that lists all earning, gross pay, taxes, deduction, and net pay information for an employee.

Pay-for-performance matrix
Chart representation of the variables that result from the combination of salary increase information, how much to give and when.

Payment history record
A record documenting the detail information for a payment or adjustment. Multiple payment history records may be generated for an employee, reflecting multiple adjustments or payments. These records include all earning, deduction, and tax information included in the payment or adjustment.

Payroll home location
The location where the employee is normally assigned to work and where labor distribution information is charged. An employee's home location comprises specific Payroll Levels and is always assigned Allocation Number 01 on the Payroll Home Location/Pay Allocations form. The Function field may also be used as part of a home location, depending on your specific requirements.

Payroll Level 3
A customer-defined value used to determine the breakdown of an organization for Payroll reporting or selection purposes. This control level may be translated to a division, plant site, section, and so forth, as defined by you.

Payroll Level 4
A customer-defined value used to determine the breakdown of an organization for Payroll reporting or selection purposes. This control level may be translated to a division, plant site, section, and so on, as defined by you.

Payroll Level 5
A customer-defined value used to determine the breakdown of an organization for Payroll reporting or selection purposes. This control level may be translated to a division, plant site, section, and so on, as defined by you.

Payroll Level 6
A customer-defined value used to determine the breakdown of an organization for Payroll reporting or selection purposes. This control level may be translated to a division, plant site, section, and so on, as defined by you.

Payroll period
A defined period of time for which an employer pays wages to employees.

Payroll Process Control
A series of forms used during the Payroll Process to determine the type of run (payroll run or maintenance run). Allows you to specify the pay frequencies to be paid and which reports are to be produced.

Payroll run
Updates organization and employee records, processes time entries, calculates employee pay, generates pay documents and payroll reports, including the Combined Register. It also produces a variety of special interface outputs.

PCL
Printer **C**ontrol **L**anguage

PDF
A file format that captures formatting information from a variety of desktop publishing applications, making it possible to have formatted documents appear on the screen and be printed. To view a file in PDF format, you need Adobe Acrobat Reader, a free application distributed by Adobe Systems.

Peer-group appraisal
Appraisal that uses performance evaluations completed by an individual employee's co-workers or project team members.

Pending de-enrollment segment
Plans for which an employee is enrolled, but has lost eligibility, as listed on the Pending Plan Enrollment/De-Enrollment form.

Pending eligibility segment
Plans for which an employee is eligible but not enrolled, as listed on the Pending Plan Enrollment/De-Enrollment form.

Performance appraisal
A periodic assessment and ranking of an employee's skills and accomplishments.

Performance appraisal rating
A method of ranking the performance of an employee during a given period using options ranging from 1-Outstanding to 5-Unsatisfactory.

Performance rating
A method of ranking the performance of an employee during a given period using options ranging from 1-Outstanding to 5-Unsatisfactory.

Performance-related pay
Monetary payments made to employees based on how well an employee has fulfilled job expectations.

Perquisites
Property or privileges extended to an employee.

Personal days
Authorized absences that are generally considered as paid time away from regularly scheduled work, but can be either paid or unpaid.

Phonetic keys
The keys you use to access employee data using the phonetic spelling of an employee's last name.

Pixel
The smallest rectangular area of an image on a screen.

Plan deactivation
A process that makes a plan inactive and prevents future employee enrollment.

Plan ID
A three-position, alphanumeric identifier for a plan in the system.

Plan shutdown
The process of de-enrolling an employee from all benefits plans because of a separation activity.

Plan year
The 12-month period over which a salary budget is effective.

eCyborg Interactive Workforce specific—The calendar, policy, or fiscal year in which the records of a Benefits plan are maintained.

Policy tables
Highest level tables that are used to record the generic (or master) rules for an organization or group of employees. These included your organization's rules relating to working time procedures, such as clocking in and out, docking for lateness, and overtime. Each

policy consists of a Policy Master table and one or more Policy Activities table.

Pop-up menu

A menu that appears when you use the second mouse button within the system. This menu contains context sensitive commands and options that relate to the object you have clicked on.

Portable document format

See PDF.

Position

A specific role with an organization—for example, Accounts Manager.

Alternative definition: to place an object in a specified location.

Position Administration Control Number

Two-character alphanumeric value that tells Position Administration which tables to use for a specific company.

Position complement

A 'Position complement' is the value of a Position. The organization complement is the total value of all Positions included in the complement.

Position in range

The difference between a given salary and the minimum of the salary range, divided by the difference between the range's maximum and minimum, and expressed as a percentage.

Posttax

A contribution made after taxes have been withheld from earnings.

Premium

The amount of money an organization agrees to pay an insurance company for a policy or annuity, or the amount contributed by an employee to the employer to cover the employee's portion of the total premium.

Prenotification

Informing a bank or credit union that an employee will be using direct deposit with them in the future. Cyborg recommends that you fill out the Direct Deposit Information form two pay periods in advance of the first deposit date. This ensures that a prenotification record is provided to the bank or credit union in a timely manner.

Pretax

A contribution made before taxes have been withheld from earnings.

Primary account

The account set up in eCyborg Interactive Workforce to receive an employee's pay or reimbursement checks. After deductions and deposits to additional (secondary) accounts, the remainder of pay is deposited into the primary account.

Process

A subset of a component that logically groups tasks on the Navigator or menu. For example, the process 'Maintain Employee Details' contains tasks such as 'Basic Employee Information' and 'Personal Information'.

Alternate definition: An action that brings about a result.

Process bar

The graphical representation of a process on the navigator. Each process bar is within a Component.

Program

A program is a series of classes being administered using Training Administration. For example, 'The Cyborg Training Schedule for January-June 1996' may be a program consisting of eight different classes.

Alternative definition: a form or other program within the system, accessed directly from the Command dialog box. For example, form EF-SCR is a program.

Protected amount

The amount of disposable income protected from garnishment in the US This amount may vary from state to state.

Prototype HED

An HED defined on a benefits form for use in recording employee/organization contributions when an employee is enrolled in a benefits plan. This allows the setup and maintenance of payroll deductions using Benefits Administration.

Provider
A provider is an instructional institution, organization, or person who is available to teach training courses.

Push button
A button on the interface which appears depressed when clicked on (now known as command button).

Quartile
Points that represent the division of a salary grade range into four equal parts.

Query alternate keys
The keys you use to access the employee master record in an order other than by primary key.

Query primary keys
The keys you use to direct your QUERY program to a record type.

Quick Hire
The process of hiring an employee by entering one two-panel form with the required data elements rather than entering a series of forms.

Radio button
A button on a form that selects an option, the radio buttons that make a field are mutually exclusive (now known as an option button).

Recall
Return a laid-off employee to active status, usually with no affect to benefits.

Reciprocal taxation
Reciprocal tax withholding refers to agreements made between US states and (or) localities regarding income tax calculation and reporting for compensation paid to an employee who lives in one state or locality and works in another.

Record
A complete set of fields, such as the fields that make up a tax form or a name and address record.

Alternate definition: To set down for preservation in writing or other permanent form.

Recruitment
Process of finding and hiring new employees who meet the needs of your organization.

Recycle File
P05IN; A file that contains employee data and pay document information required for payment reconciliation. It also contains time entries to be processed and paid at a later date. This file is used to pass data to the next payroll or maintenance run.

Registration
Registration is the act of enrolling an employee in a class.

Registration number
A three-digit registration number is assigned to employees for tracking purposes when they register for a training class. This enables the order in which the employees registered to be viewed.

Rehire
The process of hiring a former employee of your organization. Typically, a break in service is incurred and benefits must start over (usually requiring a new adjusted seniority date if used in benefits tracking).

Reimbursement account
The account into which employee's travel and other expense type reimbursement checks are directly deposited.

Reinstatement
The process of returning a former employee to active status within a certain time period (such as 90 days), thus qualifying the employee to have certain benefits restored to the original hire date.

Reject time
The point at which an error condition will occur. An error condition must be manually corrected/approved and approved before a time entry can be generated by the system.

Relocation
The process of moving an employee from one organization to another geographic location, whether the move be domestic or international. This process also applies to applicants who are being relocated as part of the hire process.

Remaining net pay
The 'bucket' of money that is left after all employee deductions and taxes have been taken from the employee's gross pay. This 'bucket' of money can then be used for multiple deposits if the enterprise sets up multiple deposit HEDs.

Replication
The automatic process of writing changes made in the Employee Database and option lists and tables in the System Control Repository to the Replication Holding File (FILE08).

Replication Application
English Language program (DSAPLY) that reads records from the Replication Packet File (FILE20) produced by the Replication Reception program (DSRECV) and updates the System Control Repository and Employee Database accordingly.

Replication Distribution
Two COBOL programs that work together to distribute and receive updates. The Replication Distribution Program (DSTRIB reads either the Replication Holding File (FILE08) or a Replication Packet File (FILE20), selects data applicable to a specific DL and writes all necessary data to a new output-only Replication Packet File (FILE21). The resulting FILE21 will be processed on the remote DL via the DSRECV Replication Reception program.

Replication Holding File
FILE08. This file contains additions, changes, and deletions to the System Control and the Employee Database. Data is distributed from and written to this file, based on the data distribution rules configured for the target DL by the source DL.

Replication Packet File
(FILE21/20). This file contains data changes and is created specifically to update a target DL. This information may include Company/Employee data, tables and option lists, and time entry and adjustment records.

Report
The term report refers to a report produced on paper.

Report Generator
A program that produces the batch payroll and the batch payroll reports.

Report Group
A series of packaged reports that are created using the Report Group Activities form and are run together.

Report Group Scheduler
This is the program that allows you to schedule reports. This was formerly known as the Report Scheduler.

Report parameters
Specific guidelines for determining the information to be processed by a given report or program.

Requisition
A formal request to fill a vacancy or vacancies.

Requisition candidate
A candidate for a vacancy represented on a requisition.

Requisition limit
A total unit value of a requisition.

Requisition unit
The value of a requisition expressed as an FTE, hours, salary or headcount.

Retirement
Occurs when an employee retires from the organization.

Return
The activity of an employee returning as an employee to active status, usually following a leave of absence.

Alternative definition: key on keyboard used to perform a carriage return, can also be known as Enter.

Review process
A method used by an organization to evaluate an employee's salary or performance in a standard, timely manner.

Roll-up reporting
Option that enables packaged reports to be processed within organizations (roll-up).

Rotation pattern
A way of describing the working pattern for a group of employees (crew) who regularly work different shifts.

A crew is a group of employees who together regularly work the same schedules according to a rotation pattern.

Safety standards

Legally-mandated workplace safety standards.

Salary budget record

Defines, for each employee, the budgeted increase amount, percentage, and effective date for a specific salary plan year, and the prorated effect of this increase on the budget in terms of amounts and percentages for each employee.

Salary grade

A range of salary amounts associated with a particular job.

Salary grade range

A range of salary amounts associated with the salary grade for a particular job.

Salary plan

A set of rules or guidelines used to budget for salary increases for the coming year.

Salary plan year

A 12-month period over which a salary plan is effective.

Salary range

The span of salary amounts from the minimum to the maximum of the employee salary grade.

Salary review

A periodic evaluation of an employee's compensation.

Salary review authorization form

Hard copy format of the employee criteria necessary to review and approve proposed salary increases.

SAT file

The Solution Series form appearance table. Simple text file that reflects the form's layout.

Save Changes

Saves the page (form) the user completed. (When you click 'Save Changes', eCyborg Interactive Workforce saves the information on the page whether or not the user made changes.)

Schedule Activities table

Identifies activity types for each point in a work day where the process of clocking in and out should be dealt with. Each Schedule activity also contains time parameters that will be used to calculate whether an employee will be docked or credited time.

Schedule assignments

Also referred to as a schedule. This term refers to the details of the Schedule Master tables to which an employee is assigned. These details include the date the assignment took place, the Schedule Number and Sub-Schedule Number, and (if applicable), the crew to which the employee is assigned.

Schedule error

Occurs when a clock transaction (ring) time falls outside of an employee's schedule reject times.

Schedule Master table

Used to set up your organization's Time and attendance rules (such as HEDs and the minimum number of hours an employee must work before a meal deduction is made). A Schedule Master table is associated with a Calendar Routine, earnings Code, and Shift Premium table by entering the appropriate identifier.

Schedule number

A unique three-character alphanumeric identifier used to partially identify a schedule table.

Screen

Now known as a form.

Scroll bar

When information on a page takes up more than one screen of your monitor, the system adds scroll bars to the right side of the screen. On the scroll bar:

- Click the up arrow to move line by line to the top of the page
- Click the down arrow to move line by line to move to the bottom of the page
- Click the double arrows to move several lines up or down the page

Click and drag the bar in the scroll area to manually move up or down the page.

Search argument
The value from an employee's master record used to search benefits tables to apply plan rules to specific groups of employees.

Search type
The definition of a field from an employee's master record to use as the search argument.

Secondary account(s)
Additional account or accounts at financial institutions that employees set up in eCyborg Interactive Workforce receive a portion of their pay. A primary account must be defined before an employee can set up additional accounts.

Security Officer
The assigned employee who is responsible for the setting up and monitoring of the security your Cyborg system.

Self-adjusting taxes
Taxes for which the system automatically recalculates the tax on a cumulative year-to-date basis on each payroll run.

In the U. S. these include FICA taxes: Social Security (tax record 101) and Medicare (tax record 103). The purpose of this calculation is to avoid any differences (of pennies) in FICA tax paid versus FICA tax due at year-end due to rounding on a pay period basis. In addition, certain state disability taxes and employee-paid state unemployment insurance taxes also self-adjust.

Sequential Master File
P20IN; The batch processing version of the Employee Database. This file contains organization and employee data, tax tables, and the object code for programs.

Service interruption
A period of time during which an employee did not maintain an active working status in the organization.

Service method
A calculation option list that determines the method for calculating credited service.

Session
When users log onto a software application, they begin a session. When they log off, they end the session.

Alternate definition: The period of time during which a class is held.

Shift
An employee schedule assignment for a given day. For a rotation pattern, this is a Sub-Schedule Number.

Alternative definition: key on keyboard, typically used to describe key combinations for a shortcut key.

Shift premium
A premium (or differential) added to an employee's regular earnings, overtime earnings, or both. It is represented by a shift code or HED Number.

Shortcut menu
A menu that appears when you right-click within The Solution Series 4. This menu contains context-sensitive commands and options that relate to the object (form, Navigator, and so on) on which you have clicked.

Sick days
The time off that an employee is allowed to take due to illness as a result of an employment contract or organizational policy.

Solution View
An online utility that provides the tools for creating new forms, fields, and report programs without the direct use of Cyborg Scripting Language.

Source DL
The node that owns the data being distributed. Depending on the rules established, the same DL can alternate from source to target.

Special assessment
Extraordinary or temporary taxes, such as additional employer-paid or employee-paid contributions to state unemployment programs or to mandatory health insurance programs.

Spinbox
A control on the interface composed of a text box and increment and decrement buttons that allow you to adjust a value from a limited range of possible values.

Spreadsheet application
Software for recording ledger entries, creating worksheets, graphing data, and other accounting functions.

Standalone Time and Attendance
Customers who are using the Cyborg's Time and Attendance Administration but not the Cyborg's Payroll Administration.

Static data
Includes organization and employee information, such as name and salary.

Static SQL
Data Definition Language (DDL) and Data Manipulation Language (DML) statements embedded in application programs.

Status bar
The bar that appears at the bottom of The Solution Series window. The Status Bar displays useful information, such as your current session number, the currently displayed organization and employee, and so forth.

Statutory employee
Any of the four categories of workers who are independent contractors under common law and are treated by statute as employees. These include:
(1) a driver who distributes beverages (other than milk) or meat, vegetables, fruits, or bakery products; or who picks up or delivers laundry or dry cleaning, if the driver is your agent or is paid by commission.
(2) certain types of full-time insurance sales reps
(3) an individual who works at home on materials supplied by you that must be returned to you
(4) certain full-time traveling or city salespeople.

Social Security and Medicare (FICA) taxes may or may not be withheld. Income taxes are not withheld from a statutory employee. A statutory employee will receive a W-2 with the ‘Statutory Employee’ box checked.

Sub-schedule number
A two-digit numeric text box used to further identify a schedule table.

Succession planning
Finding and developing employees for placement into identified key positions that are expected to become vacant sometime in the future.

Summary page
To help you see information at a glance, eCyborg Interactive Workforce uses summary pages. The summary page displays a short view of detailed information. For example, all your emergency contacts appear on a summary page. You delete the contact or proceed to the detail for the contact from the summary page.

Summary plan
A customer-owned description of a benefits plan.

Supplemental wages
Wages that are separate from regular earnings may be classified as supplemental wages and taxed using the default method. The default method means using a set percentage specified by the tax authority. Examples of such earnings are bonuses and commissions.

Surplus
A 'surplus' is an exceeded complement position.

System administrator
An individual responsible for maintaining a multi-user computer system, including a local-area network (LAN). Typical duties include:

- Adding and configuring new workstations
- Setting up user accounts
- Installing system-wide software
- Performing procedures to prevent the spread of viruses
- Allocating mass storage space

System Control Repository
This is the file that contains system definitions for The Solution Series, (FILE01).This was formerly known as the Control File.

System Generator
A type of Report Generator that performs system functions, such as defining data elements and system messages.

Table
Contains an organization's rules and policies and controls what actions take place at the employee level.

Alternative definition: means of displaying information in columns and rows.

Table Definition Record
Table containing data about the Position Administration table records, including the location of keys to associated tables.

Target DL
The node that receives the data being distributed. Depending on the rules established, the same DL can alternate from target to source.

Task
The lowest level of organization on the Navigator or menu, generally equivalent to a form. checklist, or dialog.

Task icon
An icon denoting a task. Task icons describe the type of task, including Forms, Checklists, Dialogs and others.

Tax authority
A government agency to which an employer and employee has statutory tax obligations. The tax authorities for which you handle taxes exist at the federal, state/province, and local levels.

Tax Authority File
A Cyborg-supplied file that contains all the tax-specific information needed to calculate taxes for tax authorities. This includes wage-bracket tables for different marital statuses and information relating to allowances and standard deductions. The sources for the contents of this file are tax specifications published by the various tax authorities.

Tax code
The three-character to seven-character Cyborg-supplied reference code that identifies a tax and that serves as the link between the Tax Specification Record and the employee tax record.

Tax Maintenance File
One of the two Cyborg-supplied tax files. A Tax Maintenance File is a file issued by Cyborg in conjunction with a Tax Update Bulletin (TUB). It contains all the tax specifications that are being updated in the bulletin, in the form of tax specification transactions. These transactions are typically used as input to the batch maintenance run in which tax updates are applied.

Tax specification
Each tax authority publishes tax specification information that specifies how each tax must be administered. This information specifies how employers should calculate taxes and how taxes should be withheld from employees (if withholding applies). The tax specifications can be in the form of tax formulas and (or) tax tables.

Tax Specification record
A record on your Employee Database that contains the tax specifications for a tax. The record contains all the information, as obtained from the governmental authority, needed to calculate tax amounts for the tax. The record may contain more than one tax; for example, US state Tax Specification records contain information for both state income tax and state unemployment insurance. Once a Tax Specification record is activated, tax specification information from the Cyborg-supplied tax files can be loaded onto the record on your Employee Database.

Tax table
A set of information required to calculate a tax, for a specific set of employee parameters. Tax tables are stored and maintained in Tax Specification records. A table typically includes wage and bracket information and data relating to allowances, such as personal exemptions and to standard deductions. There can be several tables relating to marital and resident status in a given Tax Specification record.

Tax type
This term refers to various categories of taxes, for example, income, National Insurance, unemployment, disability, Social Security (FICA-OASDI), and Medicare (FICA-HI).

Taxability
The term refers to whether an hours, earnings, and deductions amount is to be included in taxable wages to be accumulated for a specific tax. If the hours, earnings, and deductions amount is excludable, then the amount is not included in taxable wages. If the hours, earnings, and deductions amount is taxable, then the amount is included in taxable wages. The term fully excludable or fully taxable implies that more than one type of tax is being referenced, for example, state income tax and state unemployment insurance in the US.

Taxable wage base
The taxable wage base represents the maximum amount of an employee's wages on which tax is levied and after which there is no liability. A wage base in the US

typically is in effect for FICA, unemployment taxes, and disability.

Tax-related Regulatory Bulletin

A TUB contains the updates to tax specifications supplied by Cyborg, consisting of a bulletin document, a tax file that contains the updated tax specifications, and a printed listing of tax specification transactions with the updates.

TDR

Table Definition Record.

Template

A basis from which to create a custom item. For example, you can use an existing Cyborg report as a template for your custom report.

Temporary password

A set of alphanumeric characters used with a user ID to limit access to a software application. The system requires that users replace their temporary password with a user-defined password within a certain number of days.

Termination

The activity of an employee no longer being employed by the organization.

Test environment

A separate organization or system partition used only for testing.

Text box

A control on the interface in which text can be entered and edited (formerly known as a field).

Text qualifier

The character surrounding an item between delimiters. All values between the qualifier are data items and are not scanned for a delimiter. This allows a delimiter character, such as a comma, to be a valid data item. Example:

"item 1","item 2","item 3, 4 and 5"

This string contains three data items:

Item 1

Item 2

Item 3, 4 and 5

Although the third item contains a comma, it is ignored as a delimiter because it is between the text qualifier of speech/quotation marks (").

Time entry

The form in which you enter the hours worked for an employee. This was formerly known as a Time Card.

Time entry extract file

A file of time entries external to the Time and Attendance Solution that is used to feed to payroll.

Time entry validation

The Time Entry Validation/Creation program identifies and assigns an activity, for example Clock In (1), to each clock transaction (ring) when performing the validation function. Each clock transaction must be assigned to an activity, in order for time entry hours to be calculated for an employee, for a particular shift. This program validates clock transactions (rings) and generates time entries.

Timeout

The period of time that elapses before a user's eCyborg Interactive Workforce account becomes invalid because of inactivity.

ToolTip

A standard Windows control that provides a small pop-up window that provides descriptive text, such as a label, for a control or graphic object.

Top-down appraisal

Appraisal made by a supervisor or manager of an employee's capabilities. Such an appraisal is generally based on the supervisor's or manager's day-to-day observation of an employee's work performance and will usually include an appraisal interview with the employee.

Trainer

Trainers are set up on the Provider Index Form. They are instructional institutions, organizations or persons who are available to teach a training class.

Trainer code

The trainer code is a four-character value that represents a trainer. This value resides in Option List TR38.

Training area
The training area is recorded on the Class Schedule Form. It is typically defined as the section of the organization to which the training applies, such as manufacturing.

Training class results
These are the class details and absence information recorded on the Process Class Results form. Details recorded include the objectives met when taking a training class.

Training class status
The status value is updated and displayed on the Class Schedule Form. It tracks whether the training class is canceled, full or available.

Training course code
The training course code is a six-character value that represents a training course. This value resides in Option List TR33 and is associated with a course title.

Training plan
A plan of training courses that an employee will attend in the future to achieve the necessary skills to perform a job.

Training reason
The reason for training is used to identify why a training request has been made. For example, the purpose of the training to act as a refresher, to acquire new skills, and so forth.

Training request
A training request is a request for an employee to attend a specific course or class. A formal request for training is not essential. This step could be omitted and the employee could be registered directly in the course of his or her choice.

Transfer
Process of moving an employee from one organization to another organization, such as moving an applicant from the applicant organization to the active employee organization.

Alternative definition: to move data or files from one computer to another

Trend analysis
Reporting or statistics that indicate the rate of change in costs and other elements of a benefits plan.

Trigger
A set of conditions that must occur for an email or letter communication event to start. This can involve the creation, deletion, or modification of forms or checklists within the system.

Tuition reimbursement
Remuneration made to employees for tuition expenses.

Type of training request
The type of training request indicated whether the employee was required to attend the training or whether he or she asked to attend the training.

Unauthorized absence
Absences that are generally not considered paid time away from regularly scheduled work.

Underlined text
In browser applications, text that provides a link to another screen or page.

Unemployment insurance tax
A tax required by some US states to be funded by employee-paid contributions to pay all or part of the cost of unemployment insurance coverage. On the Payroll Solution, state unemployment insurance tax records are established as Type 2 taxes.

Unpaid absence
Employee absence that will not be paid by the organization. A time entry will not be created for this absence.

Upward appraisal
Appraisal that calls for evaluations by those who work under the direction of the employee being evaluated.

URL
Acronym for uniform resource locator. A standard way of specifying the location of an object, typically a web page, on the Internet. URLs are the form of address used on the World-Wide Web. They are used in HTML documents to specify the target of a hyperlink which is often another HTML document (possibly stored on another computer).

User class
Cognos Impromptu assigns security according to configured user profiles. These security profiles are configured by your Impromptu administrator.

User code
A set of characters (up to eighteen alphanumeric characters) that, along with the password, identify the user to the system as a valid user user when they log on.

The user code is case-sensitive (upper case, lower case) and must be entered using the correct case.

User defined password
A set of alphanumeric characters created by users that allows them to view and update information in a software application.

User ID
A set of characters that identify you to the software application. The application contains a list of authorized users by user ID. When you attempt to log on, the system checks the list of authorized users to determine whether you have authority to use the application.

User profile
Used for security purposes to determine what you can and cannot do while you are using the system, and which parts of the system you can access. A user profile is created and maintained for you by a Security Officer. Each user of the system will have a user profile.

Vacancy
An open position that needs to be filled, or an unfilled complement position

Vacation days
The time off that an employee is entitled to as a result of an employment contract or due to length of service.

Validation
The process where the Time Entry Validation program identifies and assigns an activity to a clock transaction (ring) when performing the validation function.

Variant forms
Method of displaying country-specific variation of Cyborg-delivered forms.

Waive
The act of choosing not to enroll in an optional benefits plan.

Warning time
Used to set a period of time after which an employee will appear on the exception report for a particular activity. A Warning condition will allow the creation of a time entry. A Reject condition will not. This is part of the Time and Attendance Administration.

Welfare benefit plan group
First level of the logical organization of welfare benefit plans in eCyborg Interactive Workforce.

Welfare benefit plan subgroup
Second level of the logical organization of welfare benefit plans in eCyborg Interactive Workforce.

Welfare plan
Any insurance or other benefit plan that provides immediate benefits to a participant—for example, medical insurance.

What-if mode
Method for processing a report that allows viewing of information without updating of employee records.

Window
A standard Windows object that displays information. A window is a separately controllable area of the form that typically has a rectangular border.

Wizard
A form if user assistance that automates a task through a dialog with the user.

Work area
The Solution Series screen. It includes the menus, toolbars, Navigator, forms area, message area, and status bar.

Work instructions
Specific tasks to be completed during the migration of data and files from test to production.

Work restrictions
Restrictions that prevent an employee from participating in specific workplace functions.

Worker's compensation

Legislation in the US that provides compensation to employees who suffer work-related injuries.

Workforce competency

The capacity of the overall workforce to perform required functions and sets of activities.

XHTML

Extensible HyperText Markup Language, used by the help pages for eCyborg.

Year End Master File

P20OUT file from the final payroll run of the year

CHAPTER 1

About This Manual

Welcome

This manual has been designed to guide you through the use of Benefits Administration.

This manual has been designed as a reference document. It is also used in classroom training. You will find sufficient detail for self-study, before and after classroom training.

Who should use this manual?

This manual is designed to be used by a number of different users. The following users will find it most useful:

- **Benefits Administrators**
  Benefits Administrators will find it helpful to read through the entire manual, concentrating on Parts 1 and 2. These parts provide a big picture of the system and also cover considerations for implementing it

- **Benefits personnel**
  All Benefits personnel who will be using Benefits Administration should read Part 1 to obtain an overview of the system. Additional parts should be read as they apply.

Prerequisite skills

Users of this manual should possess a variety of technical skills, depending on the roles they will play. At a minimum, all users should have:

- Basic understanding of Microsoft Windows (Version 3.1, Windows 95, or Windows 98).
- Attend training or have experience using your Cyborg product (the eCyborg: Using the Web Client or Using The Solution Series: Administrative Solutions training class is recommended).
- Attend training or have an understanding of tables and option lists (the Using Human Resources Administration course is recommended).

Additional documentation and training courses

The following documentation and training courses are available from Cyborg Systems to help you understand and administer Benefits Administration.

Documentation

Document	Description
eCyborg: Using the Web Client or Using The Solution Series: Administrative Solutions	This prerequisite course documentation covers the introductory concepts and tasks related to Cyborg's administration solutions. It describes how to navigate through the software and explains important concepts and functionality of the system.

If you do not have a copy of this document, you can obtain one from Customer Support.

Training Courses

Related Course	Description
eCyborg: Using the Web Client or Using The Solution Series: Administrative Solutions	This prerequisite course covers the introductory concepts and tasks related to your specific implementation of Cyborg's administration solutions.
Using Human Resources Administration	This prerequisite course provides a thorough understanding of the day-to-day tasks that form the foundation of Human Resources Administration.

If you wish to attend any of these courses, contact Customer Support or visit our website www.Cyborg.com for details of course dates and availability.

How this manual is organized

This manual has been organized to make it as easy to use as possible. The chapters are grouped accordingly into the following parts:

Part	Chapters	Description
1. Introduction	1–2	These chapters introduce Benefits Administration by providing an overview of the system and explaining its interaction with other components of the system.
2. Plan Design	3–7	These chapters provide an explanation of the concepts and detailed directions needed to set up Benefits Administration.

Part	Chapters	Description
3. Enrollment	8–11	These chapters provide a detailed explanation of the procedures for enrolling employees in benefits plans.
4. Employee Benefits Maintenance	12–13	These chapters provide directions for handling the impact of employee status changes (leaves of absence, and so forth) on their benefits.
5. Plan Administration	14–16	These chapters provide directions for working with payroll and for maintaining and de-activating plans.
6. Appendices	A–J	The appendices provide quick references for reports, and also provide supplemental information, such as sample plans and information on batch loading of benefits data.

Following are descriptions of the chapters within the parts:

Part 1: Introduction

The chapters in Part 1 describe this manual and provide an overview of Benefits Administration:

Read this chapter		To learn about
1	About This Manual	How the manual is organized, where to find what you are looking for, who should use the manual, and where to get help.
2	Overview of Benefits Administration	The features included in Benefits Administration and how this component interfaces with other HR components and Payroll Administration.

Part 2: Plan Design

The chapters in Part 2 describe how to set up the control structure and tables for Benefits Administration:

Read this chapter		To learn about
3	Implementing Benefits Administration	Considerations for implementing Benefits Administration.
4	Setting Up Welfare Plans	How to set up the control structure and tables for welfare plans and what reports are available for documenting welfare plans.
5	Setting Up Deferred Plans	How to set up the tables for deferred plans and what reports are available for documenting deferred plans.

Read this chapter		To learn about
6	Setting Up Flex Plans	How to set up the tables for flex plans, group welfare plans, and deferred plans under a flex master plan.
7	Using Considered Earnings/Hours Accumulators	How to set up accumulators to track employee hours and earnings for benefits plan eligibility and participation.

Part 3: Enrollment

The chapters in Part 3 describe how to check employee eligibility for plans and how to enroll employees in plans:

Read this chapter		To learn about
8	Enrolling Employees in Welfare Plans	How to check employee eligibility for plans and how to enroll employees in welfare plans, including recording dependents and beneficiaries.
9	Enrolling Employees in Deferred Plans	How to enroll employees in deferred plans.
10	Processing Annual Open Enrollments for Flex Plans	How to process open enrollments for flex plans, including calculating flex credits and creating enrollment choice forms.
11	Processing Midyear Enrollments for Flex Plans	How to process midyear enrollments for flex plans.

Part 4: Employee Benefits Maintenance

The chapters in Part 4 describe how to perform the day-to-day tasks of updating employee benefits information and how to use the system effectively for counseling employees on their benefits:

Read this chapter		To learn about
12	Maintaining Employee Benefits Information	How to process leaves of absence, separations, and terminations, and how to de-enroll employees from all types of benefits plans.
13	Counseling Employees on Benefits and Retirement	What information is available to assist you in providing benefits information to your employees, including scheduling pre-retirement counseling sessions.

Part 5: Plan Administration

The chapters in Part 5 describe explain what must be done before and after payroll runs and how to maintain benefits plans:

Read this chapter		To learn about
14	Benefits/Payroll Interaction	What tasks must be performed prior to a payroll run, and what tasks must be performed after a payroll run.
15	Maintaining and Deactivating Plans	How to update plans and how to de-activate plans.
16	Monitoring and Costing Plans	How to monitor the cost and effectiveness of benefits plans.

Part 6: Appendices

The appendices in Part 6 contain quick reference information and practice and review answers:

Use this appendix		To learn about
A	Report Quick Reference	Benefits Administration reports and their business uses.
B	Calculation Option List Quick Reference	Benefits Administration calculation option lists and their uses.
C	Funding of Deferred Plans	Forms used for tracking the funding of deferred benefits plans.
D	Working with Stock Plans	Screens used to set up and administer stock plans.
E	Sample Benefits Plans	How a variety of benefits plans could be set up.
F	Benefits Plan Worksheet	A worksheet you can use to record your data for setting up a benefits plan.
G	Batch Loading of Benefits Forms	General information for batch processing the most commonly used Benefits Administration forms.
H	Technical Considerations	A variety of technical considerations for administering Benefits Administration.
I	Accumulation HEDs and 401(k) Plans	How to use Accumulation Method Code 8A for 401(k) plans.
J	Practice and Review Answers	Detailed answers to the practices and reviews at the end of the instructional chapters.

Classroom versus self-study

This manual contains training and documentation for welfare, deferred, and flexible benefits plans. It contains information for two classes: non-flex and flex. It is organized by the phases your organization will follow to successfully implement the Benefits Administration Solution: design, enrollment, maintenance, and administration. Information regarding welfare, deferred, and flex plans is integrated throughout the entire document.

Information will not be taught in chapter sequence in a classroom environment. The instructor will skip entire chapters or sections of chapters. Information will be presented as follows:

Chapters presented in Non-flex class	**Chapters presented in Flex class**
About This Manual	About This Manual
Overview of Benefits Administration	Overview of Benefits Administration
Implementing Benefits Administration	Setting Up Flex Plans
Setting Up Welfare Plans	Processing Annual Open Enrollments for Flex Plans
Enrolling Employees in Welfare Plans	Processing Midyear Enrollments for Flex Plans
Setting Up Deferred Plans	Parts of Maintaining Employee Benefits Information
Using Considered Earnings/Hours Accumulators	Parts of Counseling Employees on Benefits and Retirement
Enrolling Employees in Deferred Plans	
Parts of Maintaining Employee Benefits Information	
Parts of Counseling Employees on Benefits and Retirement	
Parts of Benefits/Payroll Interaction	
Parts of Maintaining and Deactivating Plans	
Parts of Monitoring Costing Plans	

Guided Practice and Extended Practice answers and form captures are based on the assumption that you are using the manual as self-study and are working through the chapters in sequence. If you are using this manual in a classroom environment, a few form captures in the appendix may look slightly different.

How to use this manual

This manual has been designed as a reference manual as well as a training manual. It has been written to facilitate self-study before and after classroom training.

Table of contents

The manual has been carefully designed for ease of use. All our manuals are written to be task oriented to help you complete your business tasks using our software.

The table of contents lists all the tasks and their respective chapters.

Glossary of Terms

A Glossary of Terms section is provided to explain terms used in the documentation.

Index

An index is provided to help you locate specific information.

This document was designed to reduce your need for an index. You should find the table of contents sufficient.

Introductory chapters

It is important that you read the introductory chapters first. Chapter 1 ensures you get the most out of the information we have provided. Chapter 2 provides a high level overview. Read it to get the big picture before reading the detailed instructional chapters.

Instructional chapters

All chapters, other than the introductory chapters, are instructional chapters. They contain detailed instructions on how to complete the business tasks. Each instructional chapter has the following distinct sections:

Key Concepts

Always read the conceptual information first. This will help you understand why you have to perform certain tasks. It will also help you make decisions about your options and help you understand the importance of performing certain tasks. Exercises to help you apply the concept to a business task are included at the end of most concepts.

Apply the Concept

To be certain that you have understood the key concepts in a chapter, complete the Apply the Concept exercises provided. The answers to these exercises can be found in the appendices.

Detailed Directions

When you are ready to perform a task, review the Detailed Directions, which provide guidance, as well as the specific steps, to complete a task.

Guided Practice

The Guided Practice within the Detailed Directions offers you an opportunity to practice a task with step-by-step instructions. It takes you through the various steps, providing detailed examples so you can gain a comfort level with the task. Guided Practice is easy to locate.

For practice, type 'ABC Solutions'.

Note: *To successfully follow the Guided Practice, you must have completed all the previous Guided Practice exercises in the manual. The Guided Practice uses the test data installed with our software. For the Guided Practice exercises to work, this test data must not have been altered.*

All users who complete the Guided Practice must either have their own copies of the test data or have the test data restored for them.

Extended Practice

To be certain that you have understood the tasks in a chapter, complete the Extended Practice provided. The Extended Practice gives you the opportunity to complete one or more tasks without step-by-step guidance. The answers to these exercises can be found in the appendices.

Note: To be able to complete the Extended Practice exercises in the manual, you must have completed all the previous exercises. You must also be using the test data delivered with the software. This test data must not have been altered.

Review of Questions Answered

To be certain that you have understood all of the information in a chapter, complete the review questions provided at the end of a chapter. The answers to these questions can be found in the appendices.

Conventions used in this manual

The underlying page layout and design of this manual are meant to be as intuitive as possible for you. Our intent is to make it easy to navigate through the manual and concentrate on learning and doing.

Cross-references

Wherever appropriate, we provide cross-references to help you find additional information or further discussion of a specific topic.

☞ *Refer to a cross-reference to find more detail or more discussion on a given topic.*

Notes

Whenever there is important information you should be aware of, we provide a note.

Note: You will find tips or quick techniques covered in notes.

How to get additional help

If you can not find the answers to your questions in this manual, contact Customer Support, who will be able to answer specific questions and give you general advice on training.

Please visit our web site ***www.Cyborg.com*** (see "Cyborg Home - http://www.Cyborg.com") for the latest schedule of available courses and course descriptions.

Suggestions and feedback

We value your feedback on our performance support materials. Please forward any comments on this manual to Customer Support.

CHAPTER 2

Overview of Benefits Administration

In This Chapter

Introduction

Benefits Administration is an integrated component of Human Resource Management Administration. It is designed to help you manage every aspect of your benefits programs.

Why use Benefits Administration?

Administering benefits programs can seem like a never ending struggle. Piles of paperwork. New regulations. Corporate reorganizations. New rates. As a Benefits professional, you may find that your customers (the employees) and your management have raised their expectations of what they want from you: well-designed and efficiently managed benefits programs and sound projections for the future. Benefits Administration provides the ability to do both tactical management and strategic planning on a day-to-day basis.

Day-to-day administration is accomplished through facilities such as plan setup using effective-dated, rule-based tables, online or batch enrollment with full eligibility checking and automatic generation of payroll deductions, and accumulation of considered hours and earnings. Numerous benefits plans are supported, including welfare, deferred (defined benefit, defined contribution, thrift/savings, stock plans), and flexible benefits programs. A variety of standard reports are delivered for use within your organization, for regulatory reporting, and for communicating with third-party vendors.

Strategic planning is accomplished using standard and custom reports for tracking enrollments, eligibility, upcoming retirements, and employee selections from past flex programs, as well as the capability to future-date plan tables with different cost scenarios.

Benefits Administration Solution features

The following are important features of Benefits Administration:

- Adaptable benefits control structure
- Rule-based tables for benefits plan setup
- Welfare plan administration
- Deferred plan administration
- Flex plan administration
- Spouse, dependent, and beneficiary tracking
- Benefits and retirement counseling
- Organizational and regulatory reporting

Adaptable benefits control structure

Through the use of benefits Control Numbers and search types, Benefits Administration can accommodate your organizational structure and groupings of employees.

Benefits Control Numbers

A benefits Control Number is a four-position, alphanumeric identifier that specifies which benefits tables are to be used by an organization. Several or all companies can access the same set of benefits tables, or each company can have its own set of benefits tables.

Employee groups and plan rules

When plan rules differ for different groups of employees, there is no need to define separate plans and incur additional administrative costs. Using search types and search arguments, you can define a single plan that allows for differences in the following areas: eligibility, participation, calculations, contributions, hours, earnings and deductions (HEDs) prototypes. For example, you might have higher life insurance rates for smokers than for nonsmokers.

☞ *Refer to* **Setting Up Welfare Plans** *(on page 53) for more information on benefits Control Numbers and search types and search arguments.*

Rule-based tables for benefits plan setup

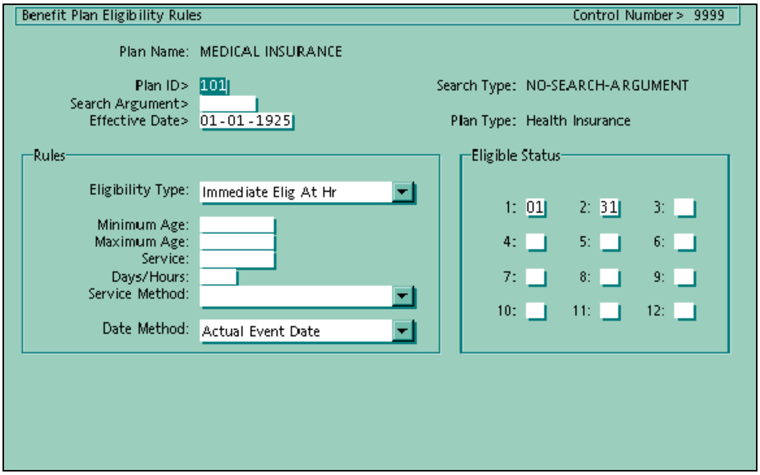
All benefits plan rules are defined using standard tables. When an employee is enrolled in a plan, the plan rules are automatically invoked. Tables are provided for the following:

- Basic rules, including plan name, effective date, and plan type (TK-SCR)
- Eligibility rules (TL-SCR)
- Coverage and contribution factors (TM-SCR)
- Prototype contribution HED (TS-SCR)
- Options and activities and resulting statuses (TTOSCR and TTASCR)
- Participation rules (deferred plans only) (TN-SCR)
- Breaks-in-service rules (deferred plans only) (TU-SCR)
- Retirement date rules (deferred plans only) (TJ-SCR)

Because the same tables are used to set up all types of plans, learning how to use the tables is simplified.

Option lists

In many cases, implementing a rule from a summary plan description is a matter of selecting a value from a pre-defined option list. For example, the following form shows the eligibility rules for a health insurance plan—employees are immediately eligible for the plan as long as their employment status is active, salaried, full-time (status 01), or they are full-time salaried on a paid leave of absence (status 31). Eligibility Type, Date Method, and Eligible Status all use option list values.



Benefit Plan Eligibility Rules   Control Number> 9999

Plan Name: MEDICAL INSURANCE

Plan ID> 101
Search Argument>
Effective Date> 01-01-1925

Search Type: NO-SEARCH-ARGUMENT

Plan Type: Health Insurance

Rules

Eligibility Type: Immediate Elig At Hr

Minimum Age:

Date Method: Actual Event Date

Eligible Status

1: 01 2: 31 3:
4: 5: 6:
7: 8: 9:
10: 11: 12:

Pre-defined calculation routines

Option lists that perform calculation routines are referred to as calculation option lists. Benefits Administration provides calculation option lists to handle a variety of situations including the following:

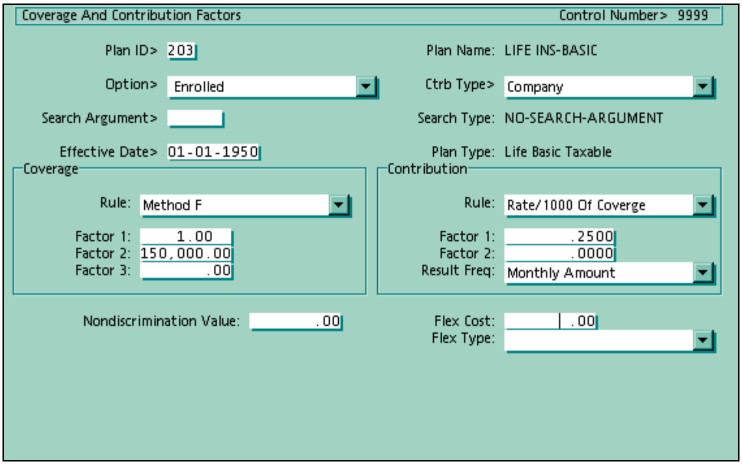
- Eligibility Type Rules option list (BA18)—determines a date based on original hire date, current hire date, or adjusted seniority date
- Date Calc Method option list (BA15)—performs date rounding
- Coverage Calc Method option list (BA20)—calculates an amount of coverage
- Contribution Rules option list (BA31)—calculates contribution amounts

You can use the delivered calculation codes or add your own.

The following form shows the setup of coverage and contribution factors for a basic life insurance plan. This plan provides coverage at the rate of one times the annual salary to a maximum of 150,000.00. The coverage rule, Method F, is obtained from the Coverage Calc Method option list (BA20). It states that the value of Factor 1 should be multiplied by the annual salary equivalency. The maximum (150,000.00) is entered into Factor 2.

The company contribution—the company's cost each pay period—is based on a rate of .25 per 1000.00 of coverage. The contribution rule is obtained from the Contribution Rules option list (BA31). It states that the rate is per 1000.00 of coverage. Factor 1 contains the explicit rate to use in the calculation formula. The frequency of the contribution is recorded in the Result Freq list box. In the example below, the Result Freq selection is Monthly

Amount. This amount will then be calculated down to a per-pay-period amount based upon the pay frequency of the employee when the employee is enrolled.



Eligibility

Eligibility can be based on age, service, hours, and status. When an employee is enrolled in a plan, eligibility is automatically checked according to the plan rules, and the applicable deductions are created for passing to the payroll process. Eligibility requirements can be overridden during the enrollment process.

Effective dates

All tables contain an effective date, allowing you to track changes as they occur, maintain tables for historical purposes, and future date tables for plans or plan changes that will go into effect at a later time.

Flex plan setup

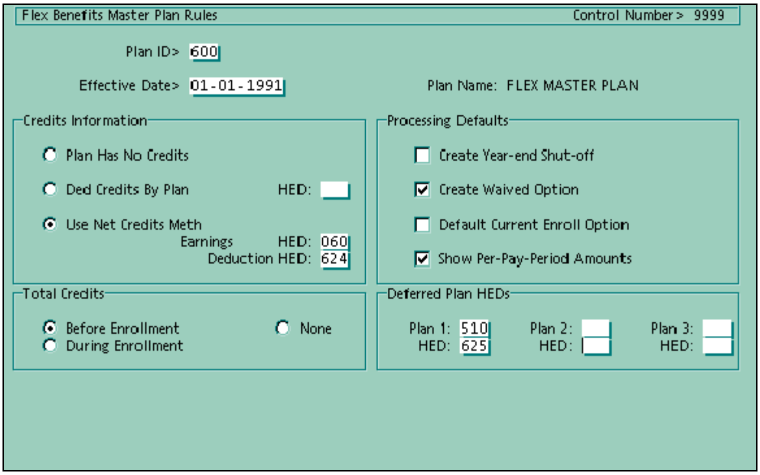
In Benefits Administration, you set up a flex benefit program by bringing any number of individual plans under one administrative umbrella. You define the component plans that will be covered under the flex plan using the standard plan tables. Each plan can have its own eligibility rules, employee credit/cost and company cost calculations, as well as payroll deduction types for storing and tracking both employer and employee costs.

All plans are linked together under a Master Plan. Special Master Plan tables are set up to hold high-level rules unique to the entire flex plan. These rules include the credit calculation formulas and processing defaults for how information will be stored in the employee's record.

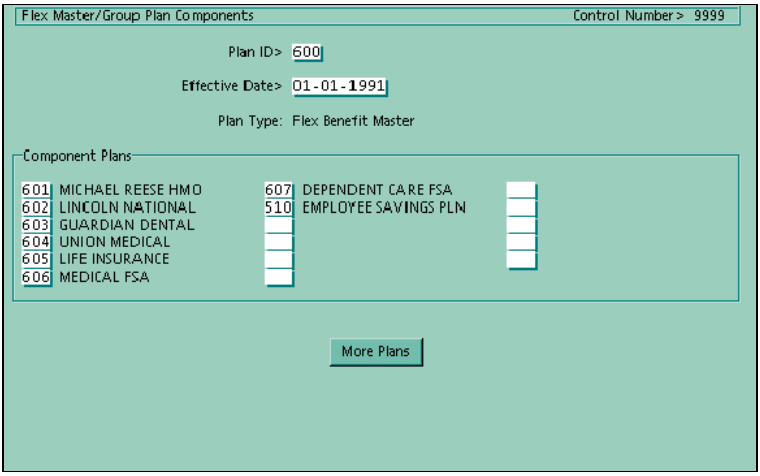
Note: *If you are using eCyborg Interactive Benefits, you must establish a flex benefit program in the benefits component of Cyborg's administration solutions.*

☞ *Refer to the eCyborg Interactive Workforce: The Administrators' Guide for more information about benefit administration tasks.*

The following form shows the Master Plan rules for a sample flex plan:



This next form shows how component plans are grouped under a Master Plan:

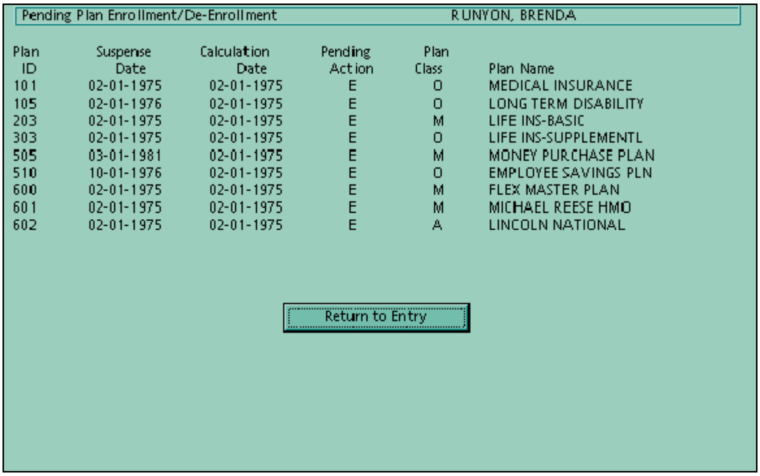


Welfare plan administration

Plans that provide immediate benefits to participants or their beneficiaries are called welfare plans. They include medical insurance, dental insurance, vision care, disability insurance, and life insurance.

Benefits Administration allows you to administer every aspect of your welfare plans, beginning with the tracking of eligibility, options elected, and coverage/contribution amounts. For example, you can determine which plans an employee is eligible to be enrolled in, but is not currently enrolled in, using the Pending Plan Enrollment/De-

Enrollment form (90-SCR). You can also print a report of employee plan eligibility. This form shows the benefits plans available to employee Brenda Runyon:



Pending Plan Enrollment/De-Enrollment RUNYON, BRENDA

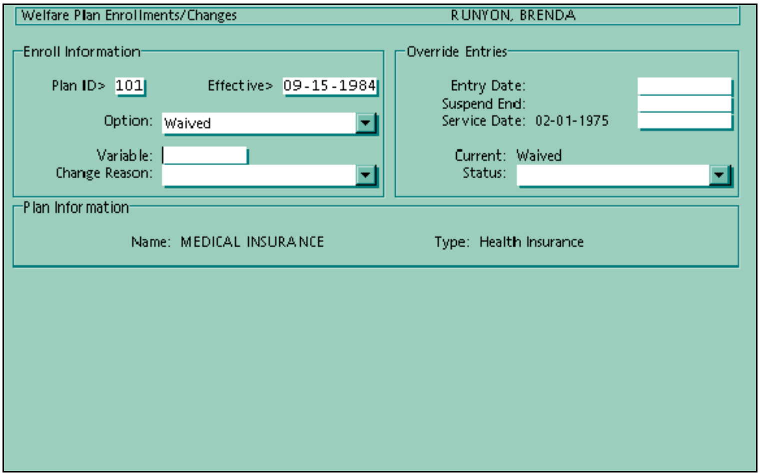
Plan ID	Suspense Date	Calculation Date	Pending Action	Plan Class	Plan Name
101	02-01-1975	02-01-1975	E	O	MEDICAL INSURANCE
105	02-01-1976	02-01-1975	E	O	LONG TERM DISABILITY
203	02-01-1975	02-01-1975	E	M	LIFE INS-BASIC
303	02-01-1975	02-01-1975	E	O	LIFE INS-SUPPLEMENTL
505	03-01-1981	02-01-1975	E	M	MONEY PURCHASE PLAN
510	10-01-1976	02-01-1975	E	O	EMPLOYEE SAVINGS PLN
600	02-01-1975	02-01-1975	E	M	FLEX MASTER PLAN
601	02-01-1975	02-01-1975	E	M	MICHAEL REESE HMO
602	02-01-1975	02-01-1975	E	A	LINCOLN NATIONAL

Return to Entry

Plan Premium Statements (4I-RPT), which may be submitted to your insurance carrier, provide in detail all employee and employer contribution amounts and the number of employees enrolled for each plan option.

Benefits Administration also provides for the automatic recalculation of coverage and contribution amounts based on changes to an employee's master record (for example, a salary increase) or to a plan in which an employee is enrolled (for example, a change in the employee contribution amount).

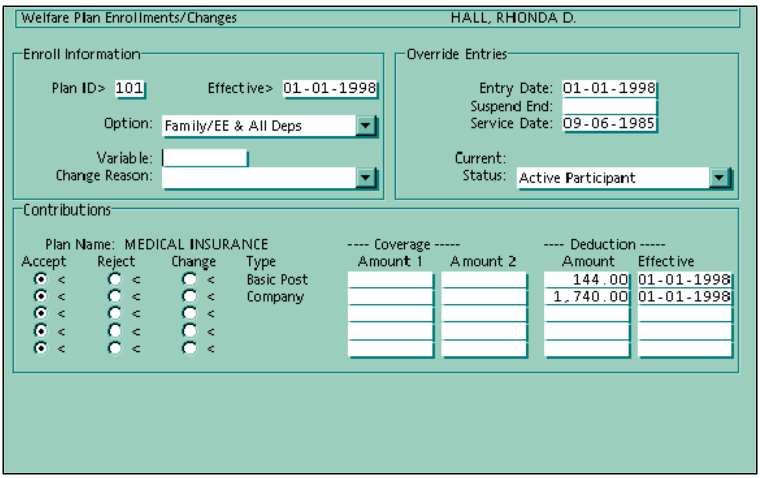
All employee benefit information contains an effective date, allowing you to keep a historical record of employee plan participation. If an employee selects a new option, you can also record a Change Reason. For example, the following form shows that this employee has waived participation in the health insurance plan and the date on which the waiver became effective:



Automated enrollment processing

When you enroll an employee in a benefits plan, the system will automatically check the eligibility rules. If the employee is eligible, the enrollment form will present each coverage and contribution amount for the plan, giving you the option of accepting, rejecting, or changing them.

The following form shows the information for an employee being enrolled in a health insurance plan. The employee has elected family coverage. The employee's annual contribution is 144.00; the company's annual contribution is 1740.00:



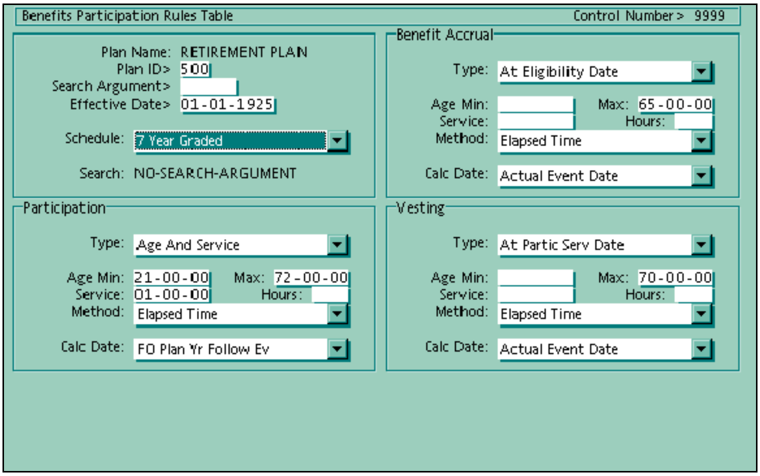
Deferred plan administration

The system captures all of the data relevant to an employer-sponsored pension plan, defined contribution (including thrift/savings), or defined benefit. Each plan can be defined as funded entirely by employer contributions, or can include provisions for employee contributions. Each plan provides for pretax and posttax employee contributions and a company match contribution which can be calculated automatically.

Benefits Administration can capture and accumulate considered hours and earnings according to a plan's specific definition. These hours and earnings can be collected and stored on a monthly, quarterly, or annual basis by plan year. Further flexibility allows you to define one accumulator to be used by multiple plans or to define separate accumulators for plans with different hours and earnings definitions. These accumulators are passed to your actuary through a standard Actuarial Interface Tape (4L-RPT) and can be used to calculate final average earnings for pension projection purposes, or to determine allocations of company contributions, fund earnings, or forfeitures for your defined contribution plan.

All dates associated with a deferred plan can be entered manually or calculated automatically. These include the participant's projected normal and early retirement dates, as well as plan-specific service dates to be used for participation, benefit accrual, and vesting purposes.

The following form shows the setup of significant dates for a defined benefit retirement plan. When employees are enrolled in the plan, their particular service dates will be calculated based on these plan rules.



Flex plan administration

Enrollment into a flex plan is a one-step process that checks eligibility, validates the employee's choices, calculates the credit/cost, and records the results. Benefits Administration provides facilities to produce choice forms, track enrollments, and monitor flex credits.

Flex plan communications

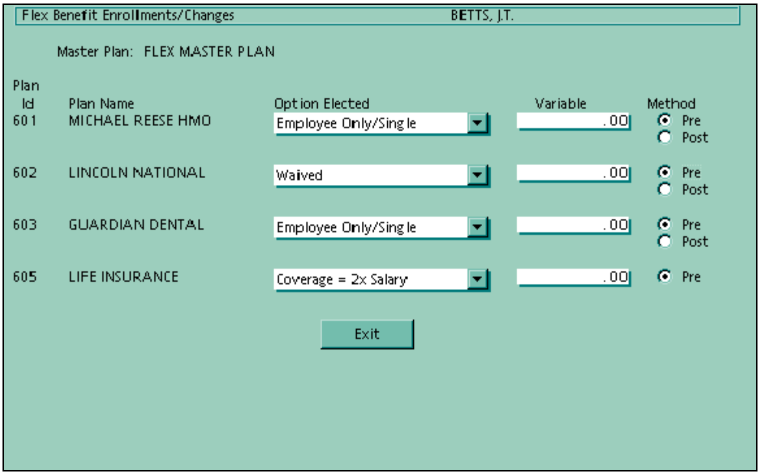
Benefits Administration provides a choice form containing an optional cover letter as well as enrollment information for each employee listing eligible plans, eligible option choices, and the cost of each choice. You can choose to print the company's cost by plan/option as well as the employee's personal cost. If your plan has credits, the employee's available credits will be shown.

Once an employee is enrolled, you can produce a confirmation statement for each employee with an accompanying letter, which can be changed to fit your needs. This statement will show the credits/cost for each choice the employee made, as well as the total cost and the difference, plus or minus, between the credits used and those allocated.

Flex plan enrollment

Every employee is enrolled in the flex plan each year. One flex enrollment form is the basis for all types of enrollments. The following form shows every plan for which an employee is eligible, including current options, and allows changes to any or all choices.

The following form shows the plans and options elected by employee J. T. Betts for the flex plan 600:

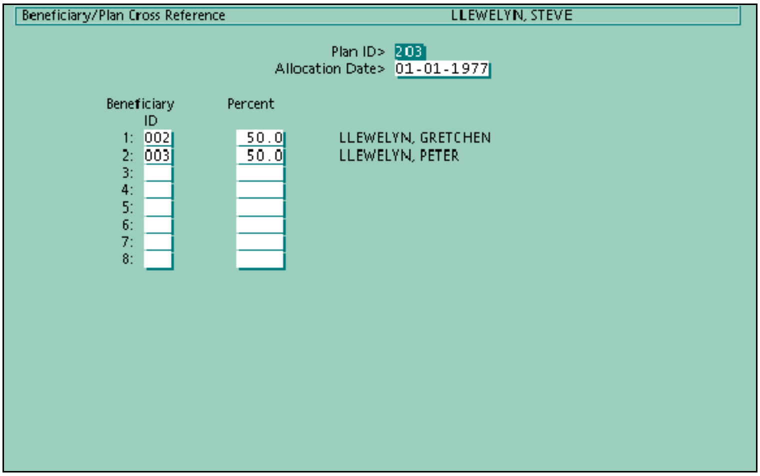


When entry is completed, you will be given the option to process the enrollment, review the enrollment, make changes, or exit and start again.

Spouse, dependent, and beneficiary tracking

Benefits Administration allows you to maintain detailed spouse, dependent, and beneficiary information. Data such as date of birth, student status, employer's name and address, and outside insurance carriers can be recorded. All dependents and beneficiaries, including ex-spouses, can be associated with an employee.

Multiple beneficiaries and associated percentages can be identified for a plan. For example, the following form shows that the employee has designated his daughter and son as beneficiaries for a life insurance plan, allocating 50 percent of the proceeds to each:



Benefits and retirement counseling

Benefits Administration provides a variety of inquiry forms and hardcopy reports for viewing employee benefit information. Forms you will find useful for viewing employee benefit information include the following:

- Employee Welfare Plan Summary form (55ISCR)
- Online Employee Profile form (PROFIL)
- Flex Benefit Enrollments/Changes form (55FSCR)
- Defined Benefit Plan Accumulations form (70-SCR)
- Defined Contribution Total Balance form (76TSCR)
- Thrift/Savings Plan Accumulations form (82-SCR)
- Plan Vesting Information form (63-SCR)

When defining deferred plans, you can specify early, normal, and late retirement dates for participants. You can also indicate when retirement notices should be sent to participants, based on their early and normal retirement dates. These retirement notice dates will be calculated when the employee is enrolled. You can view these on the Plan Retirement/Notice/Counseling Dates form (65-SCR) for an employee, or you can print a hardcopy report showing which employees should have notices sent to them for a given period. You can also use the Plan Retirement/Notice/Counseling Dates form (65-SCR) to set up pre-retirement counseling dates. Forms are also provided for you to record all retirement plan elections and payments.

Organizational and regulatory reporting

Standard reports are provided to document the rules of each benefits plan. These reports include the following:

- Plan Rules Table Records Batch report (9K-RPT)
- Benefit Plan Tables report (9KARPT)
- Benefits Eligibility Rules report (9L-RPT)
- Benefits Plan Factors report (9M-RPT)
- Benefits Plan Prototype Contribution HEDs report (9S-RPT)
- Benefits Participation Rules report (9N-RPT)
- Benefits Activity and Option Validation report (9T-RPT)
- Benefits Plan Breaks-in-Service Rules report (9U-RPT)
- Plan Retirement Date Rules report (9J-RPT)

Registers of enrolled and enrollable employees are provided for all types of plans. Reports provided include the following:

- Welfare Benefits Register report (4A-RPT)
- Plan Participation Register report (4B-RPT)
- Plan Beneficiary Listing report (4C-RPT)
- Dependent Listing for Plan ID: xxx report (4D-RPT)
- Enrollable Employees by Plan report (4E-RPT)
- Enrollable Employees by Employee report (4F-RPT)
- Current Pensioners report (4H-RPT)
- Deferred Plan Register report (4J-RPT)
- Deferred Vested Terminated Employees report (4K-RPT)
- Employees with Less than 1000 Hours in Plan Year report (4M-RPT)

When working with third-party vendors, you will find the following reports useful:

- Plan Premium Statements (4I-RPT)
- Actuarial Interface Output Tape (4L-RPT)

A record of benefits activity for a certain period is documented using the following reports:

- New Plan Participants report (8J-RPT)
- Spouse/Dependent Changes by Plan report (8K-RPT)
- Retirement Notifications Due This Period report (8L-RPT)
- Terminations This Period - Vested vs. Non-vested report (8M-RPT)
- Retirements This Period report (8N-RPT)
- Service Interruptions Ended This Period report (8O-RPT)
- Changed Beneficiary/Contingent Annuitant report (8P-RPT)
- Changed Retirement Election Data report (8Q-RPT)
- Next Retirement Counseling Date This Period report (8T-RPT)
- Withdrawal Suspension End Date Passed report (8U-RPT)

A variety of regulatory reports are provided for taxation and compliance/discrimination testing. These reports can be submitted to regulatory agencies.

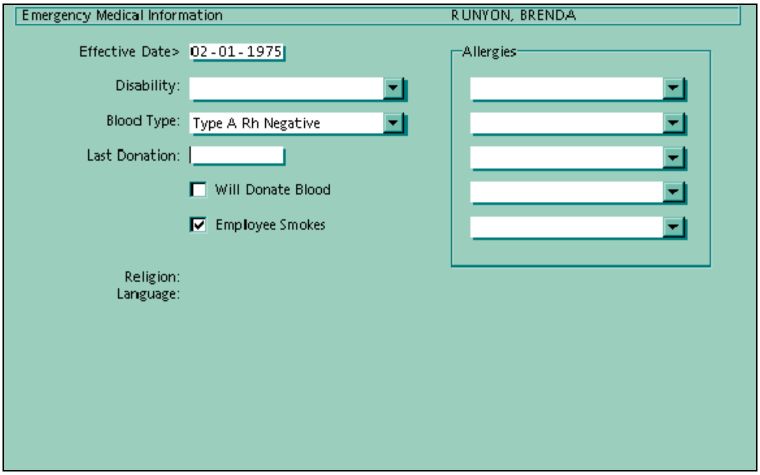
☞ *Refer to the* **Report Quick Reference** *(on page 615) for complete information on benefits reports.*

Interaction with other HR application components

Before employees can be enrolled in a benefits plan, they must be processed by Human Resources. During this processing, an employment status will be assigned to each employee. This status, together with the original hire date, current hire date, or adjusted seniority date, will affect which plans employees are eligible for, and when they can be enrolled in the plans. Salary information may affect plan coverage or costs.

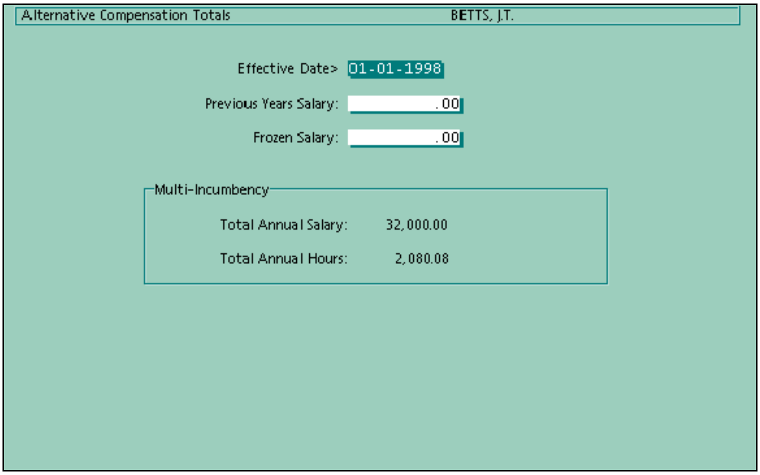
Employee data and search arguments

If a benefits plan uses a search type and argument, the value for the search argument must reside on the employee's master record. For example, if you want to charge higher life insurance rates for smokers than for nonsmokers, you would have to record the employee's smoking status on the Emergency Medical Information form (15-SCR), as shown next:



In another example, if you have employees who are assigned to more than one Position and you want to base plan coverage or costs on their total annual salaries, you must use Position Management Administration to record salary information.

The following example shows the computed Total Annual Salary for an employee:



Refer to **Setting Up Welfare Plans** *(on page 53) and* **Enrolling Employees in Welfare Plans** *(on page 281) for more information on setting up and enrolling employees in salary-based benefits plans.*

Changes to employment status

Changes to employment status can also affect employee benefit entitlements. For example, an employee may go on a leave of absence, or change from part-time to full-time employment. By running the Recalculation of Coverages/Contribution Amounts report program (85-RPT), you will be alerted to these changes.

Removing employees from plans

If an employee separation results in the loss of coverage, you can de-enroll the employee from some or all benefits plans. De-enrollments are handled online using the enrollment/changes form.

Employee transfers

When employees transfer between companies in your organization, you have the option of transferring their benefits data to the new employee master record in the new company, keeping the benefits with the old company, or keeping the information in both places.

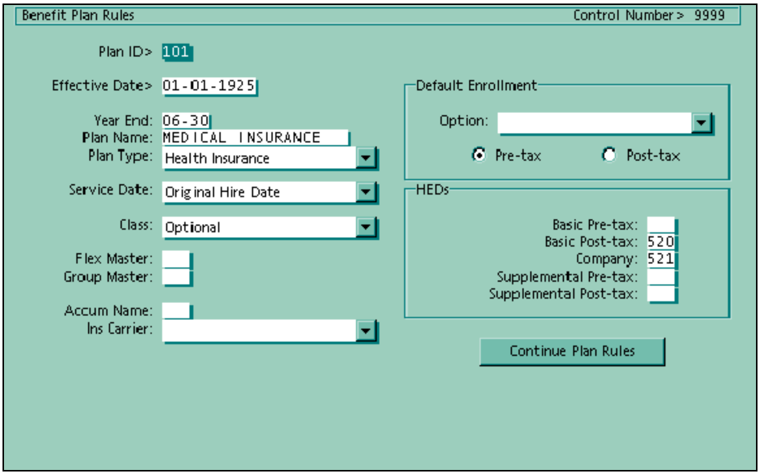
Interaction with Payroll Administration

The interaction between Benefits Administration and Payroll Administration involves the setting up of benefits HEDs, flex payments, pre-payroll preparation, and post-payroll updates.

Benefits HEDs

Before you define a benefits plan, the exact hours, earnings, and deductions (HEDs) to use for each employee and employer contribution need to be determined. HEDs are defined using the Company Deductions form (A8-SCR) in the payroll component.

For example, the following form shows that for this health insurance plan, the employee's contribution will be posttax and use HED 520; the employer's contribution will use HED 521. The HEDs were defined using the Company Deductions form (A8-SCR) prior to accessing this form:



Flex plan credits and payroll/benefits relationship

Benefits Administration provides a variety of ways to handle benefit costs. Your plan may allot credits to employees to 'buy' their benefits or to exchange their flex dollars for cash earnings instead of benefits. You may have a company-paid level of coverage over which the employee must pay an additional cost through a payroll deduction. Other plans may not use flex dollars or credits directly; they may offer several plans from which the employee can choose.

You can administer benefit earnings and deductions directly through the standard integration with Payroll. Transactions are created in Payroll as a net cost/deduction based on the difference between credits allotted and credits used, or a flex earnings amount with individual deductions by plan for benefit options that the employee has chosen.

Before a payroll run

Changes to plan tables or to employee master files may affect coverage and contributions. Before each pay run, the Recalc Benefit Coverage/Contributions report (85-RPT) should be run to recalculate coverage and contributions.

After ensuring that the deductions for the next payroll run are correct, the employees' deduction information must be copied to Payroll Administration by running the HED Segment Changes Effective this Period report program (8R-RPT). This program copies the information from the Deduction Information From Benefit Plans form (54-SCR) to the Employee Earnings And Deductions form (HH-SCR).

After a payroll run

After information from a payroll run is merged into the Employee Database, the Considered Earnings/Hours Accumulators program (CONSID) is used to update accumulators with earnings from the current pay period's history records.

After the Considered Earnings/Hours Accumulators program (CONSID) has run, the Update Benefit Plan Balance Information report program (BAXACT) will be run to extract amounts from the current pay period's history records to update deferred plan accumulations.

After the Update Benefit Plan Balance Information report program (BAXACT) has run, the Update Account Balances report program (83ARPT) should be run to update deferred plan contributions and the Update Pending Claim Amounts report program (83BRPT) run to update pending claims.

☞ *Refer to* **Benefits/Payroll Interaction** *(on page 535) for detailed information on the benefits report programs used to work with payroll.*

eCyborg Interactive Workforce considerations

As you determine your HR strategy, consider the advantages of using eCyborg Interactive Workforce. This Cyborg web-based employee self-service application gives your employees real-time access to view, add, and update their personal information held within The Solution Series. A user-friendly, web-based interface, enables employees to enter, update, or view their personal information. In addition, eCyborg Interactive Workforce contains a benefits module that enables your employees to enroll in benefits online and to view their current benefits enrollments.

eCyborg Interactive Workforce does not display the forms used in The Solution Series; rather, the application presents web pages on which users view, enter, or update information. Communication between eCyborg Interactive Workforce and The Solution Series is performed via an application programming interface (API) that allows the two software applications to pass information to each other.

Using the benefits enrollment functionality significantly reduces the level of HR staff involvement in benefits enrollment, leaving them more time to focus on the more strategic aspects of benefits administration.

☞ *Refer to the eCyborg Interactive Workforce functional documentation for more information about using eCyborg Interactive Workforce for Human Resource and Benefits Administration.*

Private forms

To accommodate functionality not present in eCyborg, some private forms were developed so that eCyborg Interactive Workforce could extract data more efficiently or in a format that was not available in any current form in The Solution Series. These eCyborg Interactive Workforce forms are called 'private' because they are not accessible to users of The Solution Series. In addition, forms in The Solution Series that are multi-panel were recreated on one panel as private forms for eCyborg Interactive Workforce.

If your organization plans to use eCyborg Interactive Workforce, private forms need to be kept in mind if your organization customizes any of the following forms in The Solution Series:

- Flex Benefits Master Plan Rules form (TKFSCR)
- Flex Plan Credits Calculation form (FCCSCR)
- Coverage And Contribution Factors form (TM-SCR)
- Benefit Plan Eligibility Rules form (TL-SCR)
- Option/Resulting Plan Status Rules form (TTOSCR)
- Activity/Resulting Plan Status Rules form (TTASCR)

☞ *Refer to the eCyborg Interactive Workforce: Technical Implementation documentation for more information about eCyborg Interactive Workforce private forms and other changes.*

PART 2

Plan Design

In This Section

CHAPTER 3

Implementing Benefits Administration

In This Chapter

Introduction

This section provides guidelines for implementing Benefits Administration. You can use them to help develop your implementation project plan.

Note: *Much of the specific information you need to complete these tasks will come from other chapters in this documentation and other product documentation. You will see specific references throughout this chapter.*

Tasks

Implementing Benefits Administration involves the following tasks:

- Assembling the implementation team
- Conducting the familiarization phase
- Conducting the design phase
- Conducting the implementation phase

Prerequisites

Before you can implement Benefits Administration, the following must be established:

- Organizations
- Activity Options
- Employee Status
- Activity and Resulting Employee Status Rules

If your organization has already implemented the basic functionality of Human Resources Administration, these items will already be defined.

Questions answered

This section answers the following questions:

1. What expertise must the Benefits Administration implementation team possess?
2. How can the Benefits Administration implementation process be phased?
3. What does a benefits analysis entail?
4. How are plans identified in the system?
5. How can different employee groups use the same plan?
6. How does organization structure affect plan setup?
7. How are plans funded?
8. What are the security considerations?

Implementation team expertise

To implement Benefits Administration successfully, you should assemble the correct implementation team, one with expertise in the following areas:

Human Resources

The Human Resources specialist must understand all of your Human Resources processes that could affect an employee's benefits. These processes include hiring, transferring, and terminating employees.

Together the HR specialist and Benefits specialist determine who will be responsible for Benefits Administration tasks and what communication needs to take place between the Human Resources and Benefits groups. For example, they will determine who will enroll new employees into benefits plans. If benefits enrollment is handled by an HR clerk, that person will require additional training and, possibly, additional security to access Benefits Administration forms.

If your organization plans to implement eCyborg Interactive Benefits, decisions must be made about which enrollment tasks will be allocated to the employee.

☞ *Refer to the eCyborg Interactive Workforce: The Administrators' Guide for more information about benefit administration tasks.*

Benefits

The Benefits specialist must possess a thorough understanding of your benefits plans and how you intend to administer benefits in your organization. He or she must have expertise in the following areas:

- **Current benefits**—This person must be able to map your summary plan descriptions and any legal documents for those plans into Benefits Administration tables.
- **Benefits processes**—This person must be able to document your processes and to make sure that these processes are integrated with Benefits Administration. These processes include enrollment, de-enrollment, and plan shutdowns.
- **Reporting**—This person must be able to identify all of your reporting and benefits communication requirements. This includes organizational and regulatory reporting as well as benefits confirmations. It also includes any interfaces to third parties.

If your organization plans to implement eCyborg Interactive Benefits, a Benefits administrator will manage the information that users see on their browser.

☞ *Refer to the eCyborg Interactive Workforce: The Administrators' Guide for more information about about benefit administration tasks.*

Payroll

The Payroll specialist will set up any company contributions and employee deductions required for benefits plans. These Hours, Earnings, and Deductions (HEDs) must be set up before you can establish and test your benefits plans. The actual HEDs to be used for benefits plans will be established on the Company Earnings And Deductions form (A8-SCR).

☞ *Refer to* **Plan funding** *(on page 46) for information on the specific types of HEDs to establish for benefits plans.*

☞ *Refer to Defining Organization Earnings, Deductions, and Accruals in the Payroll Organization Setup documentation for information on setting up Hours, Earnings, and Deductions.*

The Solution Series administration solutions

Because Benefits Administration is an integral component of Human Resources Administration, it is imperative that team members understand how this component affects other areas of the system. Team members must know the current organization structure (Control Numbers) and must be able to assign a Benefits Administration Control Number. This Control Number will be used to identify the set of benefits tables available for a particular company (Organization).

☞ *Refer to* **Benefits Administration Control Numbers** *(on page 43) for more information on this topic.*

Information Systems

Technical expertise is needed to implement Benefits Administration, particularly in the following areas:

- Writing conversion programs to batch load data to benefits forms and tables.
- Designing or modifying Benefits Administration forms as well as writing calculation option lists and search arguments for benefits plans. Knowledge of Form Builder and the Cyborg Scripting Language will be necessary to implement required customizations.
- Setting up environments: development, test, production, and so forth.
- Setting up job streams for benefits processing and reporting. The Benefits specialist and Payroll specialist will work together with the Information Systems specialist to create job streams.

See also:

- Assembling the implementation team ***(on page 49)***

For suggested steps on assembling the implementation team.

Implementation phases

Successful implementations are typically phased. Consider using the following phases in your implementation of Benefits Administration.

Note: *The specific tasks associated with these phases are documented in the Detailed Directions.*

Familiarization

In this phase, implementation team members review your current processes and benefits and also learn Benefits Administration. You are not expected to become an expert user of Benefits Administration in this phase; however, you do need to understand how the system works and what you must do to automate your benefits.

Allow team members ample time to gather the information they require to proceed to the design phase.

See also:

- Conducting the familiarization phase ***(on page 49)***

For suggested steps for the familiarization phase.

Design

Once you are familiar with your current processes and benefits and with the Benefits Administration component, you are ready to begin the design phase.

In this phase, implementation team members document benefits requirements and then implement them. This includes any customizations and interfaces. Representative benefits plans and the initial conversion of data should be tested in this phase.

Some of these steps can be conducted simultaneously. For example, the Benefits specialist can review the benefits tables while the Security Officer is setting up the security matrix.

See also:

- Conducting the design phase ***(on page 50)***

For suggested steps for the design phase.

Batch loading of benefits forms

To save time, you can load batches of employee information into the benefits form using Batch Layout Facility transactions (BATCHL).

☞ *Refer to* **Batch Loading of Benefits Forms** *(on page 917)* *for general information about the layout of the benefits forms.*

☞ *Refer to the Technical Administration documentation for more information on data conversion and loads.*

Customization facilities

Because the system may require a customization, team members should be able to use the customization facilities provided. These include:

- Form Builder
- Cyborg Scripting Language
- Solution View

☞ *Refer to the appropriate product documentation for more information on these facilities.*

Implementation

After completing the design phase, you are ready to implement Benefits Administration.

In this phase, implementation team members complete all the tasks necessary to go live with the system. These include developing support materials for end users, conducting parallel runs, and going live. You should run parallel for at least one full production cycle before going live.

See also:

- Conducting the implementation phase ***(on page 51)***

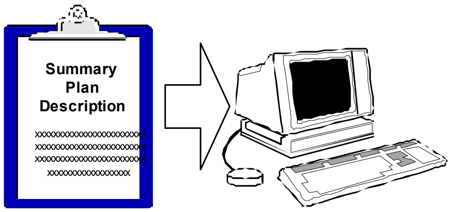
For suggested steps for the implementation phase.

Benefits analysis

To conduct a benefits analysis, you must have a thorough knowledge of your summary plan descriptions and Benefits Administration. This section describes the connection between your summary plan descriptions and Benefits Administration.

Summary plan descriptions and benefits tables

Your summary plan descriptions document the rules (eligibility requirements, coverage formulas, and so forth) for your benefits plans. In Benefits Administration, benefits tables document the rules for benefits plans. To automate your benefits plans' rules, you map them into the benefits tables.



Benefits Administration's standard benefits tables make it easy for you to automate benefits plan rules. Following is a brief description of the most commonly used benefits tables. The last two columns indicate what type of plans can be defined using the table (welfare, deferred, or both). Notice that the same tables used to set up welfare plans are also used to set up deferred plans. In addition, three tables are used solely to complete the definitions of deferred plans.

Table	Purpose	W	D
Benefit Plan Rules (TK-SCR)	Use this table to establish the basic rules for the plan, including its name, type, and year end.	X	X
Benefit Plan Eligibility Rules (TL-SCR)	Use this table to specify requirements for plan admittance. You can restrict eligibility by an employee's age, length of service, or both. In addition, you must specify the valid employment statuses required for entry into the plan. The eligibility requirements you set up are automatically applied to each employee during the enrollment process.	X	X

Table	Purpose	W	D
Coverage And Contribution Factors (TM-SCR)	Use this table to specify how employer and employee contributions should be calculated. If necessary, specify how coverage amounts should be calculated. Commonly used coverage and contribution rules are provided as calculation option lists.	X	X
Benefit Plan Prototype Contribution HED (TS-SCR)	Use this table to define contributions. You must set up one contribution table for each type of contribution (basic pretax, basic posttax, company, supplemental pretax, and supplemental posttax) required by a plan.	X	X
Option/Resulting Plan Status Rules (TTOSCR)	Use this table to define the valid options for the plan and how those options affect employee plan status.	X	X
Activity/Resulting Plan Status Rules (TTASCR)	Use this table to define the effect of separation activities on an employee's plan status.	X	X
Benefits Participation Rules Table (TN-SCR)	Use this table to define rules for calculating when an employee begins participation in a plan, when benefits begin to accrue, and when vesting should begin. Each of these dates can be calculated by age, service time, and/or hours worked.		X
Benefits Plan Breaks-In-Service Rules (TU-SCR)	If required, use this table to define which separation activities will cause a break in service, and any grace periods allowed.		X

Table	Purpose	W	D
Benefits Retirement Dates Rules Table (TJ-SCR)	Optionally, use this table to define eligibility dates for disability, early and normal retirement, anticipated participant retirement (with rounding) along with company policy for notifying employees prior to their eligibility—all by retirement option.		X

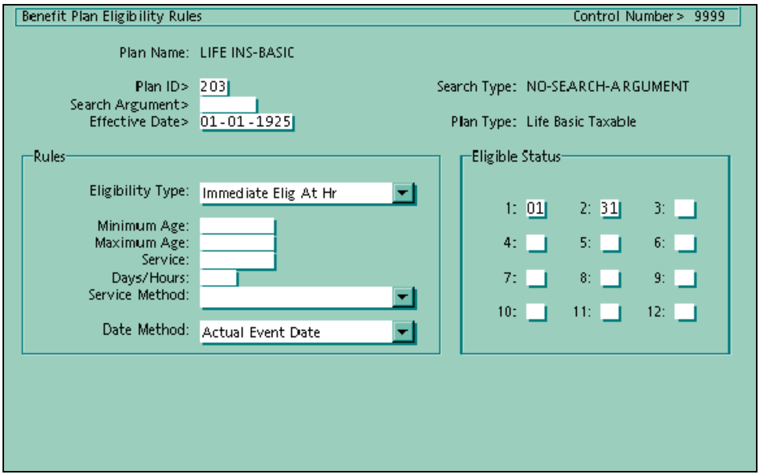
Legend: W=welfare, **D**=deferred

Refer to **Setting Up Welfare Plans** *(on page 53) and* **Setting Up Deferred Plans** *(on page 111) for a detailed discussion of these tables.*

Benefits tables and benefits option lists

Each benefits table is a separate fill-in-the-blank form. As you define a benefits table, you will find that the numerous predefined option lists supplied with Benefits Administration can accommodate most benefits plans.

Employees of Acme Manufacturing, for example, are eligible for the basic life plan as soon as they are hired. To set up these eligibility rules, you would choose 'Immediate Elig At Hr' from the Eligibility Type option list (BA18) and 'Actual Event Date' from the Date Method option list (BA15). The Benefits Plan Eligibility Rules table (TL-SCR) for this plan would look similar to the following:



Sample benefits plans

Looking at examples can make it easier to learn about a new area. A variety of sample benefits plans are delivered with Benefits Administration. To view a list of the sample plans for Acme Manufacturing (999999), display the Benefit Plan Rules form (TK-SCR) and click the Selections button on the toolbar.

Then review the tables for each plan.

Benefits Administration option lists

Benefits Administration is delivered with more than 75 benefits option lists. You should review them and modify them as necessary to meet your organization's requirements. To view option lists, access the Option List Display form (CDLIST) by making the following selections from the Navigator:

Component: Development Tools
Process: Option Lists
Task: Display

You can use the Print Window icon to print the list display-by-display.

Options lists specific to Benefits Administration begin with the letters 'BA'. For example, option list BA629 contains the valid Insurance Carriers. The following values are included with option list BA629:

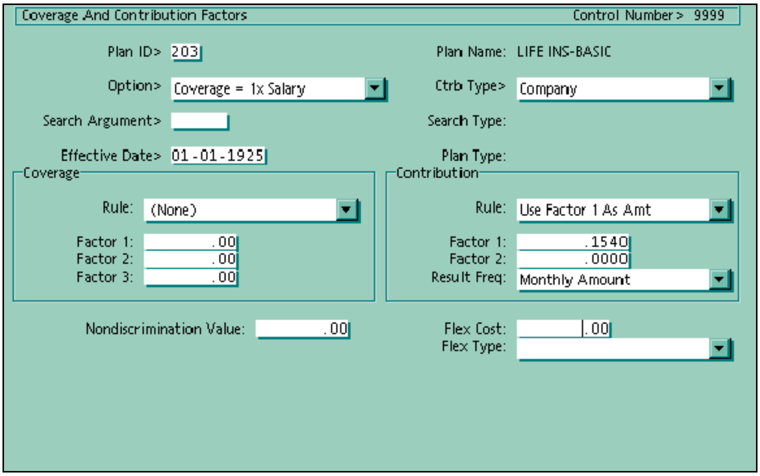
Value	Explanation
BB	BlueCross/BlueShield
ML	Metropolitan Life

When you define a benefits plan, you can identify the insurance carrier type using a value from this option list. You can also add your own values.

Calculation option lists

Certain fields used in the definition of a benefits plan make use of calculation option lists. These option lists perform calculations and relational editing (actions taken based on the relationship of values in different fields). The calculations and relational editing are written in the Cyborg Scripting Language.

For example, when you establish the employee contribution amount for a benefits plan, you will identify a Contribution Rule on the Coverage And Contribution Factors form (TM-SCR). The value for the rule will be from the Contribution Rules option list (BA31). Suppose Acme Manufacturing wanted to charge a monthly amount of 15.40 to employees who choose single coverage for life insurance. The Coverage And Contribution Factors form (TM-SCR) would use a Contribution Rule value of 'Use Factor 1 As Amt' and a Factor 1 of '.1540', as follows:



Each calculation option list's documentation describes its function and the Cyborg Scripting Language option that it uses. Review this documentation carefully before selecting an option.

Changing an option definition requires that you also change the Cyborg Scripting Language option. If you change or add to an option's logic, you should thoroughly test the change.

☞ *Refer to the* **Calculation Option List Quick Reference** *(on page 815) for more information on calculation option lists used in Benefits Administration.*

Benefits Administration Control Numbers

Benefits Administration Control Numbers are used to identify which benefits tables are applicable to an organization or company. The same Control Number can be used for multiple organizations, or each organization can use a different Control Number. For example, you might keep plans for a merger company separate from your regular company's plans for a period of time. After the merger is completed, you might have both companies access the same plans. You might also have a separate benefits Control Number for retiree plans. This Control Number would identify the benefits tables available to the retiree company.

A cross-reference table is used to indicate which tables are valid for each company.

☞ *Refer to* **Setting Up Welfare Plans** *(on page 53) for specific directions on setting up Benefits Administration Control Numbers.*

Plan identification

Each benefits plan you define will be identified by a Plan ID, which is a unique, three-position, alphanumeric identifier. Each table used to build a particular plan will carry the same Plan ID.

Naming strategies

There are no restrictions on assigning Plan IDs, other than limiting them to three alphanumeric positions. Consider the following when developing IDs for your benefits plans:

1. Use all three positions of the Plan ID. This is important whether you use abbreviations or numbers to identify plans. For example, it is better to use 'DEN' rather than 'DE' for a dental plan.
2. If you use numerics for Plan IDs, use a meaningful numbering scheme. For example, use Plan IDs '000–499' for welfare plans and '500–999' for deferred plans.
3. If you use numerics, use a numbering scheme that indicates the plan type. For example, you might number your medical plans as follows:

   - PPO 100
   - HMO 101
   - IPA 102

   Consider the impact of sorting on reports. Plan reports will be sorted by Plan ID. This is especially important on flex benefit enrollment confirmation forms. If you want to group types of plans together on the form, you must assign your Plan IDs accordingly.

4. If you have flex plans, you must reserve a Plan ID for the flex master plan.
5. If your organization plans to use eCyborg Interactive Workforce, the Plan ID can not contain characters that would be considered illegal by your operating system. Contact your technical staff to identify these characters (such as blanks, @, #, and so on).

Organization structure and Plan ID

Benefits plans can be shared by companies. The same Plan ID will be used if two companies use the same benefits plans.

Each Plan ID can be used only once for each Benefits Administration Control Number. For example, Acme Manufacturing (999999) uses a Benefits Administration Control Number of 9999. Each Plan ID under Control Number 9999 must be unique.

☞ *Refer to* **Setting Up Welfare Plans** *(on page 53) for information on defining Plan IDs.*

Employee groups and plan rules

You may have different rules for different groups of employees with regards to a particular benefits plan. For example, you may charge smokers more for health and life insurance than you charge nonsmokers. Separate calculation routines would be required for smokers and nonsmokers. In Benefits Administration, these employees can still be enrolled in the same benefits plans. You identify when special rules apply with a 'search type.'

Benefits Administration offers four search types:

- Eligibility
- Participation
- Calculation
- HED Prototype

You will use a search type only if plan rules differ for different groups of employees. For example, you might have different rules for salaried and hourly employees or for union and nonunion employees.

☞ *Refer to* **Setting Up Welfare Plans** *(on page 53) for information on defining search types and search arguments.*

Plan funding

Plan funding is defined through contribution types. The contribution type indicates whether the plan is paid by the employee or company and whether the contribution is a pretax or posttax deduction.

There are six standard contribution types. Each is defined in option list BA19:

Value	Contribution Type	Explanation
1	Basic Post Tax Contb	Basic posttax contribution
2	Suppl Post Tax Cntrb	Supplemental posttax contribution
3	Company	Company contribution
4	Basic Pre Tax Contrb	Basic pretax contribution
5	Suppl Pre Tax Contrb	Supplemental pretax contribution
D	Flex Deferred HED	Used when an employee can use Flex Dollars/Credits to make additional contributions to a deferred plan

A basic contribution refers to the employee's minimum contribution to the plan. For deferred plans, it can be the portion of the basic employee contribution that the company matches.

A supplemental contribution is anything over the basic amount that the employee contributes. Supplemental contributions are never matched by the company.

Each contribution type will have its own Hours, Earnings, and Deduction (HED) number. The contribution type is specified on the Benefit Plan Rules form (TK-SCR).

☞ *Refer to* **Setting Up Welfare Plans** *(on page 53) for information on defining contribution types for a benefits plan.*

Security considerations when implementing Benefits Administration

Benefits Administration contains extremely sensitive data. As with any other component of Cyborg's administration solution, you must set up a security matrix to reflect user access to the system. Work with your Security Officer to implement the security matrix.

The security matrix should be tested thoroughly during the implementation process.

eCyborg Interactive Benefits considerations when implementing Benefits Administration

To use eCyborg Interactive Benefits for benefits enrollment, each welfare benefits plan offered by your organization must be a component of your Flex Master. Therefore, if you have defined a benefit plan in Benefits Administration but have not made that plan a component of a Flex Master, you must add the plan to the Flex Master using the Flex Master/Group Plan Components form (TP-SCR). If your organization does not use flexible benefits for welfare plans and so has not created a flex master, your HR department must set up a flex master and add the welfare benefits plans as components of the flex master. Then employees can enroll in benefits online using eCyborg Interactive Benefits.

☞ *Refer to the eCyborg Interactive Workforce: The Administrators' Guide for more information about for specific information about using Benefits Flex Masters.*

☞ *Refer your employees to eCyborg Interactive Workforce: A Guide to Your Benefits Information for information about using eCyborg Interactive Benefits.*

Detailed Directions

This section provides detailed directions on completing a business task.

Tasks

Assembling the implementation team

The right people with the right skills are crucial for a successful implementation.

1. Identify team members

Team members should have expertise in Human Resources, Benefits, Payroll, Information Systems, and The Solution Series administration solutions.

2. Train team members

Ensure that team members have the skills required to complete the implementation of Benefits Administration.

- Review Benefits Administration documentation.
- Attend Benefits Administration courses.

Conducting the familiarization phase

In this task, you analyze your current business processes and benefits plans and determine how you will implement those processes and define those plans in Benefits Administration. Use your current procedure manual and summary plan descriptions to complete this task.

1. Collect and review your summary plan descriptions

For each plan, document the following requirements:

- Eligibility
- Participation/Retirement (deferred plans only)
- Plan year end
- Contribution types
- Calculations (costing and coverage)

2. Address interface issues

Identify all external, automated, and manual system interfaces—for example, payroll, actuaries, and insurance carriers.

Review your Benefits Administration processes and then do the following:

- Review system conversion procedures.
- Identify required interfaces.

3. Define customization requirements

Define both your form and report customization requirements.

- Review forms.
- Determine new form and field requirements.
- Perform internal report inventory.
- Discuss and identify any specific requirements.

4. Continue the training process

Conducting the design phase

In this phase, you document your requirements and then implement them.

1. Define benefits system test requirements

Determine all the forms and reports necessary to complete the tests using the test data. Also determine which test procedures to use.

2. Review and establish option lists

- Use the Option List Display utility (CDLIST) to obtain a list of existing option lists.
- Use the Edit utility (EDIT) to edit the calculation option lists.

Note: *If you add a new value and description to a calculation option list, you must modify the associated Cyborg Scripting Language option.*

3. Review delivered benefits tables

Use the tables established for the Acme Manufacturing test company (999999) as an example when defining tables for your plans.

4. Establish security matrix

This task requires the cooperation of the Security Officer.

- Determine user access needs.
- List all online users and their security needs.
- Set up, or update, the security matrix.
- Assign user passwords and user codes.

5. Add table data to your test company

Set up your benefits plans, starting with the easiest welfare plan. Test each plan fully before you proceed to the next plan. This will help you better understand the benefits tables.

- Determine benefits Control Number.
- Document benefits table information for all plans.
- Identify required calculation options and search arguments.
- Prepare specifications for Cyborg Scripting Language coding.
- Test tables.

Use the ***Benefits Plan Worksheet*** (on page 913) to document plan information.

6. Write and test user-defined programs

- Write conversion programs.
- Write interface programs.
- Test programs.

7. Create new forms and fields

8. Create new reports

9. Complete customizations

Perform these items as required:

- Customize online forms.
- Customize delivered reports.
- Review and customize option lists.
- Review and customize benefits tables.

10. Conduct system test

- Test a limited sample of employees, perhaps 10–20. Enroll the sample employees in plans and verify the results by viewing forms and reading reports.
- Execute test runs.
- Test the payroll interface.
- Test the security matrix.

Conducting the implementation phase

1. Develop user support materials and conduct training

- Develop a procedure manual for day-to-day activities.
- Document job streams for Information Systems personnel.
- Train end users.

2. Perform parallel runs

- Test a full production cycle.
- Test all forms and tables.
- Make adjustments as required.

3. Go live

- Convert all data.
- Begin using Benefits Administration.

Review of Questions Answered

1. What expertise must the Benefits Administration implementation team possess?

2. How can the Benefits Administration implementation process be phased?

3. What does a benefits analysis entail?

4. How are plans identified in the system?

5. How can different employee groups use the same plan?

6. How does organization structure affect plan setup?

7. How are plans funded?

8. What are the security considerations?

CHAPTER 4

Setting Up Welfare Plans

In This Chapter

Introduction

Setting up employee welfare plans requires that you map your summary plan descriptions into specific benefits tables. Read this chapter carefully before beginning your benefits analysis. It will acquaint you with the issues involved in automating your benefits plans. It will also show you very specifically how to set up a variety of welfare plans.

About the examples

Throughout this section, we will be looking at examples from Acme Manufacturing's basic life insurance plan (Plan 301).

☞ *Refer to* **Sample Benefits Plans** *(on page 879) for a complete description of this plan.*

Tasks

This section explains the following:

- Establishing a benefits Control Number
- Specifying basic plan identification and rules
- Specifying plan eligibility rules
- Specifying coverage options and plan funding
- Specifying payroll deduction rules
- Associating plan statuses with coverage options
- Associating separation activities with resulting plan statuses

Prerequisites

Before you can define employee welfare plans, the following must be established for:

- Organizations including Hours, Earnings, and Deductions (HEDs)
- Employees
- Activity Options
- Employee Status
- Activity and Resulting Employee Status Rules

If your organization has already implemented the basic functionality of Human Resources Administration, these items will already be defined.

Questions answered

This chapter answers the following questions:

1. What are welfare plans?
2. How are benefits tables associated with organizations?
3. Which benefits tables are used to define welfare plans?
4. What plan types are used for welfare plans?
5. What are plan classes and how are they used?
6. What are search types and search arguments?
7. How are plan eligibility requirements recorded?
8. How are plan coverages and contributions accommodated?
9. What are prototype HEDs?

10. How is employee plan status recorded and tracked?
11. What kind of plan documentation is available for welfare plans?

What are welfare plans?

Before you can define a benefits plan in Benefits Administration, you need to categorize it as a welfare plan or a deferred plan.

Plans that provide immediate benefits to employees are considered welfare plans. Examples include health insurance (medical and dental), disability (short and long term), and life insurance.

Plans that provide future benefits to employees are considered deferred plans. In general, these are retirement or pension plans. In Benefits Administration, deferred plans can be defined as defined benefit, defined contribution, or thrift/savings.

☞ *Refer to* **Setting Up Deferred Plans** *(on page 111) for additional information on deferred plans.*

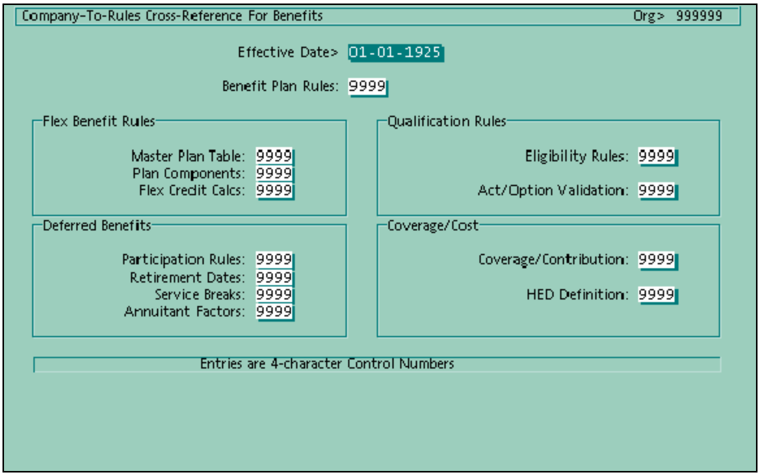
Benefits Control Numbers and your organization

You link your organization's structure to benefits tables through a benefits Control Number. This information is recorded on the Organization-To-Rules Cross-Reference For Benefits form (AY-SCR).

A benefits Control Number is a four-position, alphanumeric identifier that specifies which benefits tables are to be used by an organization. Several or all companies may access the same set of benefits tables, or each company may have its own set of benefits tables.

Note: *If eCyborg Interactive Benefits is installed, this entry may not contain characters considered illegal by the operating system (such as blank, @, #, and so forth).Contact your technical staff to identify illegal characters.*

For example, the following Organization-To-Rules Cross-Reference For Benefits form (AY-SCR) shows that Acme Manufacturing's Production Control organization (999999) uses the benefits Control Number 9999:



Company-To-Rules Cross-Reference For Benefits Org> 999999

Effective Date> 01-01-1925

Benefit Plan Rules: 9999

Flex Benefit Rules
Master Plan Table: 9999
Plan Components: 9999
Flex Credit Calcs: 9999

Qualification Rules
Eligibility Rules: 9999
Act/Option Validation: 9999

Deferred Benefits
Participation Rules: 9999
Retirement Dates: 9999
Service Breaks: 9999
Annuitant Factors: 9999

Coverage/Cost
Coverage/Contribution: 9999
HED Definition: 9999

Entries are 4-character Control Numbers

Naming strategies for benefits Control Numbers

There is no relationship between the name of a benefits Control Number and an organization's control structure. For Acme Manufacturing, the benefits Control Number could just as easily have been 1234 or AAAA. Choose a benefits Control Number that is meaningful to you.

Note: *You must use the same benefits Control Numbers for each text box on the Organization-To-Rules Cross-Reference For Benefits form (AY-SCR).*

Number of benefits Control Numbers needed

To determine how many benefits Control Numbers you need, refer to this table:

Situation	Actions
All benefits plans apply to all companies	1. Define only one benefits Control Number. 2. Complete an Organization-To-Rules Cross-Reference For Benefits form (AY-SCR) for each company, specifying the same benefits Control Number.
Different benefits plans apply to different companies	1. Define a separate benefits Control Number for each company. 2. Complete an Organization-To-Rules Cross-Reference For Benefits form (AY-SCR) for each company, specifying its unique benefits Control Number.

Apply the Concept
How many benefits Control Numbers will you need for your organization?

Benefits Control Numbers and benefits plans

Before you can define any benefits tables for a benefits plan, you must first establish a benefits Control Number and complete the Organization-To-Rules Cross-Reference For Benefits form (AY-SCR) for each organization. The benefits Control Number is then automatically linked and displayed on all benefits tables defined for a particular organization.

Just as a Plan ID links a set of benefits tables together, a benefits Control Number links a set of benefits plans (and, subsequently, their tables) together. It represents a higher level of organization than a Plan ID.

This graphic depicts the relationship between the benefits Control Number and the Plan ID. Suppose Acme Manufacturing decided to split the Production Control organization (999999) into two divisions, Corporate (999999) and Field (998888), and that each of its divisions should have its own benefits plans. They would then define two benefits Control Numbers. Benefits Control Number 9999 has its set of benefits plans defined; benefits Control Number 8888 has its set of benefits plans defined. The Corporate Division (999999) can use the benefits Control Number 9999; the Field Division (998888) can use the benefits Control Number 8888.

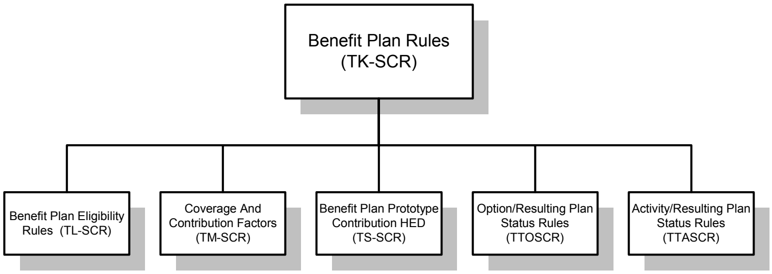
- **Establishing a benefits Control Number** ***(on page 84)***

For detailed directions on setting up a Control Number.

Apply the Concept
What benefits Control Numbers will you use?

Overview of welfare plan tables

The following figure shows the basic tables used to set up a welfare plan. Once you have defined a benefits Control Number, you can then use these tables to set up a welfare plan.



To set up a welfare plan, you first define a Benefit Plan Rules table (TK-SCR) and then its supporting tables. This chart explains the purpose of each table. The tables are generally completed in the order shown.

Table	Purpose
Benefit Plan Rules (TK-SCR)	Establishes the basic rules for the plan, including its name, type, year-end, and mid-year change reasons. Search types/arguments are also added here.
Benefit Plan Eligibility Rules (TL-SCR)	Establishes requirements for plan admittance. You can restrict eligibility by an employee's age, length of service, or both. In addition, you must specify the valid employment statuses required for entry into the plan. The eligibility requirements you set up are automatically applied to each employee during the enrollment process.
Coverage And Contribution Factors (TM-SCR)	Specifies how employer and employee contributions should be calculated. If necessary, you specify how coverage amounts should be calculated. Commonly used coverage and contribution rules are provided as calculation option lists.
Benefit Plan Prototype Contribution HED (TS-SCR)	Describes a plan contribution, including frequency, calculation method to use, and when deductions should begin.
Option/Resulting Plan Status Rules (TTOSCR)	Defines the valid options for the plan and how those options affect employee plan status.

Table	Purpose
Activity/Resulting Plan Status Rules (TTASCR)	Defines the effect any separation activities may have on an employee's plan status.

Number of tables needed to define a welfare plan

The exact number of tables you need to define for a particular welfare plan is determined by the number of options available in the plan as well as any search arguments defined. For example, if the plan offers separate options for employees only and for employees and all their dependents, and separate amounts are charged for the different coverages, you would need to define two Coverage And Contribution Factors tables (TM-SCR).

Consult the following table to determine the number of tables needed to define a benefits plan:

Table	**Number needed per plan**
Benefit Plan Rules (TK-SCR)	One.
Benefit Plan Eligibility Rules (TL-SCR)	One. Will need additional tables if you are using an eligibility search argument.
Coverage And Contribution Factors (TM-SCR)	Define one table for each option and contribution type for which you want to track a cost or coverage. Will need additional tables if you are using a calculation search argument.
Benefit Plan Prototype Contribution HED (TS-SCR)	Define one table for each type of contribution (basic pretax, basic posttax, company, supplemental pretax, and supplemental posttax) required by a plan. Will need additional tables if you are using an HED Prototype search argument.
Option/Resulting Plan Status Rules (TTOSCR)	Define one table for each valid option for the plan (for example, 'Employee Only' or 'Waived'). Will need additional tables if you are using an eligibility search argument.
Activity/Resulting Plan Status Rules (TTASCR)	Define one table for each employee activity that may result in an employee losing coverage under the plan. Will need additional tables if you are using an eligibility search argument.

Benefit plan rules

You begin defining a welfare plan by recording basic information about the plan on the Benefit Plan Rules form (TK-SCR). On this form, you define such information as the plan ID, plan year end, plan name, plan type, and the Hours, Earnings, and Deductions (HEDs) for the plan.

Use of plan types

Plan types are available from the Plan Types option list (BA16). Several types of welfare plans are included in this option list, including:

- Dental
- Life Basic Non-Tax
- Medical

Options 01–19 of the Plan Types option list (BA16) are reserved for welfare plan options. You may modify the descriptions for these options; however, you must use only options 01 through 19 for your welfare plans. During the enrollment process, these options are checked by the Welfare Plan Enrollments/Changes form (55-SCR).

Use of plan classes

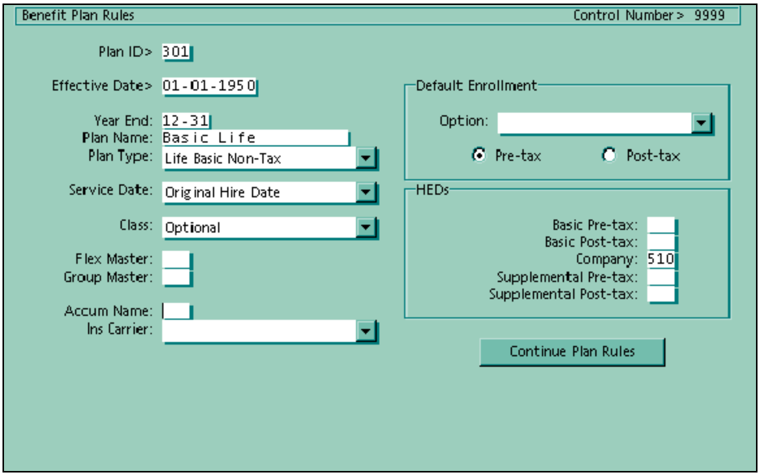
You can make enrollment in certain benefits plans mandatory for your employees. Enrollment in other plans may be optional. If you have flex plans, you may want employees automatically enrolled in default or core plans if they fail to return their enrollment forms on time. In Benefits Administration, you designate these types of plan policies by assigning each plan to a predefined plan class. Plan classes determine plan usage or availability. Available classes are from the Plan Class option list (BA17) and are recorded on the Benefit Plan Rules form (TK-SCR).

Plan Class Value	Explanation
#	None
A	Automatic
I	Inactive Plan
M	Mandatory
N	Not Available
O	Optional

Plan availability

If a plan is no longer available to employees, you can de-enroll the employees and then set the plan class to 'Not Available' or 'Inactive Plan'. This prevents any employees from accidentally being enrolled in the plan, and yet maintains the plan history.

This form shows the benefit plan rules for Acme Manufacturing's basic life insurance plan:



Using special plan rules for employee groups

When different plan rules apply to different groups of employees, you can define search types and search arguments to implement those rules. This allows you to use the same plan for the different groups, rather than having to define a separate plan for each group.

To define these rules, you identify three pieces of information:

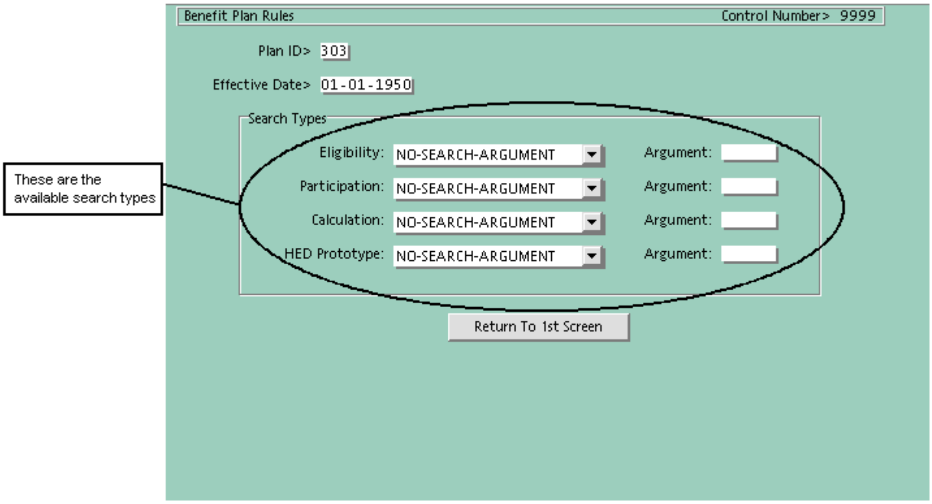
- Search type—the category of search to be done
- Search argument name—the name of the field to use in the search or an indication that a Cyborg Scripting Language program is required
- Search argument value—the specific field values to use or the name of the Cyborg Scripting Language program

Search types

Benefits Administration provides four categories of search types:

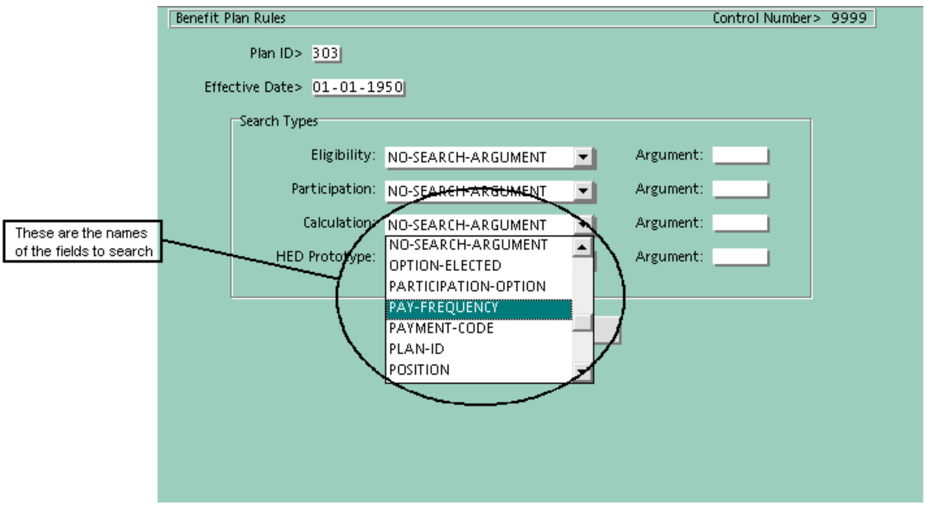
- Eligibility
- Participation (for deferred plans only)
- Calculation
- HED Prototype

Plan rules might differ by eligibility, participation requirements, cost or coverage, company match rules, or deduction information. You enter search types on the second panel of the Benefit Plan Rules form (TK-SCR):



Search arguments

After determining the search type or category to use, identify the field you want the system to look at or check for particular values. Commonly used fields for search arguments are provided in a list box for each search type. This form shows some of the fields available for a calculation search type:

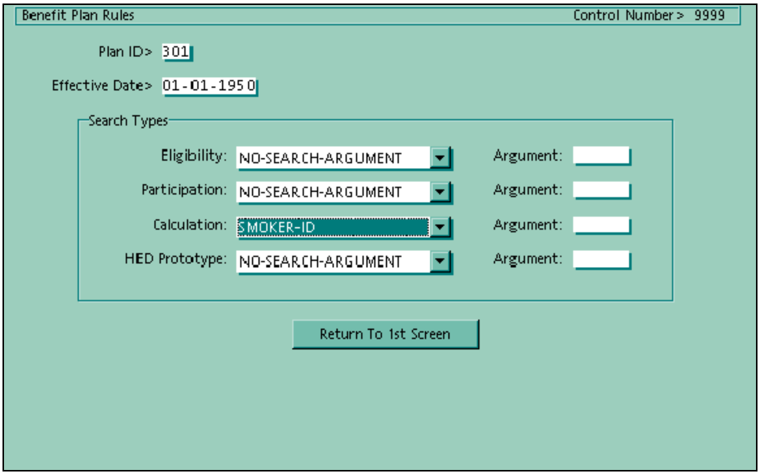


Each field has values stored in the system. These values will be used as the search argument. For each Search Type field you choose, be sure that you have captured the requisite data.

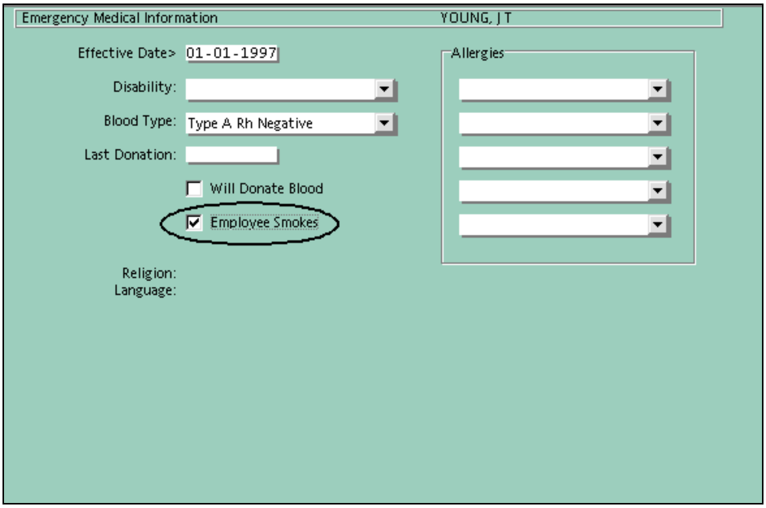
You enter the specific field values to search for on one of the benefits plan rules tables. This chart documents where search arguments are recorded for different search types:

For this search type:	Enter the associated search argument on these tables:
Eligibility	Benefit Plan Eligibility Rules (TK-SCR) Activity/Resulting Plan Status Rules (TTASCR) Option/Resulting Plan Status Rules (TTOSCR)
Participation (deferred plans only)	Benefits Participation Rules Table (TN-SCR) Benefits Retirement Dates Rules Table (TJ-SCR)
Calculation	Coverage And Contribution Factors (TM-SCR)
HED Prototype	Benefit Plan Prototype Contribution HED (TS-SCR)

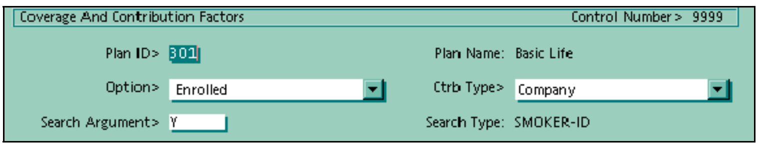
For its life insurance, Acme Manufacturing wants employees who smoke to pay more than nonsmoking employees. Because the cost of the plan is different for smokers and nonsmokers, the life insurance plan would use a calculation search type, as follows. Acme wants the system to search on the field SMOKER-ID:

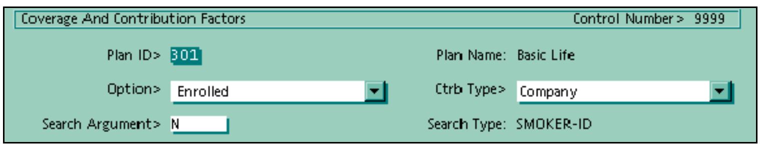


The values for SMOKER-ID are captured during the enrollment process and entered on the Emergency Medical Information form (15-SCR):



SMOKER-ID contains two values: Y and N. One table is required for each search argument value. The search argument values (Y and N) would be entered on the appropriate Coverage And Contribution Factors form (TM-SCR), as shown in the following examples:





Of course, each search argument would require a separate contribution rule.

Notice that the Search Type field name, SMOKER-ID, is displayed on the Coverage And Contribution Factors form (TM-SCR), and that the search argument value is a key field. You cannot complete this form without entering a search argument value if you have indicated there is a Calculation search argument on the Benefit Plan Rules form (TK-SCR).

When search arguments require Cyborg Scripting Language programs

When a search argument requires a field that is not listed in the list box for a search type, or you want the system to look at a combination of fields, select 'E/L-PROGRAM-REQUIRED' from the list box. Then, enter the name of the Cyborg Scripting Language program to use in the Search Argument text box next to the search type.

You may also need to enter the specific values required by the Cyborg Scripting Language program in the Search Argument text box on the applicable table form. Examine the documentation for the Cyborg Scripting Language program to determine what to enter in the Search Argument text boxes on the tables.

Search argument ranges

Some search types result in search arguments that define range limits. Examples would be annual salary, hours-per-period, and age. The value you enter in the Search Argument text box must be the ceiling or upper limit of the range.

Suppose a plan had three different premium rates based on age, as follows:

Age definition in plan rules	Value in Search Argument text box	Translation of search argument value
Under 36	35	Through one day prior to the 36th birthday.
36–55	55	36 years of age through one day prior to 56th birthday.
Over 55	999999	56 years of age and older.

To record these age maximums, you would complete three Coverage And Contribution Factors forms (TM-SCR), one for each argument and for each contribution type. The search argument value would define the upper range of the age limit for the cost calculation.

This particular plan requires a search type of Calculation. Because age is being used as the search argument, a Cyborg Scripting Language program, BE-AGE, is required to calculate the ages; the value 'E/L-PROGRAM-REQUIRED' would be selected in the Calculation list box. The accompanying search argument stating the name of the program to use would be 'BE-AGE'.

Not all search arguments that use ranges require the use of Cyborg Scripting Language programs. For example, there is a range already built into the ANNUAL-SALARY search argument. If you choose ANNUAL-SALARY as a search argument, you would enter the salary ranges on the applicable table forms.

Delivered search argument programs

Two search argument programs are delivered as a standard part of Benefits Administration: BE-AGE and BEDATE. To use these programs, you must select 'E/L-PROGRAM-REQUIRED' (00) in the Search Type list box and enter the program name in the associated Search Argument text box.

Using age comparisons as search types: BE-AGE

If you want to use age as a basis for a search type, you can use the Cyborg-delivered Cyborg Scripting Language program, BE-AGE. This program uses the birth date on file to calculate a participant's age in years, months, and days. It then checks the result against the Search Argument text box of the appropriate table.

Using service date comparisons as search types: BEDATE

This program is a prototype program you can use to do date testing based on an employee's service date. As delivered, BEDATE calculates against a date of September 10, 1985 (US and Canada) or 10 September, 1985 (elsewhere). You must change this date, using the instructions in the BEDATE Cyborg Scripting Language program, to reflect the plan requirements.

If the employee's service date is prior to September 10, 1985 (US and Canada) or 10 September, 1985 (elsewhere), BEDATE searches for tables with a value of 'A' in the Search Argument text box. If the employee's service date is equal to or greater than September 10, 1985 (US and Canada) or 10 September, 1985 (elsewhere), it searches for tables with a value of 'B' in the Search Argument text box.

- **Specifying basic plan identification and rules** ***(on page 86)***
For detailed directions on setting up basic plan rules.

Apply the Concept
Do different plan rules apply to different groups of employees within your organization? If yes, how will you use search types and search arguments to make the distinction between groups?

Making mid-year plan changes

Employees enrolled in flex plans are able to change their plan choices mid-year if their employment circumstances or those of their spouse change. They may also change their enrollments if a plan substantially changes its cost/coverage. The check boxes on the right side of the second panel of the Benefit Plan Rules form (TK-SCR) allow you to set up mid-year election change rules for each component plan. Select the Flex Change rules that will remain constant for that plan for the remainder of the year. These rules can affect any plan participant at any time, but not all participants at once. For example, change reasons such as Pay Incr/Decrease, Change P/T to F/T, Change F/T to P/T, Trans to Other Plan, Spouse Change in Ben, Dep Chg in Benefit, Dep Care FSA Chg, and Transfer Out of Area remain applicable throughout the year.

Note: *Dep Care FSA Chg is applicable only to plans that have a plan type of FSA Dependent Care.*

See also:

- Specifying basic plan identification and rules ***(on page 86)***

For detailed directions on specifying mid-year flex plan change rules.

Plan eligibility requirements

Most benefits plans require that employees meet some type of requirement before becoming eligible to enroll in the plans. Many organizations control their escalating benefits costs, at least in part, by using carefully chosen eligibility requirements. In Benefits Administration, plan eligibility can be restricted by the satisfaction of a rule and by employee status. You define the eligibility requirements for a benefits plan on the Benefit Plan Eligibility Rules form (TL-SCR).

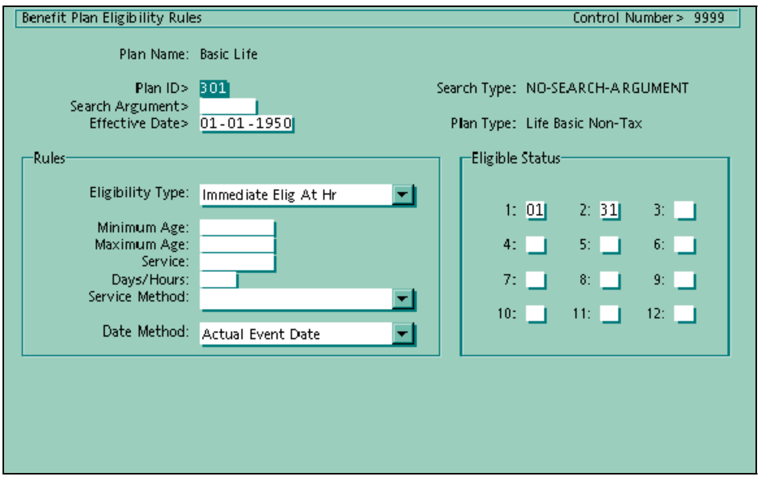
Eligibility rules

Eligibility rules are usually based on age, length of service, or both. The specific eligibility rule you use will come from the Eligibility Type Rules option list (BA18).

Note: *Eligibility Type Rules is a calculation option list whose translation values should not be altered.*

Use the Date Method list box to indicate how a date should be rounded. Values are from the Date Calc Method option list (BA15).

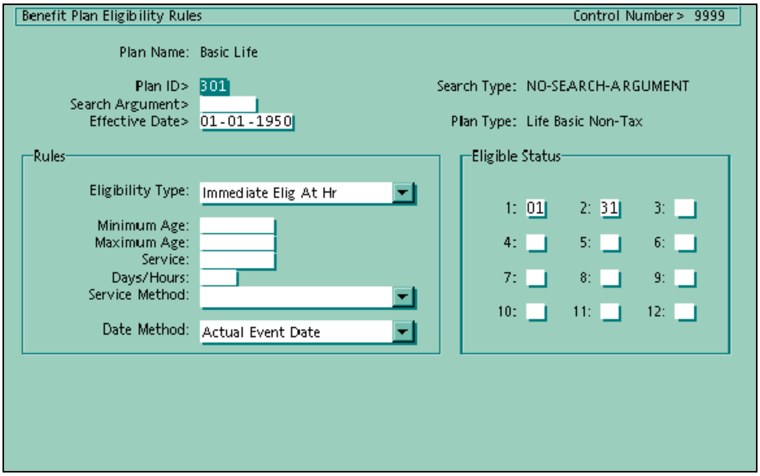
For Acme Manufacturing, coverage in the basic life insurance plan is available to employees as soon as they are hired. Acme uses an eligibility type of 'Immediate Elig At Hr'; eligibility is not based on age or length of service. Acme uses a date method of 'Actual Event Date' to indicate how the eligibility date should be calculated:



Eligibility status

You must determine what types of employees are eligible for each benefits plan—that is, what statuses they must hold to be eligible. The available statuses are those in the Employee Status option list (HR10). For each benefits plan, you must establish at least one entry status.

Acme Manufacturing's basic life insurance plan is available to all active, full-time employees and to those salaried, regular full-time employees on leaves of absence with pay. They would use Eligible Status options 01 and 31, as shown on the following form:



See also:

- Specifying plan eligibility rules ***(on page 90)***

For detailed directions on setting eligibility rules.

Apply the Concept

Describe one plan's eligibility policies for your organization.

Apply the Concept

Which form, rules, date methods, and employee statuses will you use to implement these eligibility policies?

Plan coverages

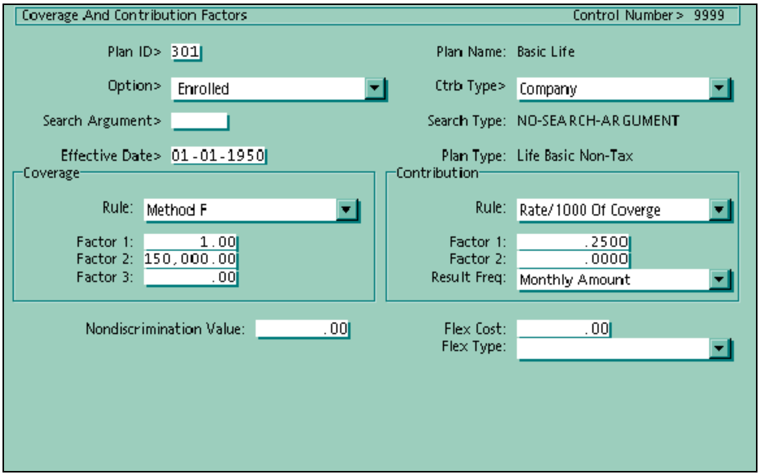
The coverages described in your summary plan descriptions will be translated into options and coverage rules in Benefits Administration.

Options

Options are the coverage types employees select when enrolling in a benefits plan—for example, 'employee only/single' or 'employee and all dependents'. The values for the options are obtained from the Option Elected option list (BA03). You should edit this option list and keep only those values applicable to your welfare and deferred plans.

☞ *Refer to the* **Calculation Option List Quick Reference** *(on page 815) for information on values in this option list that should not be altered.*

You record a benefits plan's options on the Coverage And Contribution Factors form (TM-SCR). On the following form, you can see that for Acme Manufacturing's basic life insurance plan, the option is 'Enrolled':



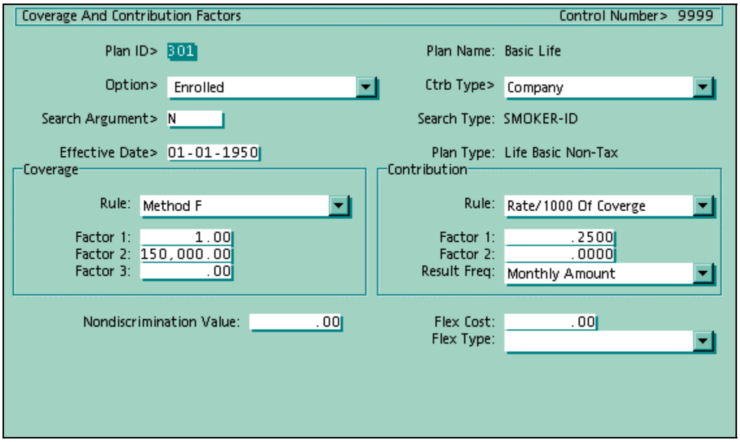
Plan type and options

Certain types of welfare plans typically use particular options. For example, life insurance plans usually use an option of 'Enrolled' or 'Coverage = n x salary' (where 'n' reflects the multiplier). On the other hand, health insurance plans typically use options such as 'Employee Only/Single' or 'Family/EE & All Deps'.

Coverage rules

Coverage rules specify how coverage amounts should be calculated. The values for coverage rules are obtained from the Coverage Calc Method option list (BA20). Review the values of this option list carefully to determine if they meet your needs or if you must add values.

Acme Manufacturing offers its employees a basic life insurance plan that provides coverage at the rate of one times their annual salary to a maximum of 150,000.00. The coverage rule needed is Method F. This states that the value of Factor 1 should be multiplied by the annual salary equivalency. The maximum, 150,000.00, is entered into Factor 2:



Refer to the **Calculation Option List Quick Reference** *(on page 815) for documentation on this option list. You should not change the meaning of any of the options in this option list. If you add an option, you must also add method code logic.*

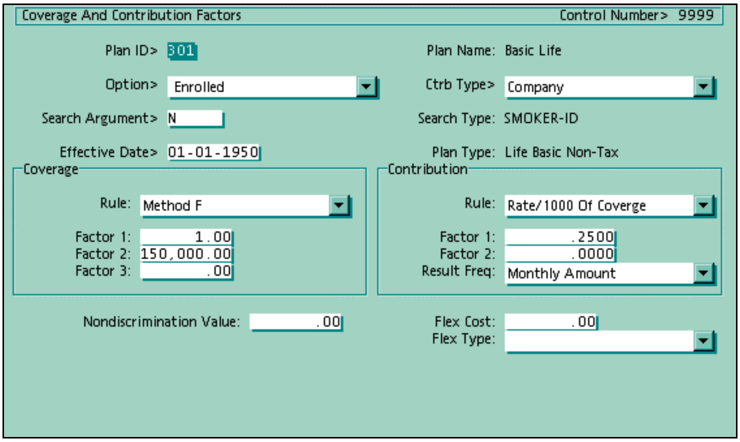
Apply the Concept

Describe the coverage options and contribution amounts for the plan in the previous question.

Contribution rules

The actual contribution amount for a benefits plan is calculated by a contribution rule. The delivered contribution rules are obtained from the Contribution Rules option list (BA31) and entered on the Coverage And Contribution Factors form (TM-SCR).

Let us look again at the basic life insurance plan that offers employees coverage at the rate of one times their annual salary to a maximum of 150,000.00. The company contribution—the amount added each pay period—is based on a rate of .25 per 1,000.00 of coverage. The contribution rule states that the rate is per 1,000.00 of coverage. Factor 1 contains the explicit rate to use in the calculation formula. The frequency of the contribution is recorded in the Result Freq list box. The Result Freq list box on this form records contribution frequency, not pay frequency:



☞ *Refer to the* **Calculation Option List Quick Reference** *(on page 815) for documentation on this option list. You should not change the meaning of any of the options in the Contribution Rules option list. If you add an option, you must also add method code logic.*

Note: Flexible spending account (FSA) plans should be set up using Contribution rule E8, FSA Status/Pro-rate, in order to handle mid-year enrollment and life status changes.

☞ *Refer to* **Monitoring and Costing Plans** *(on page 577) for information about setting up FSA plans.*

See also:

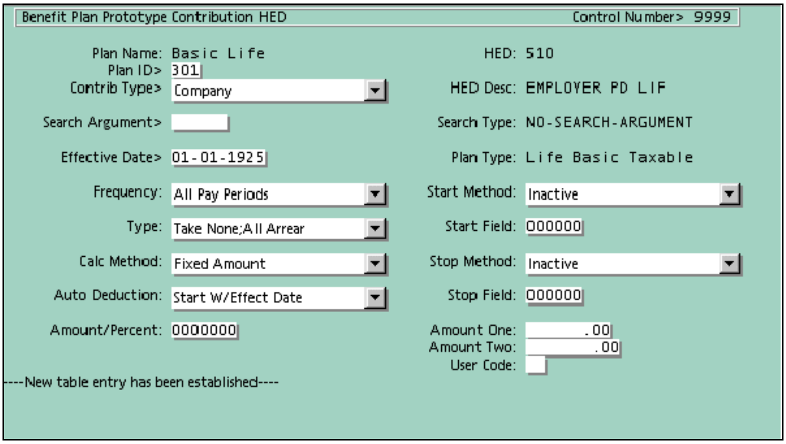
- Specifying coverage options and plan funding ***(on page 93)***

For detailed directions on setting up coverage options and plan funding.

Recording payroll deductions and contributions

You must fully describe each HED defined for a benefits plan. That means you must indicate an effective date, choose how often the deduction/contribution should be taken, and specify a calculation method. You record this information on the Benefit Plan Prototype Contribution HED form (TS-SCR).

Here is an example of a Prototype HED for Acme Manufacturing's basic life insurance plan. The plan is paid for entirely by the employer. Each pay period, a fixed amount will be contributed by the company to pay for the premium. By choosing 'Fixed Amount', you indicate that the amount will actually be calculated by the Coverage And Contribution Factors form (TM-SCR):



Use of arrears

When defining payroll deductions, you must indicate what should happen if the full amount of the deduction can not be met with the current pay amount. The available options are from the Arrears option list (PP10). Work with your Payroll specialist to determine the correct options to choose. The option that you specify on the Benefit Plan Prototype Contribution HED form (TS-SCR) overrides the option set up in the payroll Employee Earnings And Deductions form (HH-SCR).

Across-the-board deductions

If you want to define a deduction that will be taken for all plan participants, you would choose the applicable Calc Method and then enter a percentage or amount in the Amount/Percent text box.

☞ *Refer to the Option List Quick Reference in the Payroll Organization Setup documentation for a thorough discussion of the Arrears option list (PP10).*

Recording when deductions should begin

You record when a deduction should begin by selecting a value from the Auto HED Creatn Swtc option list (BA05) in the Auto Deduction list box. This option determines whether the HED will be written to the payroll system when the HED becomes effective. For example, Acme Manufacturing's basic life insurance plan uses an Auto Deduction option of 'Start W/Effect Date'.

Work closely with your Payroll specialist to determine the correct value for the Auto Deduction.

See also:

- **Specifying payroll deduction rules** ***(on page 97)***

For detailed directions on setting up deduction rules.

Apply the Concept
Which form, rules, and factors will you use to define the plan in the previous question?

The importance of employee plan status

Whether employees are eligible to receive benefits depends on their status in a plan. It is crucial that employee plan statuses accurately reflect their activities at all times. To determine your employee plan status requirements, examine your summary plan descriptions and legal documents and consider the effect of any applicable legislation.

Employee plan status can be affected in two ways: by a particular option or by a separation activity. The values for employee plan statuses are obtained from the Plan Status option list (BA04). Do not change the value of any options in this option list.

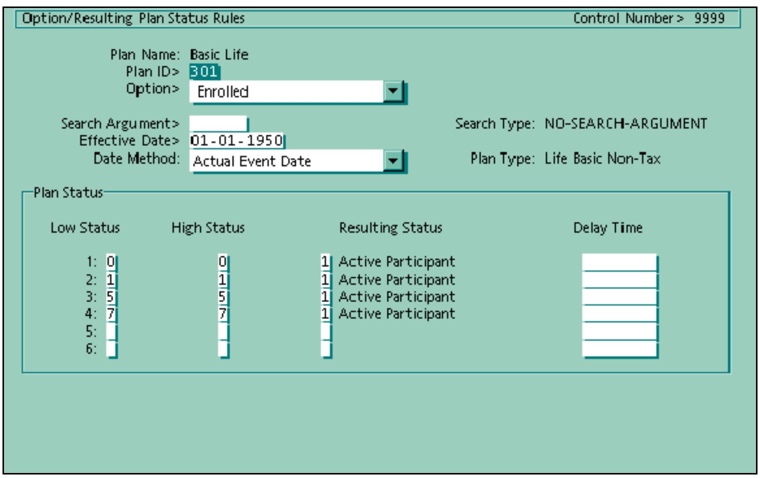
☞ *Refer to the* **Calculation Option List Quick Reference** *(on page 815) for details on the Plan Status option list (BA04).*

Options and employee plan status

You will need to analyze the impact of plan options on an employee's plan status. For each available plan option, identify the current plan statuses that allow an employee to elect the option. Then identify what the resulting plan status will be. You will enter this information on the Option/Resulting Plan Status Rules form (TTOSCR).

In general, you define one Option/Resulting Plan Status Rules table (TTOSCR) for each valid option for the benefits plan. However, if you have defined an eligibility search type in the basic rules for a plan, you will have to create a separate option table for every search argument as well.

The following form shows the Option/Resulting Plan Status Rules form (TTOSCR) for Acme Manufacturing's basic life insurance plan for the coverage option 'Enrolled'. Notice that employees can have four possible plan statuses to enter the plan: 0 (no prior status), 1 (active participant), 5 (inactive lost coverage), and 7 (waived). Acme Manufacturing wants employees with these plan statuses to be able to now choose a valid option and then become active participants in the plan:



The statuses shown allow for the following activities:

Low Status–High Status	Explanation
0-0	An employee who was never enrolled in the plan can enroll and become an active participant.
1-1	An employee who had been an active participant with one option can become an active participant with another option.
5-5	An employee who had previously lost coverage in the plan can now become an active participant.
7-7	An employee who had previously waived coverage in the plan can now become an active participant.

Allowing for plan waivers and de-enrolls

When setting up a welfare plan, it is good practice to allow for a waiver (unless the plan is mandatory) and for the eventual de-enrollment of employees. Be sure to include these values in your coverage options.

See also:

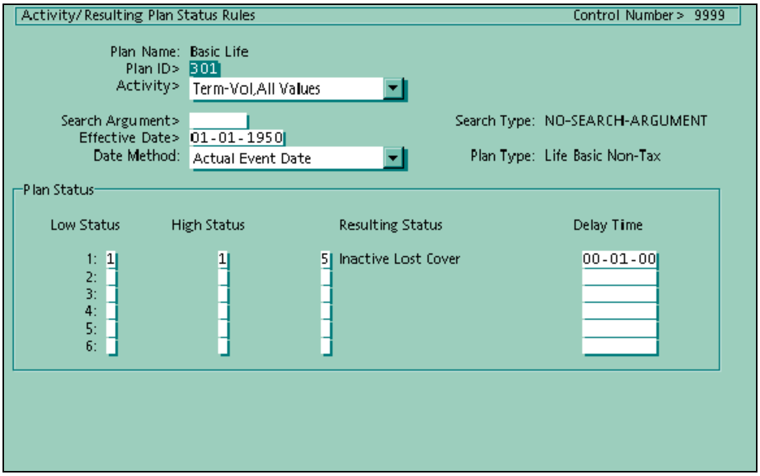
- **Associating plan statuses with coverage options *(on page 100)***

For detailed directions on associating plan statuses with coverage options.

Separation activities and employee plan status

Employee separation activities, such as leaves of absence, disability, and terminations, are inevitable. Each activity may have an impact on an employee's status in a benefits plan. Examine each welfare plan and determine what will happen to employees if they have a separation activity. For example, are employees who go on paid leaves of absence still covered by your life insurance plan? You use the Activity/Resulting Plan Status Rules form (TTASCR) to define separation activities and the resulting employee plan statuses.

For example, the following form shows that active, full-time employees of Acme Manufacturing who terminate voluntarily will lose their coverage on the day of their termination. However, a grace period of one month has been allowed. Therefore, the system will future date this shutoff to one month after the termination date recorded on the Separations And Terminations form (96-SCR):



Delaying the effect of the loss of coverage

Employers often delay the loss of coverage for employees. You can specify an amount of time that will delay the loss of coverage. For example, Acme Manufacturing extends coverage under its basic life insurance plan for a variety of reasons, including voluntary terminations, disability, retirement, and layoffs.

Complete a table for each activity that will result in a change of status for an employee. The following table shows a sampling of the Activity/Resulting Plan Status Rules tables (TTASCR) for Acme Manufacturing's basic life insurance plan. Each row represents a separate Activity/Resulting Plan Status Rules table (TTASCR):

Activity	**Low Status**	**High Statu s**	**Resulting Status**	**Delay Time**
Term-Vol, All Values	1	1	5	00-01-00
Term-NonVol, All Valu	1	1	5	
Disab-All Values	1	1	5	01-00-00
Retirement-All Value	1	1	5	00-01-00
Death-All Values	1	1	5	
Layoff-All Values	1	1	5	00-02-00

- All employees who terminate voluntarily get a one-month extension of coverage.
- Employees who become disabled get a one-year extension of coverage.
- Employees who retire get a one-month extension of coverage.
- Employees who are laid off get a two-month extension of coverage.

See also:

- **Associating separation activities with resulting plan statuses** ***(on page 104)***

For detailed directions on associating separation activities with resulting plan statuses.

Apply the Concept
Which separation activities change an employee's status in the plan in the previous question?

Apply the Concept
Will any of these activities have grace periods, and for how long?

Apply the Concept
How will you define these separation rules?

Plan documentation for welfare plans

It is always a good idea to keep a notebook with paper copies of your benefits plans. Benefits Administration provides several key reports you can use to document your plan rules. You will find these reports especially useful for testing during system implementation:

Report	Description
Plan Rules (9K-RPT)	Reflects data from the Benefit Plan Rules form (TK-SCR).
Plan Eligibility (9L-RPT)	Reflects data from the Benefit Plan Eligibility Rules form (TL-SCR).
Plan Factors (9M-RPT)	Reflects data from the Coverage And Contribution Factors form (TM-SCR).
Plan Prototype Contribution HEDs (9S-RPT)	Reflects data from the Benefit Plan Prototype Contribution HED form (TS-SCR).
Benefits Activity And Option Validation Table Records (9T-RPT)	Reflects data from the Option/Resulting Plan Status Rules form (TTOSCR) and the Activity/Resulting Plan Status Rules form (TTASCR).
Benefit Plan Table (9KARPT)	Prints all the table records for a particular benefits plan or for a range of benefits plans.

☞ *Refer to the* **Report Quick Reference** *(on page 615) for samples of these reports and the parameters used to define these reports.*

Annual Form 5500

Cyborg provides the following report to supply you with the data you will need to complete IRS Form 5500. This form is necessary to meet the requirements set forth by the Employment Retirement Income Security Act of 1974 (ERISA) and the Internal Revenue Code.

- IRS Form 5500 - Lines 7(a) - 7(h) report (8A-RPT)—Produces data necessary to complete Lines 7(a)-(h) of Form 5500, the Annual Return/Report of Employee Benefit Plans.

☞ *Refer to the* **Report Quick Reference** *(on page 615) for a sample of this report and the parameters used to define it.*

Inquiry forms for viewing plan rules

The following forms can be used to view plan rules:

Form	Description
Plans Rules Table form (TKISCR)	Reflects data from the Benefit Plan Rules form (TK-SCR). Each form displays information on up to 16 plans. Search argument fields are not included in the display.
Eligibility Rules Tables form (TLISCR)	Reflects data from the Benefit Plan Eligibility Rules form (TL-SCR). Each form displays information on up to 16 plans.
Plan Factors Table form (TMISCR)	Reflects data from the Coverage And Contribution Factors form (TM-SCR). Each form displays up to 16 records.
Plan Prototype Contrib Table form (TSISCR)	Reflects data from the Benefit Plan Prototype Contribution HED form (TS-SCR).
Activity And Option Validation Table form (TTISCR)	Reflects data from the Option/Resulting Plan Status Rules form (TTOSCR) and the Activity/Resulting Plan Status Rules form (TTASCR).

Plan worksheets

To help you set up your welfare plans, Cyborg has developed a Benefits Plan Worksheet. Use this worksheet to record the Plan ID, plan name, valid options, contributions, and HEDs for each plan. You will find it helpful to complete these worksheets before you begin building your benefits tables.

☞ *Refer to the* **Benefits Plan Worksheet** *(on page 913) for a copy of the worksheet.*

eCyborg Interactive Benefits considerations when implementing Benefits Administration

To use eCyborg Interactive Benefits for benefits enrollment, each welfare benefits plan offered by your organization must be a component of your Flex Master. Therefore, if you have defined a benefit plan in Benefits Administration but have not made that plan a component of a Flex Master, you must add the plan to the Flex Master using the Flex Master/Group Plan Components form (TP-SCR). If your organization does not use flexible benefits for welfare plans and so has not created a flex master, your HR department must set up a flex master and add the welfare benefits plans as components of the flex master. Then employees can enroll in benefits online using eCyborg Interactive Benefits.

☞ *Refer to the eCyborg Interactive Workforce: The Administrators' Guide for more information about for specific information about using Benefits Flex Masters.*

☞ *Refer your employees to eCyborg Interactive Workforce: A Guide to Your Benefits Information for information about using eCyborg Interactive Benefits.*

Detailed Directions

This section provides detailed directions on completing a business task.

Tasks

Completing the Guided Practice

In the Guided Practice for this section you will define a dental insurance plan. Specific details for entering plan values are described in the steps for the tasks. This table provides a brief summary of the plan:

Item	**Description**
Options	Provides for employee only/single and employee and all dependents. Must provide for waivers and de-enrollments.
Cost	For single coverage: 15.00 per month. For family coverage: 30.00 per month. Cost is paid by the employee as a basic posttax deduction. It is deducted from the employee's check every pay period.
Eligibility	Any full-time employee who has been employed for six months is eligible.
Separation activity	If the employee terminates voluntarily, coverage ends at the time of termination.

Establishing a benefits Control Number

Note: *Before beginning this task, be sure that you are working with the correct organization. The benefits Control Number establishes which tables are to be used for an organization. You can not define any tables for an organization until a valid benefits Control Number has been established.*

To establish a benefits Control Number, follow these steps:

1. Access the Organization-To-Rules Cross-Reference For Benefits form (AY-SCR)

Access this form by making the following selection from the Navigator:

Component: Benefit Plan Setup and Maintenance
Process: Welfare Plans
Task: Organization/Rules X-Reference

For practice, access the Organization-To-Rules Cross-Reference For Benefits form (AY-SCR) for organization 999999. In the test data, a benefits Control Number has already been established for organization 999999, so when you access this form, it will already be complete for organization 999999. This practice step and the next two practice steps have you confirm that a benefits Control Number has been established for organization 999999.

2. Enter the Effective Date

This date must be early enough to cover the original hire date of the first employee in your organization. Many customers determine the original hire date of the employee with the greatest seniority and then set an effective date of one day prior to that date.

Enter the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For practice, verify that the Effective Date is '01-01-1925'.

3. Enter the Control Number in the associated table text boxes

You must use the same Control Number in the text boxes for all the benefits tables you will define for this organization. You can think of this benefits Control Number as a table ID. If eCyborg Interactive Benefits is installed, this entry may not contain characters considered illegal by the operating system (such as blank, @, #, and so forth).

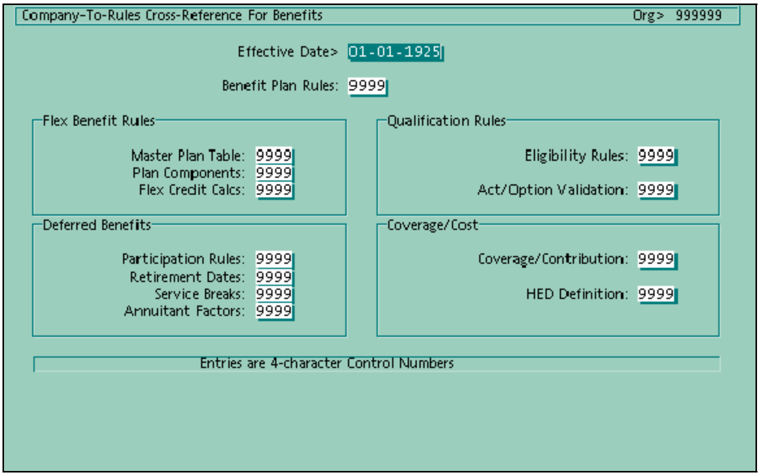
For practice, verify that the benefits Control Number '9999' has been entered into all the table text boxes on this form.

4. Click Save or press Enter

The Organization-To-Rules Cross-Reference For Benefits table record (AY-SCR) is created, and the following message is displayed: '—New table entry has been established—'

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



See also:

■ Benefits Control Numbers and your organization ***(on page 57)***

For a description of determining the benefits Control Number for an organization.

Specifying basic plan identification and rules

To specify basic plan identification and rules, use the Benefit Plan Rules form (TK-SCR).

Note: *If benefit plans have already been established for a benefits Control Number, the first table record will be displayed when you access a particular table form. You may find it helpful to clear the text boxes before entering values for a new table record.*

1. Access the Benefit Plan Rules form (TK-SCR)

Access this form by making the following selection from the Navigator:

Component: Benefit Plan Setup and Maintenance
Process: Welfare Plans
Task: Plan Name and Basic Rules

For practice, access the Benefit Plan Rules form (TK-SCR) for organization 999999.

2. Enter a Plan ID

Enter the unique identifier for the plan. You will enter this ID on all tables associated with the plan.

Note: *If eCyborg Interactive Benefits is installed, this entry may not contain characters considered illegal by the operating system (such as blank, @, #, and so forth).*

For practice, type 'DEN'.

3. Enter an Effective Date

Use the same date that you entered on the Organization-To-Rules Cross-Reference For Benefits form (AY-SCR). Enter the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYMMDD (elsewhere).

For practice, type '01-01-1925'.

4. Enter the Year End

Enter the date that reflects the plan's year end, whether it be fiscal year or calendar year. Enter the date in the format MM-DD (US and Canada) or DD-MM (elsewhere).

For practice, type '12-31'(US and Canada) or '31-12' (elsewhere).

5. Enter a Plan Name

Enter a descriptive name for the plan. The name will display automatically on all tables with the same Plan ID. The name will also be displayed on reports.

For practice, type 'DENTAL'.

6. Select a Plan Type

Select the type of plan from the list box. Available values are from the Plan Types option list (BA16).

For practice, select 'Dental'.

7. Select a Service Date type

This indicates the date from which an employee's service is credited. This is also the date from which an employee's eligibility is determined.

Options are obtained from the Service Date Field option list (BA24). Do not change the meaning of the option translation. If you add an option, you must also add method code logic. This option identifies which date on the employee's Master Record is to be used as the base date for time span or date calculations for a benefits plan.

For practice, select 'Employment Date'.

8. Select a Class

Select a value that indicates the plan class or usage. For example, is it mandatory or optional that an employee enroll in the plan? Options are obtained from the Plan Class option list (BA17).

For practice, select 'Optional'.

9. Enter a Flex Master (optional)

If the plan is part of a flex plan, enter the Plan ID of the flex master.

For practice, leave this text box blank.

10. Enter a Group Master (optional)

If the plan is part of a group master plan, enter the Plan ID of the group master.

For practice, leave this text box blank.

11. Enter an Accum Name (optional)

Enter an accumulator ID only if the plan requires a considered earnings/hours (CE/H) accumulator.

For practice, leave this text box blank.

12. Select the Ins Carrier (optional)

For insurance plans, select the name of the plan provider. You must populate the Insurance Carrier option list (BA629) with available values.

Note: *For TravisCobra users, the code specified in this field (option list BA629) must match the Plan Sponsor code in the TravisCobra application. The option 'None' (code '#') can not be used with TravisCobra.*

For practice, leave this text box blank.

13. Select a Default Enrollment Option (flex only)

Select a value from the list box to show what the enrollment option will be if the employee does not return the enrollment election form. This option is used only if the plan is part of a flex plan.

For practice, leave this list box blank.

14. Indicate a Default Enrollment tax contribution type (flex only)

Indicate the taxability of the contribution. These option buttons are used only if the plan is part of a flex plan.

For practice, do not modify this option.

15. Enter the applicable HEDs for the plan (optional)

Enter as many HEDs as are applicable for the plan. Enter HEDs only if the plan requires an employee contribution or a company accrual.

For practice, use a Basic Post-tax HED of '616'.

16. Click Save or press Enter

The Benefit Plan Rules table record (TK-SCR) is created and the following message is displayed:

'—New table entry has been established—'

For practice, do not complete this step.

17. Click the Continue Plan Rules (optional)

Complete this and the following steps only if you need to define search types for a plan.

For practice, click the Continue Plan Rules button.

18. Respond to the Save Changes? Message

You will see this message only if you have not clicked Save or pressed Enter after entering plan information on the first panel. Indicate whether you want the changes saved (Yes), discarded (No), or you want to remain on the first panel (Cancel).

For practice, click Yes or press Enter.

The table record is created (if it has not been created already) and the second panel of the Benefit Plan Rules form (TK-SCR) is displayed.

19. Defining search types (optional)

If the benefits plan requires different rules for different groups of employees, you can use search types to specify those rules. The search type specified will require at least one search argument. If the search type indicates that a Cyborg Scripting Language program is required, you will enter the program's name in the accompanying search argument text box on this form. For all other search types, you will enter values on the corresponding tables.

For practice, verify that no search arguments are set for this plan. Then click the Return To 1st Screen button.

20. Select Mid-Year Chg Reasons (flex component plans only)

Select the Flex Change rules that will remain constant for the plan for the remainder of the year. Check each box that applies.

For practice, make no selections. This is not a flex component plan.

21. Click Return To 1st Screen

This action displays a dialog that allows you to save any entries made on the second panel.

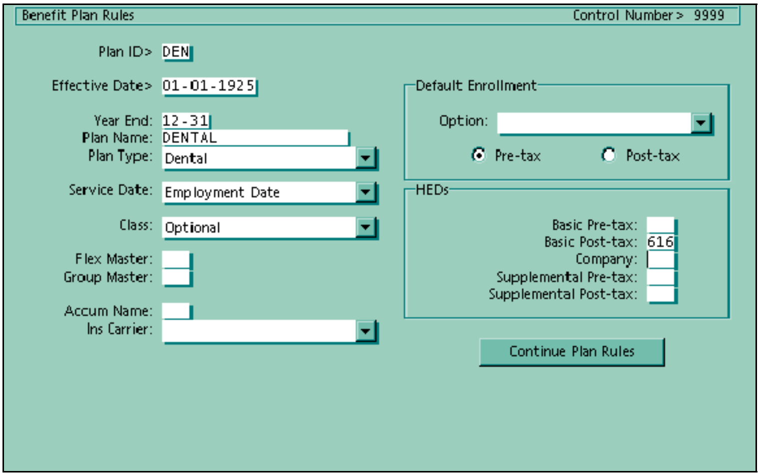
For practice, click the Return To 1st Screen button.

22. Respond to the Save Changes? message

Indicate whether you want the changes saved (Yes), discarded (No), or you want to remain on the second panel (Cancel).

For practice, you will not receive this message.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



See also:

- Benefit plan rules ***(on page 62)***

Specifying plan eligibility rules

jDefine at least one Benefit Plan Eligibility Rules form (TL-SCR) for each benefits plan. If you have defined an eligibility search type, the number of Benefit Plan Eligibility Rules forms (TL-SCR) you complete will depend on the necessary search arguments.

1. Access the Benefit Plan Eligibility Rules form (TL-SCR)

Access this form by making the following selection from the Navigator:

Component: Benefit Plan Setup and Maintenance
Process: Welfare Plans
Task: Eligibility

For practice, access the Benefit Plan Eligibility Rules form (TL-SCR) for organization 999999.

2. Enter the Plan ID

Enter the unique identifier for the plan.

For practice, type 'DEN'.

3. Enter the Search Argument (optional)

If you specified an Eligibility search type on the Benefit Plan Rules form (TK-SCR), you must enter a search argument.

For practice, leave this text box blank.

4. Enter the Effective Date

Enter the original effective date of the plan [from the Organization-To-Rules Cross-Reference For Benefits form (AY-SCR)] or the date of the plan change. Enter the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYMMDD (elsewhere).

For practice, type '01-01-1925'.

5. Select the Eligibility Type

Select the rule on which eligibility is based from the Eligibility Type Rules option list (BA18).

For practice, select 'Elig at Srvce Specfd'.

6. Enter the Minimum Age (optional)

Complete this text box only if you selected an Eligibility Type that uses age. Enter the age requirement in YY-MM-DD format. For example, you would enter 21-00-00 for 21 years.

For practice, leave this text box blank.

7. Enter the Maximum Age (optional)

Complete this text box only if you selected an Eligibility Type that uses age. Enter the age requirement in YY-MM-DD format. For example, you would enter 75-00-00 for 75 years.

For practice, leave this text box blank.

8. Enter the Service (optional)

Complete this text box only if the plan uses a length of service requirement. Enter the service requirement in YY-MM-DD format. For example, you would enter 01-00-00 for one year of service.

For practice, type '00-06-00'.

9. Enter the Days/Hours (optional)

Complete this text box only if the plan requires an hours or days waiting period. Enter a numerical value without decimals. If you use this text box, you must select a service method.

For practice, leave this text box blank.

10. Select a Service Method (optional)

Select an option from the Service Calculation Method option list (BA45) if you are using an eligibility type that requires accumulated hours or service before eligibility. The value you select in this list box is dependent on the value you chose for eligibility type.

For practice, select 'Elapsed Time'.

11. Select a Date Method

Select an option from the Date Calc Method option list (BA15) to establish the proper method for rounding dates.

For practice, select 'Actual Event Date'.

Refer to the **Calculation Option List Quick Reference** *(on page 815) for documentation on this option list.*

12. Enter the Eligible Status option(s)

Enter the status options that reflect the type of employee eligible for the plan. You enter a two-digit option from the Employee Status option list (HR10).

You can use an asterisk (*) as a wild card. For example, if all active employees are eligible, you would enter '0*'. The value '**' is not a valid entry.

You must enter at least one status option.

For practice, type '01' in the first Eligible Status text box. The plan is open to full-time, salaried employees.

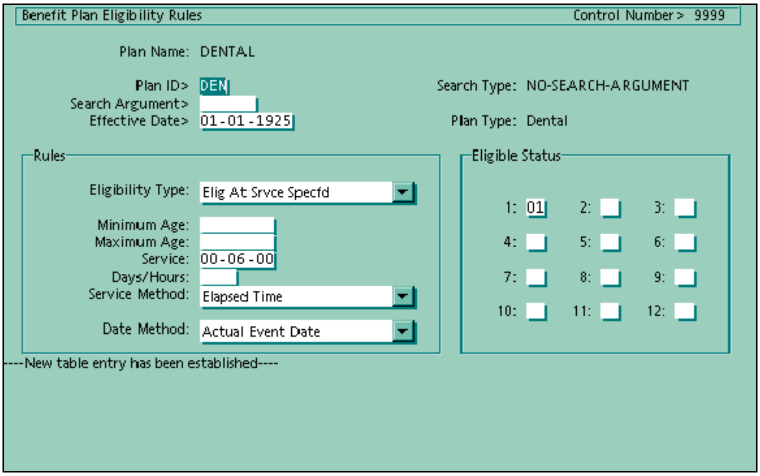
13. Click Save or press Enter

The Benefit Plan Eligibility Rules table record (TL-SCR) is created, and the following message is displayed:

'—New table entry has been established—'

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



See also:

- Plan eligibility requirements ***(on page 70)***

For a discussion of eligibility rules and eligibility status options.

Specifying coverage options and plan funding

You must complete one Coverage And Contribution Factors form (TM-SCR) for each valid coverage option. Similarly, if the plan requires both employee and employer contributions, you would complete one Coverage And Contribution Factors form (TM-SCR) for each contribution type.

1. Access the Coverage And Contribution Factors form (TM-SCR)

Access this form by making the following selection from the Navigator:

Component: Benefit Plan Setup and Maintenance
Process: Welfare Plans
Task: Coverage/Contributions

For practice, access the Coverage And Contribution Factors form (TM-SCR) for organization 999999.

2. Enter the Plan ID

Enter the unique identifier for the plan.

For practice, type 'DEN'.

3. Select an Option

Select a coverage option from Option Elected option list (BA03).

For practice, select 'Employee Only/Single'.

4. Select a Ctrb Type

Select a contribution type from the Contribution Type option list (BA31). The contribution type must match the HEDs entered on the Benefit Plan Rules form (TK-SCR).

For practice, select 'Basic Post Tax Contb'.

5. Enter the Search Argument (optional)

If you specified a Calculation search type on the Benefit Plan Rules form (TK-SCR), you must enter a search argument.

For practice, leave this text box blank.

6. Enter an Effective Date

Enter the original effective date of the plan [from the Organization-To-Rules Cross-Reference For Benefits form (AY-SCR)] or the date of the plan change. Enter the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYMMDD (elsewhere).

For practice, type '01-01-1925'.

7. Select a Coverage Rule (optional)

If your plan requires a coverage amount, select a value from the Coverage Calc Method option list (BA20). For example, you might use this text box when defining a life insurance plan that is based on an employee's salary.

For practice, leave this list box blank.

Refer to the **Calculation Option List Quick Reference** *(on page 815) for documentation on this option list.*

8. Enter the coverage factor(s) (optional)

The coverage rule you selected in the previous step will determine which text boxes you should complete.

For practice, leave these text boxes blank.

9. Select a Contribution Rule (optional)

Select the formula used to determine the contribution amount for the option and/or contribution type you are currently working with. This reflects the deduction from the employee's salary or the company's contribution.

For practice, select 'Use Factor 1 As Amt'.

Refer to the **Calculation Option List Quick Reference** *(on page 815) for documentation on this option list.*

10. Enter the contribution factor(s) (optional)

The contribution rule you selected in the previous step will determine which text boxes you should complete.

For practice, type '.1500' in the Factor 1 text box. This represents 15.00.

11. Select the Result Freq

Select the frequency of the contribution. The values are obtained from the Contribution Result Frequency option list (BA47).

For practice, select 'Monthly Amount'.

12. Enter a Nondiscrimination Value (optional)

Enter a value to be used in nondiscrimination testing if you want to use a value different from the contribution calculation amount.

Note: *This text box is typically used for deferred plans.*

For practice, leave this text box blank.

13. Enter the Flex Cost (flex only)

Enter the cost/credit amount for the flex plan. This value is based on the Flex Type selected.

For practice, leave this text box blank.

14. Select a Flex Type (flex only)

Select the rule from the Flex Credit/Cost Calculation option list (BA59) that determines how costs and credits are determined for this plan.

For practice, leave this list box blank.

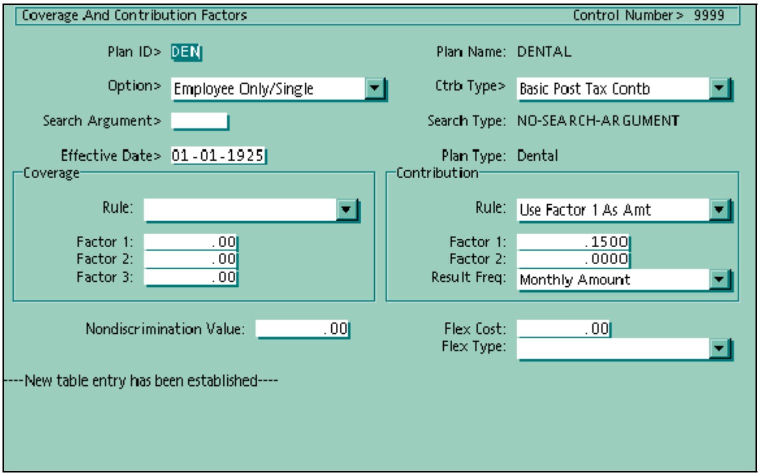
15. Click Save or press Enter

The Coverage And Contribution Factors table record (TM-SCR) is created, and the following message is displayed:

'—New table entry has been established—'

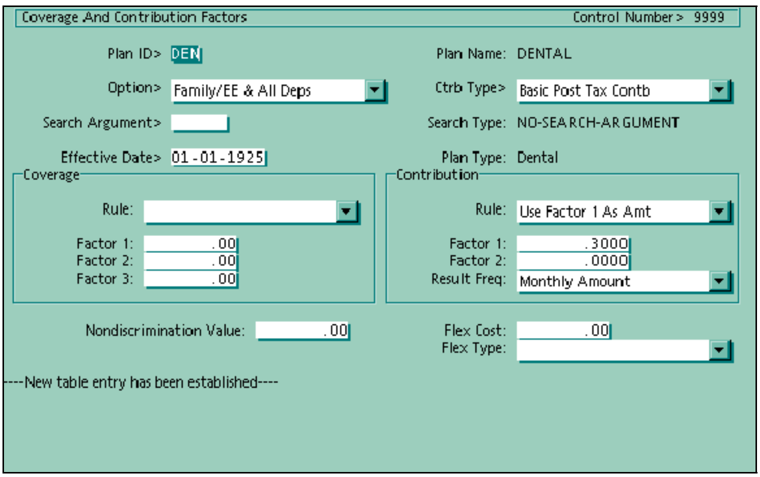
For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



For practice, complete a second Coverage And Contribution Factors form (TM-SCR) for the 'Family/EE & All Deps' coverage option. Dependent coverage costs 30.00 per month.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



See also:

- Plan coverages ***(on page 72)***

For a description of coverage options and coverage rules.

- Contribution rules ***(on page 73)***

For a discussion of contribution rules.

Specifying payroll deduction rules

You will complete one Benefit Plan Prototype Contribution HED form (TS-SCR) for each contribution type you defined on the Benefit Plan Rules form (TK-SCR). Coordinate with your Payroll specialist to ensure that you are using the correct values on this form.

1. Access the Benefit Plan Prototype Contribution HED form (TS-SCR)

Access this form by making the following selection from the Navigator:

Component:	Benefit Plan Setup and Maintenance
Process:	Welfare Plans
Task:	Prototype HED Setup

For practice, access the Benefit Plan Prototype Contribution HED form (TM-SCR) for organization 999999.

2. Enter the Plan ID

Enter the unique identifier for the plan.

For practice, type 'DEN'.

3. Select the Contrib Type

Select the contribution type from the Contribution Type option list (BA31). This should match the HEDs set up on the Benefit Plan Rules form (TK-SCR) and the contribution type entered on the Coverage And Contribution Factors form (TM-SCR).

For practice, select 'Basic Post Tax Contb'.

4. Enter the Search Argument (optional)

If you specified an HED Prototype search type on the Benefit Plan Rules form (TK-SCR), you must enter a search argument.

For practice, leave this text box blank.

5. Enter the Effective Date

Enter the original effective date of the plan [from the Organization-To-Rules Cross-Reference For Benefits form (AY-SCR)] or the date of the plan change. Enter the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYMMDD (elsewhere).

For practice, type '01-01-1925'.

6. Select a Frequency

Select an option to define when and how often a payroll deduction will be taken.

For practice, select 'All Pay Periods'.

7. Select a Type

Select an option to determine whether the deduction is to go into arrears when pay is insufficient to take the entire amount. Certain values, such as 'Take Part;No Arrears', can result in zero net pay for an employee. Be sure that the option you select reflects your organization's pay policy.

The values for this list box are obtained from the Arrears option list (PP10).

For practice, select 'Take Part;Rem In Arr'.

8. Select a Calc Method

Select the method for calculating the deduction amount. Select Fixed Amount if the calculation is being performed by the Coverage And Contribution Factors form (TM-SCR).

The values for this list box are obtained from the Deduction Method Code option list (PP12).

For practice, select 'Fixed Amount'.

9. Select an Auto Deduction

Select the option to identify when the payroll deduction is to begin.

For practice, select 'Start W/Effect Date'.

10. Enter the Amount/Percent (optional)

If you want to establish a payroll deduction for all employees in a plan, across the board, regardless of the option that is chosen for the plan, enter the value here. If the payroll deduction is being calculated by the Coverage And Contribution Factors form (TM-SCR), enter zeros.

For practice, type zeros in this text box.

11. Select a Start Method (optional)

To start and stop a deduction for all employees as of a certain date or monetary amount, use the Start Method and Stop Method list boxes and the Start Field and Stop Field text boxes. These list and text boxes apply to all employees enrolled in the plan.

Select the option for the type of start method for the deduction.

For practice, do not select an option. After you click Save or press Enter, the value 'Inactive' will be displayed in this text box.

12. Enter the Start Field (optional)

Enter the date or amount that, when reached, starts the deduction.

For practice, leave this text box blank.

13. Select a Stop Method (optional)

Select the option for the type of stop method for the deduction.

For practice, do not select an option. After you click Save or press Enter, the value 'Inactive' will be displayed in this text box.

14. Enter the Stop Field (optional)

Enter the date or amount that, when reached, stops the deduction.

For practice, leave this text box blank.

15. Enter Amount One and Amount Two text boxes

The Amount One and Amount Two text boxes are used by payroll. Do not make any entries in these text boxes. Any amounts in these text boxes will override payroll amounts.

Note: The Amount Two text box can be used to define a Savings Bond plan.

☞ *Refer to* **Enrolling Employees in Deferred Plans** *(on page 321) for further information on defining Savings Bond plans.*

For practice, leave these text boxes blank.

16. Enter the User Code

For benefits purposes, this field is used to further define the maximum yearly allowable amount of contributions for the plan that are greater than $9,999.99

For practice, leave this text box blank.

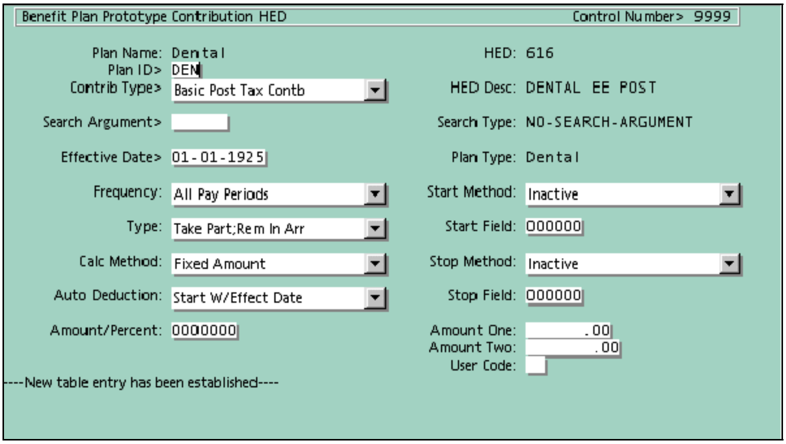
17. Click Save or press Enter

The Benefit Plan Prototype Contribution HED table record (TS-SCR) is created and the following message is displayed:

'—New table entry has been established—'

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



See also:

- Recording payroll deductions and contributions ***(on page 75)***

For a description of recording the HEDs used in a plan.

Associating plan statuses with coverage options

For each option available for a plan, define what the employee's new plan status will be.

1. Access the Option/Resulting Plan Status Rules form (TTOSCR)

Access this form by making the following selection from the Navigator:

Component: Benefit Plan Setup and Maintenance
Process: Welfare Plans
Task: Option Validation

For practice, access the Option/Resulting Plan Status Rules form (TTOSCR) for organization 999999.

2. Enter the Plan ID

Enter the unique identifier for the plan.

For practice, type 'DEN'.

3. Select an Option

Select a coverage option. The value you select should reflect a valid option for the plan—for example, 'Employee Only/Single' and 'Waived'.

For practice, select 'Employee Only/Single'.

4. Enter the Search Argument (optional)

If you selected an Eligibility search type on the Benefit Plan Rules form (TK-SCR), you must enter a search argument.

Note: If an eligibility search type was specified on the Benefit Plan Rules form (TK-SCR), a search type value will be displayed on the form.

For practice, leave this text box blank.

5. Enter the Effective Date

Enter the original effective date of the plan [from the Organization-To-Rules Cross-Reference For Benefits form (AY-SCR)] or the date of the plan change. Enter the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYMMDD (elsewhere).

For practice, type '01-01-1925'.

6. Select a Date Method

Select a date method to define the rounding rule for the date when the resulting plan status will take effect.

Refer to the online documentation for the Date Calc Method option list (BA15) for more information.

For practice, select 'Actual Event Date'.

7. Enter the Low Status and High Status

These text boxes reflect the statuses that an employee must have to be eligible to elect the coverage option in the Option text box. The values are obtained from the Plan Status option list (BA04).

Use a Low Status and a corresponding High Status to build a range of values. For example, if you want employees with no prior status and active participants to be able to choose the specified coverage option, you could enter a Low Status of 0 and a High Status of 1.

For practice, type the Low Status and High Status values from the following table:

Low Status	High Status
0	1
5	5
7	7

8. Enter the Resulting Status

Enter the resulting employee plan status that will occur if the employee elects a particular coverage option. The values are obtained from Plan Status option list (BA04).

For practice, type the Resulting Status values from the following table:

Low Status	High Status	Resulting Status
0	1	1
5	5	1
7	7	1

9. Enter a Delay Time (optional)

Use this text box to define an additional length of time before the resulting plan status becomes effective. Enter the time span as YYMMDD. This amount of time is added to the eligibility date and rounded using the date method chosen.

For practice, leave this text box blank.

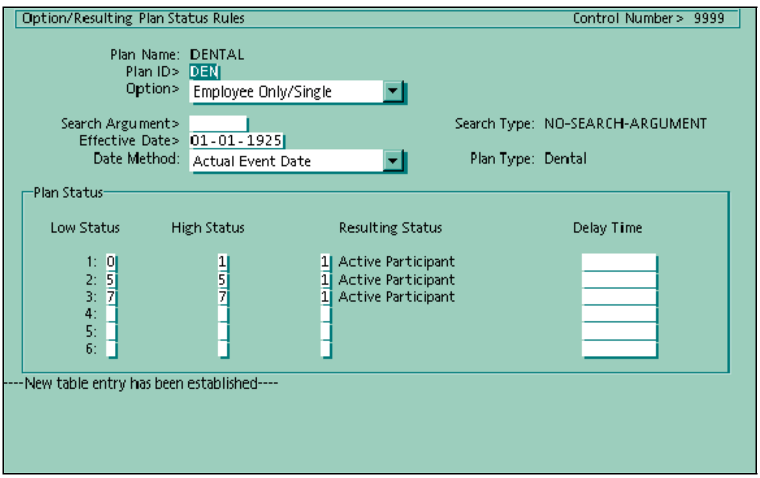
10. Click Save or press Enter

The Option/Resulting Plan Status Rules table record (TTOSCR) is created and the following message is displayed:

'—New table entry has been established—'

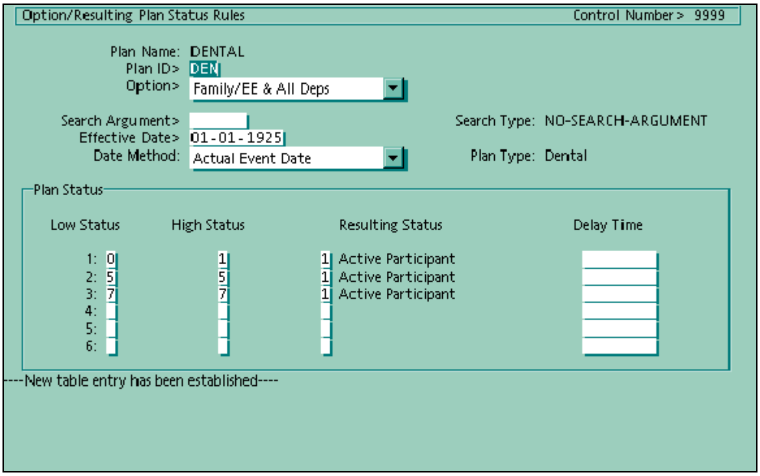
For practice, click Save or press Enter.

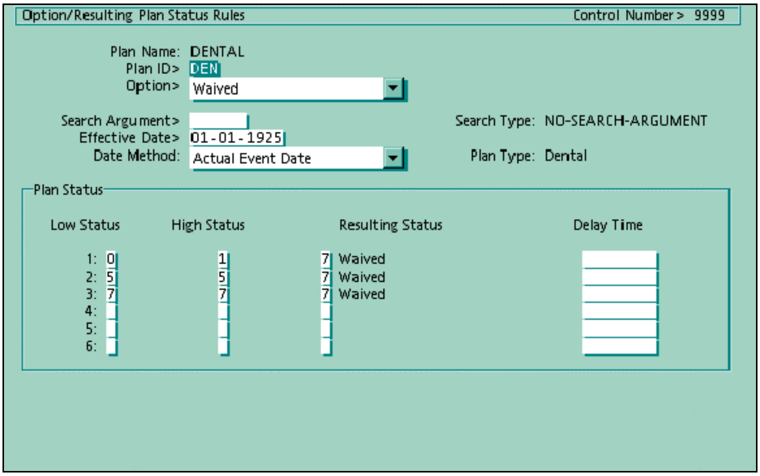
If you completed the Guided Practice, the resulting form should look similar to the example that follows:

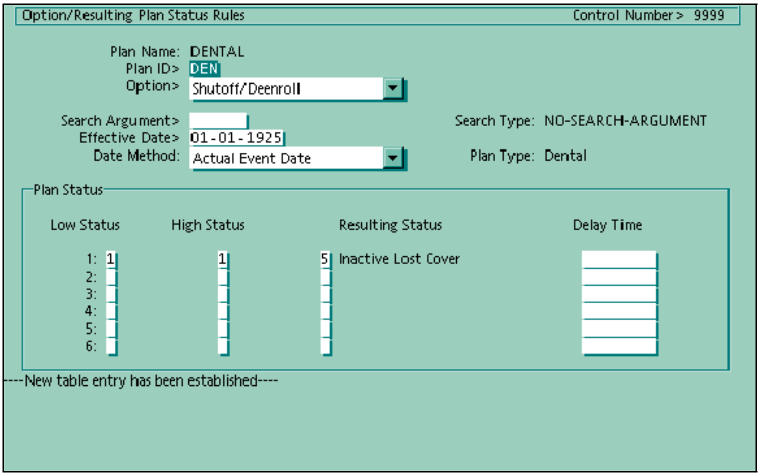


For practice, complete three more Option/Resulting Plan Status Rules forms (TTOSCR): one for the employee and all dependents, one for waived, and one for shutoff/deenroll.

If you completed the Guided Practice, the resulting forms should look similar to the examples that follow:







Note: *If the plan is part of a Flex Master Plan, this option will also need a line 2 with an entry of 7-7-5.*

See also:

- Options and employee plan status ***(on page 77)***

For a discussion of the importance of plan statuses.

Associating separation activities with resulting plan statuses

In this task, you define the employee activities that will result in a change to their plan statuses. These activities can include termination, leave of absence, retirement, and disability.

You will complete this form for each activity that results in a change of plan status. The activities are from the Activity Codes option list (HR09). These activities should have been defined during the implementation of basic Human Resource functionality.

1. Access the Activity/Resulting Plan Status Rules form (TTASCR)

Access this form by making the following selection from the Navigator:

Component: Benefit Plan Setup and Maintenance
Process: Welfare Plans
Task: Activity/Plan Status

For practice, access the Activity/Resulting Plan Status Rules form (TTASCR) for organization 999999.

2. Enter the Plan ID

Enter the unique identifier for the plan.

For practice, type 'DEN'.

3. Select an Activity

Select an activity from the Activity Codes option list (HR09) that will result in a change in an employee's plan status.

For practice, select 'Term-Vol,All Values'.

4. Enter the Search Argument (optional)

If you selected an Eligibility search type on the Benefit Plan Rules form (TK-SCR), you must enter a search argument. This must be the same search argument entered on the Benefit Plan Eligibility Rules form (TL-SCR) and on the Option/Resulting Plan Status Rules form (TTOSCR).

For practice, leave this text box blank.

5. Enter the Effective Date

Enter the original effective date of the plan [from the Organization-To-Rules Cross-Reference For Benefits form (AY-SCR)] or the date of the plan change. Enter the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYMMDD (elsewhere).

For practice, type '01-01-1925'.

6. Select a Date Method

Select the date method to define the rounding rule for the date when the resulting plan status will take effect on a date other than the date the activity occurs.

For practice, select 'Actual Event Date'.

7. Enter the Low Status and High Status

These text boxes reflect the statuses that an employee must have before the activity occurs. These values are obtained from the Plan Status option list (BA04).

Use a Low Status and a corresponding High Status to build a range of values.

For practice, type '1' for both Low Status and High Status.

8. Enter the Resulting Status

Enter the resulting employee plan status that will occur if the separation activity being defined occurs for an employee. The values are obtained from the Plan Status option list (BA04).

For practice, type '5'.

9. Enter a Delay Time (optional)

Use this text box to define an additional length of time before the resulting plan status becomes effective. Enter the time span as YYMMDD.

For practice, leave this text box blank.

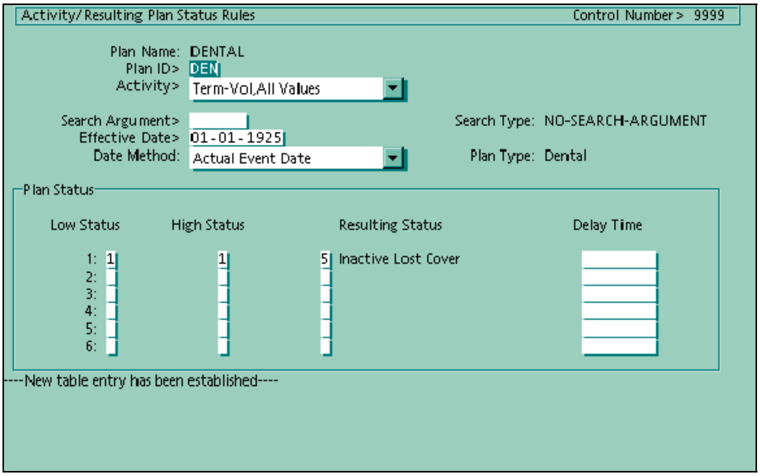
10. Click Save or press Enter

The Activity/Resulting Plan Status Rules table record (TTASCR) is created and the following message is displayed:

'—New table entry has been established—'

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



Activity/Resulting Plan Status Rules   Control Number> 9999

Plan Name: DENTAL
Plan ID> DEN
Activity> Term-Vol,All Values

Search Argument>   Search Type: NO-SEARCH-ARGUMENT
Effective Date> 01-01-1925
Date Method: Actual Event Date   Plan Type: Dental

- Separation activities and employee plan status ***(on page 78)***

For a discussion of separation activities and their effect on employee plan statuses.

Extended Practice

Set up a supplemental life insurance plan for organization 999999. Use the following information:

Plan ID:	210
Plan Type:	Taxable
Effective Date:	01-01-1925
Plan Year End:	12/31
Plan Category:	Optional
Eligibility:	The plan is available to all active, full-time employees. Employees are eligible the first month coincident or following their employment date.
Enrollment Options:	Employees can elect coverage of 1, 2, or 3 times their salary up to 200,000.00. Use the Cyborg Scripting Language program BE-AGE to determine the employee monthly cost per 1000 of coverage based on the employee's age: Less than 31 .05 31–45 .07 46 and over .10 Also set up 'Waived' and 'Shutoff/Deenroll' options
HED Information:	Employee Basic Pre Tax HED 511
Separation Activities:	Voluntary termination—all values (1-month extension) Involuntary termination—all values Disability—all values (1-year extension) Retirement—all values (1-month extension) Death Layoff (2-months extension) Leave-of-absence without pay

Review of Questions Answered

10. How is employee plan status recorded and tracked?

11. What kind of plan documentation is available for welfare plans?

CHAPTER 5

Setting Up Deferred Plans

In This Chapter

Introduction

Employees have long viewed benefits as an important part of their total compensation package. And many organizations struggle to find just the right mix of benefits to attract and retain the best employees. But deferred benefits represent more than mere compensation; they represent an employee's future. The primary goal of deferred benefits plans—the funding of an employee's retirement—is extremely important to both employees and employers. As such, the legislation regarding the design and administration of these plans is generally more comprehensive than the legislation for welfare plans. Governmental agencies serve as watchdogs to ensure that employees' interests are protected and that fiduciaries act responsibly.

Review this section carefully before beginning your benefits analysis. It will acquaint you with the issues involved in setting up your deferred plans.

About the examples

Throughout this section we will be looking at a fictional defined contribution plan (Plan 501) for Acme Manufacturing; you will not find this plan in the delivered test data.

Tasks

This section explains the following:

- Specifying basic plan identification and rules for deferred plans
- Specifying plan eligibility rules for deferred plans
- Specifying coverage options and plan funding for deferred plans
- Specifying payroll deduction rules for deferred plans
- Associating plan statuses with coverage options for deferred plans
- Associating separation activities with resulting plan statuses for deferred plans
- Specifying plan participation rules
- Specifying breaks-in-service rules (optional)
- Specifying retirement date rules (optional)

Prerequisites

Before you can define employee deferred plans, the following must be established for *The Solution Series/ST*:

- Organizations including Hours, Earnings, and Deductions (HEDs)
- Employees
- Benefits Control Numbers
- Activity Codes option list (HR09)
- Employee Status option list (HR10)
- Activity and Resulting Employee Status Rules (TF-SCR)

☞ *Refer to* **Implementing Benefits Administration** *(on page 31) and* **Setting Up Welfare Plans** *(on page 53) for information on defining benefits Control Numbers.*

Questions answered

This section answers the following questions:

1. What are deferred plans?
2. What types of plans can be defined as deferred plans?
3. What tables are used to define deferred plans?
4. What coverage option must be used for deferred plans?
5. How are contributions limited for deferred plans?
6. What requirements must be defined for plan participation?
7. Why should breaks-in-service rules be recorded?
8. Why should retirement policies be recorded?
9. What reports are available for documenting deferred plan rules?

What are deferred plans?

Plans that provide future benefits to employees are considered deferred plans. In general, these are retirement or pension plans. In Benefits Administration, deferred plans can be defined benefits, defined contribution, or thrift/savings.

Defined benefits plans

These are pension plans that provide a definite, fixed benefit to a retired employee. The amount of the benefit can be based on years of service or final salary calculations. Typically, employer contributions are determined actuarially to produce the calculated benefit.

Defined contribution plans

These are retirement plans in to which the employer may make 100 percent of the contribution, or may match the employees' contributions, to purchase a retirement benefit. The retirement benefit is often an annuity.

Contributions are made into an individual employee's investment fund. Employer contributions are allocated to the individual participant's accounts based on the employee's salary and/or length of service.

Plans that can be administered using a defined contribution definition include the following:

- Money purchase
- Profit sharing
- Stock plans

Thrift/savings plans

These are defined contribution plans in which the employee selects the investment vehicles or funds into which contributions are made. For example, in the United States, a 401(k) plan would be considered a thrift/savings plan.

If you administer the investments internally, Benefits Administration provides facilities to track them.

☞ *Refer to* **Funding of Deferred Plans** *(on page 843) for additional information on tracking the funding of thrift/savings plans.*

Tables for defining deferred plans

The same tables used to set up welfare plans are also used to set up deferred plans. In addition, there are three tables used solely to complete the definitions of deferred plans. This section covers any special considerations for completing the tables used to define both types of plans, but does not cover the basics of those tables already discussed in earlier sections.

Form	**Purpose**	W	D
Benefit Plan Rules (TK-SCR)	This table establishes the basic rules for the plan, including its name, type, and year end.	X	X
Benefit Plan Eligibility Rules (TL-SCR)	Eligibility rules specify requirements for plan admittance. You can restrict eligibility by an employee's age, length of service, or both. In addition, you must specify the valid employment statuses required for entry into the plan. The eligibility requirements you set up are automatically applied to each employee during the enrollment process.	X	X
Coverage And Contribution Factors (TM-SCR)	This table specifies how employer and employee contributions should be calculated. If necessary, you specify how coverage amounts should be calculated. Commonly used coverage and contribution rules are provided as calculation option lists.	X	X
Benefit Plan Prototype Contribution HED (TS-SCR)	You will set up one contribution table for each type of contribution (basic pretax, basic posttax, company, supplemental pretax, and supplemental posttax) required by a plan.	X	X
Option/Resulting Plan Status Rules (TTOSCR)	This table defines the valid options for the plan and how those options affect employee plan status.	X	X
Activity/Resulting Plan Status Rules (TTASCR)	This table defines the effect activities have on an employee's plan status.	X	X
Benefits Participation Rules Table (TN-SCR)	This table defines the rules for calculating when an employee begins participation in a plan, when benefits begin to accrue, and when vesting should begin. Each of these dates can be calculated by age, service time, and/or hours worked.		X

Form	Purpose	W	D
Benefits Plan Breaks-In-Service Rules (TU-SCR)	Optionally, you can define which separation activities will cause a break in service and any grace periods allowed.		X
Benefits Retirement Dates Rules Table (TJ-SCR)	Optionally, you can define eligibility dates for disability and early and normal retirement, anticipated participant retirement dates (with rounding), and company policy for notifying employees prior to their eligibility—all by retirement option.		X

Legend: W=welfare, **D**=deferred

☞ *Refer to* **Setting Up Welfare Plans** *(on page 53) for more information on the tables used to define both welfare and deferred plans.*

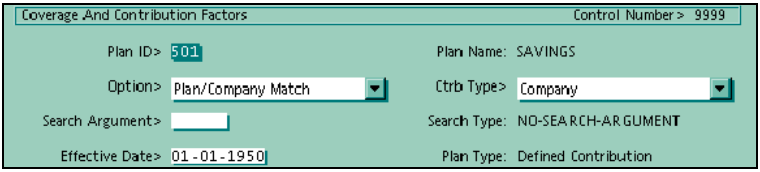
Special considerations for defining deferred plans

This section documents the special considerations involved in defining deferred plans as opposed to welfare plans.

Coverage options for deferred plans

For deferred plans, you can use only one valid coverage option on the Coverage And Contribution Factors form (TM-SCR): Plan/Company Match (CM). If you use any other value, the company match and the range of percentages will not be validated or calculated correctly.



All valid options for the plan, including noncost options such as 'Waived' and 'Shutoff/Deenroll', are still entered on the Option/Resulting Plan Status Rules form (TTOSCR). As a convention, most companies use the option of 'Participant' rather than 'Enrolled' for deferred plans.

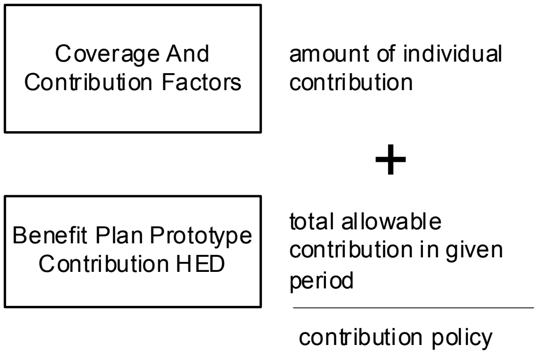
Limiting contributions to deferred plans

Deferred plans frequently have maximums for employee contributions and company matches. Correctly defining the contribution policy for a deferred plan requires a careful examination of the Contribution Rules option list (BA31). As you examine the documentation for this option list, notice that only certain values are applicable to deferred plans.

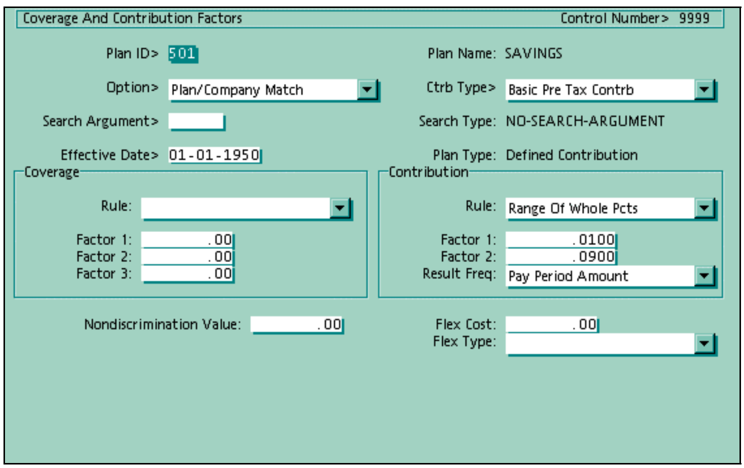
☞ *Refer to the* **Calculation Option List Quick Reference** *(on page 815) for documentation on the Contribution Rules option list (BA31).*

Limiting participant contributions

Just as with welfare plans, the specific amounts to be deducted from an employee's paycheck are defined on the Coverage And Contribution Factors form (TM-SCR). However, deferred plans can have maximum amounts that employees can contribute over a given period. You define these on the associated Benefit Plan Prototype Contribution HED form (TS-SCR). The following graphic summarizes this point.

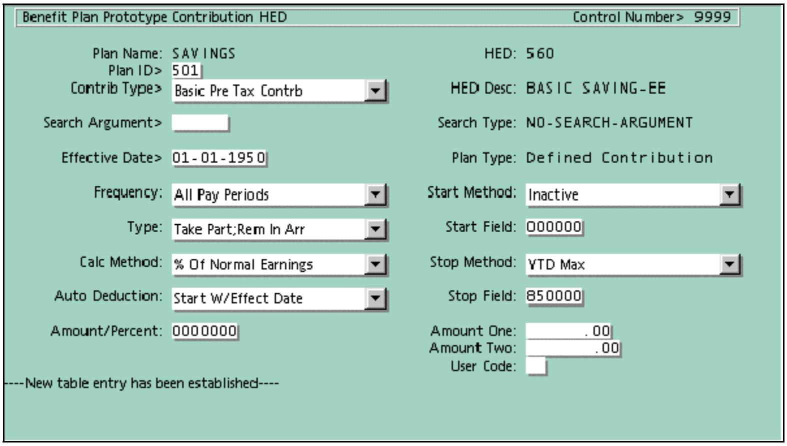


For example, Acme Manufacturing's defined contribution plan allows a pretax deduction of 1 to 9 percent of an employee's salary each pay period. Employees can contribute a maximum of 8,500.00 annually. The Coverage And Contribution Factors form (TM-SCR) defines the per-pay-period deduction, as follows: The Contribution Rule uses the value 'Range Of Whole Pcts' from the Contribution Rules option list (BA31); Contribution Factor 1 defines the minimum percentage contribution; and Contribution Factor 2 defines the maximum percentage contribution.



When employees are enrolled in the plan, they will identify the exact percentage contribution they wish to make.

The Benefit Plan Prototype Contribution HED form (TS-SCR) for this contribution defines the maximum yearly allowable amount. For this example, a Stop Method of 'YTD Max' is used. The maximum yearly amount (8500.00) is entered in the Stop Field text box.



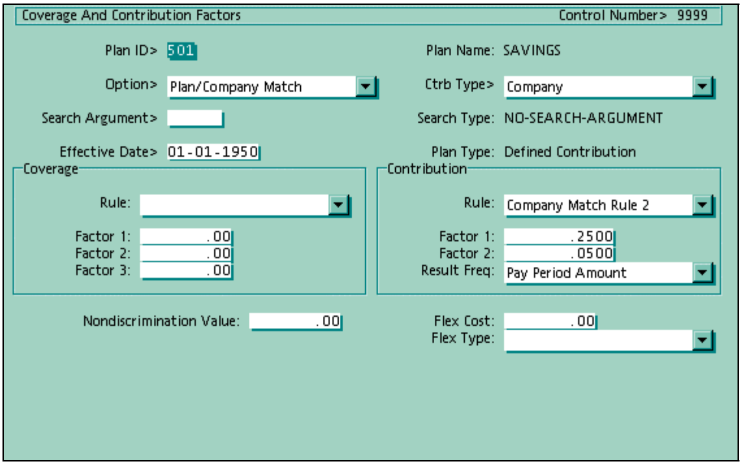
Note: You can enter a yearly maximum amount of up to 9999.99 in the Stop Field. If you need to define a maximum yearly allowable amount greater than 9999.99, you can use the HED Accumulation Method Setup (MCASCR) and HED Accumulation Method Limits (MCALIM) forms instead. Work with your Payroll Specialist when using these forms instead of the Benefit Plan Prototype Contribution HED form(TS-SCR) to define contribution limits.

Limiting company contribution match

Companies often limit the amount they will contribute to, or match, for deferred plans. The company's maximum contribution can be defined on the Coverage And Contribution Factors form (TM-SCR) using a Contribution Rule. This rule will cover the company's per-period contribution and any maximum. Unlike the employee's contribution, the company's maximum does not require that a Stop Method be defined on the Benefit Plan Prototype Contribution HED form (TS-SCR).

Coverage And Contribution Factors (TM-SCR)	amount of company contribution per period and maximum

For example, for Acme Manufacturing's defined contribution plan, the company matches 25 percent, up to 5 percent of the employee's pretax deduction. To define these requirements, you use a Contribution Rule value of 'Company Match Rule 2' (from the Contribution Rules option list BA31). Contribution Factor 1 defines the company's 25 percent match; Contribution Factor 2 defines the company's maximum contribution, which is 5 percent of the employee's pretax deduction.



When contribution HEDs need to be combined

If your plan has a maximum on contributions and the contributions come from a combination of HEDs, you use the Calc Method of 'Accumulation Method' on the Benefit Plan Prototype Contribution HED form (TS-SCR). This code directs the system to combine the HED contributions into one maximum. Work with your payroll department to set up this type of combined maximum. The payroll forms used for this feature include the HED Accumulation Method Setup form (MCASCR) and the HED Accumulation Method Limits form (MCALIM).

In order to accommodate the catch-up provision of the Economic Growth and Tax Relief Reconciliation Act of 2001 (EGTRRA) for employees age 50 and older, a catch-up HED must be established for all employees. The combined limit must be set up on the HED Accumulation Method Limits form (MCALIM). Then the HED Accumulation Method Limits form (MCALIM) can be used to define the annual statutory catch-up limit.

☞ *Refer to* **Accumulation HEDs and 401(k) Plans** *(on page 945) for detailed instructions for setting up accumulator HEDs for 401(k) plans with catch-up provisions.*

Apply the Concept

What employee and company contribution maximums apply within your organization?

Apply the Concept

How will you implement these maximums?

Recording plan participation requirements

Participation requirements for deferred plans can be stringent. Examine your summary plan descriptions and associated legal documents carefully to determine the participation requirements for each of your deferred plans.

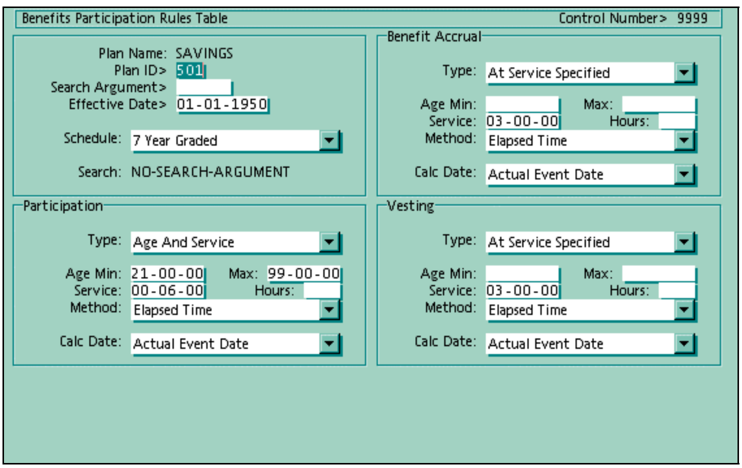
For each deferred benefits plan, you must record the vesting schedule to use and the factors for determining plan service dates. You will record plan participation requirements for deferred plans on the Benefits Participation Rules Table form (TN-SCR).

Recording vesting schedules

Vested benefits are those benefits earned by an employee that cannot be revoked by an employer. Vesting schedules, or formulas, determine the rate at which accrued benefits are vested. In Benefits Administration, you specify the vesting schedule by choosing a value from the Vesting Schedules option list (BA26).

For example, Acme Manufacturing uses the '7 Year Graded' vesting schedule for its defined contribution plan. That is, an employee gains nonforfeitable rights to accrued benefits according to the following schedule:

Years of vesting service completed	**Percentage of accrued benefit that is vested**
Less than 3	0
At least 3, but less than 4	20
At least 4, but less than 5	40
At least 5, but less than 6	60
At least 6, but less than 7	80
At least 7	100



Determining plan service dates

For each deferred plan, you must define when participation, benefit accrual, and vesting begin—that is, the plan service date for each.

- The participation (credited) service date is the date on which an employee who is eligible can begin participation in the plan.
- The benefit accrual service date is the date on which a participant in the plan can begin accruing, or earning, benefits.
- The vesting service date is the date on which a participant in the plan can begin vesting in accrued benefits.

Based on these rules, plan service dates are determined for individual plan participants and are written to the Plan Service Dates form (62-SCR).

☞ *Refer to* **Maintaining Employee Benefits Information** *(on page 411) for information on changing an employee's plan service dates.*

Plan service date factors

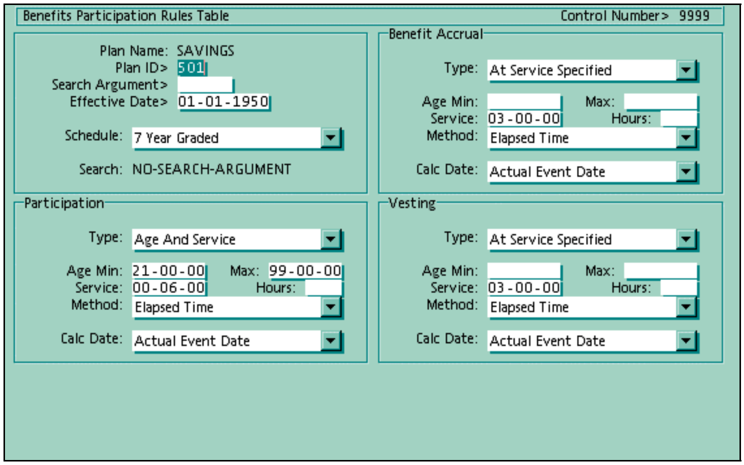
Three factors determine the plan service dates: type, method, and date calculation formula. You must define each of these factors for participation, benefit accrual, and vesting. The following table describes the three factors that determine the plan service dates:

Factor	Description
Type	Determines the basis for the calculation of the service date. Values are obtained from the Service Rules calculation option list (BA30). Values include 'Age And Service' and 'Age Or Service'.
Method	Defines the method by which an individual's service date is calculated. Values are obtained from the Service Calc Method calculation option list (BA45). Values include 'Elapsed Time' and 'Hours Worked'.
Calc Date	Defines the method by which the service date is rounded. Values are obtained from the Date Calc Method calculation option list (BA15). Values include 'FOM Follow Event Dte' and 'LOM Prior Event Dte'.

The value you choose for Type determines which other text boxes must be entered. For example, if you choose a value of 'Age And Service' for Type, you must enter values for Age Min, Max, and Service. For plans without an age maximum, enter a dummy value (for example, '99-00-00') in the Max text box.

Note: *All three factors are based on values from calculation option lists. Review these option lists carefully to determine if you can use a delivered value or whether you will need to modify the option lists.*

For example, Acme Manufacturing's defined contribution plan (Plan 501) uses the following to calculate plan service dates. This plan uses the same rules for participation as it does for eligibility. Participation begins when an eligible employee of at least 21 years of age completes six months of service.



Because a vesting schedule of '7 Year Graded' is used, the Benefit Accrual Service (the amount of service employees must accumulate before receiving their accrued benefit) and the Vesting Service (the amount of service an employee must accumulate while participating in the plan before vesting privileges can begin) are both three years.

For detailed directions on setting up deferred plan participation rules.

Apply the Concept
When does participation, service, benefit accrual, and vesting begin within your organization?

Apply the Concept
How will you define these dates?

Recording breaks-in-service policies

Service is credited based on the notion of continuous service. During separations (for example, a leave of absence) employees do not accrue service credits. When an employee re-enters a plan, the prior service is offset by the break, or, for certain rules, the prior service is not counted and the employee must begin accruing service again.

If any of your deferred plans have special breaks-in-service policies, you may choose to record those policies by creating a Benefits Plan Breaks-In-Service Rules form (TU-SCR). These policies are not company-wide; they are specific to a deferred benefits plan and the activity [from the Activity Codes option list (HR09)] that occurs. For example, a medical leave of absence and a personal leave of absence might be treated differently.

When an employee is rehired, reinstated, or recalled, the Benefits specialist will check to see if there has been an interruption of service. If a service interruption has occurred, a Service Interruptions form (61-SCR) will be created automatically based on the breaks-in-service rules recorded. The delivered report, Service Interruptions Ended this Period report (8O-RPT), can help you identify who has had a break in service during a specified period.

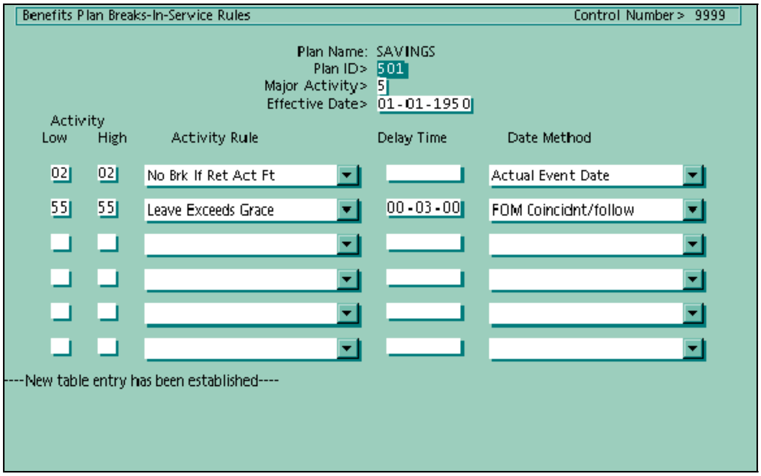
☞ *Refer to* **Maintaining Employee Benefits Information** *(on page 411) for more information on recording service interruptions.*

Note: *Recording breaks-in-service policies is optional.*

You must complete a table for each major activity that could result in a break in service. Values for activities are from the Activity Codes option list (HR09). Activity codes are interpreted as follows:

Positions	Category	Example	Description
1	Major activity	1	Terminations
2–3	Type of major activity and qualifier	06	Term Relocation

For example, Acme Manufacturing defines its breaks in service for leaves of absence (major activity = 5) as follows. For activity 502 (LOA Maternity W/Pay), if the employee returns to active full-time service, there will be no break in service. However, for activity 555 (LOA Other No Pay), if the leave exceeds the grace period of three months (rounded up to the first of the month coincident with or following the day of the return), there will be a break in service.



As a further example, breaks in service for the major activity of termination are defined as follows for Plan 501:

Major Activity	Low Activity	High Activity	Activity Rules	Delay Time	Date Method
1	02	02	Leave Exceeds Grace	00-06-00	FOM Coincidnt/follow
	04	09	Leave Exceeds Grace	00-03-00	FOM Coincidnt/follow
	22	27	Leave Exceeds Grace	00-01-00	Actual Event Date

Allowing for grace periods

To define a grace period for a separation activity, use the Delay Time text box. This will add a period of time to the date on which an employee loses eligibility for a plan. You can define a different grace period for each separation activity.

Rounding separation dates

If you use a grace period, you can also specify a method for rounding the separation date. Choose a date method from the Date Calc Method option list (BA15). This describes the method used to adjust the date formed by adding the delay time to the leave date for purposes of determining whether a break in service has been incurred when an employee returns from a service interruption.

See also:

- **Specifying breaks-in-service rules---optional** ***(on page 161)***

For detailed directions on setting up deferred plan breaks-in-service rules.

Apply the Concept
What breaks-in-service policies apply to your organization?

Apply the Concept
How will you implement these policies?

Recording retirement policies

Beyond sponsoring deferred plans to fund employee retirements, many organizations offer their employees assistance in retirement planning. Formally recording a deferred plan's retirement policies in Benefits Administration gives you the ability to track the retirement ages of your employees and to prompt the sending of retirement notices. You record your organization's retirement policies on the Benefits Retirement Dates Rules Table form (TJ-SCR).

The information you enter on the Benefits Retirement Dates Rules Table form (TJ-SCR) is used to calculate specific retirement dates and notice dates for employees when they enroll in a plan. These dates are automatically displayed on the Plan Retirement/Notice/Counseling Dates form (65-SCR). These rules are also used to generate data for certain retirement tracking reports, such as the Retirement Notifications Due This Period report (8L-RPT) and the Retirements This Period report (8N-RPT).

Note: *Recording your retirement policies is an optional activity.*

Recording retirement ages

If you choose to record the retirement policies for a deferred plan, you can record the following retirement ages:

- Early retirement
- Normal retirement
- Late(st) retirement
- Disability retirement

That is, you are recording the earliest possible age and/or service required before an employee can take early, normal, or late retirement, or go on disability retirement.

Retirement age rules

You specify age requirements using a retirement age rule. If the rule defines only age in the calculation, you do not have to make an entry in the Service text box, and vice versa. The rules are obtained from the Retirement Age Rules option list (BA29):

- Age
- Age And Service
- Age Or Service
- Service
- SSA Def Hr 1900

Rounding of retirement ages

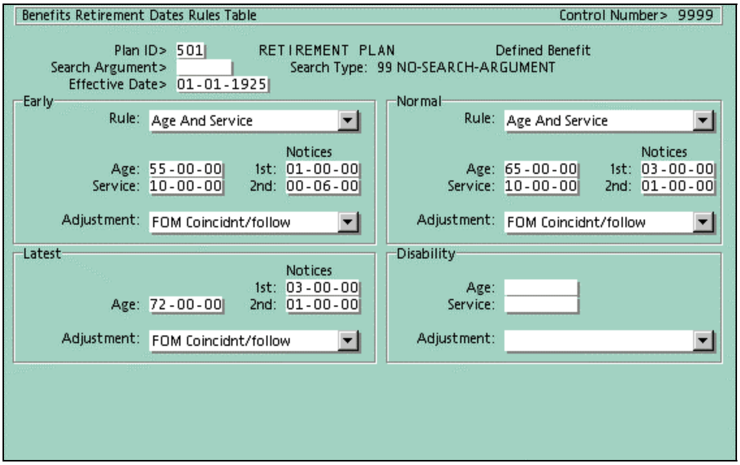
The calculation of each of these retirement ages can include rounding. To specify how rounding should be calculated, select a rounding adjustment value from the Adjustment list box. These values are obtained from the Date Calc Method option list (BA15).

Service requirements

In addition to minimum age requirements for retirement, you may also have service requirements—that is, a minimum length of service to qualify for retirement benefits.

Separate service requirements can be recorded for early retirement, normal retirement, and disability retirement.

For example, Acme Manufacturing uses the following retirement age and service rules for its defined contribution plan:



Early and normal retirement require a minimum age (55 and 65, respectively) and 10 years of service. The Retirement Age Rule for both is Age And Service.

Recording when retirement notices should be sent

Retirement notices can be sent to employees to tell them when they will be eligible to take early and normal retirement. Two notices can be sent for both early and normal retirement.

Specify when these notices should be sent using the Notices 1st and 2nd text boxes. The values you enter indicate how far in advance the notice should be sent prior to achieving the qualifying age for the type of retirement. For example, if you want to send a first notice six months in advance of an early retirement age of 55, you would enter '00-06-00' in the Notices 1st text box.

☞ *Refer to* **Counseling Employees on Benefits and Retirement** *(on page 477) for information on generating retirement notices and for information on the reports of retirement notices due for a certain period.*

Apply the Concept
What are your policies regarding retirement age rules and notifying employees of their retirement options?

Apply the Concept
How will you record these policies?

Plan documentation for deferred plans

The following chart lists the reports you can use to document your deferred plans.

Report	Description
Benefits Participation Rules Table Records Batch Report (9N-RPT)	Reflects data from the Benefits Participation Rules Table form (TN-SCR).
Benefits Plan Breaks-in-Service Rules Table Records (9U-RPT)	Reflects data from the Benefits Plan Breaks-In-Service Rules form (TU-SCR).
Plan Retirement Dates Rules Table Records Batch Report (9J-RPT)	Reflects data from the Benefits Retirement Dates Rules Table form (TJ-SCR).

☞ *Refer to the* **Report Quick Reference** *(on page 615) for samples of these reports and the parameters used to define these reports.*

Annual Form 5500 and PBGC Reporting Forms

Cyborg provides the following reports to supply you with the data you will need to complete IRS Form 5500 and the PBGC reporting form. These forms are necessary to meet the requirements set forth by the Employment Retirement Income Security Act of 1974 (ERISA) and the Internal Revenue Code.

- IRS Form 5500 - Schedule T Lines 4(c) & 4(d) (8B-RPT)—Produces the data necessary to complete Lines 4(c) and 4(d) of Form 5500, the Annual Return/Report of Employee Benefit Plans.
- IRS Form 5500 - Lines 7(a) - 7(h) report (8A-RPT)—Produces data necessary to complete Lines 7(a)-(h) of Form 5500, the Annual Return/Report of Employee Benefit Plans.
- PBGC Premium report (8D-RPT)—Produces the data necessary to compute the flat-rate portion of the annual premium. (The variable rate portion is not supported in this report. A separate manual actuarial calculation must be performed to determine this figure.)
- Schedule SSA Lines 4(b)-4(h) (8C-RPT)—Produces information that can assist in the preparation of Schedule SSA, the Annual Registration Statement Identifying Separated Participants with Deferred Vested Benefits. Schedule SSA is filed as an attachment to Form 5500 for each plan year in which one or more participants with deferred vested benefits are separated from service.

☞ *Refer to the* **Report Quick Reference** *(on page 615) for samples of these reports and the parameters used to define these reports.*

Inquiry forms for viewing plan rules

The following forms can be used to view plan rules.

Form	**Description**
Participation Rules Table form (TNISCR)	Reflects data from the Benefits Participation Rules Table form (TN-SCR).
Breaks-In-Service Rules Table form (TUISCR)	Reflects data from the Benefits Plan Breaks-In-Service Rules form (TU-SCR).
Retirement Dates Rules Table form (TJISCR)	Reflects data from the Benefits Retirement Dates Rules Table form (TJ-SCR).

Detailed Directions

This section provides detailed instructions for the tasks discussed in this section. Before completing these tasks you should document your deferred plan requirements. You can use the ***Benefits Plan Worksheet*** (on page 913) to do this. Also, you should have a benefits Control Number established for the organization for which you want to define deferred plans.

☞ *Refer to* **Setting Up Welfare Plans** *(on page 53) for instructions on defining benefits Control Numbers.*

Tasks

Completing the Guided Practice

In the Guided Practice for this section you will define a defined contribution plan. Specific details for entering plan values are described in the steps for the tasks. Following is a brief summary of the plan:

This plan is open to all active employees who are at least 21 years old and have one year of service from their original hire date. If employees are in CTRL-THREE 3030, they can contribute 1 to 10 percent of their salaries as a pretax deduction. If employees are in CTRL-THREE 3388, they can contribute 1 to 8 percent of their salaries as a pretax deduction. The company will match 50 percent, up to 5 percent of the employee's pretax deduction. The annual limit that an employee can contribute is 9,900.00. Deductions will be taken every pay period.

The participation and eligibility requirements are the same. The vesting schedule is a five-year cliff.

Specific rules regarding length of an employee termination and its impact on plan eligibility apply: Employees who terminate because of health reasons must return to active service within six months to avoid incurring a break-in-service. Other employees who terminate voluntarily must return to active service within three months. Employees who are involuntarily terminated must return to active service within one month.

Employees with 10 years of service can retire early at age 55. Normal retirement is age 62½ with 10 years of service. The first retirement eligibility notice is sent at six months and the second at one month.

Specifying basic plan identification and rules for deferred plans

To specify basic plan identification and rules you use the Benefit Plan Rules form (TK-SCR).

Note: *If benefit plans have already been established for a benefits Control Number, the first table record for a table form will be displayed when you access a particular table form. You may find it helpful to clear the form before entering values for a new table record.*

1. Access the Benefit Plan Rules form (TK-SCR)

Access this form by making the following selection from the Navigator:

Component:	Benefit Plan Setup and Maintenance
Process:	Deferred Plans
Task:	Plan Name and Basic Rules

For practice, access the Benefit Plan Rules form (TK-SCR) for Organization 999999.

2. Enter a Plan ID

Enter the unique identifier for the plan. You will enter this ID on all tables associated with the plan.

For practice, type 'A01'.

3. Enter an Effective Date

Use the same date that you entered on the Organization-To-Rules Cross-Reference For Benefits form (AY-SCR). Enter the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For practice, type '01-01-1925'.

4. Enter the Year End

Enter the date that reflects the plan's year end, whether it be a fiscal year or calendar year. Enter the date in the format MM-DD (US and Canada) or DD-MM (elsewhere).

For practice, type '12-31'(US and Canada) or '31-12' (elsewhere).

5. Enter a Plan Name

Enter a descriptive name for the plan. The name will display automatically on all tables with the same Plan ID. The name will also be displayed on reports.

For practice, type 'RETIREMENT'.

6. Select a Plan Type

Select the type of plan from the list box. Available values are from the Plan Types option list (BA16).

For practice, select 'Defined Contribution'.

7. Select a Service Date type

This indicates the date from which an employee's service is credited. This is also the date from which an employee's eligibility is determined. Options are obtained from the Service Date Field option list (BA24).

For practice, select 'Original Hire Date'.

8. Select a Class

Select a value that indicates the plan class or usage. For example, is employee enrollment in the plan mandatory or optional? Options are obtained from the Plan Class option list (BA17).

For practice, select 'Optional'.

9. Enter a Flex Master (optional)

If the plan is part of a flex plan, enter the Plan ID of the flex master.

For practice, leave this text box blank.

10. Enter a Group Master (optional)

If the plan is part of a group master plan, enter the Plan ID of the group master.

For practice, leave this text box blank.

11. Enter an Accum Name (optional)

Enter an accumulator ID only if the plan requires a considered earnings/hours (CE/H) accumulator.

For practice, leave this text box blank.

12. Select the Ins Carrier (optional)

For insurance plans, select the name of the plan provider. Available values are from the Insurance Carrier option list (BA629).

This list box is informational only. The name of the insurance carrier will appear on reports.

For practice, leave this list box blank.

13. Select a Default Enrollment Option (flex only)

Select a value from the list box to show what the enrollment option will be if the employee does not return the enrollment election form.

This list box is used only if the plan is part of a flex plan.

For practice, leave this list box blank.

14. Indicate a Default Enrollment tax contribution type (flex only)

Indicate the taxability of the contribution. These option buttons are used only if the plan is part of a flex plan.

For practice, do not modify this option.

15. Enter the applicable HEDs for the plan (optional)

Enter as many HEDs as are applicable for the plan. Enter HEDs only if the plan requires an employee contribution or a company accrual.

For practice, use a Basic Pre-tax HED of '560' for the employee and a Company HED of '562'.

16. Click Save or press Enter

Complete this step to save your entered data before continuing to the second panel or if you have no search types to define for the plan. The Benefit Plan Rules table record (TK-SCR) is created, and the following message is displayed:

'—New table entry has been established—'

For practice, click Save or press Enter.

17. Click the Continue Plan Rules (optional)

Complete this and the following steps only if you need to define search types for a plan.

For practice, click the Continue Plan Rules button.

18. Defining search types (optional)

If the benefits plan requires different rules for different groups of employees, you can use search types to specify those rules. The search type specified will require at least one search argument. If the search type indicates that a Cyborg Scripting Language program is required, you will enter the program's name in the accompanying search argument text box on this form. For all other search types, you will enter values on the corresponding tables.

For practice, set a Calculation search type of 'CTRL-THREE'. Setting a Calculation search type allows you to differentiate between employees who can contribute 1 to 10 percent (CTRL-THREE 3030) from those who can contribute only 1 to 8 percent (CTRL-THREE 3388).

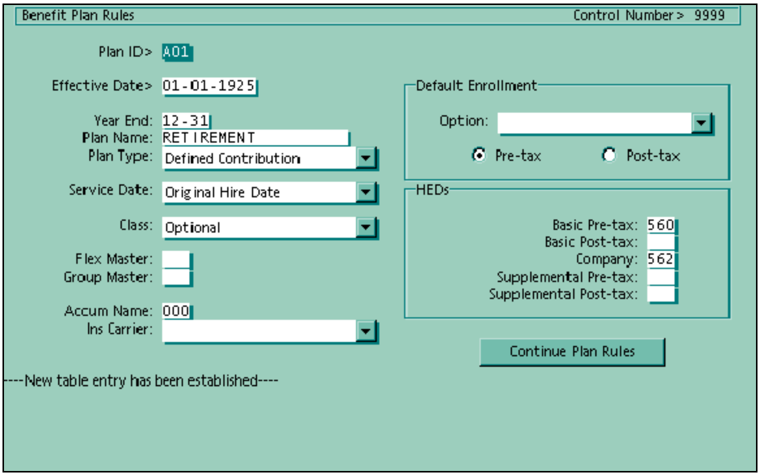
19. Click Save or press Enter

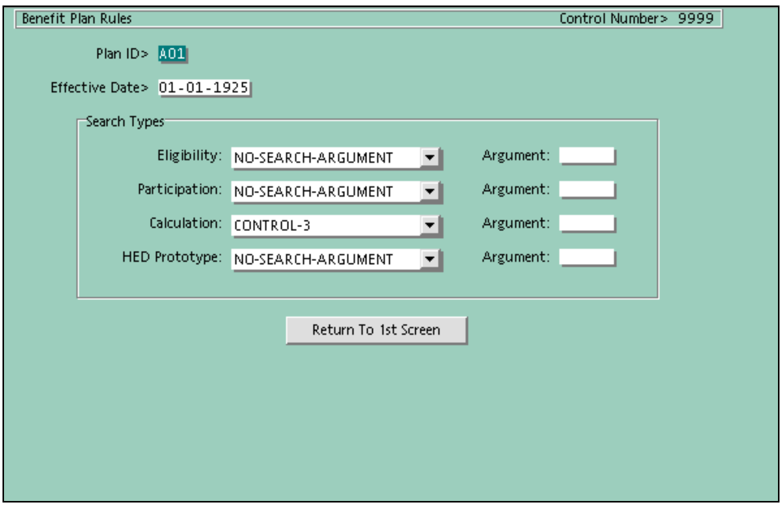
Complete this step only if you have defined a search type. The following message is displayed:

'—Maintenance has been performed—'

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting forms should look similar to the examples that follow:





Refer to **Setting Up Welfare Plans** *(on page 53) for a description of the uses of plan types and classes.*

Refer to **Setting Up Welfare Plans** *(on page 53) for a description of using search types and search arguments.*

Specifying plan eligibility rules for deferred plans

You must define at least one Benefit Plan Eligibility Rules form (TL-SCR) for a benefits plan. If you have defined an eligibility search type, the number of Benefit Plan Eligibility Rules forms (TL-SCR) you complete will depend on the necessary search arguments.

1. Access the Benefit Plan Eligibility Rules form (TL-SCR)

Access this form by making the following selection from the Navigator:

Component:	Benefit Plan Setup and Maintenance
Process:	Deferred Plans
Task:	Eligibility

For practice, access the Benefit Plan Eligibility Rules form (TL-SCR) for Organization 999999.

2. Enter the Plan ID

Enter the unique identifier for the plan.

For practice, type 'A01'.

3. Enter the Search Argument (optional)

If you specified an Eligibility search type on the Benefit Plan Rules form (TK-SCR), you must enter a search argument.

For practice, leave this text box blank.

4. Enter the Effective Date

Enter the original effective date of the plan [from the Organization-To-Rules Cross-Reference For Benefits form (AY-SCR)] or the date of the plan change. Enter the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '01-01-1925'.

5. Select the Eligibility Type

Select the rule on which eligibility is based from the Eligibility Type Rules option list (BA18).

For practice, select 'Age And Service Spec'.

6. Enter the Minimum Age (optional)

Complete this text box only if you selected an Eligibility Type that uses age. Enter the age requirement in YY-MM-DD format. For example, you would enter 21-00-00 for 21 years.

For practice, type '21-00-00'.

7. Enter the Maximum Age (optional)

Complete this text box only if you selected an Eligibility Type that uses age. Enter the age requirement in YY-MM-DD format. For example, you would enter 75-00-00 for 75 years.

For practice, type '99-00-00'.

8. Enter the Service (optional)

Complete this text box only if the plan uses a service requirement. Enter the service requirement in YY-MM-DD format. For example, you would enter '01-00-00' for one year of service.

For practice, type '01-00-00'.

9. Enter the Days/Hours (optional)

Complete this text box only if the plan requires an hours or days waiting period. Enter a numerical value without decimals to indicate the number of hours in the waiting period. Enter a one week waiting period, for example as '0040'. This is a four-position, numeric field.

If you use this text box, you must select a Service Method.

For practice, leave this text box blank.

10. Select a Service Method (optional)

Select an option from the Service Calculation Method option list (BA45) if you are using an eligibility type that requires accumulated hours or service before eligibility. The value you use in this list box is dependent on the value you chose for Eligibility Type.

For practice, select 'Elapsed Time'.

11. Select a Date Method

Select an option from the Date Calc Method option list (BA15) to establish the proper method for rounding dates.

For practice, select 'Actual Event Date'.

☞ *Refer to the* **Calculation Option List Quick Reference** *(on page 815) for documentation on this option list.*

12. Enter the Eligible Status code(s)

Enter the status codes that reflect the type of employee eligible for the plan. You can find these two-digit codes in the Employee Status option list (HR10).

You can use an asterisk (*) as a wild card. For example, if all active employees are eligible, you would enter '0*'. The value '**' is not a valid entry.

You must enter at least one status code.

For practice, type '0' in the first Eligible Status text box. The plan is open to all active employees.*

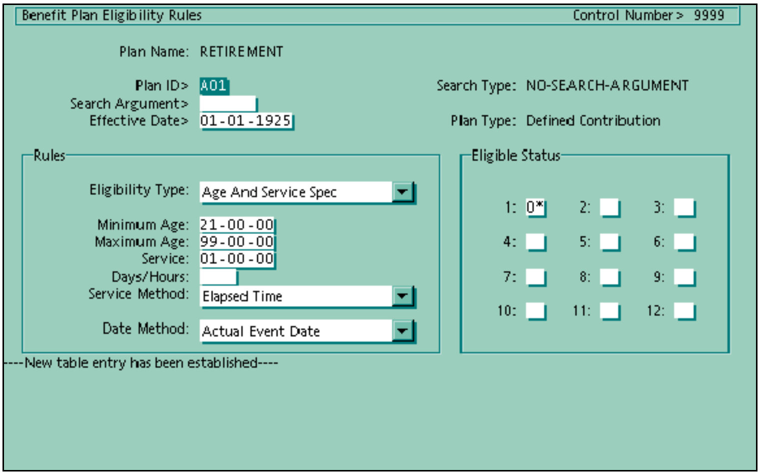
13. Click Save or press Enter

The Benefit Plan Eligibility Rules table record (TL-SCR) is created, and the following message is displayed:

'—New table entry has been established—'

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



Refer to **Setting Up Welfare Plans** *(on page 53) for a discussion of eligibility rules and eligibility status.*

Specifying coverage options and plan funding for deferred plans

You must complete one Coverage And Contribution Factors form (TM-SCR) for each valid coverage option that results in a cost. Similarly, if the plan requires both employee and employer contributions, you would complete one Coverage And Contribution Factors form (TM-SCR) for each contribution type.

1. Access the Coverage and Contribution Factors form (TM-SCR)

Access this form by making the following selection from the Navigator:

Component:	Benefit Plan Setup and Maintenance
Process:	Deferred Plans
Task:	Coverage/Contributions

For practice, access the Coverage And Contribution Factors form (TM-SCR) for Organization 999999.

2. Enter the Plan ID

Enter the unique identifier for the plan.

For practice, type 'A01'.

3. Select an Option

For deferred plans, you must select the option 'Plan/Company Match' from the Option Elected option list (BA03). No other values are allowed.

For practice, select 'Plan/Company Match'.

4. Select a Ctrb Type

Select a contribution type from the Contribution Type option list (BA19).

For practice, select 'Basic Pre Tax Contrb'.

5. Enter the Search Argument (optional)

If you specified a Calculation search type on the Benefit Plan Rules form (TK-SCR), you must enter a search argument.

For practice, specify coverage options and plan funding for those employees who can contribute 1 to 10 percent (CTRL-THREE 3030) by typing '3030'.

6. Enter an Effective Date

Enter the original effective date of the plan [from the Organization-To-Rules Cross-Reference For Benefits form (AY-SCR)] or the date of the plan change. Enter the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '01-01-1925'.

7. Select a Coverage Rule (optional)

If your plan requires a coverage amount, select a value from the Coverage Calc Method option list (BA20). For example, you might use this list box when defining a life insurance plan that is based on an employee's salary.

For practice, leave this list box blank.

Refer to the **Calculation Option List Quick Reference** *(on page 815) for documentation on this option list.*

8. Enter the coverage factor(s) (optional)

The coverage rule you selected in the previous step will determine which of these text boxes you should complete.

For practice, leave these text boxes blank.

9. Select a Contribution Rule (optional)

Select a value from Contribution Rules option list (BA31) to reflect the formula used to determine the contribution amount for the option and/or contribution type you are currently working with. This reflects the deduction from the employee's salary or the company's contribution.

For practice, select 'Range Of Whole Pcts'.

Refer to the **Calculation Option List Quick Reference** *(on page 815) for documentation on this option list.*

10. Enter the contribution factor(s) (optional)

The contribution rule you selected in the previous step will determine which of these text boxes you should complete.

For practice, type '0100' in the Factor 1 text box and '1000' in the Factor 2 text box.

11. Select the Result Freq

Select the frequency of the contribution. The values are obtained from the Contribution Resulting Frequency option list (BA47).

For practice, select 'Pay Period Amount'.

12. Enter a Nondiscrimination Value (optional)

Enter a value to be used in nondiscrimination testing if you want to use a value different from the contribution calculation amount.

For practice, leave this text box blank.

13. Enter the Flex Cost (flex only)

Enter the cost/credit amount for the flex plan. This value is based on the Flex Type selected.

For practice, leave this text box blank.

14. Select a Flex Type (flex only)

Select the rule from Flex Credit/Cost Calculation option list (BA59) that determines how costs and credits are determined for this plan.

For practice, leave this list box blank.

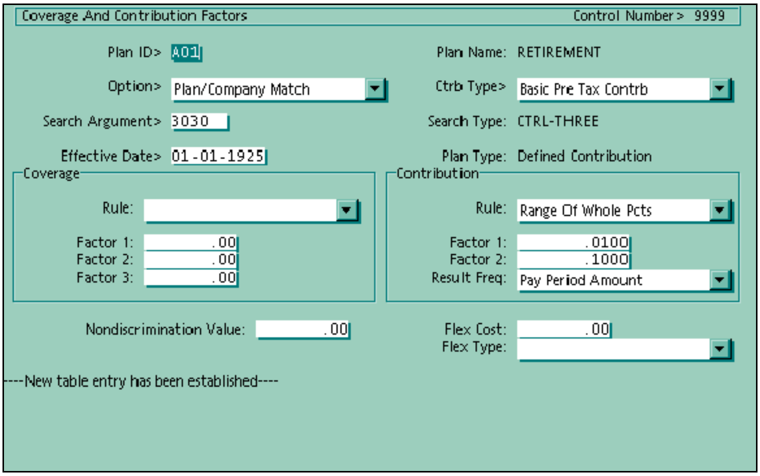
15. Click Save or press Enter

The Coverage And Contribution Factors table record (TM-SCR) is created, and the following message is displayed:

'—New table entry has been established—'

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



For practice, complete three additional Coverage And Contribution Factors forms (TM-SCR). Follow these directions:

Form 2

- **Option**—Plan/Company Match
- **Ctrb Type**—Basic Pre Tax Contrb
- **Search Argument**—3388
- **Effective Date**—01-01-1925
- **Contribution Rule**—Range Of Whole Pcts
- **Factor 1**—.0100
- **Factor 2**—.0800
- **Result Freq**—Pay Period Amount

For the company match, you will need two forms, one for each search argument.

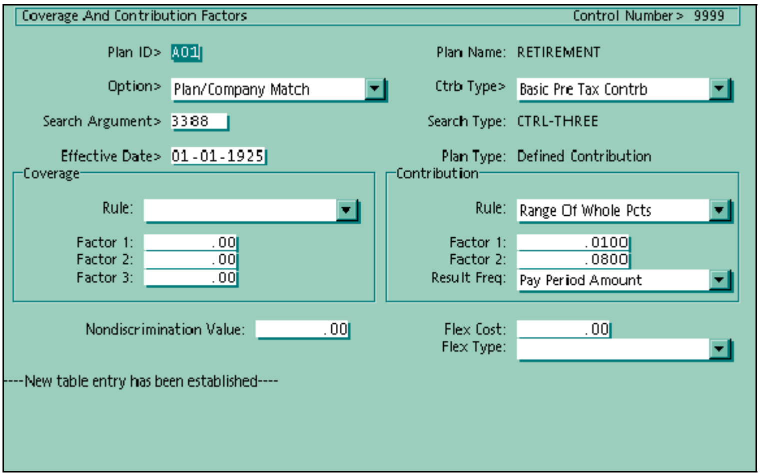
Form 3

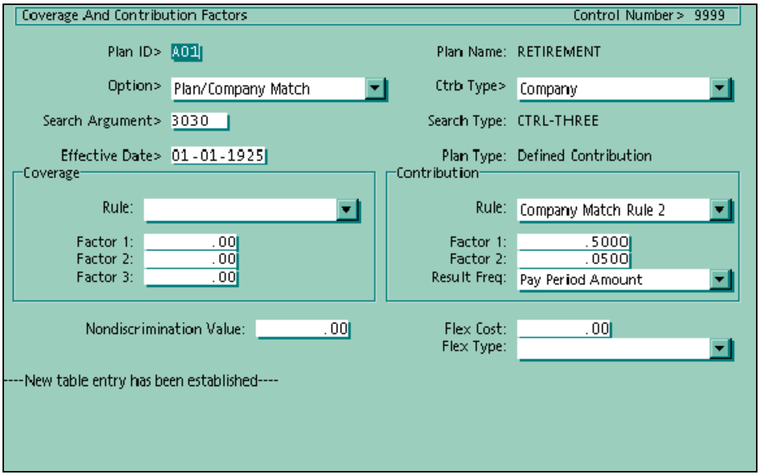
- **Option**—Plan/Company Match
- **Ctrb Type**—Company
- **Search Argument**—3030
- **Effective Date**—01-01-1925
- **Contribution Rule**—Company Match Rule 2
- **Factor 1**—.5000
- **Factor 2**—.0500
- **Result Freq**—Pay Period Amount

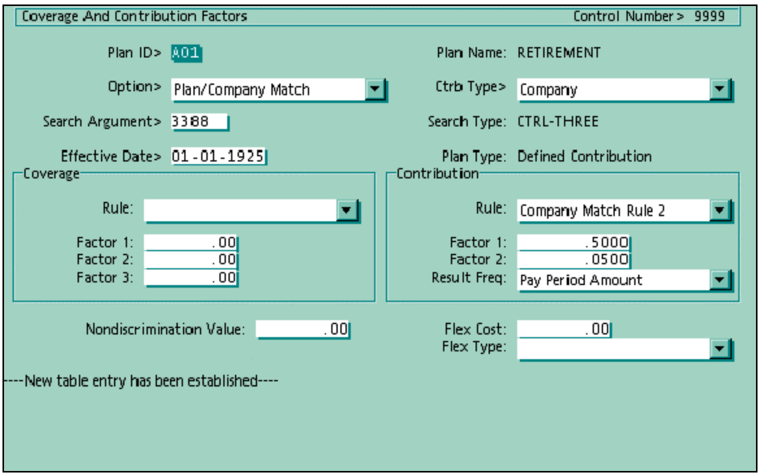
Form 4

- **Option**—Plan/Company Match
- **Ctrb Type**—Company
- **Search Argument**—3388
- **Effective Date**—01-01-1925
- **Contribution Rule**—Company Match Rule 2
- **Factor 1**—.5000
- **Factor 2**—.0500
- **Result Freq**—Pay Period Amount

If you completed the Guided Practice, the resulting forms should look similar to the examples that follow:







See also:

- Special considerations for defining deferred plans ***(on page 117)***

For a description of options, coverage rules, and contributions specific to deferred benefits plans.

Refer to **Setting Up Welfare Plans** *(on page 53) for a general discussion of plan coverages and contributions.*

Specifying payroll deduction rules for deferred plans

Complete one Benefit Plan Prototype Contribution HED form (TS-SCR) for each contribution type you defined on the Benefit Plan Rules form (TK-SCR). Consult with your Payroll specialist to ensure that you are using the correct values on this form.

1. Access the Benefit Plan Prototype Contribution HED form (TS-SCR)

Access this form by making the following selection from the Navigator:

Component:	Benefit Plan Setup and Maintenance
Process:	Deferred Plans
Task:	Prototype HED Setup

For practice, access the Benefit Plan Prototype Contribution HED form (TS-SCR) for Organization 999999.

2. Enter the Plan ID

Enter the unique identifier for the plan.

For practice, type 'A01'.

3. Select the Contrib Type

Select the contribution type from the Contribution Type option list (BA19). This should match the HEDs set up on the Benefit Plan Rules form (TK-SCR).

For practice, select 'Basic Pre Tax Contrb'.

4. Enter the Search Argument (optional)

If you specified an HED Prototype search type on the Benefit Plan Rules form (TK-SCR), you must enter a search argument.

For practice, leave this text box blank.

5. Enter the Effective Date

Enter the original effective date of the plan [from the Organization-To-Rules Cross-Reference For Benefits form (AY-SCR)] or the date of the plan change. Enter the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For practice, type '01-01-1925'.

6. Select a Frequency

Select an option to define when and how often a payroll deduction will be taken.

For practice, select 'All Pay Periods'.

7. Select a Type

Select an option to determine whether the deduction is to go into arrears when pay is insufficient to take the entire amount. Certain values, such as 'Take Part;No Arrears', can result in zero net pay for an employee. Be sure that the option you select reflects your organization's pay policy.

The values for this list box are obtained from the Arrears option list (PP10).

For practice, select 'Take Part;Rem In Arr'.

8. Select a Calc Method

Select the method for calculating the deduction amount. Select Fixed Amount only if a calculation is being performed by the Coverage And Contribution Factors form (TM-SCR) and it results in a monetary amount, or if the Amount/Percent text box contains the contribution amount. Typically, you will use a percentage rule or 'Accumulation Method'.

The values for this list box are obtained from the Deduction Method Code option list (PP12).

For practice, select '% Of Total Earnings'.

9. Select an Auto Deduction

Select the option to identify when the payroll deduction is to begin.

For practice, select 'Start W/Effect Date'.

10. Enter the Amount/Percent (optional)

If you want to establish a payroll deduction for all employees, enter the value here. If the payroll deduction is being calculated by the Coverage And Contribution Factors form (TM-SCR), leave this text box set to zeros.

For practice, do not change this text box.

Starting and stopping a deduction for all employees

11. Select a Start Method (optional)

To start and stop a deduction for all employees as of a certain date or monetary amount, use the Start Method and Stop Method list boxes and the Start Field and Stop Field text boxes. These list and text boxes apply to all employees enrolled in the plan.

Select the option for the type of start method for the deduction.

For practice, leave this list box blank.

12. Enter the Start Field (optional)

Enter the date or amount that, when reached, starts the deduction or automatic earnings for this deduction.

For practice, leave this text box blank.

13. Select a Stop Method (optional)

Select the option for the type of stop method for the deduction.

For practice, select 'YTD Max'.

14. Enter the Stop Field (optional)

Enter the date or amount that, when reached, stops the deduction or automatic earnings for this deduction. The required format for this text box depends on the value you selected for Stop Method. Refer to the online help for specifics.

For practice, type '990000'.

15. Enter Amount One (optional)

The Amount One and Amount Two text boxes are used by payroll. Do not make any entries in these text boxes. Any amounts in these text boxes will override payroll amounts.

For practice, leave this text box blank.

16. Enter Amount Two (optional)

For practice, leave this text box blank.

17. Enter the User Code

For benefits purposes, this field is used to further define the maximum yearly allowable amount of contributions for the plan that are greater than $9,999.99.

For practice, leave this text box blank.

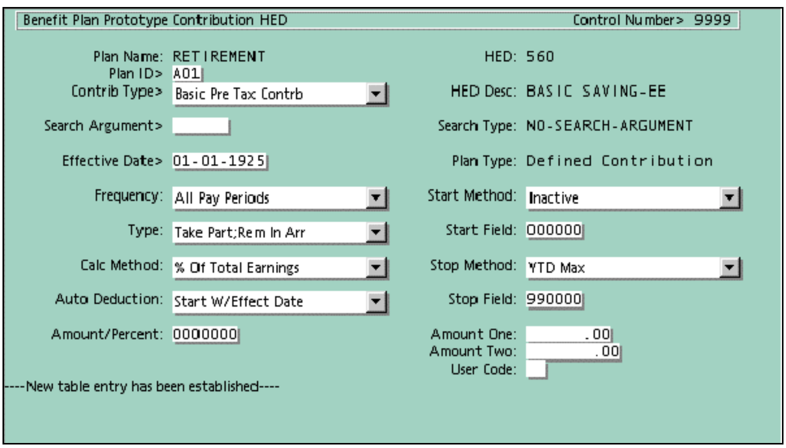
18. Click Save or press Enter

The Benefit Plan Prototype Contribution HED table record (TS-SCR) is created, and the following message is displayed:

'—New table entry has been established—'

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:

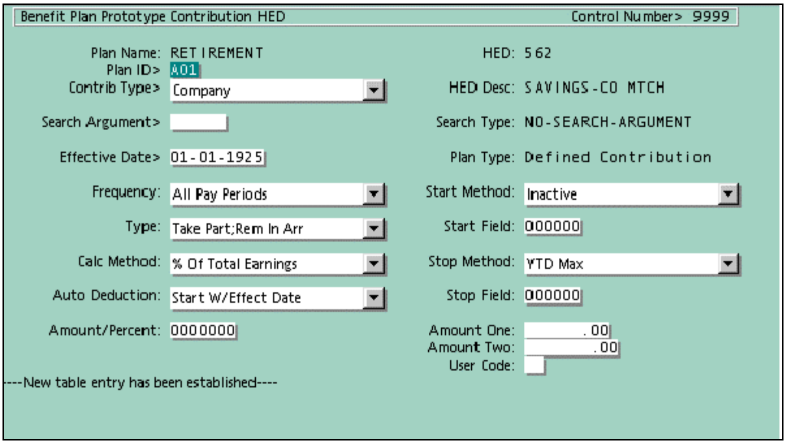


Refer to **Setting Up Welfare Plans** *(on page 53) for a description of recording the HEDs used in a plan.*

To complete the Guided Practice, you must establish a Benefit Plan Prototype Contribution HED for the Company HED of 562. Follow these directions:

- **Contrib Type**—Company
- **Effective Date**—01-01-1925
- **Frequency**—All Pay Periods
- **Type**—Take Part;Rem In Arr
- **Calc Method**—% Of Total Earnings
- **Auto Deduction**—Start W/Effect Date
- **Stop Method**—Inactive
- **Stop Field**—000000

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



Benefit Plan Prototype Contribution HED   Control Number> 9999

Plan Name: RETIREMENT   HED: 562
Plan ID> A01
Contrib Type> Company   HED Desc: SAVINGS-CO MTCH
Search Argument>   Search Type: NO-SEARCH-ARGUMENT
Effective Date> 01-01-1925   Plan Type: Defined Contribution
Frequency: All Pay Periods   Start Method: Inactive
Type: Take Part;Rem In Arr   Start Field: 000000
Calc Method: % Of Total Earnings   Stop Method: YTD Max
Auto Deduction: Start W/Effect Date   Stop Field: 000000
Amount/Percent: 0000000   Amount One: .00
Amount Two: .00
User Code:
----New table entry has been established----

Associating plan statuses with coverage options for deferred plans

For each option available for a plan, define what the employee's previous plan status and new plan status will be.

1. Access the Option/Resulting Plan Status Rules form (TTOSCR)

Access this form by making the following selection from the Navigator:

Component: Benefit Plan Setup and Maintenance
Process: Deferred Plans
Task: Option Validation

For practice, access the Option/Resulting Plan Status Rules form (TTOSCR) for Organization 999999.

2. Enter the Plan ID

Enter the unique identifier for the plan.

For practice, type 'A01'.

3. Select an Option

Select a coverage option from the Option Elected option list (BA03). As a convention, most organizations use 'Participant' rather than 'Enrolled' for deferred plans.

For practice, select 'Participant'.

4. Enter the Search Argument (optional)

If you selected an Eligibility search type on the Benefit Plan Rules form (TK-SCR), you must enter a search argument.

For practice, leave this text box blank.

5. Enter the Effective Date

Enter the original effective date of the plan [from the Organization-To-Rules Cross-Reference For Benefits form (AY-SCR)] or the date of the plan change. Enter the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For practice, type '01-01-1925'.

6. Select a Date Method

Select the date method to define the rounding rule for the date when the resulting plan status will take effect.

For practice, select 'Actual Event Date'.

7. Enter the Low Status and High Status

These text boxes reflect the statuses that an employee must have to be eligible to elect the coverage option in the Option list box. The values are obtained from the Plan Status option list (BA04).

Use a Low Status and a corresponding High Status to build a range of values. For example, if you want employees with no prior status and active participants to be able to choose the specified coverage option, you could set a Low Status of '0' and a High Status of '1'.

For practice, type the Low Status and High Status values from the following table:

Low Status	High Status
0	1

5	5
7	7

8. Enter the Resulting Status

Enter the resulting employee plan status that will occur if the employee elects a particular coverage option. The values are obtained from the Plan Status option list (BA04).

For practice, type the Resulting Status values from the following table:

Low Status	High Status	Resulting Status
0	1	1
5	5	1
7	7	1

9. Enter a Delay Time (optional)

Use this text box to define an additional length of time before the resulting plan status becomes effective. Enter the time span as YYMMDD. This amount of time is added to the effective date and rounded using the Date Method chosen.

For practice, leave this text box blank.

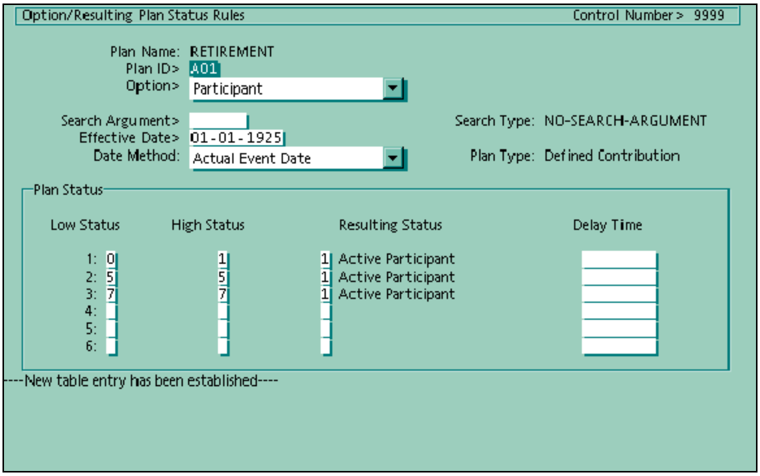
10. Click Save or press Enter

The Option/Resulting Plan Status Rules table record (TTOSCR) is created, and the following message is displayed:

'—New table entry has been established—'

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



Option/Resulting Plan Status Rules   Control Number> 9999

Plan Name: RETIREMENT
Plan ID> A01
Option> Participant

Search Argument>   Search Type: NO-SEARCH-ARGUMENT
Effective Date> 01-01-1925
Date Method: Actual Event Date   Plan Type: Defined Contribution

Plan Status

	Low Status	High Status	Resulting Status	Delay Time
1:	0	1	1 Active Participant	
2:	5	5	1 Active Participant	
3:	7	7	1 Active Participant	
4:				
5:				
6:				

----New table entry has been established----

For practice, complete two more Option/Resulting Plan Status Rules forms(TTOSCR), one for 'Waived' and one for 'Shutoff/Deenroll'. Use these directions:

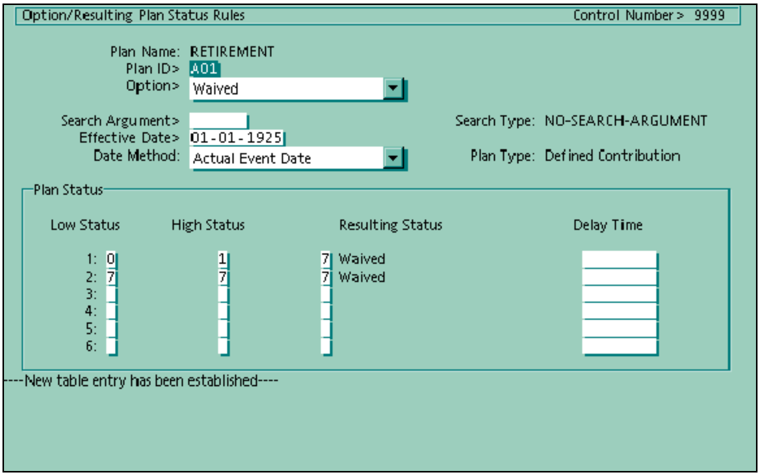
For the 'Waived' option:

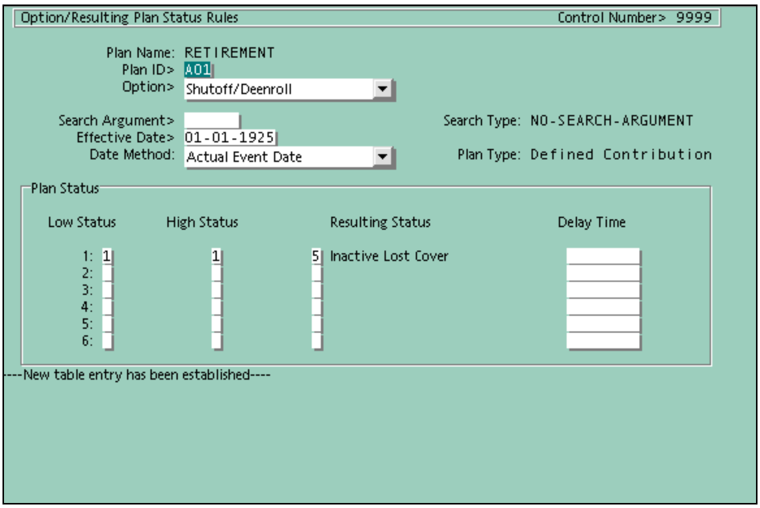
Low Status	**High Status**	**Resulting Status**
0	1	7
7	7	7

For the 'Shutoff/Deenroll' option:

Low Status	**High Status**	**Resulting Status**
1	1	5

If you completed the Guided Practice, the resulting forms should look similar to the examples that follow:





Refer to **Setting Up Welfare Plans** *(on page 53) for a discussion of the importance of employee plan statuses.*

Associating separation activities with resulting plan statuses for deferred plans

In this task, you define the employee activities that will result in a change to their plan statuses. These activities can include leave of absence, termination, and disability.

You will complete this form for each activity that results in a change of plan status. The activities are from the Activity Codes option list (HR09). These activities should have been defined during the implementation of basic Human Resources functionality.

1. Access the Activity/Resulting Plan Status Rules form (TTASCR)

Access this form by making the following selection from the Navigator:

Component:	Benefit Plan Setup and Maintenance
Process:	Deferred Plans
Task:	Activity/Plan Status

For practice, access the Activity/Resulting Plan Status Rules form (TTASCR) for Organization 999999.

2. Enter the Plan ID

Enter the unique identifier for the plan.

For practice, type 'A01'.

3. Select an Activity

Select an activity from the Activity Codes option list (HR09) that will result in a change in an employee's plan status.

For practice, select 'Term-Vol,All Values'.

4. Enter the Search Argument (optional)

If you selected an Eligibility search type on the Benefit Plan Rules form (TK-SCR), you must enter a search argument. This must be the same search argument entered on the Benefit Plan Eligibility Rules form (TL-SCR) and on the Option/Resulting Plan Status Rules form (TTOSCR).

For practice, leave this text box blank.

5. Enter the Effective Date

Enter the original effective date of the plan [from the Organization-To-Rules Cross-Reference For Benefits form (AY-SCR)] or the date of the plan change. Enter the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For practice, type '01-01-1925'.

6. Select a Date Method

Select the date method to define the rounding rule for when the resulting plan status will take effect.

For practice, select 'Actual Event Date'.

7. Enter the Low Status and High Status

These text boxes reflect the statuses that an employee must have before the activity occurs. These values are obtained from the Plan Status option list (BA04).

Use a Low Status and a corresponding High Status to build a range of values.

For practice, use a Low Status of '1' and a High Status of '1'.

8. Enter the Resulting Status

Enter the resulting employee plan status that will occur if the separation activity being defined occurs for an employee. The values are obtained from the Plan Status option list (BA04).

For practice, type a resulting status of '5'.

9. Enter a Delay Time (optional)

Use this text box to define an additional length of time before the resulting plan status becomes effective. Enter the time span as YYMMDD.

For practice, leave this text box blank.

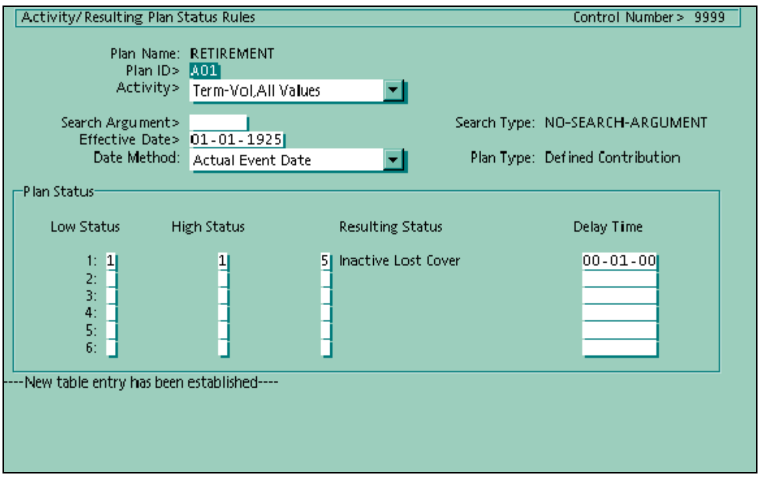
10. Click Save or press Enter

The Activity/Resulting Plan Status Rules table record (TTASCR) is created, and the following message is displayed:

'—New table entry has been established—'

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



☞ *Refer to* **Setting Up Welfare Plans** *(on page 53) for a discussion of separation activities and their effect on employee plan statuses.*

Specifying plan participation rules

You must complete a Benefits Participation Rules Table form (TN-SCR) for each deferred plan. You must establish the criteria for when an employee can become a participant, begin accruing benefits, and begin vesting in a plan.

1. Access the Benefits Participation Rules Table form (TN-SCR)

Access this form by making the following selection from the Navigator:

Component:	Benefit Plan Setup and Maintenance
Process:	Deferred Plans
Task:	Participation/Vesting

For practice, access the Benefits Participation Rules Table form (TN-SCR) for Organization 999999.

2. Enter the Plan ID

Enter the unique identifier for the plan.

For practice, type 'A01'.

3. Enter the Search Argument (optional)

If you selected a Participation search type on the Benefit Plan Rules form (TK-SCR), you must enter a search argument.

For practice, leave this text box blank.

4. Enter the Effective Date

Enter the original effective date of the plan [from the Organization-To-Rules Cross-Reference For Benefits form (AY-SCR)] or the date of the plan change. Enter the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, type '01-01-1925'.

5. Select a Schedule

Select a value from the Vesting Schedules option list (BA26) to calculate percent vested and vesting dates for plan participants. You must enter a value in this list box when contributions under plan rules become owned by the participant after the service requirements are satisfied.

The Vesting Schedules option list (BA26) is a calculation option list. Do not change the meaning of the code translations. If you need to add a code, you must also add method code logic.

For practice, select '5 Yr Cliff/0% Before'.

Complete benefit accrual information

6. Select a Benefit Accrual Type

Select a value from the Service Rules option list (BA30) to define the calculation method used to calculate the employee's accrued benefit date.

The accrued benefit date is the date on which an employee begins accruing a benefit in the plan.

For practice, select 'At Service Specified'.

7. Enter the Benefit Accrual Age Min (optional)

If required, enter the age that employees must reach before being eligible to begin their accrued benefit. Enter the date in YY-MM-DD format. For example, if employees must be 60 years of age before they are eligible to receive their benefit, you would enter '60-00-00'.

For practice, leave this text box blank.

8. Enter the Benefit Accrual Max (optional)

If you selected a Type that references age, you must complete this text box. Enter the maximum age employees can be before the benefit no longer accrues. If the plan does not have a maximum age rule and you entered a Benefit Accrual Age Min value, enter a dummy value, such as '99'.

Enter the age in YY-MM-DD format. For example, if an employee is no longer eligible to accrue a benefit at age 60, you would enter '60-00-00'.

For practice, leave this text box blank.

9. Enter the Benefit Accrual Service

Enter the amount of service employees must accumulate before receiving their accrued benefit. Enter the amount in the format YY-MM-DD.

For practice, type '05-00-00'.

10. Enter Benefit Accrual Hours

Enter the amount of time (in hours) that employees must work before receiving their accrued benefit. Enter hours as integers only (fractional portions are not allowed).

For practice, leave this text box blank.

11. Select a Benefit Accrual Method

Select a value from the Service Calc Method option list (BA45) that indicates how the credited service should be calculated for the plan.

The Service Calc Method option list (BA45) is a calculation option list. Do not change the meaning of the code translations. If you need to add a code, you must also add method code logic.

For practice, select 'Elapsed Time'.

12. Select a Benefit Accrual Calc Date

Select a value from the Date Calc option list (BA15) that indicates how the date should be calculated for determining benefit accruals.

The Date Calc Method option list (BA15) is a calculation option list. Do not change the meaning of the code translations. If you need to add a code, you must also add method code logic.

For practice, select 'Actual Event Date'.

Complete participation information

13. Select a Participation Type

Select a value from the Service Rules option list (BA30) that indicates how the date should be calculated for determining participation in a plan. Often, the date is calculated the same way that eligibility for the plan is calculated.

The Service Rules option list (BA30) is a calculation option list. Do not change the meaning of the code translations. If you need to add a code, you must also add method code logic.

For practice, select 'Age And Service'.

14. Enter the Participation Age Min (optional)

If required, enter the age that employees must reach before becoming participants in the plan. Enter the age in YY-MM-DD format. For example, if employees must be 60 before they are eligible to be participants, you would enter '60-00-00'.

For practice, type '21-00-00'.

15. Enter the Participation Max (optional)

Enter the maximum age at which employees can still be participants in the plan. Enter the age in YY-MM-DD format. For example, if employees can no longer be participants after the age of 60, you would enter '60-00-00'.

For practice, type '99-00-00'.

16. Enter the Participation Service

Enter the amount of service employees must accumulate before participating in the plan. Enter the amount in the format YY-MM-DD.

For practice, type '01-00-00'.

17. Enter the Participation Hours

Enter the amount of time (in hours) that employees must work before participating in the plan. Enter hours as integers only (fractional portions are not allowed).

For practice, leave this text box blank.

18. Select a Participation Method

Select a value from the Service Calc Method option list (BA45) that indicates how the credited service should be calculated for the plan.

The Service Calc Method option list (BA45) is a calculation option list. Do not change the meaning of the code translations. If you need to add a code, you must also add method code logic.

For practice, select 'Elapsed Time'.

19. Select a Participation Calc Date

Select a value from the Date Calc option list (BA15) that indicates how the date should be calculated for determining participation.

The Date Calc Method option list (BA15)is a calculation option list. Do not change the meaning of the code translations. If you need to add a code, you must also add method code logic.

For practice, select 'Actual Event Date'.

Complete vesting information

20. Select a Vesting Type

Select a value from the Service Rules option list (BA30) to define the calculation method used to calculate the employee's vesting service date—that is, when employees become eligible for vesting privileges in the plan.

The Service Rules option list (BA30) is a calculation option list. Do not change the meaning of the code translations. If you need to add a code, you must also add method code logic.

For practice, select 'At Service Specified'.

21. Enter the Vesting Age Min (optional)

If required, enter the age employees must reach before they can begin vesting in the plan. Enter the age in YY-MM-DD format. For example, if employees must be 21 before they can begin vesting in the plan, you would enter '21-00-00'.

F*or practice, leave this text box blank.*

22. Enter the Vesting Max (optional)

Enter the maximum age at which employees can still vest in the plan. Enter the age in YY-MM-DD format. For example, if employees' maximum age for vesting is 60, you would enter '60-00-00'.

For practice, leave this text box blank.

23. Enter the Vesting Service

Enter the amount of service employees must accumulate before becoming vested in the plan. Enter the amount in the format YY-MM-DD.

For practice, type '05-00-00'.

24. Enter the Vesting Hours

Enter the amount of time (in hours) employees must work before becoming vested in the plan. Enter hours as integers only (fractional portions are not allowed).

For practice, leave this text box blank.

25. Select a Vesting Method

Select a value from the Service Calc Method option list (BA45) that indicates how the credited service should be calculated for the plan.

The Service Calc Method option list (BA45) is a calculation option list. Do not change the meaning of the code translations. If you need to add a code, you must also add method code logic.

For practice, select 'Elapsed Time'.

26. Select a Vesting Calc Date

Select a value from the Date Calc option list (BA15) that indicates how the date should be calculated for determining benefit vesting.

The Date Calc Method option list (BA15) is a calculation option list. Do not change the meaning of the code translations. If you need to add a code, you must also add method code logic.

For practice, select 'Actual Event Date'.

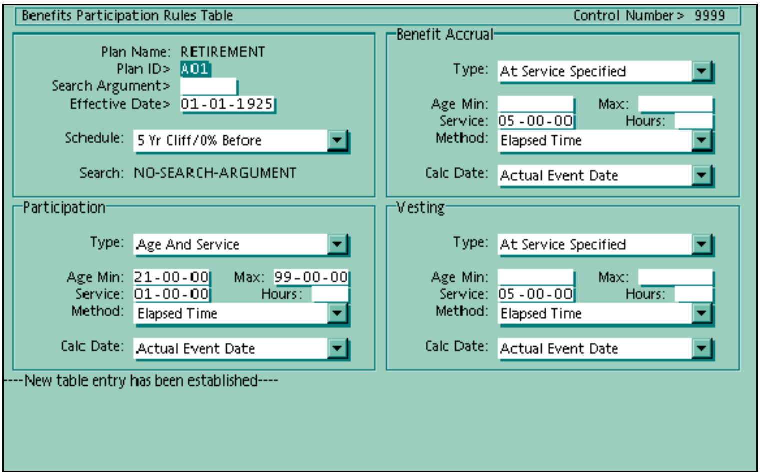
27. Click Save or press Enter

The Benefits Participation Rules Table record (TN-SCR) is created and the following message is displayed:

'—New table entry has been established—'

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



Benefits Participation Rules Table   Control Number> 9999

Plan Name: RETIREMENT
Plan ID> A01
Search Argument>
Effective Date> 01-01-1925
Schedule: 5 Yr Cliff/0% Before
Search: NO-SEARCH-ARGUMENT

Benefit Accrual
Type: At Service Specified
Age Min: Max:
Service: 05-00-00 Hours:
Method: Elapsed Time
Calc Date: Actual Event Date

Participation
Type: Age And Service
Age Min: 21-00-00 Max: 99-00-00
Service: 01-00-00 Hours:
Method: Elapsed Time
Calc Date: Actual Event Date

Vesting
Type: At Service Specified
Age Min: Max:
Service: 05-00-00 Hours:
Method: Elapsed Time
Calc Date: Actual Event Date

For a description of participation requirements.

Specifying breaks-in-service rules---optional

Complete this task only if a plan has specific rules regarding the length of a separation and its impact on plan eligibility. Complete one Benefits Plan Breaks-In-Service Rules form (TU-SCR) for each applicable separation activity.

1. Access the Benefits Plan Breaks-In-Service Rules form (TU-SCR)

Access this form by making the following selection from the Navigator:

Component: Benefit Plan Setup and Maintenance
Process: Deferred Plans
Task: Breaks-In-Service

For practice, access the Benefits Plan Breaks-In-Service Rules form (TU-SCR) for Organization 999999.

2. Enter the Plan ID

Enter the unique identifier for the plan.

For practice, type 'A01'.

3. Enter the Major Activity

Enter the first position of the value for the activity that constitutes a break in service. The activities are defined in the Activity Codes option list (HR09).

For example, for leaves of absence, you would enter '5'.

For practice, type '1'.

4. **Enter the Effective Date**

Enter the original effective date of the plan [from the Organization-To-Rules Cross-Reference For Benefits form (AY-SCR)] or the date of the plan change. Enter the date in the format MM-DD-CCYY or CCYYMMDD.

For practice, type '01-01-1925'.

5. **Enter the Activity Low and High range**

In the Activity Low and High text boxes, enter the two-position codes that complete the range of activities that constitute a break in service. These values are the second and third positions of the Major Activity code from the Activity Codes option list (HR09).

For example, if only leaves of absence without pay constitute a break in service (Activity Codes option list values of 551 through 556), you would enter '51' in the Activity Low text box and '56' in the Activity High text box.

For practice, type '02' for Low and '02' for High to record breaks-in-service rules for voluntary termination due to health reasons.

6. **Select an Activity Rule**

Select a value from the Activity Rules option list (HR09) that reflects how a returning employee's break in service should be handled. This value applies only to the Low and High Activities on the same line.

For practice, select 'Leave Exceeds Grace'.

7. **Enter the Delay Time**

Enter an amount of time to be added to the employee's leave date to calculate the date by which the employee must return to active service to avoid incurring a break in service under plan rules.

Enter the amount in the format YY-MM-DD. For example, to specify a delay time of three months, you would enter '00-03-00'.

For practice, type '00-06-00'.

8. **Select a Date Method**

Select a value from the Date Calc Method option list (BA15) to adjust the date formed by adding the Delay Time to the leave date to determine if a break in service has been incurred when an employee returns from a service interruption.

For practice, select 'FOM Coincidnt/follow'.

9. **Click Save or press Enter**

A new Benefits Plan Breaks-In-Service Rules table (TU-SCR) is created and the following message is displayed:

'—New table entry has been established—'

To complete the Guided Practice, add two more activity ranges for the Major Activity of termination. Use these directions. When you have completed typing the data, be sure to Click Save or press Enter.

For this activity range	Use these values
04–09	Activity Rule: Leave Exceeds Grace
	Delay Time: 00-03-00
	Date Method: FOM Coincidnt/follow
22–27	Activity Rule: Leave Exceeds Grace
	Delay Time: 00-01-00
	Date Method: Actual Event Date

If you completed the Guided Practice, the resulting form should look similar to the example that follows:

■ Recording breaks-in-service policies ***(on page 125)***
For a description of breaks-in-service policies.

Specifying retirement date rules---optional

Retirement rules are generally used in planning benefits for the future. To specify retirement rules, follow these steps:

1. Access the Benefits Retirement Dates Rules Table form (TJ-SCR)

Access this form by making the following selection from the Navigator:

Component: Benefit Plan Setup and Maintenance
Process: Deferred Plans
Task: Retirement Dates

For practice, access the Benefits Retirement Dates Rules Table form (TJ-SCR) for Organization 999999.

2. Enter the Plan ID

Enter the unique identifier for the plan.

For practice, type 'A01'.

3. Enter the Search Argument (optional)

If you selected a Participation search type on the Benefit Plan Rules form (TK-SCR), you must enter a search argument.

For practice, leave this text box blank.

4. Enter the Effective Date

Enter the original effective date of the plan [from the Organization-To-Rules Cross-Reference For Benefits form (AY-SCR)] or the date of the plan change. Enter the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For practice, type '01-01-1925'.

Enter disability retirement information (optional)

5. Enter the Age

Enter the earliest possible age required before an employee can go on disability retirement. Enter the age in the format YY-MM-DD. For example, you would enter '55-00-00' for age 55.

For practice, leave this text box blank.

6. Enter the Service

Enter the minimum service requirement before an employee can go on disability retirement. Enter the amount in YY-MM-DD format. For example, you would enter '10-00-00' for 10 years.

For practice, leave this text box blank.

7. Select an Adjustment

Select a value from the Date Calc Method option list (BA15) to indicate how a disability retirement date should be rounded.

For practice, leave this text box blank.

Enter early and normal retirement age and notice information (optional)

Complete these steps only if the plan has rules for early or normal retirement. These two group boxes on the form are completed in the same way.

Use the following directions to complete the Guided Practice for recording early and normal retirement rules:

For this retirement category	Use these values
Early	Rule: Age And Service Age: 55-00-00 Service: 10-00-00 Notices 1st: 00-06-00 Notices 2nd: 00-01-00 Adjustment: Actual Event Date
Normal	Rule: Age And Service Age: 2-06-00 Service: 0-00-00 Notices 1st: 0-06-00 Notices 2nd: 0-01-00 Adjustment: Actual Event Date

8. Select a Rule

Select a value from the Retirement Age Rules option list (BA29) to establish a basis for retirement calculations.

9. Enter the Age

Enter the earliest possible age required before an employee qualifies for early or normal retirement. Enter the age in YY-MM-DD format. For example, you would enter '55-00-00' for 55 years.

10. Enter the Service

Enter the minimum service requirement before an employee qualifies for early or normal retirement. Enter the amount in YY-MM-DD format. For example, you would enter '10-00-00' for 10 years.

11. Enter the Notices 1st

If you intend to notify your employees of their eligibility for early or normal retirement, enter the date that defines how far in advance the first notice should be sent. Enter the date in YY-MM-DD format. For example, you would enter '00-06-00' for six months.

12. Enter the Notices 2nd

If you intend to notify your employees of their eligibility for early or normal retirement, enter the date that defines how far in advance the second notice should be sent. Enter the date in YY-MM-DD format. For example, you would enter '00-03-00' for three months.

13. Select an Adjustment

Select a value from the Date Calc Method option list (BA15) to indicate how an early or normal retirement date should be rounded.

Enter latest retirement information (optional)

14. Enter the Age

Enter the latest age required before an employee qualifies for retirement. Enter the age in YY-MM-DD format. For example, you would enter '65-00-00' for 65 years.

For practice, leave this text box blank.

15. Enter the Notices 1st

If you intend to notify your employees of their eligibility for retirement, enter the date that defines how far in advance the first notice should be sent. Enter the date in YY-MM-DD format. For example, you would enter '00-06-00' for six months.

For practice, leave this text box blank.

16. Enter the Notices 2nd

If you intend to notify your employees of their eligibility for retirement, enter the date that defines how far in advance the second notice should be sent. Enter the date in YY-MM-DD format. For example, you would enter '00-03-00' for three months.

For practice, leave this text box blank.

17. Select an Adjustment

Select a value from the Date Calc Method option list (BA15)to indicate how the latest retirement date should be rounded.

For practice, leave this text box blank.

18. Click Save or press Enter

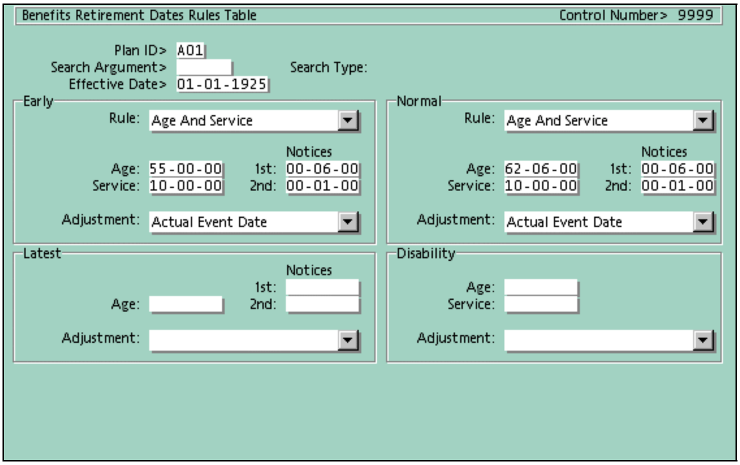
A new Benefits Retirement Rules Table record (TJ-SCR) is created and the following message is displayed:

'—New table entry has been established—'

In addition, a Participation Type and Description are displayed on the form. The values are from the Plan Rules Search Type option list (BA14).

For practice, click Save or press Enter.

If you completed the Guided Practice, your form should look similar to the following example:



See also:

- Recording retirement policies ***(on page 128)***

For a description of retirement age policies and retirement notices.

Extended Practice

Set up a savings plan using the following information:

Plan ID:	S02
Plan Type:	Thrift/Savings
Effective Date:	01-01-1925
Plan Year End:	12-31 (US and Canada) or 31-12 (elsewhere)
Plan Category:	Optional
Eligibility:	All active salaried or hourly employees age 18 or older with one year of service (no temporary employees). Year of service is determined using Elapsed Time. The employee is eligible to get into the plan the first of the quarter coincident or following eligibility date.
Enrollment Options:	Participant, Waived, Shutoff/Deenroll
Vesting Schedule:	7 Year Graded
Pay Period Contributions:	Employee Basic Pre Tax—Up to 6% of Salary, whole percents Employee Supplemental Pre Tax—Up to an additional 9%, whole percents Company Match—0% up to 6% of Employee Basic Pre Tax
HED Information:	Employee Basic Pre Tax—HED 560 Employee Supplemental Pre Tax—HED 561 Company Contributions—HED 562
Service Dates:	Participation—At Eligibility Benefit Accrual—At Participation Service Date Vesting—At Participation Service Date Plan based on Adjusted Seniority
Separation Activities:	Voluntary termination—all values Involuntary termination—all values Retirement—all values Leave-of-absence with pay (1-year extension of Coverage) Death

Breaks-In-Service Rules:	Create the following breaks-in-service rules for the major activity of Termination: 02–05 Activity Rule—Leave Exceeds Grace Delay Time—00-06-00 Date Method—FOM Coincidnt/follow 22–27 Activity Rule—Leave Exceeds Grace Delay Time—00-01-00 Date Method—Actual Event Date
Retirement Dates:	Early Rule—Age And Service Age—55-00-00 Service—10-00-00 Notices 1st—00-06-00 Notices 2nd—00-01-00 Adjustment—Actual Event Date Normal Rule—Age And Service Age—62-06-00 Service—10-00-00 Notices 1st—00-06-00 Notices 2nd—00-01-00 Adjustment—Actual Event Date

9. What reports are available for documenting deferred plan rules?

CHAPTER 6

Setting Up Flex Plans

In This Chapter

Introduction

Each welfare and deferred plan that you have created is an individual plan with its own rules. Your organization has the ability to enroll employees in all plans for which they qualify. Should your organization decide to establish a Flexible Benefits Program, the benefit plans that are already in place will need only slight modification to be usable in a flex environment.

A Flexible Benefits Program is a benefit program in which the organization may allocate to each employee a pool of credits or money. These credits are to be spent to purchase benefits tailored to individual needs. Flex plans enable you to organize and simplify the management of your welfare and deferred benefits plans.

Because a flex plan is like an umbrella that covers a group of component plans, it can contain higher rules that govern the entire group and make it one unit.

To use eCyborg Interactive Benefits for online benefits enrollment, each welfare benefits plan offered by your organization must be a component of a flex master.

☞ *Refer to the eCyborg Interactive Workforce: The Administrators' Guide for more information about for specific information about using Benefits Flex Masters.*

☞ *Refer your employees to eCyborg Interactive Workforce: A Guide to Your Benefits Information for information about using eCyborg Interactive Benefits.*

Review this section carefully before beginning your flex plan analysis. It will acquaint you with the issues involved in setting up your flex plan.

About the examples

Throughout this section, we will be looking at examples from Acme Manufacturing's flex plan (Plan 600).

Tasks

This section explains the following:

- Modifying plan rules for flex component plans
- Specifying group plan basic identification and rules
- Identifying group component plans
- Setting up a flex credits formula
- Specifying flex plan basic identification and rules
- Recording flex benefits rules at the Master Plan level
- Identifying flex master component plans

Prerequisites

Before you can set up flex benefit plans, the following must be established:

- Organizations including Hours, Earnings, and Deductions (HEDs)
- Employees
- Benefits Control Numbers
- Activity Codes option list (HR09)
- Employee Status option list (HR10)
- Activity and Resulting Employee Status Rules (TF-SCR)

☞ *Refer to* **Setting Up Welfare Plans** *(on page 53) for more information about setting up Control Numbers.*

- Flex component plans

☞ *Refer to* **Setting Up Welfare Plans** *(on page 53) and* **Setting Up Deferred Plans** *(on page 111) for more information about setting up welfare and deferred benefits plans.*

Questions answered

The following questions are answered in this section:

1. What are flex plans?
2. What are the prerequisites for flex plans?
3. What tables are used to define flex plans?
4. What are group plans and how are they used?
5. In what ways can flex credits/monetary amounts be calculated and allocated?

What are flex plans?

A flexible benefits plan is any plan that lets participants choose some or all of their benefits. For example, a cafeteria plan is a flexible benefits plan that offers a choice between cash (or other permissible taxable benefits) and nontaxable benefits. A cafeteria plan can be a group of benefit-based plans, or one or more Flexible Spending Arrangements (FSAs), or both.

Types of flex plans

While it may be true that no two flex plans are alike, these are some of the most common types:

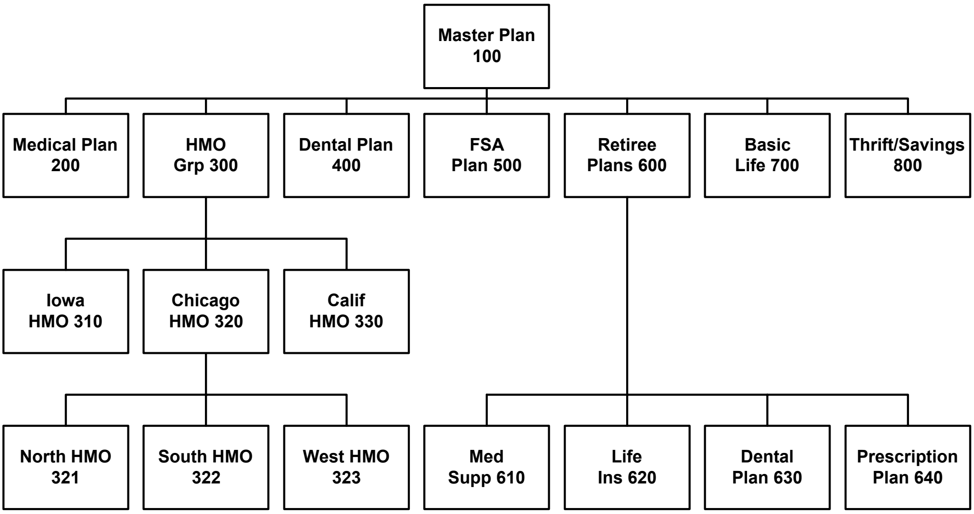
- The core plan/add-on approach allows employees to choose additional benefits or more expensive options to enhance the set of core plans offered by the company.
- The modular approach allows employees a choice of set benefit packages, usually with incremental price tags.
- Full benefit flexibility allows employees to choose among a variety of benefit options to fit their individual needs, resulting in either a deduction from pay or extra cash earnings based on the cost of their choices.

Flex plan design

The true purpose of organizing your plans for flexible benefits is to allow the system to check for individual eligibility in the most efficient way.

Think of the plan design as an eligibility chart. At enrollment, the system checks all the plans in the flex master. If the employee is eligible for the Flex Master Plan, the system then checks the next level of plans. If the employee is eligible for a plan, the system allows you to enroll the employee.

The following chart is only a sample of how various plans might be organized:



Using this example, if an employee was found to be eligible for Flex Master Plan 100, and subsequently the HMO Plan Group 300, the system would check to see if the employee was eligible for a component plan: 310, 320, or 330. If the employee was eligible for HMO 320, then it would further check to see if the employee was eligible for one of the next-level plans: 321, 322, or 323.

Using eligibility search arguments on the Master Plan level can sometimes eliminate search arguments at the component plan level. For example, using a search argument on the Master Plan level can free up search arguments at the component plan level.

Apply the Concept
Which component plans are part of your flex plan?

The Flex Master Plan

Because the Flex Master Plan covers a group of component plans, it will contain the higher rules that govern the entire group and make it one unit. Each component is an individual plan with its own rules. As you analyze your current benefit plans, consider the following:

- Determine which plans you will have in your Flexible Benefits Master Plan. Recall that Benefits Administration allows you to create groups of plans as components of the Flexible Benefits Master Plan.
- Set up a Plan ID and naming scheme that is meaningful to you. Consider how the plan names will appear on printed reports, how listings will appear with plans sorted in order by Plan ID, and what plan names are meaningful to your employees.

The flex plan year

The flex plan year is a one-year period (often a calendar year) covered by a given flex plan.

Joining the plan during open enrollment means an employee has signed up for a year of benefits at the level agreed to on the enrollment form and at the cost to the employee that was specified at the time of enrollment.

Flex plan prerequisites

Recognize that you will need to do some planning before implementing a Flexible Benefits Program at your organization.

Most of the work has already been done if you have established your welfare and deferred benefits plans. Assuming that this step has been completed, the following steps will provide a structured approach to setting up flex plans:

- Print your current benefits tables and analyze your current benefits structure.
- Review summary plan descriptions and determine the plan rules for the Flex Master Plan and for each component plan. Consider how these rules will be set up on the various benefits tables.
- Review the benefit plans you have already defined on Benefits Administration tables. Consider the following:
  - Could any plans be defined more effectively using the enrollment variable amount for the contribution?
  - Do any plans need to be redefined to be components of the Flex Master Plan? As plans outside the Flexible Benefits Program?
- Review any new plans and determine how they will be defined using the benefits tables.
- Determine which plans are default plans or core plans and, within each plan, which option is the default option.
- Plan to establish a flex benefits test file with a small number of employees. This file will be essential for testing the program options you choose, the reports you will run, and the custom changes you may need to make when administering the Flexible Benefits Program.

Apply the Concept
Which component plans are default plans or core plans and, within each plan, which option is the default option?

Component plans used in a flex plan

Even though the benefits tables may be familiar to you, there are some specific considerations and table entries that may require your attention when setting up flex component plans.

Special considerations for defining benefit plans when used in a Flexible Benefits Program

Component plans can either be plans that you have already established in Benefits Administration, or new plans. If you choose to use the same plan both within and outside of Flexible Benefits, be aware of some processing considerations:

- The Recalculate Benefit Coverage/Contribution report (85-RPT) will not recalculate the plan if Flex is not being recalculated.
- If you choose to use the Flex Shut-off process, the plan's HED will shut off at year-end for all employees in the plan.
- The Flex Component Plan Future-Dated Shut-offs report (81-RPT) will shut off all plans under the flex master in which employees are participating.
- The Option/Resulting Plan Status Rules form (TTOSCR) for a flex component plan requires that the Shutoff/Deenroll option contain not only a line 1 with the entry 1-1-5, but also a line 2 entry of 7-7-5. If the 7-7-5 entry is not present, the Flex Benefits Enrollment/Changes form (55FSCR) will reject.
- Other business specific processes may be affected.

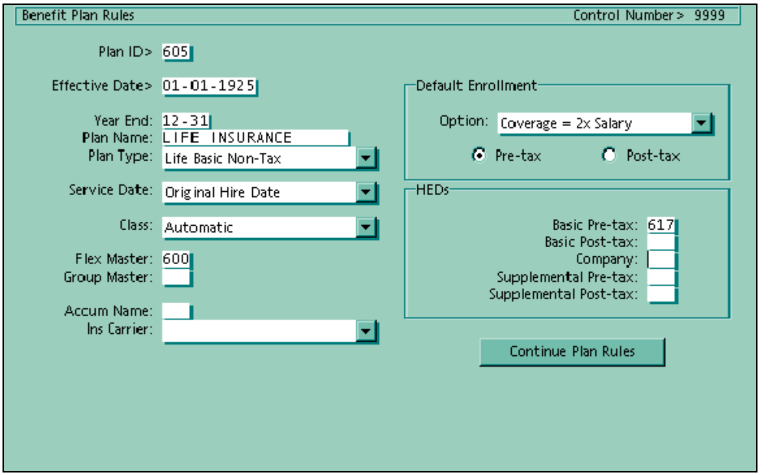
For these reasons, if you have a welfare plan that is a Flex component plan and is also available to employees outside of the Flexible Benefits Program, you may want to consider setting it up as two plans with separate Plan IDs and tables.

Plan rules for flex component plans

The following Benefit Plan Rules form (TK-SCR) entries are important to flexible benefits:

- **Class**—Identify core benefit plans with a plan class of Automatic.
- **Flex Master**—Indicates that the plan is tied to a flex master, for example, 'FLX'.
- **Group Master**—Indicates that the plan is tied to a group plan, for example, 'GRP'.
- **Default Enrollment Option**—If the plan is a core benefit plan, specify the default enrollment option and tax indicator.
- **HEDs**—Each component plan will most likely have its own unique HED numbers. You can use the same HEDs only when the plans are mutually exclusive at the eligibility level. Supplemental pretax and posttax HEDs are not used in flex benefits.
- **Reasons for plan changes**—Use the check boxes to select the appropriate reasons for allowing employees to change their plan options or coverage.

For example, Acme Manufacturing has the following basic rules for plan 605, a flex component plan:



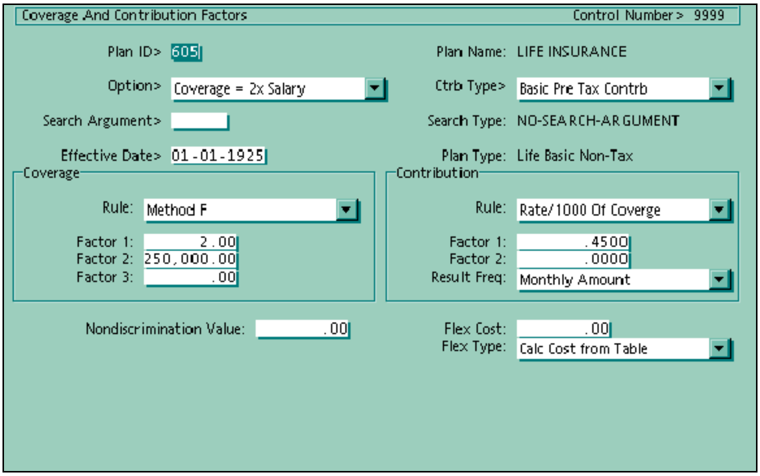
Coverage and contribution rules for flex component plans

The following Coverage And Contribution Factors form (TM-SCR) entries are unique to flexible benefits:

- **Flex Type**—Required for flex plans, this list box defines the method used for cost and credit calculation. The options are:
  - **Calc Cost from Table**—The employee's contribution is calculated using the Contribution Rule list box on this form. The Flex Cost text box is not used with this option; if the calculated contribution is different from the credits associated with the option, the Flex Cost text box may be used to store the credit amount.
  - **Use Credits As Cost**—Requires an entry in the Flex Cost text box on this form. This amount is used as the employee's contribution and also may be used to store the credit amount associated with the Plan Option.
  - **Use Enroll Variable**—The Variable text box on the flex enrollment is used as the contribution amount.

- **Flex Cost**—Defines the set cost for the Use Credits As Cost option in the Flex Type list box.

For example, Acme Manufacturing has the following coverage and contribution rules for plan 605, a flex component plan:



See also:

- Modifying plan rules for flex component plans ***(on page 206)***

For detailed directions on setting up flex component plan rules.

Deferred plan rules for additional contributions

You may include one or more deferred plans as components of your Flex Master Plan. If a deferred plan that is a flex component plan allows employees to make additional contributions, you may need to make some modifications to contribution and HED rules for that plan.

Note: *So that an employee may have no monetary amount assigned during the Flex enrollment but may still be contributing to the plan outside of Flex, an option other than Enrolled or Waived for the deferred plan must be added to the Option Elected option list (BA03). A recommended option is 'Partcpnt/No Flx Ctrb', option '45'.*

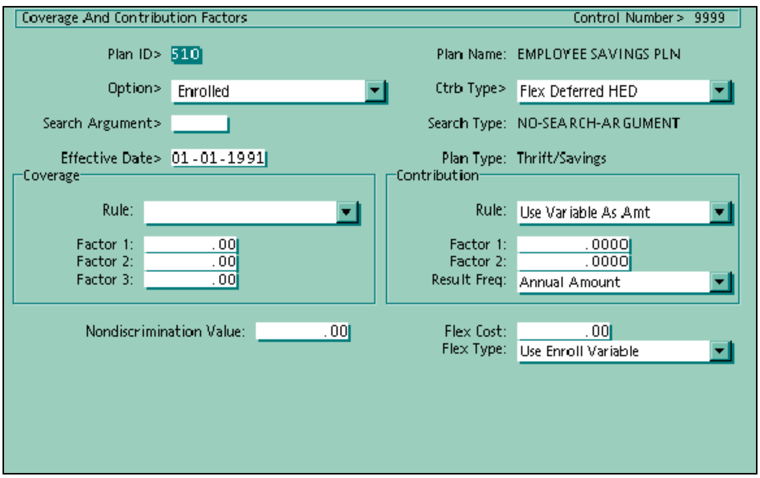
Contribution rules for additional contributions to a deferred plan that is a flex component plan

If the Flexible Benefits Program enables employees to allocate flex credits/currency as an additional contribution to their deferred plan(s), Payroll must set up an additional HED to be used for these extra credits/currency.

You will need to create an additional Coverage And Contribution Factors form (TM-SCR) for the deferred plan with these flex entries:

- **Ctrb Type**—For the Flexible Benefits enrollment option, select 'Flex Deferred HED' in the Ctrb Type list box.
- **Contribution Rule**—Select 'Use Variable As Amt' to indicate that the variable amount will be entered on the employee's enrollment form. This way the employee will be able to allocate any number of credits desired.
- **Flex Type**—This list box selection must be 'Use Enroll Variable' in order to access the Variable text box on the enrollment form.

For example, Acme Manufacturing has the following coverage and contribution rules for additional contributions to deferred plan 510, a flex component plan:



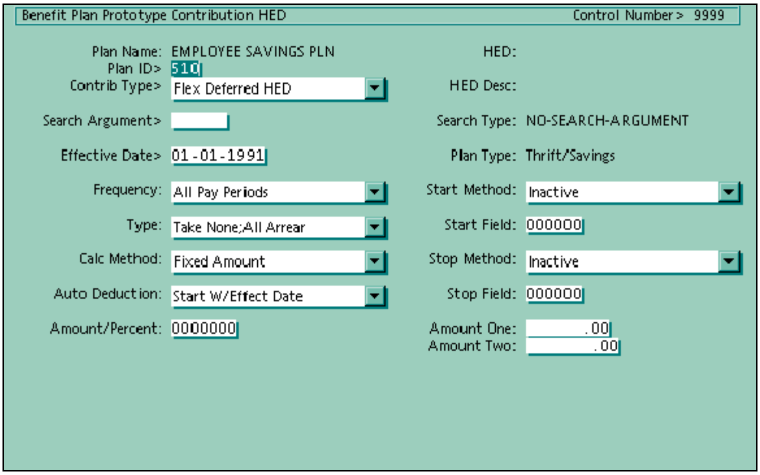
HED rules for additional contributions to a deferred plan that is a flex component plan

If your flex plan allows flexible credits/monetary amounts to be allocated as an additional contribution to the deferred plan, you will need to set up a new Benefit Plan Prototype Contribution HED form (TS-SCR) for the Flex Deferred HED contribution type. Use the standard setup based on your plan requirements.

A Deferred Plan HED for Flex is not the HED already set up for the employee or company match contributions. Define a new HED for a fixed amount contribution.

The HED you select will be used to record a payroll deduction amount to be added to the employee's deferred plan. It is a fixed amount determined by the rules defined on the Coverage And Contribution Factors form (TM-SCR).

For example, Acme Manufacturing has the following prototype HED rules for additional contributions to deferred plan 510, a flex component plan:



Benefit Plan Prototype Contribution HED — Control Number> 9999

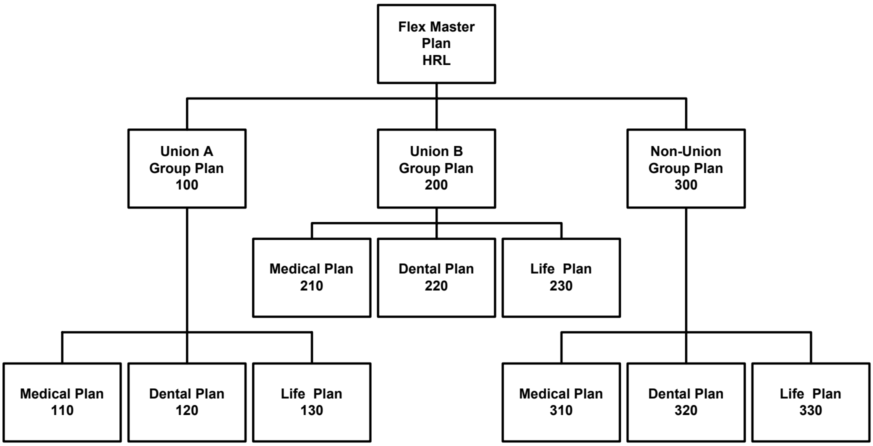
Plan Name: EMPLOYEE SAVINGS PLN
Plan ID> 510
Contrib Type> Flex Deferred HED
Search Argument>
Effective Date> 01-01-1991
Frequency: All Pay Periods
Type: Take None;All Arrear
Calc Method: Fixed Amount
Auto Deduction: Start W/Effect Date
Amount/Percent: 0000000
HED:
HED Desc:
Search Type: NO-SEARCH-ARGUMENT
Plan Type: Thrift/Savings
Start Method: Inactive
Start Field: 000000
Stop Method: Inactive
Stop Field: 000000
Amount One: .00
Amount Two: .00

Apply the Concept
Does your Flexible Benefits Program enable employees to allocate flex credits/currency as an additional contribution to their deferred plan? What must you do differently to address this additional contribution?

Identifying group plans for flex

Before identifying the component plans in the Flex Master Plan, you may want to consider setting up plan groups that allow the flexibility of forming employee eligibility. If you establish a group plan rule and employees are not eligible for the group itself, they are not eligible for any plans within the group.

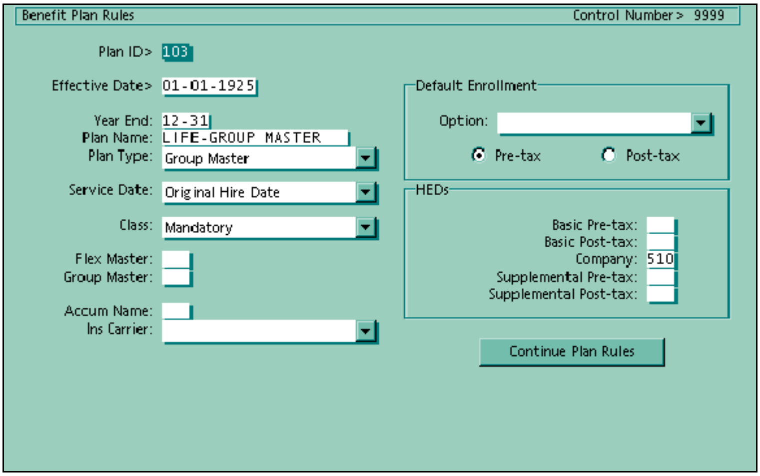
For example, an organization may set up a flex master for its hourly employees. Under that flex master, the organization establishes a different group plan for each union. The Union Code field is used as the search argument for the group. The organization then establishes another group plan for nonunion employees.



You may also want to set up different group plans for salaried employees. Depending on your organization's policies, one group of salaried employees may have different waiting periods for coverage or different contribution criteria.

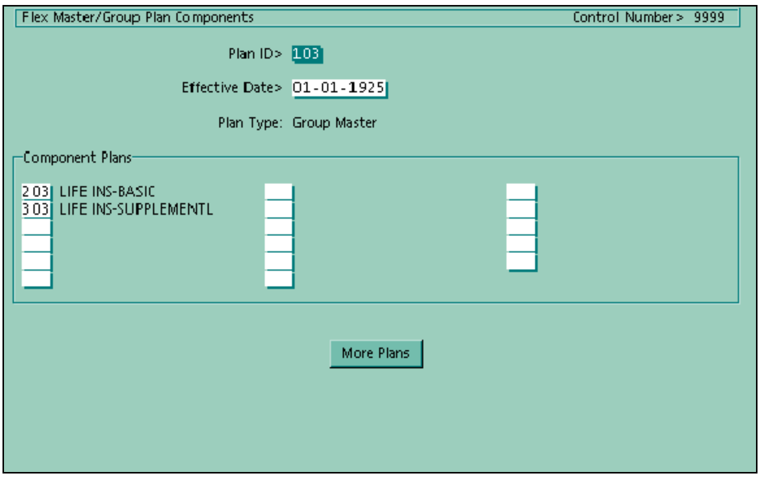
The basic rules for a group plan are set up on the Benefit Plan Rules form (TK-SCR), where you indicate that the plan is a group plan. The eligibility criteria for a group plan need to be set up on the Benefit Plan Eligibility Rules form (TL-SCR). Use the standard setup for each of these tables.

For example, Acme Manufacturing has the following group plan set up on the Benefit Plan Rules form (TK-SCR):



You then need to complete one Flex Master/Group Plan Components form (TP-SCR) for each group plan. This table allows you to record the Plan ID of each plan that is to be included in the group plan.

Acme Manufacturing recorded the following component plans for its group plan using the Flex Master/Group Plan Components form (TP-SCR):



See also:

- Specifying group plan basic identification and rules ***(on page 211)***

For detailed directions on setting up group plan rules.

- Identifying group component plans ***(on page 213)***

For detailed directions on setting up group component plan rules.

Tables for defining a Flex Master Plan

The tables used for welfare and deferred plans are also required to define the basic plan rules for flex plans. The following tables are used to define a Flex Master Plan:

- Benefit Plan Rules (TK-SCR)
- Benefit Plan Eligibility Rules (TL-SCR)
- Benefit Plan Prototype Contribution HED (TS-SCR)
- Activity/Resulting Plan Status Rules (TTASCR)
- Option/Resulting Plan Status Rules (TTOSCR)

This section covers any special considerations for completing these tables as they are used to define flex plans, but it does not cover the basics of those tables already discussed.

☞ *Refer to* **Setting Up Welfare Plans** *(on page 53) and* **Setting Up Deferred Plans** *(on page 111) for information on completing welfare and deferred tables.*

The following three tables are used solely to complete the definition and grouping of flex plans and the calculation of plan credits:

- Flex Plan Credits Calculation (FCCSCR)
- Flex Benefits Master Plan Rules (TKFSCR)
- Flex Master/Group Plan Components (TP-SCR)

Table (form)	Purpose	W	D	F	G
Benefit Plan Rules (TK-SCR)	Establishes the basic plan rules, including plan name, type, and year-end.	X	X	X	X
Benefit Plan Eligibility Rules (TL-SCR)	Eligibility rules specify requirements for plan admittance and are automatically applied to each employee during the enrollment process.	X	X	X	X
Benefit Plan Prototype Contribution HED (TS-SCR)	You will set up one contribution table for each type of contribution required by a plan.	X	X	X	
Activity/ Resulting Plan Status Rules (TTASCR)	This table defines the possible effect of activities on an employee's plan status.	X	X	X	
Option/ Resulting Plan Status Rules (TTOSCR)	This table defines the valid options for the plan and how they affect employee plan status.	X	X	X	

Table (form)	Purpose	W	D	F	G
Flex Plan Credits Calculation (FCCSCR)	This table stores calculation options to define the flex credits formula. These calculation options provide intermediate results that are added together to produce the flex total credits for an employee.			X	
Flex Benefits Master Plan Rules (TKFSCR)	This table records flex benefits rules at the Master Plan level and helps to customize flexible plan administration based on rules specific to the flex plan.			X	
Flex Master/ Group Plan Components (TP-SCR)	This table identifies the component plans associated with Flex Master Plans and/or group plans; it must be established for each Flexible Benefit Master Plan or Group Master Plan.			X	X

Legend: W = Welfare, **D** = deferred, **F** = Flex Master, **G** = Group Master.

☞ *Refer to* **Setting Up Welfare Plans** *(on page 53) for more information about setting up employee welfare plans.*

☞ *Refer to* **Setting Up Deferred Plans** *(on page 111) for more information about setting up deferred benefits plans.*

As already discussed, the initial tables for welfare and deferred plans must be established using table dates that are prior to the time that the first employee was hired to work for your company.

These rules change slightly when applied to setting up the Flex Master Plan. Instead of using an older table date, the following Flex Master Plan tables require an initial table record with the current flex plan year date:

- Flex Plan Credits Calculation form (FCCSCR)
- Flex Benefits Master Plan Rules form (TKFSCR)
- Flex Master/Group Plan Components form (TP-SCR)

Then each year you must add a new table record with the new flex plan year date for the following Flex Master Plan forms:

- Benefit Plan Rules form (TK-SCR)
- Flex Plan Credits Calculation form (FCCSCR)
- Flex Benefits Master Plan Rules form (TKFSCR)
- Flex Master/Group Plan Components form (TP-SCR)

Note: *If you are using eCyborg Interactive Benefits, the same annual maintenance is required to these table records in both Benfits Administration and the administrative functions in eCyborg Interactive Workforce.*

Flex Master Plan setup

The Flex Master Plan, like all other benefit plans, will use its tables to record high-level rules.

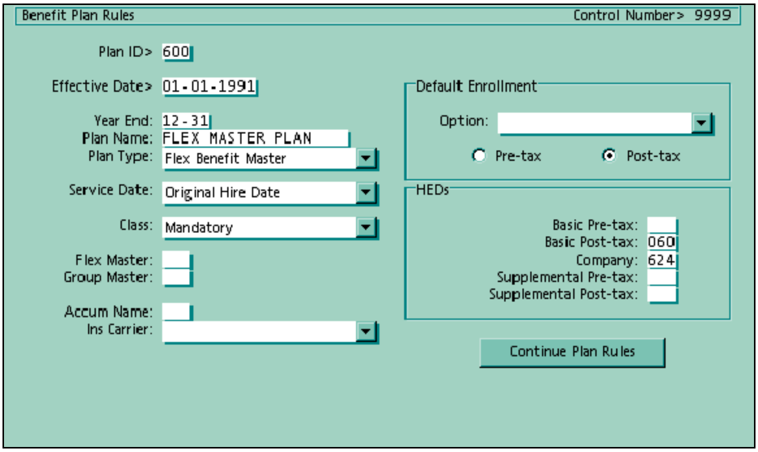
Plan identification

You will use the Benefit Plan Rules form (TK-SCR) to record the basic information about the Flex Master Plan. The only changes to the standard entries are as follows:

- **Effective Date**—This table must be dated the first day of the flex plan year as defined by the year-end month and day. If your plan year-end is December 31, the date on this Flex Master Plan table will be January 1 (US and Canada) or 1 January (elsewhere) of the flex plan year. Each year you must enter an additional Benefit Plan Rules form (TK-SCR) for the Flex Master Plan to reflect the new year.
- **Plan Type**—Use 'Flex Benefit Master' to indicate that this is a Flex Master Plan.
- The Default Enrollment area on the form's first panel is left blank.
- HED numbers are populated based on the type of plan. If you are using the 'Deduct Credits By Plan' method, the earnings HED number must be entered in the Basic Pre-Tax text box. If you are using the 'Net Credits Method', the earnings HED must be entered in the Basic Post Tax text box and the deduction HED in the Company text box. If the Flex Master does not allocate credits, no HED entry is required here.
- Search arguments on the form's second panel are optional.
- Mid-Year Change Reasons on the second panel specify the mid-year changes for which the flex component plan is eligible.

When you are reviewing your component plans for inclusion in a flex plan, think about how you might use search arguments at the flex master level to help eliminate or combine some of the individual plan searches. For example, you may have a search argument for location at the flex master level, rather than including it in each of the individual plans.

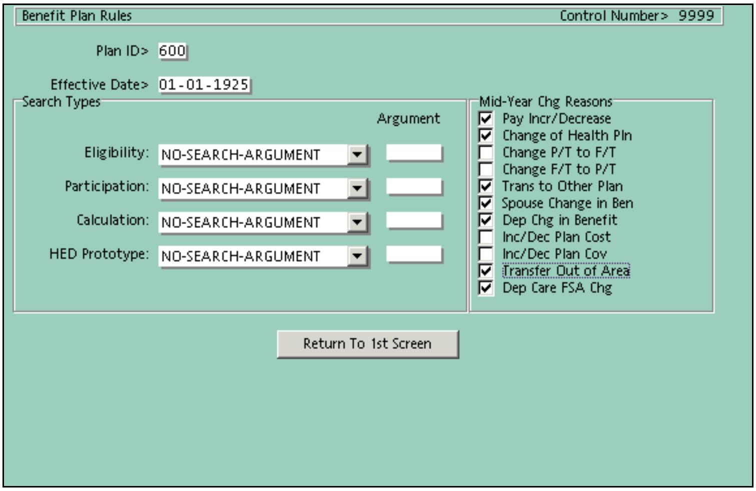
In the following Benefit Plan Rules form (TK-SCR), Acme Manufacturing has set up the basic rules for its Flex Master Plan 600 using the Net Credits Method:



Employees enrolled in flex plans are able to change their plan choices mid-year if their employment circumstances or those of their spouse change. They may also change their enrollments if a plan substantially changes its cost/coverage. The check boxes on the right side of the second panel of the Benefit Plan Rules form (TK-SCR) allow you to set up mid-year election change rules for each component plan. Select the Flex Change rules that will remain constant for that plan for the remainder of the year. These rules can affect any plan participant at any time, but not all participants at once. For example, change reasons such as Pay Incr/Decrease, Change P/T to F/T, Change F/T to P/T, Trans to Other Plan, Spouse Change in Ben, Dep Chg in Benefit, Dep Care FSA Chg, and Transfer Out of Area remain applicable throughout the year.

Note: *Dep Care FSA Chg is applicable only to plans that have a plan type of FSA Dependent Care.*

In the following second panel of the Benefit Plan Rules form (TK-SCR) for plan 600, Acme Manufacturing has set up several mid-year change reasons:

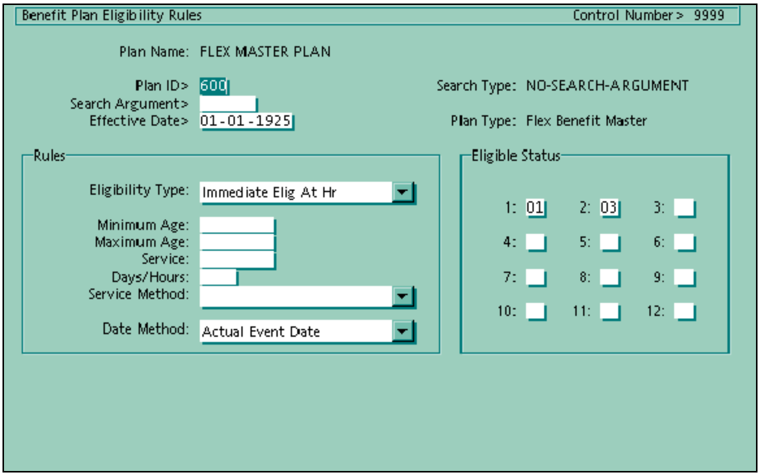


Eligibility rules

There are no specific eligibility requirements for the Flex Master Plan. However, the following items on the Benefit Plan Eligibility Rules table (TL-SCR) should be carefully considered:

- **Eligibility Type**—There may or may not be a delay time or age requirement for enrolling in a Flexible Benefits Program. Select the appropriate type option according to your plan's rules.
- **Date Method**—There may or may not be a rounding on the eligibility date to get into the plan. Select the appropriate eligible date method option according to your plan's rules.
- **Eligible Status 1–12**—Enter all eligible status options that apply. Those who are not eligible for flexible benefits (for example, part-time employees) should not be included here.

Acme Manufacturing has set up the following eligibility rules for its Flex Master Plan 600:



Coverage and contribution rules

Coverage And Contribution Factors tables (TM-SCR) are not used for the Flex Master Plan. HED information related to the Flex Master Plan is entered only on the Flex Benefits Master Plan Rules form (TKFSCR).

HED rules

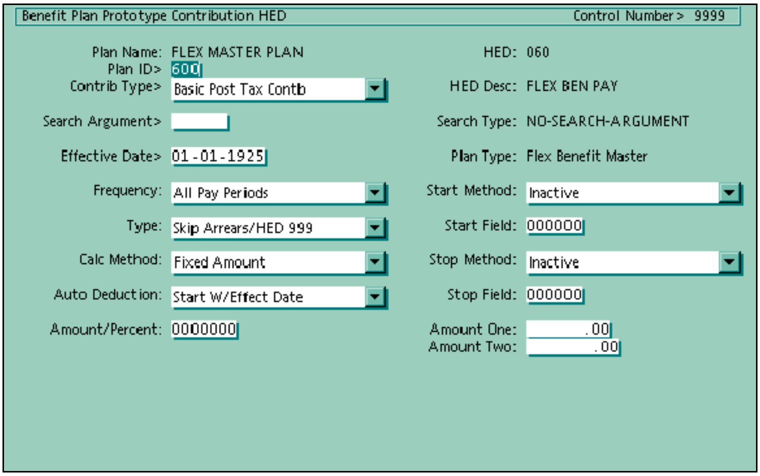
HED rules must be present on the Benefit Plan Prototype Contribution HED form (TS-SCR) if earnings and/or deductions are defined on the Flex Benefits Master Plan Rules form (TKFSCR). These HED rules tables will dictate the frequency of earnings/deductions, taxability, and arrears recovery.

The method you select on the Flex Benefits Master Plan Rules form (TKFSCR) will determine the selection you make in the Benefit Plan Prototype Contribution HED form (TS-SCR) Contrib Type list box:

- **Ded Credits By Plan method**
  The earnings HED must be established as Basic Pre-Tax Contrib and the Type must be 'Skip Arrears/HED 999', which sends the total credits to Payroll as an earnings.
- **Use Net Credits Meth method**:

  - The earnings HED must be established as Basic Post Tax Contrib and the Type must be 'Skip Arrears/HED 999', which sends the net credits to Payroll as an earnings if the employee used fewer credits than allocated to purchase benefits.
  - The deduction HED must be established as Company, which sends the net credits to Payroll as a deduction if the employee used more credits than allocated to purchase benefits.

Acme Manufacturing is using the Net Credits Method and has the following HED rules for the Basic Post Tax Contribution for its Flex Master Plan 600. This illustration represents the earnings HED setup:



Benefit Plan Prototype Contribution HED   Control Number> 9999

Plan Name: FLEX MASTER PLAN
Plan ID> 600
Contrib Type> Basic Post Tax Contb
Search Argument>
Effective Date> 01-01-1925

Stop Method: Inactive
Stop Field: 000000
Amount One: .00
Amount Two: .00
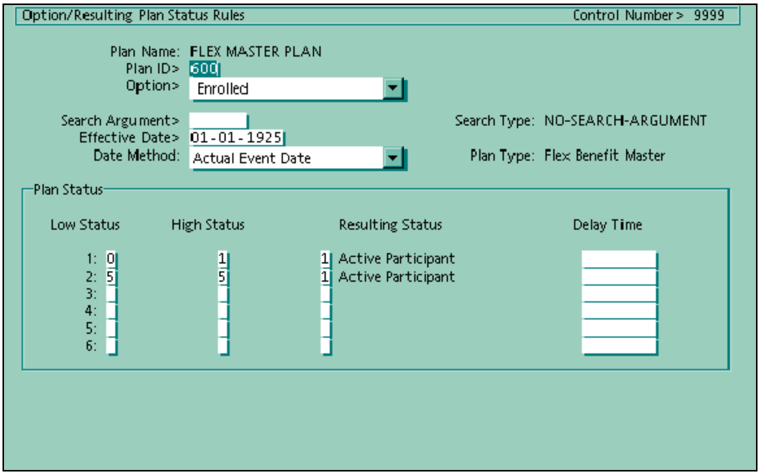
User Code:

Options rules

The Option/Resulting Plan Status Rules form (TTOSCR) defines the options for a Flex Master Plan. There are some issues to be aware of when setting up these tables:

- You must use the Enrolled option. Employees are first enrolled in flexible benefits through the Flex Master Plan before being enrolled in component plans. Therefore, an enrollment option must be present on this table for the flex master.
- If, in addition to enrolling in the plan, employees also have the option to waive flexible benefits, the Waived option would be present on this table for the flex master.
- If you want to use the Flex 'Termination/De-enrol' option, the 'Shutoff/Deenroll' option must be present on this table for the flex master.

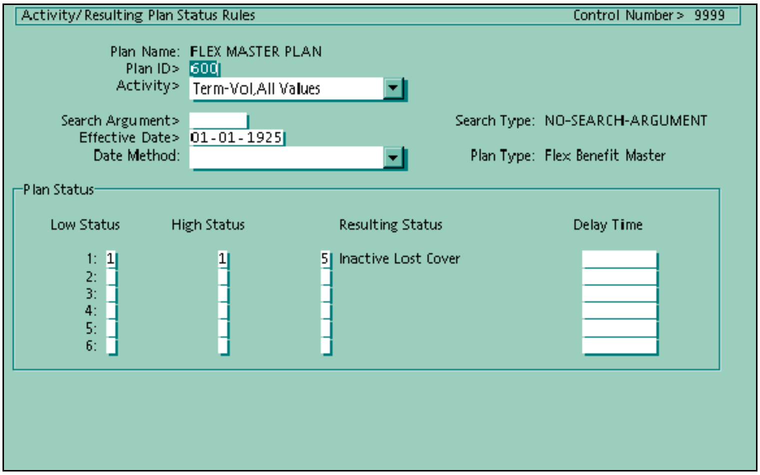
Acme Manufacturing has the following rules for the Enrolled option for its Flex Master Plan 600:



Separation rules

There are no special requirements for the Activity/Resulting Plan Status Rules tables (TTASCR). However, you may want to establish these tables for every major separation activity, for example, a voluntary termination that will affect the Flex Master Plan. This ensures that the employee's Master Plan status will be adjusted correctly when a separation activity is processed.

Acme Manufacturing has the following separation rules for its Flex Master Plan 600:



See also:

■ Specifying flex plan basic identification and rules ***(on page 217)***
For detailed directions on setting up flex component plan rules.

■ Recording flex benefits rules at the Master Plan level ***(on page 225)***
For detailed directions on setting up flex component plan rules.

Flex credits/monetary amounts

If you are going to have the system automatically calculate the flex credits for your employees, you will need to define your flex credits formula on the Flex Plan Credits Calculation form (FCCSCR).

The formula that you use can be made up of one or more credit calculation factors. The Credit Calculation Factors calculation option list (BA69) is provided with four prototype options for this purpose. These values are only prototypes and you are expected to customize them to your corporation's requirements:

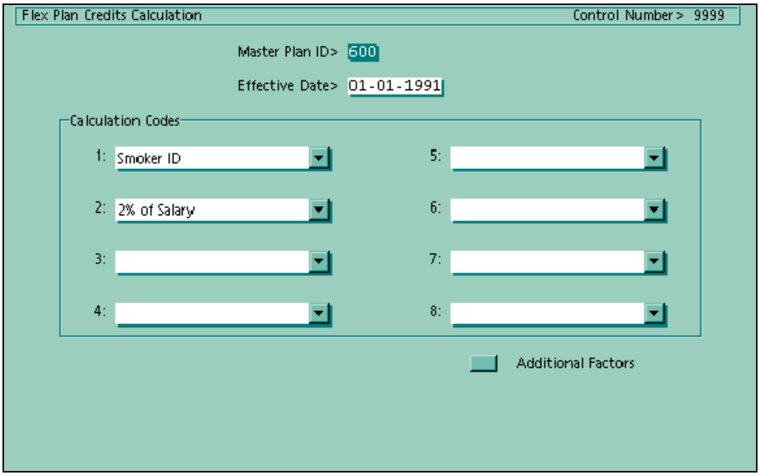
- 2% of Salary
- EE Med Plan Credits
- Smoker ID
- Waived Dental Plan

You can use any of the prototype options in combination with the following criteria to produce the formula to calculate each employee's total flex credits:

- Any field(s) from the employee record
- Any entered fixed amount(s)
- Data residing on or calculated by a table
- Credit allotments based on the employee's elected option for a defined plan
- Calculated cost of a plan option
- Any other Cyborg Scripting Language program calculation option

When the options are written and added to the Credit Calculation Factors calculation option list (BA69), use the Flex Plan Credits Calculation form (FCCSCR) to list all the options in the order in which they should be calculated. There are two panels to this form, allowing up to 16 options per formula. You may define one formula per Master Plan/Date.

Acme Manufacturing is using the following entries to define its calculation formula for Flex Master Plan 600:



Methods of allocating flex credits/monetary amounts

After you have recorded the credits formula that will be used to calculate the credits that an employee will receive under a Flexible Benefits Program, you need to decide how you want to allocate those credits. There are many different ways to handle the allocation of flex credits. Two fairly common methods are as follows:

- Each employee's annual credit amount is determined up front. The credits appear as earnings and plan costs appear as deductions on the paycheck.
- Each employee's annual credit amount is determined up front and his or her net cost of benefits is calculated. If the cost of benefits is greater than the credits, a deduction is taken and appears on the paycheck. If the cost of benefits is less than the credits, an earning is applied to the employee's paycheck. Memo HEDs are used to record the individual plan deduction amounts.

The method you use affects how you set up your payroll HED definitions as well as your benefits tables.

Individual plan deductions method

This method allows you to specify, at the HED level, which plan deductions are to be pretax and which are to be posttax. Payroll will set up the Company Deductions forms (A8-SCR) for each deduction and assign the appropriate Category Code for taxation. In addition, for each tax specification record you set up, Payroll must indicate the taxability that applies to your tax-deferred and cafeteria plans—for example, excludable or taxable.

In the paycheck example that follows, a semimonthly paid employee has been given 2,000 flex credits that are spread out over 24 pay periods. Therefore, 83.33 is added into the total pay each pay period. At the end of the year, the employee has earned Regular Pay of 30,000 and, with the 2,000 credits, Total Pay of 32,000. The employee only spent 1,900 of the allocated flex credits on benefits, leaving 100 unused or excess credits. Subtracting the 1,900 benefits deductions from the Total Pay of 32,000 leaves a Net Pay of 30,100. This includes the extra 100 unused credits. This 100 is taxed as earnings.

```
         INDIVIDUAL PLAN DEDUCTIONS METHOD - USED LESS CREDITS THAN GIVEN

```

Net credits method

Another method, the net credits method, does not allocate flex credits/monetary amounts to employees as additional earnings. Instead, the credits/amounts are allocated and tracked separately through a bookkeeping procedure.

Benefits plans deductions are established at the HED level as memo deductions by Payroll and therefore do not show up on the employee's paycheck. This method does not allow control of taxability at the individual plan level—for example, pretax or posttax—since the benefit plan deductions are memo deductions. A net amount, combining the costs of all benefits plans, appears on the paycheck and reflects the credit allocation either as a net pretax deduction or net taxable earning.

In the example that follows, the same employee receives 30,000 in Regular Pay. The employee has been allocated 2,000 credits, which are tracked separately and are not reflected as earnings on the employee's paycheck. The employee spent 1,900 on benefits, 100 less than was allocated. Since the benefit deductions are set up as memos, they will not show on the payment either. In order to reimburse the employee for the unused credits, the extra 100 is issued as cash by using an earnings HED. Total Pay is 30,100. Net Pay is 30,100.

```
                 NET CREDIT METHOD - USED LESS CREDITS THAN ALLOCATED
Theodore Walsh
4318 W Kamerling                 Pay Amount   1,254.16
Chicago, Il     60651
EARNINGS       CUR HRS   CUR AMT   YTD AMT    TAXES/DEDUCTIONS    CUR AMT     YTD AMT
REGULAR PAY      86.67  1,250.00 30,000.00    TAX 1                 XX.XX      XXX.XX
NET FLEX CASH      .00      4.16    100.00    TAX 2                 XX.XX      XXX.XX
TOTAL PAY        86.67  1,254.16 30,100.00    TAX 3                 XX.XX      XXX.XX
                                              NET PAY            1,254.16   30,100.00
```

In the next example, the same employee receives 30,000 in Regular Pay. The employee has been allocated 2,000 credits. The employee spends all 2,000 credits plus an additional 200. In order to deduct the additional 200 from the employee's check, a net cost deduction HED is established. The employee's Total Pay is 30,000. Net Pay is 29,800.

```
                 NET CREDIT METHOD - USED MORE CREDITS THAN ALLOCATED
THEODORE WALSH
4318 W KAMERLING                 PAY AMOUNT   1,241.67

EARNINGS       CUR HRS   CUR AMT   YTD AMT    TAXES/DEDUCTIONS    CUR AMT     YTD AMT
REGULAR PAY      86.67  1,250.00 30,000.00    TAX 1                 XX.XX      XXX.XX
TOTAL PAY        86.67  1,250.00 30,000.00    TAX 2                 XX.XX      XXX.XX
                                              TAX 3                 XX.XX      XXX.XX
                                              NET FLEX COST          8.33      200.00
                                              NET PAY            1,241.67   29,800.00
```

If you use the net credit method, you may need to establish two HEDs:

- One to accommodate unused credits (an earnings HED)
- One to accommodate more credits spent than allocated (a deduction HED)

If your plan does not return unused credits as cash to the employee, there is no need to set up an earnings HED. Likewise, if your plan does not allow employees to spend more than allocated, you will not need a deduction HED.

☞ *Refer to* **Processing Annual Open Enrollments for Flex Plans** *(on page 351) for more information about storing the employee total credits to cash or deduction.*

See also:

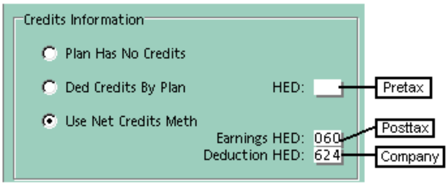
- Setting up a flex credits formula ***(on page 215)***

For detailed directions on setting up flex credit formulas.

Default processing rules

The highest level of processing for a Flex Master Plan occurs in the Flex Benefits Master Plan Rules form (TKFSCR). The indicators on this table are used for processing flexible benefit enrollments and changes, the calculation and accounting of flex credits, and employee communication reports. The Benefit Plan Rules form (TK-SCR) must be entered for the Flex Benefit Master Plan before this table can be entered.

The credits information on this table defines whether the plan has credits and, if it does, whether Payroll will take deductions by plan or use the net credits method of bookkeeping for the credits. Depending on the method chosen, you will specify the HED(s) to be used. For the Deduct Credits By Plan method, you may enter a total credits HED. For the Use Net Credits method, you need to define net earnings and net deduction HEDs.



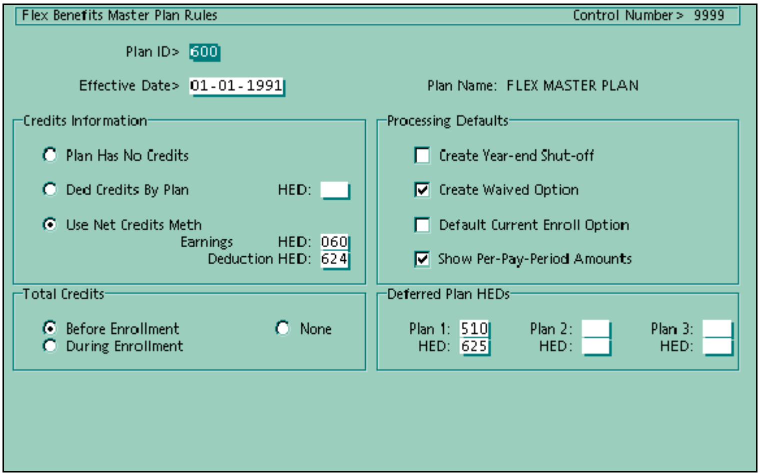
You can specify whether the employee's total credits will be determined before enrollment or after the employee's plan option choices are determined during enrollment.

Since this is a decision table, you have the option of activating the following processing defaults:

- **Create Year-end Shut-off**—Turns off the flex master and all component plans if you have set up the 'Shutoff/Deenroll' option on the Option/Resulting Plan Status Rules form (TTOSCR).
- **Create Waived Option**—If an employee waives a plan, an enrollment record is written with the option set to Waived.
- **Default Current Enroll Option**—The enrollment choices default to the employee's current plan options when the enrollment process is started.
- **Show Per-Pay-Period Amounts**—The flexible benefit enrollment form and reports display costs as per-pay-period amounts. Otherwise, costs are displayed as annual amounts.

In addition, you can use this table to define the deferred plans included in the Flex Master Plan along with their respective HEDs. A deferred plan HED for Flex is not the HED already set up for employee or company match contributions. You must define a new HED for a fixed amount contribution.

As an example of this decision table, Acme Manufacturing has the following Master Plan rules for its Flex Master Plan 600:



Flex Benefits Master Plan Rules
Control Number > 9999
Plan ID> 600
Effective Date> 01-01-1991

HED:

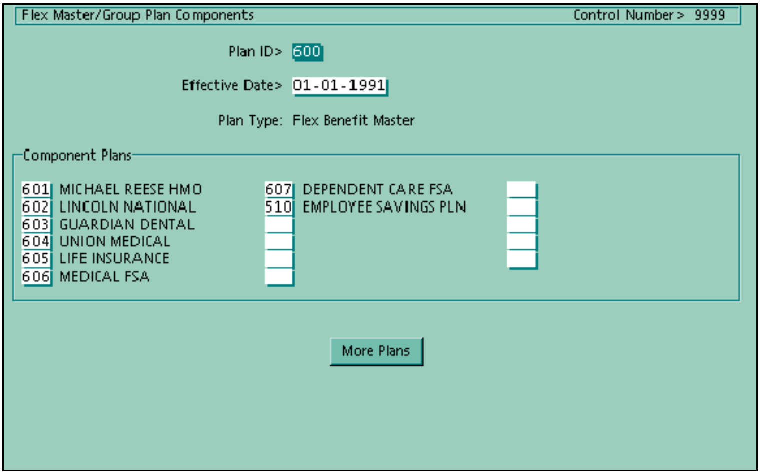
Identifying flex component plans

Once the component plans and group plans have been established and properly defined for use with a flex plan, they can be grouped under the Flex Master Plan using the Flex Master/Group Plan Components form (TP-SCR). No Flexible Benefit enrollment forms or preenrollment communications to employees can be processed without entering this table for the Flex Master Plan.

The Flex Master Plan can be defined to include group plans as components of the Master Plan or as components of another group plan, as long as they have matching dates. All group Plan IDs that are nested under a Master Plan must have the same year-end date as the Master Plan, and must have a Benefit Plan Rules form (TK-SCR) with the same effective date as the Master Plan.

For example, Acme Manufacturing has the following Flex Master Plan components for its Flex Master Plan 600:



See also:

- Identifying Flex Master component plans ***(on page 228)***

For detailed directions on setting up flex component plan rules.

Viewing flex master groups

If you need a hardcopy verification of the entries that were made on the Flex Master/Group Plan Components form (TP-SCR), process the Master Plan Components Table Records Batch report (9P-RPT). Use the report parameter options to specify an as-of date and Control Number.

eCyborg Interactive Benefits considerations when implementing Benefits Administration

To use eCyborg Interactive Benefits for benefits enrollment, each welfare benefits plan offered by your organization must be a component of your Flex Master. Therefore, if you have defined a benefit plan in Benefits Administration but have not made that plan a component of a Flex Master, you must add the plan to the Flex Master using the Flex Master/Group Plan Components form (TP-SCR). If your organization does not use flexible benefits for welfare plans and so has not created a flex master, your HR department must set up a flex master and add the welfare benefits plans as components of the flex master. Then employees can enroll in benefits online using eCyborg Interactive Benefits.

☞ *Refer to the eCyborg Interactive Workforce: The Administrators' Guide for more information about for specific information about using Benefits Flex Masters.*

☞ *Refer your employees to eCyborg Interactive Workforce: A Guide to Your Benefits Information for information about using eCyborg Interactive Benefits.*

Following is a general overview of the process for setting up a flex master in Benefits Administration for use in eCyborg Interactive Benefits:

- Set up all welfare benefits plans in Benefits Administration using the forms applicable to your organization and the plan.
- Set up a flex master using the Benefit Plan Rules form (TK-SCR). Create an ID for the flex master and be sure to choose Flex Benefits Master as the plan type. You must maintain this form annually for online benefits enrollment.

Note: *Be sure the Supplemental Pre-tax and Supplemental Post-tax text boxes have not been used for flex benefits HEDs in Benefits Administration. These fields do not relate to flex benefits plans, but rather are used for employee contributions to plans such as 401(k).*

- Set up the Benefit Plan Eligibility Rules form (TL-SCR) for the flex master. These rules apply to all component plans but can be overridden at the plan level.
- Set up the Option/Resulting Plan Status Rules form (TTOSCR) for the flex master to determine the benefit options available for plans that are components of the flex master.

Note: *Your organization may automatically cover employees for a benefit such as life insurance. If so, and you do not want employees to have the option of declining the coverage, you must be sure you do not set up the Option/Resulting Plan Status Rules form (TTOSCR) in Benefits Administration with a 'waived' option. The 'I decline to participate in a plan' option in eCyborg Interactive Benefits then will not appear on the Step 1: choose a plan page for that plan.*

- Set up the Activity/Resulting Plan Status Rules form (TTASCR) for the flex master. These rules govern how a change in an employee's status, such as termination, affects their benefits.
- If the plan is a flexible benefits plan, determine how you want deductions or unused credits for welfare benefits to display on an employee's pay using the Flex Benefits

Master Plan Rules form (TKFSCR). You must maintain this form annually for online benefits enrollment.

Note: *Using eCyborg Interactive Benefits, employees can enroll in welfare benefits plans; however, this release of eCyborg Interactive Workforce does not include deferred plans. Employees using eCyborg Interactive Benefits can not allocate excess credits to a deferred plan such as 401(k). Therefore, be sure the text boxes in the Deferred Plans HEDs section of the Flex Benefits Master Plan Rules form (TKFSCR) are blank.*

- If the plan is a flexible benefits plan, set up Benefit Plan Prototype Contribution HED form (TS-SCR) for the flex master. This uses the results of the Flex Plan Credits Calculation (FCCSCR) to determine the change in the employee's pay based on deductions or unused credits.
- If the plan is a flexible benefits plan, set up the Flex Plan Credits Calculation form (FCCSCR) for the flex master. This sets the rules your organization uses to determine an employee's flexible credits. You must maintain this form annually for online benefits enrollment.
- Add all your plans as components of the flex master you created, using the Flex Master/Group Plan Components form (TP-SCR). You must maintain this form annually for online benefits enrollment.

☞ *Refer to the eCyborg Interactive Workforce functional documentation for specific information about the use of flex plans in eCyborg Interactive Benefits.*

Detailed Directions

This section provides detailed directions on completing a business task.

Tasks

Completing the Guided Practice

In the Guided Practice for this section, you will modify component plans, define a group plan (plan 903), and define a flex plan (plan 700). Specific details for entering plan values are described in the steps for the tasks.

You must have completed the Guided Practices in the prior sections to guarantee the successful completion of the Guided Practice that follows.

Modifying plan rules for flex component plans

To modify plan rules for a welfare or deferred plan that is included in a flex plan, use the Benefit Plan Rules form (TK-SCR) and follow these steps:

1. Access the Benefit Plan Rules form (TK-SCR)

Access this form by making the following selection from the Navigator:

Component: Benefit Plan Setup and Maintenance
Process: Flex Plans
Task: Plan Name And Basic Rules

If the form is not already displaying the plan you wish to modify, click the Selections button on the toolbar. Then select the plan you want to display.

For practice, access the Benefit Plan Rules form (TK-SCR) for Organization 999999 for plan 601 dated 01-01-1925.

2. Review the Class

If a benefits plan is included in a flex plan, you can assign a plan class of Automatic. Employees who do not return their enrollment election forms on time will then be enrolled in this plan.

For practice, leave the current value in this list box.

3. Enter the Flex Master

Type a value to indicate that this plan is to be included in a flex master—for example, 'FLX'. It is not necessary to type the actual Plan ID of the flex master since you may want to include this plan in more than one flex master.

Note: *Once designated as part of a Flex Master Plan, component plans are not automatically processed by the Recalculate Benefits Coverage/Contributions report (85-RPT).*

For practice, replace the current value with 'FLX'.

4. Enter the Group Master (optional)

Type a value to indicate that this plan is to be included in a group plan—for example, 'GRP'. It is not necessary to type the actual Plan ID of the group plan since you may want to include this plan in more than one group plan.

For practice, leave this text box blank.

5. Select a Default Enrollment Option (optional)

If you selected 'Automatic' in the Class list box, select a value from the list box to show what the enrollment option will be if an employee does not return the enrollment election form. Options for this list are provided by the Option Elected option list (BA03).

For practice, make no selection in this list box.

6. Indicate a Default Enrollment tax contribution type

If you selected an entry in the Default Enrollment Option list box, indicate the taxability of the contribution.

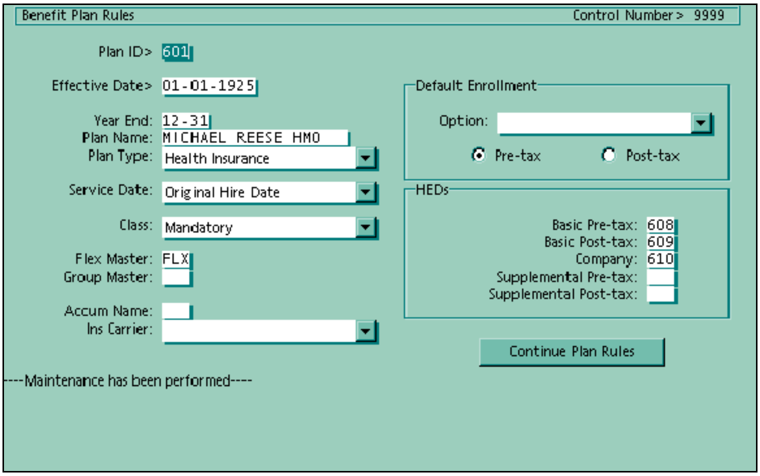
For practice, do not modify these option buttons.

7. Review the HEDs displayed on the form

Each flex component plan must have its own unique HED numbers. Plans cannot share the same HEDs. The Supplemental Pretax and Supplemental Posttax HEDs are not used in flex benefits.

For practice, make no changes to the current HED numbers.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



8. Click Continue Plan Rules (optional)

Complete this and the following steps only if you need to define search types for a plan.

For practice, click the Continue Plan Rules button.

9. Respond to the Save Changes? message

You will see this message only if you have not clicked Save or pressed Enter after entering plan information on the first panel. Indicate whether you want the changes saved (Yes), discarded (No), or you want to remain on the first panel (Cancel).

The table record is created (if it has not been created already) and the second panel of the Benefit Plan Rules form (TK-SCR) is displayed.

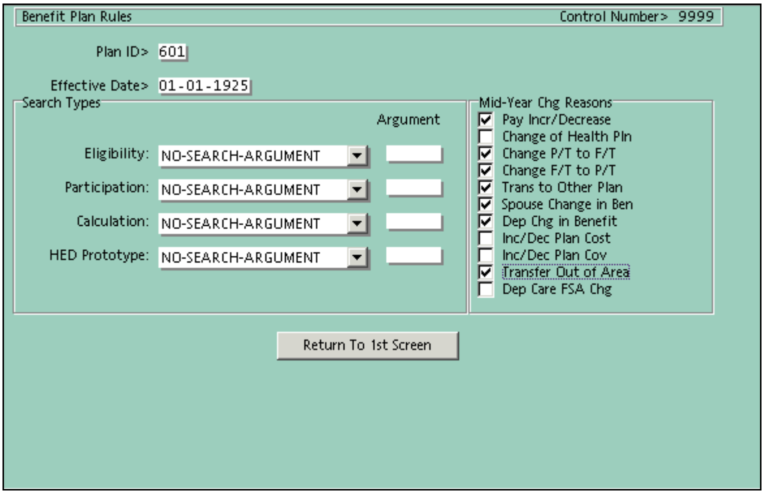
For practice, click Yes or press Enter.

10. Select Mid-Year Chg Reasons

Select the Flex Change rules that will remain constant for the plan for the remainder of the year. Check each box that applies.

For practice, select Pay Incr/Decrease, Change P/T to F/T, Change F/T to P/T, Trans to Other Plan, Spouse Change in Ben, Dep Chg in Benefit, and Transfer Out of Area.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



11. Click Return To 1st Screen

This action displays a dialog that allows you to save any entries made on the second panel.

For practice, click the Return To 1st Screen button.

12. Respond to the Save Changes? message

Indicate whether you want the changes saved (Yes), discarded (No), or you want to remain on the second panel (Cancel).

The Benefit Plan Rules form (TK-SCR) is updated and the following message is displayed:

'—Maintenance has been performed—'

For practice, click Yes or press Enter.

13. Repeat task to specify Flex Masters for existing plans

Repeat the steps for other flex plans to specify Flex Masters.

To complete the Guided Practice, repeat these steps and type 'FLX' in the Flex Master text box for the most current entry of the following plans: 602, 603, 604, and 605.

If you completed the Guided Practice, the resulting forms should look similar to the example above for the Flex Master text box.

14. Repeat task to specify Group Masters for existing plans

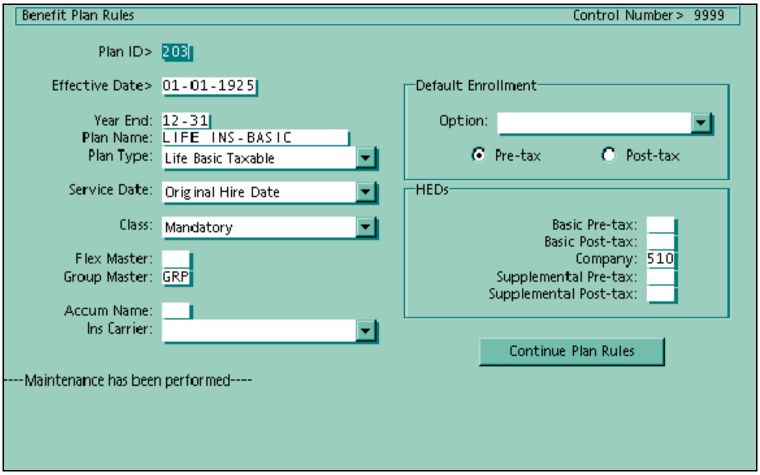
Repeat the steps for other flex plans to specify Group Masters.

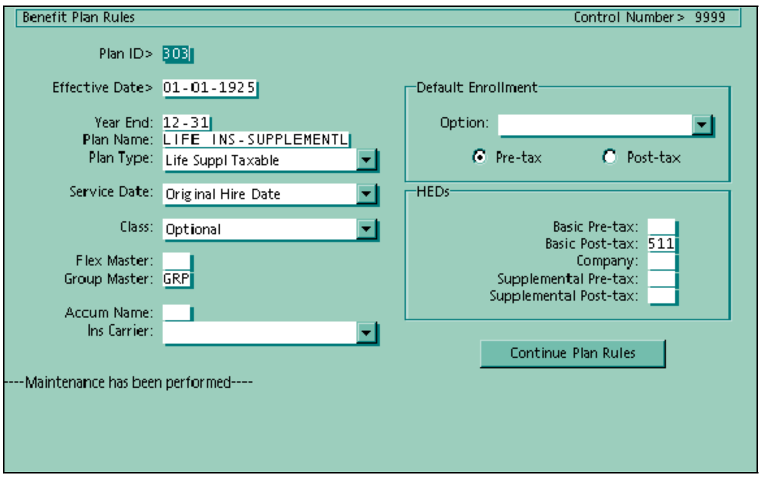
To complete the Guided Practice, repeat these steps and type 'GRP' in the Group Master text box for plans 203 and 303.

Note: *If the plan change is effective for a limited window of time, create another new Benefit Plan Rules form (TK-SCR) second panel, and enter an effective date of the first day following the last day for which the change event applies. Select the change reasons valid from this date forward.*

Note: *You must also create a Benefit Plan Rules form (TK-SCR) second panel for each plan that employees may now choose as a result of the plan change.*

If you completed the Guided Practice, the resulting forms should look similar to the examples that follow:





See also:

- Component plans used in a flex plan ***(on page 180)***

For an explanation of the steps needed to modify component plans.

Specifying group plan basic identification and rules

To specify group plan basic identification and rules using the Benefit Plan Rules form (TK-SCR), follow these steps:

Note: *If benefit plans have already been established for a benefits Control Number, the first table record for a table form will be displayed when you access a particular table form. You may find it helpful to clear the form before entering values for a new table record.*

1. Access the Benefit Plan Rules form (TK-SCR)

Access this form by making the following selection from the Navigator:

Component: Benefit Plan Setup and Maintenance
Process: Flex Plans
Task: Plan Name And Basic Rules

For practice, access the Benefit Plan Rules form (TK-SCR) for Organization 999999.

2. Enter a Plan ID

Enter the unique identifier for the group plan. You will enter this ID on all other tables associated with the plan.

For practice, type '903'.

3. Enter an Effective Date

During implementation of Benefits Administration, use the same date that you entered on the Organization-To-Rules Cross-Reference For Benefits form (AY-SCR). Tables entered thereafter should have the date on which the table record becomes effective—that is, the beginning of each plan year.

Type the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For practice, type '01-01-1925'.

4. Enter the Year End

Type the date that reflects the plan's year-end, whether it be a fiscal year or calendar year. Enter the date in the format MM-DD or MMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For practice, enter '12-31'(US and Canada) or '31-12' (elsewhere).

5. Enter a Plan Name

Type a descriptive name for the plan. When setting up a plan for the current effective date, it may be helpful to include the year in the plan name. The name will automatically display on all other tables with the same Plan ID. The name will also be displayed on reports.

For practice, type 'LIFE - GROUP MASTER'.

6. Select a Plan Type

Select 'Group Master' from the list box. Options for this list are provided by the Plan Types option list (BA16).

For practice, select 'Group Master'.

7. Select a Service Date type

This indicates the date from which an employee's service is credited. This is also the date from which an employee's eligibility is determined. Options for this list are provided by the Service Date Field option list (BA24).

For practice, select 'Original Hire Date'.

8. Select a Class

Select a value that indicates the plan class or usage. For example, is it mandatory or optional that an employee enroll in the plan? Options for this list are provided by the Plan Class option list (BA17).

For practice, select 'Mandatory'.

Note: *The remaining text boxes on the form should be left blank. Search arguments on the second panel are optional.*

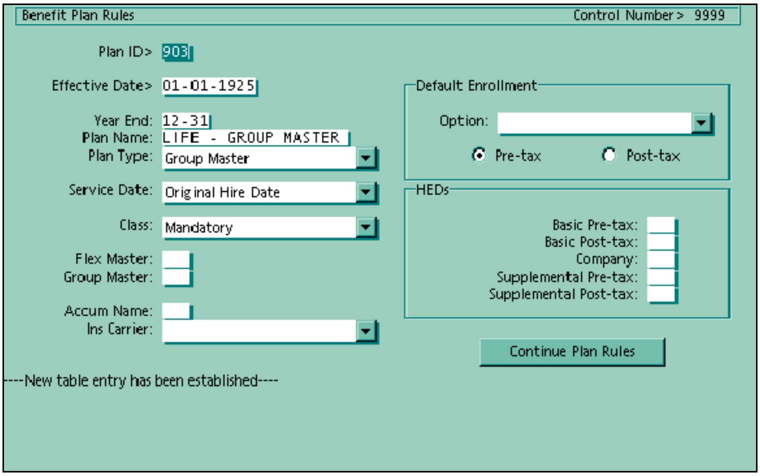
9. Click Save or press Enter

The Benefit Plan Rules table record (TK-SCR) is created and the following message is displayed:

'—New table entry has been established—'

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



See also:

- Identifying group plans for flex ***(on page 185)***

For more information about setting up group plans.

Identifying group component plans

To associate component plans with a group plan using the Flex Master/Group Plan Components form (TP-SCR), follow these steps:

1. Access the Flex Master/Group Plan Components form (TP-SCR)

Access this form by making the following selection from the Navigator:

Component: Benefit Plan Setup and Maintenance
Process: Flex Plans
Task: Flex Master/Group Plan Components

Note: *To avoid copying preexisting information, you may clear the form by using the Clear button on the toolbar.*

For practice, access the Flex Master/Group Plan Components form (TP-SCR) for the Organization 999999.

2. Enter the Plan ID

Type the three-character ID of the group plan for which you are identifying component plans.

For practice, type '903'.

3. Enter the Effective Date

During implementation of Benefits Administration, use the same date that you entered on the Organization-To-Rules Cross-Reference For Benefits form (AY-SCR). Tables entered thereafter should have the date on which the table record becomes effective—that is, the beginning of each plan year.

Type the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For practice, type '01-01-1925'.

4. Enter the Component Plans

In one or more of the text boxes in this group, type the three-character plan identifier of each plan to be included in this group plan. Deferred plans can be included in a group plan.

Since a Flex Master Plan can be defined to include group plans as components, all group plan components must have the same Year-end date as the Flex Master Plan; the Benefit Plan Rules form (TK-SCR) for each group plan component must have the same effective date as the Flex Master Plan.

For practice, type '203' and '303'.

5. Click Save or press Enter

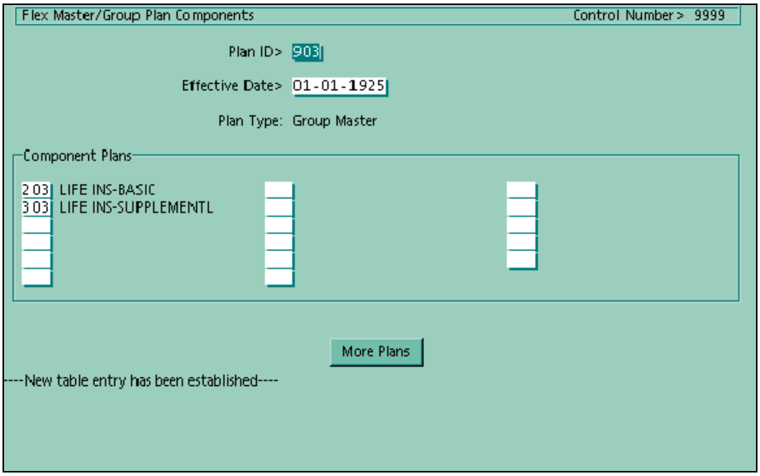
The Flex Master/Group Plan Components form (TP-SCR) is created and the following message is displayed:

'—New table entry has been established—'

For practice, click Save or press Enter.

Note: *If you attempt to enter a table for a plan that has a class of Inactive Plan, a Warning message is displayed and you must click Yes to accept the warning before the table will process the entry.*

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



6. Click More Plans (optional)

Complete this step only if you need to identify additional component plans for this group plan.

The More Plans button returns a new form that contains up to 17 additional plan entries. You may enter up to 10 forms of 17 plans each.

For practice, bypass this step.

7. Click Save or press Enter (optional)

Complete this step only if you have made entries on the additional panel(s) of this form. The following message is displayed:

'—Maintenance has been performed—'

For practice, bypass this step.

If a group plan changes, create a new table record with the new effective date rather than changing the existing record.

See also:

- Identifying group plans for flex ***(on page 185)***

For more information about recording group plan components.

Setting up a flex credits formula

To define your flex credits formula using the Flex Plan Credits Calculation form (FCCSCR), follow these steps:

Note: *If your plan does not use credits, you may omit this task.*

1. Access the Flex Plan Credits Calculation form (FCCSCR)

Access this form by making the following selection from the Navigator:

Component:	Benefit Plan Setup and Maintenance
Process:	Flex Plans
Task:	Flex Plan Calculation Factors

Note: *To avoid copying preexisting information, you may clear the form by using the Clear button on the toolbar.*

For practice, access the Flex Plan Credits Calculation form (FCCSCR) for Organization 999999.

2. Enter the Master Plan ID

Type the unique three-character identifier for the Master Plan. This is the ID that will be entered on all tables associated with the plan.

For practice, type '700'.

3. Enter the Effective Date

Initial tables should use the current benefits year effective date. Tables entered thereafter should have the date on which the table record becomes effective—that is, the beginning of each plan year.

Type the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For practice, type a date representing January 1 (US and Canada) of the current year, or 1 January (elsewhere,) for example, '01-01-1998'.

4. Select the Calculation Codes

In one or more of the list boxes in this group, select a calculation type. Options for this list are provided by the Credit Calculation Factors option list (BA69).

Select the codes in the order in which they should be calculated. You may select up to eight codes on the first panel of this form.

These calculation codes, when added together, identify the type of calculation that will be performed to create flex benefits total credits for a specific Master Plan.

For practice, select '2% of Salary'.

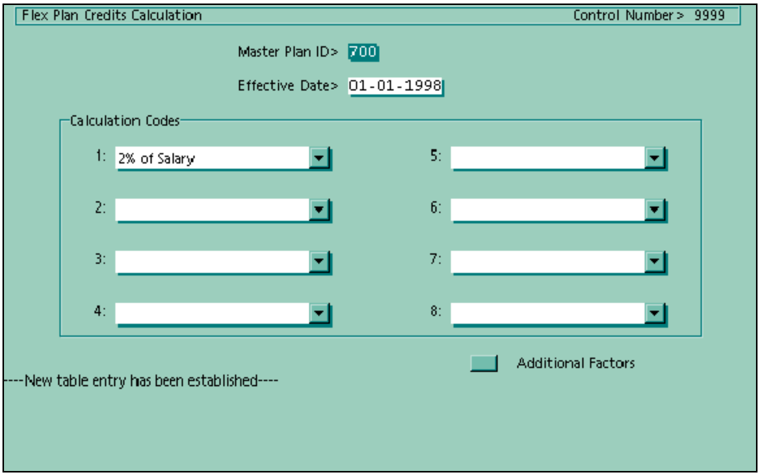
5. Click Save or press Enter

The Flex Plan Credits Calculation table record (TP-SCR) is created and the following message is displayed:

'—New table entry has been established—'

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



6. Click Additional Factors (optional)

Complete this step only if you need to define additional calculation codes for a plan.

The Additional Factors button returns a new form that contains up to eight additional codes per formula.

For practice, bypass this step.

7. Click Save or press Enter (optional)

Complete this step only if you have made entries on the second panel of this form. The following message is displayed:

'—Maintenance has been performed—'

For practice, bypass this step.

Each year you must add a Flex Plan Credits Calculation table record (FCCSCR) with the new flex plan year date.

If a Flex Master Plan changes, create a new table record with the new effective date rather than changing the existing record.

See also:

- Flex credits/monetary amounts ***(on page 197)***

For more information about calculating credits.

Specifying flex plan basic identification and rules

To specify flex plan basic identification and rules using the Benefit Plan Rules form (TK-SCR), follow these steps:

Note: If benefit plans have already been established for a benefits Control Number, the first table record for a table form will be displayed when you access a particular table form. You may find it helpful to clear the form before entering values for a new table record.

1. Access the Benefit Plan Rules form (TK-SCR)

Access this form by making the following selection from the Navigator:

Component: Benefit Plan Setup and Maintenance
Process: Flex Plans
Task: Plan Name and Basic Rules

For practice, access the Benefit Plan Rules form (TK-SCR) for Organization 999999.

2. Enter a Plan ID

Enter the unique identifier for the flex plan. You will enter this ID on all other tables associated with the plan.

For practice, type '700'.

3. Enter an Effective Date

During implementation of Benefits Administration, use the same date that you entered on the Organization-To-Rules Cross-Reference For Benefits form (AY-SCR). Tables entered thereafter should have the date on which the table record becomes effective—that is, the beginning of each plan year.

Type the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For practice, type '01-01-1925'.

4. Enter the Year End

Type the date that reflects the plan's year-end, whether it be a fiscal year or calendar year. Enter the date in the format MM-DD or DDMM (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For practice, type '12-31'(US and Canada) or '31-12' (elsewhere).

5. Enter a Plan Name

Type a descriptive name for the plan. When setting up a plan for the current effective date, it may be helpful to include the year in the plan name. The name will automatically display on all other tables with the same Plan ID. The name will also be displayed on reports.

For practice, type 'FLEX MASTER PLAN'.

6. Select a Plan Type

Select 'Flex Benefit Master' from the list box. Options for this list are provided by the Plan Types option list (BA16).

For practice, select 'Flex Benefit Master'.

7. Select a Service Date type

This indicates the date from which an employee's service is credited. This is also the date from which an employee's eligibility is determined. Options for this list are provided by the Service Date Field option list (BA24).

For practice, select 'Original Hire Date'.

8. Select a Class

Select a value that indicates the plan class or usage. For example, is it mandatory or optional that an employee enroll in the flex plan? Options for this list are provided by the Plan Class option list (BA17).

For practice, select 'Mandatory'.

Note: The remaining text boxes on the form should be left blank. Search arguments on the second panel are optional.

9. Click Save or press Enter

The Benefit Plan Rules table record (TK-SCR) is created and the following message is displayed:

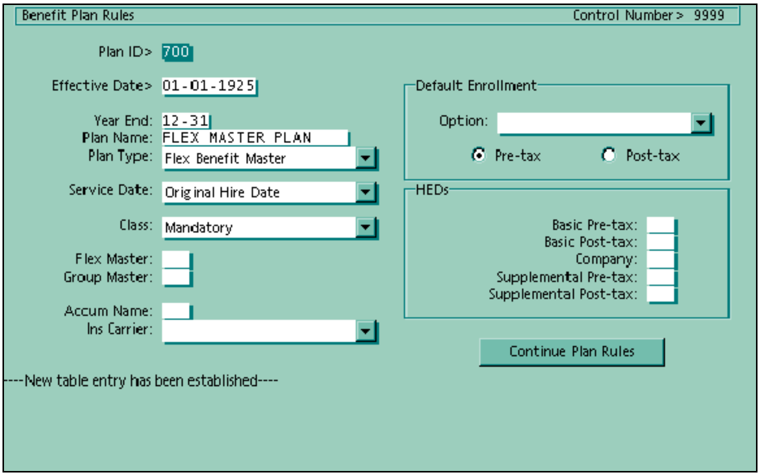
'—New table entry has been established—'

For practice, click Save or press Enter.

Each year you must add a new Benefit Plan Rules form (TK-SCR) with the new flex plan year date.

If a Flex Master Plan changes, create a new table record with the new effective date rather than changing the existing record.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



Benefit Plan Rules Control Number > 9999

Plan ID> 700

- Flex Master Plan setup ***(on page 191)***

For more information about setting up a flex plan.

Recording flex benefits rules at the Master Plan level

To specify the flex benefits rules at the Master Plan level using the Flex Benefits Master Plan Rules form (TKFSCR), follow these steps:

Note: *The Benefit Plan Rules form (TKFSCR) must be entered for the Flex Benefits Master Plan before this form can be entered.*

1. Access the Flex Benefits Master Plan Rules form (TKFSCR)

Access this form by making the following selection from the Navigator:

Component: Benefit Plan Setup and Maintenance
Process: Flex Plans
Task: Flex Master Plan Rules

Note: To avoid copying preexisting information, you may clear the form by using the Clear button on the toolbar.

For practice, access the Flex Benefits Master Plan Rules form (TKFSCR) for Organization 999999.

2. Enter the Plan ID

Type the three-character ID of the flex plan for which you are setting up Flex Master Plan rules.

For practice, type '700'.

3. Enter the Effective Date

During implementation of Benefits Administration, use the same date that you entered on the Organization-To-Rules Cross-Reference For Benefits form (AY-SCR). Tables entered thereafter should have the date on which the table record becomes effective—that is, the beginning of each plan year.

Type the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For practice, type a date representing January 1 (US and Canada) of the current year, or 1 January (elsewhere) for example, '01-01-1998'.

4. Enter the Credits Information

These option buttons indicate whether the flex plan has no deductions, has deductions by plan, or uses the net credits method. Select one method from the group box:

- **Plan Has No Credits**—Select this option button if no earnings or deductions are associated with the flex plan.
- **Ded Credits By Plan**—Select this option button if you are using the deduct credits by plan method for storing and processing credits for a flex plan. If you select this option button, type the corresponding earning HED number in the HED text box on the same line on this form.
- **Use Net Credits Meth**—Select this option button if you are using the net credits method for storing and processing credits for a flex plan. If you select this option button, type the corresponding HED numbers in the Earnings HED and Deduction HED text boxes.

For practice, select 'Use Net Credits Meth'. Type Earnings HED '060' and Deduction HED '624'.

5. Enter the Total Credits

Select one of the group box option buttons to indicate, for flex plans with credit calculations, whether the credit determination is made during or after the enrollment:

- **Before Enrollment**—Credit calculations take place before the plan option choices are determined.
- **During Enrollment**—Credit calculations take place after the employee's plan option choices are determined during enrollment.
- **None**—No credit determinations will be made.

For practice, select 'Before Enrollment'.

6. Enter the Processing Defaults

Select one or more option buttons in the group box that apply to an employee who has a flex plan:

- **Create Year-end Shut-off**—All plans are set to 'Shutoff/Deenroll', allowing the Flex Benefits Enrollments/Changes form (55FSCR) to default to an employee's current plan options when you access it.
- **Create Waived Option**—If an employee waives a plan, an enrollment record is written with the option set to Waived.
- **Default Current Enroll Option**—Allows the enrollment choices to default to the current year's options.
- **Show Per-Pay-Period Amounts**—Allows the Flexible Benefit enrollment form and reports to display costs as per-pay-period amounts. Otherwise, costs are displayed as an annual amount.

For practice, select 'Create Waived Option' and 'Show Per-Pay-Period Amounts'.

7. Enter the Deferred Plan HEDs

Type up to three Plan IDs and the associated HEDs for any deferred benefit plan contributions made through this flex plan.

Note: A Deferred Plan HED for Flex is not the HED already set up for employee or company match contributions. Define a new HED for a fixed amount contribution.

For practice, type '510' in the Plan 1 text box and '625' in the HED text box.

8. Click Save or press Enter

The Flex Benefits Master Plan Rules form (TKFSCR) is created and the following message is displayed:

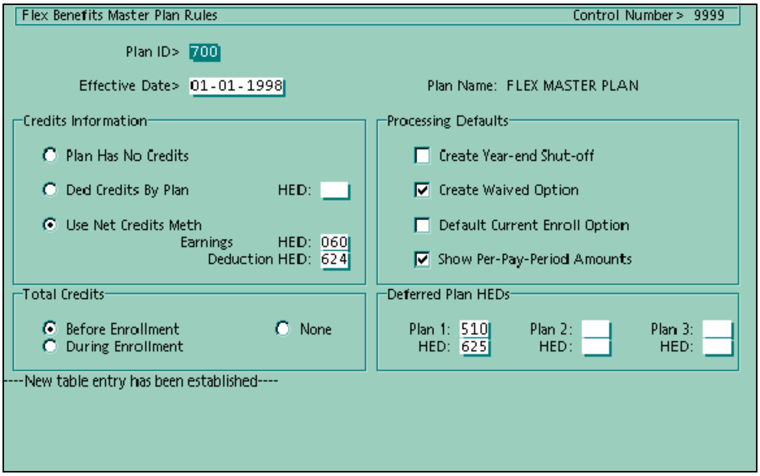
'—New table entry has been established—'

For practice, click Save or press Enter.

Each year you must add a new Flex Benefits Master Plan Rules form (TKFSCR) with the new flex plan year date.

If a Flex Master Plan changes, create a new table record with the new effective date rather than changing the existing record.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



See also:

- Flex Master Plan setup ***(on page 191)***

For more information about setting up the default processes for the flex plan.

Identifying Flex Master component plans

To associate component plans with a Flex Master Plan using the Flex Master/Group Plan Components form (TP-SCR), follow these steps:

1. Access the Flex Master/Group Plan Components form (TP-SCR)

Access this form by making the following selection from the Navigator:

Component:	Benefit Plan Setup and Maintenance
Process:	Flex Plans
Task:	Flex Master/Group Plan Components

Note: *To avoid copying preexisting information, you may clear the form by using the Clear button on the toolbar.*

For practice, access the Flex Master/Group Plan Components form (TKFSCR) for the Organization 999999.

2. Enter the Plan ID

Type the three-character ID of the Flex Master Plan for which you are identifying component plans.

For practice, type '700'.

3. Enter the Effective Date

During implementation of Benefits Administration, use the same date that you entered on the Organization-To-Rules Cross-Reference For Benefits form (AY-SCR). Tables entered thereafter should have the date on which the table record becomes effective—that is, the beginning of each plan year.

Type the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For practice, type a date representing January 1 (US and Canada) of the current year, or 1 January (elsewhere), for example, '01-01-1998'.

4. Enter the Component Plans

In one or more of the text boxes in this group, type the three-character plan identifier of each plan to be included in this Flex Master Plan. Deferred plans can be included in a Flex Master Plan.

After establishing a group plan, you may include it as part of a Flex Master Plan, thereby establishing 'nested' group plans.

If a group plan is part of a Flex Master Plan, the year-end date for each component of the group plan must match the Flex Master Plan year-end date. Each group plan component must also have a Benefit Plan Rules form (TK-SCR)with the same effective date as the Flex Master Plan.

For practice, type '601', '602', '603', '604', '605', and '510'.

5. Click Save or press Enter

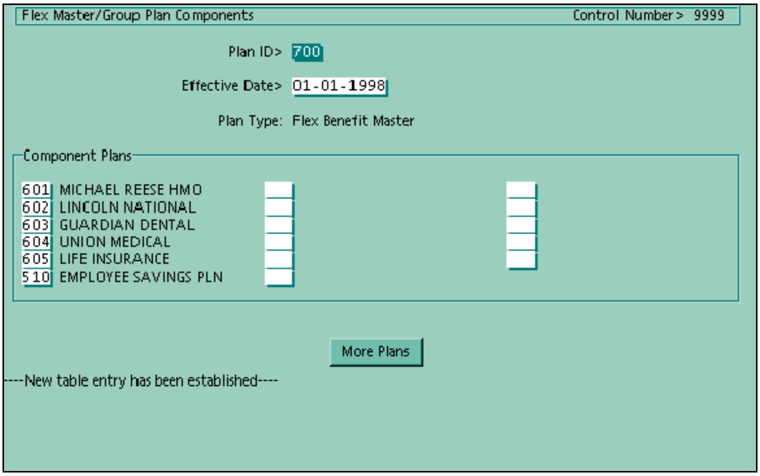
The Flex Master/Group Plan Components form (TP-SCR) is created and the following message is displayed:

'—New table entry has been established—'

For practice, click Save or press Enter.

Note: *Each year you must add a Flex Master/Group Plan Components form (TP-SCR) with the new flex plan year date.*

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



6. Click More Plans (optional)

Complete this step only if you need to identify additional component plans for this Flex Master Plan.

The More Plans button returns a new form that contains up to 17 additional plan entries. You may enter up to 10 forms of 17 plans each.

For practice, bypass this step.

7. Click Save or press Enter (optional)

Complete this step only if you have made entries on the additional panel(s) of this form. The following message is displayed:

'—Maintenance has been performed—'

Note: *If you attempt to enter a table for a plan that has a class of Inactive Plan, a Warning message is displayed and you must click Yes to accept the warning before the table will process the entry.*

For practice, bypass this step.

Each year you must add a new Flex Master/Group Plan Components form (TP-SCR) with the new flex plan year date.

If a Flex Master Plan changes, create a new table record with the new effective date rather than changing the existing record.

See also:

- Identifying flex component plans ***(on page 203)***

For an explanation of this identifier.

Extended Practice

Set up a flex plan for Organization 999999 for 1998 using the following information:

Plan ID:	710
Plan Type:	Flex Benefits Master
Effective Date:	01-01-1925
Plan Year End:	12-31 (US and Canada) or 31-12 (elsewhere)
Plan Class:	Mandatory
Eligibility:	All active part-time and full-time employees, first of the month following their first day of employment.
Service Date:	Based on 'Employment Date'
Enrollment Options:	Enrolled, Shutoff/Deenroll
Flex Credits:	Smoker ID and 2% Salary. Use the deduction by credits plan method.
Credit Method:	Deduction credits by plan, total credits before enrollment
Contributions:	As specified by individual component plans
Component Plans:	101 203 505 601 602 603 605
Separation Activities:	Voluntary termination—all values Involuntary termination—all values Death—all values
Processing Defaults:	'Create Waived Option' and 'Show Per-Pay-Period Amounts'
HED Information:	HED 623 for Deferred Plan 505

Text of List Box	**Entries for HED 060**
Contrib Type	Basic Post Tax Contb
Effective Date	01-01-1925
Frequency	All Pay Periods
Type	Skip Arrears/HED 999
Calc Method	Fixed Amount

Text of List Box	Entries for HED 060
Auto Deduction	Start W/Effect Date

You will need to set up a Coverage And Contribution Factors form (TM-SCR) and a Benefits Plan Prototype Contribution HED form (TS-SCR) similar to plan 510. Select 'Participant' for the Option on the Coverage And Contribution Factors form (TM-SCR).

Review of Questions Answered

1. What are flex plans?

2. What are the prerequisites for flex plans?

3. What tables are used to define flex plans?

4. What are group plans and how are they used?

5. In what ways can flex credits/monetary amounts be calculated and allocated?

CHAPTER 7

Using Considered Earnings/Hours Accumulators

In This Chapter

Introduction

If any of your deferred benefits plans require an accumulation of hours to determine an employee's eligibility to participate in the plan, you will need a way to accumulate and store those hours. The Considered Earnings/Hours Accumulator function of Benefits Administration provides the ability to retain considered earnings, hours worked, and hours paid. It also provides the means to link specific accumulators by name to the plan that requires that accumulation. Once in place, the accumulations can be viewed and corrected. You can also record prior-year accumulations as part of your conversion effort.

Review this section carefully to determine how to effectively integrate the Benefits Administration component into your plan eligibility process.

Tasks

This section explains the following tasks:

- Completing an accumulator design worksheet
- Assigning accumulator buckets to earning HEDs
- Activating accumulator buckets
- Assigning an accumulator to an existing benefits plan
- Initializing or backloading employee accumulator information
- Correcting employee accumulator detail information
- Viewing prior-year employee accumulator information
- Correcting FICA-HI Accumulator Data
- Correcting FICA-OASDI Accumulator Data

Prerequisites

Before you can set up considered earnings/hours accumulators, the following must be established for:

- Organizations
- Employees
- Benefits Control Numbers

☞ *Refer to* **Setting Up Welfare Plans** *(on page 53) for more information about setting up Control Numbers.*

- Benefits plans

☞ *Refer to* **Setting Up Welfare Plans** *(on page 53),* **Setting Up Deferred Plans** *(on page 111),* **Setting Up Flex Plans** *(on page 173) for information about setting up benefits plans.*

Questions answered

The following questions are answered in this section:

1. What are considered earnings/hours accumulators?
2. How are considered earnings/hours accumulators used?
3. What types of accumulators are available?

4. What tools are available for backloading employee earnings/hours accumulations?

Benefits accumulators---the big picture

Considered earnings/hours (CE/H) accumulators may be used to accumulate the earnings and hours toward an employee's eligibility for a benefits plan. Depending on the nature of the benefits plan and the information required, you may set up accumulations to be stored monthly, quarterly, or annually on an employee's record. When the accumulated employee earnings/hours equal the eligibility requirements of the benefits plan to which the accumulator is assigned, the employee may participate, or continue to participate, in the plan.

Types of accumulators

There are two types of CE/H accumulators:

- **Plan-specific**—Used to accumulate earnings and hours worked/paid for benefits plans. Plan-specific CE/H accumulators have a plan year-to-date record and a number of detail records based on whether they are monthly (12 detail records), quarterly (four detail records), or annual (one detail record) accumulators.
- **Date of Hire**—Cyborg-delivered accumulator 000 generates a single occurrence accumulation of all earnings from the date of hire until the number of hours worked reaches 1,000 hours.

Both of these CE/H accumulators can be backloaded and existing accumulators can be adjusted using the employee-level accumulation forms.

Employee Database requirements to support accumulators

CE/H accumulations are stored on the Employee Database (Master File) in the Organization 991111. You must have Organization 991111 on your production file to use the CE/H accumulator function. This is not an option.

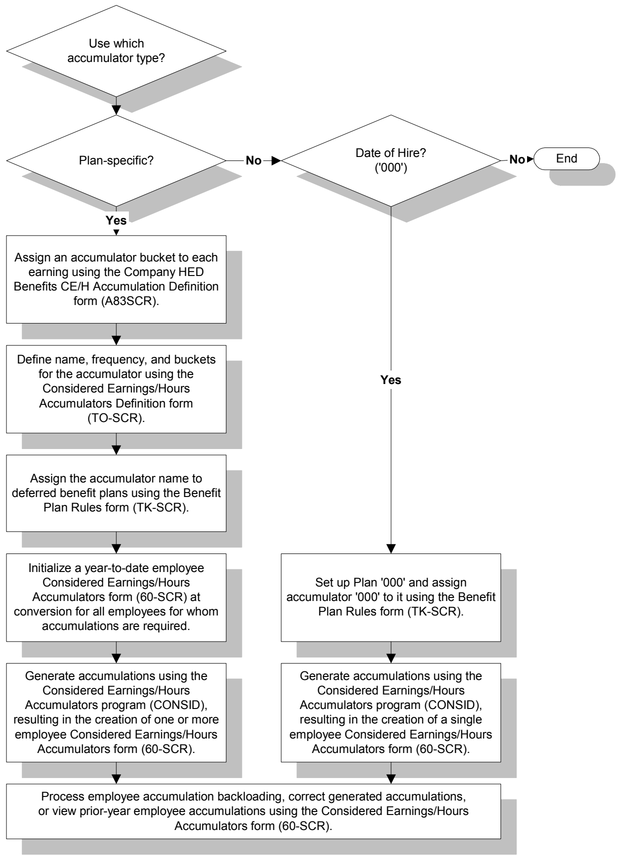
If you have used Organization 991111 for one of your test Employee Database files, transfer the company and its employees to a new organization before adding the demo test file to your production Employee Database.

Security considerations

Accumulations are created for employees and stored on Organization 991111 using the employee's social security/insurance number (without dashes) as the key. Normal organization security does not apply to Organization 991111. If you do not want individuals to access the considered earnings/hours accumulations, security must prohibit the use of the employee-level Considered Earnings/Hours Accumulators form (60-SCR) through which the accumulations are accessed.

The accumulator process

To set up accumulators and process the employee accumulations, you will perform the tasks indicated in the following illustration:



The remainder of this section explains the tasks shown in this illustration.

☞ *Refer to* **Benefits/Payroll Interaction** *(on page 535) for information about the Considered Earnings/Hours Accumulators program.*

Apply the Concept
Will you set up considered earnings/hours (CE/H) accumulators to store information monthly, quarterly, or annually?

Apply the Concept
Which type of accumulators will you use?

Accumulator design

To simplify the design phase of setting up plan-specific accumulators, consider using a worksheet that will allow you to identify the HEDs to be accumulated, accumulator bucket assignments, and other associated values. The worksheet can provide the data you need to complete the accumulator setup.

You may find it helpful to have a Payroll specialist participate in the worksheet completion, since he or she has a working knowledge of your organization's HEDs. You will work as a team to analyze existing earning HEDs and determine which of your plans must have an HED's earnings included in its considered earnings.

As an example, the following completed worksheet has all the components required for the design phase. It lists all the HEDs that are needed for this company's deferred benefits plan accumulations and specifies which plans will use the HED accumulation. It lists the frequencies at which each plan will require accumulations as well as the name of each plan's accumulator. The worksheet identifies the accumulator bucket into which each HED will be added and identifies the type of considered earnings/hours as earnings only, hours worked, hours paid, or hours worked/paid.

Accumulator name	**123**	**ABC**	**6D4**	**888**	**123**		
Frequency	M	M	A	Q	M		
HED description and number	**Plan 501**	**Plan 502**	**Plan 503**	**Plan 509**	**Plan 510**	**Hrs Wkd/ Pd***	**Accum bucket**
Regular Pay (001)	X	X	X	X	X	3	2
Straight Overtime (003)	X		X		X	3	1
Premium Overtime (003)	X				X	0	0
Vacation Pay (014)	X	X		X	X	2	3
Birthday Pay (092)	X	X	X		X	2	4
Sick Pay (093)			X			2	5
Holiday Pay (107)	X	X	X		X	1	4

***0** = Earnings only, **1** = Earnings/hours wkd, **2** = Earnings/hours pd, **3** = Earnings/hours wkd/pd.

After completing the worksheet, you can easily transfer all the information to the accumulator setup forms.

See also:

- ***Completing an accumulator design worksheet***
For detailed directions on completing an accumulator design worksheet.

Accumulator setup

Setting up your plan-specific accumulators is a four-step process. You need to perform the following tasks:

Task	Form
1. Assign accumulator buckets to earning HEDs and specify which type of earnings and hours will be accumulated	Company HED Benefits CE/H Accumulation Definition form (A83SCR)
2. Name the accumulator, specify the frequency, and activate specified accumulator buckets	Considered Earnings/Hours Accumulators Definition form (TO-SCR)
3. Assign the accumulator to an existing benefits plan	Benefit Plan Rules form (TK-SCR)
4. Initialize the employee year-to-date accumulator record at conversion	Considered Earnings/Hours Accumulators form (60-SCR)

Assign accumulator buckets to earning HEDs

Assigning an accumulator bucket number to an HED is a very important process. The Considered Earnings/Hours Accumulators program adds these buckets together to obtain the CE/H value. This value is then stored in the accumulator defined on the plan tables for each benefits plan in which the employee is enrolled.

The Company HED Benefits CE/H Accumulation Definition form (A83SCR) is used to define which CE/H bucket the HED is to add into for purposes of accumulating considered earnings and hours worked/hours paid for Benefits Administration. It also identifies whether the hours will be considered hours worked, paid, both, or neither. You will need one Company HED Benefits CE/H Accumulation Definition form (A83SCR) for each HED that is to be included in an accumulator.

Bucket assignments

There are 36 accumulation buckets available to the CE/H accumulation process. HED earnings and hour values from current payments are added into one of these 36 buckets. The 36 buckets are identified with a one-position option of '0' through '9' and 'A' through 'Z'.

There are two reserved buckets: '0' (zero) and '1'. You must assign bucket '1' to all overtime earnings (HED Category 01). The '0' (zero) bucket will not be assigned to an earnings. It is used only as a reminder on the worksheet if you want the premium portion of overtime added into a CE/H accumulator on the Considered Earnings/Hours Accumulator Definition form (TO-SCR). You may assign the remaining buckets however you choose.

After you have made your preliminary decisions on the bucket assignment for each HED, analyze the HED lines on the worksheet to determine if two or more of the HEDs belong in the same plan accumulators. If you see that two or more HEDs on the worksheet have been marked with 'X's or checkmarks under exactly the same plans, you may want to make the accumulation process more efficient by assigning the same bucket number to both HEDs. In the example that follows, HEDs 092 and 107 apply to the same plans, so they have been assigned the same bucket number.

HED description and number	**Plan 501**	**Plan 502**	**Plan 503**	**Plan 509**	**Plan 510**	**Accumulator bucket**
Birthday Pay (092)	X	X	X		X	4
Holiday Pay (107)	X	X	X		X	4

How hours are to be accumulated

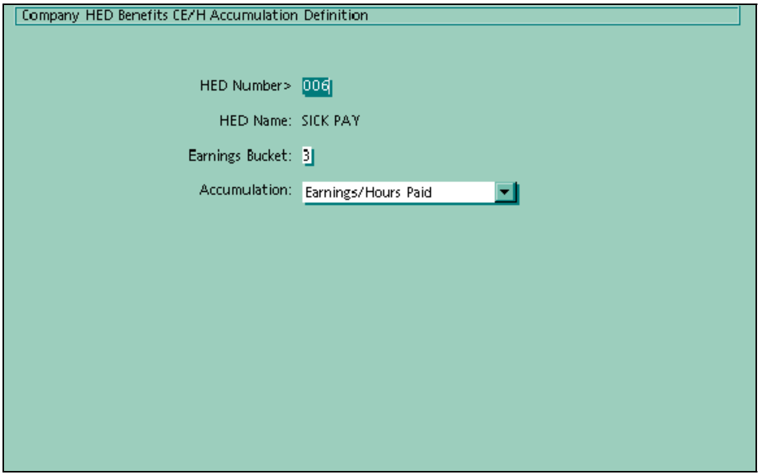
You must also define on this form how the hours are to be accumulated for the HED:

- Add to hours worked
- Add to hours paid
- Add to both
- Earnings only, do not add to hours

The choice you make for this option will depend on the way your company defines the hours paid to employees. For example, you may enter vacation time as 'hours paid' if it is your company's policy to consider only time actually used for work production as 'hours worked'.

An example of 'earnings only' might be the shift premium HED, if that premium for second and third shift pay is a separate HED in addition to the straight-time pay HED for those hours. Another example of 'earnings only' are those HEDs that are paid as amounts and usually have no associated hours, such as bonus or commission.

The following Company HED Benefits CE/H Accumulation Definition form (A83SCR) for Acme Manufacturing shows that HED 006 has been assigned to bucket '3' and is considered 'earnings/hours paid' according to the company rules:



See also:

- Assigning accumulator buckets to earning HEDs ***(on page 260)***

For detailed directions on assigning accumulator buckets.

Define the accumulator and its buckets

After each earnings HED has been associated with an accumulator bucket, the next step is to define the accumulator and its contents. The Considered Earnings/Hours Accumulators Definition form (TO-SCR) is used to define the accumulator frequency and which buckets are to be added together for an accumulator. You will need one Considered Earnings/Hours Accumulators Definition form (TO-SCR) for each accumulator name you defined on the worksheet.

Accumulator name assignment

Review the plan columns on the worksheet. Look for plans that have the same CE/H earnings, hours worked/hours paid, and frequency definition.

In the following example, you will see that plans 501 and 510 both need the same HED earnings and hours information and require that accumulators be kept on the same frequency. Rather than assign a separate CE/H accumulator name for each plan, set up the definitions so they access the same accumulator. In this example, plans 501 and 510 share an accumulator name of '123'.

Accumulator name	123	123
Frequency	M	M
HED description and number	**Plan 501**	**Plan 510**
Regular Pay (001)	X	X
Straight Overtime (003)	X	X

Accumulator name	123	123
Premium Overtime (003)	X	X
Vacation Pay (014)	X	X
Birthday Pay (092)	X	X
Sick Pay (093)		
Holiday Pay (107)	X	X

You will assign a three-position accumulator name to each unique definition, then assign a shared identifier to any duplicates.

This procedure will save space on the Employee Database because you will not have two accumulators per employee. You will not have duplicate information on the file and, if an adjustment that affects the accumulator must be made to an HED, the system needs to adjust one instead of multiple records.

Accumulator frequency

Depending on the benefits plan rules that your company has defined, accumulator frequencies may be annual, quarterly, or monthly.

If you have no plan requirements regarding frequency, you may elect to define your accumulators as 'annual' so that accumulation records require less file space. Annual accumulations use one year-to-date record, while quarterly and monthly frequencies produce a year-to-date record plus one detail record for each period.

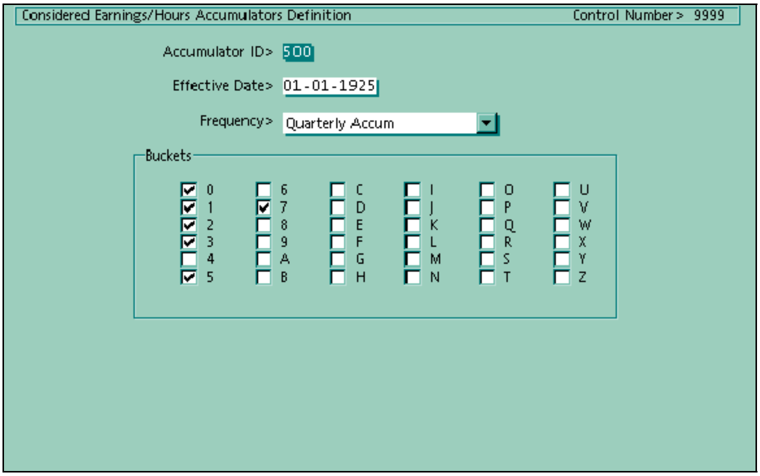
Accumulator buckets

Accumulation buckets '0' through '1' and 'A' through 'Z' are available on the Considered Earnings/Hours Accumulators Definition form (TO-SCR).

To have both the premium and straight time portions of overtime added to the accumulator, select the '0' (zero) and '1' buckets. When the Considered Earnings/Hours Accumulators program encounters an overtime HED, it will add the premium portion of overtime into bucket '0' (zero) and the straight-time portion into bucket '1'. If you only want the straight-time portion, select bucket '1' and leave bucket '0' (zero) unselected.

Then, using your worksheet as a guide, select any other buckets for which you have made an assignment on the Company HED Benefits CE/H Accumulation Definition form (A83SCR) for the accumulator name.

The following Considered Earnings/Hours Accumulators Definition form (TO-SCR) shows that Acme Manufacturing has established accumulator 500 with a quarterly frequency. The accumulator will add the premium portion of overtime into bucket '0' (zero) and the straight-time portion into bucket '1'. Buckets '2', '3', '5', and '7' are selected as well.



See also:

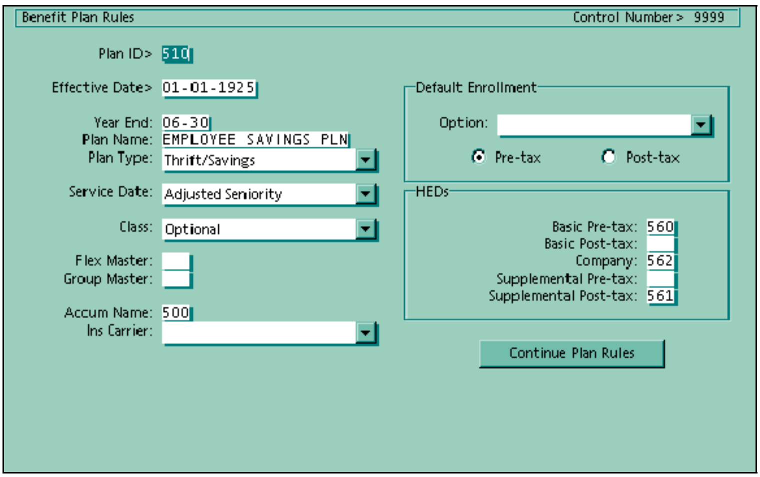
- Activating accumulator buckets ***(on page 262)***

For detailed directions on activating accumulator buckets.

Assign the accumulator to a benefits plan

The last step in the accumulator process is to assign an accumulator name to each benefits plan that requires one. Update each plan's Benefit Plan Rules form (TK-SCR) by entering the accumulator name that is listed on your worksheet above the Plan ID.

In the following example, accumulator 500 has been assigned to plan 510 on Acme Manufacturing's Benefit Plan Rules form (TK-SCR).



See also:

- Assigning an accumulator to an existing benefits plan ***(on page 263)***

For detailed directions on assigning accumulators to benefits plans.

Initialize the employee year-to-date accumulator record

For the accumulator to begin accumulating, the employee must be enrolled with an active status. Once the employee is enrolled, the year-to-date record on the Considered Earnings/Hours Accumulators form (60-SCR) will be created automatically the first time the Considered Earnings/Hours Accumulators program is run, based on the plan year end defined on the Benefit Plan Rules form (TK-SCR).

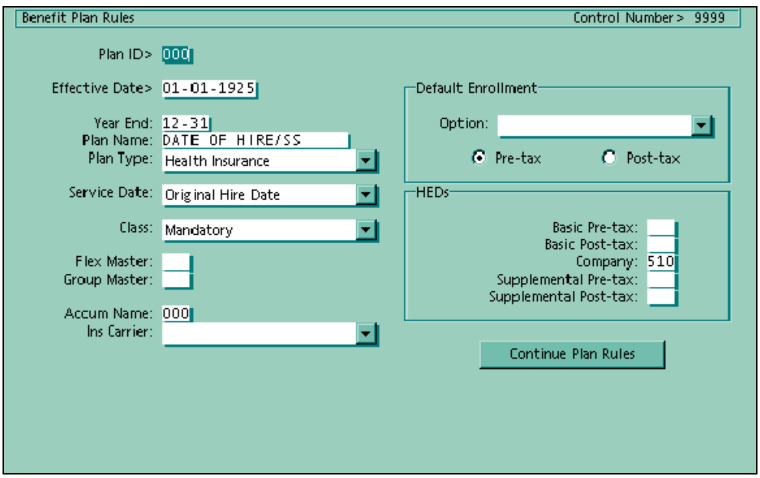
Refer to **Batch Loading of Benefits Forms** *(on page 917) for information on batch loading.*

Refer to the Technical Administration of The Solution Series/ST documentation for more information on data conversion and loads.

From Date of Hire accumulator setup

Accumulator 000 is a Cyborg-delivered accumulator that provides accumulation of total hours to a limit of 1,000 hours.

The From Date of Hire accumulator requires the setup of a Benefit Plan Rules form (TK-SCR) for plan 000 that contains an assignment of the accumulator 000. Review the following Benefit Plan Rules form (TK-SCR) for Organization 999999 to see the suggested entries for plan 000.



Benefit Plan Rules   Control Number> 9999

Plan ID> 000

Effective Date> 01-01-1925

Year End: 12-31

Plan Name: DATE OF HIRE/SS

Plan Type: Health Insurance

Service Date: Original Hire Date

Class: Mandatory

Flex Master:

Group Master:

Accum Name: 000

Company: 510

Supplemental Pre-tax:

Supplemental Post-tax:

Continue Plan Rules

The From Date of Hire accumulator does not need to be assigned to benefits plans in order to accumulate hours. It is not plan specific, but rather an independent operation that takes place for all employees each time the Considered Earnings/Hours Accumulators program is run. You are not required to initiate a Considered Earnings/Hours Accumulators form (60-SCR) for employees for this accumulator at conversion time.

Note: You can also enter '1000' in the Days/Hours text box on the Benefit Plan Eligibility Rules form (TL-SCR) to accumulate a limit of 1,000 hours in accumulator 000. Using the Days/Hours text box to define eligibility allows you to use your own accumulator for earnings/hours in the Accum Name text box on the Benefit Plan Rules form (TK-SCR).

The accumulation process and resulting employee records

You must have defined your CE/H accumulators using the Company HED Benefits CE/H Accumulation Definition form (A83SCR) and the Considered Earnings/Hours Accumulators Definition form (TO-SCR), entered the appropriate accumulator name on each plan's Benefit Plan Rules form, and enrolled your employees in benefits plans before the accumulation program can be run. If you have not completed all these steps, the Considered Earnings/Hours Accumulators program (CONSID) will not have enough data to perform its function.

How accumulators are updated

The Considered Earnings/Hours Accumulators program is used to update considered earnings/hours accumulators with earnings from the current pay period's History records. Each employee will have the appropriate CE/H accumulators automatically created at the beginning of each plan year and will have his or her earnings updated when the Considered Earnings/Hours Accumulators program is run after the Employee Database (Master File) is re-created after a payroll run. The Considered Earnings/Hours Accumulators program must be run before the Extracting Pay Information program in order for accumulators to be updated.

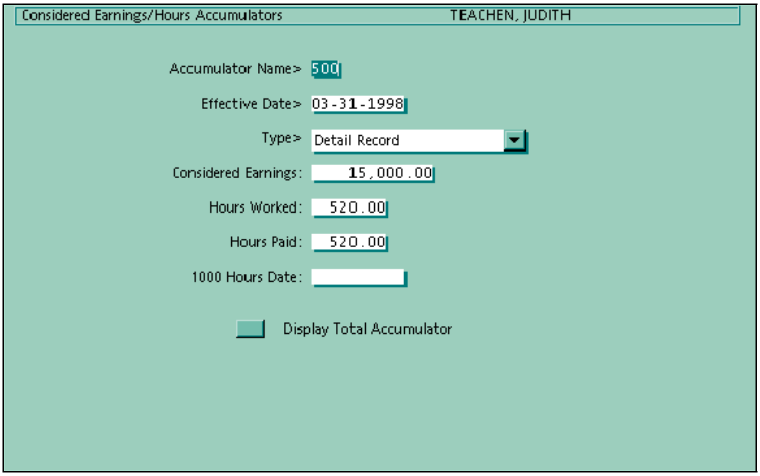
☞ *Refer to* **Benefits/Payroll Interaction** *(on page 535) for an explanation of the Considered Earnings/Hours Accumulators program and its processing instructions.*

Storing accumulation information

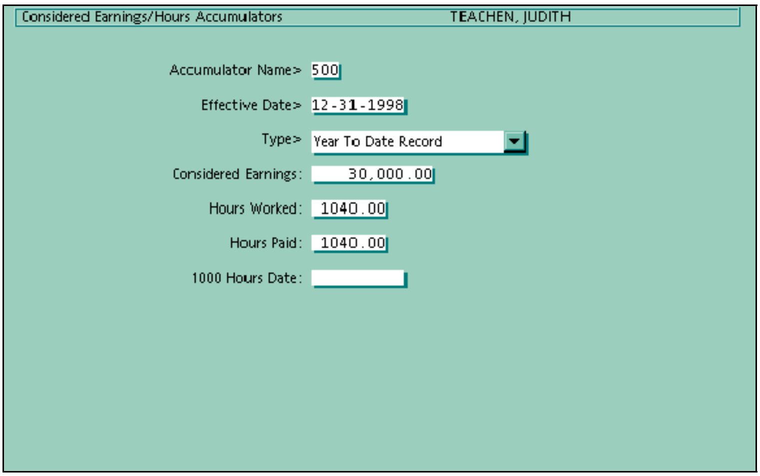
The accumulations are stored in the Organization 991111. The employee's social security/insurance number (without dashes) is used instead of the employee identifier in the key to the record. Each employee for whom plan-specific accumulations are stored will have one year-to-date accumulation as well as one or more period accumulations.

You may view the year-to-date and detail accumulations for an employee in your production company using the Considered Earnings/Hours Accumulators form (60-SCR) for plan-specific accumulators. If prior-year accumulations have been retained, they may also be accessed on this form.

In the following example from Acme Manufacturing, the Considered Earnings/Hours Accumulators form (60-SCR) shows Judith Teachen's first quarterly detail record. It contains the quarterly accumulations that are added to the year-to-date record:



The following example shows Judith Teachen's year-to-date considered earnings and hours information as it might look at the end of the second quarter, assuming that each quarter had 15,000 in earnings and 520 hours worked and paid:



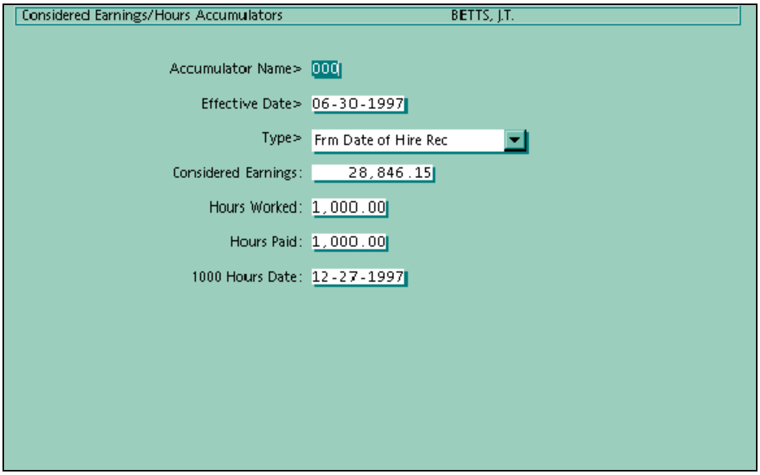
From Date of Hire accumulations

When the 1,000-hour limit has been reached in a From Date of Hire accumulator, all accumulations stop and the date on which the limit was reached is stored with the accumulation. There will be only one occurrence of the From Date of Hire accumulation record for each employee.

You may view the From Date of Hire accumulations for an employee using the Considered Earnings/Hours Accumulators form (60-SCR). It contains an accumulation of earnings in the Considered Earnings text box starting from the date of hire until the date on which the Hours Worked text box reaches 1,000 hours.

The effective date on the accumulation record is the employee's employment date. The date on which the Hours Worked text box reached 1,000 hours is displayed in the 1000 Hours Date text box.

In the following example from Acme Manufacturing, an employee hired on June 30, 1997 reached the 1,000-hour limit on December 27 of the same year. No further accumulations will occur on this employee's record.



See also:

- Viewing prior-year employee accumulator information ***(on page 270)***

For detailed directions on viewing prior-year employee accumulator information.

Backloading and updating employee accumulator information

If some employees have met earnings and hours requirements in the year(s) prior to conversion or if you need to capture data from a third party, you may need to backload the employee CE/H data. This manual entry of historical data can be done using the Considered Earnings/Hours Accumulators form (60-SCR). You may want to process large groups of employees by using the Batch Transaction Layout report (BATCHL) and then batch loading the accumulator information.

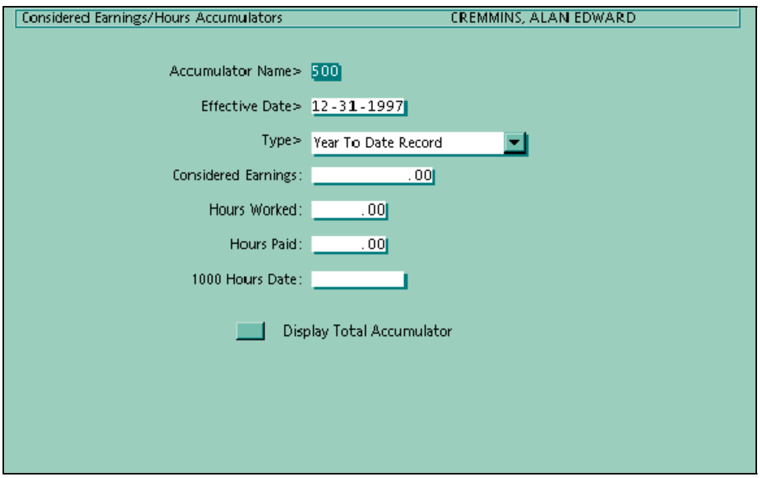
☞ *Refer to* **Batch Loading of Benefits Forms** *(on page 917) for information on batch loading.*

☞ *Refer to the Technical Administration documentation for more information on data conversion and loads.*

Backloading process

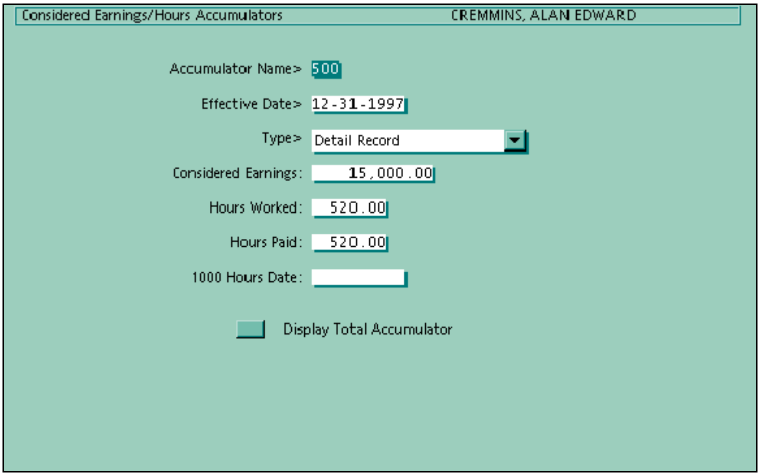
When you first access the Considered Earnings/Hours Accumulators form (60-SCR) before any earnings and hours have been accumulated, you need to create a year-to-date record with zero balances in the text boxes. This record acts as an empty accumulator into which each period's earnings and hours will be added.

The following record displays the backload year-to-date record for Alan Cremmins at Acme Manufacturing. It has no amounts in the earnings and hours text boxes so that these text boxes can be used as accumulators for the detail records.



You then enter the detail records in ascending date order. For example, enter quarterly accumulation records in the sequence March 31, June 30, September 30, and December 31, dates are entered in MM-DD format (US and Canada) or DD-MM (elsewhere). Each record adds the entered Considered Earnings and Hours text boxes to the appropriate plan year-end record text boxes.

The following is the first detail record for Alan Cremmins at Acme Manufacturing. It contains the first quarterly accumulations:



See also:

- Initializing or backloading employee accumulator information ***(on page 265)***

For detailed directions on backloading employee accumulators.

Adjusting existing records

If you want to correct a detail record, enter the new values, not a net change amount, in the Considered Earnings, Hours Worked, or Hours Paid text boxes. The old values are automatically subtracted and the new values are added to the year-to-date accumulator record.

See also:

- Correcting employee accumulator detail information ***(on page 268)***

For detailed directions on correcting employee accumulator detail.

FICA accumulators

In addition to Considered Earnings/Hours accumulators, Benefits Administration maintains FICA accumulators. These are mostly of use to those customers who are using Payroll Administration, which uses the Considered Earnings/Hours Accumulators (CONSID) program to automatically calculate FICA-HI and FICA-OASDI accumulators. The system does allow you to manually adjust these figures if necessary.

See also:

- Correcting FICA-HI Accumulator Data ***(on page 272)***

For detailed directions on correcting FICA-HI Accumulator Data.

- Correcting FICA-OASDI Accumulator Data ***(on page 274)***
  For detailed directions on correcting FICA-OASDI Accumulator Data.

Purging accumulators

The Considered Earnings/Hours Accumulators (CONSID) program, which is typically run immediately following a payrun, updates employees HED accumulators and stores the record in Organization 991111, where all historical records are stored. To delete old accumulators you may run the Considered Earnings/Hours Accumulators Audit report (CP-RPT). You have the option to delete a single accumulator or all accumulators in Organization 991111. This program will generate an audit report and purge accumulator records prior to a specified date. You may also generate an audit report without purging the accumulator records.

☞ *Refer to the* **Report Quick Reference** *(on page 615) for a sample of the Considered Earnings/Hours Accumulators Audit report (CP-RPT) and the parameters used to define it.*

Considered earnings/hours reports

The following chart lists useful reports for documenting CE/H accumulator data.

Report	Usage
Considered Earnings/ Hours Accumulators Definition (9O-RPT)	Use this report to review the entries on the Considered Earnings/Hours Accumulators Definition form (TO-SCR).
Considered Earnings/Hours Accumulator Earnings Definition (4O-RPT)	Use this report to analyze which buckets you have defined to be activated in each accumulator.
Considered Earnings/Hours Earnings Buckets (4N-RPT)	Use this report to analyze and verify which HEDs are associated with which accumulator bucket and whether HED hours are added to hours worked, added to hours paid, added to both, or added to neither.
Employees With Less Than 1000 Hours in Plan Year (4M-RPT)	Use this report to track employees who have not met the required 1,000 hours in the plan year.

Inquiry form for viewing plan rules

The following form can be used to view plan rules.

Form	Description
Considered Hours/Earnings Accumulators Table form (TOISCR)	Reflects data from the Considered Earnings/Hours Accumulators Definition form (TO-SCR).

Detailed Directions

This section provides detailed directions on completing a business task.

Tasks

Completing the Guided Practice

In the Guided Practice for this section you will assign accumulator buckets to eight HEDs. You will then activate accumulator buckets for accumulator A01 and assign that accumulator to Benefits Plan 505. Since accumulator information already exists on Organization 999999, you will be modifying some existing records rather than creating new ones. Specific entries for processing the accumulator information are contained in the final sample worksheet in the task 'Completing an accumulator design worksheet'.

You will also backload accumulator information for employee 6005, correct a detail record for the same employee, and then view the prior-year accumulation you entered.

Completing an accumulator design worksheet

Following is a suggested seven-step worksheet approach to establishing plan-specific CE/H accumulators for benefits plans:

Note: *There are no Guided Practices for the steps in this task. An example of an updated worksheet follows the instructions for each step.*

1. List all of your earning HEDs in the first column

Note: *List the HED for 'Overtime' twice, once for the straight-time portion and once for the premium portion. This gives you the opportunity to accumulate both the straight-time and premium portions of overtime into an accumulator or to accumulate only the straight-time portion.*

HED Description and number					
Regular Pay (001)					
Straight Overtime (003)					
Premium Overtime (003)					
Bonus (005)					
Sick Pay (006)					
Vacation Pay (008)					
Holiday Pay (009)					
Commissions (023)					

2. List the benefits plans that require CE/H accumulators

Write in each deferred benefits plan identifier in the horizontal row adjacent to the HED numbers.

HED Description and number	Plan 501	Plan 502	Plan 505	Plan 509	Plan 510
Regular Pay (001)					
Straight Overtime (003)					
Premium Overtime (003)					
Bonus (005)					
Sick Pay (006)					
Vacation Pay (008)					
Holiday Pay (009)					
Commissions (023)					

3. List the required frequency of the accumulator for each benefits plan

The allowed frequencies are monthly (M), quarterly (Q), and annually (A). Some plans require a specific frequency for accumulation, while other frequencies may be selected based on space requirements of your system. Keep in mind that the accumulator will generate a year-to-date record for each of these frequencies, plus 12 detail records for the monthly frequency or four detail records for the quarterly frequency.

Frequency	**M**	**A**	**Q**	**Q**	**M**
HED Description and number	Plan 501	Plan 502	Plan 505	Plan 509	Plan 510
Regular Pay (001)					
Straight Overtime (003)					
Premium Overtime (003)					

Frequency	**M**	**A**	**Q**	**Q**	**M**
Bonus (005)					
Sick Pay (006)					
Vacation Pay (008)					
Holiday Pay (009)					
Commissions (023)					

4. Determine which HEDs apply to the considered earnings of each plan

Using your plan document's considered earnings definition, analyze each HED (one at a time) to define which of your plans must have an HED's earnings included in its considered earnings. Mark the box under each plan that applies using an 'X' or checkmark. Continue until you have analyzed all HEDs. If you find that one of the HEDs does not apply to any of the plans, draw a line through the HED so it will not inadvertently be included in an accumulator.

Frequency	**M**	**A**	**Q**	**Q**	**M**
HED Description and number	**Plan 501**	**Pla n 502**	**Pla n 505**	**Pla n 509**	**Plan 510**
Regular Pay (001)	X	X	X	X	X
Straight Overtime (003)	X		X		X
Premium Overtime (003)	X		X		X
Bonus (005)	X	X	X	X	X
Sick Pay (006)	X	X	X		X
Vacation Pay (008)			X		
Holiday Pay (009)	X	X	X		X
Commissions (023)			X		

5. Determine how the hours are to be accumulated

Using the HED Hours Added option list (BA46), select a value for each HED based on how you want the hours to be accumulated. The options are displayed in the legend below the sample worksheet. Option '0' (zero) applies to earnings paid that do not have associated hours, such as bonus or commission.

Frequency	M	A	Q	Q	M	
HED Description and number	Plan 501	Plan 502	Plan 505	Plan 509	Plan 510	**Hrs Wkd/Pd***
Regular Pay (001)	X	X	X	X	X	3
Straight Overtime (003)	X		X		X	3
Premium Overtime (003)	X		X		X	0

Frequency	M	A	Q	Q	M	
Bonus (005)	X	X	X	X	X	0
Sick Pay (006)	X	X	X		X	2
Vacation Pay (008)			X			2
Holiday Pay (009)	X	X	X		X	2
Commissions (023)			X			0

***0** = Earnings only, **1** = Earnings/hours wkd, **2** = Earnings/hours pd, **3** = Earnings/hours wkd/pd.

6. Assign each HED a CE/H accumulation bucket

There are 36 accumulation buckets available to the CE/H accumulation process. The 36 buckets are identified with a one-position option: '0' through '9' and 'A' through 'Z'.

There are two reserved buckets: '0' (zero) and '1'. You must assign bucket '1' to all overtime earnings (A8 Category 01). The '0' (zero) bucket will not be assigned to an earnings. It is used only as a reminder on the worksheet if you want the premium portion of overtime added into a CE/H accumulator on the Considered Earnings/Hours Accumulator Definition form (TO-SCR). You may assign the remaining buckets however you choose.

Frequency	M	A	Q	Q	M		
HED Description and number	**Plan 501**	**Plan 502**	**Plan 505**	**Plan 509**	**Plan 510**	**Hrs Wkd/Pd***	**Accum bucket**
Regular Pay (001)	X	X	X	X	X	3	R
Straight Overtime (003)	X		X		X	3	1
Premium Overtime (003)	X		X		X	0	0
Bonus (005)	X	X	X	X	X	0	B
Sick Pay (006)	X	X	X		X	2	S
Vacation Pay (008)			X			2	V
Holiday Pay (009)	X	X	X		X	2	H
Commissions (023)			X			0	C

***0** = Earnings only, **1** = Earnings/hours wkd, **2** = Earnings/hours pd, **3** = Earnings/hours wkd/pd.

7. Assign accumulator names

Assign a three-character accumulator name to be associated with each unique plan definition. Then look for plans that have the same CE/H earnings, hours worked/hours paid, and frequency definition. Assign the same identifier to any duplicates.

Accumulator name	**A05**	**A02**	**A01**	**A03**	**A05**		
Frequency	M	A	Q	Q	M		
HED Description and number	Plan 501	Plan 502	Plan 505	Plan 509	Plan 510	Hrs Wkd/Pd*	**Accum bucket**
Regular Pay (001)						3	R
Straight Overtime (003)						3	1
Premium Overtime (003)						0	0
Bonus (005)						0	B
Sick Pay (006)						2	S
Vacation Pay (008)						2	V
Holiday Pay (009)						2	H
Commissions (023)						0	C

*__0__ = Earnings only, **1** = Earnings/hours wkd, **2** = Earnings/hours pd, **3** = Earnings/hours wkd/pd.

For a description of the design worksheet concept.

Assigning accumulator buckets to earning HEDs

To assign accumulator buckets to earning HEDs using the Company HED Benefits CE/H Accumulation Definition form (A83SCR), follow these steps:

1. Access the Company HED Benefits CE/H Accumulation Definition form (A83SCR)

Access this form by making the following selections from the Navigator:

Component: Benefit Plan Setup and Maintenance
Process: Considered Earnings/Hours Accumulators
Task: HED Definition

For practice, access the Company HED Benefits CE/H Accumulation Definition form (A83SCR) for Organization 999999 and HED 001.

2. Enter the HED Number

Type the three-digit number assigned to the HED for which earnings/hours are being accumulated. Earnings HEDs are assigned numbers from 001 to 499.

For practice, verify that you are displaying HED 001.

3. Enter the Earnings Bucket

Enter the numeric or alphabetic designation that determines which of 36 buckets will be used to accumulate this HED for CE/H processing.

Bucket '0' (zero) is reserved for the premium portion of overtime earnings. Bucket '1' is assigned to all overtime earnings. Earnings with a category option of 'Overtime' (01) must be assigned to a bucket for proper accumulation.

For practice, type the entry for HED 001 from the Accum bucket column of the final sample worksheet in the task 'Completing an accumulator design worksheet'.

4. Select the Accumulation

Select an option from the HED Hours Added option list (BA46) that specifies whether hours are to be added to hours worked, hours paid, both, or neither.

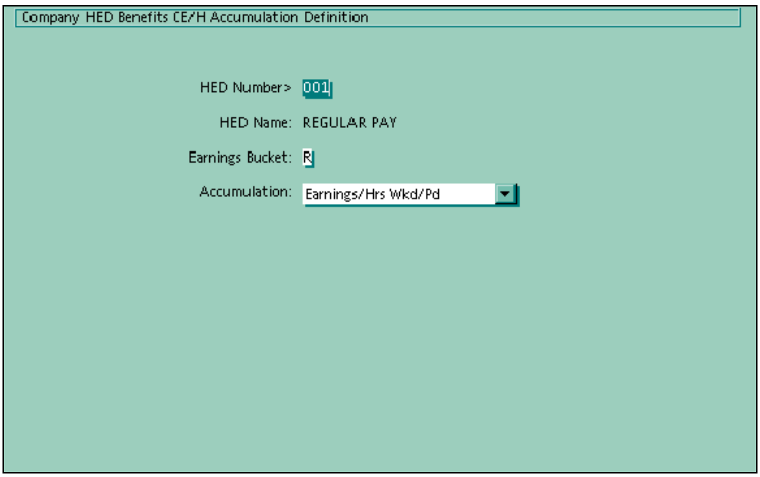
For practice, select the entry for HED 001 as shown in the Hrs Wkd/Pd column of the final sample worksheet in the task 'Completing an accumulator design worksheet'.

5. Click Save or press Enter

The Company HED Benefits CE/H Accumulation Definition form (A83SCR) defines the CE/H bucket into which the HED is to add for purposes of accumulating considered earnings and hours worked/hours paid for Benefits Administration.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



To complete this practice, repeat these steps for each of the remaining HEDs on the final sample worksheet in the task 'Completing an accumulator design worksheet'. Do not make the second entry for the Premium Overtime (003).

See also:

- Accumulator setup ***(on page 242)***

For more information about assigning accumulator buckets to HEDs.

Activating accumulator buckets

To activate accumulator buckets using the Considered Earnings/Hours Accumulators Definition form (TO-SCR), follow these steps:

1. Access the Considered Earnings/Hours Accumulators Definition form (TO-SCR)

Access this form by making the following selections from the Navigator:

Component:	Benefit Plan Setup and Maintenance
Process:	Considered Earnings/Hours Accumulators
Task:	Considered Earnings/Hours

Note: *To avoid copying preexisting information, you may clear the form by using the Clear button on the toolbar.*

For practice, access the Considered Earnings/Hours Accumulators Definition form (TO-SCR) for Organization 999999 and clear the form.

2. Enter the Accumulator ID

Enter the three-character name of the accumulator that is being defined. '000' is the predefined accumulator name for the From Date of Hire accumulator.

For practice, type 'A01'.

3. Enter the Effective Date

Enter the effective date of the table in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For practice, type '01-01-1925'.

4. Select the Frequency

Select an indicator that represents the number of detail CE/H accumulators that will be created for the CE/H accumulator named. Options for this list are provided by the Considered Earnings option list (BA25).

If the frequency is 'Monthly Accumulators', there will be 12 detail records. If the frequency is 'Quarterly Accum', there will be four detail records. If the frequency is 'Annual Accumulators', there will be one detail record.

For practice, select 'Quarterly Accum'.

5. Select one or more Buckets

Review the design worksheet and select each bucket for which HED earnings/hours are to be accumulated.

Bucket '0' (zero) indicates whether the premium portion of overtime earnings is to be included in the CE/H accumulator.

Bucket '1' indicates whether overtime straight-time earnings and hours are to be included in the CE/H accumulator.

When establishing an accumulator on this table, if you want both the premium and straight-time portions of overtime added to the accumulator, select both the '0' (zero) and '1' buckets. If you only want the straight-time portion, select only bucket '1'.

For practice, activate the accumulator buckets for which there are HEDs selected for accumulator A01 on the final sample worksheet in the task 'Completing an accumulator design worksheet'.

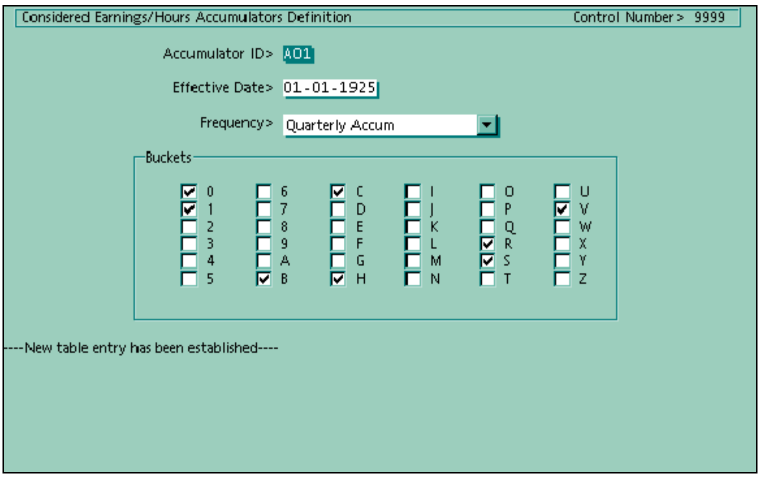
6. Click Save or press Enter

The Considered Earnings/Hours Accumulator Definition form (TO-SCR) is created for the specified accumulator and the following message is displayed:

'—New table entry has been established—'

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



See also:

- Accumulator setup ***(on page 242)***

For more information about defining an earnings/hours accumulator.

Assigning an accumulator to an existing benefits plan

To assign an accumulator to an existing benefits plan using the Benefit Plan Rules form (TK-SCR), follow these steps:

Note: The From Date of Hire accumulator (000) does not need to be assigned to benefits plans.

1. Access the Benefit Plan Rules form (TK-SCR)

Access this form by making the following selections from the Navigator:

Component: Benefit Plan Setup and Maintenance
Process: Welfare Plan
Task: Plan Name and Basic Rules

Note: If the form is not already displaying the record you wish to modify, click the Selections button on the toolbar and select the occurrence you want to display.

For practice, access the Benefit Plan Rules form (TK-SCR) for Organization 999999 and Plan 505.

2. Enter the Accum Name

Enter the three-character CE/H accumulator that contains considered earnings/hours for this plan.

For practice, type 'A01' to replace the current entry.

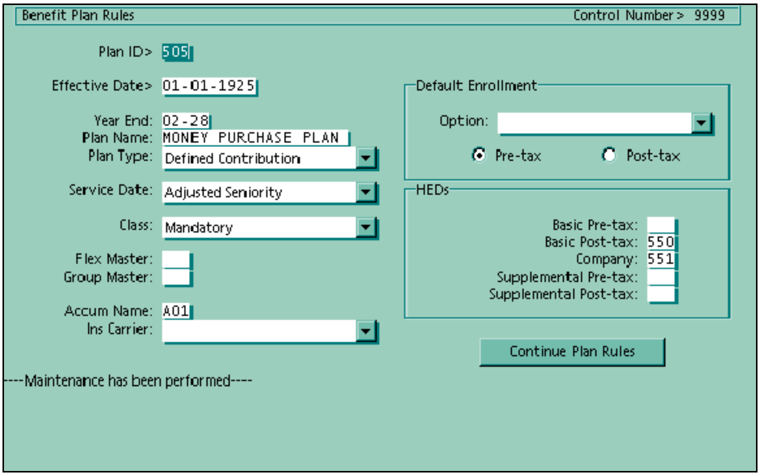
3. Click Save or press Enter

The Benefit Plan Rules form (TK-SCR) is updated to include a CE/H accumulator name and the following message is displayed:

'—Maintenance has been performed—'

For practice, click Save or press Enter

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



See also:

- Accumulator setup ***(on page 242)***

For more information about assigning an accumulator to a benefits plan.

Initializing or backloading employee accumulator information

To initialize or manually enter employee prior accumulator information using the Considered Earnings/Hours Accumulators form (60-SCR), follow these steps:

Note: *To initialize a plan-specific employee accumulation record, create only a year-to-date record for each applicable accumulator. To backload accumulator information, create both the year-to-date and details record(s) for each applicable accumulator.*

1. Access the Considered Earnings/Hours Accumulators form (60-SCR)

Access this form by making the following selections from the Navigator:

Component:	Deferred Plans Enrollment/Maintenance
Process:	Service, Vesting and Retirement
Task:	Considered Earnings/Hours Accumulations

The Help form for the Considered Earnings/Hours Accumulators form (60-SCR) is displayed. Enter the employee-specific information and execute the form.

For practice, access the Considered Earnings/Hours Accumulators form (60-SCR) for Organization 999999 and employee 6005.

2. Enter the Accumulator Name

Enter the three-character name of the considered earnings/hours accumulator being backloaded.

For practice, type 'A01'.

3. Enter the Effective Date

Enter the effective date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere). This is the date of the period end through which hours and earnings are recorded on the accumulator.

For a year-to-date record, this date must be the last day of the plan year.

For a detail record, this date must represent the end of the period for which you are recording earnings/hours. For example, if the accumulator is scheduled to accumulate earnings/hours on a quarterly basis, this text box must contain a date that is a quarter end. Periods must be entered sequentially by date.

For practice, type a date representing December 31 of last year, for example, '12-31-1997'(US and Canada) or '31-12-1997' (elsewhere).

4. Select the Type

Select an option from the CE/H Accumulated Record Type option list (BA23) that identifies whether the CE/H record is a 'Detail Record', 'Frm Date of Hire Rec', or 'Year To Date Record'.

The accumulator's plan year-end record (Type = Year To Date Record) must be set up first, with zero balances in the Considered Earnings and Hours text boxes.

Detail records (Type = Detail Record) are then entered in ascending date order—in other words, the earliest period for the year followed by the next period—until all periods are entered. Each detail record adds the amounts in the Considered Earnings and Hours text boxes to the appropriate plan year-end record text boxes.

For practice, select 'Year To Date Record'.

5. Enter the Considered Earnings

Enter the up-to-10-position total earnings for the period in the format nnnnnnn.nn. This will be a monthly, quarterly, or annual period amount as specified on the accumulator's Considered Earnings/Hours Accumulators Definition form (TO-SCR).

If you selected 'Year To Date Record' in the Type list box, this text box must contain zeros.

If you selected 'Detail Record' in the Type list box, this text box contains the period's considered earnings.

For practice, type '00' because this is a year-to-date record.

6. Enter the Hours Worked

Enter the up-to-eight-position total hours worked for the period, using the format nnnnn.nn. This will be a monthly, quarterly, or annual period amount as specified on the accumulator's Considered Earnings/Hours Accumulators Definition form (TO-SCR).

If you selected 'Year To Date Record' in the Type list box, this text box must contain zeros.

If you selected 'Detail Record' in the Type list box, this text box contains the period's hours worked.

For practice, type '00' because this is a year-to-date record.

7. Enter the Hours Paid

Enter the up-to-eight-position total hours paid for the period, using the format nnnnn.nn. This will be a monthly, quarterly, or annual period amount as specified on the accumulator's Considered Earnings/Hours Accumulators Definition form (TO-SCR).

If you selected 'Year To Date Record' in the Type list box, this text box must contain zeros.

If you selected 'Detail Record' in the Type list box, this text box contains the period's hours paid.

For practice, type '00' because this is a year-to-date record.

8. Enter the 1000 Hours Date (optional)

Enter the date on which the current plan year Considered Hours Worked text box reached 1,000 hours. The format is MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

This text box is system filled by the Considered Earnings/Hours Accumulators program (CONSID) or it may be entered manually.

This date is found only on records that contain 'Frm Date of Hire Rec' in the Type list box.

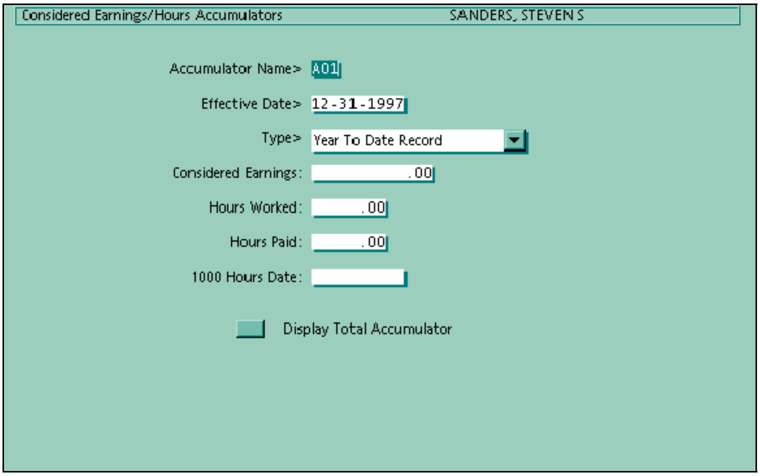
For practice, leave this text box blank.

9. Click Save or press Enter

The Considered Earnings/Hours Accumulators form (60-SCR) contains manually entered accumulated earnings/hours.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



To complete this practice, enter the four quarterly detail records in date sequence for the same employee. Use the values that follow:

Effective Date	**Type**	**Considered Earnings**	**Hours Worked**	**Hours Paid**
March-31-1997	Detail Record	12,000.00	520.00	520.00
June-30-1997	Detail Record	11,000.00	480.00	520.00
September-30-1997	Detail Record	13,000.00	520.00	520.00
December-31-1997	Detail Record	12,500.00	520.00	520.00

For more information about backloading employee accumulations.

Correcting employee accumulator detail information

To adjust employee accumulator detail information using the Considered Earnings/Hours Accumulators form (60-SCR), follow these steps:

1. Access the Considered Earnings/Hours Accumulators form (60-SCR)

Access this form by making the following selections from the Navigator:

Component: Deferred Plans Enrollment/Maintenance
Process: Service, Vesting and Retirement
Task: Considered Earnings/Hours Accumulations

The Help form for the Considered Earnings/Hours Accumulators form (60-SCR) is displayed. Enter the employee-specific information and execute the form.

Note: *If the form is not already displaying the record you wish to modify, click the Selections button on the toolbar and select the occurrence you want to display.*

For practice, access the Considered Earnings/Hours Accumulators form (60-SCR) for Organization 999999 and the second-quarter detail record dated 06-30-1997 (US and Canada) for employee 6005 or 30-06-1997 (elsewhere).

To correct a detail record, enter the new values (not a net change amount) in the following three text boxes. The old values are automatically subtracted and the new values are added to the year-end accumulator record.

2. Enter the replacement Considered Earnings

Enter the new total earnings accumulated for the period.

For practice, type '12000.00'.

3. Enter the replacement Hours Worked

Enter the new total hours worked for the period.

For practice, type '440.00'.

4. Enter the replacement Hours Paid

Enter the new total hours paid for the period.

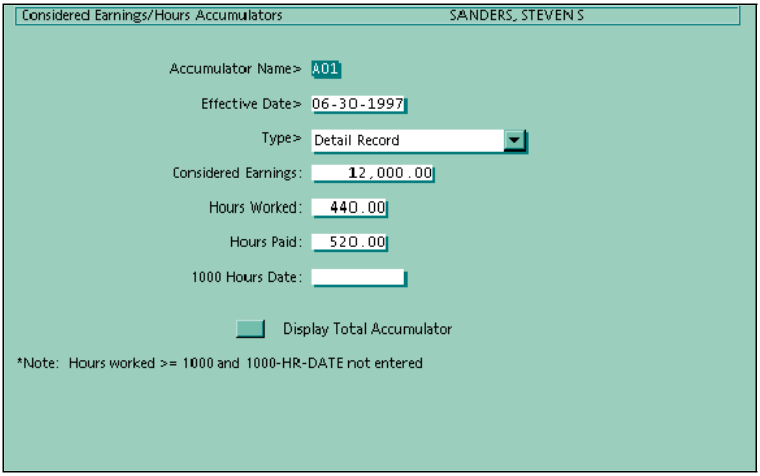
For practice, make no replacement entry in this text box.

5. Click Save or press Enter

The Considered Earnings/Hours Accumulators form (60-SCR) displays the updated amounts/hours for the employee. The year-to-date accumulator record reflects the change in earnings and hours.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



See also:

- Backloading and updating employee accumulator information ***(on page 252)***

For more information about updating employee accumulations.

Viewing prior-year employee accumulator information

To view prior-year employee accumulator information using the Considered Earnings/Hours Accumulators form (60-SCR), follow these steps:

1. Access the Considered Earnings/Hours Accumulators form (60-SCR)

Access this form by making the following selections from the Navigator:

Component: Deferred Plans Enrollment/Maintenance
Process: Service, Vesting and Retirement
Task: Considered Earnings/Hours Accumulations

The Help form for the Considered Earnings/Hours Accumulators form (60-SCR) is displayed.

For practice, access the Considered Earnings/Hours Accumulators form (60-SCR) for Organization 999999.

2. Enter the CONTROL 1-2 (optional)

If this text box is not already displaying the correct organization, enter the organization you wish to access.

For practice, make no entry in this text box.

3. Enter 'I'

If you wish to view the resulting form in Display Mode, type 'I' in this text box.

For practice, type 'I'.

4. Enter EMPL # or SSN or NAME

Enter information into one of the three search text boxes to locate the employee's record:

- **EMPL #**—enter the employee's exact employee number.
- **SSN**—enter the employee's Social Security Number (for USA employees).
- **NAME**—enter a partial name to perform a phonetic search or the employee's full name in the format 'Lastname, Firstname' for an exact match.

For practice, type '6005' in the EMPL # text box.

5. Enter the Accumulator Name (optional)

Enter the three-character accumulator name to search for CE/H records for a specific accumulator.

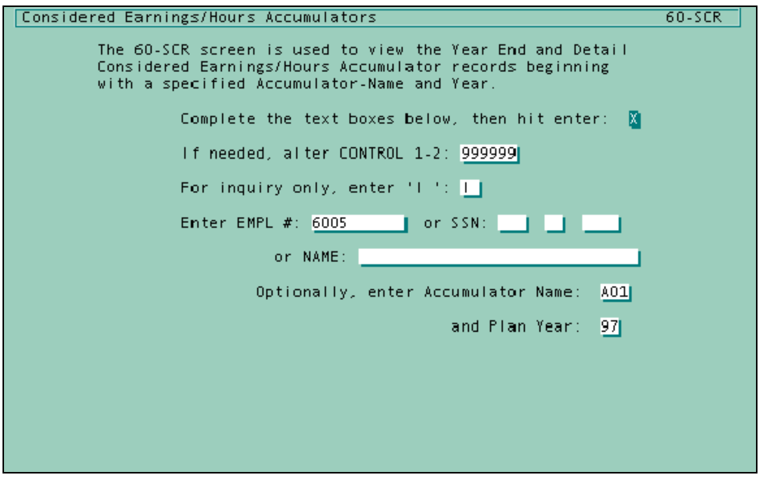
For practice, type 'A01'.

6. Enter the Plan Year (optional)

Enter the accumulator year in the format YY to search for CE/H records for a specific year.

For practice, type '97'.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



7. Press Enter

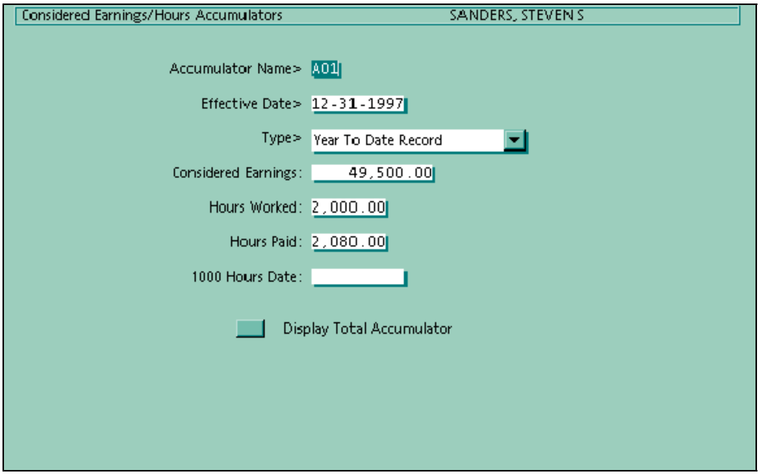
If an exact match is found, the form is executed for that employee.

If there are several possibilities, the LOOKUP program will generate a list of employees from which to choose. The program is then executed for the selected employee.

When searching by Social Security Number (SSN) and when the same value exists on multiple Organizations, a list is displayed from which to choose the desired Social Security Number/Organization.

For practice, press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



See also:

- The accumulation process and resulting employee records ***(on page 249)***

For more information about viewing prior-year employee accumulations.

Correcting FICA-HI Accumulator Data

To correct FICA-HI Accumulator data, follow these steps:

1. Access the Considered Earnings/Hours FICA Accumulators for FICA Tax 103 form (602SCR)

Access this form by making the following selection from the Navigator:

Component: Health/Welfare Plan Enrollment/Maint
Process: Eligibility and Enrollment
Task: FICA HI E/H

For practice, access the Considered Earnings/Hours FICA Accumulators for FICA Tax 103 form (602SCR) for employee 3003 in the '999999' organization.

2. Enter the Accumulator Date

This is the date of the period end through which hours and earnings are recorded on the Accumulator. Enter the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For example, if the Accumulator is scheduled to accumulate earnings X hours on a quarterly basis, the ACCUMULATOR-DATE field contains a date which is a quarter end.

For practice, type '12-31-1998' (US and Canada) or '31-12-1998' (elsewhere).

3. Enter the YTD-FICA

This is the Total FICA considered earnings YTD.

The YTD-FICA field value is the sum of the 1ST- QUARTER-FICA, 2ND-QUARTER-FICA, 3RD-QUARTER- FICA and 4TH-QUARTER-FICA field values.

For practice, type '32,000.00'.

4. 1st-Quarter FICA

This is the Total FICA considered earnings for the 1st quarter of the calendar year.

Any manual adjustments made to this field must also be made to the YTD-FICA field value.

For practice, type '8,000.00'.

5. 2nd-Quarter FICA

This is the Total FICA considered earnings for the 2nd quarter of the calendar year.

Any manual adjustments made to this field must also be made to the YTD-FICA field value.

For practice, type '8,000.00'.

6. 3rd-Quarter FICA

This is the Total FICA considered earnings for the 3rd quarter of the calendar year.

Any manual adjustments made to this field must also be made to the YTD-FICA field value.

For practice, type '8,000.00'.

7. 4th-Quarter FICA

This is the Total FICA considered earnings for the 4th quarter of the calendar year.

Any manual adjustments made to this field must also be made to the YTD-FICA field value.

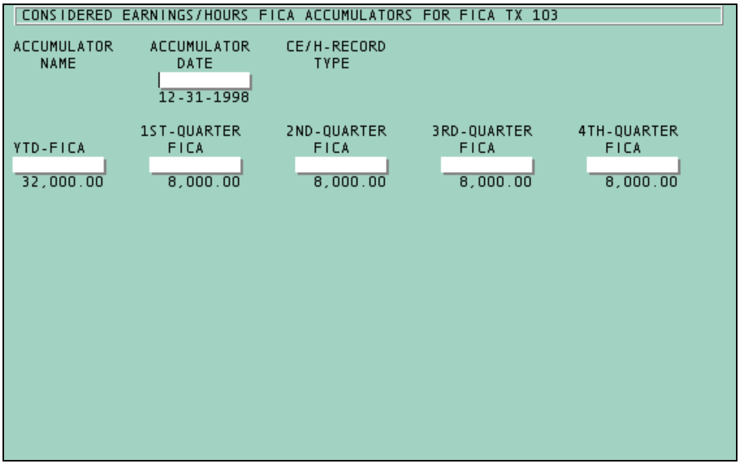
For practice, type '8,000.00'.

8. Click Save or press Enter

FICA-HI Accumulator data is now corrected.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



CONSIDERED EARNINGS/HOURS FICA ACCUMULATORS FOR FICA TX 103

ACCUMULATOR NAME	ACCUMULATOR DATE	CE/H-RECORD TYPE		
	12-31-1998			
YTD-FICA	1ST-QUARTER FICA	2ND-QUARTER FICA	3RD-QUARTER FICA	4TH-QUARTER FICA
32,000.00	8,000.00	8,000.00	8,000.00	8,000.00

See also:

- Backloading and updating employee accumulator information ***(on page 252)***

For more information on adjusting Accumulations

Correcting FICA-OASDI Accumulator Data

To correct FICA-OASDI Accumulator data, follow these steps:

1. Access the Considered Earnings/Hours FICA Accumulators for FICA - OASDI form (602SCR)

Access this form by making the following selection from the Navigator:

Component: Health/Welfare Plan Enrollment/Maint
Process: Eligibility and Enrollment
Task: FICA OASDI E/H

For practice, access the Considered Earnings/Hours FICA Accumulators for FICA-OASDI form (602SCR) for employee 3003 in the '999999' organization.

2. Enter the Accumulator Date

This is the date of the period end through which hours and earnings are recorded on the Accumulator. Enter the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For example, if the Accumulator is scheduled to accumulate earnings X hours on a quarterly basis, the ACCUMULATOR-DATE field contains a date which is a quarter end.

For practice, type '12-31-1998' (US and Canada) or '31-12-1998' (elsewhere).

3. Enter the YTD-FICA

This is the Total FICA considered earnings YTD.

The YTD-FICA field value is the sum of the 1ST- QUARTER-FICA, 2ND-QUARTER-FICA, 3RD-QUARTER- FICA and 4TH-QUARTER-FICA field values.

For practice, type '32,000.00'.

4. Enter the 1st-Quarter FICA

This is the Total FICA considered earnings for the 1st quarter of the calendar year.

Any manual adjustments made to this field must also be made to the YTD-FICA field value.

For practice, type '8,000.00'.

5. Enter the 2nd-Quarter FICA

This is the Total FICA considered earnings for the 2nd quarter of the calendar year.

Any manual adjustments made to this field must also be made to the YTD-FICA field value.

For practice, type '8,000.00'.

6. Enter the 3rd-Quarter FICA

This is the Total FICA considered earnings for the 3rd quarter of the calendar year.

Any manual adjustments made to this field must also be made to the YTD-FICA field value.

For practice, type '8,000.00'.

7. Enter the 4th-Quarter FICA

This is the Total FICA considered earnings for the 4th quarter of the calendar year.

Any manual adjustments made to this field must also be made to the YTD-FICA field value.

For practice, type '8,000.00'.

8. Click Save or press Enter

FICA-OASDI Accumulator data is now corrected.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:

Review of Questions Answered

1. What are considered earnings/hours accumulators?
2. How are considered earnings/hours accumulators used?
3. What types of accumulators are available?
4. What tools are available for backloading employee earnings/hours accumulations?

PART 3

Enrollment

In This Section

CHAPTER 8

Enrolling Employees in Welfare Plans

In This Chapter

Introduction

Enrolling employees in welfare benefits plans is a year-round endeavor. Whether you are enrolling new hires one at a time or enrolling large groups of employees because of a corporate merger or reorganization, Benefits Administration can improve enrollment time through automatic benefits eligibility checking, record keeping, and the generation of payroll deductions.

Review this section carefully to determine how to effectively integrate the Benefits Administration component into your enrollment process.

Note: *If a welfare plan is part of a flex plan, employees may be enrolled into the flex plan, not directly into the welfare plan.*

☞ *Refer to* **Processing Annual Open Enrollments for Flex Plans** *(on page 351) and* **Processing Midyear Enrollments for Flex Plans** *(on page 393) for more information.*

Tasks

This section explains the following tasks:

- Entering benefits salary calculation information
- Verifying plan eligibility before enrollment (optional)
- Enrolling an employee in a welfare plan, including waiving a plan and overriding eligibility requirements
- Assigning dependents to a plan
- Assigning beneficiaries to a plan
- Viewing coverage and contribution amounts
- Displaying an employee's welfare plan deduction information
- Changing the generated deduction of an employee's welfare plan
- Entering a new deduction for a welfare plan

Prerequisites

Before you can enroll employees in welfare benefits plans, the following must be established for:

- Organizations
- Employees
- Welfare benefits plans

☞ *Refer* **Setting Up Welfare Plans** *(on page 53) for more information about establishing welfare plans.*

Questions answered

This section answers the following questions:

1. What two methods are provided for enrolling employees in welfare plans?
2. What information is needed to enroll an employee in a welfare plan?
3. What facilities are provided to override system-generated data?

4. What forms are created as a result of an enrollment?
5. What facilities are provided to verify enrollment information online?
6. What reports are available to track enrollments in welfare plans?

Overview of the enrollment process

To engineer an effective enrollment process, consider the following:

- What information needs to be included on the enrollment forms?
- Will the Human Resources or Benefits department perform the enrollment? What communication needs to take place between these departments?
- How will the enrollment procedures be documented?
- What role does the Benefits Administration component play in the enrollment process?

Enrollment forms

Although the Benefits Administration component does not produce enrollment forms for welfare benefits plans, you need to ensure that all required information for enrollments is included on the enrollment forms distributed to employees. You should review the plan documentation to ensure that all options (for example, employee only or family coverage) and information (for example, pricing for each option) are clearly spelled out on the forms.

Human Resources and Benefits departments

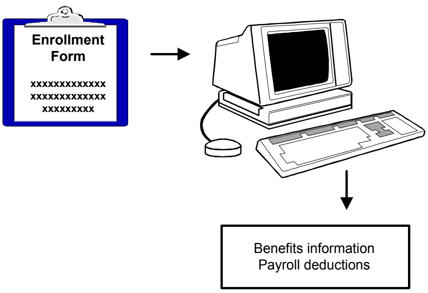
The Human Resources specialists and Benefits specialists must work closely together to determine how the enrollment process will be handled. In some organizations, the Human Resources department will hire an employee and then notify the Benefits department, which will then enroll the employee in any applicable benefits plans. In other organizations, the Human Resources department may choose to do both tasks. If the Human Resources department performs benefits enrollments as part of the new hire process, its personnel will require training on using the Benefits Administration component and must be given access to the benefits enrollment forms.

Procedure handbooks

You may find it helpful to document your enrollment process in a formal procedure handbook. This handbook explains what tasks should be completed, by whom, and how.

The role of Benefits Administration in the enrollment process

The Benefits Administration component captures an employee's benefits elections and, based on plan rules and hiring information, verifies plan eligibility. It then generates employee benefits information, including payroll deductions.



The generated benefits information provides a record of an employee's benefits elections and associated dependent and beneficiary information. The generated payroll deductions will be used as input to the payroll process.

☞ *Refer to* **Benefits/Payroll Interaction** *(on page 535) for more information on payroll deductions for benefits plans.*

Salary-based benefits plans

Some benefits plan's coverage or costs are based on employee salary information. For example, a life insurance plan may cover employees for one or two times their annual salary. Salary is recorded on the Salary Assignment/Changes form (40-SCR). If an employee's salary information changes because of an increase or change in position, the life insurance coverage also changes.

There are two situations where plan coverage and costs are not based on the current salary recorded on the Salary Assignment/Changes form (40-SCR). Some benefits plans calculate coverage and costs for the whole year based on an employee's salary as of a certain date or at the end of the previous year, so that a salary change will not affect coverage or costs during the plan year. Other plans, which have employees that receive multiple salaries for different positions concurrently, calculate coverage and costs based on a total annual salary. Salary information in either case would come from the Alternative Compensation Totals form (BACSCR). You must enter or calculate salary information prior to enrolling the employee in the plan.

As with all benefits plans, plans that use an employee's salary as of a certain date or total annual salary must be set up with rules, coverage, and contributions that reference the specific salary information.

☞ *Refer to* **Setting Up Welfare Plans** *(on page 53), for more information on defining plan rules and how coverage and contributions for a plan are calculated.*

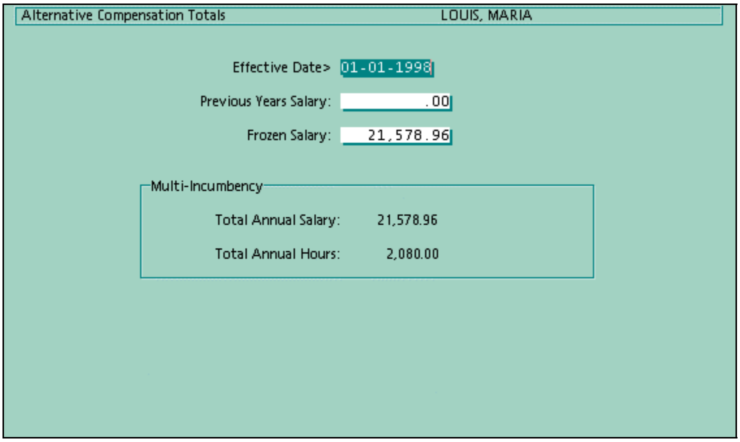
See also:

■ Entering benefits salary calculation information ***(on page 301)***
For detailed directions on entering benefits salary calculation information.

Static salary

For benefits plans that base coverage or costs on the previous year's salary or the salary as of a specified date, you must record this information on the Alternative Compensation Totals form (BACSCR). You can record this information in the Previous Years Salary or Frozen Salary text box.

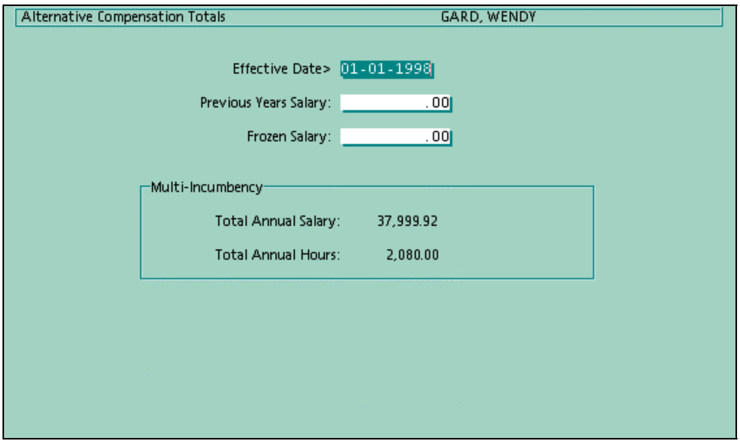
The following example shows Maria Louis's Frozen Salary as of 01-01-1998:



Multi-Incumbency

Position Administration enables organizations to assign multiple incumbencies to employees. Benefits plans coverage and costs can be based on an employee's total salary and hours. An Alternative Compensation Totals form (BACSCR) will automatically be created and the total salary and hours will be calculated when multiple incumbencies and salaries are assigned to an employee.

The following example shows the calculated Total Annual Salary and Hours for employee 3045, Wendy Gard, as of 01-01-1998:



Note: *To use the Total Annual Salary and Total Annual Hours, the Position Management Solution must be in use.*

☞ *Refer to Using Position Administration documentation for information on setting up and maintaining Incumbents in Positions.*

Plan eligibility verification

As part of your enrollment process, you can verify the plans for which employees are eligible before you actually enroll them in plans. You can do this online by using the Pending Plan Enrollment/De-Enrollment form (90-SCR) or by reviewing one of the plan eligibility reports.

When you enroll an employee using the Welfare Plan Enrollments/Changes form (55-SCR), the employee's eligibility for any welfare plan will automatically be checked. Plan eligibility is verified prior to actually enrolling employees for a variety of reasons, which are explained in the following section.

Process eligibility options

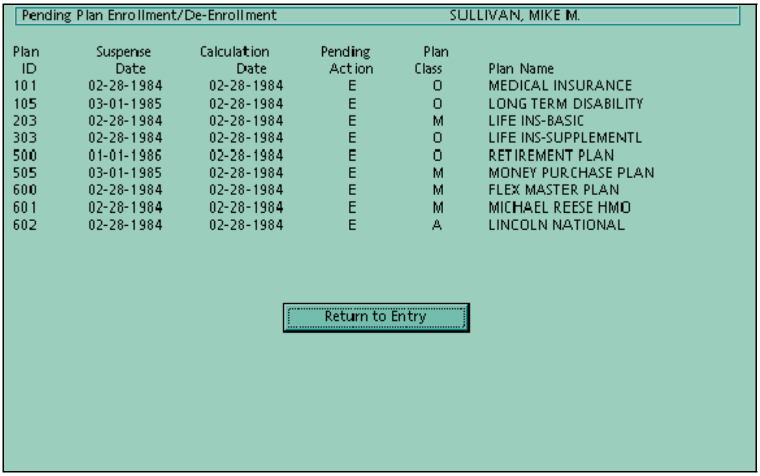
The reasons you might perform a plan eligibility check prior to actual enrollment correspond to the processing options available on the Pending Plan Enrollment/De-Enrollment form (90-SCR). This section explains the six processing options and discusses the impact of using each one.

Note: *The Pending Plan Enrollment/De-Enrollment form (90-SCR) does not process enrollments or de-enrollments. It is an informational form. Welfare plan enrollments and de-enrollments are processed on the Welfare Plan Enrollments/Changes form (55-SCR). The first time you use the Pending Plan Enrollment/De-Enrollment form (90-SCR) for an employee, select 'New Hire'.*

Option	Purpose
No Option *Default*	Use this option to view the pending eligibility and de-enrollment information for an employee as it currently exists on the employee's record.
Employee Recheck	Use this option to completely retest the employee's plan eligibility. This is usually done after an employee's master record has changed. This option deletes all pending eligibility segments before performing eligibility tests. This option creates a pending de-enrollment segment for any benefits plan for which the employee is enrolled but has lost eligibility. It also creates a pending enrollment segment for any benefits plan for which the employee is currently eligible but not enrolled.

Option	Purpose
Change in Status	Use this option after an employee's employment status has changed. For example, you might use this option when an employee changes from full time to part time or transfers to another company. This option creates a pending de-enrollment segment for any benefits plan for which the employee is enrolled but has lost eligibility. It also creates a pending enrollment segment, if one does not already exist, for any benefits plan for which the employee is currently eligible but not enrolled.
Rehire/Reinstate	This option checks existing plans to determine if the employee is currently participating in any plan. All future-dated plan shutdown segments are deleted (because plan shutdown did not occur prior to rehire). This option creates a pending de-enrollment segment for any benefits plan for which the employee is enrolled but has lost eligibility. It also creates a pending enrollment segment for any benefits plan for which the employee is currently eligible but not enrolled.
Return from Leave	Use this option when an employee returns from a leave of absence, disability, layoff, or labor walkout. This option creates a pending de-enrollment segment for any benefits plan for which the employee is enrolled, but has lost eligibility. It also creates a pending enrollment segment, if one does not already exist, for any benefits plan for which the employee is currently eligible but not enrolled. Any future-dated plan shutdown segments are deleted (because the shutdown did not occur prior to the employee's return).
New Hire	Use this option after an employee's basic information has been added, but before the employee is enrolled in any plan. Eligibility is based on the service date selected on the Benefit Plan Rules table (TK-SCR) for the plans. A pending enrollment segment is created for any benefits plan for which the employee is eligible but not participating.

Following is the first form of eligible plans for employee Mike Sullivan using the 'No Option *Default*' option:



Pending Plan Enrollment/De-Enrollment SULLIVAN, MIKE M.

Plan ID	Suspense Date	Calculation Date	Pending Action	Plan Class	Plan Name
101	02-28-1984	02-28-1984	E	O	MEDICAL INSURANCE
105	03-01-1985	02-28-1984	E	O	LONG TERM DISABILITY
203	02-28-1984	02-28-1984	E	M	LIFE INS-BASIC
303	02-28-1984	02-28-1984	E	O	LIFE INS-SUPPLEMENTL
500	01-01-1986	02-28-1984	E	O	RETIREMENT PLAN
505	03-01-1985	02-28-1984	E	M	MONEY PURCHASE PLAN
600	02-28-1984	02-28-1984	E	M	FLEX MASTER PLAN
601	02-28-1984	02-28-1984	E	M	MICHAEL REESE HMO
602	02-28-1984	02-28-1984	E	A	LINCOLN NATIONAL

Return to Entry

The following information is displayed for each plan:

- **Plan ID**.
- **Suspense Date**—the date on which the employee is eligible to participate in the plan.
- **Calculation Date**—the date on which the calculation was based.
- **Pending Action**—an 'E' will be displayed if the employee is eligible for enrollment; a 'D' will be displayed if the employee is to be de-enrolled from a plan.
- **Plan Class**—the class defined on the Benefit Plan Rules form (TK-SCR)—for example, 'O' for optional.
- **Plan Name**.

Processing future-dated new hires

By entering a Future Hire Date, you can use the Pending Plan Enrollment/De-Enrollment form (90-SCR) to process a New Hire option as of the date entered, even though the employee has not been actively hired on the current date.

Tracking employee plan eligibility

The following chart lists reports you can use to track employee eligibility for welfare benefits plans. These reports use information entered on the Pending Plan Enrollment/De-Enrollment form (90-SCR):

Report	Description
Enrollable Employees by Plan (4E-RPT)	Lists by plan the employees who are currently not participating in a plan for which they are eligible.
Enrollable Employees By Employee (4F-RPT)	Lists by employee all plans for which each employee is currently eligible but not participating.
Suspense Segment Audit Listing (4G-RPT)	Lists all the suspense segments on the file by plan ID.

☞ *Refer to the* **Report Quick Reference** *(on page 615) for samples of these reports and the parameters used to define these reports.*

See also:

- Verifying plan eligibility before enrollment (optional) ***(on page 302)***

For detailed directions on verifying plan eligibility before enrollment.

Apply the Concept

Will you verify the plans for which employees are eligible before enrolling them? If yes, what method will you use?

Enrollment methods

Employees can be enrolled either individually or in groups.

Individual enrollments

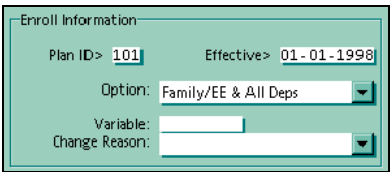
Individual employees can be enrolled online using the Welfare Plan Enrollments/Changes form (55-SCR). This form is used for both the initial enrollment and for any changes of options elected. This form performs the following functions:

- Records and maintains an employee's plan enrollment
- Records a change of option elected
- Allows for the entry of a variable for coverage and/or contributions
- Validates plan eligibility using the rules that have been defined
- Calculates coverage and contribution amounts using the rules that have been defined
- Allows overrides and/or rejects of system-calculated amounts
- Allows overrides of system-generated dates and resulting plan status

Information required for enrollments

Before you can enroll an employee in a welfare plan, you must know three things: the plan in which the employee wishes to enroll, the effective date of the enrollment, and the option the employee is choosing. If required by the plan, you will also need to enter a variable amount.

This form section shows the basic enrollment information for ACME Manufacturing employee Rhonda Hall for plan 101, health insurance:



The effective date used may or may not reflect when deductions should begin. If there is a change in options or plan status, this date should reflect the date of the change.

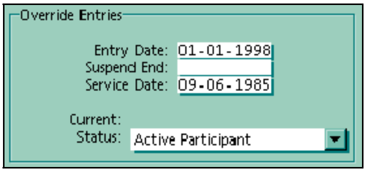
Apply the Concept
How will you collect the information needed to enroll an employee in a welfare plan?

Date calculations and plan status

After you have entered the basic enrollment information and clicked on OK or pressed Enter, the system will determine whether the employee is eligible for the plan. If the employee is eligible, the system will calculate the Entry Date, which is the date of the employee's original participation in a welfare benefits plan. The system will also calculate the Service Date, which is the date used as the basis from which service or other plan service dates are calculated. The Service Date on the Welfare Plan Enrollments/Changes form (55-SCR) is based on the Service Date definition entered on the plan's Benefit Plan Rules table (TK-SCR).

The system will also display the employee's plan status. This information is from the Option/Resulting Plan Status Rules table (TTOSCR) based on the option chosen.

This form section shows the calculated dates and plan status for employee Rhonda Hall for plan 101, health insurance:



The Suspend End date is the date on which an employee's suspension from participation in the plan ends. Entering a Suspend End date is used when an employee is suspended from a plan, or a number of plans, for a length of time.

Interpreting the calculation amounts

After the basic enrollment information is processed, the system displays the plan coverage and contribution amounts for the employee. All amounts are expressed as annual amounts.

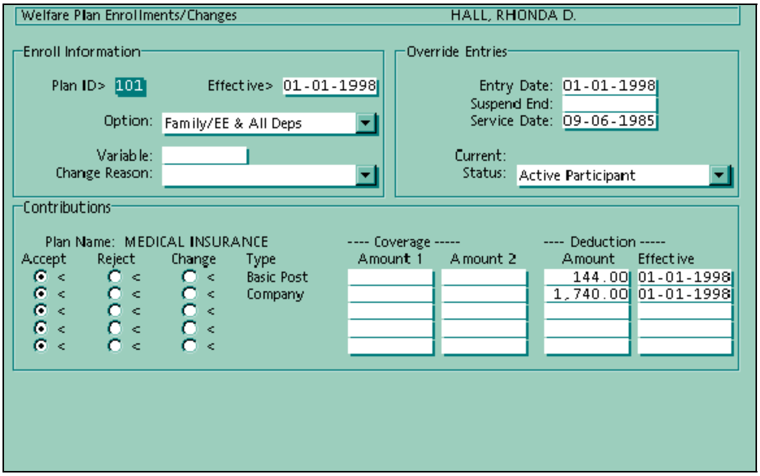
The following information is displayed:

- One line for each contribution type
- The HED for each contribution (under the 'Type' heading)
- All applicable coverage and contribution amounts
- Effective date of the deductions

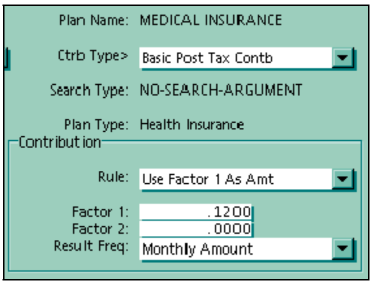
The actions determine whether the displayed information should be validated against the Coverage And Contribution Factors form (TM-SCR).

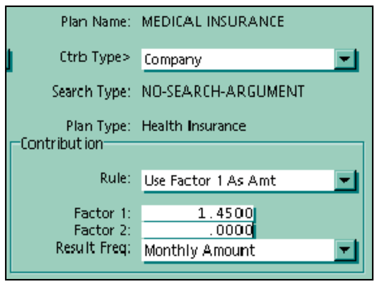
- If you are satisfied with the calculated figures and dates, choose 'Accept'.
- If you want to bypass the calculated figures, choose 'Reject'.
- If you want to change the calculated figures or dates, choose 'Change' and then make your changes.

The following example shows the completed enrollment form for employee 2008, Rhonda Hall, in plan 101. Ms. Hall has elected family coverage. She will be responsible for a basic posttax deduction of 12.00 per month (or 144.00 annually). The company will contribute 145.00 per month (or 1740.00 annually).



The following form sections show the contribution factors from the Coverage And Contribution Factors forms (TM-SCR) for plan 101. The monthly amount for the employee contribution—Basic Post Tax Contb—is 12.00. The monthly amount for the company is 145.00.





The effect of overrides

If you override ('Change') any of the amounts on the Welfare Plan Enrollments/Changes form (55-SCR), the Recalculation Benefit Coverage/Contributions report (85-RPT) will no longer recalculate the particular contributions type(s) overridden. The report only recalculates contributions that have been accepted ('Accept').

See also:

- Enrolling an employee in a welfare plan ***(on page 304)***

For detailed directions on enrolling an employee in a welfare plan.

Apply the Concept

What are your rules or procedures for overriding system-generated data?

Recording plan waivers

You will also use the Welfare Plan Enrollments/Changes form (55-SCR) to record any plan waivers. This allows you to keep a record of an employee's waiver of a plan. To record a plan waiver, simply enter a Plan ID and an effective date, and select 'Waived' for the option.

See also:

- Enrolling an employee in a welfare plan ***(on page 304)***

For detailed directions on waiving a plan.

Overriding eligibility requirements

You can override the eligibility rules (waiting period) for a welfare plan. To do so, enter all applicable text boxes on the Welfare Plan Enrollments/Changes form (55-SCR) (basic enrollment information and override entries) excluding the Suspend End text box. When this information is processed, the system will display the contributions portion of the form, allowing you to complete the enrollment.

Group enrollments

When processing enrollments for large groups of employees, you may choose to enroll them using the Batch Loading procedure. You will create an input record for each plan and employee to populate the Welfare Plan Enrollments/Changes form (55-SCR).

☞ *Refer to* **Batch Loading of Benefits Forms** *(on page 917) for more information on the batch loading requirements.*

Recording covered dependents

You can assign covered dependents during the enrollment process using the Covered Dependents By Plan form (59DSCR). Before dependents can be assigned, they must have been established on the system using the Spouse/Dependent Information form (10-SCR). This can be done by the HR department or the Benefits department. Use the Dependent ID number recorded on the Spouse/Dependent Information form (10-SCR) to assign a dependent to a welfare benefits plan.

You can access the Covered Dependents By Plan form (59DSCR) from the Navigator or from the Welfare Plan Enrollments/Changes form (55-SCR).

Note: *If eCyborg Interactive Benefits is in use, the Spouse/Dependent Information form (10-SCR) and the Covered Dependents By Plan form (59DSCR) are created during the interactive employee enrollment process.*

See also:

- Assigning dependents to a plan ***(on page 309)***

For detailed directions on assigning dependents to a plan.

Recording plan beneficiaries

You can record plan beneficiary information during the enrollment process using the Beneficiary/Plan Cross Reference form (59BSCR). Before beneficiaries can be assigned, they must have been established on the system using the Beneficiary/Bond-Owner

Information form (58-SCR). This can be done by the HR department or the Benefits department. You use the Beneficiary ID number recorded on the Beneficiary/Bond-Owner Information form (58-SCR) to assign a beneficiary to a welfare benefits plan.

You can access the Beneficiary/Plan Cross Reference form (59BSCR) from the Navigator or from the Welfare Plan Enrollments/Changes form (55-SCR).

Note: *If eCyborg Interactive Benefits is in use, the Beneficiary/Bond-Owner Information form (58-SCR) and the Beneficiary/Plan Cross Reference form (59BSCR) are created during the interactive employee enrollment process.*

See also:

- Assigning beneficiaries to a plan ***(on page 310)***

For detailed directions on assigning beneficiaries to a plan.

Enrollment verification

After employees are enrolled in welfare plans, you can verify their coverage and contribution amounts. You can also adjust these amounts.

Verifying an employee's coverage and contribution amounts

You can view an employee's plan coverage and annual contribution amounts on the Plan Coverage Amount Entry form (53-SCR). One Plan Coverage Amount Entry form (53-SCR) is generated for each contribution type on the Welfare Plan Enrollments/Changes form (55-SCR).

See also:

- Viewing coverage and contribution amounts ***(on page 312)***

For detailed directions on viewing coverage and contribution amounts.

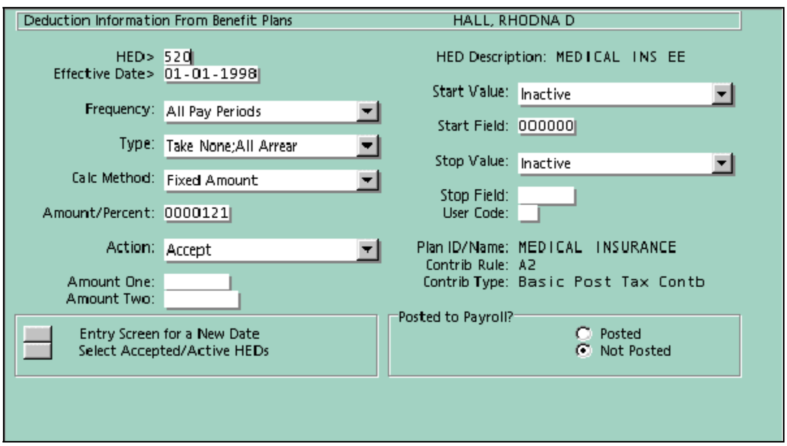
Verifying an employee's prototype deduction

Once an employee has been successfully enrolled in a benefits plan, you can view the calculated information on the Deduction Information From Benefit Plans form (54-SCR). One Deduction Information From Benefit Plans form (54-SCR) is generated for each contribution type on the Welfare Plan Enrollments/Changes form.

Note: *If employees waive a plan the first time they are eligible for it, no Deduction Information From Benefit Plans form (54-SCR) will be created. If employees waive a plan in which they are currently enrolled, a Deduction Information From Benefit Plans form (54-SCR) will be created to deactivate the plan deductions.*

When the HED Segment Changes This Period report (8R-RPT) is run, this information is copied and used to update payroll records for the deduction or accrual.

This form shows that employee Rhonda Hall will pay 2.77 each pay period for medical insurance:



Choose the Select Accepted/Active HEDs button to view all active, but not future-dated, deduction records that are linked to benefits plans in which the employee is enrolled.

See also:

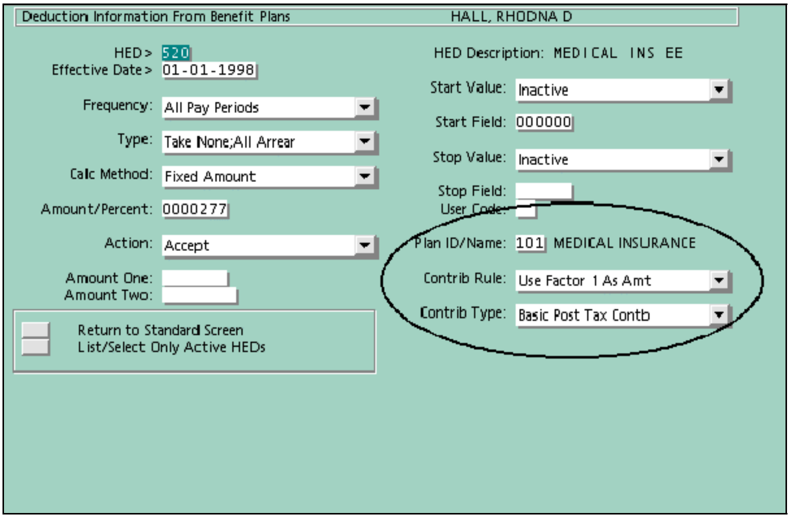
- Displaying an employee's welfare plan deduction information ***(on page 313)***

For detailed directions on viewing deductions.

Deduction adjustments

You can also use the Deduction Information From Benefit Plans form (54-SCR) to change the calculated deductions. For example, if the results of the HED Segment Changes This Period report (8R-RPT) are incorrect, you can correct the deduction and repost it. To repost it, you must change the Posted to Payroll? indicator to 'Not Posted'.

If you need to create a direct entry for a plan or HED as of a specific date instead, you must choose the Entry Form for a New Date button. The following form shows the result of choosing this button for HED 520 for Rhonda Hall. Notice that the Plan ID/Name, Contrib Rule, and Contrib Type values can now be changed.



See also:

- Changing the generated deduction of an employee's welfare plan ***(on page 314)***
- Entering a new deduction for a welfare plan ***(on page 316)***

For detailed directions on changing or adding deductions.

Reversing erroneous enrollments

When you enroll an employee in a welfare plan or change an option with a new effective date, you use the Welfare Plan Enrollments/Changes form (55-SCR). Other forms are created automatically as a result of the change or enrollment.

The following forms are created as a result of enrolling an employee in a welfare plan or changing an option:

- Plan Coverage Amount Entry (53-SCR)
- Deduction Information From Benefit Plans (54-SCR)

You also use the Welfare Plan Enrollments/Changes form (55-SCR) to de-enroll an employee. When you de-enroll an employee, a new Deduction Information From Benefit Plans form (54-SCR) is created automatically with an 'Inactive' frequency.

If an employee was enrolled, changed, or de-enrolled in error, you can manually delete the erroneous Welfare Plan Enrollments/Changes form (55-SCR) using the Delete This Entry button on the toolbar.

However, this does not automatically delete any other forms created as a result of the enrollment, change, or de-enrollment. You must also use the Delete This Entry button on any of the other forms that were created to fully correct the erroneous enrollment, change, or de-enrollment.

Tracking welfare plan enrollment

The following chart lists useful reports for documenting employee plan enrollment data.

Report	Description
Welfare Benefits Register (4A-RPT)	Lists active employees, or those on leave, participating in at least one welfare benefits plan.
Plan Participation Register (4B-RPT)	Lists all employees who participate in at least one welfare or deferred benefits plan.
Plan Beneficiary Listing (4C-RPT)	Lists all participants and their associated beneficiary data for a specified benefits plan.
Dependent Listing for Plan ID: xxx (4D-RPT)	Lists all covered dependents for each employee participating in a specified benefits plan.
Plan Premium Statements (4I-RPT)	Provides a premium summary, by plan, for insurance carriers.

☞ *Refer to* **Report Quick Reference** *(on page 615) for samples of these reports and the parameters used to define these reports.*

Apply the Concept

Will you verify employee enrollment? If yes, how will you do it?

Detailed Directions

This section provides detailed directions on completing a business task.

Tasks

Entering benefits salary calculation information

To enter the previous year's salary or the salary as of a specified date for a benefits plan calculation, use the Alternative Compensation Totals form (BACSCR).

1. Access the Alternative Compensation Totals form (BACSCR)

Access this form by making the following selections from the Navigator:

Component: Employee Resourcing
Process: Maintain Additional Employee Details
Task: Alternative Compensation Totals

For practice, access the Alternative Compensation Totals form (BACSCR) for Organization 999999 and employee 3014, Mike Sullivan.

2. Enter the Effective Date

Enter the date of the Frozen Salary or Multi-incumbency Total Annual Salary and Hours. Enter the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For practice, type '01-01-1998'.

3. Enter the Previous Years Salary

Enter the salary from the previous year. This text box displays two decimal places. The number 123.45 would be entered as '123.45' or '12345'.

For practice, type '12345.00'.

4. Enter the Frozen Salary

Enter the salary as of the Effective Date. This text box displays two decimal places. The number 123.45 would be entered as '123.45' or '12345'.

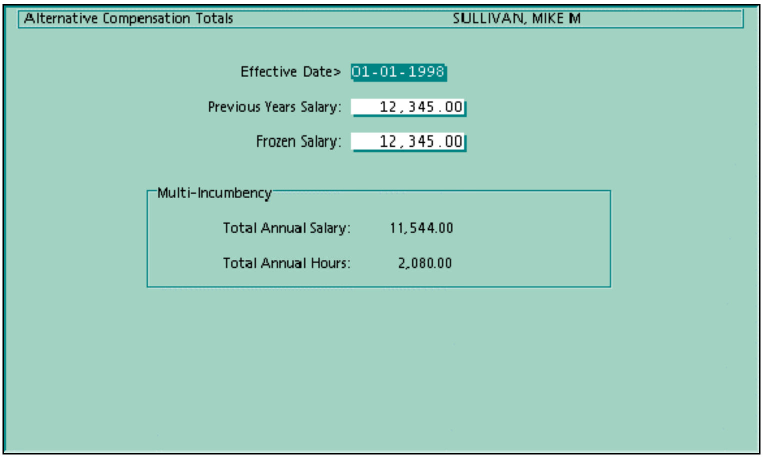
For practice, type '12345.00'.

5. Click Save or press Enter

The Total Annual Salary and Total Annual Hours will be calculated and displayed in the Multi-Incumbency section.

For practice, click Save.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



See also:

- Salary-based benefits plans ***(on page 286)***

For more information on choosing eligibility processing options.

Verifying plan eligibility before enrollment (optional)

To verify plan eligibility for an employee, use the Pending Plan Enrollment/De-Enrollment form (90-SCR).

Note: *If this form has already been processed for an employee, it may be populated with data. For new hires who have had no benefits activity, no information will be displayed.*

1. Access the Pending Plan Enrollment/De-Enrollment form (90-SCR)

Access this form by making the following selections from the Navigator:

Component: Health/Welfare Plan Enrollment/Maintenance
Process: Eligibility and Enrollment
Task: Check EE Plan Eligibility

For practice, access the Pending Plan Enrollment/De-Enrollment form (90-SCR) for Organization 999999 and employee 3033, J.T. Young.

2. Enter a Plan ID

Typically, this text box is populated by the system. Use this text box to override the displayed value.

For practice, do not change this text box.

3. Enter an Eligible Date

Typically, this text box is populated by the system. Use this text box to override the displayed value.

For practice, do not change this text box.

4. Enter a Calculation Date

Typically, this text box is populated by the system. Use this text box to override the displayed value.

For practice, do not change this text box.

5. Choose a Pending Action

Typically, this list box is populated by the system. Use this list box to override the displayed value.

For practice, do not change this list box.

6. Select a Process Eligibility option

Choose the appropriate option. When processing a new hire, you must choose 'New Hire'.

*For practice, leave the option set to 'No Option *Default*'.*

7. Click Display All Plans

Clicking this button brings up a display of all plans for which an employee is eligible but in which the employee has not enrolled. The form also displays any plan for which the employee should be de-enrolled. Up to nine plans can be displayed on a form. Click OK to view additional forms. The '–Complete—' message tells you that all information has been displayed.

For practice, click Display All Plans.

If you completed the Guided Practice, the resulting forms should look similar to the examples that follow:

Pending Plan Enrollment/De-Enrollment YOUNG, J.T.

Plan ID	Suspense Date	Calculation Date	Pending Action	Plan Class	Plan Name
101	03-11-1985	03-11-1985	E	O	MEDICAL INSURANCE
105	03-01-1986	03-11-1985	E	O	LONG TERM DISABILITY
203	03-11-1985	03-11-1985	E	M	LIFE INS-BASIC
303	03-11-1985	03-11-1985	E	O	LIFE INS-SUPPLEMENTL
505	04-01-1986	03-11-1985	E	M	MONEY PURCHASE PLAN
510	04-01-1986	03-11-1985	E	O	EMPLOYEE SAVINGS PLN
600	03-11-1985	03-11-1985	E	M	FLEX MASTER PLAN
601	03-11-1985	03-11-1985	E	M	MICHAEL REESE HMO
602	03-11-1985	03-11-1985	E	A	LINCOLN NATIONAL

Return to Entry

Pending Plan Enrollment/De-Enrollment YOUNG, J.T.

- Process eligibility options ***(on page 288)***

For more information on choosing eligibility processing options.

Enrolling an employee in a welfare plan

To enroll an employee in a welfare plan, complete the following the steps.

1. Access the Welfare Plan Enrollments/Changes form (55-SCR)

Access this form by making the following selections from the Navigator:

Component: Health/Welfare Plan Enrollment/Maintenance
Process: Eligibility and Enrollment
Task: Enroll in Health and Welfare Plan

For practice, access the Welfare Plan Enrollments/Changes form (55-SCR) for Organization 999999 and employee 3014, Mike Sullivan. You will enroll the employee into the dental plan you created earlier.

2. Enter the Plan ID

Enter the unique identifier for the plan.

For practice, type 'DEN'.

3. Enter the Effective date

Enter a date to reflect the first entry date into the plan or the date of the plan change. Enter the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For practice, type '01-01-1998'.

4. Select an Option

Select the option the employee has chosen from Option Elected option list (BA03).

For practice, select 'Family/EE & All Deps'.

5. Enter the Variable (optional)

Complete this text box only if the plan requires a variable factor. This rule would have been entered on the Coverage And Contributions Factors form (TM-SCR).

For practice, leave this text box blank.

6. Select a Change Reason (optional)

If you want to track the reason for an option change, select a value from the Option Change Reason list box.

For practice, leave this list box blank.

7. Enter an Entry Date

This text box is calculated by the system once you click Save or press Enter. To override the calculated date, enter a date in this text box in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

If the employee you are enrolling is enrolled in another plan, the previous plan's Entry Date will display to the right of the Entry Date label, even after the form is cleared. Ignore this date and other plan information displayed in the Service Date, Current Status, and Plan Information sections of the form until you have clicked on OK or pressed Enter.

For practice, do not change this text box.

8. Enter a Suspend End

Enter the date on which the employee's suspension from the plan will end. Enter the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For practice, leave this text box blank.

9. Enter a Service Date

This date will be calculated by the system.

For practice, do not change this text box.

10. Select a Current Status

This list box is generated by the system. Select a value only to override the displayed value.

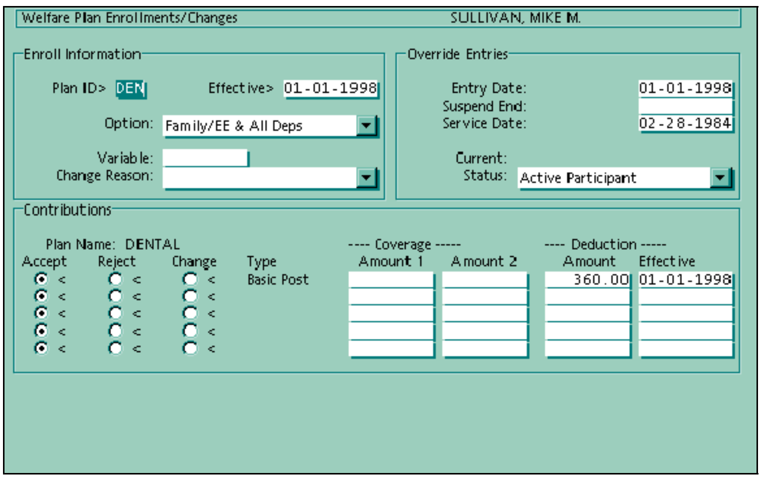
For practice, do not change this list box.

11. Click Save or press Enter

The information entered thus far will be edited. If any errors are detected, the appropriate error message(s) will be displayed. If there are no errors, the bottom half of the form will display the calculated coverage and deduction information for the employee.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



12. Select Accept, Reject, or Change

If the displayed information for the coverage and contributions is correct, select 'Accept'. If you do not want an amount applied to the employee, select 'Reject'. If you want to override a coverage or contribution amount, select 'Change' and then enter the appropriate amounts.

If you only want to override the Deduction Effective Date, select 'Accept' and then change the date.

For practice, select the first 'Accept' option button.

13. Enter a Coverage Amount 1 and/or Amount 2

Use this text box only to override the calculated value. Enter the coverage amounts elected by the employee in whole numbers only. This text box does not contain decimal positions.

For practice, leave these text boxes blank.

14. Enter the Deduction Amount

Use this text box to override the calculated value.

For practice, do not change this text box.

15. Enter the Deduction Effective

Use this text box to override the date on which deductions should begin. Enter the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

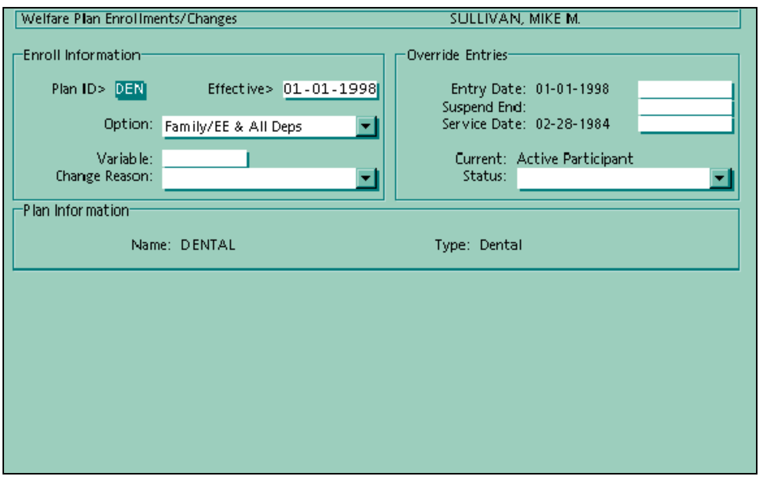
For practice, do not change this text box.

16. Click Save or press Enter

The enrollment record is created.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



See also:

- Enrollment methods ***(on page 292)***

For a discussion of eligibility rules and eligibility status options.

Waiving an employee from a welfare plan

To waive a plan for an employee, use the Welfare Plan Enrollments/Changes form (55-SCR).

1. Access the Welfare Plan Enrollments/Changes form (55-SCR)

Access this form by making the following selections from the Navigator:

Component:	Health/Welfare Plan Enrollment/Maintenance
Process:	Eligibility and Enrollment
Task:	Enroll in Health and Welfare Plan

For practice, access the Welfare Plan Enrollments/Changes form (55-SCR) for Organization 999999 and employee 3013, William Carlile.

2. Enter the Plan ID

Enter the unique identifier for the plan.

For practice, type 'DEN'.

3. Enter the Effective date

Enter the effective date of the plan waiver in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For practice, type '01-01-1998'.

4. Select an Option

Select a waiver option.

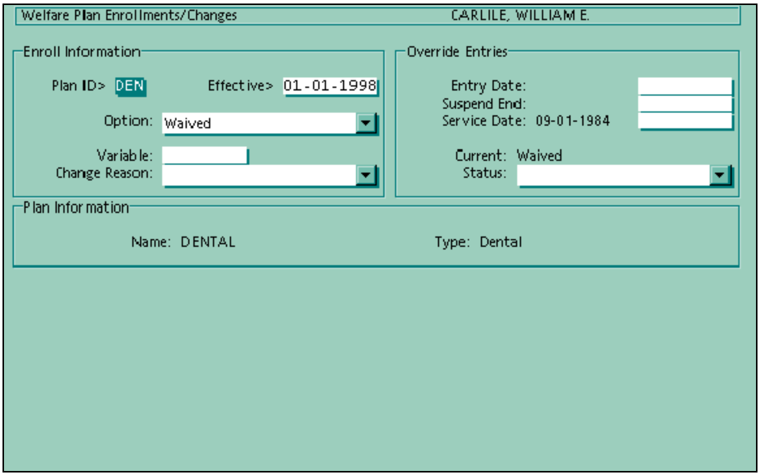
For practice, select 'Waived'.

5. Click Save or press Enter

The enrollment record is created.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



See also:

- Recording plan waivers ***(on page 295)***

For more information on plan waivers.

Assigning dependents to a plan

You assign dependents to a plan using the Covered Dependents By Plan form (59DSCR). Before dependents can be assigned to a plan, they must have been established in the system on the Spouse/Dependent Information form (10-SCR).

1. Access the Covered Dependents By Plan form (59DSCR)

Access this form by making the following selections from the Navigator:

Component:	Health/Welfare Plan Enrollment/Maintenance
Process:	Eligibility and Enrollment
Task:	Assign Dependents to Plan

For practice, access the Covered Dependents By Plan form (59DSCR) for Organization 999999 and employee 3014, Mike Sullivan. You will add his wife to the plan.

2. Enter the Plan ID

Enter the unique identifier for the plan.

For practice, type 'DEN'.

3. Enter the Effective Date

Enter the effective date for spouse or dependent coverage under the benefits plan. Enter the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For practice, type '01-01-1998'.

4. Enter the Dependent ID/Name

Enter the three-position Dependent ID of each dependent to be included in the plan. This ID must already exist on the Spouse/Dependent Information form (10-SCR).

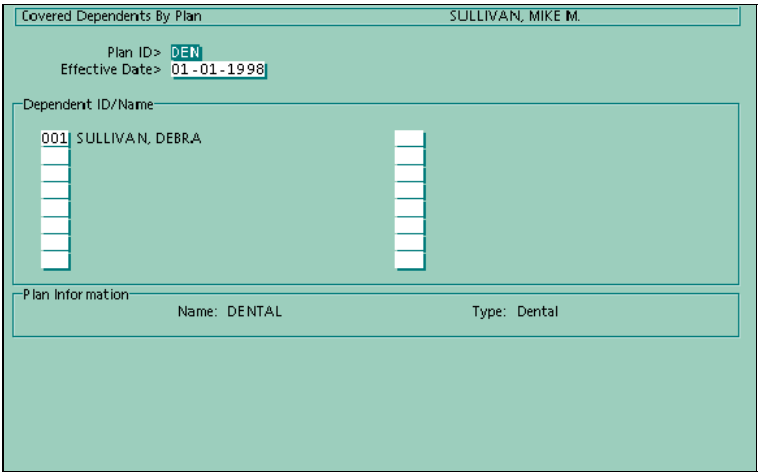
For practice, type '001'.

5. Click Save or press Enter

The dependents are added to the plan. Notice that the Plan Information portion of the form is now filled in.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



See also:

- Recording covered dependents ***(on page 295)***

For more information on employee dependents.

Assigning beneficiaries to a plan

You assign beneficiaries to a plan using the Beneficiary/Plan Cross Reference form (59BSCR). Before beneficiaries can be assigned to a plan, they must have been established in the system on the Beneficiary/Bond-Owner Information form (58-SCR).

1. Access the Beneficiary/Plan Cross Reference form (59BSCR)

Access this form by making the following selections from the Navigator:

Component:	Health/Welfare Plan Enrollment/Maintenance
Process:	Eligibility and Enrollment
Task:	Assign Beneficiaries to Plan

To complete the Guided Practice for this task, first enroll employee 3012, Joanna Schaefer, in plan 203, Life Insurance. Use the Welfare Plan Enrollments/Changes form (55-SCR) to do so. Enter '01-01-1998' as the effective date and accept the system's calculated amounts. Then access the Beneficiary/Plan Cross Reference form (59BSCR) for this employee. You will add her mother as a beneficiary on the life insurance plan. You may need to clear the form before entering data on this form.

2. Enter the Plan ID

Enter the unique identifier for the plan.

For practice, type '203'.

3. Enter the Allocation Date

This is the effective date of a beneficiary or contingent annuitant election for a benefits plan. Enter the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For practice, type '01-01-1998'.

4. Enter the Beneficiary ID

Enter the three-position Beneficiary ID. This ID must already exist on the Beneficiary/Bond-Owner Information form (58-SCR).

For practice, type '002'.

5. Enter the Percent

Enter the percentage that should be allocated to the beneficiary. Allow for one decimal when entering the percentage. For example, to enter 60% you would type '600.'

The sum of all entered multiple beneficiary percentage allocations must equal 1000 (100%).

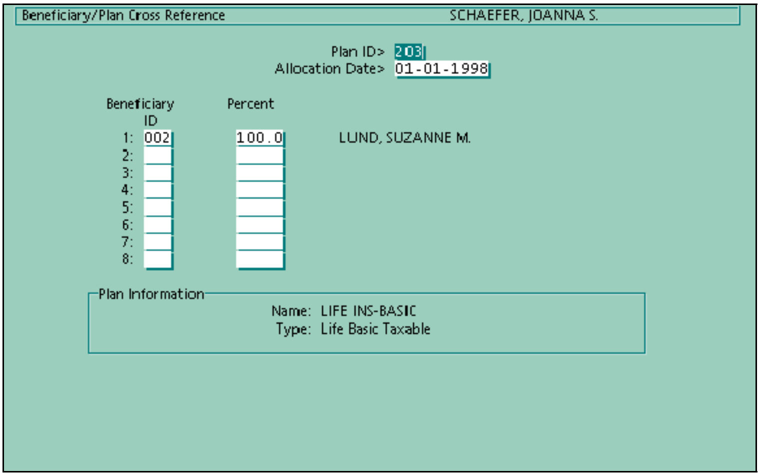
For practice, type '1000.'

6. Click Save or press Enter

The beneficiary record is created.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



See also:

- Recording plan beneficiaries ***(on page 295)***

For information on employee beneficiaries.

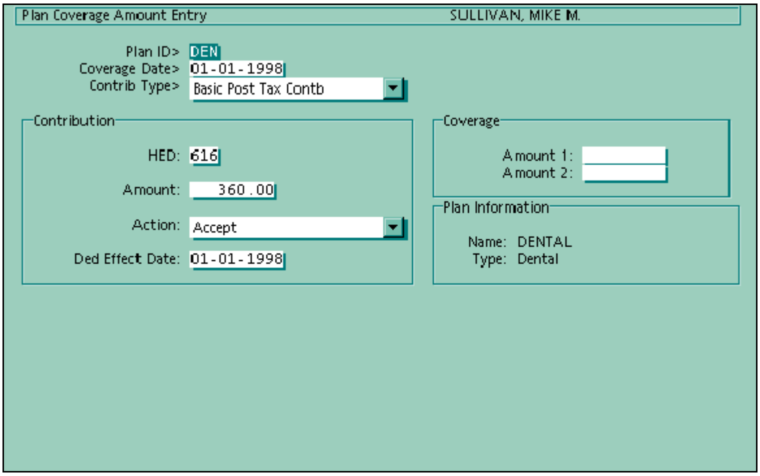
Viewing coverage and contribution amounts

To display the coverage and contribution information, access the Plan Coverage Amount Entry form (53-SCR) by making the following selections from the Navigator:

Component: Health/Welfare Plan Enrollment/Maintenance
Process: Eligibility and Enrollment
Task: Change Coverage Amount

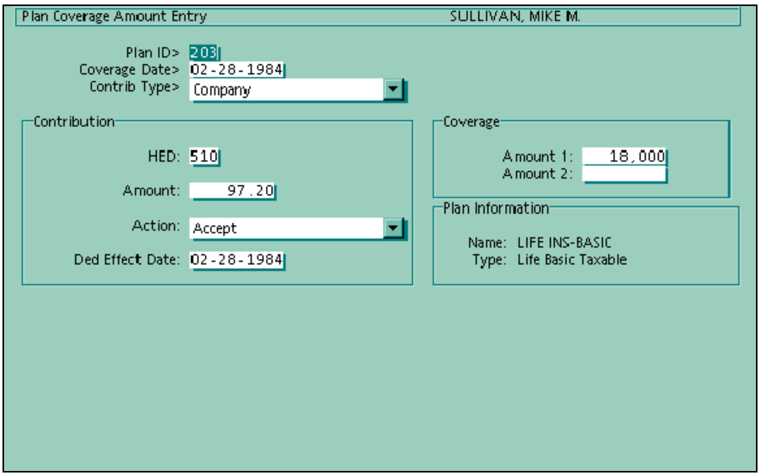
For practice, access the Plan Coverage Amount Entry form (53-SCR) for employee 3014, Mike Sullivan, and plan DEN.

If you completed the Guided Practice, the resulting form should look similar to the example that follows. The employee will contribute a posttax deduction of 360.00 annually.



For additional practice, view the deduction information for plan 203 for employee 3014.

If you completed the Guided Practice, the resulting form should look similar to the example that follows. The employee has 18,000.00 coverage in effect. The company will make contributions totaling 97.20 annually.



See also:

- Verifying an employee's coverage and contribution amounts ***(on page 297)***

Displaying an employee's welfare plan deduction information

Using the Deduction Information From Benefit Plans form (54-SCR), you can display, change, and enter new deduction data. Follow the steps in Option 1, 2, or 3 below.

Note: The boxes on the Deduction Information From Benefit Plans form (54-SCR) are the same as those on the Benefit Plan Prototype Contribution HED form (TS-SCR). As such, each box will not be explained in the Detailed Directions.

Refer to **Setting Up Welfare Plans** *(on page 53) for more information on the boxes.*

To display the deduction information, access the Deduction Information From Benefit Plans form (54-SCR) by making the following selections from the Navigator:

Component: Health/Welfare Plan Enrollment/Maintenance
Process: Eligibility and Enrollment
Task: Change Deduction Amount

For practice, access the Deduction Information From Benefit Plans form (54-SCR) for employee 3014, Mike Sullivan, HED 616, with an effective date of 01-01-1998.

If you completed the Guided Practice, the resulting form should look similar to the example that follows. Mike Sullivan is paid weekly. His annualized posttax deduction for the dental plan is 360.00, or 6.92 x 52. This form always shows the per-pay-period deduction for a plan.

Changing the generated deduction of an employee's welfare plan

Using the Deduction Information From Benefit Plans form (54-SCR), you can display, change, and enter new deduction data. Follow the steps in Option 1, 2, or 3 below.

Note: The boxes on the Deduction Information From Benefit Plans form (54-SCR) are the same as those on the Benefit Plan Prototype Contribution HED form (TS-SCR). As such, each box will not be explained in the Detailed Directions.

☞ *Refer to* **Setting Up Welfare Plans** *(on page 53) for more information on the boxes.*

To change deduction information of an employee's welfare plan, perform the following steps:

1. Access the Deduction Information From Benefit Plans form (54-SCR)

Access this form by making the following selections from the Navigator:

Component: Health/Welfare Plan Enrollment/Maintenance
Process: Eligibility and Enrollment
Task: Change Deduction Amount

For practice, access the Deduction Information From Benefit Plans form (54-SCR) for employee 3014, Mike Sullivan, HED 616, with an effective date of 01-01-1998.

2. Make any necessary changes

You can change any of the displayed information.

If this change should be passed to the payroll process, you must change the Posted to Payroll? option to 'Not Posted'.

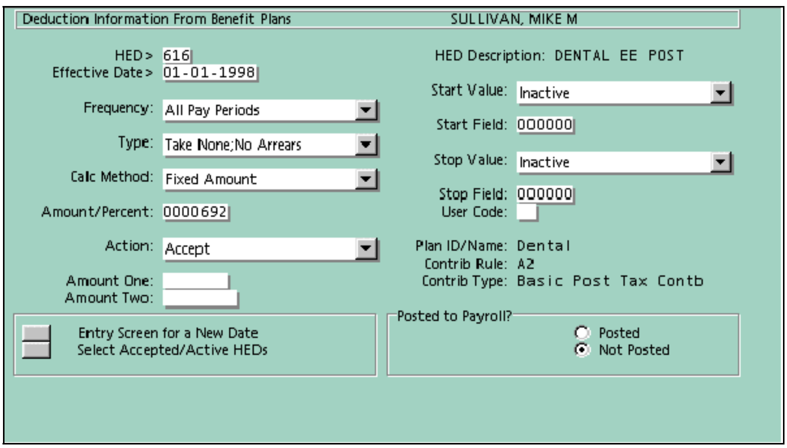
For practice, change the Type to 'Take None;No Arrears'.

3. Click Save or press Enter

This step saves your changes.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows.



See also:

- Verifying an employee's prototype deduction ***(on page 297)***

For more information on viewing and changing a prototype deduction.

Entering a new deduction for a welfare plan

Using the Deduction Information From Benefit Plans form (54-SCR), you can display, change, and enter new deduction data. Follow the steps in Option 1, 2, or 3 below.

Note: The boxes on the Deduction Information From Benefit Plans form (54-SCR) are the same as those on the Benefit Plan Prototype Contribution HED form (TS-SCR). As such, each box will not be explained in the Detailed Directions.

☞ *Refer to* **Setting Up Welfare Plans** *(on page 53) for more information on the boxes.*

To create a direct entry for a plan or HED as of a specific date, perform the following steps:

1. Access the Deduction Information From Benefit Plans form (54-SCR)

Access this form by making the following selections from the Navigator:

Component: Health/Welfare Plan Enrollment/Maintenance
Process: Eligibility and Enrollment
Task: Change Deduction Amount

For practice, access the Deduction Information From Benefit Plans form (54-SCR) for employee 3014, Mike Sullivan, HED 616, with a '01-01-1998' effective date.

2. Click the Entry Form for a New Date button

After clicking the Entry Form for a New Date button, the form will change, allowing you to enter information for a new date. You must enter each of the text boxes manually; only the Plan ID/Name and HED number will be validated.

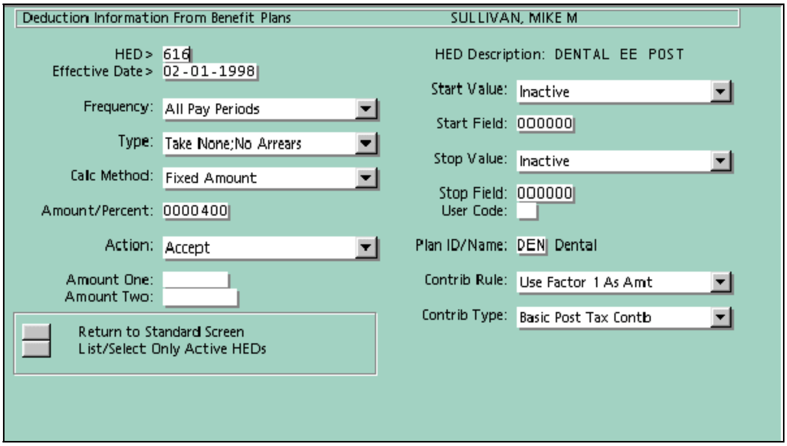
For practice, change the amount to be deducted from Mike Sullivan's pay to '0000400' in the Amount/Percent text box. Also change the Effective Date to '02-01-1998' format (US and Canada) or 01-02-1998 (elsewhere).

3. Click Save or press Enter

This step saves your changes.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows.



See also:

- Verifying an employee's prototype deduction ***(on page 297)***

For more information on viewing and changing a prototype deduction.

Extended Practice

Note: You must have completed the Extended Practice in **Setting Up Welfare Plans** *(on page 53) to guarantee the successful completion of the Extended Practice that follows.*

1. Verify the plans for which employee 1578, Henry S. Maguire, is eligible.
2. Enroll employee 1578, Henry S. Maguire, in plan 210 at coverage two times his salary effective 01-01-1998.
3. Enroll employee 1616, Daniel M. Anderson, in plan 210 at coverage one times his salary effective 01-01-1998.
4. Use information from the Spouse/Dependent Information (10-SCR) and Employee Information forms (EF-SCR) to record beneficiary information for Nancy E. Anderson, Daniel M. Anderson's wife (employee 1616). Then, designate Nancy Anderson as 100% beneficiary for plan 210, effective 01-01-1998.
5. View the annual contribution for Daniel M. Anderson, employee 1616, for plan 210.
6. View the per-pay-period deduction amount for Daniel M. Anderson, employee 1616, for plan 210.

Review of Questions Answered

1. What two methods are provided for enrolling employees in welfare plans?

2. What information is needed to enroll an employee in a welfare plan?

3. What facilities are provided to override system-generated data?

4. What forms are created as a result of an enrollment?

5. What facilities are provided to verify enrollment information online?

6. What reports are available to track enrollments in welfare plans?

CHAPTER 9

Enrolling Employees in Deferred Plans

In This Chapter

Introduction

Enrolling employees in deferred benefits plans is very similar to enrolling employees in welfare plans. Issues that are common to both—enrollment forms, coordination of activities between the Human Resources and Benefits departments, and so forth—are covered in the section on welfare plan enrollment. This section focuses on the use of the Benefits Administration component in the enrollment process for deferred plans.

☞ *Refer to* **Enrolling Employees in Welfare Plans** *(on page 281) for information on enrollment considerations, verifying employee plan eligibility, and viewing contribution amounts.*

Tasks

This section explains the following:

- Enrolling employees in a deferred plan
- Recording contributions for defined contribution plans
- Recording contributions for defined benefits plans
- Recording contributions for thrift/savings plans
- Recording Savings Bond information

Prerequisites

Before you can enroll employees in deferred benefits plans, the following must be established for:

- Organization
- Employees
- Deferred benefits plans

☞ *Refer to* **Setting Up Deferred Plans** *(on page 111) for information about establishing deferred plans.*

Questions answered

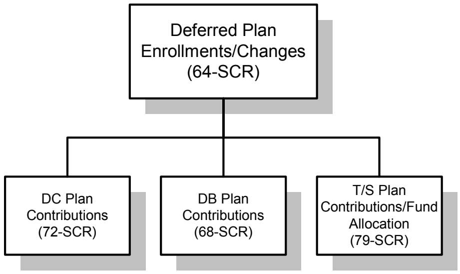
This section answers the following questions:

1. What two methods are provided for enrolling employees in deferred plans?
2. What information is needed to enroll an employee in a deferred plan?
3. What facilities are provided to override system-generated data?
4. What forms are created as a result of an enrollment into a deferred plan?
5. What reports are available to track enrollments in deferred plans?

Overview of the enrollment process for deferred plans

For deferred plans, as with welfare plans, the Benefits Administration component is used to capture enrollment information, provide automatic eligibility checking, monitor accruals, and generate information for payroll processing.

The enrollment process for deferred plans may involve two steps, using an enrollment form and a contribution form. For all types of deferred plans, you will enroll employees using the Deferred Plan Enrollments/Changes form (64-SCR). The contribution form used will depend on the type of plan involved. The plan type was originally set up on the Benefit Plan Rules form (TK-SCR). The following graphic shows the contribution forms used for different types of deferred plans—defined contribution, defined benefit, and thrift/savings.



Group enrollments for deferred plans

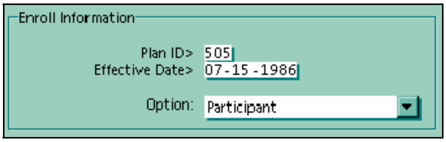
When processing enrollments for large groups of employees, you may choose to enroll them using the Batch Loading procedure.

☞ *Refer to* **Batch Loading of Benefits Forms** *(on page 917) for more information on the batch loading requirements for deferred plans.*

Information required for enrollments in deferred plans

Before you can enroll an employee in a deferred plan, you must know three things: the plan for which the employee is eligible and in which he or she wants to enroll, the effective date of the enrollment, and the valid enrollment options (for example, Participant or Enrolled) for the plan. Valid enrollment options are defined on the Option/Resulting Plan Status Rules table (TTOSCR).

This figure shows the basic enrollment information for Acme Manufacturing employee Paul Marsh into the defined contribution plan 505.



The effective date used may or may not reflect when deductions should begin. If there is a change in option or plan status, this date should reflect the date of the change.

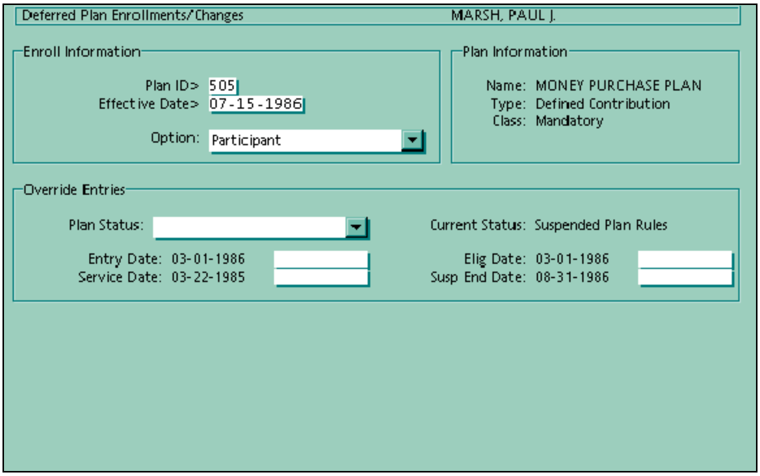
Apply the Concept
How will you collect the information needed to enroll an employee in a deferred plan?

Date calculations and plan status

After you have entered the basic enrollment information and clicked on OK or pressed Enter, the system will determine whether the employee is eligible for the plan. If the employee is eligible, the system will calculate the Entry Date, which is the employee's original participation date in the plan. The system will also calculate the Service Date, which is the date from which service or other plan service dates are calculated. This date is based on the Service Date on the plan's Benefit Plan Rules table (TK-SCR).

The system will also display the employee's plan status. This information is from the Option/Resulting Plan Status Rules table (TTOSCR) based on the option chosen.

This form shows the calculated dates and plan status for employee Paul Marsh for plan 505, defined contribution:



Eligibility overrides

To enroll employees in a plan before they are eligible according to plan rules, enter values in the Plan ID, Effective Date, Option, Plan Status, Entry Date, and Elig Date text and list boxes. The system bypasses all eligibility checking and accepts whatever is entered.

Forms created by the enrollment

Once the basic enrollment in a deferred plan is completed, the following forms are created for the employee:

- **Deferred Plan Enrollments/Changes form (64-SCR)**—Displays the option elected and effective date.
- **Plan Service Dates form (62-SCR)**—Displays the participation, benefits accrual, and vesting service dates based on the Benefits Participation Rules Tables form (TN-SCR).
- **Plan Retirement/Notice/Counseling Dates form (65-SCR)**—Displays the retirement dates based on the Benefits Retirement Dates Rules Table form (TJ-SCR).

See also:

- Enrolling employees in a deferred plan ***(on page 335)***

For detailed directions on enrolling employees in a deferred plan.

Contributions for deferred plans

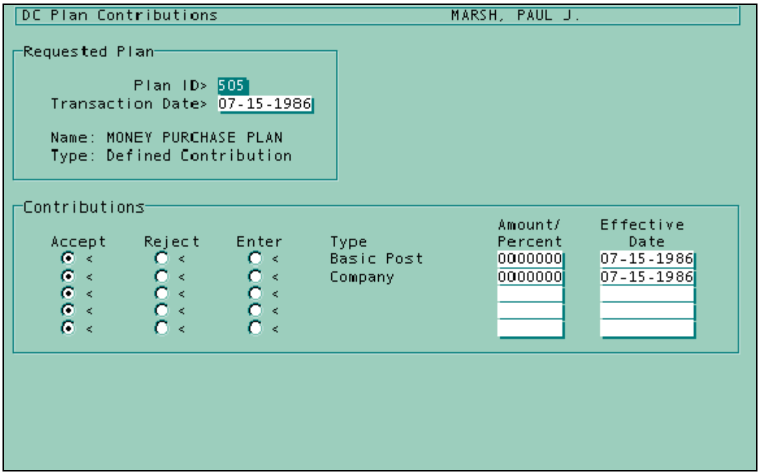
A separate form is provided to record the contribution amounts/percentages for each type of deferred plan definable in Benefits Administration—defined contribution, defined benefit, and thrift/savings.

Contributions for defined contribution plans

You record the accrual of employee and company contributions to a defined contribution plan on the DC Plan Contributions form (72-SCR). This form creates the information necessary for payroll processing.

Interpreting the calculation amounts

After processing the Plan ID and transaction date entered on the DC Plan Contributions form (72-SCR), the system displays the contribution information for the plan. One line is provided for each contribution type and displayed in the Contributions section of the form. The following shows the form as it would appear when enrolling an employee in Acme Manufacturing's Money Purchase Plan:



Employee contributions

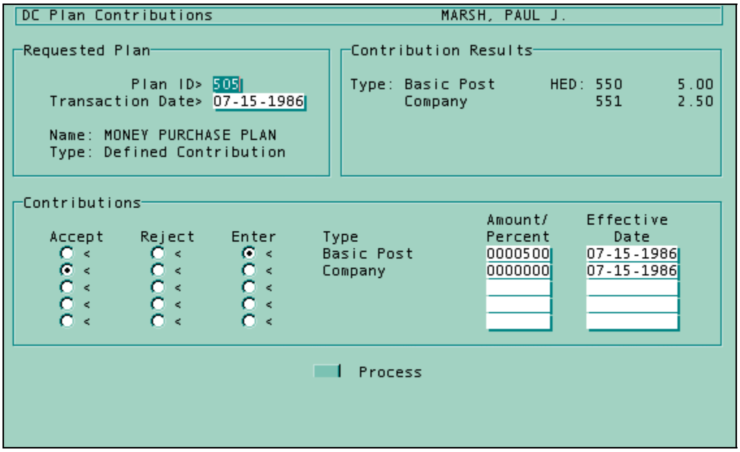
The contribution actions—Accept, Reject, and Enter—determine whether the displayed information should be validated against the Coverage And Contribution Factors form (TM-SCR).

- If you want to bypass validation against the Coverage And Contribution Factors form (TM-SCR), choose 'Accept' and type in a contribution amount or percentage.
- If you want to bypass the calculated figures, choose 'Reject'.
- If you want the system to validate what is entered into the Amount/Percent text box, choose 'Enter' and then type in the data.

Company contributions

If a plan has a company contribution, the system will calculate it based on the rules defined for the Plan/Company Match option on the Coverage And Contribution Factors form (TM-SCR) or the Benefit Plan Prototype Contribution HED form (TS-SCR). You must use the Accept option. Do not make an entry in the Amount/Percent text box.

The following example shows that employee Paul Marsh has elected to contribute 5 percent of his earnings as a posttax deduction. The company will match 50 percent of his elected percentage, or 2.5 percent. This is displayed in the Contribution Results section of the form.



Review and process

After you have selected a contribution action and pressed Enter or clicked OK, the system will redisplay the form with the processed information. You then have the option of revising the information, canceling out, or processing the information. When you click the Process button, the system will update the applicable records.

See also:

- Recording contributions for defined contribution plans ***(on page 337)***

For detailed directions on recording contributions for defined contribution plans.

Contributions for defined benefits plans

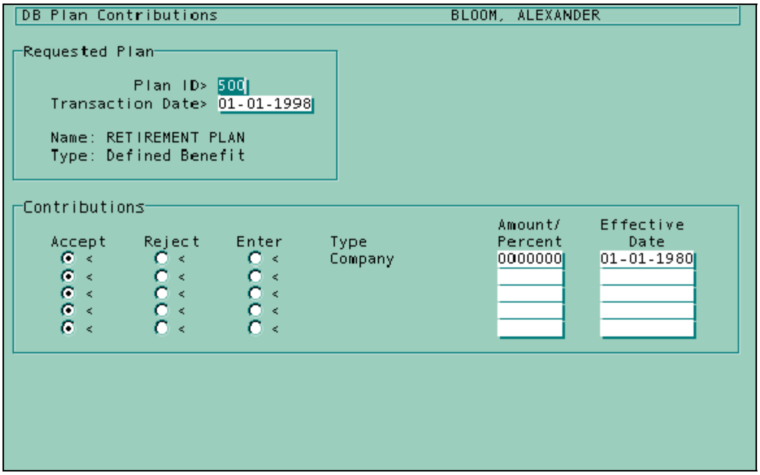
Most companies fund their defined benefits plans with an annual contribution. As such, the plan definitions do not contain a Coverage And Contribution Factors table (TM-SCR) or have an amount/percentage entered on the Benefit Plan Prototype Contribution HED table (TS-SCR). For defined benefits plans of this nature, there is no need to process a DB Plan Contributions form (68-SCR) when enrolling an employee in the plan. You need only complete a Deferred Plan Enrollments/Changes form (64-SCR).

Note: *If you wish to record your company's annual contribution to a defined benefits plan, you do so by loading the Defined Benefit Plan Accumulations form (70-SCR). Formulas for determining the actual retirement benefit for employees are determined actuarially and are not entered into the system.*

For defined benefits plans that do require an employee contribution (for example, those in the public sector) or in which the employer makes periodic contributions, there will be a Coverage And Contribution Factors table (TM-SCR) defined or there will be an amount/percentage entered on the Benefit Plan Prototype Contribution HED table (TS-SCR). For defined benefits plans of this nature, you will process a DB Plan Contributions form (68-SCR) when enrolling an employee in the plan.

Interpreting the calculation amounts

After processing the Plan ID and transaction date entered on the DB Plan Contributions form (68-SCR), the system displays the contribution information for the plan. One line is provided for each contribution type. In the following example you see that for Acme Manufacturing's Retirement Plan (plan 500) there is only a company contribution. This contribution will be based on the rules set up on the Coverage And Contribution Factors form (TM-SCR).



Employee contributions

The contribution actions—Accept, Reject, and Enter—determine whether the displayed information should be validated against the Coverage And Contribution Factors form (TM-SCR).

- If you wish to bypass the validation process against the Coverage And Contribution Factors form (TM-SCR), choose Accept and type in a contribution amount or percentage. The amount will be accepted regardless of the plan rules.
- If you want to bypass the calculated figures, choose 'Reject'.
- If you want the system to validate what has been entered into the Amount/Percent text box against the plan rules established on the Coverage And Contribution Factors form, choose 'Enter' and type in a contribution amount or percentage.

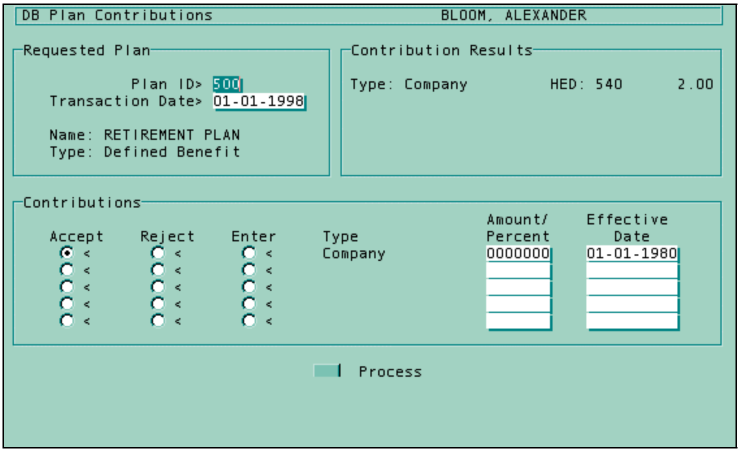
Company contributions

Company contributions may have been defined for the plan on either the Coverage And Contribution Factors form (TM-SCR) or the Benefit Plan Prototype Contribution HED form (TS-SCR). If the contribution amount was defined on the Coverage And Contribution Factors form (TM-SCR), the contribution will not display in the Amount/Percent text box on the DB Plan Contributions form (68-SCR).

When recording company contributions, you may take the following actions:

- If you want to validate against the Coverage And Contribution Factors form (TM-SCR) or use the data from the Benefit Plan Prototype Contribution HED form (TS-SCR), choose 'Accept'.
- If you want to bypass the company contribution, choose 'Reject'.
- If you want to bypass validation of plan rules, choose 'Enter' and then type in the amount or percentage.

This form shows that after accepting the company contribution, the system calculated and displayed that contribution of two (2) percent. This is displayed in the Contribution Results section of the form.



Review and process

After you have selected a contribution action and pressed Enter or clicked on OK, the system will redisplay the form with the processed information. You then have the option of revising the information, canceling out, or processing the information. When you click the Process button, the system will update the applicable records.

See also:

- Recording contributions for defined benefits plans ***(on page 340)***

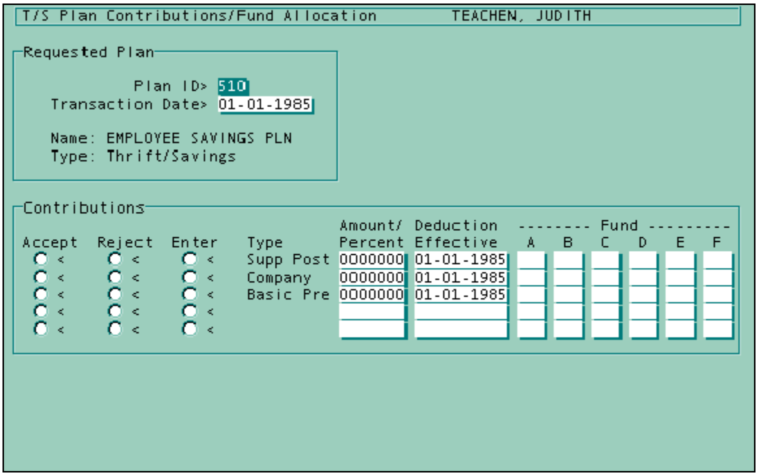
For detailed directions on recording contributions for defined benefits plans.

Contributions for thrift/savings contribution plans

You record the accrual of employee and company contributions to a thrift/savings plan, and the allocation of the contributions to multiple funds, on the T/S Plan Contributions/Fund Allocation form (79-SCR). This form creates the information necessary for payroll processing.

Interpreting the calculation amounts

After processing the Plan ID and transaction date entered on the T/S Plan Contributions/Fund Allocation form (79-SCR), the system displays the contribution information for the plan. One line is provided for each contribution type. The following shows the form as it would appear when enrolling an employee in Acme Manufacturing's Employee Savings Plan.



Employee contributions

The contribution actions—Accept, Reject, and Enter—determine whether the displayed information should be validated against the Coverage And Contribution Factors form (TM-SCR).

- If you want to bypass validation against the Coverage And Contribution Factors form (TM-SCR), choose 'Accept' and type in a contribution amount or percentage.
- If you want to bypass the calculated figures, choose 'Reject'.
- If you want the system to validate what is entered into the Amount/Percent text box, choose 'Enter' and then type in the data.

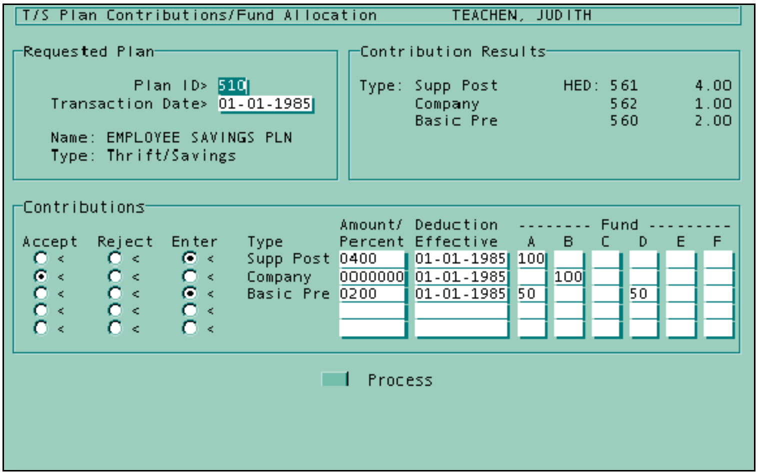
Company contributions

If a plan has a company contribution, the system will calculate it based on the rules defined for the Plan/Company Match option on the Coverage And Contribution Factors form (TM-SCR) or the Benefit Plan Prototype Contribution HED form (TS-SCR). You must use the Accept option. Do not make an entry in the Amount/Percent text box.

Fund allocations

You can allocate percentages of contributions in up to six funds. The percentage allocations for each contribution type must total 100 percent. By default, funds are labeled Funds A through F. You can track the meaning of these funds manually or you can use FormMaker to modify these text box labels on the T/S Plan Contributions/Fund Allocation form (79-SCR) to be more meaningful.

The following form shows the elections chosen by employee Judith Teachen. She has elected a pretax deduction of 2 percent and allocated 50 percent of that deduction to Fund A and 50 percent to Fund D. She has also elected a posttax deduction of 4 percent and allocated 100 percent to Fund A. The company will contribute 50 percent of the employee's pretax deduction, or 1 percent; the contribution will be allocated to Fund B.



Review and process

After you have selected a contribution action and pressed Enter or clicked on OK, the system will redisplay the form with the processed information. You then have the option of revising the information, canceling out, or processing the information. When you click the Process button, the system will update the applicable records.

See also:

- Recording contributions for thrift/savings plans ***(on page 342)***

For detailed directions on recording contributions for thrift/savings plans.

Apply the Concept

Describe how the enrollment process for deferred plans could involve two forms/steps.

Contributions for Savings Bond plans

Some employers offer their employees the option to purchase Savings Bonds through payroll deductions. Savings Bond information is recorded on the Savings Bond Information form (SB-SCR). Once the employee has reached the purchase price of the savings bond, the employee's bond information is sent to the Federal Reserve Bank via the US Savings Bond Register and Tape report (SB-RPT).

☞ *Refer to the* **Report Quick Reference** *(on page 615) for information on running the Savings Bond Register and Tape report (SB-RPT).*

See also:

- Recording Savings Bond information ***(on page 345)***

For detailed directions on recording Savings Bond information.

Forms created by recording contributions

The following forms are created as a result of recording an employee's contributions in a deferred plan:

- Deferred Plan Contribution Amt/Pcts (64CSCR)—Displays the contribution actions and amounts for the five contribution types for each deferred benefits plan.
- Deduction Information From Benefit Plans (54-SCR)—One for each contribution type—displays an employee's deduction information for a benefits plan.

Reversing erroneous enrollments

When you enroll an employee in a deferred plan or change an option with a new effective date, you use the Deferred Plan Enrollments/Changes form (64-SCR). Other forms are created automatically as a result of the change or enrollment.

The following forms are created as a result of enrolling an employee in a deferred plan:

- Plan Service Dates (62-SCR)
- Plan Retirement/Notice/Counseling Dates (65-SCR), if a Benefits Retirement Dates Rules Table form (TJ-SCR) has been defined for the plan

The following forms are created as a result of recording employee contributions for a deferred plan or changing a contribution:

- Deferred Plan Contribution Amt/Pcts (64CSCR)
- Deduction Information From Benefit Plans (54-SCR)

You also use the Deferred Plan Enrollments/Changes form (64-SCR) to de-enroll an employee. When you de-enroll an employee, a new Deduction Information From Benefit Plans form (54-SCR) is created automatically with an 'Inactive' frequency.

If an employee was enrolled, changed, or de-enrolled in error, you can manually delete the erroneous Deferred Plan Enrollments/Changes form (64-SCR) using the Delete This Entry button on the toolbar.

However, this does not automatically delete any other forms created as a result of the enrollment, change, or de-enrollment. You must also use the Delete This Entry button on any of the other forms that were created to fully correct the erroneous enrollment, change, or de-enrollment.

Tracking deferred plan enrollment

The following chart lists two useful reports for documenting employee plan enrollment data.

Report	Description
Deferred Plan Register (4J-RPT)	Lists active employees, or those on leave, participating in at least one deferred benefits plan.
Plan Participation Register (4B-RPT)	Lists all employees who participate in at least one welfare or deferred benefits plan.

☞ *Refer to the* **Report Quick Reference** *(on page 615) for samples of these reports and the parameters used to define these reports.*

Apply the Concept
Will you verify employee enrollment? If yes, how will you do it?

Detailed Directions

This section provides detailed directions on completing a business task.

Tasks

Enrolling employees in a deferred plan

To enroll an employee in a deferred plan, use the Deferred Plan Enrollments/Changes form (64-SCR).

Note: If this form has already been processed for an employee, it may be populated with data. For new hires who have had no benefits activity, no information will be displayed.

1. Access the Deferred Plan Enrollments/Changes form (64-SCR)

Access this form by making the following selections from the Navigator:

Component: Deferred Plans Enrollment/Maintenance
Process: Eligibility and Enrollment
Task: Deferred Plan Enrollment

For practice, access the Deferred Plan Enrollments/Changes form (64-SCR) for Organization 999999 and employee 3015, Steve Llewelyn. You will enroll him in the defined contribution plan you created earlier.

2. Enter the Plan ID

Enter the unique identifier for the plan.

For practice, type 'A01'.

3. Enter the Effective Date

Enter the effective date of the enrollment in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere). Deductions may or may not begin on this date. If you are recording a change in option or plan status, the data should reflect the date of the change.

For practice, type '01-01-1998'.

4. Select an Option

Select a valid enrollment option from the Option Elected option list (BA03).

For practice, select 'Participant'.

5. Click Save or press Enter

The information entered thus far will be validated against the plan rules and the employee's master record. If any errors are detected, the appropriate error message(s) will be displayed. If there are no errors, the enrollment record is created and the plan information, employee plan status, and plan dates are displayed.

For practice, click Save or press Enter.

6. Select a Plan Status

To override the system-generated status, select a value from the Plan Status option list (BA04).

For practice, leave this list box blank.

7. Enter an Entry Date

The displayed date reflects the effective date of the enrollment after an employee meets eligibility requirements. This date will not change if options elected or plan status changes, unless required by plan rules.

To override the system-generated date, enter a new date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For practice, do not modify this text box.

8. Enter an Elig Date

The displayed date reflects the date upon which an employee is eligible for the deferred plan.

To override the system-generated date, enter a new date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For practice, do not modify this text box.

9. Enter a Service Date

The displayed date reflects the employee's employment date, original hire date, or adjusted seniority date based on the service date rule selected on the Benefit Plan Rules form (TK-SCR).

To override the system-generated date, enter a new date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For practice, do not modify this text box.

10. Enter a Susp End Date

Enter a date to reflect when the employee will again be eligible to continue participation. Enter the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

This text box is used if an employee has lost coverage because of a separation activity or took a hardship withdrawal against a thrift/savings plan and is not allowed to contribute for a period of time. An employee can not be enrolled in the plan prior to the date you enter here.

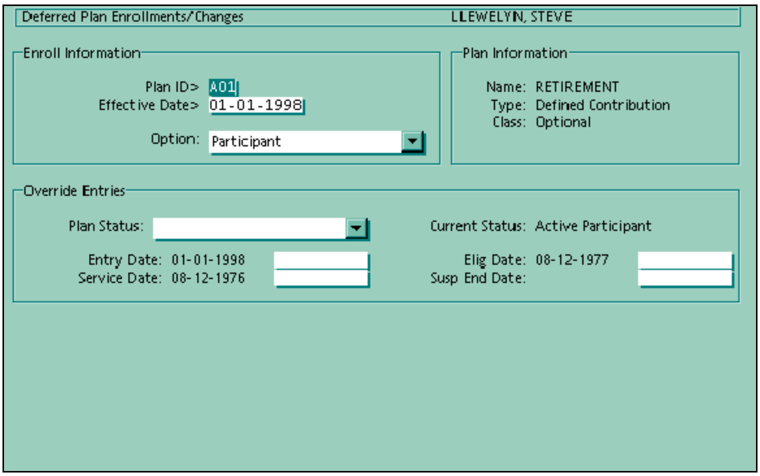
For practice, do not modify this text box.

11. Click Save or press Enter

If you changed any of the data in Steps 6 through 10, you must save the information you entered by clicking Save or pressing Enter.

For practice, since you made no changes in Steps 6 through 10, you do not need to save the information.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



The system will display a button to access the contribution form for the type of deferred plan being used.

See also:

- Information required for enrollments in deferred plans ***(on page 324)***

For more information on the enrollment process for deferred plans.

Recording contributions for defined contribution plans

You record contributions for defined contribution plans using the DC Plan Contributions form (72-SCR).

1. Access the DC Plan Contributions form (72-SCR)

Access this form by making the following selections from the Navigator:

Component:	Deferred Plans Enrollment/Maintenance
Process:	Defined Contribution Plan Account Info
Task:	Change EE/ER Contributions

For practice, access the DC Plan Contributions form (72-SCR) for Organization 999999 and employee 3015, Steve Llewelyn.

2. Enter the Plan ID

Enter the unique identifier for the plan.

For practice, type 'A01'.

3. Enter the Transaction Date

Enter the current date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For practice, type '01-01-1998'.

4. Click Save or press Enter

The information entered thus far will be validated against the plan rules and the employee's master record. If any errors are detected, the appropriate error message(s) will be displayed. If there are no errors, the bottom half of the form will display the contribution information for the plan.

For practice, click Save or press Enter.

5. Select 'Accept', 'Reject', or 'Enter'

For employee contributions:

Select	To
Accept	Bypass validation. Enter in an amount or percentage.
Reject	Bypass the calculated figures.
Enter	Have the system validate the amount or percentage you enter.

For company contributions, you must select 'Accept'.

For practice, select 'Accept' for the Company contribution and 'Enter' for the employee's basic pretax deduction.

6. Enter an Amount/Percent

Enter the amount or percentage that the employee has elected. Company contributions do not display on this form. For company contributions, leave the Amount/Percent text box set to zeros; the contribution will be calculated based on the rules defined on the Coverage And Contribution Factors form (TM-SCR).

Enter amounts with two decimals; enter percentages with four decimals. For example, 10.00 is entered as '1000'; 6 percent is entered as '600'.

For practice, type '300' in the Amount/Percent text box for the employee's basic pretax deduction. The employee will contribute 3 percent.

7. Enter the Effective Date

This text box reflects the date on which deductions or accruals begin, based on the plan rules set on the Benefit Plan Prototype Contribution HED form (TS-SCR). Any date you enter here will override the date calculated by the plan rules. Enter the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY (elsewhere).

For practice, do not change this text box.

8. Click Save or press Enter

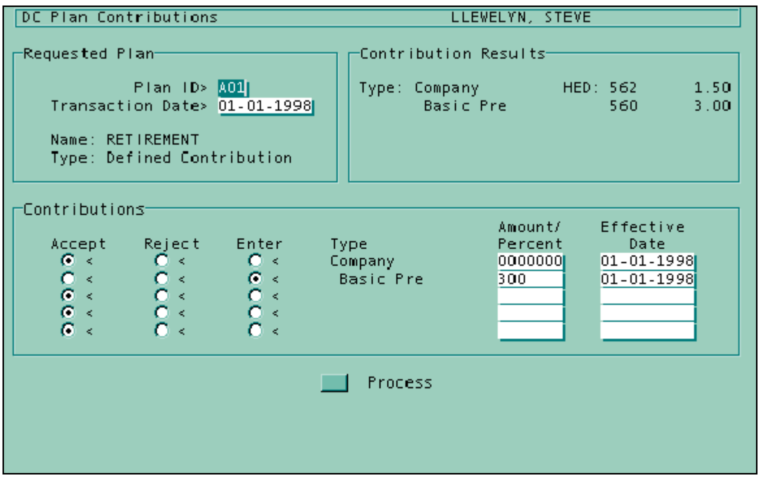
The plan contribution record is created.

For practice, click Save or press Enter.

9. Review the displayed information

The form redisplays with the calculated information, showing the HED(s) and the amounts/percentages for each. At this point, you can process the information, modify it, or cancel.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



10. Click Process

The system processes the information and updates the applicable records. A blank DC Plan Contributions form (72-SCR) is displayed.

For practice, click the Process button.

See also:

- Contributions for defined contribution plans ***(on page 326)***

For information on the issues involved in recording contributions.

Recording contributions for defined benefits plans

To record contributions for defined benefits plans, follow these steps:

1. Access the DB Plan Contributions form (68-SCR)

Access this form by making the following selections from the Navigator:

Component:	Deferred Plans Enrollment/Maintenance
Process:	Defined Benefit Plan Account Info
Task:	Change EE/ER Contributions

For practice, first access the Benefit Plan Prototype Contribution HED form (68-SCR) for plan 500 and change the Amount/Percent to '0000300'. Then use the Deferred Plan Enrollments/Changes form (64-SCR) to enroll employee 3009, Judith Teachen, into plan 500. Use an effective date of '01-01-1998' and an option of 'Participant'. Then access the DB Plan Contributions form (68-SCR) for Organization 999999 and employee 3009, Judith Teachen.

2. Enter the Plan ID

Enter the unique identifier for the plan.

For practice, type '500'.

3. Enter the Transaction Date

Enter the current date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For practice, type '01-01-1998'.

4. Click Save or press Enter

The information entered thus far will be validated against the plan rules and the employee's master record. If any errors are detected, the appropriate error message(s) will be displayed. If there are no errors, the bottom half of the form will display the calculated contribution information.

For practice, click Save or press Enter.

5. Select 'Accept', 'Reject', or 'Enter'

For employee contributions:

Select	To
Accept	Bypass validation. Enter in an amount or percentage.
Reject	Bypass the calculated figures.
Enter	Have the system validate the amount or percentage you enter.

For company contributions:

Select	To
Accept	To use the calculated amount.
Reject	Bypass the calculated figures.
Enter	Bypass validation. Enter in an amount or percentage.

For practice, select the first 'Accept' radio button.

6. Enter an Amount/Percent

Enter the amount or percentage that the employee has elected. Company contributions do not display on this form. For company contributions, leave the Amount/Percent text box set to zeros; the contribution will be calculated based on the rules defined on the Coverage And Contribution Factors form (TM-SCR).

Enter amounts with two decimals; enter percentages with four decimals. For example, 10.00 is entered as '1000'; 6 percent is entered as '600'.

For practice, do not modify this text box.

7. Enter an Effective Date (optional)

If you want deductions or accruals to begin on a date other than the one calculated by the plan rules, enter a new date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For practice, do not modify this text box.

8. Click Save or press Enter

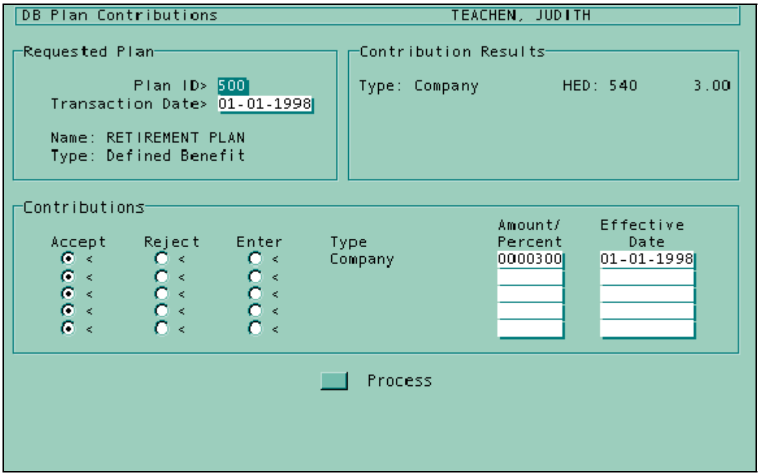
The enrollment record is created.

For practice, click Save or press Enter.

9. Review the displayed information

The form redisplays with the calculated information, showing the HED(s) and the amounts/percentages for each. At this point, you can process the information, modify it, or cancel.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



10. Click Process

The system processes the information and updates the applicable records. A blank DB Plan Contributions form (68-SCR) is displayed.

For practice, click the Process button.

See also:

- Contributions for defined benefits plans ***(on page 327)***

For a discussion of the issues involved in recording contributions.

Recording contributions for thrift/savings plans

You record contributions for thrift/savings plans using the T/S Plan Contributions/Fund Allocation form (79-SCR).

1. Access the T/S Plan Contributions/Fund Allocation form (79-SCR)

Access this form by making the following selections from the Navigator:

Component:	Deferred Plans Enrollment/Maintenance
Process:	Thrift/Savings Plan Account Information
Task:	Change EE/ER Fund Allocations

To complete the Guided Practice for this task, you must first enroll employee 1111, Jerry Jones, in plan 510. Use the Deferred Plan Enrollments/Changes form (64-SCR) to do so. Use an effective date of '01-01-1998' and an option of 'Participant'. Then access the T/S Plan Contributions/Fund Allocation form (79-SCR) for Organization 999999 and employee 1111, Jerry Jones.

2. Enter the Plan ID

Enter the unique identifier for the plan.

For practice, type '510'.

3. Enter the Transaction Date

Enter the current date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For practice, type '01-01-1998'.

4. Click Save or press Enter

The information entered thus far will be validated against the plan rules and the employee's master record. If any errors are detected, the appropriate error message(s) will be displayed. If there are no errors, the bottom half of the form will display the contribution information for the plan.

For practice, click Save or press Enter.

5. Select 'Accept', 'Reject', or 'Enter'

For employee contributions:

Select	To
Accept	Bypass validation. Enter in an amount or percentage.
Reject	Bypass the calculated figures.
Enter	Have the system validate the amount or percentage you enter.

For company contributions, you must select Accept.

For practice, select 'Enter' for the supplement posttax deduction, select 'Accept' for the company contribution, and select 'Enter' for the basic pretax deduction.

6. Enter an Amount/Percent

Enter the elected amount/percentage. Enter amounts with two decimals; enter percentages with four decimals. For example, 10.00 is entered as '1000'; 6 percent is entered as '600'.

For the supplemental posttax deduction, type '200'. Do not change the company contribution. For the basic pretax deduction, type '400'. The employee has elected to contribute 2 percent as a posttax deduction and 4 percent as a pretax deduction.

7. Enter the Deduction Effective

This text box reflects the date on which deductions or accruals begin. Enter the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For practice, do not change these text boxes.

8. Enter the Funds A–F

Enter the percentage to be allocated to each fund. For each contribution type, all funds must total 100 percent.

Enter percentages as two positions. For example, 30 percent is entered as '30'.

For practice, type these values in the following text boxes:

- *For the supplemental posttax deduction, type '50' in Funds A and C.*
- *For the company contribution, type '100' in Fund B.*
- *For the basic pretax deduction, type '25' in Funds A, B, D, and E.*

9. Click Save or press Enter

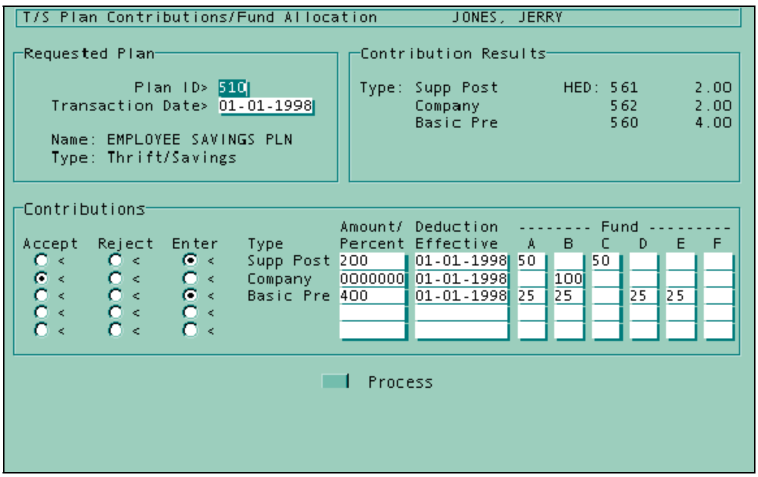
The contributions record is created.

For practice, click Save or press Enter.

10. Review the displayed information

The form redisplays with the calculated information, showing the HED(s) and the amounts/percentages for each. At this point, you can process the information, modify it, or cancel.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



11. Click Process

The system processes the information and updates the applicable records. A blank T/S Plan Contributions/Fund Allocation form (79-SCR) is displayed.

For practice, click the Process button.

See also:

- Contributions for thrift/savings contribution plans ***(on page 329)***

For information on the issues involved in recording contributions.

Recording Savings Bond information

To record Savings Bond information, follow the steps below.

Note: A Savings Bond Deduction HED is not included in the Cyborg delivered test companies. You will need to establish a Savings Bond Deduction HED to complete the Guided Practice.

1. Verify that there is a Savings Bond deduction HED

Verify that there is an HED set up at the organization level with a Category value of Savings Bonds (59) on the Organization Earnings and Deductions form (A8-SCR).

For practice, establish a Savings Bond HED #777.

2. Set up the HED at the employee level

Set up the HED at the employee level using the Employee Earnings And Deductions form (HH-SCR).

For practice, establish HED 777 for employee 3002.

3. Access the Savings Bond Information form (SB-SCR)

Access this form by making the following selection from the Navigator:

Component:	Deferred Plan Enrollment/Maintenance
Process:	Set Up Savings Bond
Task:	Savings Bond Information

For practice, access the Savings Bond Information form (SB-SCR) for employee 3002 in the '999999' organization.

4. Enter the Bond HED

This is the HED that is used for the savings bond deduction.

For practice, type '777'.

5. Select the Denomination

The dollar amount of the bond.

For practice, select '$100.00'.

6. Enter the Owner

This is the identification option of the person who is the owner of the bond. To specify the employee as owner, type E in the field. The Employee Name from the Employee Name And Address form (FF-SCR - Name Code 001) is used.

If someone other than the employee is the bond owner, enter that person's ID from the Beneficiary/Bond-Owner Information form (58-SCR). After entry, the Owner Name and Owner SSN are displayed in inquiry mode.

For practice, type '001'.

7. Enter the Co-owner (optional)

This is the identification option of the person who is the co-owner of the bond. If a person (employee or other) is specified as the owner, that person can not be the Co-owner. In other words, the Owner ID and the Co-owner ID can not be the same.

This text box is entered in the same manner as the Owner ID text box.

For practice, leave blank.

8. Enter the Beneficiary

This is the identification option of the person who is the beneficiary of the bond. If a person (employee or other) is specified as the owner, that person can not be the Beneficiary. In other words, the Owner ID and the Beneficiary ID can not be the same.

This text box is entered in the same manner as the Owner ID text box.

For practice, leave blank

9. Enter the Mail-to

This is the address the bond is to be mailed to. The name and address used will come from the Employee Name And Address form (FF-SCR) or the Beneficiary/Bond-Owner Information form (58-SCR) depending on how you use this field. Valid entries and where the name and addresses come from are:

- O = Mail to the Owner indicated in the Owner ID text box.
- C = Mail to the Co-owner indicated in the Co-owner ID text box.
- B = Mail to the Beneficiary indicated in the Beneficiary ID text box.
- E = Mail to the employee at the name and address on the Employee Name And Address form (FF-SCR) for Name Code 001. You would only use this entry if the employee is not the Owner, Co-owner, or the Beneficiary.
- xxx = Mail to the name and address indicated on the Employee Name And Address form (FF-SCR) for the ID entered in this field. You would use this entry to mail the bond to the employee, the Owner, the Co-owner or the Beneficiary at a name and address combination different from what is on the designated Beneficiary/Bond-Owner Information form (58-SCR) or the Employee Name And Address form (FF-SCR) for Name Code 001.

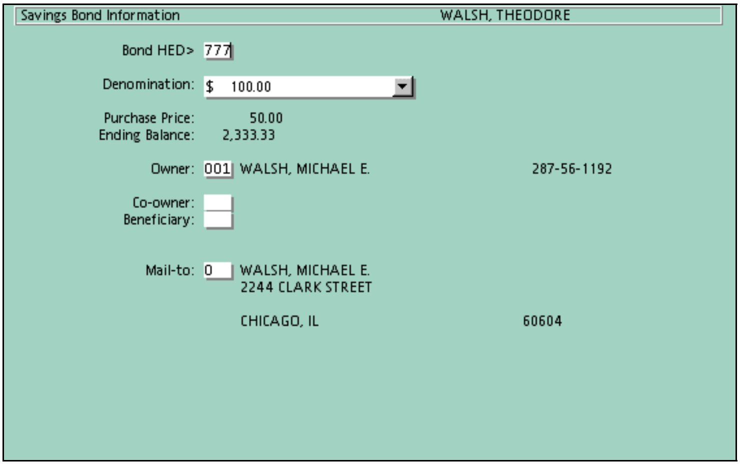
For practice, type 'O' to mail to the Owner indicated in the Owner field.

10. Click Save or press Enter

Savings Bond information is now recorded.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



See also:

- Contributions for deferred plans ***(on page 326)***

For information on Savings Bond plans.

Extended Practice

Note: *You must have completed the Extended Practice in* **Setting Up Deferred Plans** *(on page 111) to guarantee the successful completion of the Extended Practice that follows.*

1. Enroll employee 1043, Alice A. Baldwin, in plan S02 effective 01-01-1998. Use the following contribution information:

Contribution Type	Contribution Percent	Fund Allocation
Company		100% in Fund A
Basic Pretax	6%	50% in Fund B, 50% in Fund C
Supplemental Pretax	9%	50% in Fund D, 50% in Fund E

2. Enroll employee 1165, William Z. Manning, in plan S02 effective 01-01-1998. Use the following contribution information:

Contribution Type	Contribution Percent	Fund Allocation
Company		50% in Fund A, 25% in Fund B, 25% in Fund C
Basic Pretax	6%	100% in Fund D
Supplemental Pretax	5%	100% in Fund D

3. Waive employee 1236, James B. Hammer, from plan S02.

Review of Questions Answered

1. What two methods are provided for enrolling employees in deferred plans?

2. What information is needed to enroll an employee in a deferred plan?

3. What facilities are provided to override system-generated data?

4. What forms are created as a result of an enrollment into a deferred plan?

5. What reports are available to track enrollments in deferred plans?

CHAPTER 10

Processing Annual Open Enrollments for Flex Plans

In This Chapter

Introduction

Your organization has the ability to enroll employees in all flex component plans for which they qualify. This could be a very laborious and time-consuming task if you had to manually calculate credits, produce enrollment forms, and enroll each employee in the plan(s) of his or her choice. Benefits Administration automates these tasks and streamlines the process of employee enrollment.

In this section you will learn how to enroll employees in your Flexible Benefits Program the first day of each benefits plan year. This is referred to as an open, or annual, enrollment.

About the examples

Throughout this section, we will be looking at examples from ACME Manufacturing enrollments in a flex plan (plan 600).

Tasks

This section explains the following:

- Calculating flex credits
- Producing enrollment choice forms
- Processing flex annual open enrollments
- Viewing the post-enrollment options and costs
- Viewing the post-enrollment credit details online
- Producing benefit confirmations
- Tracking unreturned enrollment forms

Prerequisites

Before you can process annual open enrollments for flex plans, the following must be established for:

- Organizations
- Employees
- Benefits Control Numbers

☞ *Refer to* **Setting Up Welfare Plans** *(on page 53) for more information about setting up Control Numbers.*

- Benefits plans

☞ *Refer to* **Setting Up Welfare Plans** *(on page 53),* **Setting Up Deferred Plans** *(on page 111), and* **Setting Up Flex Plans** *(on page 173) for information about setting up benefits plans.*

- Flex credit calculation formula (optional)
- Flex Master Plan

☞ *Refer to* **Setting Up Flex Plans** *(on page 173) for more information about defining a credit calculation formula and setting up Flex Master Plans.*

Questions answered

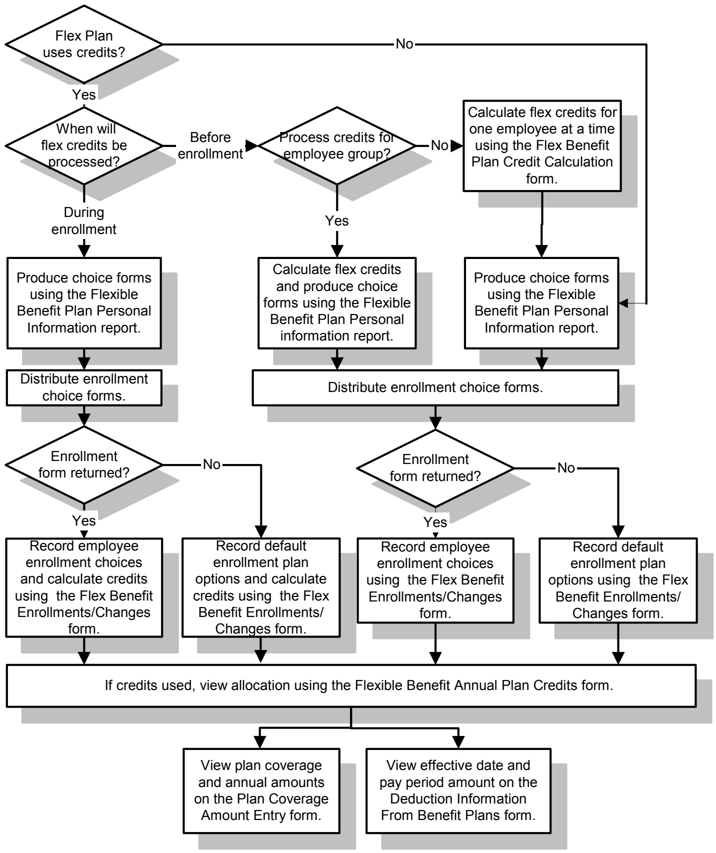
The following questions are answered in this section:

1. What steps need to be taken before the employee enrollment procedure can begin?
2. What options are available for producing enrollment forms?
3. What methods are available for completing open enrollments for flex plans?
4. What options are available to handle enrollments for employees who fail to return their enrollment forms?
5. What flex benefits communications are available for confirming enrollments?

Annual enrollment process

Employees will be given an annual opportunity to enroll in your organization's flex plan. If your flex plan uses credits, you may calculate them for each employee prior to enrollment or during the enrollment process. As a function of the enrollment process, you may provide employees with their plan options and then record the enrollment options selected by each employee. If enrollment forms are not returned, you have the option of enrolling an employee in eligible plan default options.

The following chart shows the flow of the annual enrollment process:



Apply the Concept

Describe the major steps in your annual open flex enrollment process.

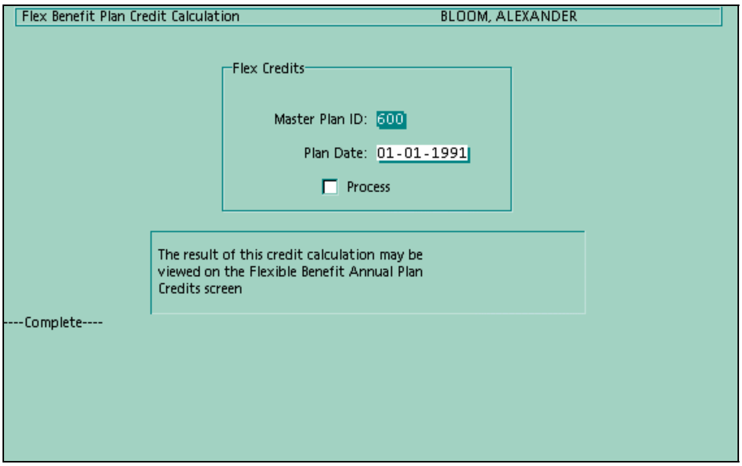
Pre-enrollment flex credits calculation

If your flex plan uses credits, you may calculate an employee's total flex credits prior to or during enrollment. This choice is recorded on the Flex Benefits Master Plan Rules form (TKFSCR). You may want to review the Credit Calculation Factors option list (BA69) to make sure that your formula has been defined. Then verify the Flex Plan Credits Calculation form (FCCSCR) to ensure that you have correctly stored the series of calculation options needed to calculate the flex total credits.

If you want to calculate flex credits prior to enrollment, you may use the Flexible Benefit Plan Personal Information report (4P-RPT) to calculate the credits for a group of employees or the Flex Benefit Plan Credit Calculation form (FCPSCR) to perform the calculation for an individual employee. If you select the online method, you must process one form per employee to generate his or her total flex credits. This form is used to record the processing parameters.

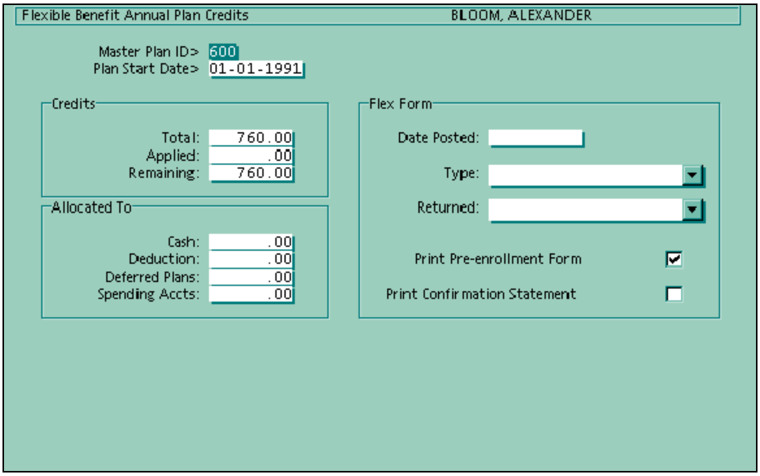
Note: *If credits are calculated before enrollment, eCyborg Interactive Benefits will process the Flex Benefit Plan Credit Calculation form (FCPSCR) as part of the interactive employee enrollment process.*

In the following example at ACME Manufacturing, the Flex Benefit Plan Credit Calculation form (FCPSCR) is set up to calculate the total flex credits for plan 600 for Alexander Bloom:



After the form is executed or the Flexible Benefit Plan Personal Information report (4P-RPT) is processed, the resulting credit calculation can be viewed on the Flexible Benefit Annual Plan Credits form (55CSCR). The calculated total credits are displayed in the Total and Remaining Credits text boxes. The Print Pre-enrollment Form check box is automatically selected; this indicates that an enrollment form will be printed for the employee when the Flexible Benefit Plan Personal Information report (4P-RPT) is processed.

In this example, the form indicates that a benefit enrollment document has been authorized for Alexander Bloom and that he has 760.00 credits:



If multiple calculation options are entered on the Flex Plan Credits Calculation form (FCCSCR), the Flex Benefit Annual Plan Credits form (55CSCR) calculates each option separately and totals each result to arrive at the total credits displayed on the Flexible Benefit Annual Plan Credits form (55CSCR).

See also:

- Calculating flex credits ***(on page 372)***

For detailed directions on calculating flex credits.

Apply the Concept

If your flex plan uses credits, how will you calculate them?

Enrollment choice forms

Employees can make an informed choice only if given adequate facts about the flex benefit plans for which they qualify. The enrollment choice forms display enrollment information and are personalized for eligible options. They include plan costs and instructions on how to indicate option choices. An explanation of the company contributions to the benefits program (credits) may also be part of this communication. Because you can customize these forms for use in your organization, all pertinent information can be relayed to an employee in an efficient and personalized manner.

A third-party administrator (TPA) may handle the enrollment process, using online or paper-based enrollment applications.

Report formats

The Flexible Benefit Plan Personal Information report (4P-RPT) meets all enrollment form requirements by providing a report for each eligible employee showing the component plans for which he or she is eligible. The report is intended to print on continuous 8.5" x 11" stock paper so it will fit into standard envelope sizes.

The report parameters allow you to choose one of the following formats:

- **Printed long form**
  This multipage statement produces a cover letter, an employee data page, and one page per benefit containing information about the plan, the various options available, and the cost. These pages also include a statement of the benefit options in which an employee is currently enrolled and the cost of the options.
- **Printed short form**
  This is a one-page printed statement of coverage choices for the coming flex year, including the cost of these choices and space to indicate option choices with their associated costs. The statement also displays the number of credits that have been awarded.
- **Extract file of all enrollment-related data**
  The extract file data can be used in another application, if desired. This extract file contains information and plan/option choices in four different 80-byte record types.

This report must be scheduled and various report parameters must be selected, depending on which type of report format you wish to use. You may select report options that will allow you to simultaneously calculate flex credits.

Employee selection

Solution View can be used to create a selection routine to limit the employees processed by the report to those who meet the criteria you have defined. The name of the routine is then specified in a parameter for the Flexible Benefit Plan Personal Information report (4P-RPT).

☞ *Refer to the Using Solution View documentation for more information on creating a selection routine (PC Download).*

See also:

- Producing enrollment choice forms ***(on page 374)***

For detailed directions on producing enrollment choice forms.

Apply the Concept

Describe how you will inform employees about the flex enrollment choices for which they qualify.

Open enrollments

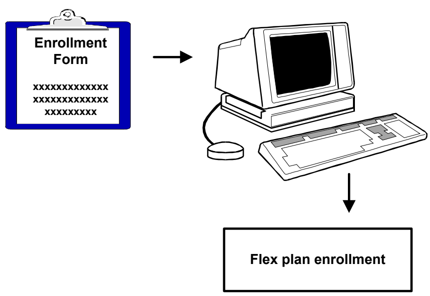
After open enrollment forms have been returned, you will be ready to enroll employees in your Flexible Benefits Program. You may be enrolling an employee in the flex plan for the first time or re-enrolling an employee in the same flex plan for a different plan year.

If a deferred plan is included in the Flex Master Plan, you will be able to specify a variable amount for the plan only if an employee is already enrolled in the plan on the Deferred Plan Enrollments/Changes form (64-SCR).

You may enroll employees online in your Flex Master Plan and its component plans using the Flex Benefit Enrollments/Changes form (55FSCR). You may also use this form for batch enrollment and changes to enrollment options.

Note: *Normal system batch processing using the Batch Layout Facility (BATCHL) will NOT produce desired results. You must create the records for batch loading.*

☞ *Refer to* **Batch Loading of Benefits Forms** *(on page 917) for information about batch enrollments.*



The enrollment process can be quite involved. To streamline the enrollment process, Benefits Administration uses a multipanel form to complete several detailed tasks simultaneously:

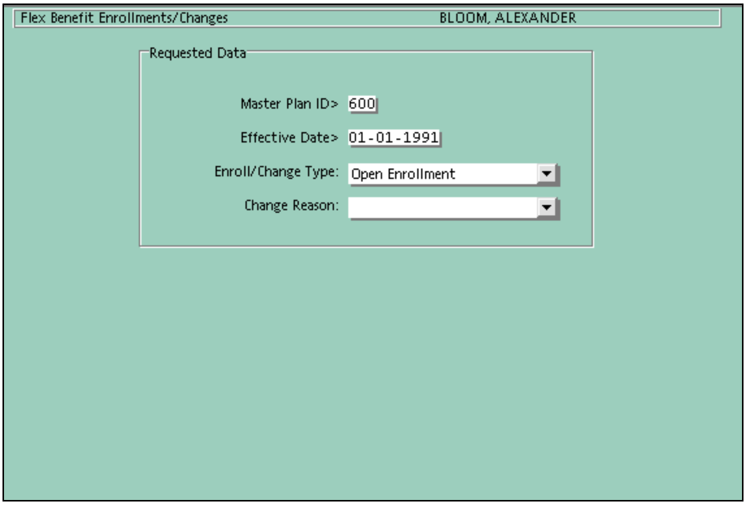
- Check eligibility and display only the plans that an employee is eligible to elect.
- Accept your entry of the option elected for each plan, a pre- or posttax indicator, and any required variable amount.
- Calculate the annual credit cost of each option elected using your plan table rules. For example, single coverage in a dental plan may cost 200.00, based on rules established on the Coverage And Contribution Factors table (TM-SCR).
- Edit all entries against tables and option lists to ensure you are using valid plans and options.
- Calculate the total credits allocated to the selected options and the credits remaining—either a positive or negative number. For example, an employee who is allocated 1,000 flex credits may spend 750 of the credits on flexible benefits. There are 250 credits remaining.
- Process the Flex Master Plan and component plan enrollment when all entries have been verified.
- Create a prototype deduction HED if more credits are used than granted, or create a prototype earnings HED if fewer credits are used than granted.
- Display the total credits allocated, credits used, and credits remaining.
- Allow amounts directed to a deferred plan on the form to be included in the calculation of total credits used. The form creates a prototype HED for the fixed amount the employee chose to contribute to the plan.
- Automatically update the Flexible Benefit Annual Plan Credits form (55CSCR) with the number of credits allocated, credits remaining, and deductions, if applicable.

At any time during the processing of the enrollment form, you may exit and cancel the enrollment.

Enrollment processing

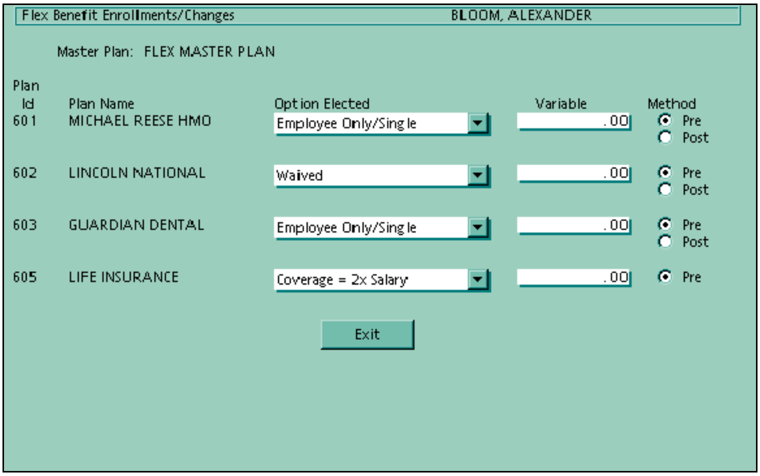
Let's look at the enrollment process in detail. The flex enrollment process involves multiple form panels.

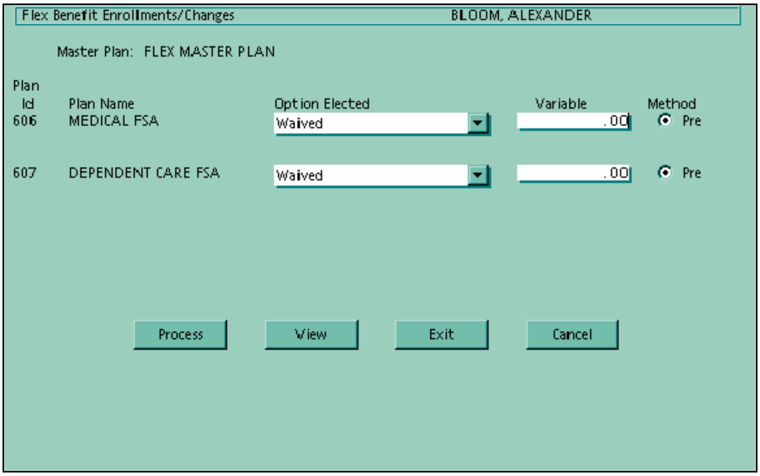
The first form panel contains the Flex Master Plan ID and the effective date of the enrollment, with the type of enrollment or change and a change reason that is used when processing a life status change for benefits. The opening panel of Alexander Bloom's enrollment at ACME Manufacturing would look like the following form:



After entering the first form panel, the returned form panel(s) displays all of the component plans for which an employee is eligible, showing current enrollment information for plans the employee was enrolled in previously. Up to four plans are displayed on each form panel. On this form you can enter the option, variable, and tax method for the plans the employee selected.

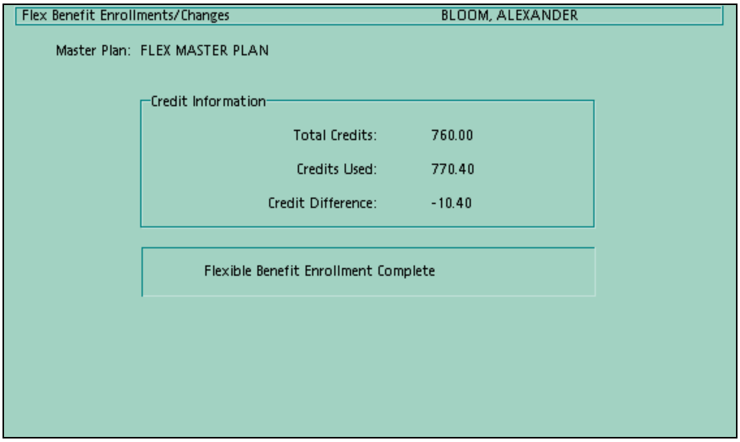
Alexander Bloom's enrollment choices have been recorded on this panel of the form:





After all plan option entries have been made, option buttons at the bottom of the form allow you to review or remove the entries or process the enrollment.

When the enrollment has been processed and the calculation of the credit cost for each plan is complete, the program subtracts the cumulative credits applied from the total credits granted to identify any remaining credit balance.For Alexander Bloom, the Credit Difference amount is -10.40 on the last panel of the Flex Benefit Enrollments/Changes form (55FSCR):



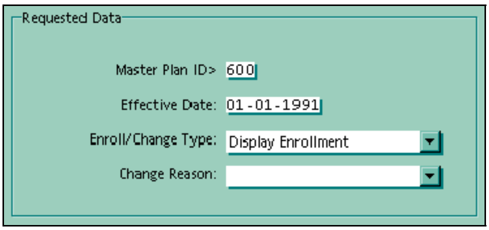
See also:

- Processing flex annual open enrollments ***(on page 376)***

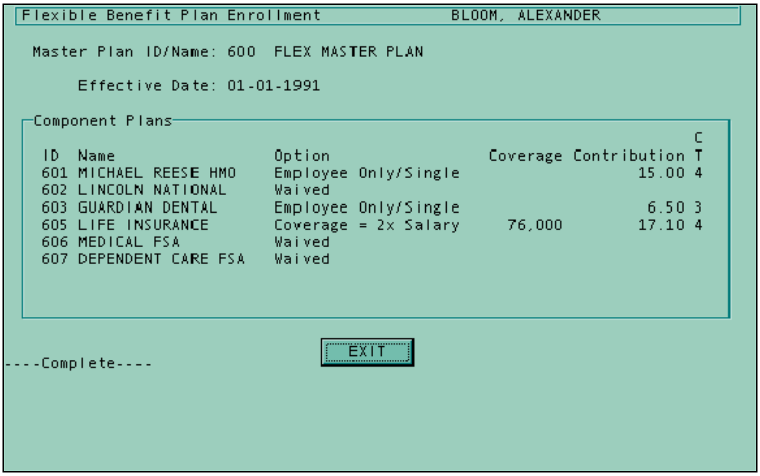
For detailed directions on processing flex annual open enrollments.

View the completed enrollment

If you want to review the completed enrollment, return to the first panel of the Flex Benefit Enrollments/Changes form (55FSCR) and indicate that the form is to be shown in Display Mode.

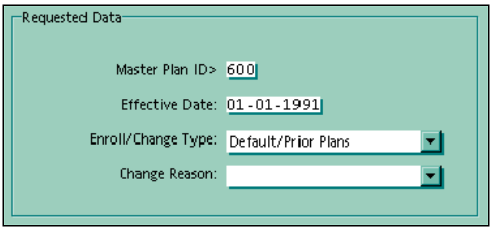


The following is the resulting form display for Alexander Bloom:



Prior year's elections

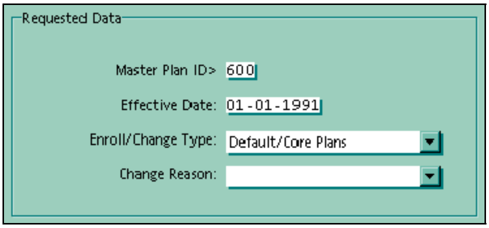
In those cases in which an employee has selected enrollment based on the prior year's elections, the 'Default/Prior Plans' option can be selected on the opening panel of the Flex Benefit Enrollments/Changes form (55FSCR).



This option will automatically enroll an eligible employee in the Flex Master Plan and all eligible component plans using the option choices of the employee's most recent enrollment. You will not have the chance to make any changes to the enrollment choices during the enrollment if this enrollment method is used.

Default enrollments

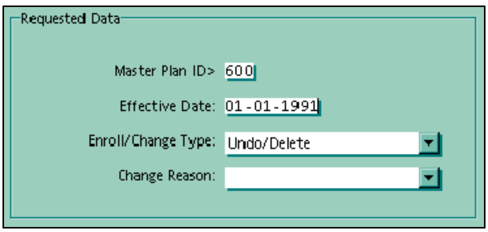
If you anticipate having to use default options in the event that an employee fails to return the enrollment form by the date specified, then you need to plan ahead when you are establishing the Benefit Plan Rules form (TK-SCR). A plan will be considered a core/default plan only if you have chosen a Class list box option of 'Automatic' on the Flex Master component plans. The Default Enrollment Option and Pre-tax or Post-tax indicator must be set up for default enrollments.



If flex component plans are designated as core/default plans, then the Enroll/Change Type list box option of 'Default/Core Plans' on the Flex Benefit Enrollments/Changes form (55FSCR) will apply the default plans to the enrollment. An eligible employee will be enrolled automatically in the Flex Master Plan and the component core default plans. You will not have the chance to make any changes to the enrollment choices during the enrollment if this method is used.

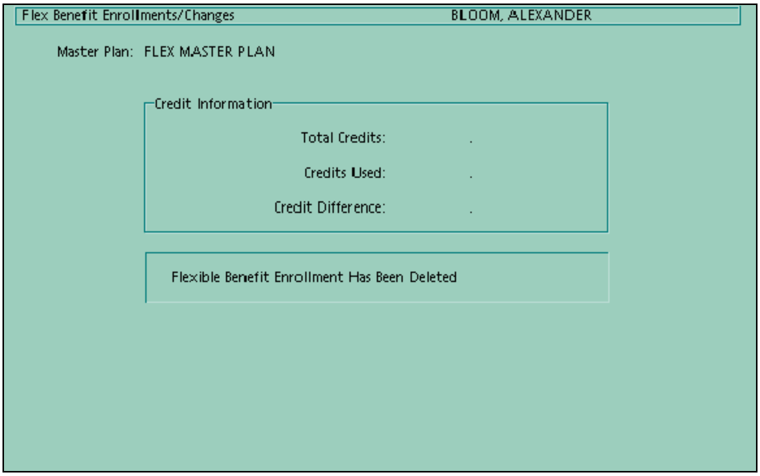
Enrollment error correction

The 'Undo/Delete' option in the Enroll/Change Type list box of the Flex Benefit Enrollments/Changes form (55FSCR) is used to cancel a mistaken enrollment immediately after it has been processed.



The 'undo' process deletes the employee's current flex plan enrollment segments. If credits had been allocated, the Flexible Benefit Annual Plan Credits form (55CSCR) values are restored to their pre-enrollment condition.

When the enrollment was reversed for Alexander Bloom, the resulting form confirmed the enrollment deletion:

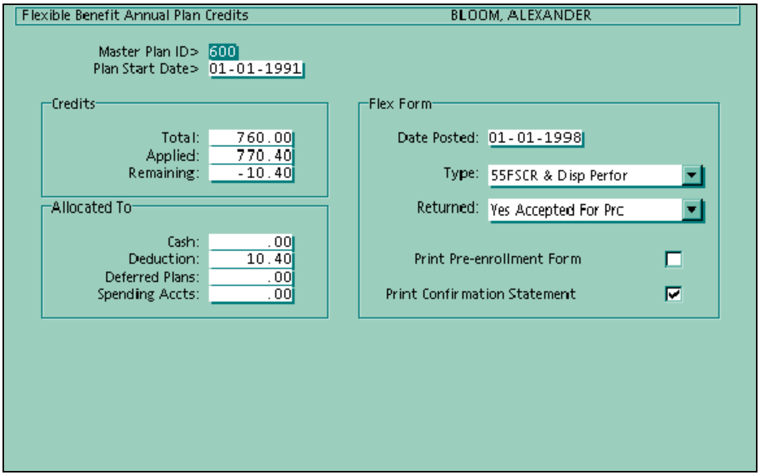


Note: *In the event that this enrollment was not an initial enrollment for the employee, Undo/Delete should be used again with the prior year Plan End Date to delete any shutoff segments created during the enrollment.*

View the credit allocations

If you want to see the complete credit and credit allocation detail after enrollment, view the Flexible Benefit Annual Plan Credits form (55CSCR). If the Flex Benefits Master Plan Rules table (TKFSCR) specifies that credits are to be calculated during enrollment, the Flexible Benefit Annual Plan Credits form (55CSCR) is created during the enrollment process.

In this example, Alexander Bloom's remaining credits were allocated as follows:



If the credit balance is positive and if the Net Credit method is indicated for the plan, an HED is created for the earnings to be paid to the employee. The remaining credits are put into the Cash text box, and the Deduction text box is zeroed.

If the credit balance is negative and if the Net Credit method is indicated for the plan, the HED can be set up so the Deduction text box is set to the amount of any negative credits. This amount will be deducted from the employee's paycheck.

Any total credits an employee assigned to deferred plans is displayed in the Deferred Plans text box. This credit amount may represent a total of multiple allocations if more than one deferred plan was assigned.

The Date Posted text box displays the date on which the flexible benefit remaining balance distribution was performed.

The Type list box value shows that the enrollment form was processed to allocate the total credits and the remaining credits have been allocated to either cash or a deduction.

The Returned list box value shows that the employee enrollment form was processed. The Print Confirmation Statement indicator is automatically selected by the system when the enrollment is processed for an employee. This list box indicates that a confirmation statement will be produced for the employee when the Flexible Benefit Plan Enrollment Confirmation report (4X-RPT) is processed.

Note: *Several segments are created at enrollment. You may want to schedule the Employee Master File Space Analysis report (10-RPT) before flex enrollments to be sure there is enough room to insert the segments.*

☞ *Refer to* **Technical Considerations** *(on page 927) for more information about the Employee Master File Space Analysis report (10-RPT).*

- Viewing the post-enrollment credit details online ***(on page 386)***

For detailed directions on displaying the post-enrollment credit details.

Verifying an employee's deduction/earning information

Once an employee has been successfully enrolled in a flex plan, you can view his or her component plan coverage and annual amounts on the Plan Coverage Amount Entry form (53-SCR).

The component plans show the effective date and pay period amount on the Deduction Information From Benefit Plans form (54-SCR). Earning and deduction totals for the year are the pay period amount times the number of pay periods until the end of the year. When the HED Segment Changes This Period report (8R-RPT) is run, this information is copied and used to update payroll records.

One Plan Coverage Amount Entry form (53-SCR) and one Deduction Information From Benefit Plans form (54-SCR) are generated for each contribution type on each component plan in which the employee is enrolled.

For detailed directions on displaying the post-enrollment options and costs.

☞ *Refer to* **Enrolling Employees in Welfare Plans** *(on page 281) and* **Enrolling Employees in Deferred Plans** *(on page 321) for more information about these two forms.*

Enrollment tracking tools

Two flex benefits reports allow you to track enrollment information on hard copy:

- Flexible Benefit Plan Credit Allocations (4Y-RPT)
- Flexible Benefit Plan Forms Not Returned (4Z-RPT)

Credit allocation information

If you would like to verify credit allocations by employee on hard copy rather than online, you can produce the Flexible Benefit Credit Allocations report (4Y-RPT). It lists all employees who have a Flexible Benefit Annual Plan Credits form (55CSCR) recorded for the Plan ID and plan year specified on the report parameter form.

All information on the form is printed for each employee listed.

Unreturned enrollment forms

As the enrollment return date approaches, you may find it helpful to produce a list of all employees who have not yet returned enrollment forms.

The Flexible Benefit Plan Forms Not Returned report (4Z-RPT) lists all employees who have a Flexible Benefit Annual Plan Credits form (55CSCR) recorded (for the plan ID and plan year specified on the parameter form) with a Flex Form Returned Indicator of 'Not Yet Returned', 'Rejected Back To Emp', 'Default Enrollment', or blank.

See also:

- Tracking unreturned enrollment forms ***(on page 388)***

For detailed directions on tracking unreturned enrollment forms.

Apply the Concept

Describe how you will handle employees who do not return open enrollment forms by the expected return date.

Benefits communications

After enrollment has been completed and credits have been allotted, you should relay this information to your employees, including information about your Flexible Benefits Program.

The Flexible Benefit Plan Enrollment Confirmation report (4X-RPT) provides a summary of all component plans an employee has selected for the Flexible Benefit Master Plan specified on the parameter form. The summary lists each of the component plans an employee selected, the option, and the cost.

The report is generated for all selected employees enrolled in the plan on any day within the plan year.

The Flex Benefits Master Plan Rules table (TKFSCR) is used to determine whether an annual or pay period amount is also used when the cost of each component plan is printed on the report. This table is used to determine the designated HED that is used to print the appropriate contribution amount made to a deferred plan.

This report prints continuous 8.5" x 11" forms that can be inserted in a standard envelope and distributed to employees. This report may also be printed on stock paper or used as a prototype to select the appropriate plan segments for reporting on a user-provided, preprinted form.

A cover letter is printed for each employee if you specify it on the parameter form. This cover letter includes a note about who to call if an employee has questions. The cover letter text can be changed by modifying the Cyborg Scripting Language code.

The subsequent pages contain employee information and the employee plan selection information. If the Net Credit method was used, a note is included on the last page that reports the deductions or earnings as a result of the enrollment. No note is included if the Deduct Credits by Plan method was selected on the Flex Benefits Master Plan Rules form (TKFSCR).

Solution View can be used to create a selection routine to be used by the Flexible Benefit Plan Enrollment Confirmation report (4X-RPT). The selection routine limits the employees processed to those who meet the criteria you have defined. The name of the selection routine is specified on the parameter form for this report.

☞ *Refer to the Using Solution View documentation for more information on creating a selection routine (PC Download).*

For detailed directions on producing benefit confirmations.

Detailed Directions

This section provides detailed directions on completing a business task.

Tasks

Completing the Guided Practice

In the Guided Practice for this section, you will process credit calculations for two employees. You will then enroll each employee in flex benefits plan 700 and verify the credit allocation to determine if any employee has unused credits or has used more than the allocated credits. Specific details for entering plan values are described in the steps for the tasks. Although report parameter explanations are included in tasks 2, 5, and 6, you are not expected to run these reports as part of the Guided Practice.

You must have completed the Guided Practices in '***Setting Up Flex Plans*** (on page 173)' to guarantee the successful completion of the Guided Practice that follows.

Calculating flex credits

If you choose to calculate flex credits for an employee using the Flex Benefit Plan Credit Calculation form (FCPSCR), follow these steps:

Note: *You may prefer to generate the enrollment form and calculate employee flex credits simultaneously using the Flexible Benefit Plan Personal Information report (4P-RPT).*

☞ *Refer to* **Producing enrollment choice forms** *(on page 374) for information about the Flexible Benefit Plan Personal Information report (4P-RPT).*

1. Access the Flex Benefit Plan Credit Calculation form (FCPSCR)

Access this form by making the following selections from the Navigator:

Component: Flex Plans Enrollment/Processing
Process: Flex Credits
Task: Flex Plan Credit Calculation

For practice, access the Flex Benefit Plan Credit Calculation form (FCPSCR) for Organization 999999 for employee 6003.

2. Enter the Master Plan ID

Type the three-character Flex Master Plan identifier.

For practice, type '700'.

3. Enter the Plan Date

Type the current Flex Master Plan date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For practice, type a date representing January 1 of the current year, for example, '01-01-1998' (US and Canada) or 1 January (elsewhere).

4. Select the Process check box

Select the Process check box to activate the calculation of credits.

For practice, select the Process check box.

5. Click Save or press Enter

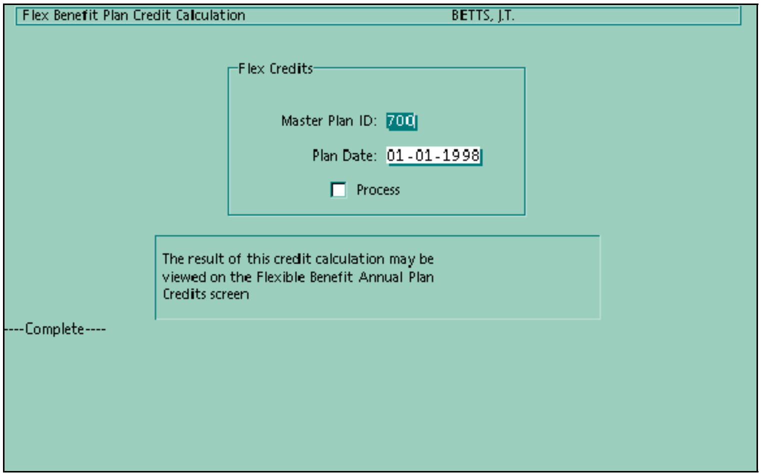
The flex total credits are calculated and a '—Complete—' message is displayed.

The results of the calculation can be viewed on the Flexible Benefit Annual Plan Credits form (55CSCR). It shows the total credits calculated in the Total and Remaining Credits text boxes.

For practice, click Save or press Enter.

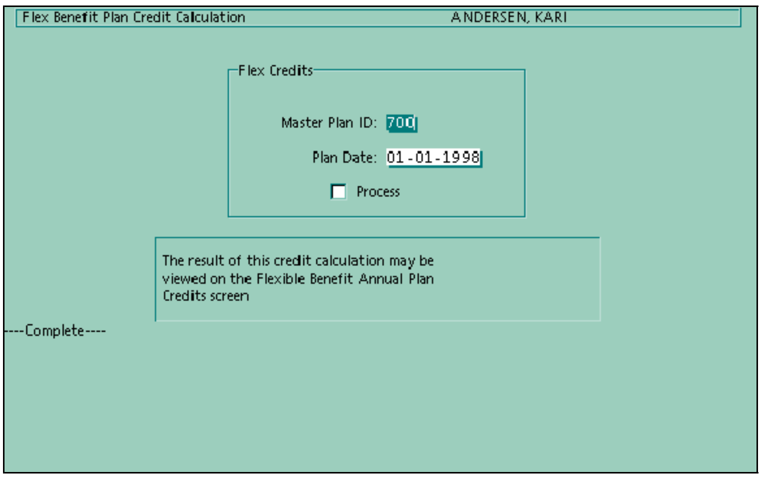
Refer to **Viewing the post-enrollment credit details online** *(on page 386) for instructions on how to access the Flexible Benefit Annual Plan Credits form (55CSCR).*

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



To complete the Guided Practice, process the credit calculation for employee 6004.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



See also:

- Pre-enrollment flex credits calculation ***(on page 356)***

For more information about calculating pre-enrollment flex credits.

Producing enrollment choice forms

Three options are available for producing enrollment choice forms using the Flexible Benefit Plan Personal Information report (4P-RPT):

- A short form that displays the plans and options for which an employee is eligible, including the cost of each choice
- A long form that includes a cover letter, a data page, and a one-page cost document for each eligible plan
- An extract file of option choices and personal information

You may also calculate flex credits for employees by running this report. The output of this report will be determined by the parameter choices you make.

Note: *You may change the delivered cover letter text by modifying the literals in the Cyborg Scripting Language subroutine 4PCOVL. Plan descriptions require custom entries. See the documentation in subroutines 4PPLDC and 4PALTO for details. The text on the short enrollment form may be modified by changing subroutines 4PSFOP (opening paragraphs) and 4PSFCP (closing paragraphs).*

☞ *Refer to either eCyborg: Using the Web Client or Using The Solution Series: Administrative Solutions documentation for procedural help in setting up a report group, adding a report to it, and entering the report parameters.*

1. Enter the Plan Year Start Date

Type the flex plan start date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

2. Enter the Master Plan ID

Type the Master Plan ID in the format XXX.

3. Enter the Final Form Return Date

Type the final form return date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

This is the date that will appear on the Flexible Benefit Annual Plan Credits form (55CSCR) that may be generated by this program. This is the latest date that employees can return the form.

4. Enter the Prior Year Master Plan ID

Type the Prior Year Master Plan ID in the format XXX. If this is the first year for the flexible benefit plan, leave this parameter blank.

This parameter is used to access and display the prior-year options on the report.

5. Select the Print Cover Letter check box

Click this check box to print the cover letter, or leave the check box blank to not print the cover letter.

6. Enter the Selection Routine (optional)

If you enter 'X' in the Report Format Option text box on this form to create an extract file, in the Selection Routine text box type the six-character, customer-defined, Solution View program name used to select employees.

7. Enter the Report Format Option

Type one of the following options:

- 'A'—Print the standard version, one page for each eligible plan.
- 'S'—Print the short version of the enrollment form.
- 'X'—Create an extract file of option choices and personal information (the Print Cover Letter indicator defaults to 'N' with this option).

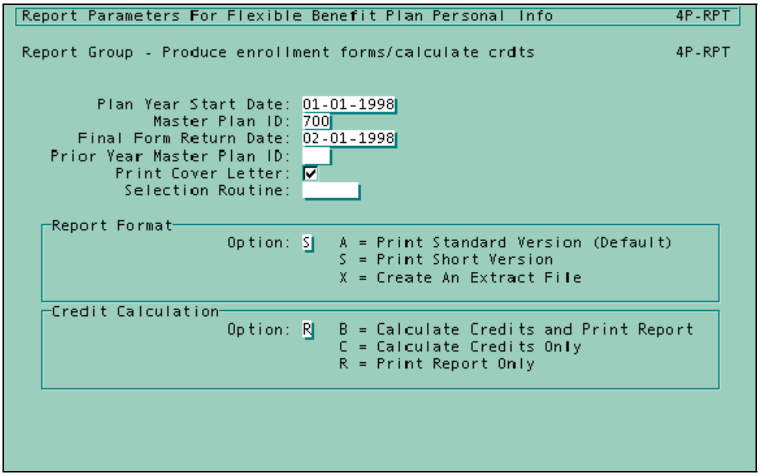
If left blank, this text box defaults to 'A'.

8. Enter the Credit Calculation Option

Type one of the following report options:

- 'B'—Calculate credits, create flex total credits, and print a report for each selected employee.
- 'C'—Calculate credits for each selected employee and do not print the reports.
- 'R'—Only print a report for each employee.

When completed, the report parameters may look similar to the example that follows:



Depending on the options selected in the parameters, the Flexible Benefit Plan Personal Information report may calculate total flex credits and display them on the Flexible Benefit Annual Plan Credits form (55CSCR) for each eligible employee. It may also produce an enrollment choice form (long or short) for each eligible employee.

☞ *Refer to* **Viewing the post-enrollment credit details online** *(on page 386) for instructions on how to view the Flexible Benefit Annual Plan Credits form (55CSCR).*

See also:

- Enrollment choice forms ***(on page 358)***

For a description of enrollment choice forms.

Processing flex annual open enrollments

To process a flex annual open enrollment using the Flex Benefit Enrollments/Changes form (55FSCR), follow these steps:

Note: *Total flex credits may be calculated by this form if you chose the 'During Enrollment' option on the FlexBenefits Master Plan Rules form (TKFSCR).*

☞ *Refer to* **Batch Loading of Benefits Forms** *(on page 917) for information on processing this form in batch mode.*

1. Access the Flex Benefit Enrollments/Changes form (55FSCR)

Access this form by making the following selections from the Navigator:

Component: Flex Plans Enrollment/Processing
Process: Flex Enrollment
Task: Flex Benefit Plan Enrollment

For practice, access the Flex Benefit Enrollments/Changes form (55FSCR) for Organization 999999 for employee 6003.

Note: *This form has three panels that allow you to set the parameters, select/correct plan options, and display the results of the enrollment.*

2. Enter the Master Plan ID

Type the three-character Flex Master Plan identifier.

For practice, type '700'.

3. Enter the Effective Date

Type the plan entry date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere). For an open enrollment, this will be the first day of the plan year.

For practice, type a date representing January 1 of the current year, for example, '01-01-1998'(US and Canada) or 1 January (elsewhere).

4. Select the Enroll/Change Type

Select an option from the Flex Action option list (BA64) to indicate the type of action to be performed by the form.

During an open enrollment period, one of three options may be used:

- 'Open Enrollment'—To process a complete new enrollment in a flex plan, either for the first time or as a reenrollment in the same flex plan for a different plan year.
- 'Default/Core Plans'—To automatically enroll eligible employees in the Flex Master Plan and the component core default plans/options defined in each plan's Benefits Plan Rules form (TK-SCR).
- 'Default/Prior Plans'—To automatically enroll eligible employees in the Master Plan and all eligible component plans using the option choices of an employee's last enrollment.

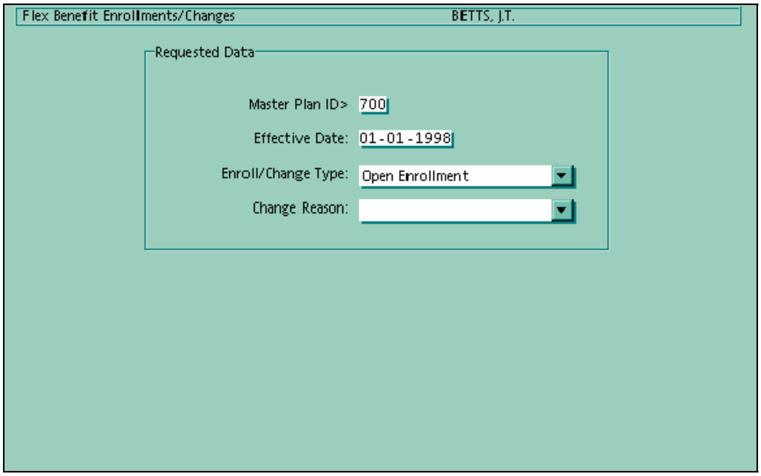
For practice, select 'Open Enrollment'.

5. Enter the Change Reason (optional)

This list box is used only if the option in the Enroll/Change Type text box indicates a life status change.

For practice, leave this list box blank.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



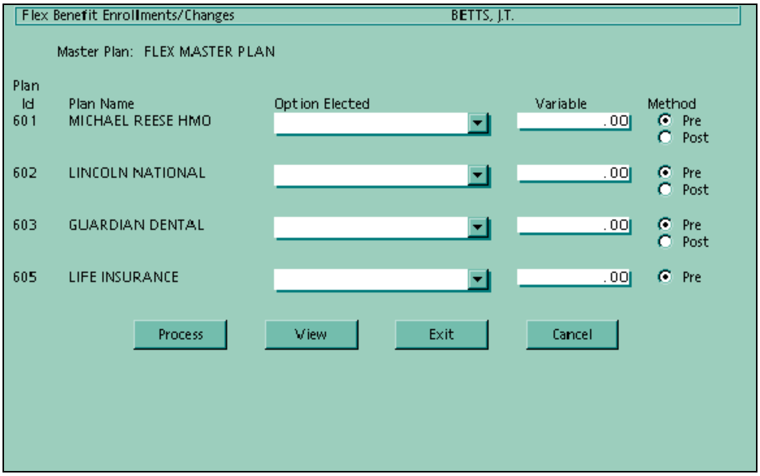
6. Click Save or press Enter

The returned form(s) display only the component plans for which the employee is eligible. If a deferred plan is included in the Flex Master Plan, it will be displayed on the form only if the employee is already enrolled in the plan on the Deferred Plan Enrollments/Changes form (64-SCR).

One line is displayed for each eligible component plan. The Plan ID and Plan Name are displayed in Display Mode. The Option Elected, Variable, and Pre/Post Tax Method information is displayed for entry in groups of four plans per form. More than one form of entries may be required to list all the eligible plans.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



Use the following values to complete the next three entries for each Plan ID:

Plan ID	Option Elected	Variable	Method
601	Employee Only/Single	—	Pretax
602	Waived	—	—
603	Employee Only/Single	—	Pretax
605	Coverage=2x Salary	—	Pretax

7. Select the Option Elected

Select the option the employee elects for the plan. Options for this list are provided by the Option Elected option list (BA03). Any plan that the employee declines must have an option entry of 'Waived'. There must be an entry in this list box for each plan on the form.

For practice, make the entries shown in the preceding table.

8. Enter the Variable

Use this text box to enter an up-to-nine-digit employee-dependent factor such as a fixed amount needed to calculate plan coverage or contribution amount. If the plan requires a variable entry and the text box is left blank, an error message is displayed.

Note: *When a deferred plan is attached to a flex plan, the Flex Benefit Enrollments/Changes form (55FSCR) displays the deferred plan if the employee was previously enrolled on the Deferred Plan Enrollments/Changes form (64-SCR). The actual amount of flex credits to be credited to the deferred plan must be entered. Whether you enter an annual, monthly, per pay period, or weekly amount depends on the frequency specified in the Result Freq list box on the Coverage And Contribution Factors form (TM-SCR).*

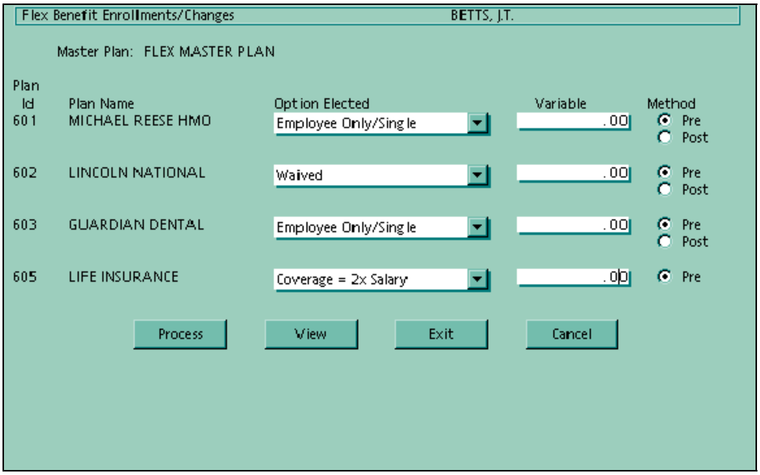
For practice, make the entries shown in the preceding table.

9. Select the Method

Select whether the employee has elected the pre- or posttax contribution. This indicator is used to select the proper HED from the plan's Benefit Plan Rules table (TK-SCR).

For practice, make the entries shown in the preceding table.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



Note: If the only buttons available to you at the bottom of the form are Exit and Cancel, go to Step 10. Otherwise, go to Step 12.

10. Click Save or press Enter

To proceed to the next form of component plans, click Save or press Enter. If no errors are detected in the values entered, the next form of component plans is displayed and ready for entry of the same three entries.

Note: Form errors will appear if:

- *The plan tables are missing or not properly set up*
- *The option elected is invalid for the plan*
- *A Variable Factor has not been entered and is required by the plan*

For practice, click Save or press Enter.

11. Repeat steps 7, 8, and 9 for each remaining component plan

Enter the Option Elected, Variable, and Method information for each of the remaining component plans.

For practice, make no further entries in these entries.

12. Select an action button

Select one or more of the action buttons to complete the enrollment process:

- **Process button----**Process all enrollment information. When all plans are processed, the employee record is updated and the credit calculation is displayed on the third panel of the form.
- **View button----**Display the results of the plan credit calculations without actually updating the employee record. The credit/cost is displayed as an annual amount or a pay period amount as indicated on the Flex Benefits Master Plan Rules form (TKFSCR).

While using the View button, these buttons display at the bottom of the form:

- **Process button----**Process all enrollment information. When all plans are processed, the employee's record is updated and the credit calculation panel of the form is displayed.
- **Next Page button----**View additional plans on other panels.
- **Exit button----**Return to a blank first form without processing the enrollment or updating the employee's record.
- **Restart button----**Leave View Mode and return to the first processing form without updating the employee's record. New entries can then be made.
- **Cancel button----**Return the current form panel to its original appearance.

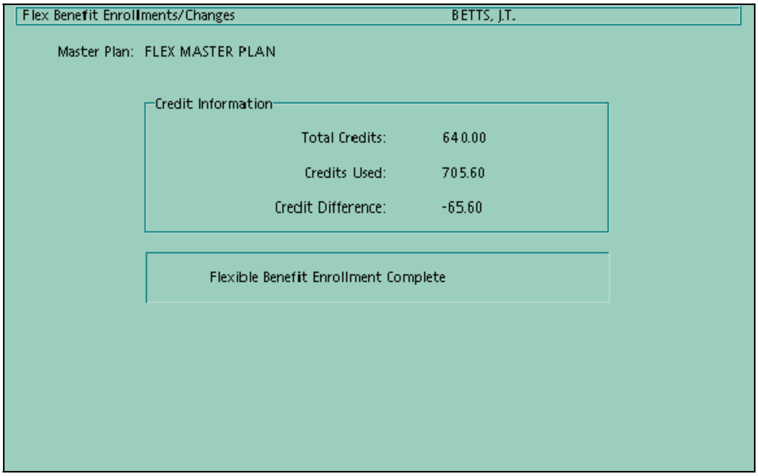
For practice, click the View button to review the entries and their associated costs. Then click the Process button to complete the enrollment.

If no errors are detected in the values entered, the third form panel displays the credit information based on the options selected.

Note: *Form errors will appear if:*

- *The plan tables are missing or not properly set up*
- *The option elected is invalid for the plan*
- *A Variable Factor has not been entered and is required by the plan*

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



When the enrollment has been processed and the calculation of the credit cost for each plan is complete, the program subtracts the credits applied from the total credit to identify any remaining credit balance.

To complete the Guided Practice, enroll employee 6004 using the entries that follow:

Plan ID	**Option Elected**	**Variable**	**Method**
510	Enrolled	135.20	Pretax
601	Waived	—	—
602	Employee Only/Single	—	Pretax
603	Employee & Spouse	—	Posttax
605	Coverage=2x Salary	—	Pretax

For more information about processing open enrollments.

Viewing the post-enrollment options and costs

To display the post-enrollment plan options and costs using the Flex Benefit Enrollments/Changes form (55FSCR), follow these steps:

1. Access the Flex Benefit Enrollments/Changes form (55FSCR)

Access this form by making the following selections from the Navigator:

Component: Flex Plans Enrollment/Processing
Process: Flex Enrollment
Task: Flex Benefit Plan Enrollment

For practice, access the Flex Benefit Enrollments/Changes form (55FSCR) for Organization 999999 for employee 6003.

2. Enter the Master Plan ID

Type the three-character Flex Master Plan identifier.

For practice, type '700'.

3. Enter the Effective Date

Type the effective date of the Flex Master Plan in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

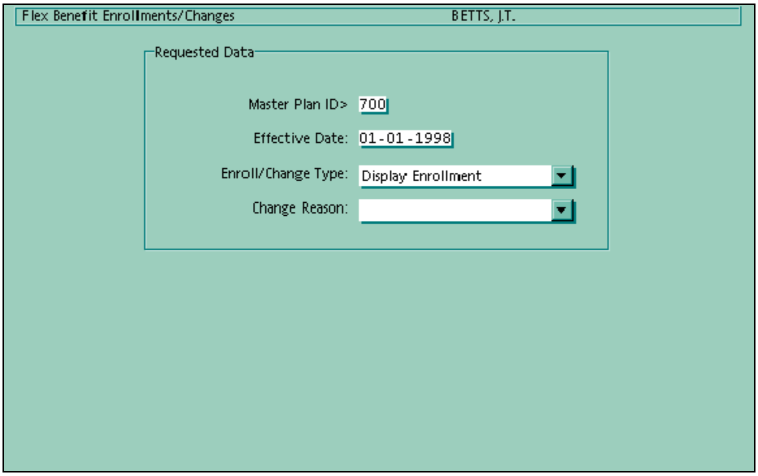
For practice, type a date representing January 1 of the current year, for example, '01-01-1998'(US and Canada) or 1 January (elsewhere).

4. Select the Enroll/Change Type

Select the 'Display Enrollment' option from the Flex Action option list (BA64) to indicate the type of action to be performed by the form.

For practice, select 'Display Enrollment'.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:

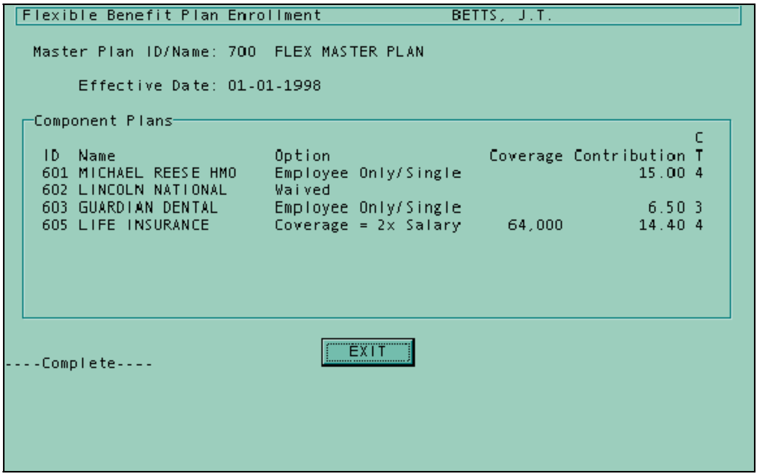


5. Click Save or press Enter

The returned form(s) displays the component plans for which the employee is eligible and the option choices and costs for each plan.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



Flexible Benefit Plan Enrollment BETTS, J.T.

- Open enrollments ***(on page 360)***

For more information about viewing enrollments.

Viewing the post-enrollment credit details online

To display the resulting credit details using the Flexible Benefit Annual Plan Credits form (55CSCR), follow these steps:

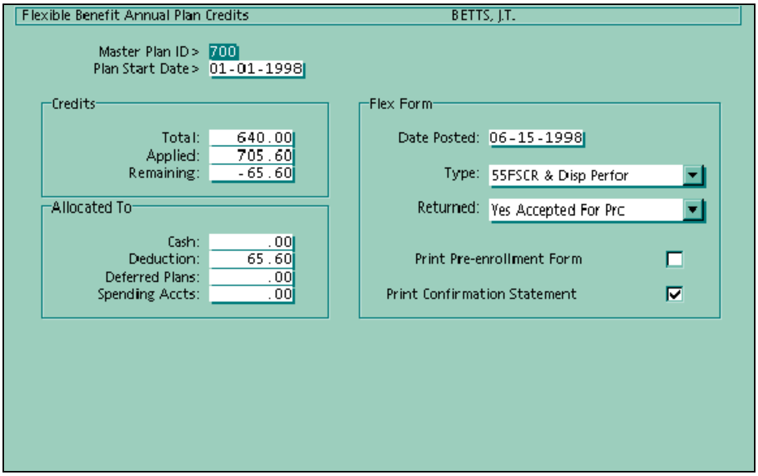
Access this form by making the following selections from the Navigator:

Component: Flex Plans Enrollment/Processing
Process: Flex Enrollment
Task: Flex Credits

For practice, access the Flexible Benefit Annual Plan Credits form (55CSCR) for Organization 999999 for employee 6003.

The form displays the credits and allocation information for the employee, along with the flex enrollment form information and authorization for the confirmation document.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



See also:

- Open enrollments ***(on page 360)***

For more information about viewing enrollment results.

Producing benefit confirmations

To produce benefit confirmations using the Flexible Benefit Plan Enrollment Confirmation report (4X-RPT), complete the report schedule by entering the following report parameters:

☞ *Refer to either the eCyborg: Using the Web Client or Using The Solution Series: Administrative Solutions documentation for procedural help in setting up a report group, adding a report to it, and entering the report parameters.*

Note: This report must be executed in its own report group without any other reports.

Note: Cover letter text can be modified by changing the Cyborg Scripting Language in the 4XSUB1 subroutine.

1. Enter the Plan Year Start Date

Type the plan year start date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

The report is generated for all employees enrolled in the plan on any day within the plan year.

2. Enter the Master Plan ID

Type the three-character Flex Master Plan identifier.

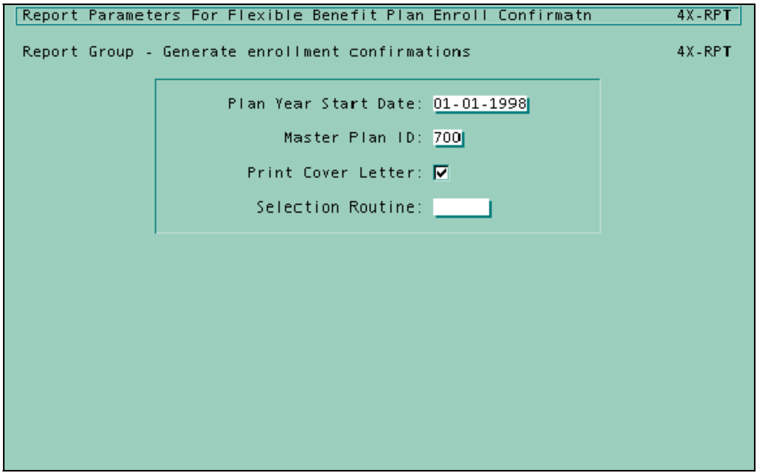
3. Select the Print Cover Letter check box

Click this check box to print the cover letter or leave the check box blank to not print the cover letter.

4. Enter the Selection Routine

Enter the six-character, user-defined Solution View selection routine that you have created to limit the employees processed to those who meet the criteria you have defined.

When completed, the report parameters may look similar to the example that follows:



Once it has been processed, the Flexible Benefit Plan Enrollment Confirmation report (4X-RPT) produces an 8.5" x 11" cover page followed by pages that continue the employee and plan selection information.

See also:

- Benefits communications ***(on page 371)***

For more information about using this report for enrollment confirmations.

Tracking unreturned enrollment forms

To track unreturned enrollment forms using the Flexible Benefit Plan Forms Not Returned report (4Z-RPT), complete the report schedule by entering the following report parameters:

Refer to either the eCyborg: Using the Web Client or Using The Solution Series: Administrative Solutions documentation for procedural help in setting up a report group, adding a report to it, and entering the report parameters.

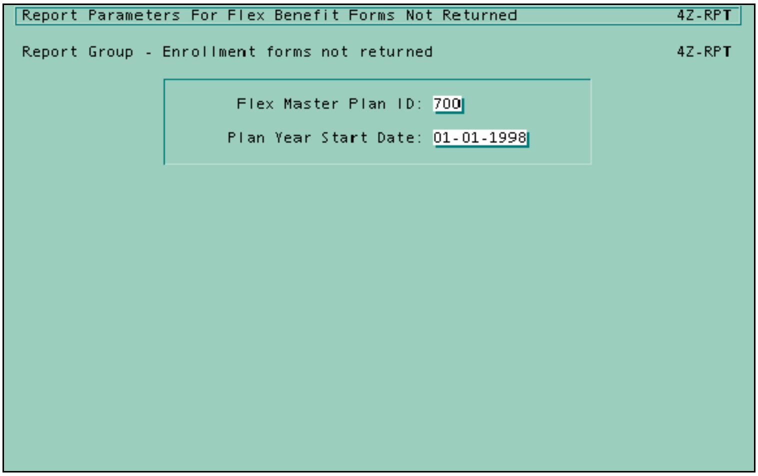
1. Enter the Flex Master Plan ID

Type the three-character Flex Master Plan identifier.

2. Enter the Plan Year Start Date

Type the plan year start date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

When completed, the report parameters may look similar to the example that follows:



Once it has been processed, the Flexible Benefit Plan Forms Not Returned report (4Z-RPT) lists all employees who have a Flexible Benefit Annual Plan Credits form (55CSCR) recorded (for the Plan ID and plan year specified on the parameter form) with a Flex Form Returned list box entry of 'Not Yet Returned', 'Rejected Back To Emp', 'Default Enrollment', or blank.

See also:

- Enrollment tracking tools ***(on page 370)***

For more information about using this report to track unreturned enrollment forms.

Extended Practice

Note: You must have completed the Extended Practice in **Setting Up Flex Plans** *(on page 173) to guarantee the successful completion of the Extended Practice that follows.*

1. Calculate flex credits as of 01-01-1998 for employee 6010, Brenda Ritter, plan 710, and then display them.
2. Enroll employee 6010, Brenda Ritter, in plan 710 effective 01-01-1998. Use the following options:

Plan ID	Option Elected	Variable	Method
101	Employee Only/Single	—	Post
203	Enrolled	—	—
505	Participant	4.00	Post
601	Waived	—	—
602	Waived	—	—
603	Employee Only/Single	—	Pre
605	Waived	—	—

3. Display the enrollment options for employee 6010, Brenda Ritter, for plan 710.

Review of Questions Answered

1. What steps need to be taken before the employee enrollment procedure can begin?

2. What options are available for producing enrollment forms?

3. What methods are available for completing open enrollments for flex plans?

4. What options are available to handle enrollments for employees who fail to return their enrollment forms?

5. What flex benefits communications are available for confirming enrollments?

C H A P T E R 1 1

Processing Midyear Enrollments for Flex Plans

In This Chapter

Introduction

Flex plan enrollments occur not only at the beginning of the flex plan year but throughout the year as well. There will be ongoing enrollments of new hires and other employees who become eligible for flex plan enrollment. Benefits Administration can reduce enrollment time through automatic eligibility checking, credit calculations, and recordkeeping.

In this section you will learn how to enroll employees in your Flexible Benefits Program on a date other than the first day of each benefits plan year. This is referred to as a midyear enrollment.

Review this section carefully to determine how to effectively integrate the Benefits Administration component into your enrollment process.

Tasks

This section explains the following:

- Calculating flex credits for midyear enrollments
- Processing midyear enrollments

Prerequisites

Before you can process midyear enrollments for flex plans, the following must be established for:

- Organizations
- Employees
- Benefits plans

☞ *Refer to the '***Plan Design** *(on page 29)' section for more information on setting up benefits plans.*

- Flex credit calculation formula (optional)
- Flex Master Plan

☞ *Refer to* **Setting Up Flex Plans** *(on page 173) for more information about defining a credit calculation formula and setting up Flex Master Plans.*

Questions answered

The following questions are answered in this section:

1. What is a flex midyear enrollment?
2. What enrollment tasks differ when processing a flex midyear enrollment?

What is a midyear enrollment?

A midyear enrollment for a flex plan is an enrollment that is effective on any date other than the first day of the plan year. The midyear enrollment process determines eligibility and processes the employee enrollment as of the midyear date that you specify.

Employees are candidates for midyear enrollments if they are:

- New hires
- Joining your organization through acquisition
- Transferring from noneligible to eligible status (part-time to full-time, non-union to union, and so on)

Enrollment segments are created and credits (if you are using them) are calculated, producing HED prototypes in the same manner as an open enrollment. The flex credits are always calculated on an annual basis.

Apply the Concept
Will you have a special time of the week, pay period, or month for processing midyear enrollments?

Plan shutoffs

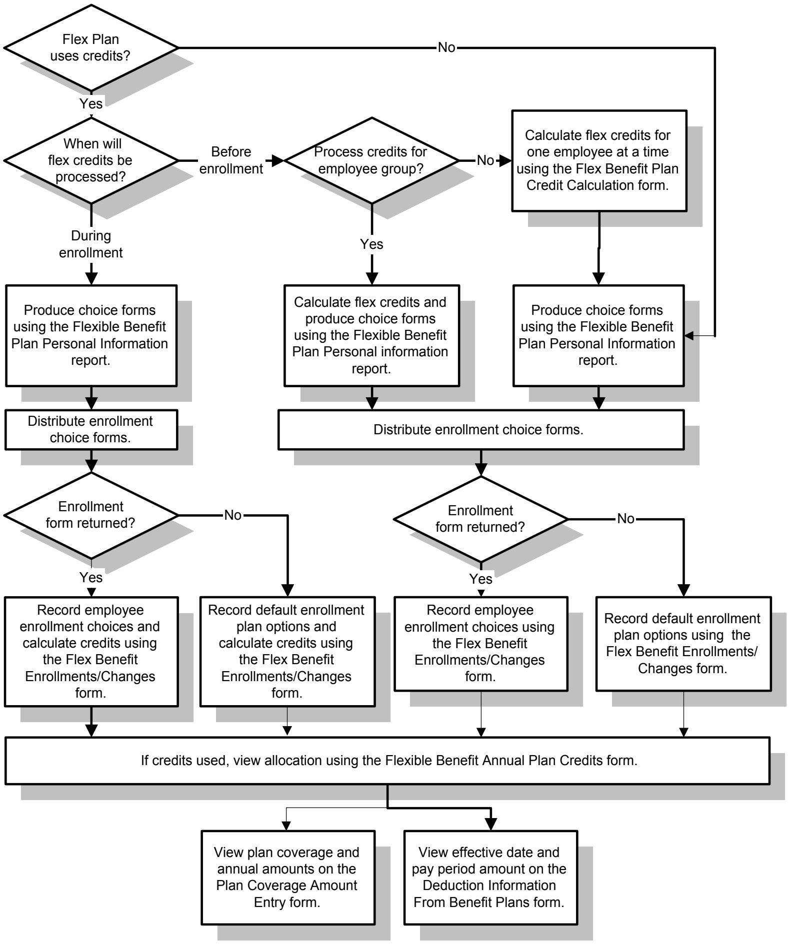
If the employee is actively enrolled in any of the component plans that are included in the flex plan, you may need to create plan shutoff segments. This ensures that employees do not continue to participate in plans that are no longer available to them after their flex enrollment.

☞ *Refer to* **Maintaining Employee Benefits Information** *(on page 411) for more information about employee plan shutoffs and de-enrollments.*

Apply the Concept
Describe your procedures for ensuring employees cannot continue to participate in plans that are no longer available to them outside of the flex plan.

Midyear enrollment processing

Midyear enrollment processing includes the same options that are available during open enrollment. You may want to review your choices as shown in the chart that follows:



This section covers any special considerations for completing the forms and processing the reports that are used to complete the open and midyear enrollment process, but it does not cover the basics of those forms and reports already discussed.

☞ *Refer to* **Processing Annual Open Enrollments for Flex Plans** *(on page 351) for more information about the flex enrollment process.*

See also:

- Calculating flex credits for midyear enrollments ***(on page 398)***

For detailed directions on calculating flex credits for midyear enrollments.

Special rules for flex midyear enrollments

The following chart consolidates the processing differences between open enrollment and midyear enrollment for an employee:

Task	Form/Report	Differences
Calculating flex credits	Use the Flex Benefit Plan Credit Calculation form (FCPSCR).	None. Same as open enrollment processing.
Producing enrollment choice forms	Use the Flexible Benefit Plan Personal Information report (4P-SCR).	None. Same as open enrollment processing.
Processing flex midyear enrollments	Use the Flex Benefit Enrollments/Changes form (55FSCR).	Select the 'Enroll Mid Plan Year' option in the Enroll/Change Type list box. Other list and text boxes same as open enrollment.
Displaying the enrollment results	Use the Flex Benefit Enrollments/Changes form (55FSCR).	None. Same as open enrollment processing.
Verifying an employee's deduction/earning information	Use the Plan Coverage Amount Entry form (53-SCR) and Deduction Information From Benefit Plans form (54-SCR).	None. Same as open enrollment processing.
Producing benefit confirmations	Use the Flexible Benefit Plan Enrollment Confirmation report (4X-RPT).	None. Same as open enrollment processing.
Tracking unreturned enrollment forms	Flexible Benefit Plan Forms Not Returned report (4Z-RPT).	None. Same as open enrollment processing.

☞ *Refer to* **Processing Annual Open Enrollments for Flex Plans** *(on page 351) for more information about these tasks.*

See also:

- Processing midyear enrollments ***(on page 400)***

For detailed directions on processing midyear enrollments.

Detailed Directions

This section provides detailed directions on completing a business task.

Tasks

Completing the Guided Practice

In the Guided Practice for this section you will process the flex credit calculation for employee 2001. You will perform a midyear enrollment for the same employee in Flexible Benefits Plan 700 and view the total and remaining credits. Specific details for processing the credit calculations and enrolling the employee are described in the steps for the tasks.

You must have completed the Guided Practices in ***Setting Up Flex Plans*** (on page 173) to guarantee the successful completion of the Guided Practice that follows.

Note: *The steps in 'Calculating flex credits for midyear enrollment' do not differ from the steps used for open enrollment; they are repeated here for your convenience.*

Calculating flex credits for midyear enrollments

To calculate flex credits for a midyear enrollment using the Flex Benefit Plan Credit Calculation form (FCPSCR), follow these steps:

Note: *You may prefer to calculate employee flex credits and generate the enrollment form simultaneously using the Flexible Benefit Plan Personal Information report (4P-RPT).*

☞ *Refer to the* **Report Quick Reference** *(on page 615) for detailed information about the Flexible Benefit Plan Personal Information report (4P-RPT).*

1. Access the Flex Benefit Plan Credit Calculation form (FCPSCR)

Access this form by making the following selections from the Navigator:

Component: Flex Plans Enrollment/Processing
Process: Flex Credits
Task: Flex Plan Credit Calculation

For practice, access the Flex Benefit Plan Credit Calculation form (FCPSCR) for Organization 999999 and employee 2001.

2. Enter the Master Plan ID

Type the three-character Flex Master Plan identifier.

For practice, type '700'.

3. Enter the Plan Date

Type the current Flex Master Plan date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For practice, type a date representing January 1 of the current year, for example, '01-01-1998'(US and Canada) or 1 January (elsewhere).

4. Select the Process check box

Select the Process check box to activate the calculation of credits.

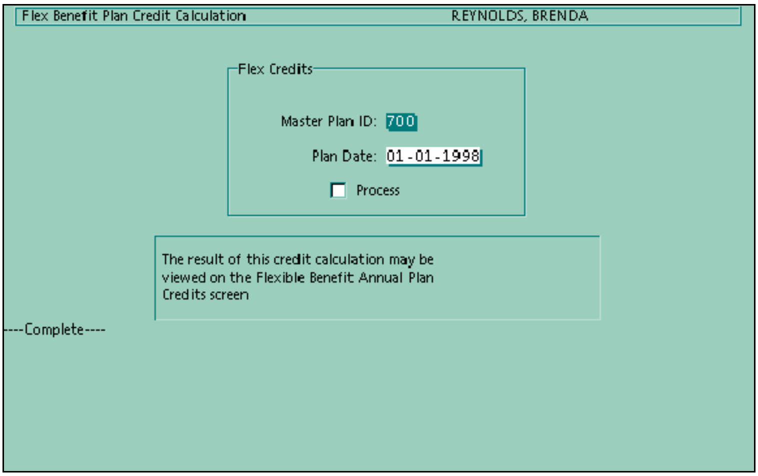
For practice, select the Process check box.

5. Click Save or press Enter

The flex total credits are calculated and a '—Complete—' message is displayed.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



Note: *After the form is executed, the Process check box is no longer selected.*

See also:

- Midyear enrollment processing ***(on page 396)***

For information about flex credit calculations for midyear enrollments.

☞ *Refer to* **Processing Annual Open Enrollments for Flex Plans** *(on page 351) for complete information about calculating flex credits.*

Processing midyear enrollments

To process a flex midyear enrollment using the Flex Benefit Enrollments/Changes form (55FSCR), follow these steps:

Note: *The enrollment activities described in this task are performed automatically when employees enroll online using eCyborg Interactive Benefits.*

☞ *Refer to* **Batch Loading of Benefits Forms** *(on page 917) for information to process this form in batch mode.*

1. Access the Flex Benefit Enrollments/Changes form (55FSCR)

Access this form by making the following selections from the Navigator:

Component:	Flex Plans Enrollment/Processing
Process:	Flex Enrollment
Task:	Flex Benefit Plan Enrollment

For practice, access the Flex Benefit Enrollments/Changes form (55FSCR) for Organization 999999, employee 2001.

Note: *This form has three panels that allow you to set the parameters, select/correct plan options, and display the results of the enrollment.*

2. Enter the Master Plan ID

Type the three-character Flex Master Plan identifier.

For practice, type '700'.

3. Enter the Effective Date

Type the midyear plan entry date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For practice, type a date representing June 1 of the current year, for example, '06-01-1998'(US and Canada) or1 June (elsewhere).

4. Select the Enroll/Change Type

Select the 'Enroll Mid Plan Year' option from the Flex Action option list (BA64) to indicate the midyear enrollment to be performed by the form.

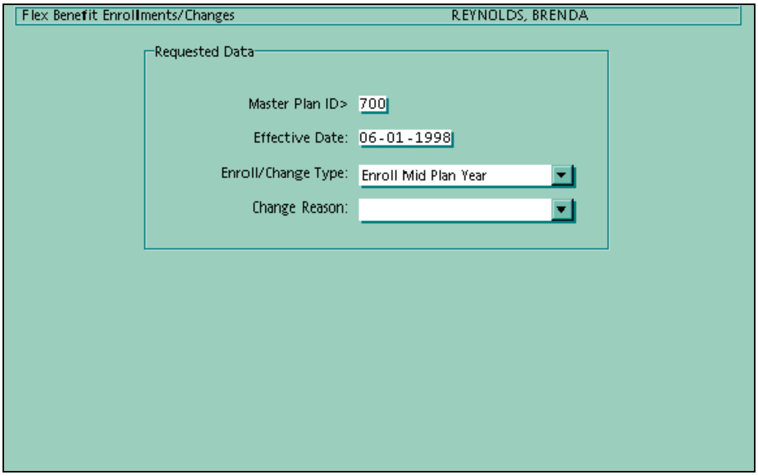
For practice, select 'Enroll Mid Plan Year'.

5. Enter the Change Reason (optional)

This list box is used only if the option in the Enroll/Change Type list box indicates a life status change.

For practice, leave this list box blank.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



Flex Benefit Enrollments/Changes REYNOLDS, BRENDA

Requested Data

Master Plan ID> 700

Effective Date: 06-01-1998

Enroll/Change Type: Enroll Mid Plan Year

Change Reason:

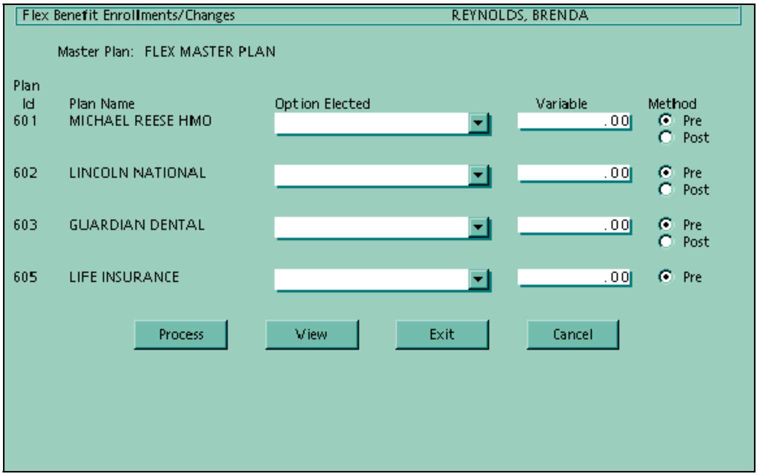
6. Click Save or press Enter

The returned form(s) displays only the component plans for which the employee is eligible. If a deferred plan is included in the Flex Master Plan, it will be displayed on the form only if the employee is already enrolled in the plan on the Deferred Plan Enrollments/Changes form (64-SCR).

One line is displayed for each eligible component plan. The Plan ID and Plan Name are shown in Display Mode. The Option Elected, Variable, and Pre/Post Tax Method entries are displayed for entry in groups of four plans per form. More than one form of entries may be required to list all the eligible plans.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



Use the following values to complete the next three entries:

Plan ID	Option Elected	Variable	Method
601	Employee Only/Single	—	Pretax
602	Waived	—	—
603	Employee Only/Single	—	Pretax
605	Coverage = 2x Salary	—	Pretax

7. Select the Option Elected

Select the option the employee elects for the plan. Options for this list are provided by the Option Elected option list (BA03). Any plan that the employee declines must have an option entry of 'Waived'. There must be an entry in this list box for every plan on the form.

For practice, make the entries shown in the preceding table (step 6).

8. Enter the Variable (optional)

Use this text box to enter an up-to-nine-digit employee-dependent factor such as a fixed amount needed to calculate plan coverage or contribution amount. If the plan requires a variable entry and the text box is left blank, an error message is displayed.

Note: *When a deferred plan is attached to a flex plan, the Flex Benefit Enrollments/Changes form (55FSCR) displays the deferred plan if the employee was previously enrolled on the Deferred Plan Enrollments/Changes form (64-SCR). The actual amount of flex credits to be credited to the deferred plan must be entered in the Variable text box. Whether you enter an annual, monthly, per pay period, or weekly amount depends on the frequency specified in the Result Freq list box on the Coverage And Contribution Factors form (TM-SCR).*

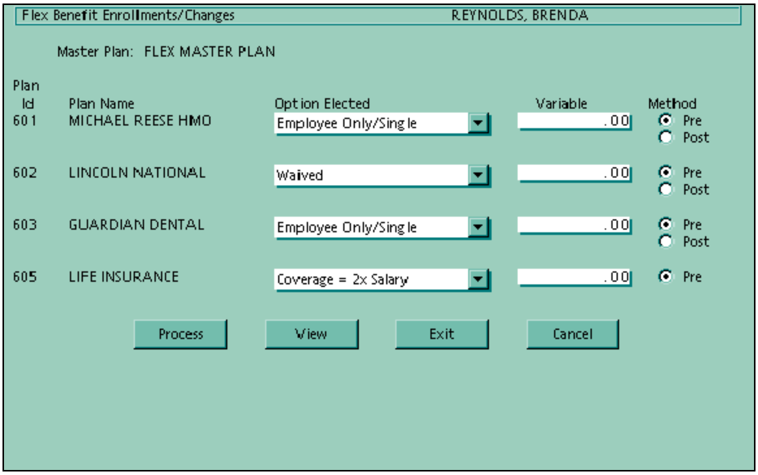
For practice, make the entries shown in the preceding table (step 6).

9. Select the Method

Select whether the employee has elected the pre- or posttax contribution. This indicator is used to select the proper HED from the plan's Benefit Plan Rules table (TK-SCR).

For practice, make the entries shown in the preceding table.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



Note: *If the only buttons available to you at the bottom of the form are Exit and Cancel, go to Step 10. Otherwise, go to Step 12.*

10. Click Save or press Enter

To proceed to the next form of component plans, click Save or press Enter. If no errors are detected in the values entered, the next form of component plans is displayed. Steps 7, 8 and 9 are repeated for the other component plans.

Note: *Form errors will appear if:*

- *The plan tables are missing or not properly set up*
- *The option elected is invalid for the plan*
- *A Variable factor has not been entered and is required by the plan*

For practice, click Save or press Enter.

11. Repeat steps 7, 8, and 9 for each remaining component plan

Enter the Option Elected, Variable (optional), and Method for each of the remaining component plans.

For practice, make no further entries.

12. Select an action button

Select one of the action buttons to complete the enrollment process:

- Process button—Process all enrollment information. When all plans are processed, the employee record is updated and the credit calculation is displayed on the third panel of the form.
- View button— Display the results of the plan credit calculations without actually updating the employee record. The credit/cost is displayed as an annual amount or a pay period amount as indicated on the Flex Benefits Master Plan Rules form (TKFSCR).

While using the View button, these buttons display at the bottom of the form:

- Process button—Process all enrollment information. When all plans are processed, the employee's record is updated and the credit calculation panel of the form is displayed.
- Next Page button—View additional plans on other panels.
- Exit button—Return to a blank first form without processing the enrollment or updating the employee's record.
- Restart button—Leave View Mode and return to the first processing form without updating the employee's record. New entries can then be made.
- Cancel button—Return the current form panel to its original appearance

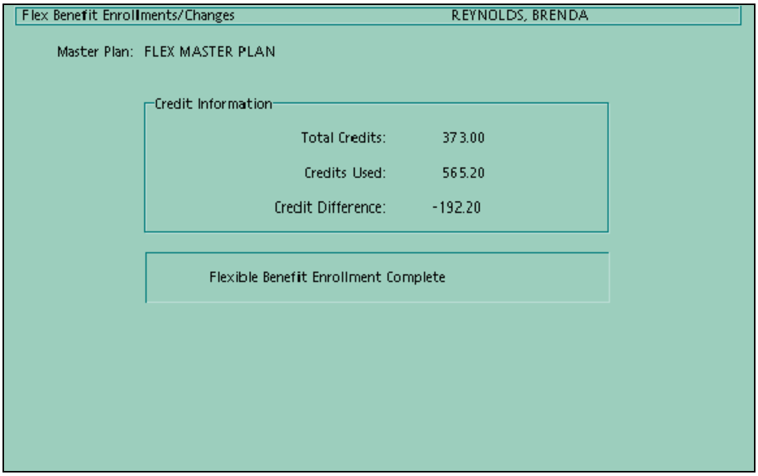
For practice, click the View button to review the entries and their associated costs. Then click the Process button to complete the enrollment.

If no errors are detected in the values entered, the third form panel displays the credit information based on the options selected.

Note: *Form errors will appear if:*

- *The plan tables are missing or not properly set up*
- *The option elected is invalid for the plan*
- *A Variable factor has not been entered and is required by the plan*

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



When the enrollment has been processed and the calculation of the credit cost for each plan is complete, the program subtracts the credits applied from the total credits to identify any remaining credit balance.

See also:

- Midyear enrollment processing ***(on page 396)***

For information about using this form for processing midyear enrollments.

☞ *Refer to* **Processing Annual Open Enrollments for Flex Plans** *(on page 351) for complete information about processing flex enrollments.*

☞ *Refer to* **Batch Loading of Benefits Forms** *(on page 917) for information to process this form in batch mode.*

Extended Practice

Note: You must have completed the Extended Practice in Setting Up Flex Plans to guarantee the successful completion of the Extended Practice that follows.

1. Calculate flex credits as of 01-01-1998 for employee 6007, Thomas S. Miller, for plan 710, and then display them.
2. Enroll employee 6007, Thomas S. Miller, in plan 710 effective 06-01-98 (US and Canada) or 01-06-98 (elsewhere). Use the following options:

Plan ID	Option Elected	Variable	Method
101	Employee Only/Single	—	Post
203	Enrolled	—	—
505	Participant	13.00	Post
601	Waived	—	—
602	Waived	—	—
603	Employee Only/Single	—	Pre
605	Waived	—	—

Review of Questions Answered

1. What is a flex midyear enrollment?

2. What enrollment tasks differ when processing a flex midyear enrollment?

PART 4

Employee Benefits Maintenance

In This Section

CHAPTER 12

Maintaining Employee Benefits Information

In This Chapter

Introduction

Maintaining employee benefits information is a year-round endeavor. As the lives of your employees change, their benefits information may require adjustments. This section focuses on maintaining employee benefits information.

Tasks

This section explains the following tasks:

- Processing life status changes for employees enrolled in welfare plans
- Processing life status changes for employees enrolled in deferred plans
- Processing life status changes for employees enrolled in flex plans
- Recording service interruptions
- Shutting off HEDs
- Adjusting service dates
- Recording waivers of joint and survivor benefits
- De-enrolling employees from welfare plans
- De-enrolling employees from deferred plans
- De-enrolling employees from flex plans
- Recording COBRA Notification and Response Dates
- Recording spouse/dependent information with COBRA information
- Verifying automatic shutoff of deduction for a benefits plan
- Entering employee or dependent coverage information

Prerequisites

Before you can maintain employee information, the following must be established for:

- Organizations
- Welfare, deferred, or flex plans

☞ *Refer to the '***Plan Design** *(on page 29)' section for more information on setting up benefits plans.*

- Employees enrolled in benefits plans

☞ *Refer to the '***Enrollment** *(on page 279)' section for more information on enrolling employees in benefits plans.*

Questions answered

This section answers the following questions:

1. What can you do with benefits data when transferring an employee between companies?
2. How is de-enrollment different for an employee enrolled in a flex plan versus an employee enrolled in a non-flex plan?
3. What is the difference between a plan shutdown and a de-enrollment?

4. What additional task should you consider when deleting a welfare enrollment or de-enrollment entry?
5. What report recalculates participation, vesting, and benefits service credit dates and what should you do before running it?
6. What report recalculates vesting percentages and what should be done before running it?

Working with Human Resources and Payroll

Leaves of absence, separations, terminations, and other status changes can affect your employees' benefits and Hours, Earnings, and Deductions (HEDs). Correctly maintaining the changes may require the coordination of several departments. Depending on the type of change and the structure and business processes of your organization, the Human Resources, Payroll, and Benefits specialists may need to work together to properly maintain employee benefits information.

For example, when an employee takes a leave of absence, the Human Resources specialist might record the leave of absence and subsequent return to service. The Benefits specialist would have to be notified so that benefits are correctly maintained. Payroll will have to know when HEDs are turned on and off.

Consider what communication needs to take place when maintaining the following employee changes:

- Beneficiary changes
- Dependent changes
- Leaves of absence and returns
- Life status changes (marriage, divorce, birth of a child)
- Separations
- Terminations
- Transfers
- Mid-year election changes resulting from change to plan cost/coverage

☞ *Refer to* **Benefits/Payroll Interaction** *(on page 535) for more information on working with Payroll.*

Apply the Concept
Describe the roles and responsibilities for the Human Resources, Payroll, and Benefits specialists for processing employee separations, transfers, terminations, and leaves of absence and returns.

Life status (family) changes

When an employee experiences a life status change, such as a marriage, birth, or divorce, benefits information can change as well. Processing a life status change may involve several tasks, including changing dependent information, beneficiary information, and benefits options. For example, when an employee gets married, he or she may want to add the spouse as a dependent, designate the spouse as a beneficiary, and cover the spouse on welfare plans.

Processing a life status change is similar to enrollment. You use the same forms to implement the change as you did when you enrolled the employee.

Changing dependents and beneficiaries

When an employee wants to change dependent coverage or beneficiary designations, you will follow steps similar to those you followed when you enrolled the employee. If the employee is adding a new dependent or beneficiary, the information about that dependent or beneficiary must first be recorded. Once the dependent or beneficiary information is recorded, you can make changes to dependent coverage and beneficiary designations and percentages.

If you plan to use eCyborg Interactive Workforce, many welfare plans include options that cover employees' dependents. As part of the benefits process, employees enter information for beneficiaries who will receive benefits. You must establish dependent and beneficiary numbering schemes that allow your organization to easily identify the record of a spouse, as well as beneficiaries other than a spouse. For example, the three-digit value for a dependent spouse may be '001' and a starting value of '100' may be used to designate records for beneficiaries other than a spouse.

When generating a new dependent ID, eCyborg Interactive Employee always checks to be sure the number has not already been assigned. The Human Resources component of The Solution Series administration solutions will not duplicate ID numbers regardless of whether the number was created using eCyborg Interactive Employee or by an administrator entering a dependent directly into Human Resources Administration.

The following table reviews the forms you would use to add or change dependent and beneficiary information:

To add or change	Use this form
Information about a dependent	Spouse/Dependent Information form (10-SCR)
Coverage for a dependent	Covered Dependents By Plan form (59DSCR)
Information about a beneficiary	Beneficiary/Bond-Owner Information form (58-SCR)
Beneficiary and percentage designation	Beneficiary/Plan Cross Reference form (59BSCR)

☞ *Refer to the Using Human Resources Administration documentation for more information on adding and changing dependent information.*

☞ *Refer to* **Enrolling Employees in Welfare Plans** *(on page 281) for more information on assigning dependents to a plan or adding and assigning beneficiaries.*

Note: Employees can add or update beneficiaries at anytime during the year if eCyborg Interactive Benefits is in use. Dependents can only be added or deleted as insured family members during the initial or Open Enrollment periods. Using eCyborg Interactive Benefits, employees must call their HR department to make mid-year changes to dependent coverage.

Changing elected options

Which form you use to change elected options depends on the type of plan(s) in which the employee is enrolled. Refer to the following table to determine which form to use:

If the employee is enrolled in a	Use this form to change elected options
Welfare plan	Welfare Plan Enrollments/Changes form (55-SCR)
Deferred plan	Deferred Plan Enrollments/Changes form (64-SCR)
Flex plan	Flex Benefit Enrollments/Changes form (55FSCR)

See also:

- Processing life status changes for employees enrolled in welfare plans ***(on page 440)***
For detailed directions on processing life status changes for employees enrolled in welfare plans.

- Processing life status changes for employees enrolled in deferred plans ***(on page 443)***
For detailed directions on processing life status changes for employees enrolled in deferred plans.

Flex plans

The 'Life Status Change' option in the Enroll/Change Type list box of the Flex Benefit Enrollments/Changes form (55FSCR) processes changes during the plan year for employees already enrolled in a flex plan. This option requires an additional entry in the Change Reason list box. When processed, it updates the following information:

- Deduction Information From Benefit Plans with the plan's cost and the new date
- Plan Coverage Amount Entry with the annual amount and new date
- Flexible Benefit Annual Plan Credits with any credit adjustments

See also:

- Processing life status changes for employees enrolled in flex plans ***(on page 445)***
For detailed directions on processing life status changes for employees enrolled in flex plans.

Dropping coverage for a dependent

A change in an employee's life may warrant dropping coverage for one or all dependents. For example, when a son or daughter who is covered as a dependent takes a job with benefits, the employee may want to change elected coverage options and drop the dependent from one or all plans.

Maintaining this type of change requires performing two tasks: recording the employee's change in elected options and removing the dependent from the Covered Dependents By Plan form (59DSCR). To reflect the change in dependent coverage, you can create a new Covered Dependents By Plan form (59DSCR) by entering a new effective date without listing the dependent.

Mid-year benefit enrollment changes

During the plan year your organization may drop or add a plan, or an existing plan may change its cost or level of coverage. When this happens, employees enrolled in the plan can change their enrollment choices. Before allowing employees to change their options, you must create a new Benefit Plan Rules form (TK-SCR) second panel for plan changes.

Note: *To use the mid-year benefit enrollment changes functionality, each welfare benefit plan offered by your organization must be a component of a flex master.*

Making changes to plan rules

When you set up plan rules on the Benefit Plan Rules form (TK-SCR), you selected the Flex Change rules that remain constant for that plan for the year. When a plan changes its cost or coverage, you must create a new Benefit Plan Rules form (TK-SCR) and enter the effective date on the first panel. You must check the appropriate plan cost/coverage change events, such as Change of Health Pln, Inc/Dec Plan Cost, or Inc/Dec Plan Cov. These events represent changes at the plan level. You must then check the rules for any plans that employees may choose instead of the current plan. Be sure the rules allow employees to enroll in these plans.

A limited window of time may exist during which this change applies or during which participants must make a decision as a result of the plan change(s). If so, you must create another new Benefit Plan Rules form (TK-SCR), entering the effective date as the first day following the last day for which the change event applies. On this form, select the changes that are available from this date forward. For example, Plan 101 (HMO) drops a network hospital as of May 1, 2001 and affected participants are given until May 31, 2001 to elect coverage under Plan 102 (PPO) or Plan 103 (Managed Indemnity). Entering a form for both the beginning date (May 1, 2001) and the day following the ending effective date (May 31, 2001) limits enrollment to this time period.

See also:

- Processing a mid-year employee benefit change based on change in plan cost/coverag ***(see "Processing a mid-year employee benefit change based on change in plan cost/coverage" on page 448)e***

For detailed directions for entering mid-year changes to a plan's rules.

☞ *Refer to Setting Up Welfare Plans for more information on completing the Benefit Plan Rules form (TK-SCR).*

Changing the employee's plan choice

Midyear election changes must be made in the same plan type as the plan that was directly affected by the change. Changes that might trigger mid-year enrollment for an employee or employees include:

- Significant change in benefits by a Health Care Provider
- Significant decrease or increase in the cost of a qualified benefits plan or option under the plan
- Significant improvement or curtailment in coverage provided or the availability of a new benefit package option or loss of an existing option

The steps to process a mid-year change in benefit enrollment options are similar to the steps followed in the initial enrollment process. However, before beginning these steps, you must change the plan rules on the second panel of the Benefit Plan Rules form (TK-SCR) to reflect the change in plan cost/coverage.

To change the employee's plan enrollment, you must use the Flex Benefit Enrollments/Changes form (55FSCR) and enter the Flex Master Plan ID and the effective date of the change. From the Enroll/Change Type list box, you must select 'Plan Cost/Cov Change' and then select the appropriate reason from the Change Reason list box. Valid change reasons for Plan Cost/Cov Change are:

- Change of Health Plan
- Plan Cost Inc/Dec
- Plan Cov Inc/Dec
- Pay Incr/Decrease
- Change P/T to F/T
- Change F/T to P/T
- Trans to Other Plan
- Spouse Change in Ben
- Dep Chg in Benefit
- Dep Care FSA Chg
- Transfer Out of Area

Note: *Dep Care FSA Chg is only used with a Plan Type (option list BA16) of 'FSA Dependent Care'.*

When the second panel(s) of the Flex Benefit Enrollments/Changes form (55FSCR) opens, the plans within this plan type for which the employee is eligible are displayed, including the plan that changed cost or coverage. You must choose the appropriate selection (waive) for the plan that changed and either waive or enroll in a valid option for one of the other plans.

See also:

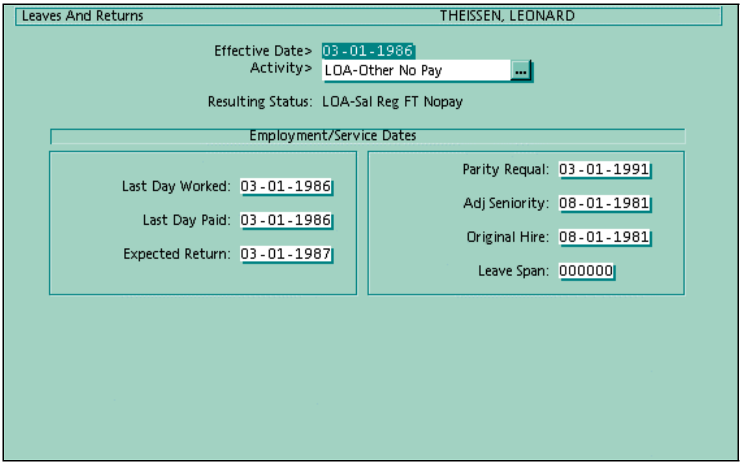
- Processing a mid-year employee benefit change based on change in plan cost/coverage ***(on page 448)***

For detailed directions for processing plan cost/coverage changes for employees enrolled in flex plans.

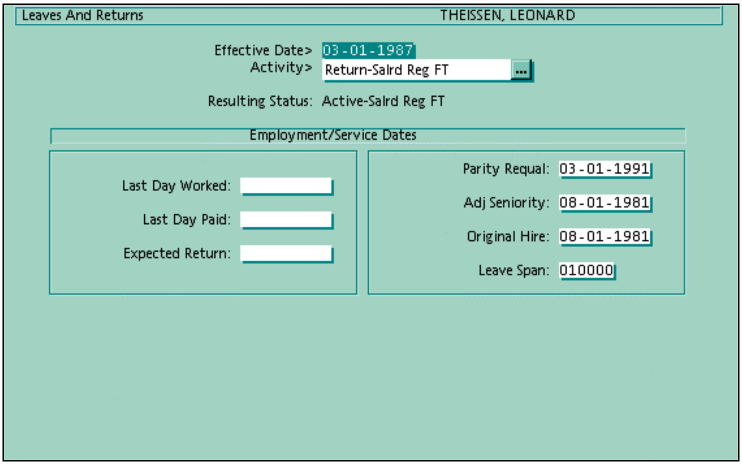
Leaves of absence and returns

When an employee takes a leave of absence, he or she may no longer be eligible for a benefits plan. Leaves of absence and returns are recorded on the Leaves And Returns form (95-SCR). This form is used to record regular, family, and disability leaves (inactive status) and the subsequent return to active status. The leave and return activities are selected from the Activity Codes option list (HR09) and the resulting statuses are generated by the entries on the Activity And Resulting Employee Status Rules form (TTASCR).

The following Leaves And Returns forms (95-SCR) show that employee 3018, Leonard Theissen, took a leave of absence effective 03-01-1986 (US and Canada) or 01-03-1986 (elsewhere) and is expected to return one year later:



When Leonard Theissen returned from the leave of absence, a new Leaves And Returns form (95-SCR) was entered:



☞ *Refer to the Using the Human Resource Management Solution documentation for more information and detailed directions on leaves of absence and returns.*

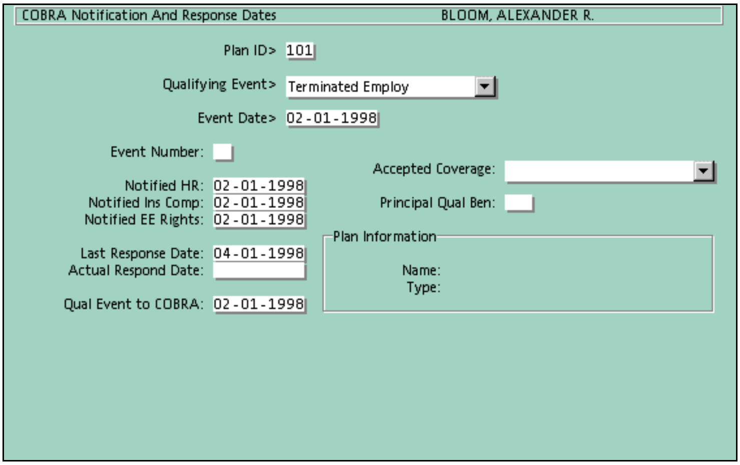
Typically, Human Resources records leaves and returns. When an employee leave is processed, the system looks at the rules of the plan to determine if and when the employee loses eligibility for the plan. The P-PLAN and HEDPLN programs read the Activity/Resulting Plan Status Rules forms (TTASCR) to determine if the activity is set up to turn off the employee's benefits. The Human Resources specialist should understand how leaves and returns affect benefits plans and communicate any necessary changes.

You can run the Leave of Absence/Disability report (1T-RPT) to list all active employees who are currently on a leave of absence or disability leave. This report lists the expected return date of an employee and whether it is past due. You can use this report to monitor employees taking leaves of absence and anticipate their return.

Separations and terminations

Recording an employee's separation or termination is done using the Separations And Terminations form (96-SCR). Based upon the plan rules set up on the Activity/Resulting Plan Status Rules form (TTASCR), a separation or termination may cause an employee's benefits to be turned off. Deductions must be manually inactivated as of the separation/termination date or plan rules.

When an employee is separated or terminated, the employer has obligations to provide continued health insurance coverage to both the employee and his or her dependents under the Consolidated Omnibus Budget Reconciliation Act of 1986 (COBRA). The COBRA Notification And Response Dates form (86-SCR) can be used to record the dates of the activities involved in notifying employees or their dependents of the possible extension of benefits, as well as the response to that notification.



In this example, employee Alexander Bloom terminated employment on February 1, 1998, and is eligible to extend his coverage in Plan 101. Human Resources also was made aware of the termination, notified the insurance company of the termination, and notified Bloom of his right to extended coverage on February 1. Bloom has until April 1 to respond to the notification, but has not responded yet. Because the company uses the Interface to TravisCobra Solution, the Qual Event to COBRA text box indicates the date the termination information was passed to it.

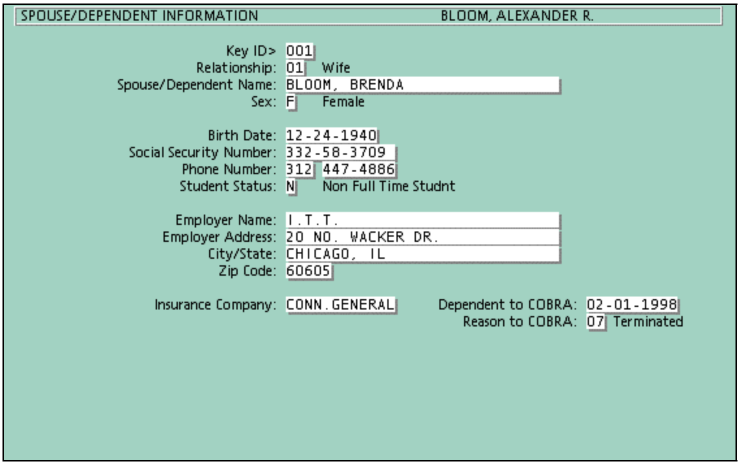
When Bloom responds to the notification, his decision will be recorded in the Accepted Coverage text box, and the system ID of the principal beneficiary will be recorded in the Principal Qual Ben text box.

See also:

- Recording COBRA notification and response dates ***(on page 464)***

For detailed directions on recording COBRA notification and response dates.

When the Interface to TravisCobra Solution is in use, two text boxes on the Spouse/Dependent Information form (10CSCR) provide information about the employee's spouse and/or dependent(s).



The Dependent To Cobra text box indicates the date that spouse and/or dependent information was sent to the TravisCobra system. The Reason To Cobra text box identifies the qualifying event that caused the COBRA Interface program to send the spouse and/or dependent information to the TravisCobra system. The available options for this text box are taken from the Qualifying Event option list (BA48).

☞ *Refer to the Using Human Resources Administration documentation for detailed directions on processing separations and terminations.*

- Recording spouse/dependent information with COBRA information ***(on page 467)***

For detailed directions on recording spouse/dependent information with COBRA information.

HIPAA

The Health Insurance Portability and Accountability Act of 1996 (HIPAA) requires companies with a health plan to provide its members with a coverage certificate when coverage ceases for that plan. Under HIPAA, a person can not be denied coverage because of a pre-existing condition if he/she was previously covered under another health plan. The certificate is provided for evidence of coverage to protect the employee or dependent in the event that he/she becomes eligible under a group health plan that excludes coverage for medical conditions which existed before eligibility for the health plan.

The information necessary to produce the HIPAA Certificate is entered on the HIPAA Information form (59KSCR). This form must be used for the employee and for each dependent covered under the plan.

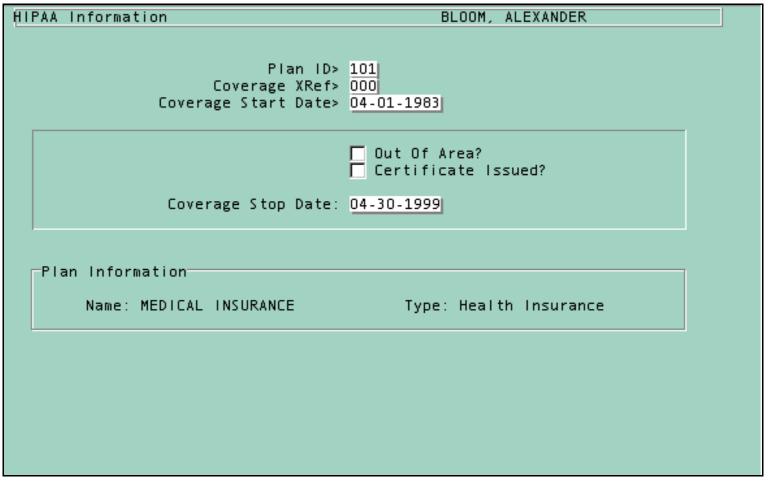
Before the HIPAA information can be entered, the employee must be enrolled in the health plan using the Welfare Plan Enrollments/Changes form (55-SCR). Additionally, before information can be recorded for a dependent on the HIPAA Information form (59KSCR), he/she must be entered into the system using the Spouse/Dependent Information form (10-SCR) and into the health plan using the Covered Dependents By Plan form (59DSCR).

The Coverage Stop Date text box on the HIPAA Information form (59KSCR) is automatically populated when an employee is terminated. The P-PLAN program is called to automatically de-enroll the employee and dependents from the health plan in which they are enrolled when the employee is terminated using the Separations And Terminations form (96-SCR). The Coverage Stop Date text box on the HIPAA Information form (59KSCR) is populated based on the effective date on the Welfare Plan Enrollments/Changes form (55-SCR) and the plan rules that were set up on the Activity/Resulting Plan Status Rules form (TTASCR) or the Option/Resulting Plan Status Rules form (TTOSCR).

☞ *Refer to* **Enrolling Employees in Welfare Plans** *(on page 281) for more information on enrolling employees and dependents in health plans.*

☞ *Refer to Hiring, Rehiring, Reinstating, Recalling, or Transferring an Employee of the Using Human Resources Administration for information on recording dependent information.*

In the example below, employee 3001, Alexander Bloom, is no longer covered under health plan 101. By completing this form, a HIPAA Certificate can be printed for him.



See also:

- Entering employee or dependent coverage information ***(on page 472)***

For detailed directions on entering employee or dependent coverage information.

Printing the HIPAA Certificates

HIPAA Certificates are produced by running the Program to Produce HIPAA Certificate (59KRPT) through RGMSTR in the same manner that you would run a report.

You have the ability to print HIPAA Certificates for all employees and covered dependents within a range of coverage start and end dates, or for one specific employee or dependent. You specify this option on the report parameters form. The table below lists the entries that you must enter for each option.

To print HIPAA Certificates for:	**Complete these entries:**
All employees who have a coverage stop date within the specified range	Range Start Date Range End Date
One employee	Employee Number
One dependent	Employee Number Dependent Xref—this number is recorded on the Covered Dependents By Plan (59DSCR).

Refer to the **Report Quick Reference** *(on page 615) for a sample HIPAA Certificate.*

P-PLAN and HEDPLN

P-PLAN is a program used by various forms, including the Leaves And Returns (95-SCR) and Separations And Terminations (96-SCR) forms. If a valid leave or separation status change occurs on the above forms, P-PLAN and HEDPLN will read your Activity/Resulting Plan Status Rules forms (TTASCR) to determine if the activity is set up to turn off benefits. If so, P-PLAN will look at the plans for which an employee is no longer eligible, and automatically turn off the benefits on the Welfare Plan Enrollments/Changes (55-SCR) and Deferred Plan Enrollments/Changes (64-SCR) forms with a 'Turn Off Separation' option. The HEDPLN subroutine, called by P-PLAN, will change the benefit HEDs to inactive and zero the amount/percent on the Deduction Information From Benefit Plans form (54-SCR). When the HED Segment Changes Effective This Period report (8R-RPT) is run, the benefit HED on the payroll Employee Earnings And Deductions form (HH-SCR) will be updated.

Shutting off HEDs for benefit plans

When you enroll an employee in a benefits plan, deductions for the benefits plan are created automatically on the Deduction Information From Benefit Plans form (54-SCR). Deduction information for the plan, such as frequency, type, and method option, is based on the HED prototypes set up on the Benefit Plan Prototype Contribution HED form (TS-SCR).

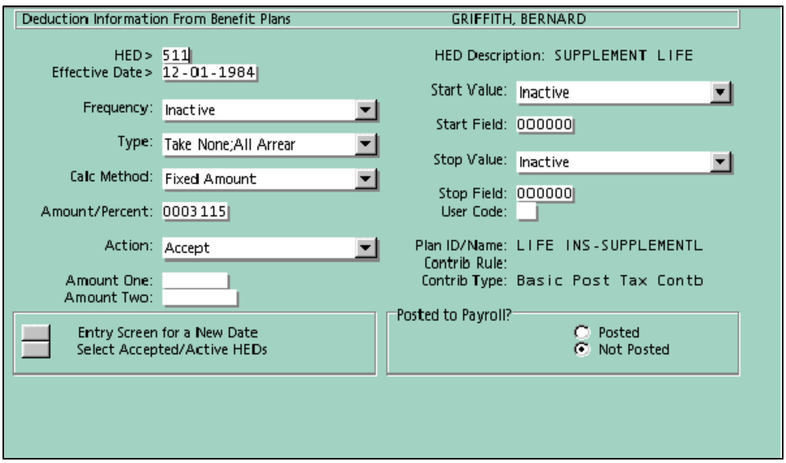
Certain employee maintenance activities may make an employee ineligible for a benefits plan. Deductions for that plan must be turned off. Depending on the employee activity and plan setup, this may be done automatically or may have to be done manually.

Automatic shutoff

Deductions for a benefits plan are set up to turn off automatically. By setting up the 'Shutoff/Deenroll' option on the Option/Resulting Plan Status Rules table (TTOSCR), deductions for a plan will turn off when you de-enroll the employee from the plan. Likewise, if the Activity/Resulting Plan Status Rules table (TTASCR) is set up for the activity that occurs to the employee, deductions for the plan will turn off when the activity is recorded using the Separations And Terminations form (96-SCR), the Status Changes form (08-SCR), or the Leaves And Returns form (95-SCR). When you de-enroll the employee from a plan using the 'Shutoff/Deenroll' option, or record an activity that has been set up for automatic shutoff, a new Deduction Information From Benefit Plans form (54-SCR) is created. On this form, the frequency of the deduction for the plan is changed to Inactive, and the Not Posted button is selected so that the change will be sent to Payroll.

Having an automatic HED shutoff for a benefits plan ensures that an employee will not be erroneously charged for benefits not received. This becomes important especially for employees that terminate employment and are later rehired.

The following example shows an 'Inactive' Frequency for the Supplemental Life HED, 511, for Bernard Griffith:



☞ *Refer to the '***Plan Design*** (on page 29)' section for more information on setting up 'Shutoff/Deenroll' options for benefits plans.*

See also:

- Verifying automatic shutoff of deductions for a benefits plan ***(on page 470)***

For detailed directions on verifying automatic shutoff of deductions for a benefits plan.

Manual shutoff

In some situations, an employee activity may require you to manually turn off deductions. When you first access the Deduction Information From Benefit Plans form (54-SCR), it is displayed in view mode. To manually shutoff an HED, you must click the Entry Form for a New Date button. Then you can enter a new Effective Date and select an 'Inactive' Frequency.

See also:

- Shutting off HEDs ***(on page 452)***

For detailed directions on shutting off HEDs.

Deferred benefits plan service interruptions

An extended employee leave of absence and subsequent return to active status or a termination and rehire can result in a service interruption that may affect the employee's deferred benefits. Service interruptions can be automatically generated by the system providing you have set up a Benefits Plan Breaks-In-Service Rules form (TU-SCR) for the 'Return' or 'Rehire' activity. Service interruptions can also be recorded manually.

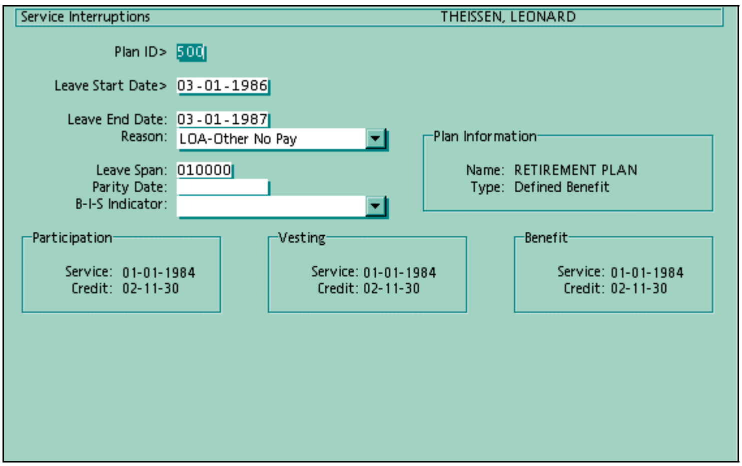
Once the service interruption information has been created, you can then use this information to determine if an employee's adjusted seniority, benefits accrual, or vesting dates should be adjusted and by how much. You must then go in and make those changes as appropriate; the system does not automatically adjust any benefits dates.

Service interruptions automatically recorded

A service interruption is automatically recorded by the system when an employee returns to active service only if a record is found in the Benefits Plan Breaks-In-Service Rules table (TU-SCR) for the activity that caused the service interruption. For example, after you enter a 'Return' activity on the Leaves And Returns form (95-SCR), the leave span is calculated and the Benefits Plan Breaks-In-Service Rules table (TU-SCR) is searched for each plan in which the employee is or was participating. A Service Interruptions form (61-SCR) is automatically generated for each plan for which a table record is found.

If a break in service has occurred based on the Benefits Plan Breaks-In-Service Rules table (TU-SCR) criteria, the B-I-S Indicator list box on the Service Interruptions form (61-SCR) uses the Break In Service Rules option list (BA32) that the system used to determine that a break in service occurred.

The following example shows the Service Interruptions form (61-SCR) that was automatically created as a result of a return activity for Leonard Theissen. The form entries were based on the rules for plan ID 500 in the Benefits Plan Breaks-In-Service Rules table (TU-SCR).



Recording service interruptions manually

If you did not set up a Benefits Plan Breaks-In-Service Rules table (TU-SCR) for a return or rehire activity to automatically record the service interruption, you can use the Service Interruptions form (61-SCR) to record them manually.

Note: *Recording service interruptions is optional.*

See also:

- Recording service interruptions ***(on page 450)***

For detailed directions on recording service interruptions.

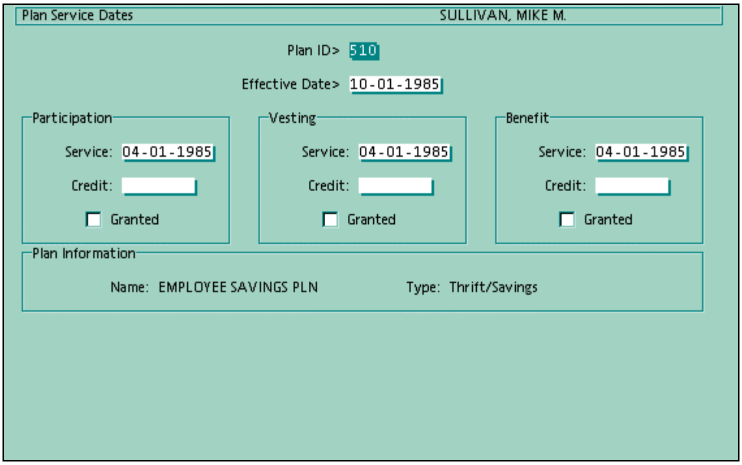
Apply the Concept

Describe your organization's deferred plan policies regarding service interruptions and how you will implement them using Benefits Administration.

Adjusting participation, vesting, and benefit service dates

An employee's participation, vesting, and benefits service dates for a plan are calculated by the system at the time of enrollment and a Plan Service Dates form (62-SCR) is created based on rules on the Benefits Participation Rules Table (TN-SCR). These service dates are typically adjusted and then recalculated once a year at the end of the plan year to determine current vesting and years of accrual in a deferred plan.

The following form shows the participation, vesting, and benefit service dates created when employee 3014, Mike Sullivan, was enrolled in plan 510:



If you have any plans in which the vesting, participation, or benefit accrual dates must be adjusted for employees with a break in service, the Service Interruptions Ended This Period report (8O-RPT) can help you identify employees who have had a break in service during a specified period. After reviewing the report, you can adjust any of the service dates according to company policy using the Plan Service Dates form (62-SCR).

See also:

- Adjusting plan service dates ***(on page 453)***

For detailed directions on adjusting plan service dates.

Recalculating participation, vesting, and benefit service credit dates

Once you have adjusted the service dates for any employees who had a service interruption, run the Calculation of Credited Service Granted report (40-RPT). This report recalculates participation, vesting, and benefits credit dates for a specified plan. This program also creates a new Plan Service Dates form (62-SCR) for employees who meet the requirements for the granting of an additional year of service.

Recalculating vesting percentages

After running the Calculation of Credited Service Granted report (40-RPT), run the Calculation of Vesting Percentage Earned report (41-RPT). This report uses the calculation method from the Vesting Schedules option list (BA26) that is defined on the Benefits Participation Rules Table (TN-SCR) to recalculate vesting percentages.

Apply the Concept

Describe when and how you will use the Calculation of Credited Service Granted (40-RPT) and the Calculation of Vesting Percentage Earned (41-RPT) reports.

Transfers with or without benefits

Much like a rehire, reinstatement, or recall, a transfer may also affect an employee's benefits. The transfer of an existing employee may require many of the same considerations as a new hire to ensure a complete employee record and accurate management reporting and analysis.

The Employee Transfer form (ET-SCR) is used to transfer an employee from one company to another. The Payroll, Human Resources, and Benefits specialists must work together to process the employee transfer since the Employee Transfer form (ET-SCR) contains selections that affect each area.

When an employee is transferred to a new company, you have several options with regards to the employee's benefits data:

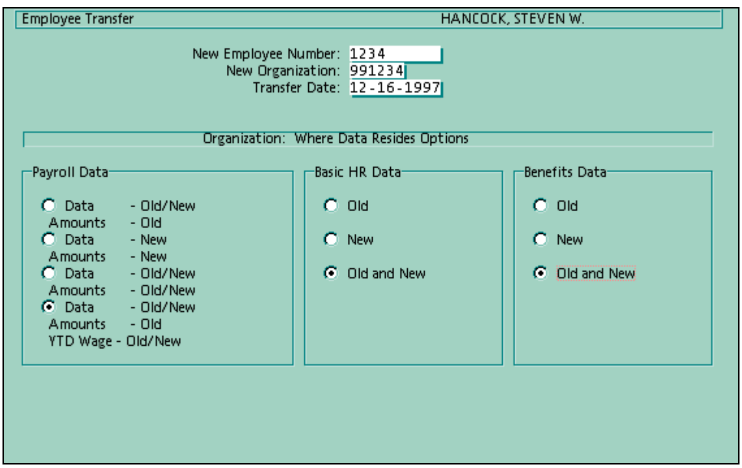
- Leave it in the old company
- Move it to the new company
- Keep it in both companies

Deciding what to do with the benefits data may depend in part on whether the old and new companies use the same benefits plans or different ones.

If the plans are different between companies and the employee will be covered by the new company's plans, you must de-enroll the employee from plans in the old company and enroll the employee in the plans for the new company.

If the companies share the same plans, you might decide to move the data or keep it in both companies. In this case, you will want to review the employee's benefits in the new company and make any necessary changes.

The following example shows Steven Hancock being transferred from Organization 999999 to Organization 991234. All of his basic HR and Benefits data will reside in the old and the new company.



☞ *Refer to the Using Human Resources Administration documentation for more information and detailed directions on transferring an employee between companies.*

Apply the Concept

Where will you store benefits data when an employee is transferred to a new company within your organization?

Waiving joint and survivor benefits

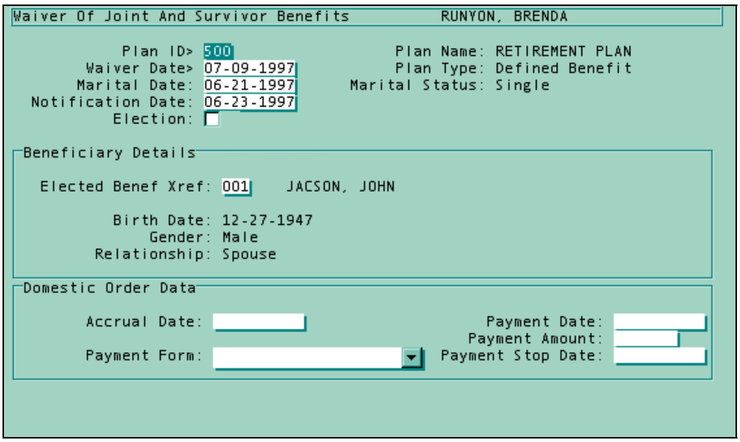
Retirement, life insurance, and other benefits plans have value after an employee retires or dies. If an employee is or was married, the employee's spouse may have a legal right to some or all of the plan's value. You may record information relating to joint and survivor benefits on the Waiver Of Joint And Survivor Benefits form (85-SCR). The form is used for two purposes.

The top section of the form is used to record information about a married employee's notification of the right to receive or waive a joint and survivor benefit payable under a plan along with the subsequent waiver of that benefit.

The bottom section, the Domestic Order Data group box, is used to record a portion of an employee's benefit that is payable under a legal order.

Both use the Plan ID and Elected Benef Xref text boxes to identify the plan and beneficiary or spouse to which the information applies.

The following is an example of the Waiver Of Joint And Survivor Benefits form (85-SCR). Brenda Runyon, who was married on June 21, 1997 (US and Canada) or 21 June 1997 (elsewhere), has elected to waive joint and survivor benefits for plan 500 for her spouse as indicated by by the Election check box not being selected:



See also:

- Recording waivers of joint and survivor benefits ***(on page 456)***

For detailed directions on recording waivers of joint and survivor benefits.

Flex versus non-flex maintenance

Maintaining employees in flex plans is the same as maintaining employees in non-flex plans except for the de-enrollment process. When you want to de-enroll an employee who is enrolled in a non-flex plan, you must determine which welfare and deferred plans the employee is enrolled in and then de-enroll the employee from *each* plan. For example, if an employee is enrolled in a Medical, Dental, Life Insurance, and Retirement plan, you would have to de-enroll the employee from each plan separately.

The component plans for an employee enrolled in a flex plan are processed together under the master plan. De-enrolling the employee from the flex Master plan would automatically de-enroll the employee from all component plans.

De-enrolling employees from benefits plans

You use the same form or forms to de-enroll an employee from a benefits plan as you did when you enrolled the employee. The form or forms that you use depend on the plans in which the employee is enrolled.

The following table summarizes the forms you will use to de-enroll employees from benefits plans.

If the employee is enrolled in a	Use this form to de-enroll the employee
Welfare plan	Welfare Plan Enrollments/Changes form (55-SCR)
Deferred plan	Deferred Plan Enrollments/Changes form (64-SCR)
Flex plan	Flex Benefit Enrollments/Changes form (55FSCR)

Note: *For flex plans, the Termination/De-enroll option de-enrolls an employee from the master plan and all component plans for which 'Waived' is not the elected option.*

Note: *Before you can de-enroll an employee from a benefits plan, you must have set up a de-enroll option for that plan using the Option/Resulting Plan Status Rules form (TTOSCR).*

☞ *Refer to* **Setting Up Welfare Plans** *(on page 53),* **Setting Up Deferred Plans** *(on page 111), and* **Setting Up Flex Plans** *(on page 173) for more information on setting up a de-enrollment option.*

See also:

■ De-enrolling employees from welfare plans ***(on page 459)***
For detailed directions on de-enrolling employees from welfare plans.

■ De-enrolling employees from deferred plans ***(on page 460)***
For detailed directions on de-enrolling employees from deferred plans.

■ De-enrolling employees from flex plans ***(on page 461)***
For detailed directions on de-enrolling employees from flex plans.

Delete This Entry considerations

When you enroll an employee in a welfare or deferred plan or change an option with a new effective date, you use the Welfare Plan Enrollments/Changes form (55-SCR) or the Deferred Plan Enrollments/Changes form (64-SCR). Other forms are created automatically as a result of the change or enrollment.

The following forms are created as a result of enrolling an employee in a welfare plan or changing an option:

- Plan Coverage Amount Entry (53-SCR)
- Deduction Information From Benefit Plans (54-SCR)

The following forms are created as a result of enrolling an employee in a deferred plan:

- Plan Service Dates (62-SCR)
- Plan Retirement/Notice/Counseling Dates (65-SCR), if a Benefits Retirement Dates Rules Table form (TJ-SCR) has been defined for the plan

The following forms are created as a result of recording employee contributions for a deferred plan or changing a contribution:

- Deferred Plan Contribution Amt/Pcts (64CSCR)
- Deduction Information From Benefit Plans (54-SCR)

You also use the Welfare Plan Enrollments/Changes form (55-SCR) and the Deferred Plan Enrollments/Changes form (64-SCR) to de-enroll an employee. When you de-enroll an employee, a new Deduction Information From Benefit Plans form (54-SCR) is created automatically with an 'Inactive' frequency.

If an employee was enrolled, changed, or de-enrolled in error, you can manually delete the erroneous Welfare Plan Enrollments/Changes form (55-SCR) or the Deferred Plan Enrollments/Changes form (64-SCR) using the Delete This Entry button on the toolbar.

However, this does not automatically delete any other forms created as a result of the enrollment, change, or de-enrollment. You must also use the Delete This Entry button on any of the other forms that were created to fully correct the erroneous enrollment, change, or de-enrollment.

Flex plans

For flex plans, a feature of the Flex Benefit Enrollments/Changes form (55FSCR) allows you to select the 'Undo/Delete' option in the Enroll/Change Type list box to remove an erroneously created enrollment. This option removes all plan coverage, deduction, and flex credit information as it deletes the enrollment.

Tracking employee maintenance

The following table lists useful reports relating to employee maintenance.

Report	Use this report to:
Separation Detail Report (1S-RPT)	Track employees who have been separated from the organization within a one-month period.
LOA/Disability Report (1T-RPT)	Monitor active employees who are currently on leave of absence or disability leave.
Termination Report (3X-RPT)	Review employees terminated from the organization.
Calculation of Credited Service Granted (40-RPT)	Calculate the credited participation, benefit, and vesting service for a deferred plan.
Calculation of Vesting Percentage Earned (41-RPT)	Calculate and list the vested percentage of plan participants.
Recalc Benefit Coverage/Contributions (85-RPT)	Recalculate employee benefits coverage and employee and company contribution amounts.
Spouse/Dependent Changes By Plan (8K-RPT)	Verify employees, by plan, who have changed their spouse and/or dependent designations.
Terminations This Period Vested vs. Non-Vested Status (8M-RPT)	Monitor terminated employees who were participants in a deferred benefits plan.
Service Interruptions Ended This Period (8O-RPT)	Track employees in benefits plans who had a break-in-service occur during a specified period.
Changed Beneficiary/Contingent Annuitant (8P-RPT)	Verify employees who have changed their beneficiary or contingent annuitant designations.
HED Segment Changes Effective This Period (8R-RPT)	Update employee Payroll HEDs with benefits plans deductions or company cost accruals.

☞ *Refer to* **Report Quick Reference** *(on page 615) for samples of these reports and the parameters used to define them.*

Detailed Directions

This section provides detailed directions on completing a business task.

Tasks

Processing life status changes for employees enrolled in welfare plans

To process a life status change for an employee enrolled in a welfare plan, use the Welfare Plan Enrollments/Changes form (55-SCR).

1. Access the Welfare Plan Enrollments/Changes form (55-SCR)

Access this form by making the following selections from the Navigator:

Component: Health/Welfare Plan Enrollment/Maintenance
Process: Eligibility and Enrollment
Task: Enroll in Health and Welfare Plan

For practice, access the Welfare Plan Enrollments/Changes form (55-SCR) for Organization 999999 and employee 3017, Samantha Stenman. You will change her elected option in plan 101 to cover only herself.

2. Enter the Plan ID

Enter the unique identifier for the plan.

For practice, type '101'.

3. Enter the Effective date

Enter the date of the plan change. Enter the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For practice, type '02-02-1998'.

4. Select an Option

Select the new option from the Option Elected option list (BA03).

For practice, select 'Employee Only/Single'.

5. Enter the Variable (optional)

Complete this text box only if the plan requires a variable factor. This rule would have been entered on the Coverage And Contributions Factors form (TM-SCR).

For practice, leave this text box blank.

6. Select a Change Reason (optional)

If you want to track the reason for an option change, select a value from the Option Change Reason option list (BA63).

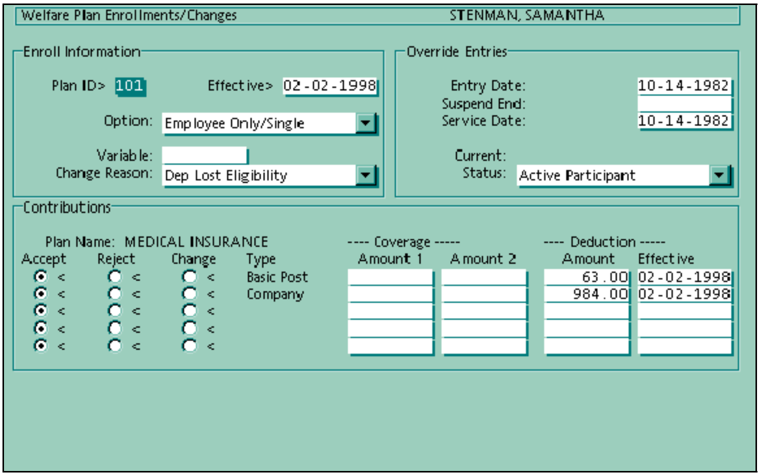
For practice, select 'Dep Lost Eligibility'.

7. Click Save or press Enter

The information entered is processed. If any errors are detected, the appropriate error message(s) is displayed. If there are no errors, the bottom half of the form displays the new calculated coverage and deduction information for the employee.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



8. **Select Accept, Reject, or Change**

If the displayed information for the coverage and deductions is correct, select 'Accept'. If you do not want an amount applied to the employee, select 'Reject'. If you want to override a coverage or deduction amount, select 'Change' and then enter the appropriate amounts. If you only want to override the Deduction Effective Date, select 'Accept' and then change the date.

For practice, select 'Accept' for all deductions listed.

9. **Enter a Coverage Amount 1 and/or Amount 2**

Use this text box only to override the calculated value. Enter the coverage amounts elected by the employee in whole numbers only. This text box does not contain decimal positions.

For practice, leave these text boxes blank.

10. **Enter the Deduction Amount**

Use this text box to override the calculated value.

For practice, do not change this text box for any of the deductions.

11. **Enter the Deduction Effective**

Use this text box to override the date on which deductions should begin. Enter the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

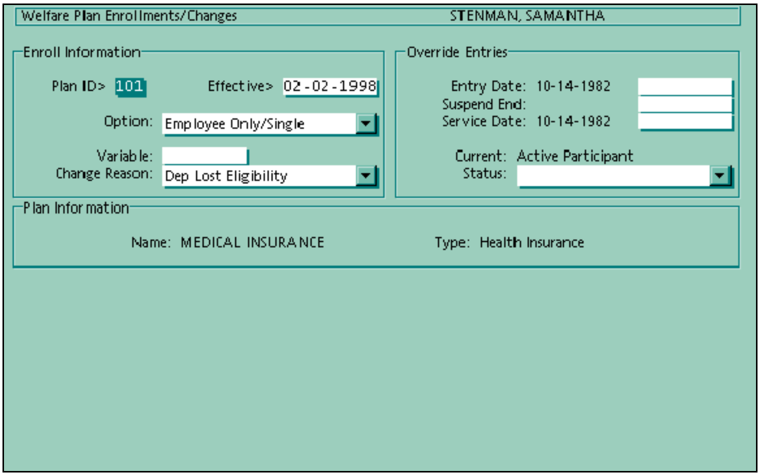
For practice, do not change this text box for any of the deductions.

12. **Click Save or press Enter**

The change record is created.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



Welfare Plan Enrollments/Changes STENMAN, SAMANTHA

Enroll Information
Plan ID> 101 Effective> 02-02-1998
Option: Employee Only/Single
Variable:
Change Reason: Dep Lost Eligibility

Entry Date: 10-14-1982
Suspend End:
Service Date: 10-14-1982
Current: Active Participant
Status:

Plan Information
Name: MEDICAL INSURANCE Type: Health Insurance

See also:

- Life status (family) changes ***(on page 415)***

For more information on processing life status changes.

Processing life status changes for employees enrolled in deferred plans

To process a life status change for an employee enrolled in a deferred plan, use the Deferred Plan Enrollments/Changes form (64-SCR).

1. Access the Deferred Plan Enrollments/Changes form (64-SCR)

Access this form by making the following selections from the Navigator:

Component:	Deferred Plans Enrollment/Maintenance
Process:	Eligibility and Enrollment
Task:	Deferred Plan Enrollment

2. Enter the Plan ID

Enter the unique identifier for the plan.

3. Enter the Effective Date

Enter the effective date of the change in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

4. Select an Option

Select a valid enrollment option from the Option Elected option list (BA03).

5. Click Save or press Enter

The information entered thus far will be validated against the plan rules and the employee's master record. If any errors are detected, the appropriate error message(s) will be displayed. If there are no errors, the record is created and the plan information, employee plan status, and plan dates are displayed.

6. Select a Plan Status

To override the system-generated status, select a value from the Plan Status option list (BA04).

7. Enter an Entry Date

The displayed date reflects the effective date of the new enrollment after an employee meets eligibility requirements. This date will not change if options elected or plan status changes, unless required by plan rules.

To override the system-generated date, enter a new date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

8. Enter an Elig Date

The displayed date reflects the date upon which an employee is eligible for the deferred plan.

To override the system-generated date, enter a new date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

9. Enter a Service Date

The displayed date reflects the employee's employment date, original hire date, or adjusted seniority date based on the service date rule selected on the Benefit Plan Rules form (TK-SCR).

To override the system-generated date, enter a new date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

10. Enter a Susp End Date

Enter a date to reflect when the employee will again be eligible to continue participation. Enter the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

This text box is used if an employee has lost coverage because of a separation activity or took a hardship withdrawal against a thrift/savings plan and is not allowed to contribute for a period of time. An employee can not be enrolled in the plan prior to the date you enter here.

11. Click Save or press Enter

If you changed any of the data in Steps 6 through 10, you must save the information you entered by clicking Save or pressing Enter.

See also:

- Life status (family) changes ***(on page 415)***

For more information on processing life status changes.

Processing life status changes for employees enrolled in flex plans

To process a life status change for an employee enrolled in a flex plan, use the Flex Benefit Enrollments/Changes form (55FSCR).

1. Access the Flex Benefit Enrollments/Changes form (55FSCR)

Access this form by making the following selections from the Navigator:

Component:	Flex Plans Enrollment/Processing
Process:	Flex Enrollment
Task:	Flex Benefit Plan Enrollment

To complete the Guided Practice for this task, first add an 'Employee & Spouse' option to plan 601 using the Option/Resulting Plan Status Rules form (TTOSCR). Use an effective date of '01-01-1925' and a date method of 'Actual Event Date'. Define the low and high status for plan 601 according to the statuses table below. You must also create a Coverage And Contribution Factors form (TM-SCR) for plan 601 for the 'Employee & Spouse' option. Use the costs table below. Then access the Flex Benefit Enrollments/Changes form (55FSCR) for Organization 999999 for employee 2001, Brenda Reynolds. She was recently married, and you will change some of her elected options.

Option/Resulting Plan Status Rules form (TTOSCR) statuses

Low Status	High Status	Resulting Status
0	1	1
5	5	1
7	7	1

Coverage And Contribution Factors form (TM-SCR) costs

Ctrb Type	Factor 1 Cost
Basic Post Tax Contrb	.50
Company	.95
Basic Pre Tax Contrb	.50

2. Enter the Master Plan ID

Enter the three-character Flex Master Plan identifier.

For practice, type '700'.

3. Enter the Effective Date

Enter the plan change date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For practice, type '09-12-1998' (US and Canada) or '12-09-1998'(elsewhere).

4. Select the Enroll/Change Type

Select an option from the Flex Action option list (BA64) to indicate the type of action to be performed by the form.

For practice, select 'Life Status Change'.

5. Enter the Change Reason

This list box is required when the Enroll/Change Type list box (BA64) indicates a life status change. Options for this list are provided by the Option Change Reason option list (BA63).

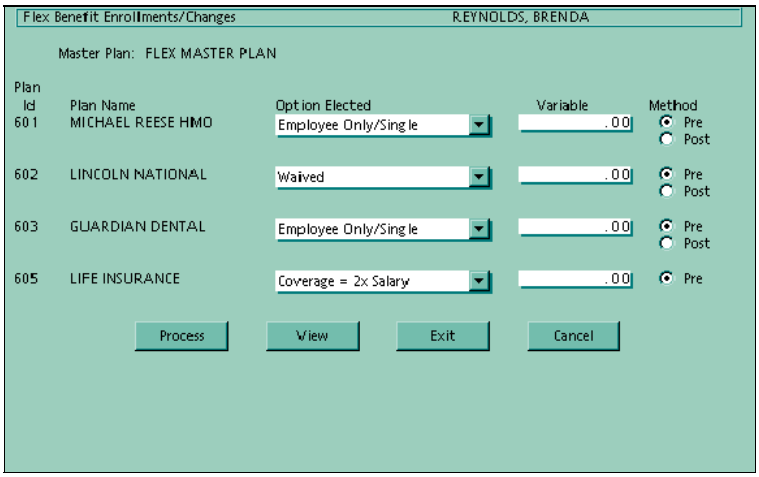
For practice, select 'Marriage'.

6. Click Save or press Enter

The second panel of the Flex Benefit Enrollments/Changes form (55FSCR) is displayed.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



Use the following values to complete Steps 7, 8, and 9:

Plan ID	Option Elected	Variable	Method
601	Employee & Spouse	—	Pretax
602	Waived	—	—

603	Employee & Spouse	—	Pretax
605	Coverage=2x Salary	—	Pretax

7. Select the Option Elected

Select the option the employee elects for the plan (step 6).

For practice, make the entries shown in the preceding table.

8. Enter the Variable

Use this text box to enter an up-to-nine-digit employee-dependent factor such as a fixed amount needed to calculate plan coverage or contribution amount. If the plan requires a variable entry and the text box is left blank, an error message is displayed.

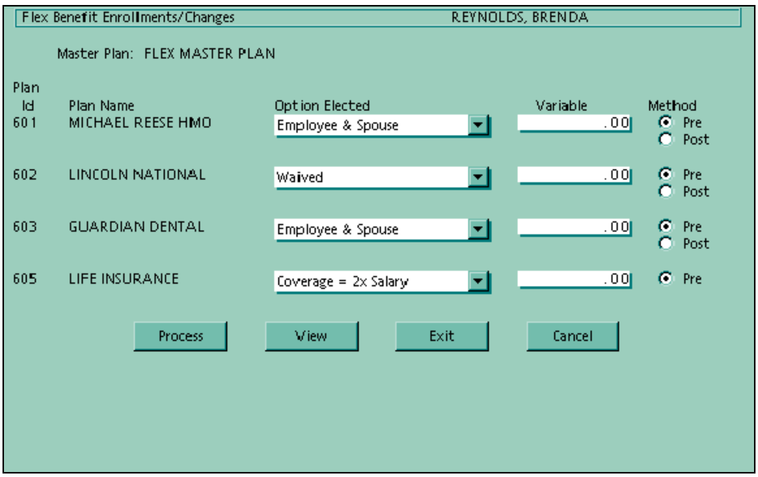
For practice, make the entries shown in the preceding table (step 6).

9. Select the Method

Select whether the employee has elected the pre- or posttax contribution. This indicator is used to select the proper HED from the plan's Benefit Plan Rules table (TK-SCR).

For practice, make the entries shown in the preceding table (step 6).

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



Note: *If the only buttons available to you at the bottom of the form are Exit and Cancel, go to Step 10. Otherwise, go to Step 12.*

10. Click Save or press Enter

To proceed to the next form of component plans, click Save or press Enter. If no errors are detected in the values entered, the next form of component plans is displayed and ready for changes to the same three entries.

For practice, click Save or press Enter.

11. Repeat steps 7, 8, and 9 for each remaining component plan

Change the Option Elected, Variable, and Method entries for each of the remaining component plans as needed.

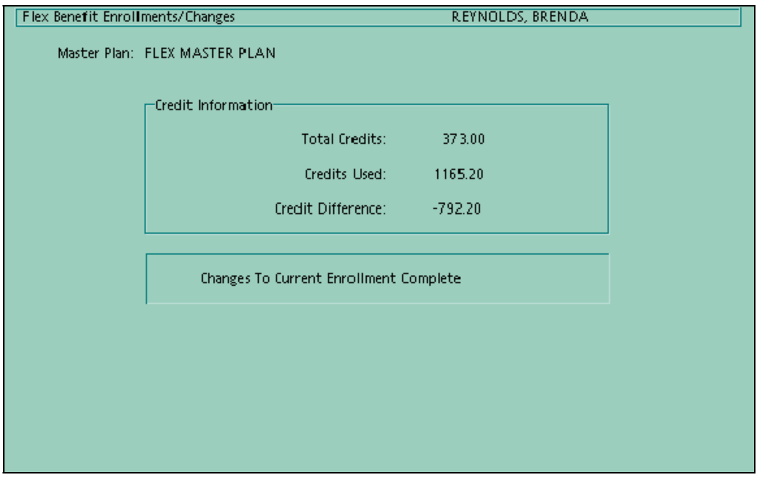
For practice, make no further entries.

12. Click an action button

Click View to display the results of the plan credit calculations without actually updating the employee record, or click Process to complete the change and update the employee record.

For practice, click Process.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



See also:

Processing a mid-year employee benefit change based on change in plan cost/coverage

To process a change due to a plan's cost/coverage for an employee enrolled in a flex plan, use the Flex Benefit Enrollments/Changes form (55FSCR).

1. Access the Flex Benefit Enrollments/Changes form (55FSCR)

Access this form by making the following selections from the Navigator:

Component: Flex Plans Enrollment/Processing
Process: Flex Enrollment
Task: Flex Benefit Plan Enrollment

For practice, access the Flex Benefit Enrollments/Changes form (55FSCR) for Organization 999999 for employee 2001, Brenda Reynolds.

2. Enter the Master Plan ID

Enter the three-character Flex Master Plan identifier.

For practice, type '700'.

3. Enter the Effective Date

Enter the plan change date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For practice, type '05-01-2001' (US and Canada) or '01-05-2001'(elsewhere).

4. Select the Enroll/Change Type

Select an option from the Flex Action option list (BA64) to indicate that the plan has changed cost or coverage.

For practice, select 'Plan Cost/Cov Change'.

5. Select the Change Reason

Select a mid-year change reason option from the Option Change Reason option list (BA63) to indicate a plan change.

For practice, select 'Inc/Dec Plan Cost'.

6. Click Save or press Enter

The second panel of the Flex Benefit Enrollments/Changes form (55FSCR) is displayed. It displays all the plans of this type for which the employee is eligible.

For practice, click Save or press Enter.

7. De-enroll the employee from the changed plan

Select the 'Waive' option for the plan for which cost/coverage changed. Then either waive or enroll in a valid option for one of the other plans.

For practice, select 'Waive' for the Michael Reese HMO plan 601.

8. Select the Option Elected

Select the option the employee elects for the replacement plan enrollment or waiver.

For practice, select 'Employee & Spouse' for plan 602, Lincoln National.

9. Enter the Variable

Use this text box to enter an up-to-nine-digit employee-dependent factor such as a fixed amount needed to calculate plan coverage or contribution amount. If the plan requires a variable entry and the text box is left blank, an error message is displayed.

For practice, make no entry.

10. Select the Method

Select whether the employee has elected the pre- or posttax contribution. This indicator is used to select the proper HED from the plan's Benefit Plan Rules table (TK-SCR).

For practice, select 'Pretax'.

11. Click an action button

Click View to display the results of the plan deenrollment and replacement enrollment (or waiver) without actually updating the employee record, or click Process to complete the change and update the employee record.

For practice, click Process.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:

See also:

For more information about processing mid-year plan changes.

Recording service interruptions

To record a service interruption, use the Service Interruptions form (61-SCR).

Note: *A Service Interruptions form (61-SCR) may automatically be created when an employee is rehired or returns to service. Leaves of absence and returns are recorded on the Leaves And Returns form (95-SCR). If a Benefits Plan Breaks-In-Service Rules table (TU-SCR) has been set up for the rehire or return activity (Activity Codes option list HR09) selected on the Leaves And Returns form (95-SCR), a Service Interruptions form (61-SCR) is automatically generated for each plan that has a rules record that matches the rehire or return activity.*

1. Access the Service Interruptions form (61-SCR)

Access this form by making the following selections from the Navigator:

Component: Deferred Plans Enrollment/Maintenance
Process: Service, Vesting and Retirement Info
Task: Service Interruptions

For practice, access the Service Interruptions form (61-SCR) for Organization 999999 employee 3011, Sandra Laughlin.

2. Enter the Plan ID

Enter the unique identifier for the plan.

For practice, type '510'.

3. Enter the Leave Start Date

Enter the effective date of the start of the service interruption. Enter the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For practice, type '08-10-1997'(US and Canada) or'10-08-1997'(elsewhere) .

4. Enter the Leave End Date

Enter the effective date of the return from a service interruption. Enter the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For practice, type '12-15-1997'(Us and Canada) or'15-12-1997' (elsewhere) .

5. Select a Reason

Select a reason for the service interruption from the Activity Codes option list (HR09).

For practice, select 'Term-Job Opportunity'.

6. Enter the Leave Span

Enter the amount of time for the separation in the format YYMMDD. For example, you would enter '010000' for one year.

For practice, type '000405'.

7. Enter the Parity Date

Enter the parity requalification date, the date by which an employee must return to service to prevent incurring a break in service. Enter the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For practice, leave this text box blank.

8. Select a B-I-S Indicator

Select the break-in-service indicator.

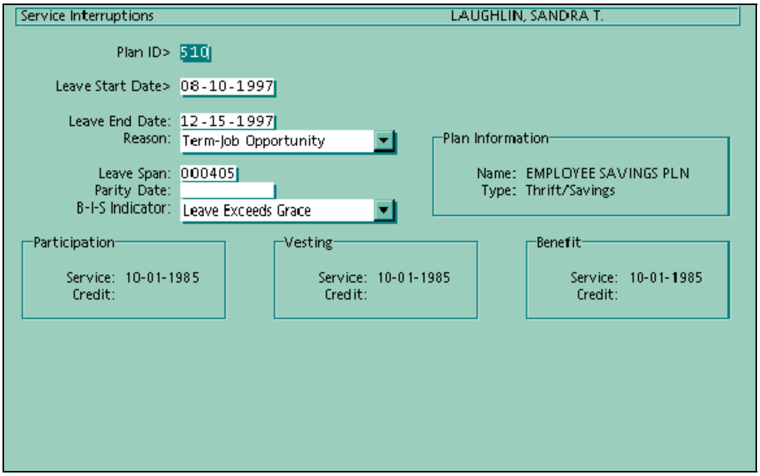
For practice, select 'Leave Exceeds Grace'.

9. Click Save or press Enter

The service interruptions record is created.

For practice, Click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



Service Interruptions LAUGHLIN, SANDRA T.

Plan ID> 510

Leave Start Date> 08-10-1997

Leave End Date: 12-15-1997

Reason: Term-Job Opportunity

Leave Span: 000405

Parity Date:

Shutting off HEDs

To manually shut off an HED, use the Deduction Information From Benefit Plans form (54-SCR).

1. Access the Deduction Information From Benefit Plans form (54-SCR)

Access this form by making the following selections from the Navigator:

Component:	Health/Welfare Plan Enrollment/Maintenance
Process:	Eligibility and Enrollment
Task:	Change Deduction Amount

For practice, access the Deduction Information From Benefits Plan form (54-SCR) for employee 3014, Mike Sullivan.

2. Select the HED

Select the HED to be shutoff.

For practice, type '510'.

3. Click Entry Form for a New Date

Click the Entry Form for a New Date button on the lower left portion of the form. The button changes to Return to Standard Form.

For practice, click Entry Screen for a New Date.

4. Enter the Effective Date

Enter the shutoff effective date. Enter the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For practice, type '01-01-1999'.

5. Select 'Inactive' for Frequency

Select 'Inactive' from the Frequency option list (PP08).

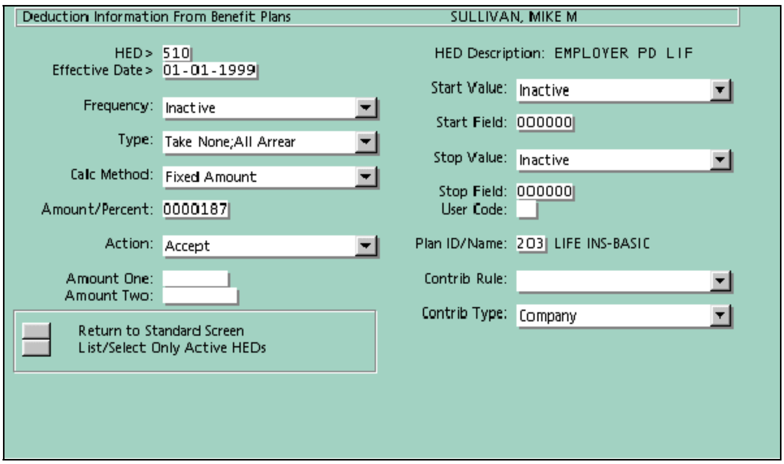
For practice, select 'Inactive'.

6. Click Save or press Enter

The HED is turned off.

For practice, click Save.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



See also:

- Shutting off HEDs for benefit plans ***(on page 427)***

For more information on manually shutting off HEDs.

Adjusting plan service dates

To adjust an employee's plan service dates, use the Plan Service Dates form (62-SCR).

1. Access the Plan Service Dates form (62-SCR)

Access this form by making the following selections from the Navigator:

Component:	Deferred Plans Enrollment/Maintenance
Process:	Service, Vesting and Retirement Info
Task:	Service Dates

For practice, Access the Plan Service Dates form (62-SCR) for Organization 999999 employee 3018, Leonard Theissen. Leonard had a one-year service interruption, from 03-01-1986 to 03-01-1987(US and Canada) or 01-03-1996 to 01-03-1997(elsewhere), for which you will adjust his vesting service date accordingly for plan 500.

2. Enter the Plan ID

Enter the unique identifier for the plan.

For practice, type '500'.

3. Enter the Effective Date

Enter the effective date of the adjustment. Enter the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For practice, type '12-31-1987'(US and Canada) or'31-12-1987'(elsewhere).

Completing Participation

4. Enter the Service

This is the date from which service is to be counted for participation in the deferred benefits plan. Enter the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For practice, do not change this text box.

5. Enter the Credit

This is the value of the employee's years, months, and days of credited participation service in the deferred benefits plan. Enter the time span in the format YYMMDD.

For practice, do not change this text box.

6. Click Granted

This is the indicator of whether a participant was granted an additional year of Participation Service.

For practice, do not change this check box.

Completing Vesting

7. Enter the Service

This is the date when vesting service begins for the deferred benefits plan. Enter the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For practice, type '01-01-1984'.

8. Enter the Credit

This is the value of the employee's years, months, and days of credited vesting service in the deferred benefits plan. Enter the time span in the format YYMMDD.

For practice, do not change this text box.

9. Click Granted

This is the indicator of whether a participant was granted an additional year of Vesting Service.

For practice, do not change this check box.

Completing Benefit

10. Enter the Service

This is the date when service begins for purposes of accruing a benefit. Enter the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For practice, do not change this text box.

11. Enter the Credit

This is the value of the employee's years, months, and days of credited Benefit Service in the deferred benefits plan. Enter the time span in the format YYMMDD.

For practice, do not change this text box.

12. Click Granted

This is the indicator of whether a participant was granted an additional year of Benefit Service.

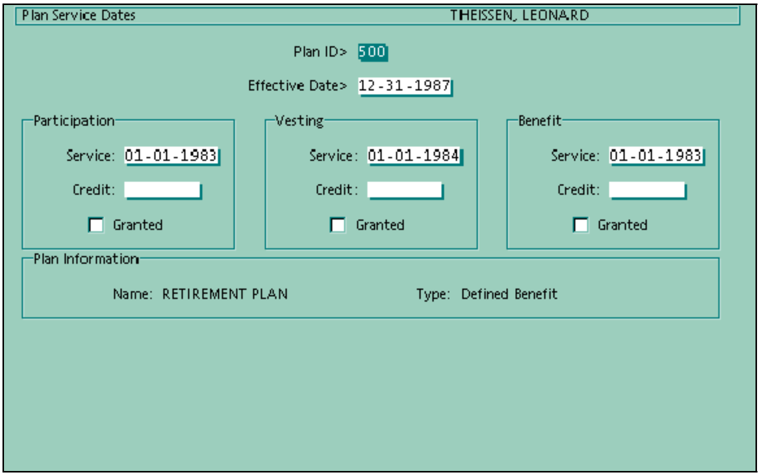
For practice, do not change this check box.

13. Click Save or press Enter

The record is created.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



See also:

- Adjusting participation, vesting, and benefit service dates ***(on page 431)***

For more information on maintaining participation, vesting, and benefits service dates.

Recording waivers of joint and survivor benefits

To record a waiver of joint and survivor benefits, use the Waiver Of Joint And Survivor Benefits form (85-SCR).

Note: *The Waiver Of Joint And Survivor Benefits form (85-SCR) has two purposes, recording waivers of benefits and recording domestic order payments. Depending on the purpose for which you are using the form, you will complete the Plan ID, Elected Benef Xref, and either the remaining text boxes on the top portion or in the Domestic Order Data group box.*

1. Access the Waiver Of Joint And Survivor Benefits form (85-SCR)

Access this form by making the following selections from the Navigator:

Component: Deferred Plans Enrollment/Maintenance
Process: Service, Vesting and Retirement Info
Task: Joint/Survivor Waivers

For practice, access the Waiver Of Joint And Survivor Benefits form (85-SCR) for Organization 999999 employee 3014, Mike Sullivan.

2. Enter the Plan ID

Enter the unique identifier for the plan.

For practice, type '510'.

3. Enter the Waiver Date

This is the effective date of the employee's waiver or acceptance of his automatic right to a benefit to be paid in the form of a Joint and Survivor Annuity. Enter the date in the format

MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For practice, type '01-02-1998'(US and Canada) or '02-01-1998'(elsewhere).

4. Enter the Marital Date

This is the date of the employee's marriage. Enter the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For practice, type '06-14-1980'(US and Canada) or '14-06-1980'(elsewhere).

5. Enter the Notification Date

This is the date on which the notification was sent to the employee and spouse to notify them of their right to receive or waive the joint and survivor annuity form of benefit payment. Enter the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For practice, type '01-02-1998'(US and Canada) or '02-01-1998'(elsewhere).

6. Select the Election

This check box identifies whether the employee has accepted the joint and survivor benefit (selected) or waived his or her rights to the automatic benefit (blank).

For practice, leave this check box blank to waive the benefit.

7. Enter the Elected Benef Xref

This is a required text box. It identifies the beneficiary or spouse to whom the joint and survivor benefits apply.

Note: *If you are unsure of which option to enter, access either the Beneficiary/Plan Cross Reference form(59BSCR) or the Covered Dependents By Plan form (59DSCR) to research the options that are being referenced for this plan ID and employee.*

For practice, type '001'.

Domestic Order Data

8. Enter the Accrual Date

This is the date through which the employee's benefit has been accrued for purposes of determining payment under a legal order. Enter the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For practice, leave this text box blank.

9. Enter the Payment Form

Enter the option from the Form of Payments option list (BA07) that identifies the form of payment under which the benefit is to be paid due to a legal order.

For practice, leave this text box blank.

10. Enter the Payment Date

This is the date on which payments are to begin under a legal order. Enter the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For practice, leave this text box blank.

11. Enter the Payment Amount

Enter the amount of each payment payable under a legal order. Enter amounts with two decimals. For example, the number 2,000.00 would be entered as 2000.00.

For practice, leave this text box blank.

12. Enter the Payment Stop Date

This is the last date on which a payment under a legal order is due. Enter the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

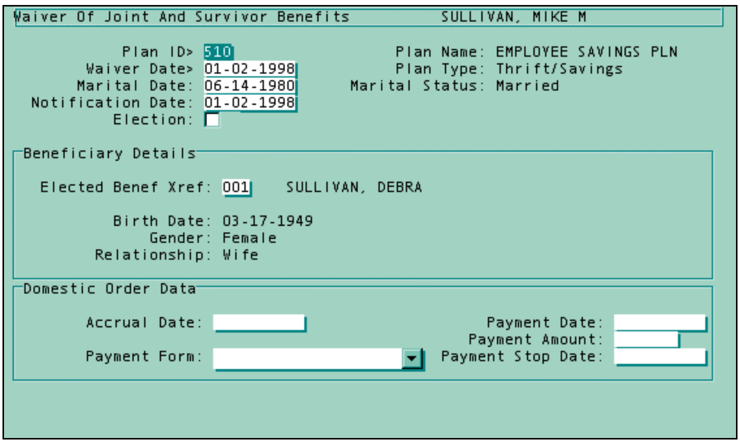
For practice, leave this text box blank.

13. Click Save or press Enter

The record is created.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



Waiver Of Joint And Survivor Benefits SULLIVAN, MIKE M

Plan ID> 510 Plan Name: EMPLOYEE SAVINGS PLN

De-enrolling employees from welfare plans

To de-enroll an employee from a welfare plan, use the Welfare Plan Enrollments/Changes form (55-SCR).

1. Access the Welfare Plan Enrollments/Changes form (55-SCR)

Access this form by making the following selections from the Navigator:

Component: Health/Welfare Plan Enrollment/Maintenance
Process: Eligibility and Enrollment
Task: Enroll in Health and Welfare Plan

For practice, access the Welfare Plan Enrollments/Changes form (55-SCR) for Organization 999999 employee 3014, Mike Sullivan, for plan 'DEN'. You will de-enroll him from the dental plan.

2. Enter the Plan ID

Enter the unique identifier for the plan.

For practice, type 'DEN'.

3. Enter the Effective date

Enter the de-enrollment effective date. Enter the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For practice, type '03-31-1998'(US and Canada) or '31-03-1998'(elsewhere).

4. Select an Option

Select a de-enrollment option from the Option Elected option list (BA03).

For practice, select 'Shutoff/Deenroll'.

5. Select a Change Reason (optional)

If you want to track the reason for an option change, select a value from the Option Change Reason option list (BA63).

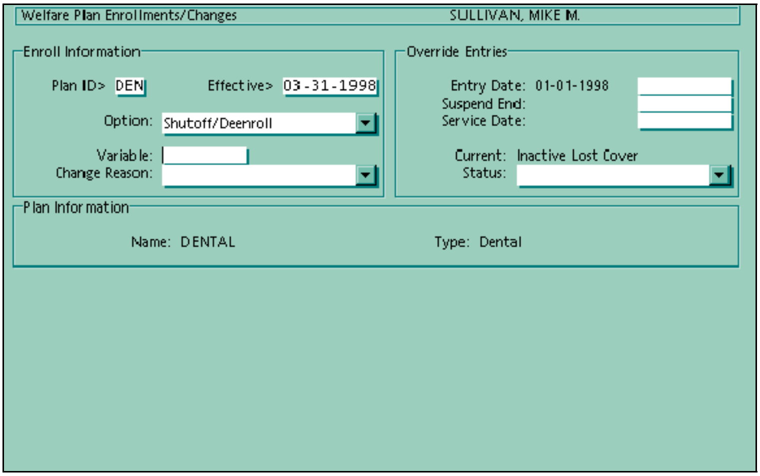
For practice, leave this list box blank.

6. Click Save or press Enter

The resulting plan status is changed to inactive.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



See also:

- De-enrolling employees from benefits plans ***(on page 437)***

For more information on de-enrolling employees from benefits plans.

De-enrolling employees from deferred plans

To de-enroll an employee from a deferred plan, use the Deferred Plan Enrollments/Changes form (64-SCR).

1. Access the Deferred Plan Enrollments/Changes form (64-SCR)

Access this form by making the following selections from the Navigator:

Component: Deferred Plans Enrollment/Maintenance
Process: Eligibility and Enrollment
Task: Deferred Plan Enrollment

For practice, access the Deferred Plan Enrollments/Changes form (64-SCR) for Organization 999999 employee 3015, Steve Llewelyn, for plan 'A01'. You will de-enroll him from plan A01.

2. Enter the Plan ID

Enter the unique identifier for the plan.

For practice, type 'A01'.

3. Enter the Effective Date

Enter the effective date of the de-enrollment in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For practice, type '04-15-1998'(US and Canada) or '15-04-1998'(elsewhere).

4. Select an Option

Select a valid de-enrollment option from the Option Elected option list (BA03).

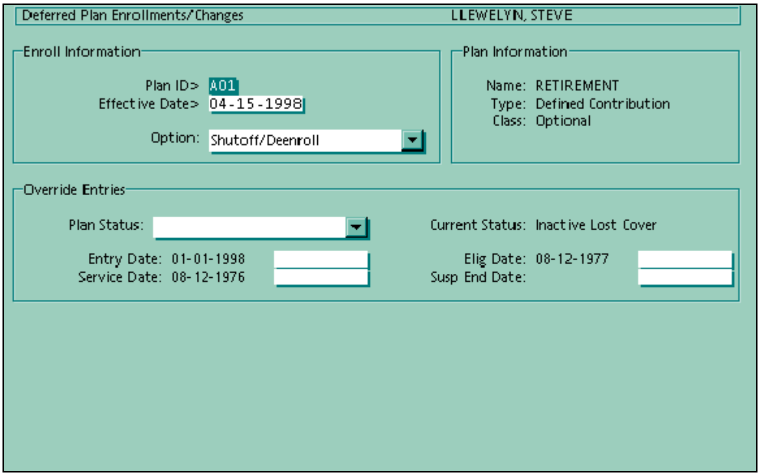
For practice, select 'Shutoff/Deenroll'.

5. Click Save or press Enter

The de-enrollment record is created.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



See also:

- De-enrolling employees from benefits plans ***(on page 437)***

For more information on de-enrolling employees from benefits plans.

De-enrolling employees from flex plans

To de-enroll an employee from a flex plan, use the Flex Benefit Enrollments/Changes form (55FSCR).

1. Access the Flex Benefit Enrollments/Changes form (55FSCR)

Access this form by making the following selections from the Navigator:

Component: Flex Plans Enrollment/Processing
Process: Flex Enrollment
Task: Flex Benefit Plan Enrollment

To complete the Guided Practice for this task, first add a 'Shutoff/Deenroll' option to plans 601, 602, 603, and 605 using the Option/Resulting Plan Status Rules form (TTOSCR). Use an effective date of '01-01-1925' and a date method of 'Actual Event Date'. Define the low and high status for each plan according to the following table. Then access the Flex Benefit Enrollments/Changes form (55FSCR) for Organization 999999 for employee 6003, J. T. Betts for plan '700'. You will de-enroll J. T. Betts from plan 700.

Low Status	High Status	Resulting Status
1	1	5
7	7	5

2. Enter the Master Plan ID

Enter the three-character Flex Master Plan identifier.

For practice, type '700'.

3. Enter the Effective Date

Enter the de-enrollment date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For practice, type '07-01-1998'(US and Canada) or '01-07-1998' (elsewhere).

4. Select the Enroll/Change Type

Select an option from the Flex Action option list (BA64) to indicate the type of action to be performed by the form.

For practice, select 'Termination/De-enroll'.

5. Enter the Change Reason (optional)

Enter the reason for the change.

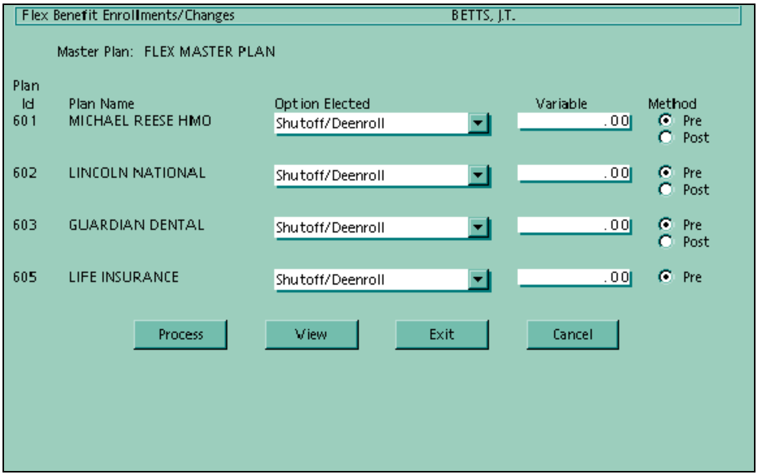
For practice, leave this list box blank.

6. Click Save or press Enter

The second panel of the Flex Benefit Enrollments/Changes form (55FSCR) is displayed. The Option Elected defaults to 'Shutoff/Deenroll' for each component plan.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



Note: *If the only buttons available to you at the bottom of the form are Exit and Cancel, go to Step 7. Otherwise, go to Step 8.*

7. Click Save or press Enter

The second panel displays up to four plans. If there are more than four plans for this employee, click Save or press Enter to display a third panel of the Flex Benefit Enrollments/Changes form (55FSCR) that contains additional plans.

For practice, skip this step.

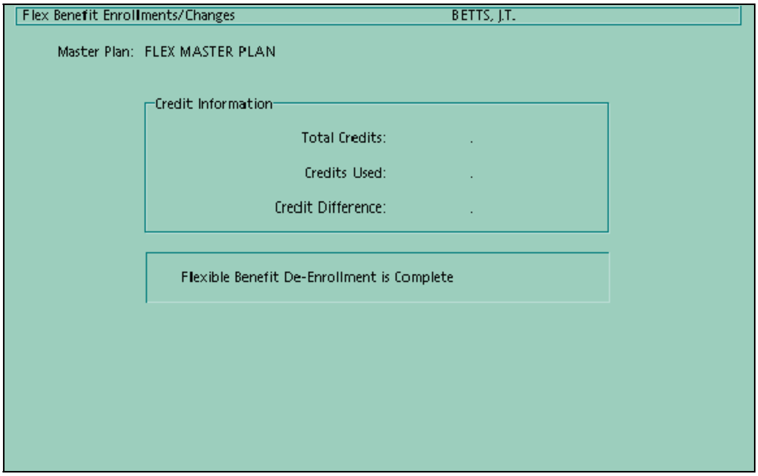
8. Click Process

No employee credit information is displayed on the Flex Benefit Enrollments/Changes form (55FSCR), and the following message is displayed:

'Flexible Benefit De-enrollment is Complete'

For practice, click Process.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



See also:

- De-enrolling employees from benefits plans ***(on page 437)***

For more information on de-enrolling employees from benefits plans.

Recording COBRA notification and response dates

To record COBRA notification and response dates, follow these steps:

1. Access the COBRA Notification And Response Dates form (86-SCR)

Access this form by making the following selection from the Navigator:

Component: Health/Welfare Plan Enrollment/Maint
Process: Eligibility and Enrollment
Task: COBRA Notification

For practice, access the COBRA Notification And Response Dates form (86-SCR) for employee 3001 in the '999999' organization.

2. Enter the Plan ID

This is the unique identifier of a specific Benefit Plan in which the employee is currently enrolled.

It must have a Benefit Plan Rules table record (TK-SCR) established before it can be used at the employee master file level.

For practice, type '101'.

3. Select the Qualifying Event

This is the COBRA qualifying event.

This option identifies the Qualifying event for the purpose of determining whether or not COBRA coverage is to be extended to a Qualified Beneficiary.

For practice, select 'Terminated Employment'.

4. Enter the Event Date

This is the date on which the Qualifying Event occurred or was effective. Enter the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For practice, type '06-01-1998' (US and Canada) or '01-06-1998' (elsewhere).

5. Enter the Event Number

This is used to determine if this is the primary or a secondary event.

For practice, type '01'.

6. Enter the Notified HR

This is the date on which the employee notified HR of the Qualifying Event or the date HR identified the fact the event had occurred. Enter the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For practice, type '06-01-1998' (US and Canada) or '01-06-1998' (elsewhere).

7. Enter the Notified INS Comp

This is the date the insurance company was notified of an employee's or their dependent's right to extended coverage under COBRA. Enter the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For practice, type '06-01-1998' (US and Canada) or '01-06-1998' (elsewhere).

8. Enter the Notified EE Rights

This is the date on which the employee or their dependent was notified of their right for extended coverage under COBRA. Enter the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For practice, type '06-01-1998' (US and Canada) or '01-06-1998' (elsewhere).

9. Enter the Last Response Date

This is the date by which the employee or their dependent must notify HR or the insurance company of their intent to extend coverage. Enter the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For practice, type '08-01-1998' (US and Canada) or '01-08-1998' (elsewhere).

10. Enter the Actual Response Date

This is the actual date on which the employee or dependent notified HR or the insurance company of their intent to extend coverage. Enter the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For practice, type '07-15-1998' (US and Canada) or '01-07-1998' (elsewhere).

11. Enter the Qual Event to COBRA

This is the date on which the event was passed to the COBRA Solution system by the interface program. Enter the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For practice, type '06-01-1998' (US and Canada) or '01-06-1998' (elsewhere).

12. Select the Accepted Coverage

This is the indicator of whether or not the employee or dependent accepted extended coverage.

For practice, select 'Yes Accepted Ext Cov'.

13. Enter the Principal Qual Ben

This is the Spouse/Dependent Key ID of the Principal Qualified Beneficiary who is the person causing or impacted by this Qualifying Event.

If all of the Spouse and Dependents are involved and were copied to the COBRA Solution this text box will contain the value ALL.

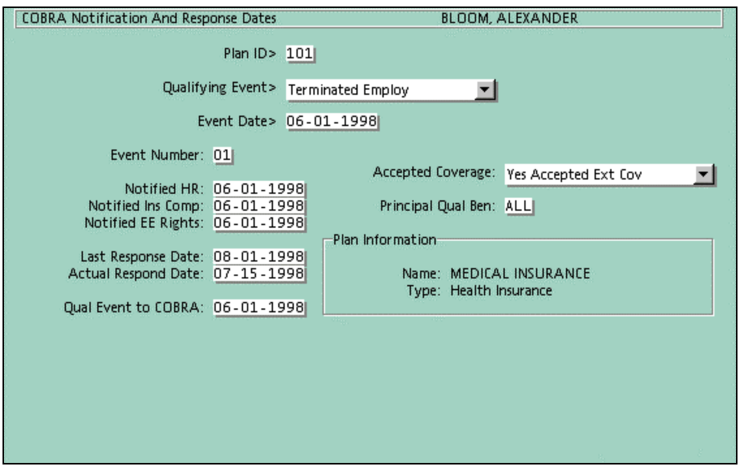
For practice, type 'ALL'.

14. Click Save or press Enter

COBRA notification and response dates are now recorded.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



See also:

- Separations and terminations ***(on page 422)***

For a description of the Cobra Notification and Response Dates form (86-SCR).

Recording spouse/dependent information with COBRA information

To record COBRA spouse/dependent information, follow these steps:

1. Access the Spouse/Dependent Information form (10CSCR)

The Spouse/Dependent Information form (10CSCR) is used to record information concerning an employee's spouse and dependents. This information can be especially useful for verifying benefit coverage eligibility or coordinating benefits and is used by the Benefits Administration Solution.

Access this form by making the following selections:

Actions ► Enter Command

Type '10CSCR' in the Program text box. Type the employee number in the Key text box, and then click OK or press Enter.

For practice, access the Spouse/Dependent Information form (10CSCR) for employee 3001 in the '999999' organization.

2. Enter the Key ID

Enter the identification number for an employee's dependent. Each spouse and dependent record is identified by a unique three-position Key ID. Establish a numbering scheme for this text box value that allows you to easily identify which type of record (spouse or dependent) you are viewing. For example, a spouse would be recorded as '001'. These dependents should already be recorded on the (non-COBRA) Spouse/Dependent Information form (10-SCR).

For practice, tab to the next entry.

3. Enter the Relationship

Enter the relationship of the spouse or dependent named in this form to the employee. You may update the Relationship option list (HR28) to include all of the relationships needed by your organization.

Note: *If you are unsure of which option to enter, type a question mark (?) in the text box and press Enter to display the option list and select an option.*

For practice, tab to the next entry.

4. Enter the Spouse/Dependent Name

Enter the name of the employee's spouse or dependent, using the format last name, first name.

For practice, tab to the next entry.

5. Enter the Sex

Enter an option from the Sex Code option list (HR29) to indicate the appropriate gender classification.

Note: *If you are unsure of which option to enter, type a question mark (?) in the text box and press Enter to display the option list and select an option.*

For practice, tab to the next entry.

6. Enter the Birth Date

Enter the date of birth for the spouse or dependent listed on this form. Enter the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For practice, tab to the next entry.

7. Enter the Social Security Number

Enter the social security number of the spouse or dependent listed on this form.

For practice, tab to the next entry.

8. Enter the Telephone Number

Enter the telephone number of the spouse or dependent listed on this form.

For practice, tab to the next entry.

9. Enter the Student Status

Enter an option from the Student Status option list (HR30) to indicate whether or not the spouse or dependent named in this form is a student and what level of school participation is involved.

Note: *If you are unsure of which option to enter, type a question mark (?) in the text box and press Enter to display the option list and select an option.*

For practice, tab to the next entry.

10. Enter the Employer Name

Enter the name of the employer of the spouse or dependent listed on this form.

For practice, tab to the next entry.

11. Enter the Employer Address

Enter the street address for the employer of the spouse or dependent listed on this form.

For practice, tab to the next entry.

12. Enter the City/State

Enter the city/state portion of the address of the employer of the spouse or dependent listed on this form.

For practice, tab to the next entry.

13. Enter the ZIP Code

Enter the ZIP code portion of the address of the employer of the spouse or dependent listed on this form.

For practice, tab to the next entry.

14. Enter the Insurance Company

Enter the insurance carrier for the spouse or dependent listed on this form.

For practice, tab to the next entry.

15. Enter the Dependent to COBRA

This is the date on which the Spouse and/or Dependents data was formatted and reported as part of COBRA coverage. Enter the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For practice, type '06-01-1998' (US and Canada) or '01-06-1998' (elsewhere).

16. Enter the Reason to COBRA

Enter the qualifying event which prompted the employee's or spouse/dependent data to be reported as part of COBRA coverage.

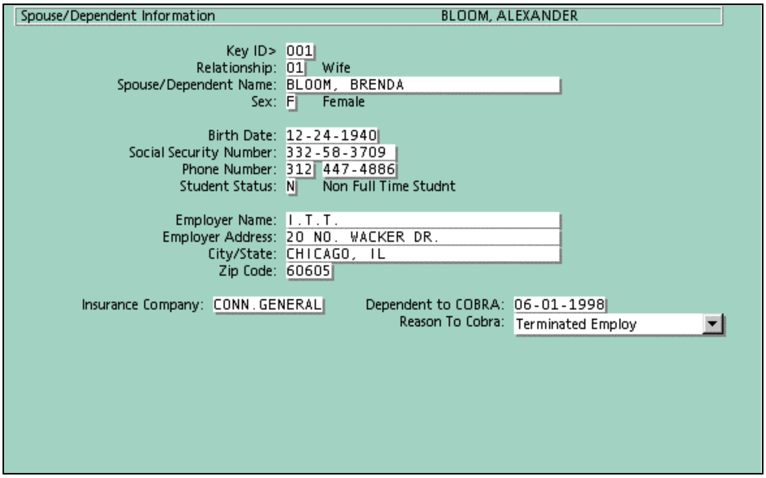
For practice, select 'Terminated Employ'.

17. Click Save or press Enter

The spouse and dependent information is now recorded for the employee.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



Spouse/Dependent Information BLOOM, ALEXANDER

Key ID> 001
Relationship: 01 Wife
Spouse/Dependent Name: BLOOM, BRENDA
Sex: F Female

Birth Date: 12-24-1940
Social Security Number: 332-58-3709
Phone Number: 312 447-4886
Student Status: N Non Full Time Studnt

Employer Name: I.T.T.
Employer Address: 20 NO. WACKER DR.
City/State: CHICAGO, IL
Zip Code: 60605

Insurance Company: CONN.GENERAL
Dependent to COBRA: 06-01-1998
Reason To Cobra: Terminated Employ

- Separations and terminations ***(on page 422)***

For a description of the Spouse/Dependent Information form (10CSCR).

Verifying automatic shutoff of deductions for a benefits plan

To verify the automatic shutoff of deductions for a benefits plan, follow these steps:

Completing the Guided Practice

To complete the Guided Practice, you will need to terminate employee 3017, Samantha Stenman, using the Separations And Terminations form (96-SCR). Terminate the employee using Effective Date '03-01-1999' and Activity 'Term-Dissatisfaction'.

1. Access the Welfare Plan Enrollments/Changes form (55-SCR)

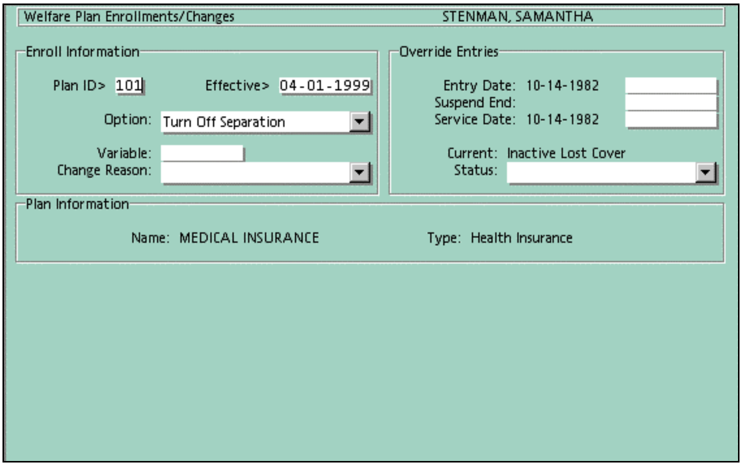
Upon termination, an employee is automatically de-enrolled from a welfare plan provided that you have set up the Activity/Resulting Plan Status Rules table (TTASCR) for that activity. You can verify this by ensuring that the value 'Turn Off Separation' displays in the Option list box.

Access this form by making the following selection from the Navigator:

Component: Health/Welfare Plan Enrollment/Maintenance
Process: Eligibility and Enrollment
Task: Enroll in Health and Welfare Plan

For practice, access the Welfare Plan Enrollments/Changes form (55-SCR) for employee number 3017, Samantha Stenman.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



2. Access the Deduction Information From Benefit Plans form (54-SCR)

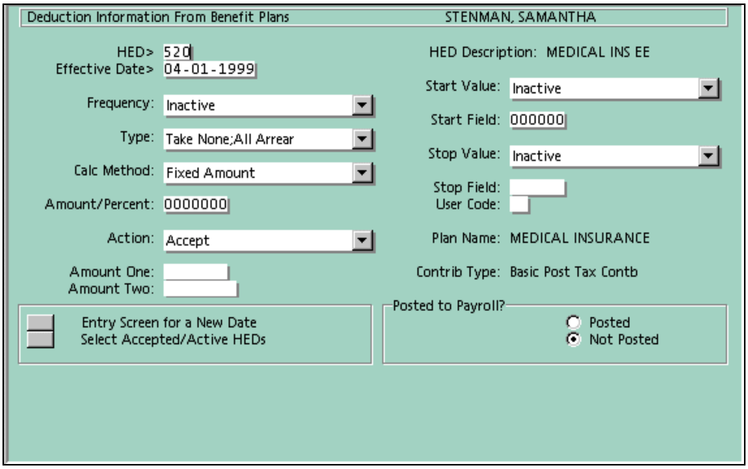
When an employee is terminated, deductions for a benefit plan are shutoff automatically, and the value 'Inactive' displays in the Frequency list box.

Access this form by making the following selection from the Navigator:

Component: Health/Welfare Plan Enrollment/Maintenance
Process: Eligibility and Enrollment
Task: Change Deduction Amount

For practice, access the Deduction Information From Benefit Plans form (54-SCR) for employee number 3017, Samantha Stenman.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



See also:

- Shutting off HEDs ***(see "Shutting off HEDs for benefit plans" on page 427)***

For more information about Automatic Shutoff.

Entering employee or dependent coverage information

To enter benefit coverage information for an employee or dependent, follow these steps:

Completing the Guided Practice

To complete the Guided Practice, you will need to enroll the employee in the health plan using the Welfare Plan Enrollment/Changes form (55-SCR), and enter any dependents into the system using the Spouse/Dependent Information form (10-SCR). In addition, you must enter the dependents who are covered by the plan into the system using the Covered Dependents By Plan form (59DSCR).

1. Access the HIPAA Information form (59KSCR)

The HIPAA Information form (59KSCR) is used to record benefit coverage information about an employee or the employee's spouse or dependents.

Access this form by making the following selection from the Navigator:

Component: Health/Welfare Plan Enrollment/Maintenance
Process: Eligibility and Enrollment
Task: HIPAA Information

For practice, access the HIPAA Information form (59KSCR) for employee 3003, Geoffery Alson.

2. Enter the Plan ID

Enter the unique identifier for the plan.

For practice, type '101'.

3. Enter the Coverage XRef

For an employee, enter '000'. For a dependent, enter the Dependent ID from the Covered Dependents By Plan form (59DSCR).

For practice, type '000'.

4. Enter the Coverage Start Date

Enter the date on which the benefit coverage began. Enter the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For practice, type '01-01-1990'.

5. Click the Out of Area? check box

Click this check box to indicate that the employee or dependent is out of the area.

For practice, do not change this entry.

6. Click the Certificate Issued? check box

Click this check box to indicate that a HIPAA certificate has already been issued for the employee.

For practice, do not change this entry.

7. Enter the Coverage Stop Date

Enter the date on which the benefit coverage ended. Enter the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

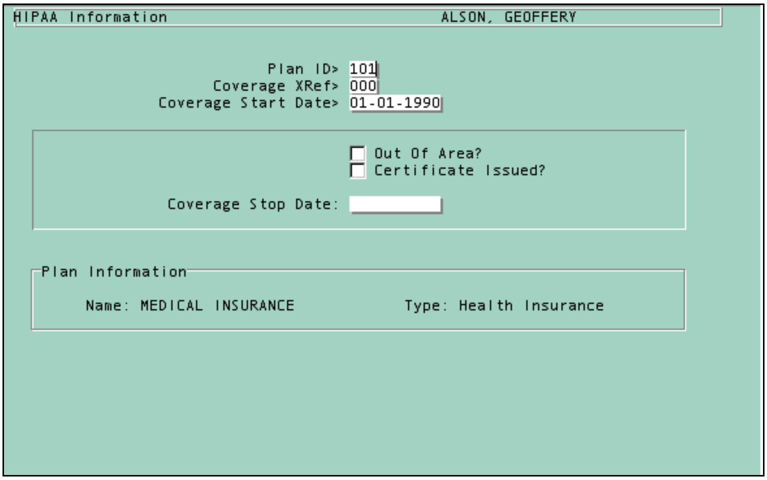
For practice, leave blank.

8. Click Save or press Enter

The coverage information has been recorded.

For practice, click Save.

If you completed the guided practice, the resulting form should look similar to the example that follows:



See also

- HIPAA ***(on page 424)***

For a description of the HIPAA Information form (59KSCR).

Extended Practice

Note: You must have completed the Extended Practices in the prior chapters to guarantee the successful completion of the Extended Practice that follows.

1. Daniel M. Anderson's wife retired early from her job. Change Daniel M. Anderson's (employee 1616) life insurance coverage to three times salary for plan 210 effective 02-01-1998 (US and Canada) or 01-02-1998 (elsewhere).
2. Thomas S. Miller, employee 6007, is getting married. He will be covered under his wife's medical plan. Waive him from plan 101 effective 09-01-1998 (US and Canada) or 01-09-1998 (elsewhere).
3. De-enroll employee 1578, Henry S. Maguire, from plan 210 effective 03-30-1998 (US and Canada) or 30-03-1998 (elsewhere).
4. De-enroll employee 1165, William Z. Manning, from plan S02, effective 06-30-1998 (US and Canada) or 06-30-1998 (elsewhere).
5. Define 'Shutoff/Deenroll' options effective 01-01-1925 for plans 101, 203, and 505 according to the following status table. Then de-enroll employee 6010, Brenda Ritter, from plan 710 effective 06-01-1998 (US and Canada) or 01-06-1998 (elsewhere).

Low Status	High Status	Resulting Status
1	1	5
7	7	5

Review of Questions Answered

1. What can you do with benefits data when transferring an employee between companies?

2. How is de-enrollment different for an employee enrolled in a flex plan versus an employee enrolled in a non-flex plan?

3. What is the difference between a plan shutdown and a de-enrollment?

4. What additional task should you consider when deleting a welfare enrollment or de-enrollment entry?

5. What report recalculates participation, vesting, and benefits service credit dates and what should you do before running it?

6. What report recalculates vesting percentages and what should be done before running it?

CHAPTER 13

Counseling Employees on Benefits and Retirement

In This Chapter

Introduction

When you first enrolled your employees into benefits plans, you collected and entered various pieces of information. Over time, you and the Benefits Administration Solution update and add to this information. As your employees' lives change over this time, they will have questions about their day-to-day benefits as well as their future benefits. Benefits Administration can help you counsel employees on their current and retirement benefits. This section will show you how to display enrollment choices, plan contributions, and retirement information.

Tasks

This section explains the following tasks:

- Verifying welfare benefits
- Viewing flex enrollment options and costs
- Viewing flex enrollment credit details
- Viewing an employee profile
- Viewing vesting information
- Entering vesting information
- Viewing deferred plan contribution amounts and percentages
- Viewing defined benefit plan contributions
- Entering defined benefit plan contributions
- Viewing defined contribution plan contributions
- Entering defined contribution plan contributions
- Viewing thrift/savings plan contributions
- Entering thrift/savings plan contributions
- Displaying retirement eligibility dates
- Generating retirement notification reports
- Setting up retirement counseling dates
- Viewing pension information
- Entering pension information
- Generating future Social Security Benefit projections

Prerequisites

Before you can maintain employee information, the following must be established for:

- Organizations
- Benefits plans

☞ *Refer to the '***Plan Design** *(on page 29)' section for more information on setting up benefits plans.*

- Employees enrolled in benefits plans

☞ *Refer to the '***Enrollment** *(on page 279)' section for more information on enrolling employees in benefits plans.*

Questions answered

This section answers the following questions:

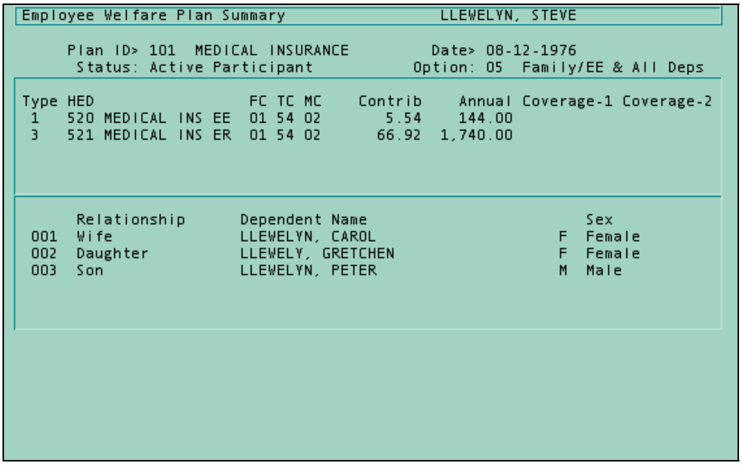
1. What Benefits Administration tool can be used to display a profile of employee benefits information?
2. What form summarizes employee welfare plan information, including HED and dependent information?
3. What two methods are available for updating employee vesting information?
4. What form that can help you with retirement counseling is automatically created when you enroll an employee in a deferred plan?
5. What facilities are provided for notifying and counseling employees on retirement?
6. What function is provided for extracting pension plan information for actuarial valuation?

Welfare plan summary

Employees will have questions about their welfare benefits information. Benefits Administration provides you with a way to display a summary of employee welfare information online.

You use the Employee Welfare Plan Summary form (55ISCR) to display a summary of employee welfare plan information. This single form displays enrollment, coverage, contribution, and covered dependents information for a benefits plan.

The following form shows information on the first welfare plan entry for employee 3015, Steve Llewelyn:



```
Employee Welfare Plan Summary                    LLEWELYN, STEVE

     Plan ID> 101  MEDICAL INSURANCE          Date> 08-12-1976
      Status: Active Participant            Option: 05  Family/EE & All Deps

Type HED                FC TC MC    Contrib    Annual Coverage-1 Coverage-2
 1   520 MEDICAL INS EE  01 54 02       5.54    144.00
 3   521 MEDICAL INS ER  01 54 02      66.92  1,740.00

      Relationship       Dependent Name                      Sex
 001  Wife               LLEWELYN, CAROL                  F  Female
 002  Daughter           LLEWELY, GRETCHEN                F  Female
 003  Son                LLEWELYN, PETER                  M  Male
```

The first two lines of the Employee Welfare Plan Summary form (55ISCR) identify the plan and display status and option information. The next section displays HED information. If dependents are covered under the plan, and have been enrolled, the last section displays information about them.

The Employee Welfare Plan Summary form (55ISCR) displays one form panel per welfare plan entry. Plan entries may include enrollments, changes, and de-enrollments. If there is more than one plan entry for an employee, you would click Save or press Enter to display the next entry. The most recent entry for a plan is displayed first. Plans are displayed in ascending plan ID order.

See also:

- Verifying welfare benefits ***(on page 501)***

For detailed directions on verifying welfare benefits.

Apply the Concept

Describe when you would use the Employee Welfare Plan Summary form (55ISCR) instead of the Welfare Plan Enrollments/Changes form (55-SCR) when counseling employees on their benefits.

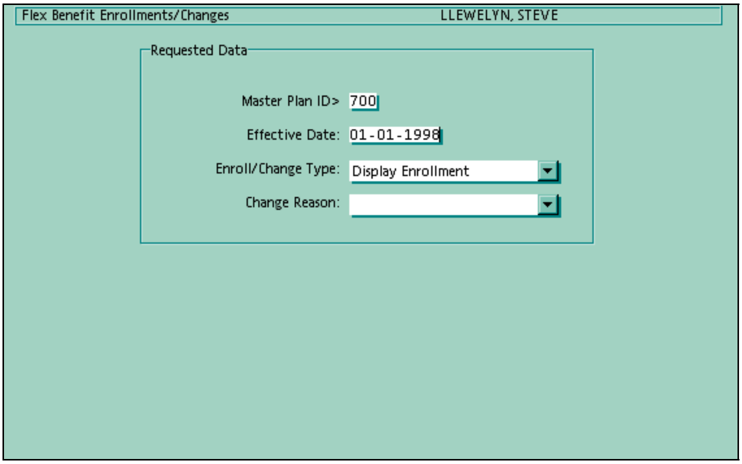
Flex enrollment information

After you enroll an employee in a flex plan, you can display information relating to the enrollment. You can display flex options, costs, and credit details.

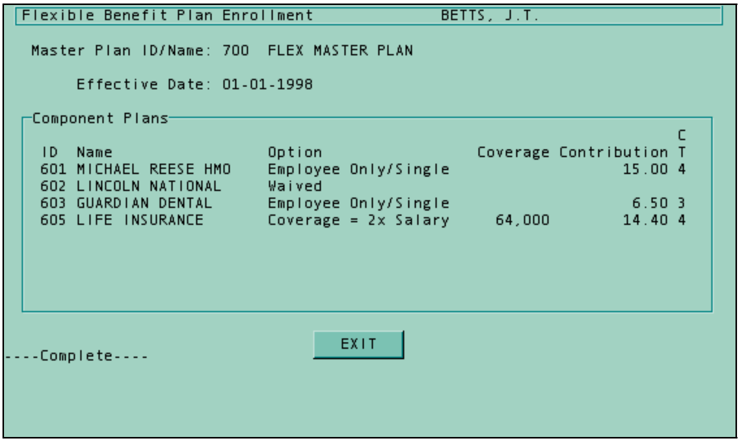
Enrollment options and costs

To display flex enrollment options and costs for an employee, use the Flex Benefit Enrollments/Changes form (55FSCR). This is the same form that you used to enroll the employee in the flex plan.

You can use the 'Display Enrollment' Enroll/Change Type to display enrollment information. The following forms show an example of how to display flex enrollment options and costs for employee 6003, J. T. Betts. The first form shows how the Flex Benefit Enrollments/Changes form (55FSCR) would look before clicking Save or pressing Enter:



This second form shows how the Flex Benefit Enrollments/Changes form (55FSCR) looks after clicking Save or pressing Enter:



Flexible Benefit Plan Enrollment BETTS, J.T.

Master Plan ID/Name: 700 FLEX MASTER PLAN

Effective Date: 01-01-1998

Component Plans

ID	Name	Option	Coverage	Contribution	C T
601	MICHAEL REESE HMO	Employee Only/Single		15.00	4
602	LINCOLN NATIONAL	Waived			
603	GUARDIAN DENTAL	Employee Only/Single		6.50	3
605	LIFE INSURANCE	Coverage = 2x Salary	64,000	14.40	4

----Complete----

EXIT

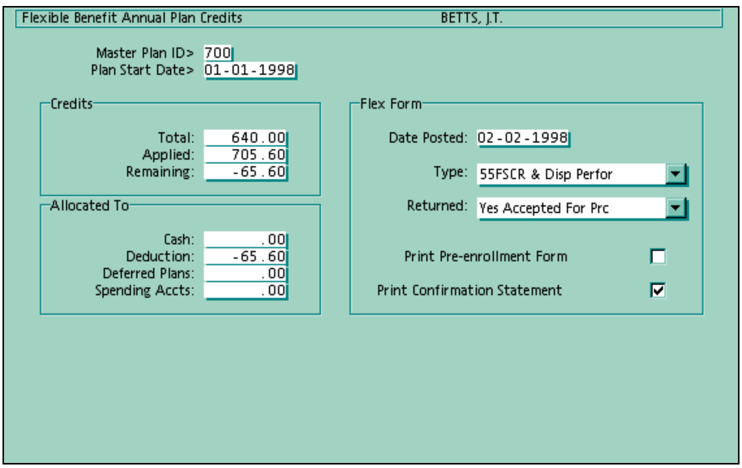
For detailed directions on verifying flex enrollment options and costs.

Enrollment credits

To display flex enrollment credit details, use the Flexible Benefit Annual Plan Credits form (55CSCR). This form displays the credit and allocation information for an employee, along with the flex enrollment form information.

The following form shows enrollment credits for employee 6003, J. T. Betts:



Flexible Benefit Annual Plan Credits BETTS, J.T.

Master Plan ID> 700
Plan Start Date> 01-01-1998

Credits
Total: 640.00
Applied: 705.60
Remaining: -65.60

Allocated To
Cash: .00
Deduction: -65.60
Deferred Plans: .00
Spending Accts: .00

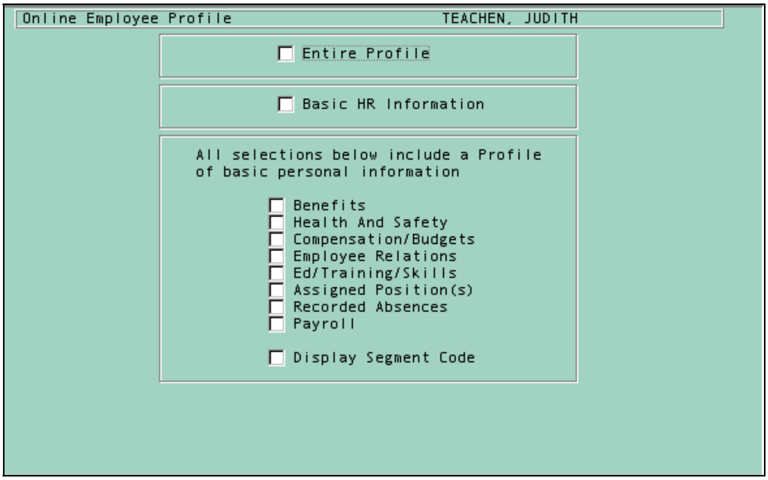
For detailed directions on verifying flex enrollment credit details.

Employee profile

You can display a specific employee's master record on the Employee Database (Master File Employee Database) online by using the Online Employee Profile form (PROFIL). You can display the entire record, basic Human Resources information, or specific information such as payroll or benefits. With the Online Employee Profile form (PROFIL), you decide what information to display from the Employee Database.

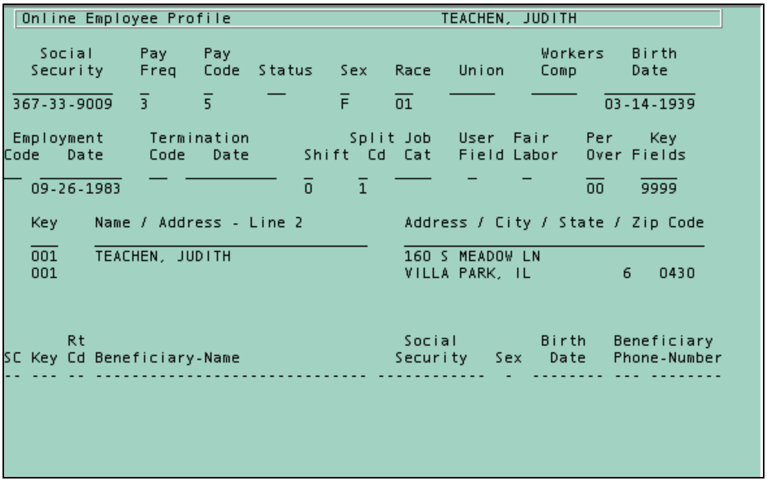
In this case, you will use the Online Employee Profile form (PROFIL) to display benefits information. Included is information on all benefits plans for an employee.

Following is an example of the Online Employee Profile form (PROFIL) with Benefits selected for employee 3009, Judith Teachen:



Once you have selected the information you want displayed and clicked Save or pressed Enter, you may page through the employee's Employee Database record and display all occurrences of the segments on the file that you selected.

The following example shows the first panel of the Online Employee Profile form (PROFIL) when Benefits is selected for employee 3009, Judith Teachen:



```
Online Employee Profile                          TEACHEN, JUDITH

  Social     Pay    Pay                                  Workers   Birth
 Security    Freq   Code  Status   Sex   Race   Union    Comp      Date

367-33-9009  3      5              F     01                       03-14-1939

-- --- -- ----------------------------- ------------  -   -------- --- --------
```

See also:

- Viewing an employee profile ***(on page 506)***

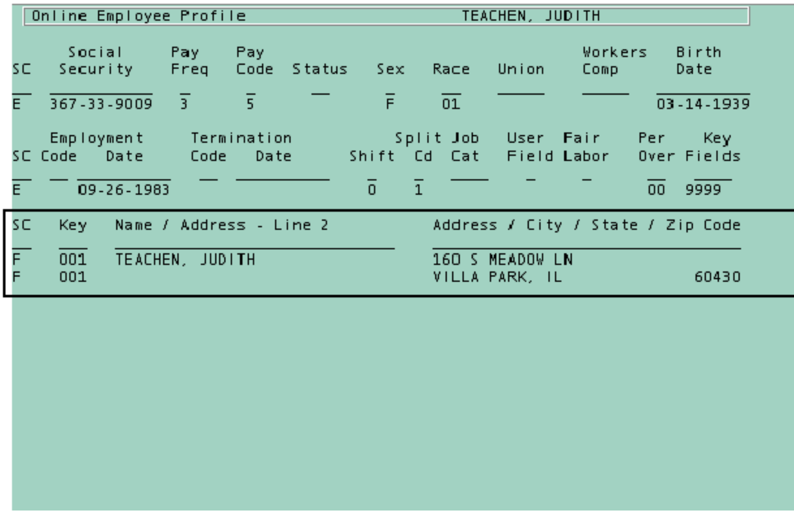
For detailed directions on viewing an employee profile.

Interpreting the employee profile

Basic personal information displays for all selections on the Online Employee Profile form (PROFIL). When Benefits is selected, then the beneficiary, dependent coverage, and benefits information displays. Tax and deduction information displays when Payroll is selected. Information is displayed in ascending segment code order.

Information is displayed in sections. Each section starts with one or more rows of column headers. A line separates the column headers from the rows of data. When the Display Segment Code check box is selected, information in each section starts with the segment code on the far left of the form.

The area outlined on the following Online Employee Profile form (PROFIL) shows the name and address section (segment F information) for employee 3009, Judith Teachen.



Online Employee Profile TEACHEN, JUDITH

SC	Social Security	Pay Freq	Pay Code	Status	Sex	Race	Union	Workers Comp	Birth Date
E	367-33-9009	3	5		F	01			03-14-1939

SC	Employment Code	Employment Date	Termination Code	Termination Date	Shift	Split Cd	Job Cat	User Field	Fair Labor	Per Over	Key Fields
E		09-26-1983			0	1				00	9999

SC	Key	Name / Address - Line 2	Address / City / State / Zip Code
F	001	TEACHEN, JUDITH	160 S MEADOW LN
F	001		VILLA PARK, IL 60430

☞ *Refer to* **Technical Considerations** *(on page 927)* *for a segment listing to translate the segment code into the form information that it represents.*

Apply the Concept

Describe when you will use the Online Employee Profile form (PROFIL) and which options you will select.

Benefits counseling reports

The following chart lists useful reports for counseling employees on their current benefits:

Report	Use the report to:
Welfare Benefits Register (4A-RPT)	Track active employees or those on leave participating in at least one welfare benefits plan.
Plan Participation Register (4B-RPT)	Track employees who participate in at least one welfare or deferred benefits plan.
Plan Beneficiary Listing (4C-RPT)	List beneficiary data for a specified benefits plan.
Dependent Listing for Plan ID:xxx (4D-RPT)	List all covered dependents for each employee participating in a specified benefits plan.
Enrollable Employees by Employee (4F-RPT)	List benefit plans for which an employee is eligible but not participating in.
Changed Beneficiary/Contingent Annuitant (8P-RPT)	List employees who have changed their beneficiary or contingent annuitant designations.

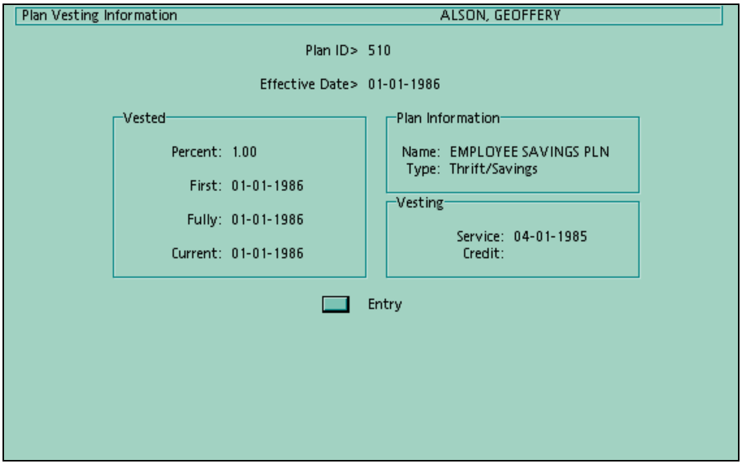
☞ *Refer to the* **Report Quick Reference** *(on page 615) for samples of these reports and the parameters used to define them.*

Vesting

When you need to look up or enter vesting information for an employee, use the Plan Vesting Information form (63-SCR). This form displays the last vesting information calculated or entered for a plan.

The Plan Vesting Information form (63-SCR) is automatically created by the Calculation of Vesting Percentage Earned report (41-RPT), based on the vesting schedule from the Benefits Participation Rules Table form (TN-SCR).

The following form shows vesting information for employee 3003, Geoffery Alson, for plan 510:



The Plan Vesting Information form (63-SCR) is first displayed in Inquiry mode. To manually enter vesting information, you would select the Entry button. You can also enter data from an outside source, such as an actuary or consultant, in batch entry format.

Note: *Vesting information only exists for employees who are at least partially vested.*

See also:

- Viewing vesting information ***(on page 510)***
For detailed directions on viewing vesting information.

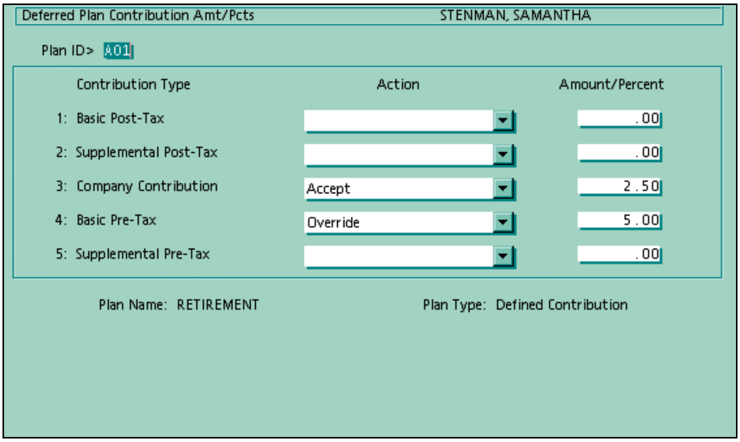
- Entering vesting information ***(on page 511)***
For detailed directions on entering vesting information.

Contribution amount and percentage elections

When you enroll an employee in a deferred plan, you will most likely record contribution amounts or percentages. To view a summary of an employee's elected deferred plan contribution amounts or percentages, use the Deferred Plan Contribution Amt/Pcts form (64CSCR). This form is created by the DB Plan Contributions form (68-SCR), DC Plan Contributions form (72-SCR), and the T/S Plan Contributions/Fund Allocation form (79-SCR) when the contribution amounts for a plan in which the employee is enrolled are calculated.

The Deferred Plan Contribution Amt/Pcts form (64CSCR) contains the contribution actions and amounts for the five contribution types for each deferred benefits plan. This is not a dated form. There is only one form per plan.

The following form shows deferred contribution percentages for employee 3017, Samantha Stenman, for plan A01:



Note: *Elected amounts and percentages should not be changed on the Deferred Plan Contribution Amt/Pcts form (64CSCR). This form is used during the recalculation process, and changes made to the displayed amounts or percentages could cause problems with the employee's contribution amounts and the recalculation process. It is intended for viewing purposes only.*

See also:

- Viewing deferred plan contribution amounts and percentages ***(on page 513)***

For detailed directions on viewing deferred plan contribution amounts and percentages.

Contributions and interest accumulations

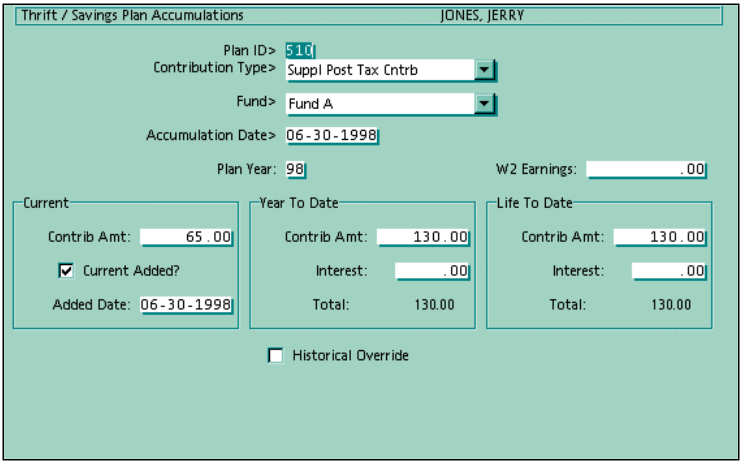
You can view an employee's contributions and interest for a deferred plan by contribution type if you run the Update Benefit Plan Balance Information program (BAXACT) or manually load the accumulation forms. Which form you use to view an employee's contributions and totals depends on the type of deferred plan in which the employee is enrolled: defined benefit, defined contribution, or thrift/savings plan.

The following chart summarizes which form you would use to view employee contributions based on the type of deferred plan:

To view employee contributions for a:	Use this form:
Defined Benefits plan	Defined Benefit Plan Accumulations form (70-SCR)
Defined Contribution plan	Defined Contribution Plan Accumulations form (75-SCR)
Thrift/Savings plan	Thrift/Savings Plan Accumulations form (82-SCR)

The forms listed above are similar in appearance and function. Each form displays current contributions, year-to-date contributions for the plan year, and life-to-date contributions since enrollment. These contribution totals can be used to complete an employee's tax documents.

The following form shows supplemental post tax thrift/savings contributions for employee 1111, Jerry Jones, for Fund A of plan 510:



The contribution totals can be used to complete an employee's tax documents.

The Current Added? check box identifies whether the current contribution displayed has been added to the plan account balance. This indicator is important when preparing plan account balances or applying interest calculations to the contribution amounts.

Although you can manually enter contribution information, the current, year-to-date, and life-to-date accumulators are typically updated by the Update Benefit Plan Balance Information and Update Account Balances programs with each pay period's contributions and/or adjustments from the payroll history records. A new segment is created whenever the history record payment date changes. The year-to-date and life-to-date amounts are brought forward and updated with the current amount to the new segment. When the payment date is later than the Plan Year End as calculated from the Benefit Plan Rules table (TK-SCR) Year End date, a new segment is created with the life-to-date amounts brought forward.

☞ *Refer to* **Benefits/Payroll Interaction** *(on page 535) for more information on updating benefits accumulators.*

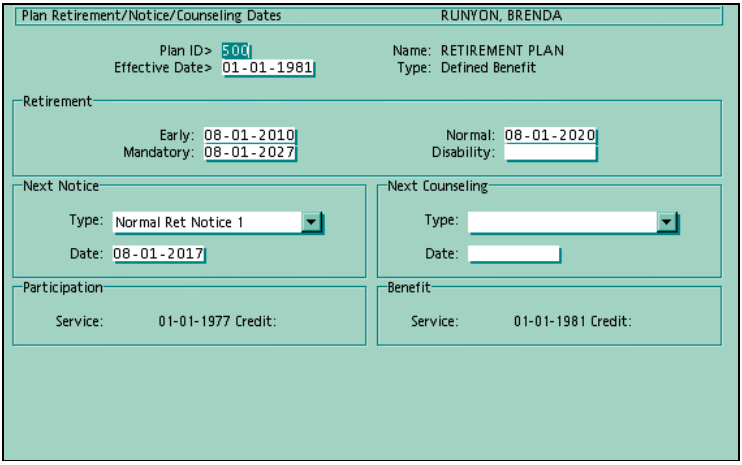
Retirement eligibility, notifications, and counseling dates

Each deferred retirement plan has rules that define when a participant may be eligible for early, normal, mandatory, and disability retirement. These rules are recorded on the Benefits Retirement Dates Rules Table form (TJ-SCR). The rules are used to calculate retirement eligibility and notification dates. Notification dates specify the company policy for notifying employees prior to their eligibility for the various retirement options.

When you enroll an employee in a deferred retirement plan, retirement eligibility and notification dates are calculated and automatically recorded on the Plan Retirement/Notice/Counseling Dates form (65-SCR). You can display an employee's early, normal, and mandatory retirement dates on this form.

The following form shows the eligibility and notification dates created for employee 3010, Brenda Runyon:



See also:

- Displaying retirement eligibility dates ***(on page 519)***

For detailed directions on displaying retirement eligibility dates.

You also use the Plan Retirement/Notice/Counseling Dates form (65-SCR) to record retirement counseling dates. Counseling dates are recorded manually by selecting the next counseling type from the Next Retire Counsel option list (BA01) and entering the next counseling date.

See also:

- Setting up retirement counseling dates ***(on page 522)***

For detailed directions on setting up retirement counseling dates.

Updating retirement notification information

The retirement Next Notice Type and Date are initially generated by the system, based on rules on the Benefits Retirement Dates Rules Table form (TJ-SCR) when the employee is enrolled in the retirement plan. You can update this information by running the Retirement Notifications Due This Period report (8L-RPT). This report lists employees who have a retirement notification due in the period specified in the report parameters and updates the Next Notice Type and Next Notice Date to the next chronological Type and Date.

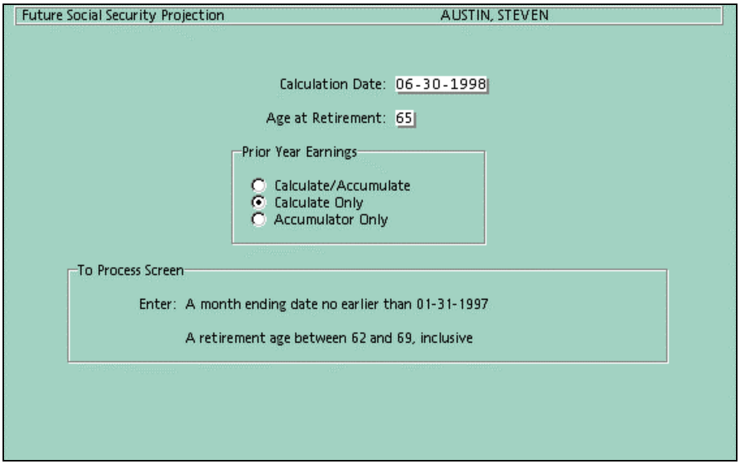
See also:

- Generating retirement notification reports ***(on page 520)***

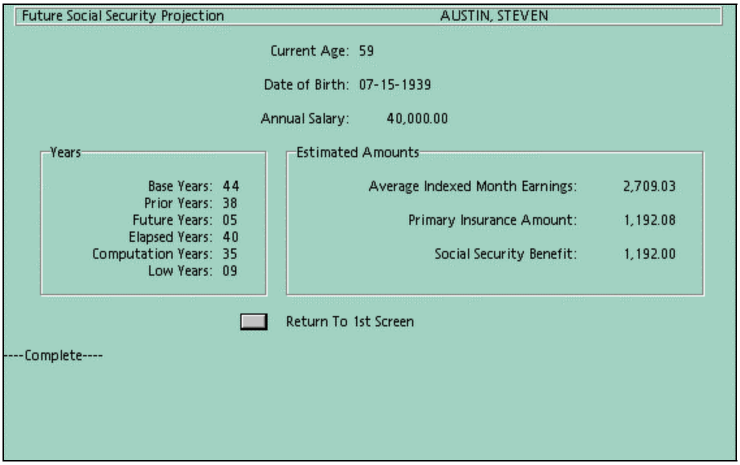
For detailed directions on generating retirement notification reports.

Counseling employees on future Social Security benefits

When counseling employees on retirement, information on the Future Social Security Projection form (91-SCR) can be used to provide estimated monthly Social Security benefits.



First enter a month-end date in the Calculation Date text box and a projected Age at Retirement value. Then select a Prior Year Earnings option and click Save or press Enter. The second panel of the Future Social Security Projection form (91-SCR) is displayed.



Projected estimates are made for early, normal, and late retirement amounts for the primary individual receiving the benefit. Dependents, disabilities, death, and so on are not taken into account when projecting the benefit.

A benefit projection can be made for any employee with a status of Active, Disabled, LOA with PAY, or LOA without Pay, and who has an annual salary entered on the Salary Assignment/Changes form (40-SCR). The employee for whom the projection is being made must be 21 years of age or older, and must have earned the forty credits required to be qualified for full Social Security benefits at retirement.

When counseling employees, keep in mind that the projections provided on this form are estimates only, and that actual monthly Social Security benefits may differ greatly. Employee yearly earnings, date of retirement, and other data elements that are estimates rather than real amounts or values can all have an impact on Social Security projections.

The National Average Wage Index figure and OASDI maximum compensation amount used for the calculation are stored on the Social Security Table Process form (SS1SCR). This form is maintained by Cyborg Systems, Inc. and reflects each year's figures.

See also:

- Generating future Social Security Benefit projections ***(on page 528)***

For detailed directions on generating future Social Security Benefit projections.

Retirement elections and payments

To view, record, or change information regarding an employee's election to receive pension payments, you may use the Plan Retirement Elections/Payments form (66-SCR). If the employee is already collecting a pension, any changes to the monthly pension amount can be made on this form.

The following example shows plan retirement payment options elected by employee 3005, Steven Swalter:

Death of a retiree receiving payments

Information on the Plan Retirement Elections/Payments form (66-SCR) is about the retiree. If the retiree dies, a new form should be entered with information about beneficiaries. The system recognizes the beneficiaries from entries on the Beneficiary/Plan Cross Reference form (59BSCR) for the plan. If there is more than one beneficiary, each will receive part of the amount entered in the Monthly Pension text box on the Plan Retirement Elections/Payments form (66-SCR). The amount for each is calculated by multiplying the amount in the Monthly Pension text box by the percentage recorded on the Beneficiary/Plan Cross Reference form (59BSCR).

Death of a beneficiary receiving payments

If a beneficiary receiving payments dies, a new Plan Retirement Elections/Payments form (66-SCR) should be recorded. Use an Effective Date equal to the date the beneficiary died, an Option indicating which of the beneficiaries died (1st, 2nd, and so forth) in relation to the order on the Beneficiary/Plan Cross Reference form (59BSCR), and a Stop Payment Date and Date of Death applicable to the beneficiary's portion of the payment.

If payment is to continue to other beneficiaries, record the following:

- A Plan Retirement Elections/Payments form (66-SCR) with the appropriate Option and data that apply to the remaining benefit
- A new Beneficiary/Plan Cross Reference form (59BSCR) with the same Allocation Date

Record each Beneficiary ID in the order it appeared on the previous Beneficiary/Plan Cross Reference form (59BSCR), but change the Percent text box to zeroes for the beneficiary who is no longer collecting a portion of the benefit, and adjust the Percent text box for all others to equal a total of 100 percent.

Retirement counseling reports

The Benefits Administration Solution provides many reports that can help you counsel employees on their retirement. Some reports will help you update retirement information before and during retirement. Other reports will help you track employees as they enter, change, and leave the plans.

Following is some of the information that can be updated by running a report:

- Participation, vesting, and benefit service credit dates
- Actuarial valuation
- Retirement notification

Participation, vesting, and benefit service credit dates

Two reports work together to recalculate participation, vesting, and benefit service credit dates. The Calculation of Credited Service Granted report (40-RPT) recalculates participation, vesting, and benefits credit dates for a specified plan. The Calculation of Vesting Percentage Earned report (41-RPT) recalculates vesting percentages.

☞ *Refer to* **Maintaining Employee Benefits Information** *(on page 411) for more information on using the Calculation of Credited Service Granted (40-RPT) and Calculation of Vesting Percentage Earned (41-RPT) reports.*

Actuarial valuation

The Actuarial Interface Output Tape report (4L-RPT) provides the basis for creating a tape to be sent to your actuary for your actuarial valuation. It is intended that you will modify this to meet your specific needs.

The tape consists of eighty-character transactions containing basic employee data such as company location (CTRL-THREE through CTRL-SIX), birth date, hire date, salary, and taxable earnings. In addition, certain Plan data is provided including participation, vesting, and benefit service dates, and considered earnings (hours worked or paid) from the Plan's CE/H Accumulator. Space is provided for up to two sets of service interruption data for the year.

The Actuarial Interface Output Tape report (4L-RPT)includes information on anyone who is currently participating in the plan requested and all employees who were participating at the end of the prior period but are currently in a non-participating status.

Retirement notification

The Retirement Notifications Due This Period report (8L-RPT) provides a listing of employees who have a retirement notification date on file that falls within a specified range of dates. The report is sorted by notification type to provide a listing of all employees who should be notified of potential retirement, grouped together by category (for example, Early, Normal).

The report lists, by plan, all employees scheduled to receive a notification of retirement from the plan within a specified range of dates. The report lists the notification type, notice date, retirement date, and spouse data.

The information on the Benefits Retirement Dates Rules Table form (TJ-SCR) is used to calculate specific retirement dates and notice dates for employees when they enroll in a plan. These dates are automatically displayed on the Plan Retirement/Notice/Counseling Dates form (65-SCR). This information is also used to generate data for certain retirement tracking reports, such as the Retirement Notifications Due This Period report (8L-RPT) and the Retirements This Period report (8N-RPT).

Note: *Recording your retirement policies is an optional activity.*

Reports for counseling employees on their retirement

The following chart lists useful reports for counseling employees on their retirement.

Report	Use the report to:
Current Pensioners (4H-RPT)	List vested terminated employees currently collecting a vested benefit, beneficiaries or contingent annuitants currently receiving the benefit of a deceased retiree or employee, as well as actual retirees.
Deferred Vested Terminated Employees (4K-RPT)	List vested terminated employees and retirees who are entitled to a benefit from a plan but have deferred payment of the benefit until after a specified date.
Actuarial Interface Output Tape (4L-RPT)	Create a tape to be sent to your actuary for your actuarial valuation. It is intended that you will modify this to meet your specific needs. This report includes information on anyone who is currently participating in the plan requested and all employees who were participating at the end of the prior period but are currently in a non-participating status.
Calculation of Credited Service Granted (40-RPT)	Calculate and list the credited participation, benefit, and vesting service for a deferred plan.
Calculation of Vesting Percentage Earned (41-RPT)	Calculate and list the vested percentage of plan participants.
Vested Employees by Percent Vested 42-RPT)	List vested employees by the percent they are vested.
Retiree Payment Stop Date Passed (48-RPT)	List all retirees who have reached their stop payment date on the indicated benefit. It also lists all retirees and beneficiaries whose payment has stopped due to death.
Retiree Deceased (49-RPT)	List all retirees who have died during a specified period. It also lists any beneficiaries who have died but are still receiving payments during the period.
Retirement Notifications Due This Period (8L-RPT)	List employees who have a retirement notification date on file that falls within a specified date range.

Report	Use the report to:
Retirements This Period (8N-RPT)	List employees who have a retirement activity recorded with an effective date within a specified range of dates.
Changed Retirement Election Data (8Q-RPT)	List employees who have made or changed a retirement election within a specified range of dates.
Next Retirement Counseling Date This Period (8T-RPT)	List employees who should be contacted about attending a pre-retirement counseling session within a specified range of dates.
Withdrawal Suspension End Date Passed (8U-RPT)	List employees who have plan suspension dates that have passed a specified date. Use it to inform employees that they can resume making contributions to the plan from which they had contributions suspended.

☞ *Refer to the* **Report Quick Reference** *(on page 615) for samples of these reports and the parameters used to define these reports.*

Apply the Concept

List the forms and reports you expect to use most often when counseling your employees on their retirement and describe how you will use them.

Detailed Directions

This section provides detailed directions on completing a business task.

Tasks

Verifying welfare benefits

To verify employee welfare benefits using the Employee Welfare Plan Summary form (55ISCR), complete the following steps:

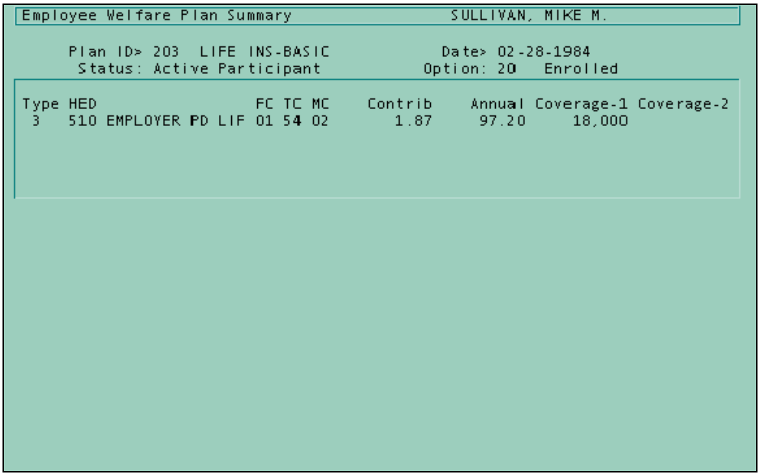
1. Access the Employee Welfare Plan Summary form (55ISCR)

Access this form by making the following selections from the Navigator:

Component: Health/Welfare Plan Enrollment/Maintenance
Process: Eligibility and Enrollment
Task: View Current Welfare Plans

For practice, access the Employee Welfare Plan Summary form (55ISCR) for Organization 999999 employee 3014, Mike Sullivan.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



Employee Welfare Plan Summary SULLIVAN, MIKE M.

Plan ID> 203 LIFE INS-BASIC Date> 02-28-1984
Status: Active Participant Option: 20 Enrolled

Type	HED	FC	TC	MC	Contrib	Annual	Coverage-1	Coverage-2
3	510 EMPLOYER PD LIF	01	54	02	1.87	97.20	18,000	

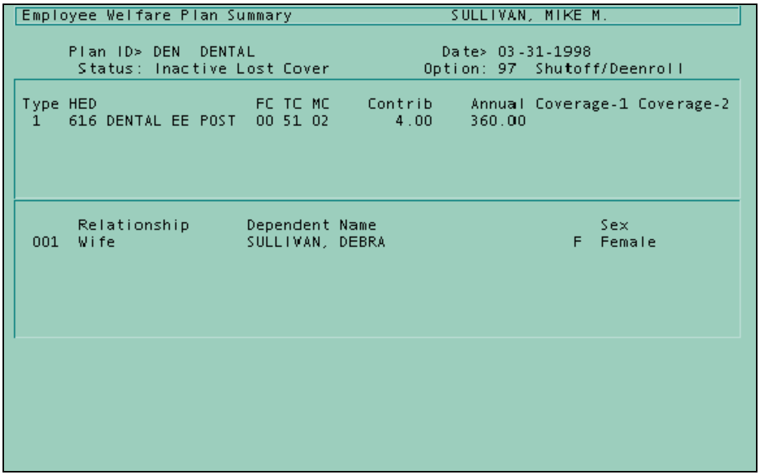
Note: *The Employee Welfare Plan Summary form (55ISCR) displays one form per plan entry. If the message '----Complete----' is not displayed in the lower portion of the form, go to Step 2 to display the next welfare plan entry.*

2. Click Save or press Enter

If there are more plans for the employee, click Save or press Enter to display the next summary plan entry. Repeat this step until the message '----Complete----' displays in the lower portion of the form.

For practice, click Save or press Enter until the message '----Complete----' displays in the lower portion of the form.

If you completed the Guided Practice, the resulting forms should look similar to the examples that follow:

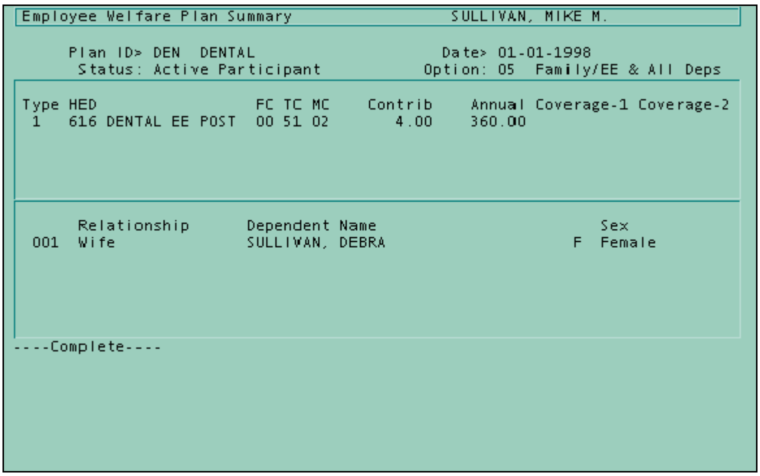


Employee Welfare Plan Summary SULLIVAN, MIKE M.

Plan ID> DEN DENTAL Date> 03-31-1998
Status: Inactive Lost Cover Option: 97 Shutoff/Deenroll

Type	HED	FC TC MC	Contrib	Annual	Coverage-1	Coverage-2
1	616 DENTAL EE POST	00 51 02	4.00	360.00		

	Relationship	Dependent Name		Sex
001	Wife	SULLIVAN, DEBRA	F	Female



Employee Welfare Plan Summary SULLIVAN, MIKE M.

Plan ID> DEN DENTAL Date> 01-01-1998
Status: Active Participant Option: 05 Family/EE & All Deps

Type	HED	FC TC MC	Contrib	Annual	Coverage-1	Coverage-2
1	616 DENTAL EE POST	00 51 02	4.00	360.00		

	Relationship	Dependent Name		Sex
001	Wife	SULLIVAN, DEBRA	F	Female

----Complete----

For more information on the information displayed on the Employee Welfare Plan Summary form (55ISCR).

Viewing flex enrollment options and costs

To view an employee's flex enrollment options and costs using the Flex Benefit Enrollments/Changes form (55FSCR), complete the following steps:

1. Access the Flex Benefit Enrollments/Changes form (55FSCR)

Access this form by making the following selections from the Navigator:

Component: Flex Plans Enrollment/Processing
Process: Flex Enrollment
Task: Flex Benefit Plan Enrollment

For practice, access the Flex Benefit Enrollments/Changes form (55FSCR) for Organization 999999 employee 2001, Brenda Reynolds.

2. Enter the Master Plan ID

Type the three-character Flex Master Plan identifier.

For practice, type '700'.

3. Enter the Effective Date

Enter the effective date of the Flex Master Plan in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For practice, type '06-01-1998'(US and Canada) '01-06-1998'(elsewhere). Brenda Reynolds enrolled midyear.

4. Select the Enroll/Change Type

Indicate the type of action to be performed. Options for this list are provided by option list BA64.

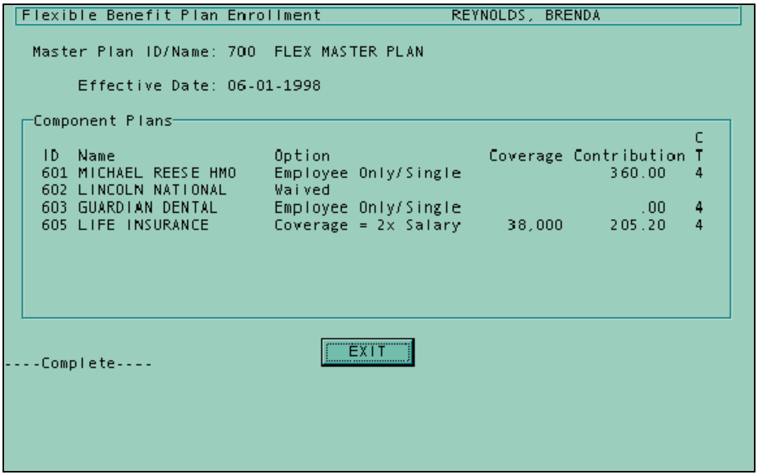
For practice, select 'Display Enrollment'.

5. Click Save or press Enter

The returned forms display the component plans for which the employee is eligible and the option choices and costs for each plan.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



Flexible Benefit Plan Enrollment REYNOLDS, BRENDA

Master Plan ID/Name: 700 FLEX MASTER PLAN

Effective Date: 06-01-1998

Component Plans

ID	Name	Option	Coverage	Contribution	C T
601	MICHAEL REESE HMO	Employee Only/Single		360.00	4
602	LINCOLN NATIONAL	Waived			
603	GUARDIAN DENTAL	Employee Only/Single		.00	4
605	LIFE INSURANCE	Coverage = 2x Salary	38,000	205.20	4

EXIT

----Complete----

Viewing flex enrollment credit details

To view an employee's flex enrollment credit details using the Flexible Benefit Annual Plan Credits form (55CSCR), complete the following step:

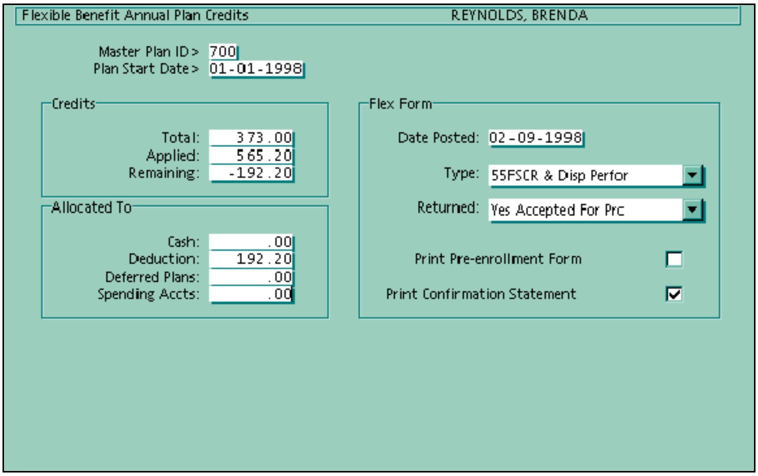
Access the Flexible Benefit Annual Plan Credits form (55CSCR)

Access this form by making the following selections from the Navigator:

Component: Flex Plans Enrollment/Processing
Process: Flex Enrollment
Task: Flex Credits

For practice, access the Flexible Benefit Annual Plan Credits form (55CSCR) for Organization 999999 employee 2001, Brenda Reynolds.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



Flexible Benefit Annual Plan Credits REYNOLDS, BRENDA

Master Plan ID> 700
Plan Start Date> 01-01-1998

Credits
Total: 373.00
Applied: 565.20
Remaining: -192.20

Allocated To
Cash: .00
Deduction: 192.20
Deferred Plans: .00
Spending Accts: .00

Viewing an employee profile

To view an employee profile online using the Online Employee Profile form (PROFIL), complete the following steps:

1. Access the Online Employee Profile form (PROFIL)

Access this form by making the following selections from the Navigator:

Component: Employee Resourcing
Process: Maintain Basic Employee Details
Task: View Employee Profile

For practice, access the Online Employee Profile form (PROFIL) for Organization 999999 employee 3014, Mike Sullivan.

2. Select display options

Select one or more check boxes to indicate the type of profile information to be displayed for the employee.

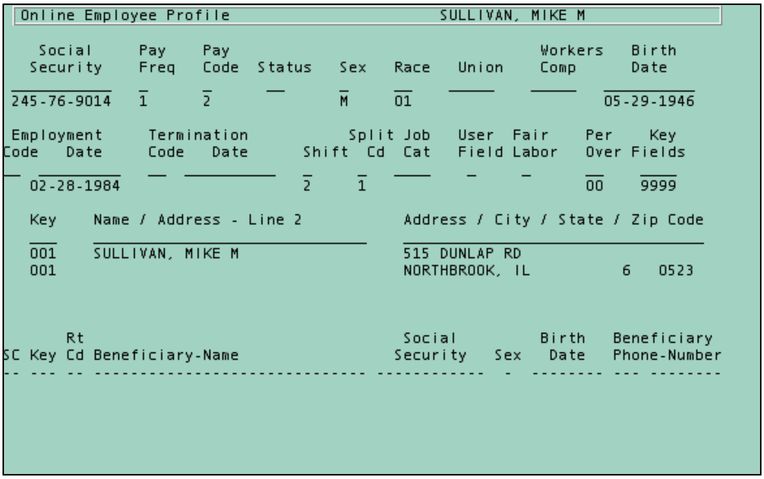
For practice, select 'Benefits'.

3. Click Save or press Enter

Click Save or press Enter to display segment occurrences according to your selection.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



```
Online Employee Profile                       SULLIVAN, MIKE M

Viewing vesting information

To view an employee's plan vesting information using the Plan Vesting Information form (63-SCR), complete the following step:

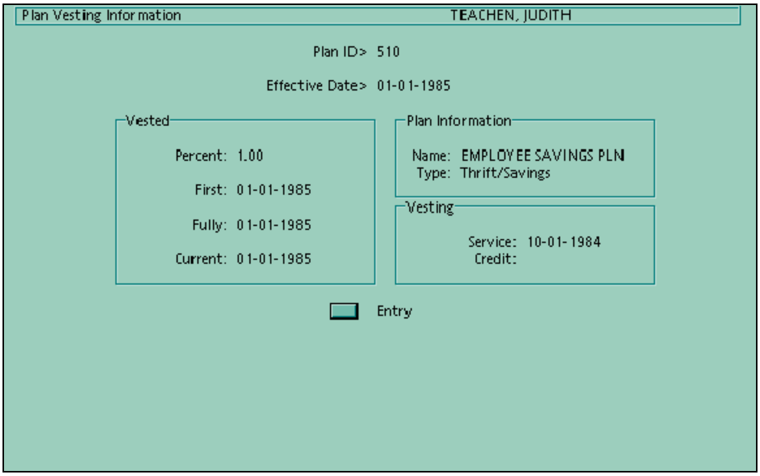
Access the Plan Vesting Information form (63-SCR)

Access this form by making the following selections from the Navigator:

Component: Deferred Plans Enrollment/Maintenance
Process: Service, Vesting and Retirement Info
Task: Vesting Information

For practice, access the Plan Vesting Information form (63-SCR) for Organization 999999 employee 3009, Judith Teachen.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



See also:

- Vesting ***(on page 489)***

For more information on displaying employee vesting information.

Entering vesting information

To enter an employee's plan vesting information using the Plan Vesting Information form (63-SCR), complete the following steps:

1. Access the Plan Vesting Information form (63-SCR)

Access this form by making the following selections from the Navigator:

Component: Deferred Plans Enrollment/Maintenance
Process: Service, Vesting and Retirement Info
Task: Vesting Information

For practice, first enroll employee 3006, Michael Warren, in plan A01 using the Deferred Plan Enrollments/Changes form (64-SCR). Use an Effective Date of '01-01-1998' and an Option of 'Participant'. Then access the Plan Vesting Information form (63-SCR) for

Organization 999999 employee 3006, Michael Warren. You will enter vesting information for Michael Warren for plan A01.

2. Click the Entry button

The Plan Vesting Information form first displays in Display mode. To enter vesting information, you must select the Entry button.

For practice, click the Entry button.

3. Enter the Plan ID

Enter the three-character plan identifier.

For practice, type 'A01'.

4. Enter the Effective Date

Enter the effective date of the pension information in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For practice, type '01-20-1999'(US and Canada) or'20-01-1999'(elsewhere).

Complete Vested information

5. Enter Percent

Enter the percent that the employee is vested for company contributions. This is a two-decimal text box. For example, 20 percent would be entered as '0.20'. A value of zero is not a valid entry. The value entered must be greater than 0 but not greater than 100.

For practice, type '0.20'.

6. Enter First

Enter the first date on which calculations determine that the vesting percentage is greater than zero. Enter the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

Note: *There is no need to update this text box after you enter it for the first time.*

For practice, type '01-20-1999' (US and Canada) or '02-01-1999'(elsewhere).

7. Enter Fully

Enter the date on which calculations determine the employee is 100 percent vested. Enter the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

Note: *There is no need to update this text box after you enter it for the first time.*

For practice, leave this text box blank.

8. Enter Current

Enter the date on which the current vesting percentage was calculated. Enter the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

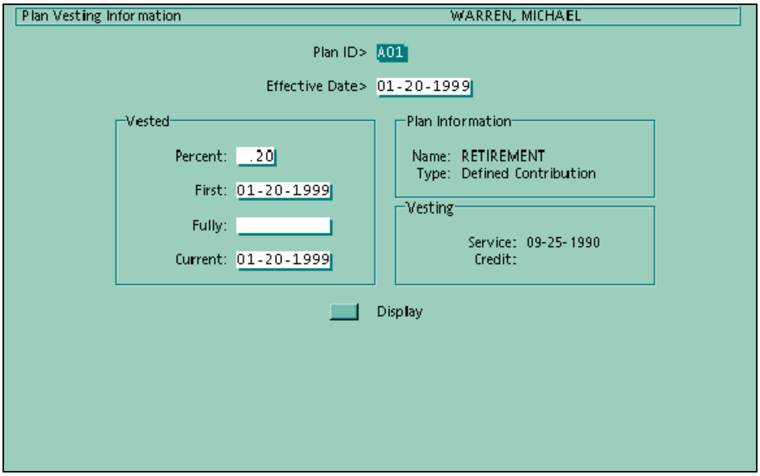
For practice, type '01-20-1999'(Us and Canada) or '02-01-1999' (elsewhere).

9. Click Save or press Enter

The plan vesting information is recorded.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



See also:

- Vesting ***(on page 489)***

For more information on entering employee vesting information.

Viewing deferred plan contribution amounts and percentages

To view an employee's elected contribution amounts and percentages using the Deferred Plan Contribution Amt/Pcts form (64CSCR), complete the following step:

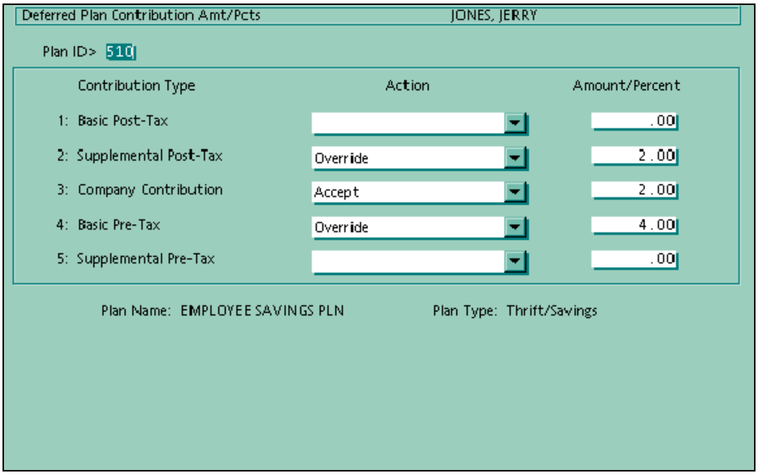
Access the Deferred Plan Contribution Amt/Pcts form (64CSCR)

Access this form by making the following selections from the Navigator:

Component:	Deferred Plans Enrollment/Maintenance
Process:	Defined Benefit Plan Account Info
Task:	Contribution Summary

For practice, access the Deferred Plan Contribution Amt/Pcts form (64CSCR) for Organization 999999 employee 1111, Jerry Jones. You will display the contribution percentages that you entered for Jerry Jones in plan 510.

If you completed the Guided Practice, the resulting form should look similar to the example that follows.



Deferred Plan Contribution Amt/Pcts JONES, JERRY

Plan ID> 510

Contribution Type	Action	Amount/Percent
1: Basic Post-Tax		.00
2: Supplemental Post-Tax	Override	2.00
3: Company Contribution	Accept	2.00
4: Basic Pre-Tax	Override	4.00
5: Supplemental Pre-Tax		.00

Plan Name: EMPLOYEE SAVINGS PLN Plan Type: Thrift/Savings

Viewing defined benefit plan contributions

To view current, year-to-date, and life-to-date defined benefit plan contributions using the Defined Benefit Plan Accumulations form (70-SCR), complete the following step:

Access the Defined Benefit Plan Accumulations form (70-SCR)

Access this form by making the following selections from the Navigator:

Component: Deferred Plans Enrollment/Maintenance
Process: Defined Benefit Plan Account Info
Task: YTD/LTD Contribution Records

See also:

- Contributions and interest accumulations ***(on page 491)***

For more information on viewing plan contributions and accumulations.

Entering defined benefit plan contributions

To enter current, year-to-date, and life-to-date defined benefit plan contributions using the Defined Benefit Plan Accumulations form (70-SCR), complete the following steps:

1. Access the Defined Benefit Plan Accumulations form (70-SCR)

Access this form by making the following selections from the Navigator:

Component:	Deferred Plans Enrollment/Maintenance
Process:	Defined Benefit Plan Account Info
Task:	YTD/LTD Contribution Records

2. Enter the Plan ID

Enter the three-character plan identifier.

3. Select the Contribution Type

Select the type of contribution from the Contrib Type Accum option list (BA19).

4. Enter the Accumulation Date

Enter the date the contribution is effective in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

5. Enter the Plan Year

Enter the year to which the contributions apply in the format YY.

6. Enter W2 Earnings

Enter taxable earnings that apply to the defined benefits plan year for the purpose of nondiscrimination testing. This text box has two decimals. The number 123.45, for example, would be entered as '123.45' or '12345'.

Complete Current

7. Enter the Contrib Amt

Enter the current contribution amount from payroll for the contribution type and plan identified. This text box has two decimals.

8. Select Current Added?

Select Current Added? if the current contribution amount has been added to the defined benefit plan balance.

9. Enter the Added Date

Enter the date the current contribution amount was added to the plan balance. Enter the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

Complete Year To Date

10. Enter the Contrib Amt

Enter the current year's contributions for the contribution type and plan identified. This text box has two decimals.

11. Enter the Interest

Enter the current year's interest accrued for the contribution type and plan identified. This text box has two decimals.

Complete Life To Date

12. Enter the Contrib Amt

Enter the total life-to-date contributions for the contribution type and plan identified through the end of the previous year. This text box has two decimals.

13. Enter the Interest

Enter the life-to-date interest accrued for the contribution type and plan identified through the end of the previous year. This text box has two decimals.

14. Select Historical Override

If the totals you are entering correct previous entries, select Historical Override.

15. Click Save or press Enter

The contribution is recorded.

See also:

- Contributions and interest accumulations ***(on page 491)***

For more information on entering plan contributions and accumulations.

Viewing defined contribution plan contributions

To view current, year-to-date, and life-to-date defined contribution plan information using the Defined Contribution Plan Accumulations form (75-SCR), complete the following step:

Access the Defined Contribution Plan Accumulations form (75-SCR)

Access this form by making the following selections from the Navigator:

Component:	Deferred Plans Enrollment/Maintenance
Process:	Defined Contribution Plan Account Info
Task:	YTD/LTD Contribution Records

See also:

- Contributions and interest accumulations ***(on page 491)***

For more information on viewing plan contributions and accumulations.

Entering defined contribution plan contributions

To enter current, year-to-date, and life-to-date defined contribution plan information using the Defined Contribution Plan Accumulations form (75-SCR), complete the following steps:

1. Access the Defined Contribution Plan Accumulations form (75-SCR)

Access this form by making the following selections from the Navigator:

Component:	Deferred Plans Enrollment/Maintenance
Process:	Defined Contribution Plan Account Info
Task:	YTD/LTD Contribution Records

2. Enter the Plan ID

Enter the three-character plan identifier.

3. Select the Contribution Type

Select the type of contribution from the Contrib Type Accum option list (BA19).

4. Enter the Accumulation Date

Enter the date the contribution is effective in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

5. Enter the Plan Year

Enter the year to which the contributions apply in the format YY.

6. Enter W2 Earnings

Enter taxable earnings that apply to the defined benefits plan year for the purpose of nondiscrimination testing. This text box has two decimals. The number 123.45, for example, would be entered as '123.45' or '12345'.

Complete Current

7. Enter the Contrib Amt

Enter the current contribution amount from payroll for the contribution type and plan identified. This text box has two decimals.

8. Select Current Added?

Select Current Added? if the current contribution amount has been added to the defined benefit plan balance.

9. Enter the Added Date

Enter the date the current contribution amount was added to the plan balance. Enter the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

Complete Year To Date

10. Enter the Contrib Amt

Enter the current year's contributions for the contribution type and plan identified. This text box has two decimals.

11. Enter the Interest

Enter the current year's interest accrued for the contribution type and plan identified. This text box has two decimals.

Complete Life To Date

12. Enter the Contrib Amt

Enter the total life-to-date contributions for the contribution type and plan identified through the end of the previous year. This text box has two decimals.

13. Enter the Interest

Enter the life-to-date interest accrued for the contribution type and plan identified through the end of the previous year. This text box has two decimals.

14. Select Historical Override

If the totals you are entering correct previous entries, select Historical Override.

15. **Click Save or press Enter**

The contribution is recorded.

See also:

- Contributions and interest accumulations ***(on page 491)***

Viewing thrift/savings plan contributions

To view current, year-to-date, and life-to-date thrift/savings plan contributions using the Thrift/Savings Plan Accumulations form (82-SCR), complete the following step:

Access the Thrift/Savings Plan Accumulations form (82-SCR)

Access this form by making the following selections from the Navigator:

Component: Deferred Plans Enrollment/Maintenance
Process: Thrift/Savings Plan Account Info
Task: YTD/LTD Contribution Records

See also:

- Contributions and interest accumulations ***(on page 491)***

For more information on viewing plan contributions and accumulations.

Entering thrift/savings plan contributions

To enter current, year-to-date, and life-to-date thrift/savings plan contributions using the Thrift/Savings Plan Accumulations form (82-SCR), complete the following steps:

1. **Access the Thrift/Savings Plan Accumulations form (82-SCR)**

Access this form by making the following selections from the Navigator:

Component: Deferred Plans Enrollment/Maintenance
Process: Thrift/Savings Plan Account Info
Task: YTD/LTD Contribution Records

2. **Enter the Plan ID**

Enter the three-character plan identifier.

3. **Select the Contribution Type**

Select the type of contribution from the Contrib Type Accum option list (BA19).

4. **Select the Fund**

Select the fund to which the contribution is invested from the Thrift/Savings Funds option list (BA27).

5. **Enter the Accumulation Date**

Enter the date the contribution is effective in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

6. **Enter the Plan Year**

Enter the year to which the contributions apply in the format YY.

7. Enter W2 Earnings

Enter taxable earnings that apply to the defined benefits plan year for the purpose of nondiscrimination testing. This text box has two decimals. The number 123.45, for example, would be entered as '123.45' or '12345'.

Complete Current

8. Enter the Contrib Amt

Enter the current contribution amount from payroll for the contribution type and plan identified. This text box has two decimals.

9. Select Current Added?

Select Current Added? if the current contribution amount has been added to the defined benefit plan balance.

10. Enter the Added Date

Enter the date the current contribution amount was added to the plan balance. Enter the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

Complete Year To Date

11. Enter the Contrib Amt

Enter the current year's contributions for the contribution type and plan identified. This text box has two decimals.

12. Enter the Interest

Enter the current year's interest accrued for the contribution type and plan identified. This text box has two decimals.

Complete Life To Date

13. Enter the Contrib Amt

Enter the total life-to-date contributions for the contribution type and plan identified through the end of the previous year. This text box has two decimals.

14. Enter the Interest

Enter the life-to-date interest accrued for the contribution type and plan identified through the end of the previous year. This text box has two decimals.

15. Select Historical Override

If the totals you are entering correct previous entries, select Historical Override.

16. Click Save or press Enter

The contribution is recorded.

See also:

Displaying retirement eligibility dates

To display retirement eligibility dates using the Plan Retirement/Notice/Counseling Dates form (65-SCR), complete the following step:

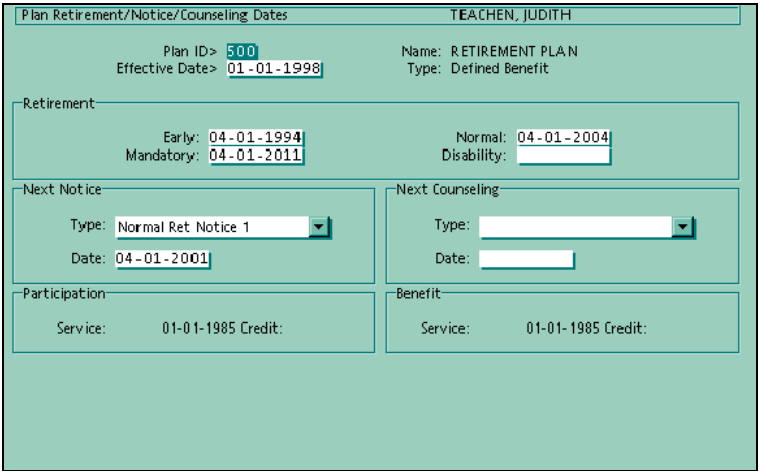
Access the Plan Retirement/Notice/Counseling Dates form (65-SCR)

Access this form by making the following selections from the Navigator:

Component: Deferred Plans Enrollment/Maintenance
Process: Service, Vesting and Retirement Info
Task: Service/Retirement Dates

For practice, access the Plan Retirement/Notice/Counseling Dates form (65-SCR) for Organization 999999 employee 3009, Judith Teachen.

If you completed the Guided Practice, the resulting form should look similar to the example that follows.



See also:

- Retirement eligibility, notifications, and counseling dates ***(on page 493)***

For more information on displaying and updating employee notice and counseling dates.

Generating retirement notification reports

To list employees who have a notification date that is within a report specified date using the Retirement Notifications Due This Period report (8L-RPT), complete the report schedule by entering the following report parameters:

Note: *This procedure assumes that you are proficient in setting up a report group, adding a report to it, and entering the report parameters. If you need procedural help with any of these tasks, please refer to the Using The Solution Series/ST documentation.*

1. Enter the As Of Date

Enter the as of date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For practice, type '03-28-2001'(US and Canada) or'28-03-2001'(elsewhere). You will record the parameters for the Retirement Notifications Due This Period report (8L-RPT) for the year 2001 from April through June.

2. Enter the Range Start Date

Enter the report start date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

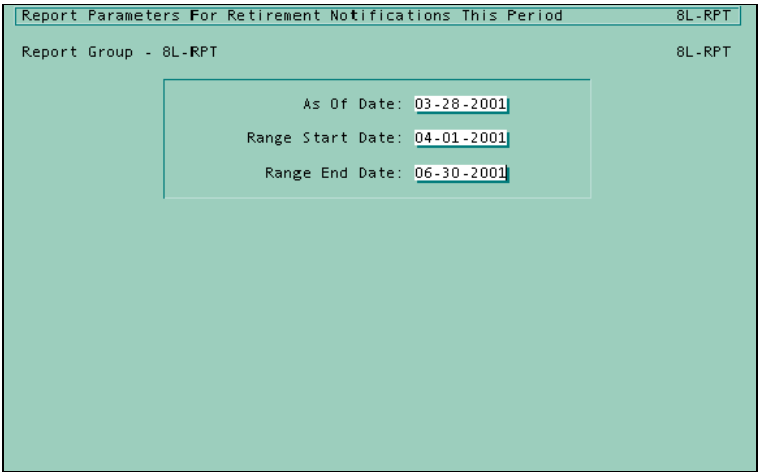
For practice, type '04-01-2001'(US and Canada) or '01-04-2001'(elsewhere).

3. Enter the Range End Date

Enter the report end date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For practice, type '06-30-2001' (US and Canada) or'30-06-2001'(elsewhere).

If you completed the guided practice, the resulting report should look similar to the following:



4. Click Save or press Enter

The report parameters are recorded.

For practice, click Save or press Enter. Then run the report.

Looking at the Retirement Notifications Due This Period report (8L-RPT), you should see that Theodore Walsh's first, normal retirement notice date is 06-01-2001 (US and Canada) or 01-06-2001 or 2001-06-01(elsewhere), and Judith Teachen's is 04-01-2001 (US and Canada) or 01-04-2001 or 2001-04-01(elsewhere).

See also:

- Retirement notification ***(on page 498)***

For more information on using the Retirement Notifications Due This Period report (8L-RPT).

Setting up retirement counseling dates

To set up or change retirement counseling dates using the Plan Retirement/Notice/Counseling Dates form (65-SCR), complete the following steps:

1. Access the Plan Retirement/Notice/Counseling Dates form (65-SCR)

Access this form by making the following selections from the Navigator:

Component:	Deferred Plans Enrollment/Maintenance
Process:	Service, Vesting and Retirement Info
Task:	Service/Retirement Dates

For practice, access the Plan Retirement/Notice/Counseling Dates form (65-SCR) for Organization 999999 employee 3009, Judith Teachen. You will update the next counseling date.

2. Enter the Plan ID

Enter the unique identifier for the plan.

For practice, type '500'.

3. Enter the Effective Date

Enter the effective date of the counseling date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For practice, type '03-28-2002'(US and Canada) or '28-03-2002'(elsewhere).

Complete the Retirement

4. Enter the Early

This date is calculated at the time of enrollment, but can be overridden manually. Enter the earliest date on which the employee can elect to retire according to plan or company rules. Enter the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For practice, do not change this text box.

5. Enter the Normal

This date is calculated at the time of enrollment, but can be overridden manually. Enter the date on which a plan participant can retire as a normal retiree according to plan or company rules. Enter the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For practice, do not change this text box.

6. Enter the Mandatory

This date is calculated at the time of enrollment, but can be overridden manually. Enter the date on which a plan participant must retire according to plan or company rules. Enter the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For practice, do not change this text box.

7. Enter the Disability

Enter the earliest date on which the employee can elect to take a disability retirement according to plan or company rules. Enter the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For practice, do not change this text box.

Complete the Next Notice

8. Select the Type

Select the type of next retirement notification to be sent to the employee approaching retirement eligibility from the Next Notice Type option list (BA38).

For practice, do not change this list box.

9. Enter the Date

Enter the date the next retirement notification is due to be sent to the employee. Enter the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For practice, do not change this text box.

Complete the Next Counseling

10. Select the Type

Select the type of next counseling session to be given to the plan participant who is nearing a projected retirement date from the Next Retire Counsel option list (BA01).

For practice, select 'Nrml Retirement 2nd'.

11. Enter the Date

Enter the date of the next counseling session in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

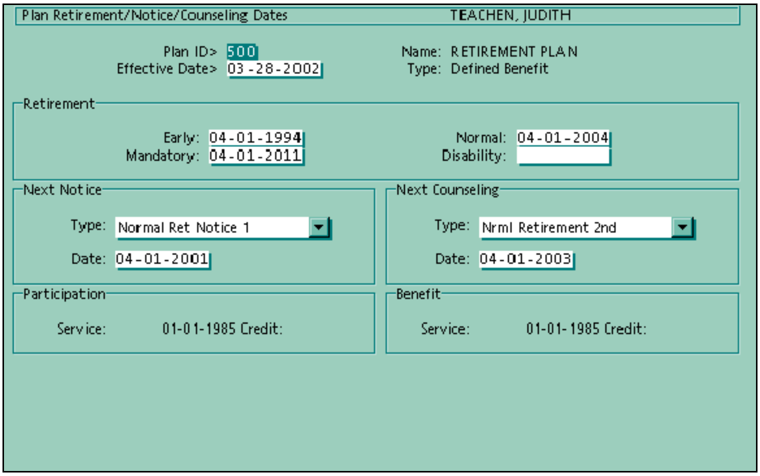
For practice, type '04-01-2003'(US and Canada) or '01-04-2003'(elsewhere).

12. Click Save or press Enter

The retirement, notice, and counseling information is recorded.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows.



See also:

- Retirement eligibility, notifications, and counseling dates ***(on page 493)***

For more information on displaying and updating employee notice and counseling dates.

Viewing pension information

To view an employee's pension information using the Plan Retirement Elections/Payments form (66-SCR), complete the following step:

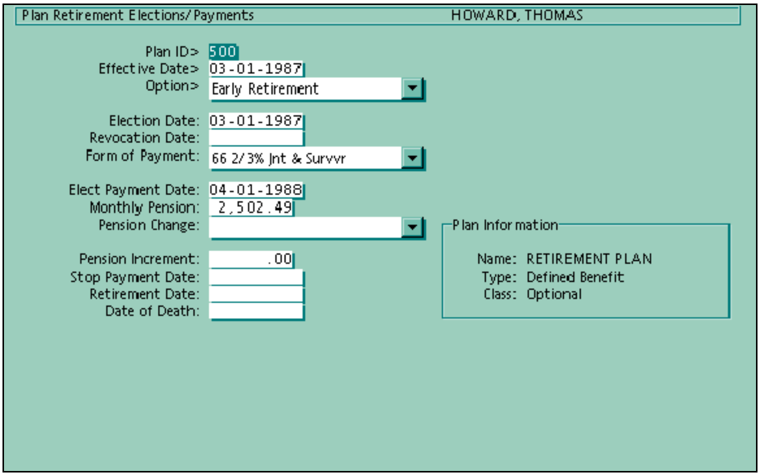
Access the Plan Retirement Elections/Payments form (66-SCR)

Access this form by making the following selections from the Navigator:

Component: Deferred Plans Enrollment/Maintenance
Process: Service, Vesting and Retirement Info
Task: Retirement Payments

For practice, access the Plan Retirement Elections/Payments form (66-SCR) for Organization 995555 employee 3037, Thomas Howard.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



Plan Retirement Elections/Payments HOWARD, THOMAS

Plan ID> 500
Effective Date> 03-01-1987
Option> Early Retirement

Election Date: 03-01-1987
Revocation Date:
Form of Payment: 66 2/3% Jnt & Survvr

Elect Payment Date: 04-01-1988
Monthly Pension: 2,502.49
Pension Change:

Pension Increment: .00
Stop Payment Date:
Retirement Date:
Date of Death:

Plan Information
Name: RETIREMENT PLAN
Type: Defined Benefit
Class: Optional

See also:

- Retirement elections and payments ***(on page 496)***

For more information on displaying employee retirement elections and payment information.

Entering pension information

To enter an employee's pension information using the Plan Retirement Elections/Payments form (66-SCR), complete the following steps:

1. Access the Plan Retirement Elections/Payments form (66-SCR)

Access this form by making the following selections from the Navigator:

Component: Deferred Plans Enrollment/Maintenance
Process: Service, Vesting and Retirement Info
Task: Retirement Payments

For practice, access the Plan Retirement Elections/Payments form (66-SCR) for Organization 999999 employee 3021, Maria Bishop. You will document her plan retirement elections.

2. Enter the Plan ID

Enter the three-character plan identifier.

For practice, type '500'.

3. Enter the Effective Date

Enter the effective date of the pension information in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For practice, type '09-25-1998'(US and Canada) or '25-09-1998'(elsewhere).

4. Select the Option

Indicate the type of retirement the employee has elected. Options are provided by the Pre/Post Retire Opts option list (BA06).

For practice, select 'Norml Rtrmnt Benefit'.

5. Enter the Election Date

This is the date on which the employee selects the Form of Payment. Enter the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For practice, type '09-25-1998'(US and Canada) or '25-09-1998'(elsewhere).

6. Enter the Revocation Date

If an employee revokes a Form of Payment election, enter the date when the employee revoked the Form of Payment. Enter the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For practice, leave this text box blank.

7. Select the Form of Payment

The Form of Payment indicates how the employee has elected to be paid. Options are provided by the Form Of Payments option list (BA07).

For practice, select '10 Year Certain'.

8. Enter the Elect Payment Date

This is the date when the Monthly Pension benefit first becomes payable. Enter the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For practice, type '01-01-1999'.

9. Enter the Monthly Pension

This is a two-decimal text box containing the monthly pension benefit being paid to the retiree. The number 123.45, for example, would be entered as '123.45' or '12345'.

For practice, type '1224.35'.

10. Select the Pension Change

This list box identifies the reason for a change to the Monthly Pension text box. Options are provided by the Pension Inc/Dec Type option list (BA08).

For practice, leave this list box blank.

11. Enter the Pension Increment

This two-decimal text box indicates the amount of increase or decrease to the monthly benefit.

For practice, leave this text box blank.

12. Enter the Stop Payment Date

This text box indicates when retirement payments are to stop. Enter the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For practice, type '12-31-2008'(US and Canada) or '31-12-2008'(elsewhere).

13. Enter the Retirement Date

This is the actual date of the retirement or termination (in the case of a vested termination). It is usually created by the system upon entry of a retirement activity, but it can be manually entered. Enter the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For practice, type '12-31-1998'(US and Canada) or '31-12-1998'(elsewhere).

14. Enter the Date of Death

This is the date when the person who was receiving benefits payments died. Enter the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

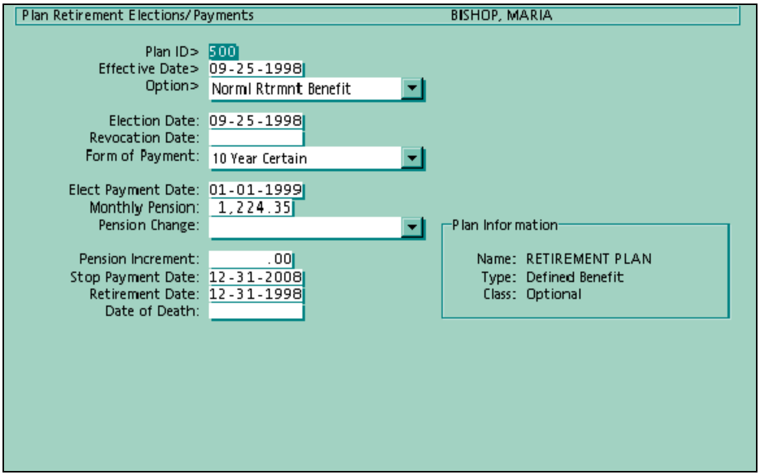
For practice, leave this text box blank.

15. Click Save or press Enter

The retirement elections are recorded.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



See also:

- Retirement elections and payments ***(on page 496)***

For more information on entering employee retirement elections and payment information.

Generating future Social Security Benefit projections

To generate future Social Security Benefit projections, follow these steps:

1. Access the Future Social Security Projection form (91-SCR)

Access this form by making the following selection from the Navigator:

Component: Deferred Plan Enrollment/Maintenance
Process: Service, Vesting, and Retirement Info
Task: Project Social Security Benefit

For practice, access the Future Social Security Projection form (91-SCR) for employee 3002 in the '999999' organization

2. Enter the Calculation Date

This is the date that social security benefits are estimated from.

For practice, type '01-01-1999'.

3. Enter the Age at Retirement

This text box is the retirement age that is used to estimate social security benefits. Enter a value between 62 - 69.

For practice, type '65'.

4. Select the Prior Year Earnings

These list boxes specify which Earnings Type is used to estimate social security benefits. Select an Earnings Type of Calculate/Accumulate, Calculate Only, or Accumulator Only.

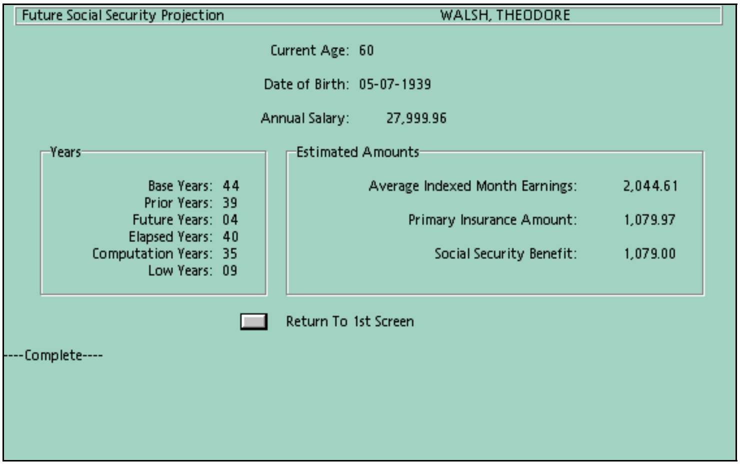
For practice, select 'Calculate Only.'

5. Click Save or press Enter

Social Security Benefit projections are now generated.

For practice, click Save or press Enter.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



Future Social Security Projection WALSH, THEODORE

Current Age: 60

Date of Birth: 05-07-1939

Annual Salary: 27,999.96

Years

Base Years: 44
Prior Years: 39
Future Years: 04
Elapsed Years: 40
Computation Years: 35
Low Years: 09

Estimated Amounts

Average Indexed Month Earnings: 2,044.61

Primary Insurance Amount: 1,079.97

Social Security Benefit: 1,079.00

Return To 1st Screen

----Complete----

Benefits/Payroll Interaction

In This Chapter

Introduction

Employee data is constantly changing. Employees receive salary increases. They become eligible for retirement. They receive promotions. They transfer from part-time to full-time employment. All of these changes can impact an employee's benefits. This section will show you how to account for these changes and ensure that the correct deductions are taken during payroll processing. It will also show you what needs to be done to update benefits accumulators after a pay run.

Tasks

This section explains the following:

- Recalculating benefits for employee changes
- Recalculating benefits for plan changes
- Creating alternate key records using a subroutine
- Creating alternate key records using a date range
- Deleting alternate key records
- Copying benefits deduction changes to payroll
- Updating benefits accumulators after a pay run
- Updating deferred plan accumulators after a pay run

Prerequisites

Before you can complete the tasks in this section, the following must be established for:

- Organization and employees
- Benefits plans

☞ *Refer to the '***Plan Design** *(on page 29)' section for more information on setting up benefits plans.*

- Employees must be enrolled in benefits plans

☞ *Refer to the '***Enrollment** *(on page 279)' section for more information on enrolling employees in benefits plans.*

Questions answered

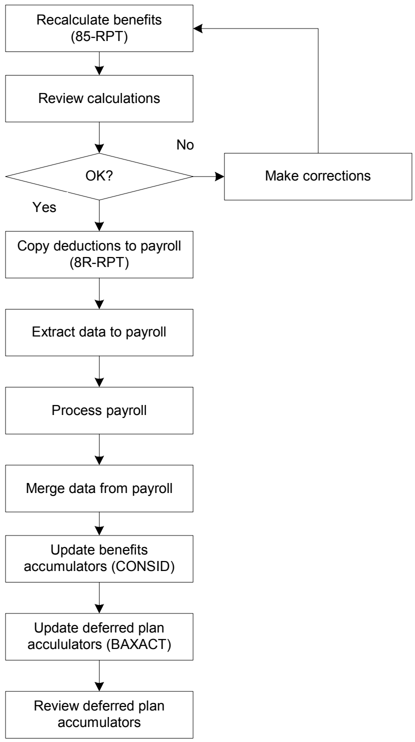
The following questions are answered in this section:

1. What interactions occur between benefits and payroll processing?
2. What is the purpose of the Recalc Benefit Coverage/Contributions report (85-RPT) and what options are available for running it?
3. What is the advantage of creating alternate key records for use with the recalculation report and what options are available to create them?
4. What is the purpose of the HED Segment Changes Effective This Period report (8R-RPT) and when should it be run?
5. What is the purpose of the Considered Earnings/Hours Update program (CONSID) and when should it be run?

6. What is the purpose of the Update Benefit Plan Balance Information program (BAXACT) and when should it be run?

Benefits and Payroll interaction

The Benefits/Payroll interaction involves ensuring that the correct deductions are taken during a pay run, as well as updating benefits accumulators following a pay run. The following flowchart provides a conceptual flow of the preparation for payroll, the payroll process, and the post-payroll updates.



The remainder of this chapter explains the tasks shown in this flowchart, excluding Extract Data for Payroll, the payroll process, and Merge Data From Payroll.

☞ *Refer to the Payroll documentation for information on Extract Data for Payroll, the payroll process, and Merge Data from Payroll.*

Preparation for a pay run

Prior to a pay run, you should run the Recalc Benefit Coverage/Contributions report (85-RPT) and the HED Segment Changes Effective This Period report (8R-RPT). The HED Segment Changes Effective This Period report (8R-RPT) must be run after, and separately from, the Recalc Benefit Coverage/Contributions report (85-RPT).

Note: *'HR only' customers may run the Recalc Benefit Coverage/Contributions report (85-RPT) to ensure that the information they use for their payroll processing is up to date. 'HR only' customers should not run the HED Segment Changes Effective This Period report (8R-RPT).*

Recalculation of benefits

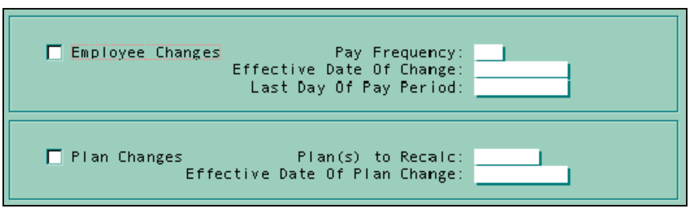
Changes to benefits plan tables and/or employee master records can affect coverage and contributions. The Recalc Benefit Coverage/Contributions report (85-RPT) is typically run prior to a pay run to ensure that any changes are accurately reflected in the benefits information used in the pay run. This report performs the following functions:

- Notes changes in an employee's enrollment status and flags for de-enrollments
- Recalculates employee plan coverage and contribution amounts
- Recalculates company matching contributions
- Updates the employee's master record

Ways to run the report

There are two ways to run the Recalc Benefit Coverage/Contributions report (85-RPT):

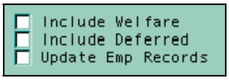
- **Employee Recalculations**—run the report this way when a change has been made that impacts coverage and/or contribution calculations based on, or calculated from, the employee master records. The system will search each employee's record and recalculate coverage and contributions if any changes (table or master file data) are found.
- **Plan Table Recalculations**—run the report this way to isolate a specific plan or when changes have been made to the benefits plan tables that affect the calculation of employee and/or company contributions. The system will search for all employees in a specific plan and perform recalculations.



Note: *When setting up the parameters for the report, you will indicate the way you want the report to be run. You can not run the report both ways at the same time. Employee Changes and Plan Changes can not both be selected.*

In addition, the report can be run for one or more pay frequencies. Using the Pay Frequency text box, you can specify that the report should be run for one pay frequency, for a range of pay frequencies, or for all pay frequencies.

The report can also be run in preview mode—the output is identical to running the report in update mode, but the employee records are not updated. Unless you check the option 'Update Emp Records', the report will be run in preview mode.



See also:

- Recalculating benefits for employee changes ***(on page 550)***
- Recalculating benefits for plan changes ***(on page 553)***

For detailed directions on recalculating benefits prior to a pay run.

Interpreting the report output

The output of the Recalc Benefit Coverage/Contributions report (85-RPT) shows only changed data; new enrollments done online or in batch entry format will not appear as output on the report. Following are the features of the Recalc Benefit Coverage/Contributions report (85-RPT):

- **Sort**
  The report is sorted by organization/company and then by employee number.
- **Changes**
  Changes are shown using an 'Is/Was' format, allowing you to compare what the data looked like before and after the changes. Information is displayed in two columns.

For example, on the following abbreviated version of the Recalc Benefit Coverage/Contributions report (85-RPT), by looking at the X-REF-AMT-PCT field, you can see that Cecelia Harris's contribution amount has changed from 6.92 to 9.23.

```

- **De-enrollment flags**
  If an employee is no longer eligible for a plan, the employee's name and number will be

listed on the report, along with a message indicating that the employee should be de-enrolled from the plan. This is an informational message only; it will continue to appear on the report until action is taken to de-enroll the employee from the plan.

For example, on the following abbreviated version of the Recalc Benefit Coverage/Contributions report (85-RPT), you can see that employee 3015 should be de-enrolled from Plans 101 and 203.

```
CORPORATION 99     Acme MANUFACTURING    RECALCULATION OF BENEFIT PLANS       FILE VERSION 00 PAGE 1
DIVISION    9999   PRODUCTION CTL 1-2                                          TIMR 15:33:08 DATE 11-09-94

```

Uses of the report by plan type

This section documents the uses of the Recalc Benefit Coverage/Contributions report (85-RPT) by plan type.

Welfare plans

This chart documents the types of calculations performed for welfare plans:

Item	Recalculation performed
Eligibility	Plan eligibility is re-verified for each plan for which an employee is currently enrolled. If a future-dated enrollment is on file for an employee, or if an employee is no longer eligible for a plan, it will be noted on the report.
Coverage	Coverage amounts will be recalculated only for those employees who have an 'Accept' on the Welfare Plan Enrollments/Changes form (55-SCR). The report will show both the old amount and the recalculated amount.
Contributions	Contributions will be recalculated if there has been a change to a plan's contribution rules (a new Coverage And Contribution Factors table exists), or a change to an employee's data will result in a change in a contribution amount. The report will show both the old amount and the recalculated amount.

Deferred plans

For deferred plans, you can use the Recalc Benefit Coverage/Contributions report (85-RPT) to recalculate the company match. Because employee contributions to a deferred plan can be different for each employee, the Recalc Benefit Coverage/Contributions report (85-RPT) does not recalculate employee contributions.

Flex plans

For flex plans, the Recalc Benefit Coverage/Contributions report (85-RPT) is typically used to perform the following functions:

- check eligibility for flex plans in which employees are enrolled
- recalculate coverage only for life insurance plans

The report does not recalculate credits on the Flexible Benefit Annual Plan Credits form (55CSCR) for any of the plans that have to be recalculated. A life status change must be entered on the Flex Benefit Enrollments/Changes form (55FSCR) for a recalculation of credit to occur.

When to run the report

To ensure that the latest information is reflected during payroll processing, we recommend that you run the Recalc Benefit Coverage/Contributions report (85-RPT) for employee recalculations before each pay run. Consider the following in determining when to schedule the report:

- The report can take several hours to process. It should be run during off-peak hours to ensure it does not impact on other uses of the system.
- Allow enough time to review the audit trail, make sure the deductions are correct, and, if necessary, process any de-enrollments.

Apply the Concept

Describe when you will run the Recalc Benefit Coverage/Contributions report (85-RPT) and which parameters you will use for the report.

Selective reporting for the Recalc Benefit Coverage/Contribution Report

By using alternate key records, you can limit the number of employees included in the Recalc Benefit Coverage/Contributions report (85-RPT), and thus reduce processing time. For example, you might want to process the report only for those employees who have just received a raise.

Two methods are available to create alternate keys records:

- **Alternate Key Create Subroutine—**This subroutine will produce alternate key records based on specific types of changed data in an employee's master record.
- **Recalc Benefit Coverage/Contributions: Alternate Key Creation By Dates (85QRPT)—**This report will produce alternate key records based on a specified date range.

After the alternate key records are created, the Recalc Benefit Coverage/Contributions report (85-RPT) can be run. After the report is run, you should delete the alternate key records using the 85-RPT Alternate Key Deletion form (85QDEL).

Modifications required to create alternate key records using the Alternate Key Create Subroutine

The creation of alternate key records for use by the Recalc Benefit Coverage/Contributions report (85-RPT) requires that modifications be made to the Alternate Key Create Subroutine and to the following forms:

- New Hire
- Rehire/Reinstatement/Recall
- Status Changes
- Leaves And Returns
- Separations And Terminations

Alternate key records will be created for employees when any of the following entries are changed on these forms:

Form	**Entries**
Employee Information (EF-SCR)	Frequency Payment Type Gender Zip
Additional Employee/Payroll Information (EG-SCR)	Workers Comp Code Union

Form	Entries
Payroll Home Location/Pay Allocations (GG-SCR)	Control 3 Control 4 Control 5 Control 6 Function
New Hire (01-SCR)	Resulting Status
Additional Personal And ID Information (02-SCR)	Marital Status
Job Assignment/Changes (05-SCR)	Ctrl 3 Ctrl 4 Ctrl 5 Ctrl 6
Emergency Medical Information (15-SCR)	Employee Smokes
Salary Assignment/Changes (40-SCR)	Hours Per Period Hourly Rate Salary Per Period Annual Salary Amount Change Percent Change

See also:

- Creating alternate key records using a subroutine ***(on page 555)***

For detailed directions on creating alternate key records using a subroutine.

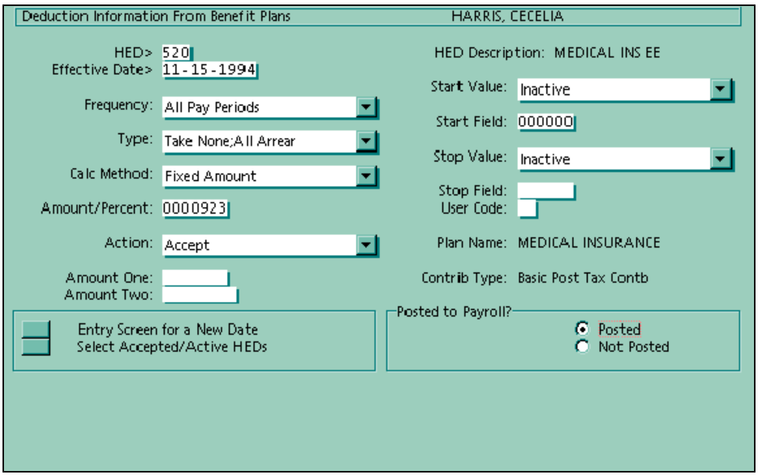
Creation of alternate key records by date range

The Recalc Benefit Coverage/Contributions: Alternate Key Creation By Dates report (85QRPT) can be used to create alternate key records for use by the Recalc Benefit Coverage/Contributions report (85-RPT).

Employee selection for inclusion on the recalculation report can be based on dates, such as birth date or employment date. If the month and day values of any of the four dates listed below fall between the month and day values specified in the report parameters, an alternate key record will be created for the employee:

- Birth date
- Employment date
- Original Hire Date
- Adjusted Seniority Date

For example, if you wanted to create alternate key records for new hires employed on February 1 of 1998 (dates are entered in MMDDCCYY format for US and Canada, and DDMMCCYY format elsewhere), the report parameters would be set as follows:



See also:

- Creating alternate key records using a date range ***(on page 556)***

For detailed directions on creating alternate key records using a date range.

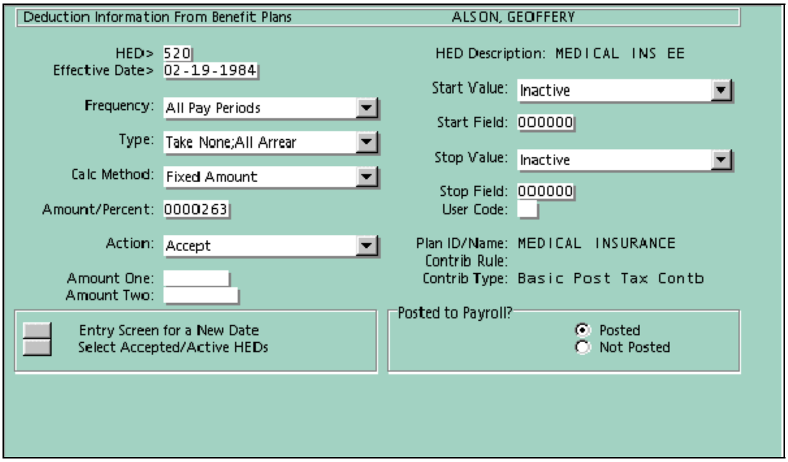
Copy deduction changes to payroll

After you have run the Recalc Benefit Coverage/Contributions report (85-RPT) and have verified that the deductions are correct, you are ready to run the HED Segment Changes Effective This Period report (8R-RPT). The HED Segment Changes Effective This Period report (8R-RPT) takes the deductions and company cost accruals on the Deduction Information From Benefit Plans form (54-SCR) and writes them to the Employee Earnings And Deductions form (HH-SCR), so payroll can access them. The payroll process does not work with the deductions on the Deduction Information From Benefit Plans form (54-SCR).

The following figure shows a portion of an HED Segment Changes Effective This Period report (8R-RPT). It indicates that Cecelia Harris's contribution for Plan 101 is 9.23 and the company's contribution for this plan is 37.65.

```
CORPORATION   99   Acme MANUFACTURING     H SEGMENT CHANGES       REPT  PERIOD   FILE VERSION 00   PAGE   1
DIVISION      9999 PRODUCTION CTL 1-2    EFFECTIVE THIS PERIOD    8R-R  PERIOD   TIME 16:49      DATE 11-19-1999
PLAN  HED                      EMPLOYEE    PAY   START    EFFECT    AMOUNT/     XREF   XREF   XREF   XREF
 ID   XREF  EMPLOYEE NAME       NUMBER     FREQ  FIELD     DATE       PCT       FREQ   TYPE   METH    UC
101   520   ALSON, GEOFFERY      3003       3    000000  02-19-1984 0000263      01     54     02
TOTAL HED-XREF:  520               1
101   521   ALSON, GEOFFERY      3003       3    000000  02-19-1984 0004100      01     54     02
TOTAL HED-XREF:  521               1
```

You can view which deductions were written to payroll using either the Online Employee Profile form (PROFIL) or the Deduction Information From Benefit Plans form (54-SCR). For example, this form shows that Geoffery Alson's post tax contribution of 2.63 has been posted to payroll:



Apply the Concept

Describe how you would use alternate key records.

After a pay run

This section describes the processing programs that should be run after a pay run. These programs ensure that benefits accumulators reflect the most current earnings for employees. You should work with your systems support personnel to ensure that these programs are included in the appropriate job streams.

Update benefits accumulators

The Considered Earnings/Hours Update program (CONSID) updates established considered hours and earnings accumulators with the current pay period's earnings, as defined in the accumulator setup. The Considered Earnings/Hours Update program (CONSID) reads the most current sequential batch master file and moves the current history earnings records into the accumulators.

View the results of the Considered Earnings/Hours Update Program

You can view the results of the Considered Earnings/Hours Update program (CONSID) processing for an employee on the Considered Earnings/Hours Accumulators form (60-SCR). The actual earnings are posted to the company 991111.

When to run the program

The Considered Earnings/Hours Update program (CONSID) should be run as soon after the pay merge as possible. If the pay extract is run for the next pay run prior to running Considered Earnings/Hours Update program (CONSID) for the most recent pay run, the current indicator on the earnings will be turned off, and manual entry will be required to update the accumulators with earnings.

The Considered Earnings/Hours Update (CONSID) is run prior to running the Update Benefit Plan Balance Information program (BAXACT) and the Update Account Balances report (83ARPT).

☞ *Refer to* **Using Considered Earnings/Hours Accumulators** *(on page 235) for more information on setting up accumulators and viewing updated accumulators.*

Update of deferred benefit amounts

The Update Benefit Plan Balance Information program (BAXACT) updates deferred plan accumulators after a pay run.

When to run the program

The Update Benefit Plan Balance Information program (BAXACT) should be run as soon after the pay merge and the Considered Earnings/Hours Update program (CONSID) as possible. If the pay extract is run for the next pay run prior to running Update Benefit Plan Balance Information program (BAXACT) for the most recent pay run, manual entry will be required to update the accumulators with earnings.

Apply the Concept
Describe the process you will use for updating and reviewing benefits accumulators.

Accumulator reports

The Update Account Balances report (83ARPT) and the Update Pending Claim Amounts report (83BRPT) can be used to verify the results of the Update Benefit Plan Balance Information program (BAXACT). The Update Account Balances report (83ARPT) creates extract records reflecting updates to deferred plan contributions and Flexible Spending Accounts. These records are used by the Update Pending Claim Amounts report (83BRPT) to produce report output.

Note: *Although these reports can be used to view updates to deferred plan accumulators, such as a thrift/savings plan, they are more typically used with Flexible Spending Accounts, a US-specific benefit.*

Detailed Directions

This section provides detailed directions on completing a business task.

Tasks

Completing the Guided Practice

You must have completed the Guided Practices in the prior chapters to guarantee the successful completion of the Guided Practice that follows.

Recalculating benefits for employee changes

To recalculate benefits prior to a pay run, you use the Recalc Benefit Coverage/Contributions report (85-RPT). You can run this report either for employee changes or for plan changes. In this task, you will process the report based on changes to employee data. Each applicable employee's record will be read. Typically, this option takes longer to run than running the report for specific plans.

Note: *This procedure assumes that you are proficient in setting up a report group, adding a report to it, and entering the report parameters.*

☞ *Refer to either the eCyborg: Using the Web Client or Using The Solution Series: Administrative Solutions documentation for procedural help with any of these tasks.*

Completing the Guided Practice

To complete the Guided Practice for this task, you will need to complete these tasks first:

- Enroll employee 3023, Jeffrey C. Daniels, in Plan 203, Basic Life, on the Welfare Plan Enrollments/Changes form (55-SCR). Use an effective date of '01-01-1998' and an option of 'Enrolled'. Accept the calculated amounts.
- Give employee 3023 a merit increase on the Salary Assignment/Changes form (40-SCR). Use an effective date of '02-01-1998' (US and Canada) or '01-02-1998'

(elsewhere), a separator of '1st Occurrence', and a change type of 'Increase-Merit'. Enter a new annual salary of '26203.00'.

- Create a report group for the Recalc Benefit Coverage/Contributions report (85-RPT). This must be the only report in the group.

Complete the report schedule by entering the following report parameters:

1. Select Employee Changes

This selection indicates that you want to process the report for changes made to employee data.

Note: *If you are using this option, you should not have the Plan Changes check box selected.*

For practice, select the Employee Changes check box.

2. Enter the Pay Frequency

To calculate one pay frequency, type the frequency code in position 1; leave positions 2 and 3 blank. For example, type 1 to calculate frequency 1.

To calculate a range of frequency codes, type the low end of the range, followed by a slash (/), and then the high end of the range. For example, type 1/3 to calculate frequency codes 1, 2, and 3.

To calculate all pay frequencies, type ALL.

For practice, type 'ALL'.

3. Enter the Effective Date Of Change

Enter the date on which the changes are effective. This date is the 'Is' date on the output report. Enter the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

Note: *Any changes that are due to occur after this date will be shown on the report as 'future change on file.'*

For practice, type '03-12-1998' (US and Canada) or '12-03-1998' (elsewhere).

4. Enter the Last Day Of Pay Period

Enter the date that reflects the last day of the pay period, or the date to be used to find segments and table records. Enter the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For practice, type '03-12-1998' (US and Canada) or '12-03-1998' (elsewhere).

5. Select a Flex Plans option

Choose an option reflecting how you would like flex plans recalculated. If you leave this check box unchecked, flex plans will not be included in the recalculation.

For practice, leave this check box unchecked.

6. Select Include Welfare

Select this check box if welfare plans should be included in the report.

For practice, select the Include Welfare check box.

7. Select Include Deferred

Select this check box if deferred plans should be included in the report.

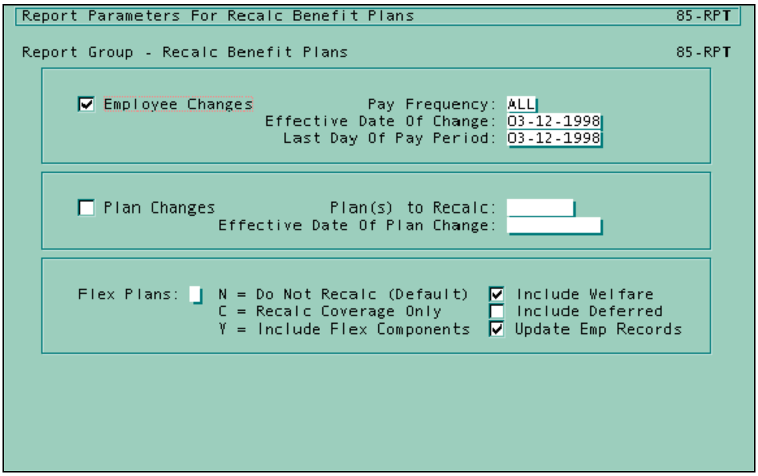
For practice, leave this check box unchecked.

8. Select Update Emp Records

Select this check box if recalculations should update employee records. To run the report in preview mode, leave this check box unchecked.

For practice, select the Update Emp Records check box.

If you completed the Guided Practice, the form should look similar to the example that follows:



Report Parameters For Recalc Benefit Plans 85-RPT

Report Group - Recalc Benefit Plans 85-RPT

[x] Employee Changes
Pay Frequency: ALL
Effective Date Of Change: 03-12-1998
Last Day Of Pay Period: 03-12-1998

[ ] Plan Changes
Plan(s) to Recalc:
Effective Date Of Plan Change:

Flex Plans:
N = Do Not Recalc (Default)
C = Recalc Coverage Only
Y = Include Flex Components
[x] Include Welfare
[ ] Include Deferred
[x] Update Emp Records

9. Click Save or press Enter

The report parameters are saved.

For practice, click Save or press Enter.

To complete the Guided Practice, perform these tasks:

- Run the Recalc Benefit Coverage/Contributions report (85-RPT).
- Using the report, verify that the prior and new deduction amounts are accurately reflected for employee 3023.
- Access the Deduction Information From Benefit Plans form (54-SCR) for employee 3023, and verify that a new form has been created for 03-12-1998 (US and Canada) or 12-03-1998 (elsewhere).

Access the Plan Coverage Amount Entry form (53-SCR) for employee 3023, and verify that a new form has been created for 03-12-1998 (US and Canada) or 12-03-1998 (elsewhere).

Looking at the Recalc Benefit Coverage/Contributions report (85-RPT), you will note on the report output that there is a new contribution amount and a new coverage amount for 03-12-1998 (US and Canada) or 12-03-1998 (elsewhere). Check the 'Is/Was' information for the Q5 and Q8 segments.

These changes are also noted on the Deduction Information From Benefit Plans form (54-SCR) and the Plan Coverage Amount Entry form (53-SCR).

See also:

- Recalculation of benefits ***(on page 539)***

For more information about ways to run the Recalc Benefit Coverage/Contributions report (85-RPT).

Recalculating benefits for plan changes

To recalculate benefits prior to a pay run, you use the Recalc Benefit Coverage/Contributions report (85-RPT). You can run this report either for employee changes or for plan changes. In this task, you will process the report based on changes to benefits tables that affect the coverage and/or contribution for a plan or range of plans. The system searches for all employees in a specific plan and performs the calculations. Complete the report schedule by entering the following report parameters:

Note: *This procedure assumes that you are proficient in setting up a report group, adding a report to it, and entering the report parameters.*

☞ *Refer to either the Using eCyborg or Using The Solution Series: Administrative Solutions documentation for procedural help with any of these tasks.*

Completing the Guided Practice

To complete the Guided Practice for this task, you will need to complete these tasks first:

- Modify Plan 101 as follows: make the Employee Only/Single post tax contribution of four dollars a month, '.0400'. Use '02-01-1998' (US and Canada) or '01-02-1998' (elsewhere) as the effective date. Make the changes on the Coverage And Contribution Factors form (TM-SCR).
- Use the report group set up under Option 1. Be sure to de-select all check boxes and clear the list and text boxes from the prior Guided Practice.

1. Select Plan Changes

This selection indicates that you want to process the report for changes made to plan data.

Note: *If you are using this option, you should not have the Employee Changes check box selected.*

For practice, select Plan Changes.

2. Enter the Plan(s) to Recalc

To recalculate benefits for a specific plan, enter its Plan ID. To recalculate benefits for multiple plans, enter their Plan IDs as a range, using the format xxx/xxx. To recalculate all benefits plans, enter 'ALL'.

For practice, type '101'.

3. Enter the Effective Date Of Plan Change

Enter the date one which the plan change became effective. Enter the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For practice, type '02-01-1998' (US and Canada) or '01-02-1998' (elsewhere).

4. Select Include Welfare

Select this check box if welfare plans should be included in the report.

For practice, select the Include Welfare check box.

5. Select Include Deferred

Select this check box if deferred plans should be included in the report.

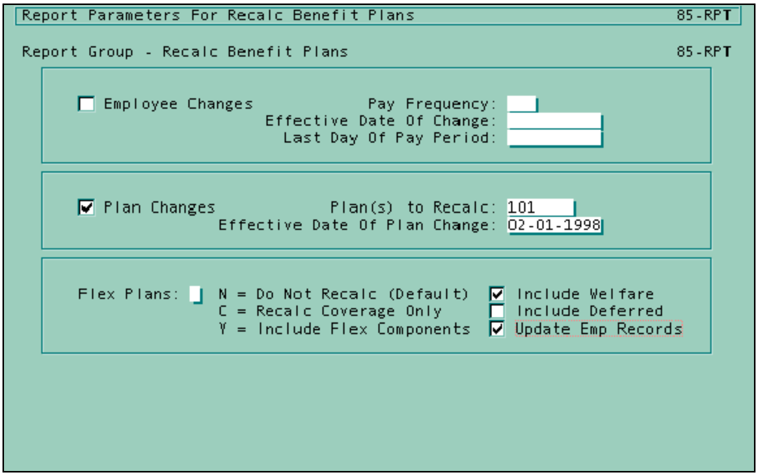
For practice, leave this check box unchecked.

6. Select Update Emp Records

Select this check box if recalculations should update employee records. To run the report in preview mode, leave this check box unchecked.

For practice, select the Update Emp Records check box.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



7. Click Save or press Enter

The report parameters are saved.

For practice, click Save or press Enter.

See also:

- Recalculation of benefits ***(on page 539)***

Creating alternate key records using a subroutine

You can limit the number of records processed by the Recalc Benefit Coverage/Contributions report (85-RPT) by using the Alternate Key Create Subroutine to create alternate key records. After the alternate key records have been created, you can then run the recalculation report.

1. Modify the Alternate Key Create Subroutine

a. Using the EDIT tool, display the Alternate Key Create Subroutine.

b. Enter an at-sign (@) in the first position of line 03900.

c. RELOAD the program.

2. Modify the data forms for the alternate keys

a. Remove the '@' from the code in the paragraphs from the desired forms:

Form	Paragraph
New Hire(01-SCR)	P340-RESET

Form	Paragraph
Rehire/Reinstatement /Recall (04-SCR)	P380-RESET
Status Changes (08-SCR)	P350-RESET
Leaves And Returns (95-SCR)	P390-SET-UP
Separations And Terminations (96-SCR)	P365-CALL-RETURN

b. RELOAD the forms.

See also:

- Selective reporting for the Recalc Benefit Coverage/Contribution Report ***(on page 543)***

For more information about creating alternate keys for use by the Recalc Benefit Coverage/Contributions report (85-RPT).

Creating alternate key records using a date range

You can limit the number of records processed by the Recalc Benefit Coverage/Contributions report (85-RPT) by using the Recalc Benefit Coverage/Contributions: Alternate Key Creation By Dates report (85QRPT) to create alternate key records. After the alternate key records have been created, you can then run the recalculation report.

Complete the report schedule for this report by entering the following report parameters:

☞ *Refer to either the eCyborg: Using the Web Client or Using The Solution Series: Administrative Solutions for procedural help in setting up a report group, adding a report to it, and entering the report parameters.*

1. Enter the Date Range (Start)

Enter the beginning date for the range of dates to be included in the creation of the alternate key records. Enter the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

2. Enter the Date Range (End)

Enter the ending date for the range of dates to be included in the creation of the alternate key records. Enter the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

3. Click Save or press Enter

The alternate key records will be created.

See also:

- Creation of alternate key records by date range ***(on page 545)***

For more information about creating alternate keys for use with the Recalc Benefit Coverage/Contributions report (85-RPT).

Deleting alternate key records

Once alternate key records have been processed by the recalculation report, they should be deleted. To delete alternate key records, follow these steps:

1. Access the 85-RPT Alternate Key Deletion form (85QDEL)

Access this form by selecting Actions ▶ Enter Command from the menu, typing '85QDEL' in the Program text box, and clicking OK.

2. Enter the Report Scheduler Name

Enter the name of the Report Scheduler (or report group master) that was used to run the recalculation report.

3. Click Save or press Enter

The alternate key records will be deleted.

See also:

- Selective reporting for the Recalc Benefit Coverage/Contribution Report ***(on page 543)***

For more information about deleting alternate key records.

Copying benefits deduction changes to payroll

To copy benefits deduction changes to payroll, you use the HED Segment Changes Effective This Period report (8R-RPT). Complete the report schedule by entering the following report parameters:

Note: *This procedure assumes that you are proficient in setting up a report group, adding a report to it, and entering the report parameters.*

☞ *Refer to either the eCyborg: Using the Web Client or Using The Solution Series: Administrative Solutions documentation for procedural help with any of these tasks.*

Completing the Guided Practice

To complete the Guided Practice, you will need to create a separate report group for the HED Segment Changes Effective This Period report (8R-RPT).

1. Enter the Pay Period End Date

All HED deduction amounts (Q5 segments) with an effective date less than or equal to this date will be written to payroll.

Enter the date in the format MM-DD-CCYY or CCYYMMDD (US and Canada) or DD-MM-CCYY or CCYYDDMM (elsewhere).

For practice, type '03-12-1998' (US and Canada) or '12-03-1998' (elsewhere).

2. Enter the Pay Frequency Option

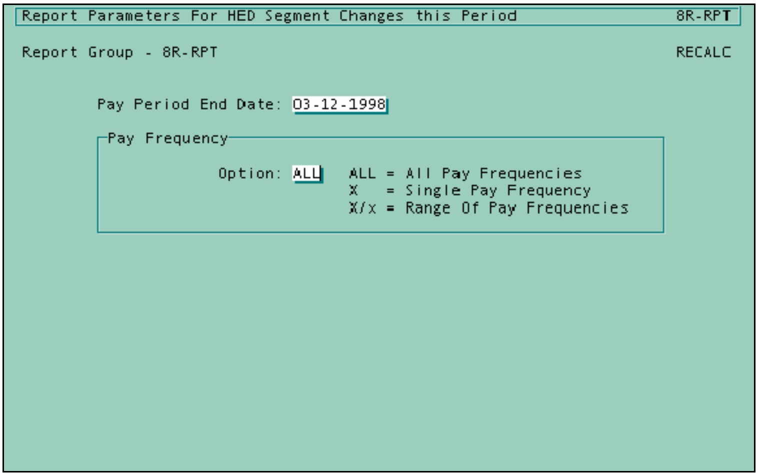
To calculate one pay frequency, type the frequency code in position 1; leave positions 2 and 3 blank. For example, type 1 to calculate frequency 1.

To calculate a range of frequency codes, type the low end of the range, followed by a slash (/), and then the high end of the range. For example, type 1/3 to calculate frequency codes 1, 2, and 3.

To calculate all pay frequencies, type ALL.

For practice, type 'ALL'.

If you completed the Guided Practice, the resulting form should look similar to the example that follows:



3. Click Save or press Enter

The report parameters are saved.

For practice, click Save or press Enter. Then do the following:
1. Run the report.
2. Access the Deduction Information From Benefit Plans form (54-SCR) for employee 3023 and verify that the Posted to Payroll? indicator is set to 'Posted' for HEDs 510, 520, and 521.
3. Verify that Employee Earnings and Deductions forms (HH-SCR) have been created for employee 3023 and HEDs 510, 520, and 521.

See also:

- Update benefits accumulators ***(on page 547)***

For more information about ensuring that plan deductions are copied to payroll.

Updating benefits accumulators after a pay run

The Considered Earnings/Hours Update program (CONSID) is used to update deferred benefits eligibility accumulators. This program should be run as soon as possible after the Employee Database (Master File; Employee Database) has been rebuilt. The settings for running this program are as follows:

1. Run the Considered Earnings/Hours Update program (CONSID)

Run this program in batch as follows:

INPUT	FILE01 FILE02 FILE04 FILE11	System Control Repository (Control File) Employee Database (Master File) Control Record File Current Batch Master File
OUTPUT	FILE03	Audit/Message File
EXECUTE	CBSVB	

The control record on FILE04 has the following syntax:

In these positions	Enter	Description
23–28	CONSID	program name

2. Check the output

A successful run will produce a COMPLETED message in FILE03.

See also:

- Update benefits accumulators ***(on page 547)***

For more information about the Considered Earnings/Hours Update program (CONSID).

Updating deferred plan accumulators after a pay run

The Update Benefit Plan Balance Information program (BAXACT) is used to update deferred benefits accumulators. The settings for running this program are as follows:

1. Run the Update Benefit Plan Balance Information program [first pass]

The first pass of the Update Benefit Plan Balance Information program (BAXACT) generates a file of deferred plan accumulation transactions in Batch Layout Facility (BATCHL) format. These transactions reflect the current History and Labor information read from the Batch Master File.

Run this program in batch as follows:

INPUT	FILE01 FILE02 FILE04 FILE11	System Control Repository (Control File) Employee Database (Master File) Control Record File Current Batch Master File
OUTPUT	FILE03 FILE10	Audit/Message File HRMS Benefit Transaction Records
EXECUTE	CBSVB	

The control record on FILE04 has the following syntax:

In these positions	Enter	Description
23–28	BAXACT	program name

2. Run the Update Benefit Plan Balance Information program [second pass]

The second pass of Update Benefit Plan Balance Information program (BAXACT) applies the deferred plan accumulation Batch Layout Facility (BATCHL) transactions to the Employee Database. FILE10 (HRMS Benefit Transactions Records) from the first pass is renamed to FILE04 (Control Record File) in the second pass.

Run this program in batch as follows:

INPUT	FILE01 FILE02 FILE04	System Control Repository (Control File) Employee Database (Master File) HRMS Benefit Transaction Records
OUTPUT	FILE03	Audit/Message File
EXECUTE	CBSVB	

3. Check the output

A successful run will produce a COMPLETED message in FILE03.

See also:

- Update benefits accumulators ***(on page 547)***

For more information about the Update Benefits Plan Balance Information program (BAXACT).

Extended Practice

Note: You must have completed the Extended Practices in the prior chapters to guarantee the successful completion of the Extended Practice that follows.

1. Give employee 1616, Daniel M Anderson, a merit increase. Enter a new Annual Salary of '31699.27' effective 04-01-1998 (US and Canada) or 01-04-1998 (elsewhere). Use a Separator of '1st Occurrence' and a Type Of Change of 'Increase-Merit'.
2. Run the Recalc Benefit Coverage/Contributions report (85-RPT) for employee changes. Run the report for all pay frequencies with an effective and last pay period date of 04-15-1998 (US and Canada) or 15-04-1998 (elsewhere). Select welfare plans with employee update.
3. Using the Recalc Benefit Coverage/Contributions report (85-RPT), verify that the prior and new deduction amounts are accurately reflected for employee 1616.
4. Access the Deduction Information From Benefit Plans form (54-SCR) for employee 1616, and verify that a new form has been created effective 04-15-1998 (US and Canada) or 15-04-1998 (elsewhere).
5. Access the Plan Coverage Amount Entry form (53-SCR) for employee 1616, and verify that a new form has been created effective 04-15-1998 (US and Canada) or 15-04-1998 (elsewhere).
6. Run the HED Segment Changes Effective This Period report (8R-RPT) for the pay period ending 04-15-1998 (US and Canada) or 15-04-1998 (elsewhere) for all pay frequencies.
7. Access the Deduction Information From Benefit Plans form (54-SCR) for employee 1616 and verify that the Posted to Payroll? indicator is set to 'Posted' for HED 511.
8. Verify that Employee Earnings and Deductions forms (HH-SCR) have been created for employee 1616 and HED 511.

Review of Questions Answered

1. What interactions occur between benefits and payroll processing?

2. What is the purpose of the Recalc Benefit Coverage/Contributions report (85-RPT) and what options are available for running it?

3. What is the advantage of creating alternate key records for use with the recalculation report and what options are available to create them?

4. What is the purpose of the HED Segment Changes Effective This Period report (8R-RPT) and when should it be run?

5. What is the purpose of the Considered Earnings/Hours Update program (CONSID) and when should it be run?

6. What is the purpose of the Update Benefit Plan Balance Information program (BAXACT) and when should it be run?

CHAPTER 15

Maintaining and Deactivating Plans

In This Chapter

Introduction

Organizational changes can affect your benefits plans. Using some of the same techniques that were available for the implementation of Benefits Administration, you can plan ahead for these changes in policy or procedure and ensure a seamless and successful changeover to a new contribution, coverage, or benefits provider.

Review this section carefully to determine how to effectively modify Benefits Administration to accommodate your evolving organization.

Tasks

This section explains the following:

- Modifying a benefits plan
- Identifying employees for de-enrollment from an obsolete plan
- De-enrolling an employee from an obsolete plan
- Copying deduction changes to Payroll
- Deactivating a benefits plan

Prerequisites

Before you can update or deactivate a benefits plan, the following must be established in:

- Organizations
- Employees
- Benefits plans

☞ *Refer to the '***Plan Design** *(on page 29)' section for more information on setting up benefits plans.*

- Employee enrollments

☞ *Refer to the '***Enrollment** *(on page 279)' section for more information on enrolling employees in benefits plans.*

Questions answered

The following questions are answered in this section:

1. What organizational changes could result in benefits plan changes?
2. What considerations should be reviewed before you apply benefits plan changes?
3. What tasks must be completed to deactivate a benefits plan?

The effect of organizational changes on benefits plans

In addition to the benefits plan premium changes that you might expect from time to time, you may have organizational changes that can affect benefits plans.

Benefits plans may be affected by organizational and policy changes such as the event examples in the following list:

- Change in benefits plan provider
- Company acquisition/merger
- Policy change in breaks-in-service
- Addition of a union
- Policy changes in part-time employee benefits
- Company match changes
- Change in the plan year start date
- Federal mandates such as maximums for thrift/savings plans
- Change in service method calculation
- Policy change in credited service calculations
- Changes in investment fund choices
- Payroll changes in deduction schedule
- Policy changes in short or long-term disability
- Vesting schedule policy changes

Depending on the event that has occurred in your organization, your benefits plans may be affected dramatically, requiring the complete replacement of your current plans. Alternatively, you may only have to modify the eligibility, contribution, or coverage information that exists in current plans.

Based on the information to be changed, you will use one or more of the following forms to record the new values:

- Basic plan rules—Benefit Plan Rules form (TK-SCR)
- Eligibility—Benefit Plan Eligibility Rules form (TL-SCR)
- Coverage or contribution—Coverage And Contribution Factors form (TM-SCR)
- Contribution HED—Benefit Plan Prototype Contribution HED form (TS-SCR)
- Option elected—Option/Resulting Plan Status Rules form (TTOSCR)
- Separation activity—Activity/Resulting Plan Status Rules form (TTASCR)
- Participation rules—Benefits Participation Rules Table form (TN-SCR)
- Breaks-in-service—Benefits Plan Breaks-In-Service Rules form (TU-SCR)
- Retirement rules—Benefits Retirement Dates Rules Table form (TJ-SCR)
- Flex master plan rules—Flex Benefits Master Plan Rules form (TKFSCR)
- Flex plan credit calculations—Flex Plan Credits Calculation form (FCCSCR)
- Flex plan components—Flex Master/Group Plan Components form (TP-SCR)

☞ *Refer to* **Setting Up Welfare Plans** *(on page 53),* **Setting Up Deferred Plans** *(on page 111), and* **Setting Up Flex Plans** *(on page 173) for information on setting up and modifying benefits plans.*

Benefits plan changes

As you analyze the additions or changes that have to be made to your benefits plans, several considerations should be reviewed before you proceed with the modifications.

Implementation guidelines

Not all organization changes will result in changes to your benefits plans. However, revised policies that affect benefits plans will require that you follow some or all of the same implementation steps you used to initially set up Benefits Administration.

As an example of some of the tasks that were used in the initial implementation, the following list contains items that may need to be repeated for the proposed plan changes:

- Write conversion programs to batch load data.
- Set up environments: development, test, production, and so forth.
- Develop a procedure manual for day-to-day activities.
- Add employee benefits test data.
- Test tables.
- Execute test runs.
- Test the payroll interface.

Review the detail of the Benefits Administration Solution implementation plan and make sure that you perform the appropriate tasks to achieve a successful change in benefits plans setup and administration.

☞ *Refer to* **Implementing Benefits Administration** *(on page 31) for more information on implementation tasks.*

When to make the changes

Some organizational changes may have an immediate effect on benefits plans, while others can be implemented at the start of the next benefits plan year. For example, you may need to make immediate changes to your benefits plans when a company acquisition occurs or there is a change in the payroll deduction frequency. Other policies, such as vesting schedule changes or part-time employees benefits changes, could be timed to coincide with the start of the next benefits plan year.

If you make changes to existing plans, the tables containing the changed values must show the effective date of the changes. This allows you to maintain a plan history so that you can review plan information at any point in time and track changes that have occurred.

See also:

- **Modifying a benefits plan** ***(on page 571)***

For detailed directions on modifying a benefits plan.

New plans and changed plans

If you change to a new benefits provider or add a new type of coverage, you will need to add benefits plans to the Benefits Administration Solution. This requires the setup of new tables that will become effective at a future date. You will then have to enroll employees into the new plans.

Note: *If you are using eCyborg Interactive Benefits, and you add new plans in Benefits Administration or deactivate flex master component plans, you must perform administrative tasks in eCyborg Interactive Benefits to make this information available to eCyborg Interactive Benefits users.*

You may also need to de-enroll employees who are participating in obsolete plans and deactivate any plans that are being replaced. De-enrolling an employee from an obsolete plan prevents further deductions from being processed. You have the option to submit large volumes of enrollments and de-enrollments as a batch process.

If you modify existing plans to accommodate eligibility, contribution, or coverage changes, you will need to change the value(s) and indicate the effective date of the change on the appropriate table. When you change information on tables, you only need to change the specific table that contains the change(s). For example, if there is a plan premium change, you would complete a Coverage and Contribution Factors form (TM-SCR) and enter the effective date of the change. Only those tables that have changed need to be updated.

New hires enrolled after the effective date of the plan change(s) will be covered by the new plan rules. Employees currently enrolled in a plan can change their enrollments if any plan or plan option has a significant change in coverage or cost. When the Recalc Benefit Coverage/Contributions report (85-RPT) is processed for plan changes for the new effective date, the report will indicate currently enrolled employees affected by any change(s). If this report indicates that an employee is no longer eligible for a plan because of the plan changes, you will need to process a deenrollment for that employee.

Processing the HED Segment Changes Effective This Period report (8R-RPT) will copy any contribution changes to payroll.

☞ *Refer to* **Maintaining Employee Benefits Information** *(on page 411) for information about de-enrollment.*

☞ *Refer to* **Benefits/Payroll Interaction** *(on page 535) for information about recalculation reports.*

Apply the Concept
Describe how you can control when a minor change to a plan becomes effective and its impact on new and existing employees.

Plan testing

New plans can be established in Benefits Administration and dated to be effective at some future date. However, in order to test these plans prior to making them effective, you need to set them up in a test environment and complete one or more full cycles of enrollment, recalculation, and reporting. Copy your plans to a production environment only when the plans have been tested and approved in a test environment.

You need to follow the same rules in your test environment as you would in an implementation. If you want the Pending Plan Enrollment/De-enrollment form (90-SCR) to perform eligibility checking correctly, the initial set of plan tables must have an effective date that is early enough to cover the original hire date of the first employee in your organization.

If your policy changes result in minor changes to existing benefits plans, you can prevent processing errors by testing your changes in a separate environment before you implement them. Make sure that you process a full cycle of enrollment and recalculation, followed by generating reports that can be reviewed for errors.

☞ *Refer to* **Implementing Benefits Administration** *(on page 31) for information on setting up and using test environments.*

The benefits plan deactivation process

If your organizational changes result in the need to replace one or more benefits plans, you will need to deactivate obsolete plans that will no longer be used. Prior to deactivating a plan, you must identify and de-enroll all employees currently enrolled in the plan(s).

Identifying employees for de-enrollment

To identify the employees who are enrolled in each obsolete plan, you may process the Plan Premium Statements report (4I-RPT). Report parameters allow you to specify the as-of date and the benefits plan(s) to be included in the report. Use this report as a working document from which to process plan de-enrollments for employees currently enrolled in the obsolete plan.

See also:

- Identifying employees for de-enrollment from an obsolete plan ***(on page 572)***

For detailed directions on identifying employees for de-enrollment from an obsolete plan.

Plan de-enrollment

Plan de-enrollments can be recorded on the same forms that were used to enroll the employee in a benefits plan:

- Welfare plan—Welfare Plan Enrollments/Changes form (55-SCR)
- Deferred plan—Deferred Plan Enrollments/Changes form (64-SCR)
- Flex plan—Flex Benefit Enrollments/Changes (55FSCR)

You may process the appropriate form for each employee online or submit a large volume of de-enrollments using the batch loading process.

☞ *Refer to* **Batch Loading of Benefits Forms** *(on page 917) for batch loading information.*

When you de-enroll an employee from an obsolete plan, the company and employee contributions are inactivated. You do not have to make a separate entry to stop the deductions—de-enrolling the employee performs that function when the 'Shutoff/Deenroll' or 'Waived' option is used.

Processing the HED Segment Changes This Period report (8R-RPT) copies the deduction information to payroll and prevents further plan deductions from occurring.

☞ *Refer to* **Maintaining Employee Benefits Information** *(on page 411) for information on de-enrolling employees.*

See also:

- De-enrolling an employee from an obsolete plan ***(on page 573)***

For detailed directions on de-enrolling an employee from an obsolete plan.

- Copying deduction changes to Payroll ***(on page 573)***

For detailed directions on copying deduction changes to Payroll.

Apply the Concept
If you have to deactivate a plan, what tool will you use to identify employees that must be de-enrolled from the plan?

Plan deactivation

After you have processed all the plan de-enrollments, you may deactivate welfare, deferred, and flex plans using the Benefit Plan Rules form (TK-SCR) for each plan. You will need to enter a new effective date for the table and change the plan class to 'inactive'.

Deactivating a plan does not remove it from the file. It remains on the file for historic purposes. Deactivating an obsolete plan prohibits future employee enrollment in that plan. Benefits Administration will not allow employee enrollment in any plan that is inactive.

See also:

- Deactivating a benefits plan ***(on page 574)***

For detailed directions on deactivating a benefits plan.

Apply the Concept
If you have to deactivate a plan, what things will you consider when determining whether to manually de-enroll employees or submit the de-enrollments using the batch loading process?

Detailed Directions

This section provides detailed directions on completing a business task.

Tasks

Completing the Guided Practice

Not all of the tasks in the Detailed Directions for this chapter require a Guided Practice since the tasks were included in prior chapters. In the Guided Practice for the task 'Deactivating a benefits plan' you will deactivate welfare plan 604.

It is not necessary to complete the Guided Practice in the prior chapters to guarantee the successful completion of the Guided Practice that follows.

Modifying a benefits plan

In this task, you identify the changes to be made to each benefits plan and then access each table record affected. Make the appropriate changes to each table record and process the entry. You then process two reports that will apply the plan changes to employee records and copy contribution changes to Payroll.

1. Access the benefits table record to be changed

Access the appropriate benefits plan table record for the plan change:

- Basic plan rules—Benefit Plan Rules form (TK-SCR)
- Eligibility—Benefit Plan Eligibility Rules form (TL-SCR)
- Coverage or contribution—Coverage And Contribution Factors form (TM-SCR)
- Contribution HED—Benefit Plan Prototype Contribution HED form (TS-SCR)
- Option elected—Option/Resulting Plan Status Rules form (TTOSCR)
- Separation activity—Activity/Resulting Plan Status Rules form (TTASCR)
- Participation rules—Benefits Participation Rules Table form (TN-SCR)
- Breaks-in-service—Benefits Plan Breaks-In-Service Rules form (TU-SCR)
- Retirement rules—Benefits Retirement Dates Rules Table form (TJ-SCR)
